3. Furnish information regarding any other person's race, religion, nationality or national origin.

4. Refrain from doing business with any person other than the boycotted country or its nationals.

5. Refrain from doing business with the boycotted country or its nationals pursuant to an agreement with, requirement of, or a request from, or on behalf of any boycotting country. The mere absence of a business relationship with or in the boycotted country or with its nationals would not constitute a violation of the above.

6. Furnish information about whether any person does, has done, or proposes to do business with the boycotted country or its nationals or with any person known or believed to be boycotted.

B. EXCEPTIONS TO PROHIBITIONS

The above general prohibitions would not apply to:

1. Compliance with import rules of boycotting country prohibiting import of goods from boycotted country or its nationals or shipment of such goods on carrier of boycotted country or via a route described by boycotting country.

2. Compliance with import and shipping document requirements of boycotting country with respect to a positive designation of a country of origin of the goods and name and route of carrier and name of supplier.

3. Compliance with export requirements of boycotting country with respect to transshipment of good to boycotted country.

4. Refusing to honor letters of credit where beneficiary fails to comply with requirements thereof, except where such compliance would be a violation of the law.

C. SCOPE OF COVERAGE

Above prohibitions and reporting requirements would apply to (1) U.S. persons (defined as individuals plus corporations organized under U.S. law); U.S. controlled subsidiaries and affiliates; and (3) persons doing business in the United States with respect to their business in the United States.

The test of control would be control in fact: Does the parent in the ordinary course of business control the activities or determine the policies of the subsidiary?

D. ENFORCEMENT

Enforcement would be by Commerce Department administrative process in accordance with APA. Rules and regulations to be

effective within three months of enactment. Actions pursuant to existing agreements must be brought into compliance three months after effective date of regulations.

E. DISCLOSURE

Exempted from public disclosure would be information regarding the quantity, description and value of any goods to which the boycott report relates if the Secretary of Commerce determines that disclosure thereof would place the person reporting at a competitive disadvantage.

Charging letters or other documents initiating enforcement proceedings would be made public.

Mr. WILLIAMS. Essentially, Mr. President, six objectives would be accomplished by the enactment of this antiboycott provision.

First, it would strengthen the Export Administration Act by making it illegal for American firms to engage in secondary or tertiary boycotts. Hereafter, the threat of economic reprisal by the Arabs cannot be accepted as a basis for permitting American firms to submit to odious terms that violate the rights and interests of other Americans, or bridge this Nation's sovereign powers.

Second, it will specify with precision conduct and actions prohibited for American persons. Unlike the present uncertainty, it will clarify for American businessmen the range of permissible and impermissible conduct allowable under our laws. This is in sharp contrast to the current confusion as to the actual meaning of "compliance" with a foreign boycott.

Third, under the terms of the bill, U.S. business will be protected from the pressures of foreign boycott requests. It would be a matter of national law that U.S. businessmen may not discriminate on the basis of race, religion, nationality, or national origin or furnish this type of information pursuant to a foreign boycott request. In this sense, the bill reaffirms that the civil rights of our citizens may not be violated by foreign governments, nor will American firms be allowed to aid and abet in such violations.

Fourth, the bill will assure that American businessmen will have freedom of choice as to their commercial relationships any place in the world, and especially at home. So, for example, the notorious Arab blacklist will no longer determine which supplier, subcontractor, customer, or officer an American firm can have or use.

Fifth, the bill will require accountability by the Commerce Department in its administration and enforcement of the antiboycott provisions, both to the public and to the Congress by virtue of expanded public disclosure and more frequent and detailed reporting.

And, finally, the bill will in no way interfere with the primary boycott by the Arab league countries against Israel. Thus, it conforms to the governing principles of international law and respects the sovereign powers of all countries.

Mr. President, this bill deals responsibly with extremely sensitive matters. Its measured provisions are not designed to disrupt any of the initiatives toward a permanent and equitable peace in the Middle East, nor should they be construed to have such an effect. I hope peace will come to this region. The United States must continue to be the catalyst for such a peace and no effort should be spared in order to secure it.

Until it comes, however, I believe these are measures which must be taken by the United States to protect its sovereignty and integrity and to prevent the erosion of values sacred to our democracy under present international realities.

First, the United States must not acquiesce in attempts by foreign governments to coerce American citizens to participate in actions with are anathema to American values. Freedom from discrimination is a benchmark of our democracy. The President and the Congress should reaffirm their resolve through new legislation to attack the most repugnant dimensions of the Arab boycott of Israel and signal to the world that the United States will not participate in or tolerate attempts by foreign governments to enlist our citizens in their battles against other nations.

Second, restrictive and discriminatory trade practices stemming from the Arab boycott must be ended in order to achieve the free and open climate in international trade that has always been a cornerstone of American policy. Distortions in international commerce which are the collateral effects of the Arab boycott can only impede global economic recovery and impede progress toward an environment for international investment unencumbered by governmental influence.

These should be the objectives of U.S. policy and laws and this is the enabling legislation.

Mr. PROXMIRE. Mr. President, today I am cosponsoring a bill to be introduced by Senator WILLIAMS to extend the Export Administration Act which expired on September 30, 1976. As we all know, both Houses of Congress passed bills last year which would have extended the act in a timely manner. Those bills were killed by the Ford administration because they contained provisions to deal with the Arab boycott of Israel and of American firms. This bill, the Export Administration and Foreign Boycott Amendments Act of 1977, will extend the act and provide tough boycott provisions. I am proud to support this legislation which is the same as legislation being introduced in the House today.

Israel is a tiny country in the Middle-East, surrounded by hostile Arab neighbors. The economies of the Arab nations in that part of the world are booming as a result of the more than fivefold increase in the price of oil since they put an embargo on oil exports in 1973. As a result, the Arab nation's of the Middle-East have a favorable balance of trade which runs into the tens of billions of dollars each year. The income of those nations are so high that even their booming economies cannot absorb the goods which their purchasing power may claim. As a result, the Arab nations are awash with liquidity which they invest in the largest banking institutions. The economic clout such liquidity gives the Arabs is enormous.

Trade between the Arab nations and the United States is increasing rapidly. We are exporting large amounts of goods and services to the Middle-East. The impact upon our own economy by such export trade in terms of jobs and upon our own balance of trade is significant.

Unfortunately, a substantial portion of our exports to the Middle East is in the form of military hardware. We are literally arming these nations to the teeth with American produced weapons. The consequences of this weapons buildup will be with us for many years. Israel is a gallant ally which the United States has the strongest kind of moral commitment to defend. There is no doubt that we shall find it necessary in the future to increase our arms supplies to Israel to maintain an effective balance of power in that region.

The Arab nations have made no secret of their desire to destroy our Israeli ally either by force of arms or economic means. A central place in this scheme is the use of their financial muscle to try to choke Israel to death with an economic boycott. They have no hesitation about hammering American firms into line on the issue nor do they flinch at distorting our foreign and domestic commerce. According to information filed with the Department of Commerce the number of export transactions involving an Arab boycott demand jumped from 785 in 1974 to 7,545 in the first 9 months of 1975. This is a tenfold increase. While 23 firms reported receipt of Arab boycott demands in 1974, the number increased to 538 during the first three quarters of 1975. The estimated dollar volume of goods affected by Arab boycott demands during such periods increased from $9.9 to $203 million. As Arab trade and investment grow, so will the pressure on U.S. firms to comply with the boycott.

Both foreign and domestic trade transactions should be executed on the basis of price and quality of goods and services. Boycotts are fundamentally destructive of the concept of the free market. They exclude participation in the market by firms on grounds other than the quality of the goods which they produce. Boycotts are refusals to deal which have long been outlawed by the operation of our antitrust laws because of their pernicious effects.

Boycotts are also fundamentally at odds with our way of life in the United States. Ours is a pluralistic society where the principal of equal opportunity operates to insure that the best produced goods will find their way to the marketplace judged solely on the merits. The Arab boycott is particularly destructive of our basic values because it puts the elements of race and national origin into marketing decisions. The costs of the Arab boycott come too high. Our reputation is tarnished in the eyes of the world. Our national state of mind is infected with the toleration of religious-racial discrimination. This corrupts our institutions and our values.

Even our largest financial institutions are drawn into the Arab net by which their boycott policies are enforced. American firms through their banks which issue letters of credit to finance international trade must certify that no

part of the goods are of Israeli origin; neither the exporter nor any of its affiliates is on the Arab "blacklist"; the vessel carrying the goods is not "blacklisted"; and the insurer of the goods is not "blacklisted." Over 1,500 American firms are on the Arab "blacklist." An American firm which desires to do business with the Arabs must refuse to do business with any of these "blacklisted" American firms. And such American firms must forego commercial relations with Israel thus discouraging foreign commercial relationships by American firms that might otherwise arise.

Let us make no mistake about it. The Arabs force American firms and American banks to discriminate against America's Jewish ancestry. New York State has filed antidiscrimination cases against Citibank and Morgan Guaranty, two of the Nation's largest banks, for their part in enforcing the Arab boycott on this basis. According to public reports, the complaint accused the two banks of routinely enforcing provisions in letters of credit that bar payment for exports to Arab countries unless the American suppliers certify that they have complied with the Arab boycott against Jewish individuals, Jewish organizations and companies that have Jewish sounding names. There is no question that these boycott practices must be stopped.

The existing provisions of the Export Administration Act are woefully inadequate. This bill will put teeth into the law to prohibit all aspects of the Arab boycott which undermine our commerce. Specifically this bill will prohibit any of the following actions taken to comply with the Arab boycott:

First. Refraining from doing business with Israel or any corporation organized by Israel or by any national or resident of Israel.

Second. Refraining from doing business with any other person or company.

Third. Refraining from employing or otherwise discriminating against any U.S. person on the basis of race, religion, nationality, or national origin.

Fourth. Furnishing information with respect to the race, religion, nationality, or national origin of any U.S. person.

Fifth. Furnishing information about the business relationships of a company with or in Israel, or any concern organized in Israel, or with any national or resident of Israel, or with any firm on the Arab boycott "blacklist".

Mr. President, I can see absolutely no reason why any firm should be allowed to supply any information whatsoever concerning the race, religion, nationality, or national origin of any person. Furthermore, I see no reason why the Arab nations should be allowed to obtain any information concerning the business relationships of American firms with Israel, or with any other companies. This kind of information request is so pernicious and fraught with danger that it should never be given in a commercial transaction. The only reason for obtaining such information is to enable compliance with the Arab boycott and "blacklist" and should, therefore, be prohibited in my view by this bill. The supplying of any such information can only support a subtle compliance with the "blacklist" by encouraging negative views about Israel or certain firms and should not be countenanced in any circumstances.

Where an Arab nation has a legitimate commercial interest in information concerning the place of production of goods or methods of shipment of such goods exceptions are provided in the legislation. The bill also requires disclosure of boycott requests and intentions to comply with such requests to the Secretary of Commerce and provides for public inspection of such reports. This disclosure provision should be a strong deterrent to compliance with the boycott by American firms. Any violations of the antiboycott provisions of this bill are subjected to loss of export privileges.

Mr. President, this is a tough bill. But every provision is necessary. Businessmen and bankers cannot be permitted to conduct the trade and commerce of the Nation in a manner which violates the principles on which our Nation was founded.

By Mr. HOLLINGS:

S. 94. A bill to improve the operation and efficiency of the U.S. Postal Service; to the Committee on Post Office and Civil Service.

POSTAL REORGANIZATION ACT AMENDMENTS OF 1977

Mr. HOLLINGS. Mr. President, as we all know, most Americans are dissatisfied with the U.S. Postal Service. We receive literally thousands of letters expressing this dissatisfaction from our constituents. Daily, we read stories and editorials which express concern about the erosion of service and which question the management of the Postal Service. We are not only seeing the erosion but we are experiencing a crisis in confidence in an institution which touches and effects the lives of almost every American daily.

In 1970, we in the Congress, with the support of the President, past Postmasters General, and most mail users transformed the old Post Office Department into a publicly-controlled corporation named the U.S. Postal Service. For 6 years, we have watched the Postal Service hoping that it would be able not only to survive, but to provide more efficient service. We have been disappointed. Service has eroded and the poorer service is costing us more. The prices for mail users are rising and we have recently been compelled to raise the level of the Federal appropriation.

If the Postal Service were truly a business, it would be bankrupt. Their annual report for 1976 shows a net loss of $1,176,000,000. Total current assests are $1,344,984 while total current liabilities are $2,098,010. In the private sector, an excess of liabilities over assets, coupled with revenues that regularly fail to cover expenses, strongly suggests that the entity is bankrupt. Of course, the Postal Service's equity is not quite like that of a corporate entity since most of the Service's liabilities are held by the Federal Financing Bank of the U.S. Treasury, another Government entity.

Last year, the Congress decided to place a moratorium on service cuts and rate increases, to authorize additional funding and to appoint a blue ribbon commission with the task of studying and defining postal difficulties. I objected to this procedure and I offered a comprehensive alternative reform measure.

However, the Commission is appointed and they are presently working toward their goal of reporting back to the Congress in March of this year. I am hopeful that their report will prove enlightening, but at the same time I do not feel that the Senate can ignore our postal dilemma.

President-elect Carter has also made several statements criticizing the Postal Service and suggesting his plans for correcting postal problems. Thus, it seems that the new administration and the Congress can work together to attack and solve the many difficult problems facing the Postal Service.

Accordingly, I am introducing a postal reform bill which is similar to my substitute amendment to H.R. 8603 which was debated on August 23 and 24, 1976. I refer my colleagues to the CONGRESSIONAL RECORDS of those dates for a comprehensive review of my proposal which consists of the following provisions:

First. Annual authorization.—The Postal Service would be required to come before the Congress each year for authorization and appropriation of its total budget.

Second. Presidential appointment of Postmaster General.—The Postmaster General would be appointed by the President and confirmed by the Senate. The Postal Service requires positive attention and guidance from as well as accountability to the executive branch.

Third. Abolish Board of Governors.—The Board of Governors simply has not done the job. Also it should be the responsibility of the Congress, publicly accountable representatives, to guide and direct the Postal Service.

Fourth. Limit borrowing authority.—The ability of the Postal Service to borrow funds to offset operating expenses would be limited to $500 million at any one time. This provision will provide the Postal Service with a buffer should a cash flow problem arise during the annual authorization and appropriations process.

By Mr. BROOKE (for himself and Mr. MCINTYRE):

S. 97. A bill to amend the Internal Revenue Code; to the Committee on Finance.

ENERGY CONSERVATION TAX CREDITS FOR RESIDENCES AND SMALL BUSINESSES AMENDMENT

Mr. BROOKE. Mr. President, we begin the new year and the 95th Congress at a time when the Nation's energy supply problem is once again reaching crisis proportions. Our dependence on foreign petroleum products is vastly greater than it was when the Arabs imposed the embargo of 1973. The temporary sense of urgency our people felt in the face of a demonstrated need to conserve energy has now evaporated. The Nation's elected

officials have not yet provided the unequivocal leadership needed to assure public acceptance of the across-the-boards conservation program we so clearly need.

Although the last Congress took several important steps to increase energy conservation in the United States, it failed to act on two of the most fundamental and most effective policy proposals before it. Saving at least part of the approximately 300 million barrels of oil wasted each year by inefficiently insulated and equipped homes and businesses is vital to any sound conservation policy. It can be done at once and it can provide immediate economic relief. But for the homeowner or small businesses, the incentives to put up a substantial cash sum to insulate, install solar or wind equipment, or upgrade the heating plant are now lacking. And therefore we need a short-term tax credit to provide the needed boost to get the conservation and solar market going.

As many will remember, the House of Representatives enacted a package of tax incentives for energy conservation and production in 1975. I joined other Senators in testifying before the Senate Finance Committee on these issues in July of that year. In December, I introduced the first tax credit for home insulation and heating system improvement to be considered by the Senate. At the request of the Senate Committee on Finance I withdrew my legislation for later consideration. And, in August of this year, after I reintroduced my proposal, the Senate Committee on Finance included similar provisions in its proposed Energy Conservation and Production Revenue Act. Unfortunately, the 94th Congress failed to act on the measure before adjourning.

Similarly, neither House acted on measures to promote electrical energy conservation and to reform utility regulatory practices. The basic regulatory systems in effect today encourage inefficient use of electricity. We can and must reform our ratemaking systems so that private utilities price the power they sell so as to encourage conservation of precious energy resources.

Nearly 2 years ago, I filed the Electric Utility Rate Reform Act. We needed it then; we need it worse now. In the last Congress, the Commerce Committees of each House held hearings on comprehensive rate reform proposals, but neither House acted on such bills. I have taken those elements I believe to be the most important from the recommendations made by the many experts who reviewed the various proposals and used them to elaborate upon the original proposals I made in 1975. Taken together, the Electric Utility Rate Reform Act of 1977 and the energy conservation tax credits for residences and small businesses fill in major gaps in our national energy conservation program.

My proposed energy conservation tax credit bill is self-financing. It provides for:

Refundable tax credits to homeowners and small businesses for costs of installing insulation and solar or wind energy equipment and for improving the efficiency of existing heating systems.

For homeowners, the maximum credit would be $225 for insulation and heating system improvment and $2,000 for solar or wind energy equipment installation.

Small businesses could take the investment tax credit for such expenditures.

A one-half cent tax on gasoline is imposed as of January 1, 1978 until December 31, 1980 to cover the added costs to the Treasury resulting from this measure.

Of course, the proposed gasoline tax will engender controversy. However, I am convinced that it is the most efficient and flexible way to raise revenue for energy program purposes. Gasoline is the petroleum product which we use the most carelessly and profligately. Also its use is relatively insensitive to price increases. But, to the extent that a slightly higher price over the 3 year life of this can indeed help cut back on the use of gasoline, I believe it to be of extra benefit.

In any case, I estimate that the revenue losses from my proposed tax credits will total $321 million for the first calendar year of its existence and slightly over $500 million for each succeeding calendar year. The one-half-cent gasoline tax should generate a slight revenue surplus the first year and very nearly exactly cover the tax revenue losses with each succeeding year's revenues.

My legislation reforming electric utility rates sets national standards which utility commissions must observe when establishing rate schedules. These Federal standards are designed to insure fair prices and full disclosure to the consumer and to promote energy conservation by reducing peak load demand. The Electric Utility Reform Act of 1977 mandates:

Charges reflecting the actual cost of serving each consumer. Declining bloc rate structures, under which the largest users pay the least per kilowatt hour, are explicitly prohibited unless it can be proven that these low rates truly reflect a low cost of service.

Adoption of load-management techniques, such as peak-load pricing, which will reduce the maximum demand and thus also reduce the need for expensive new generating facilities.

Changes in the use of the fuel adjustment charge so that extensive evidence of the need for such charges must be made public in a hearing and so that unjustified charges may be fully refunded to the consumer.

Full disclosure of all the utility price and cost data on which rate requests are made, so that individuals or public interest groups may review, and, if necessary, challenge, new rate requests.

Grants to public utility commissions so that they may upgrade their operations and their research to permit them to deal with contemporary regulatory issues in the most efficient and timely manner possible.

Both these proposals are ideas whose time has long since arrived. I believe we are still in a crisis state with respect to long term fuel supplies. And the majority in Congress must stop underestimating the potentially serious consequences of our growing dependence on imported petroleum. Mr. President, we can change our old habits of wasting fuel and we can increase our utilization of renewable resources at once. Any amount of energy saved gives far greater benefits than the equivalent developed or discovered and exploited amount of new energy. These incentives and regulations are the tools governments and the private sector need to make conservation the predominant source of the "new" energy we so need.

I ask unanimous consent that a section-by-section analysis of the bill be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

ENERGY CONSERVATION TAX CREDIT FOR RESIDENCES AND SMALL BUSINESSES AMENDMENT SECTION-BY-SECTION ANALYSIS

SECTION 1

Section 1(a) sets out the short title of the bill. Section 1(b) provides that, unless otherwise expressly indicated, all references to amendments or repeals of sections or other provisions shall be to sections and provisions of the Internal Revenue Code of 1954.

SECTION 2

Section 2 of the bill contains the "Findings" which recognize that the heating of homes and small businesses account for a significant portion of our national energy consumption; that domestic energy sources are limited, that it is in the best interest of the nation to conserve the use of fossil fuels and increase the use of renewable energy resources; that significant savings in fuel and dollars can be achieved by the installation of commercially available heating system retrofit components of new technologies employing renewable resources for heating and cooling buildings; and that it is important, as a national objective, to encourage sound investment practices which improve the operating efficiency of existing heating systems in homes and small businesses.

SECTION 3

Section 3(a) modified subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) by adding a new section, Section 44A, to the Internal Revenue Code of 1954.

Section 44A(a) would provide a tax credit for individuals equal to 30 percent of that portion of the qualified insulation or other energy-conserving component expenditures incurred by the taxpayer in connection with any residence as does not exceed $750.00. The maximum credit per individual would not exceed $225.00.

Section 44A(b) would provide that the credit allowed by this section would reduce the tax imposed by this chapter 1 before any of the other reductions permitted by section 33 (relating to foreign tax credit), section 37 (relating to retirement income), section 38 (relating to investment in certain depreciable property), section 41 (relating to contributions to candidates for public office), and section 44 (relating to purchase of new principal residence).

Section 44A(b) (2) would provide for a reduction in the amount of expenditures allowed for purposes of computing the credit by the amount of expenditures allowed in a prior taxable year for which a credit was taken by the taxpayer.

Section 44A(b) (3) would require that no credit be allowed under subsection (a) unless the expenditures are verified in a manner prescribed by regulations adopted by the Secretary.

Section 44A(b) (4) would prohibit the use of the credit allowed under subsection (a) for expenditures incurred in connection with the installation of entirely new heating systems, including furnaces, or for the installation of equipment designed to permit the use of fuels other than the fuel being consumed by the taxpayer's existing heating system.

Section 44A(c) would set out the following definitions and special rules:

(1) Insulation and other energy-conserving component expenditures would be defined as those expenditures incurred by an individual for insulation and energy-conserving components installed after June 30, 1977, and before January 1, 1980, in dwelling units located in the United States which are used by the taxpayers as their residences and which are in existence on May 25, 1977. The expenditures could include amounts paid for the original installation of such insulation but would not include amounts paid for insulation and other energy-conserving components made in connection with any reconstruction of a dwelling unit.

(2) Insulation would be defined to include the insulation of furnaces and/or boilers not so equipped and ducts and/or steam or hot water piping extending therefrom, storm (or thermal) windows or doors or any other similar item which is specifically and primarily designed to reduce the heat loss or gain of such building, the original use of which would commence with the taxpayer, which would have a useful life to the taxpayer of at least 3 years, and which would meet the criteria and standards for energy-conserving improvements prescribed by the Secretary of Housing and Urban Development (HUD) under Section 2 of the National Housing Act or such similar criteria and standards as the Secretary of the Treasury would prescribe.

(3) Other energy-conserving components would be defined to include retention-head burners or comparable new burners which achieve a reduction in the amount of fuel consumed, electronic ignitors, new nozzles with reduced firing rates, zone controls, barometric draft control dampers or any other convective stack dampers which reduce downtime losses, end cone assemblies, combustion chambers, automatic steam vents, and clock thermostats, all of which would be required to meet performance and safety standards prescribed by the Secretary of Treasury, after consultation with the Administrator of FEA and the Secretary of HUD, such standards to include the requirements that the energy-conserving component would have a useful life of at least 3 years and the original use of which would commence with the taxpayer. It would be mandatory under this provision that the Secretary prescribe appropriate regulations within 6 months from the date of enactment.

(4) The term "heating system" would be defined to mean the entire assembly of items, fixtures, equipment, or materials which is designed to provide for the heating of buildings, to provide for the heating of water used within buildings and to provide for the automatic operation and control of such hardware. The term would include all necessary fittings and related installations which are part of the assembly.

(5) In the case of any dwelling unit which would be jointly occupied and used during any calendar year as a residence by 2 or more individuals, the total credit would be subject to the regular limit for one person (30% of the first $750.00 of expenditures) and would be apportioned among those who made the expenditures in accordance with the proportion which each paid would bear to the total payment during the calendar year.

(6) In the case of qualifying expenditures by a cooperative housing corporation, each of the corporation's stockholders would be treated as having paid for that portion of the corporations qualifying expenditures that is the same as his proportionate share of the corporations' total outstanding stock so long as the stockholder is entitled to occupy a dwelling unit owned by the corporation, and, who in fact, occupies the dwelling unit as his residence.

Section 44A(d) would provide that the basis of any property could not be increased by the amount of any qualified insulation and other energy conserving component expenditures made with respect to such property to the extent of the amount of any credit allowed under this section with respect to such expenditures.

Section 44A(e) would limit the applicability of this section to amounts paid on or before December 31, 1979 except in the case of amount paid after such date pursuant to a binding contract entered into before January 1, 1980.

Section 3(b) of the bill would make the tax credits under this section refundable where the taxpayer has no tax liability.

Section 3(c) of the bill would provide for technical and conforming amendments.

Section 3(d) provides that the Secretary of the Treasury is to report six months after enactment and recommend the best ways to establish within the Executive Branch a capability for evaluating new improvements in fossil fuel heating systems. The report should include recommendations as to how to qualify new technologies which offer significant opportunities for energy savings for the tax credits established in this bill. The report may, if necessary, include recommendations for new legislation.

SECTION 4

Section 4(a) would amend subpart A of part IV of subchapter A of chapter 1 (relating to credits allowable) by adding a new section, Section 44B, to the Internal Revenue Code of 1954.

The new Section 44B(a) would provide a tax credit for the purchase and installation of solar heating equipment installed, on, or in connection with a residence. The tax credit would be computed as follows: 40 percent of the first $1,000.00 of qualified solar energy equipment expenditures incurred by the taxpayer during a taxable year; 25 percent of the next $6,400.00 of qualified expenditures (covering a total $7,400.00 of expenditures). For purposes of this section, qualified wind-related energy generating equipment expenditures would be treated as qualified solar energy equipment expenditures.

Section 44B(b) would provide that the credit allowed by this section would reduce the tax imposed by this chapter 1 before any of the other reductions permitted by section 33 (relating to foreign tax credit), section 37 (relating to retirement income, section 38 (relating to investment in certain depreciable property), section 40 (relating to expenses of work incentive programs), section 41 (relating to contributions to candidates for public office) and section 44 (relating to purchase of new principal residence). Reductions allowed under sections 42 and 44A would be taken first, however.

Section 44B(b)(2) would provide for a reduction in the amount of expenditures allowed, for purposes of computing the credit, by the amount of expenditures allowed in a prior taxable year for which a credit was taken by the taxpayer. In applying the provisions of this paragraph, the prior expenditures would be applied first to reduce the $1,000.00 amount contained in paragraph (1) of subsection (a) until the amount would be reduced to 0, and additional prior expenditures, in excess of $1,000.00 would be applied to reduce the $7,400.00 amount contained in paragraph (2) of subsection (a) until it would be reduced to $1,000.00.

Section 44B(b)(3) would make it clear that the credit could only be claimed if provision is made by law for the assessed evaluation of the residence not to be increased on account of improvements attributable exclusively to the installation of the qualified equipment.

Section 4(c) of the bill contains definitions and special rules as follows:

(1) Qualified solar energy equipment expenditures would be defined as those qualified solar energy expenditures incurred by an individual after June 30, 1977, and before January 1, 1982 for solar energy equipment in, on, or connected to any dwelling unit located in the United States.

(2) Qualified wind-related energy equipment expenditures would be defined as those qualified wind-related energy equipment expenditures incurred by an individual after June 30, 1977, and before January 1, 1982, for wind-related energy equipment on or adjacent to any dwelling unit located in the United States.

(3) Wind-related energy equipment would be defined as equipment installed on, or adjacent to, a building using wind energy to generate electricity to heat or cool or light such building or to provide hot water for use within such building, which would meet the standards and criteria for performance prescribed by the Secretary of Housing and Urban Development, the original use of which would commence with the taxpayer, and which would have a useful life of at least 3 years.

(4) Solar energy equipment would be defined as that equipment which, when installed in or on, or when connected to a building would use solar energy to heat such building or provide hot water for use within such building and which would meet the latest technical standards prescribed by the Secretary of HUD under the Solar Heating and Cooling Demonstration Act of 1974, the original use of which would commence with the taxpayer and which would have a useful life of at least 3 years.

(5) This paragraph would provide that in the case of any building which is owned by two or more individuals, the total credit would be subject to the regular limit for one person and would be apportioned among those who made the expenditures in accordance with the proportion which each paid would bear to the total payments made during the calendar year.

(6) This paragraph would provide that in the case of qualifying expenditures by a cooperative housing corporation, the corporation's individual stockholders who would be entitled to occupy the dwelling units, would be treated as residents of those units and as having paid for the portion of the corporation's qualifying expenditures that is the same as their proportionate share of the corporation's total outstanding stock.

Section 4(d) requires that the basis of any property could not be increased by the amount of any qualified solar or wind energy equipment expenditures made with respect to such property to the extent of the amount of such credit allowed under this section with respect to such expenditures.

Section 4(a) would set a termination date of December 31, 1981, after which expenditures for qualified equipment would not be eligible for the tax credit provided by this section.

Section 4(b) would make the tax credit a refundable tax credit.

Section 4(c) contains technical and conforming amendments.

Section 4(d) would set the effective date for the amendments made by this section as of June 30, 1977. The credit would apply to amounts paid or incurred after that date.

SECTION 5

Section 5(a) modifies part B of part IV of subchapter A of chapter 1 (relating to rules for computing credit for investment and in certain depreciable property) by adding a new section, section 46A, to the Internal Revenue Code of 1954.

Section 46A(a) would provide for an alternative computation of the investment credit for certain energy conservation and production equipment for small businesses.

Section 46A(b) makes the following property eligible for the alternative computation:

insulation, solar energy equipment or wind-related energy equipment.

Section 46A(c)(1) would provide for the computation of the percentage as follows:

(A) 10% with respect to property described in subsection (b)(1) which is pre-1981 property.

(B) 20% with respect to property described in subsection (b)(2) which is pre-1981 property.

(C) 10% with respect to property described in subsection (b)(2) which is pre-1981 property, but which is not pre-1983 property.

(D) 12% with respect to property described in paragraphs (3), (4), (5), (6), and (8) of subsection (b) which is pre-1981 property, and

(E) 12% with respect to property described in paragraph (7) of subsection (b) which is pre-1981 property.

Section 46A(c)(2) would provide an additional 2% in the case of small businesses which elect to have the provisions of this paragraph apply and which meet the requirements of section 301(d) of the Tax Reduction Act of 1975.

Section 46A(d) would provide for the following definitions and special rules:

(1) Insulation would be defined to mean any insulation, storm (or thermal) window or door, or other similar item (of a character subject to the allowance for depreciation) which is installed in or on a structure in existence on January 1, 1978 (but only if such installation occurs after December 31, 1977 and before January 1, 1980), the costs for which are paid between December 31, 1977 and January 1, 1980, which is specifically and primarily designed to reduce the heat loss or gain of such structure, the original use of which commences with the taxpayer, and which, for residential structures, meets the latest technical standards for energy conserving improvements prescribed by the Secretary of HUD under section 2 of the National Housing Act, and, for business structures, such similar technical standards as the Secretary may prescribe.

(2) Solar energy equipment would be defined to mean property (of a character subject to the allowance for depreciation) which uses solar energy to heat the structure wherein or on it is installed or to provide hot water within such structure, the original use of which commences with the taxpayer, and which meets the interim or definitive performance criteria prescribed, for residential structure, by the Secretary of HUD under the Solar Energy Heating and Cooling Demonstration Act of 1974, and, for business structures, by the Administrator of ERDA.

(3) Wind-related energy equipment would be defined to mean property of a character subject to the allowance for depreciation, which, when installed on or adjacent to a structure, uses wind energy to generate electricity to heat or cool or light such structure or to provide hot water for use within such structure. The original use of the equipment would have to commence with the taxpayer and the equipment would be required to meet such criteria as the Secretary of HUD might prescribe.

(4) Pre-1983 property would be defined (A) to mean property acquired by the taxpayer after December 31, 1977, or the construction, reconstruction, or erection (whether or not the taxpayer) of which is commenced after such date, and which is placed in service by the taxpayer before January 1, 1983, and (B) to mean property under construction on December 31, 1977, to the extent of that portion of the basis which is properly attributable under regulations prescribed by the Secretary to construction, reconstruction, or erection after December 31, 1977.

(5) Pre-1981 property would be defined to mean (A) property acquired by the taxpayer after December 31, 1977 or the construction, reconstruction, or erection (whether or not by the taxpayer) of which is commenced after December 31, 1977 and which is placed in service by the taxpayer before January 1, 1981, and (B) property which is under construction on December 31, 1977 to the extent of that portion of the basis which is attributable, under regulations prescribed by the Secretary, to construction, reconstruction, or erection after such date.

(6) Provides for transitional rules.

(7) This section prohibits the application of this section to property acquired with federal funds.

(8) This subsection prohibits the application of the section to purchases of insulation and solar energy equipment and wind-related equipment by businesses with adjusted gross incomes in excess of $400,000.

Section 46A(e) would provide that if the equipment to which this section applies is converted to some other use other than by which reason of this section is applied to the property, the small business shall be treated for purposes of section 47 as having disposed of such property on the date on which such other use substantially commenced.

Section 46A(f) This section provides that the Secretary shall prescribe such regulations that may be necessary to carry out the provisions of this section.

SECTION 6

Section 6(a) would effectively deny the taking of the investment credit for certain air conditioning and heating units. The heating and air conditioning units to which the amendment is directed are portable and are not permanently attached to buildings.

Section 6(b) would set the effective date for the amendment made by subsection (a) of December 31, 1977.

SECTION 7

Section 7(a) would amend subpart A of part III of subchapter A of chapter 32 (relating to manufacturers' excise taxes) by redesignating section 4084 as 4085, and by inserting after section 4083 a new section 4084 which would effectively impose an increase in the gasoline tax of one-half cent per gallon with respect to gasoline sold after December 31, 1977 and before January 1, 1981.

Section 8(b) contains technical amendments.

Section 8(c) contains a clerical amendment.

By Mr. CANNON:

S. 98. A bill to amend the Internal Revenue Code of 1954 to increase the limitation on the credit for certain State-imposed gaming taxes under section 4464; to the Committee on Finance.

Mr. CANNON. Mr. President, during the 91st Congress, I offered legislation to provide that 80 percent of the Federal occupational taxes collected on coin-operated gaming devices be credited for similar taxes imposed by a State where the operation of such device is legal.

The prevailing sentiment at that time was that Federal jurisdiction in the area of coin-operated gaming devices was primarily for oversight purposes and not for raising revenue. Therefore, I was extremely pleased when my proposal was agreed upon and signed into public law. My feeling at that time was that the credit figure should have been higher than the 80 percent. I still feel the same way today and am, therefore, sending to the desk a bill to amend the Internal Revenue Code of 1954 to increase the limitation on the credit for certain State-imposed gaming taxes under section 4464. The proposed change strikes "80 percent" and inserts in lieu thereof "95 percent."

I would like to point out that the Nevada Legislature enacted legislation to insure that proceeds resulting from the Federal credit be earmarked for the support of the State's public school system. I fully expect that same arrangement will continue if the proposed formula is agreed upon by Congress.

I believe the proposed change is reasonable in view of the fact that the provision was never intended as a revenue-raising measure. It is also entirely consistent with the findings and recommendations of the Commission on Review of the National Policy Toward Gambling which recently recommended that State governments have sole jurisdiction for legalized gaming activity.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 99. A bill to provide for the construction of a Veterans' Administration hospital in the State of Nevada; to the Committee on Veterans' Affairs.

Mr. CANNON. Mr. President, I am introducing a bill today for myself and my Nevada colleague, Senator LAXALT, to provide for the construction of a Veterans' Administration hospital in the southern part of the State of Nevada.

At the present time, veterans in Nevada are served by only one VA hospital, located in Reno, in northwest Nevada.

Veterans in more populous southern Nevada, 500 miles to the southwest, have no VA facilities, except for limited services provided by an outpatient clinic in the Las Vegas area, and are therefore, almost completely dependent on VA hospitals in crowded Los Angeles, 300 miles away.

I think it is a gross disservice to our veterans to force them to travel to Los Angeles to get treatment of service-related disabilities. In addition, it certainly is not fair to make the veterans of southern California wait for treatment because their facilities are overcrowded.

I urge serious consideration of this proposal at the earliest possible opportunity. Unfortunately, the VA Administrator Richard Roudebush opposed this proposal in his September 1975 report to the Senate Committee on Veterans Affairs on the basis that administration studies indicated the location did not meet the changing requirements of veterans. I want to urge the Senate committee to request an updated study from the Veterans' Administration. Hopefully, that study will take into consideration that the majority of veterans in my State are located in the southern part of Nevada. Our principle city is Las Vegas. This particular location will also be accessible to many veterans in California, Arizona, and Utah.

It is my hope that the 95th Congress and the new administration will give this problem the serious consideration it warrants.

Mr. LAXALT. Mr. President, as my distinguished Nevada colleague, Senator CANNON, has pointed out, veterans of the southern Nevada area are forced to travel to Reno, Nev., some 500 miles

away, or to Los Angeles, Calif., 300 miles away to get treatment for service related disabilities.

The veterans of southern Nevada deserve kinder consideration. I urge favorable consideration of this proposal.

By Mr. INOUYE:

S. 100. A bill to amend section 1003 of title 38, United States Code, relating to memorial areas and appropriate memorials to honor the memory of certain deceased members of the Armed Forces whose remains were buried at sea, have not been identified, or were nonrecoverable; to the Committee on Veterans' Affairs.

Mr. INOUYE. Mr. President, it has been our tradition to honor those who have served our Nation in time of war. We have many cemeteries throughout the world where many of these men and women now lie in rest. For those whose bodies were never recovered, we have required that all national cemeteries have certain special areas which contain memorial plaques to honor the memory of these gallant men and women.

It has recently come to my attention, however, that there are certain veterans who have every right to be honored by burial in a national cemetery, but who are presently ineligible to receive the honor which they deserve. I am referring to those veterans who are eligible to be buried in a national cemetery, but who continue to serve our Nation and humanity even after their deaths by donating their bodies for use in medical research or training. I believe that the Congress of the United States should act to give them the recognition and honor which they deserve, and which by right is theirs. I am introducing at this time a bill to amend section 1003 of title 38, United States Code, relating to memorial areas and appropriate memorials to honor the memory of certain deceased members of the Armed Forces whose remains were buried at sea, have not been identified or were not recoverable, to include deceased members of the Armed Forces who have donated their remains for use in medical research or training.

I hope that my colleagues will recognize the justice of allowing these veterans the honor of memorial plaques in their memory, and will act with favor upon this bill.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 100

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1003(a) of title 38, United States Code, is amended by striking out "or have been determined to be nonrecoverable," and inserting in lieu thereof ", have been determined to be nonrecoverable or have been donated for use in medical research or training.".

By Mr. CANNON (for himself and Mr. LAXALT):

S. 101. A bill to provide for the establishment of a national cemetery in the State of Nevada; to the Committee on Veterans' Affairs.

Mr. CANNON. Mr. President, on behalf of myself and Senator LAXALT, I introduce, for appropriate reference, a bill to establish a national cemetery in the State of Nevada. At present, there is no national cemetery in Nevada to provide for the burial of deceased veterans.

Although national cemeteries came into being during the Civil War to provide for the burial of soldiers who had died in service, most of them are situated where battles occurred and, therefore, are not evenly distributed in the 50 States. For this reason, the Western part of the United States has few national cemeteries, and the many veterans who served during World War II have no place within reasonable proximity to their domicile for burial. During the last World War we had approximately 16 million men under arms, and when you consider their dependents, we have a total of about 50 million people who are eligible for burial.

Due to the inexorable march of time, the need for this legislation is increasing in urgency. Early in the 2d session of the 92d Congress the Senate Committee on Veterans' Affairs considered the proposal to establish a national cemetery in Nevada. Unfortunately, the bill was not adopted. Nevada's congressional delegation has offered this proposal for many years and I am especially hopeful that the 95th Congress and the new administration can work together effectively to enact this proposal into public law.

I urge the committee to reconsider this proposal at the earliest possible opportunity.

Mr. LAXALT. Mr. President, this measure would provide the many veterans of the State of Nevada, who have served our Nation, with a place for burial within reasonable proximity to their domicile.

At present, there is no national cemetery in Nevada to provide for the burial of deceased veterans. This measure would establish a national cemetery in the State of Nevada.

Mr. President, I join my distinguished colleague, Senator CANNON, in urging consideration of this proposal at the earliest possible opportunity.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 102. A bill directing the Secretary of Agriculture to convey the property comprising the Lee Canyon Youth Camp, Toiyabe National Forest, Nevada, to Clark County, Nev.; to the Committee on Agriculture and Forestry.

LEE CANYON YOUTH CAMP

Mr. CANNON. Mr. President, I introduce for myself and Senator LAXALT a bill to convey to Clark County title to a property known as Lee Canyon Youth Camp.

Clark County presently operates the 4-acre site through a special use permit granted the county by the U.S. Forest Service. The camp provides recreation opportunities for an estimated 10,000 persons each year representing the YMCA, church groups, 4–H groups, and others.

Clark County has built numerous structures at the camp including a dining hall, dormitories, a recreation hall, a shop, and water system. The present 20-year lease on this property will expire in 4 years and the potential loss of these facilities at that time will be a severe loss to the people of the county. Additionally, the uncertainty of a lease renewal makes administration of the camp more difficult.

The Nevada Legislature has memorialized the Congress to approve this transfer. Mr. President, I am hopeful this matter will be carefully and fully analyzed and early action taken on the bill.

Mr. LAXALT. Mr. President, Lee Canyon Youth Camp, in Mount Charleston, Nev., is an organizational camp operated by Clark County, Nev., under a use permit from the U.S. Forest Service. During the years, many improvements have been made to the camp and it is in constant demand for use by organizations such as youth groups, churches, and schools.

The present 20-year lease on this property will expire in the near future. This measure would provide a transfer of the property to Clark County in order to preclude the loss of recreational opportunities to the people of Clark County.

Mr. President, I urge serious consideration of this proposal at the earliest possible opportunity.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 103. A bill to convey to the Ely Indian Colony the beneficial interest in certain Federal land; to the Committee on Interior and Insular Affairs.

Mr. CANNON. Mr. President, I introduce with my distinguished colleague, Senator LAXALT, a bill to convey the beneficial interest in some 90 acres of land in White Pine County, Nev., to be used to expand the present colony.

At the present time, the land available to this particular colony is less than 10 acres. This was purchased in 1930 by the United States for Indian village purposes. It was contemplated at that time that it would be occupied by some five Indian families with a population of about 30.

The population of the tribe has grown considerably and the need for additional land is urgent if this low-income minority group is to have the advantages of their neighbors.

The addition of suitable land will permit the colony to take advantage of programs that enable these people to construct their own homes and provide sanitary facilities. This legislation has been introduced previously, but not fully considered. I am hopeful the Senate will give early consideration to the bill and properly meet the needs of these people.

Mr. LAXALT. Mr. President, the Ely, Nev., Indian colony has an urgent need for additional land and facilities. Enactment of this legislation would make sufficient land available to enable the tribal members to take advantage of programs for the construction of their own homes and provide them the same type of living standards that are available to most of us.

Identical legislation was introduced in the 92d, 93d, and 94th Congresses. Unfortunately, action was not forthcoming.

I trust that early approval by the administration and prompt action by the committee will be forthcoming this year.

By Mr. INOUYE (for himself, Mr. BAYH, Mr. CLARK, Mr. HATFIELD, Mr. HUMPHREY, Mr. LEAHY, Mr. MCINTYRE, and Mr. MATSUNAGA):

S. 104. A bill to amend the Social Security Act to provide for inclusion of the services of licensed registered nurses under medicare and medicaid; to the Committee on Finance.

Mr. INOUYE. Mr. President, I am reintroducing a bill which I introduced in the 94th Congress—to amend the Social Security Act to provide for inclusion of the services of licensed—registered—nurses under medicare and medicaid.

Mr. President, the cost of health care in this country is continuing to escalate at an alarming rate, and yet many people still are not receiving the health care they need. In some areas, health services are scarce or simply unavailable. We are moving toward some form of national health insurance, but we must be careful that in enacting a health insurance law we do not perpetuate the deficiencies of the present system. One step we can take now to improve the present system is to provide for better utilization of all of our health care personnel. In many areas of the country where there is a physician shortage—or where there are no physicians at all—registered nurses increasingly are providing health care services to mothers, children, and families. The problem is that many services these nurses are well-qualified to perform are not reimbursable except under the direct supervision of a physician.

Home health services to the elderly by nurses can frequently prevent the need for costly hospitalization or placement in a nursing home. But again, medicare and medicaid, and in fact most health insurance plans, encourage not cost containment but the most expensive kind of care, in institutions.

The nursing profession has been rapidly broadening its traditional role. In some rural clinics, nurses have proved that they can handle up to 80 percent or more of health problems of patients.

While the scope of nursing knowledge, skill, and experience has expanded greatly, the public perception of the nurse as the handmaiden to the physician tends to persist. The reality is that nurses are health professionals in their own right—ready and able to function in a vastly expanded role. It is ironic that our present health care system and methods of reimbursement militate against utilization of nurses in a way that would make health services more widely available and at the same time contribute to the containment of health care costs.

The Public Health Service in its most recent forward plan for health notes the need for a reappraisal of medicare and medicaid reimbursement policies. PHS says it plans to study the potential benefits of greater utilization of nonphysician professionals including the possibility of direct payment for their services.

I am glad to see the PHS moving in this direction, but I do not believe that we need more study of the value of extending the use of nurses services and providing for inclusion of such services under medicare and medicaid.

In this connection, I would like to point out that in many cases services now performed by a nurse practitioner, for example, are reimbursable once they are recommended by and/or provided under the supervision of a physician. In other words, reimbursement does exist. If the law recognizes the consumer's right to have direct access to nursing services, then in all likelihood there would be a reduction in present costs, because of the elimination of the physician's fees which, in most cases, are paid to him only for supporting the "claim" forms.

Two editorials in the Washington Post last year discussed the difficulties that rural communities are having in securing essential health services. The absence of such services is behind the 22-percent higher death rate for rural citizens according to the Southern Rural Health Conference and an infant mortality rate that is 65 percent higher for rural blacks than rural whites. Communities seeking to see that adequate services are provided are severely handicapped by the fact that medicare does not reimburse nurses so that unless a doctor is on hand at a clinic, the clinic cannot be reimbursed for services provided by the nurses or others. It loses money and cannot pay its way and many eventually have to be closed. It is estimated that some 700 to 800 clinics are needed in Appalachia to provide adequate care in that area.

I believe that the need for and the benefits of inclusion of services of registered nurses in all settings including nursing homes, hopsitals, rural clinics, and ambulatory care centers under medicare and medicaid are already more than apparent. I hope that my collegues will join me in moving for action on this legislation.

Mr. President, I request unanimous consent that the two editorials from the Washington Post, the editorial from the American Journal of Nursing, and the text of the bill be printed in the RECORD.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 104

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1861(s) of the Social Security Act is amended by inserting immediately before the matter following paragraph (13) the following: "The term 'medical and other health services' also means all those health care services performed by a registered profesisonal nurse within the scope of professional nursing practice as defined by State law.".

SEC. 2. (a) Section 1905(a) of the Social Security Act is amended—

(1) by striking out "and" at the end of paragraph (16);

(2) by inserting "and" at the end of paragraph (17);

(3) by adding immediately below paragraph (17) the following new paragraph:

"(18) health care services performed by a registered professional nurse within the scope of professional nursing practice as defined by State law.".

(b)(1) Section 1902(a)(13)(B) of such Act is amended by inserting after "through (5)" the following: "and (18)".

(2) Section 1902(a)(13)(C)(i) of such Act is amended by inserting immediately after "through (5)" the following: "and (18)".

(3) Section 1902(a)(13)(C)(ii)(I) of such Act is amended by inserting immediately after "through (16)" the following: "and (18)".

(4) Section 1902(a)(14)(A)(i) of such Act is amended by striking out "and (7)" and inserting, in lieu thereof "(7), and (18)".

SEC. 3. The amendments made by this Act shall be effective with respect to payments under titles XVIII and XIX of the Social Security Act for calendar quarters commencing with the first calendar quarter beginning after the date of enactment of this Act.

DEAR MR. CARTER * * *

We know you're busy packing and studying and getting ready to move to Washington. You must be inundated with letters and maybe you don't need one more right now. But frankly, to paraphrase one of your great predecessors, we're writing not to ask what this country can do for nurses but rather to say what nurses stand ready to do to improve health care and make it accessible to everyone in this nation.

We urge you, sir, as you begin shaping your administration's health policies, to include nurses in the earliest planning sessions. Too often in the past, only physicians have been appointed to represent the health professionals in health policy councils.

Physicians obviously are the appropriate choice as spokespersons on the provision of medical care. But health care encompasses much more than medical care. You have stated repeatedly that you intend to reorganize the health care delivery system, that you will stress preventive services, that you will remove the barriers that have kept the poor, the elderly, the minorities from the services they require. You have called for universal, mandatory national health insurance to cover the costs of these services. We applaud your aims and will support your efforts.

But all of this can only work if our national health system is comprehensive, encompassing health maintenance and rehabilitation programs that stress home health services and decrease the misuse of expensive therapeutic facilities. All of this can only work if costs can be contained within reasonable limits. All of this can only work if some traditional patterns are modified—patterns of health care financing and the medical monopoly on deciding who shall get what kind of care.

Let me cite a few examples.

The Smiths are an elderly couple, living frugally, but managing, on their Social Security income. Ms. Smith awakens one day with severe pain in her left leg; they take a taxi to their physician who diagnoses her condition as sciatica and tells her to take aspirin and stay in bed for 2–3 weeks. On the fifth day and again on the sixth and seventh days, she calls him about her constipation and he suggests various over-the-counter cathartics. On the eighth day she calls again and he says, "Well, by now you probably need a colonic. I guess you'd better come in to the hospital."

There is a nurse practitioner in the Smiths' town who could have come in early and perhaps prevented the complication—and certainly the hospitalization—but this physician, like most, doesn't think about his patient's need for skillful nursing care. He prescribes rest and assumes she can take it from there. In addition, under present regulations, the nurse's services are not reimbursable under Medicare. What Medicare will

pay for is Ms. Smith's unnecessary and expensive hospitalization.

Mr. Walker has chronic obstructive lung disease and is in a hospital, recovering from a bout of congestive heart failure. His physician believes he no longer requires an acute care setting. But whether he should go home and whether that home situation is conducive to his recovery is a question. How would he get the equipment he needs? Can he adapt to the normal routines of daily living and the physical limitations of the home—the stairs, the accessibility to kitchen and bathroom, and so on? Or does he require placement in an extended care facility for a time? A nurse should visit to assess Mr. Walker's home and work out discharge plans with him but under our present system her visit is not reimbursable.

Mr. Wilson has advanced cancer and has refused to accept any more chemotherapy. He signs out AOR—at own risk—because he wants to spend his remaining time at home with his family. They call the visiting nurse service for assistance with his care and are told that the nursing care must be ordered by a physician. At this point he doesn't need a physician. He needs a nurse to give him comfort and a family to give him love.

These are not isolated instances, Mr. Carter. They are common occurrences throughout this country and are intensified in many rural and ghetto areas where precious little of any kind of health care is available or, under present set ups, achievable.

Nurses don't have all the answers but we do have some which we need to put forth ourselves. We neither can nor should rely on others to explain to you and your designees nursing's potential and proper role in health care.

I'd like to end with a quote from a campaign speech of another president: Anne Zimmerman, president of the American Nurses' Association, whom I hope you'll be consulting soon and often. "The medical mystique," she said, "has produced the myth that quality health care is always medical care and therefore beyond the nation's economic reach. This myth can be dissipated as services of well-prepared nurses are available and used."

THELMA M. SCHORR, R.N.,
Editor.

In the past few years, a number of events and movements suggests that rural citizens are learning that problems in such areas as health, housing, education and the environment are more likely to be faced up to when citizens organize their own power. Recent examples are common, from the might of the American Electric Power Company being tempered by some rural North Carolinians who successfully defended their section of the New River, to some tenants in Indiana County in western Pennsylvania who forced their landlord to improve housing conditions. Another event that shows promise of leading to useful reforms is a meeting now under way in Nashville of the Southern Rural Health Conference.

Policy-makers, physicians, nurses and citizens from 14 states have come together to see what can be done about the delivery—or non-delivery—of health services in the rural South. The absence of these services is behind such bleak statistics (according to the conference) as a 22 per cent higher death rate for rural citizens and an infant mortality rate that is 65 per cent higher for rural blacks than rural whites.

Even if every rural community did have its own clinic or hospital, poor health would still be common because of the absence of preventive care. Some of the well-known factors contributing to a greater vulnerability to sickness and disease include: contaminated water, poor housing, inadequate nutrition (children who avoid unhealthy water by drinking sugary soda pop may not get intestinal parasites but they are exposed to dental diseases), occupational hazards (coal dust for miners, inhaling chemicals for farmworkers) and mental depression caused by feelings of political powerlessness.

As for the contributions of public policy, Medicare does not reimburse nurse practitioners or physician assistants. This means that unless a doctor is on hand at a clinic, the clinic cannot be reimbursed for services provided by the nurses or others; it loses money and cannot pay its way. Another cause of poor health care is that medical schools tend to be biased against rural areas. A report presented last year to the task force on Southern Rural Development in Atlanta noted that few scholarships and few internship or residency programs are available for medical students interested in rural practice.

The usefulness of the conference being held in Nashville—the first of its kind—will be measured as much by the follow-up of its recommendations as by the actual discussions. However useful the talk itself may be, it is not exactly a secret among thoughtful HEW policy-makers or staff volunteers in mountain health clinics that a crisis in health care is needlessly victimizing rural Americans.

RURAL HEALTH CARE IN APPALACHIA

Some five years ago in eastern Tennessee, a cooperative effort by some mountain citizens helped create a health clinic in the small town of Clairfield. It was desperately needed. As in much of rural Appalachia, the isolation and poverty of Clairfield meant that the people had no doctor or nurse. Because of both the need and the citizen's enthusiasm, the Appalachian Regional Commission provided funds. By law, the commission's support would last for five years, after which the town would have to pay its own way. With the five year period running out, the future of the health clinic is in serious doubt.

The troubles in Clairfield might be seen as another hard luck story, the kind that has been crushing Appalachians for generations. But the town's difficulties are significant because many of the problems in its health clinic are found throughout the 13-state region. In all, the ARC assists more than 150 communities in running primary health care clinics.

What makes the running difficult is an outdated and unworkable Medicare regulation that prevents clinics from being reimbursed for services unless a doctor is physically present. But in Clairfield and many other clinics, doctors can only come once a week or at other intervals. Most of the time, nurse-practitioners, physician assistants or other non-doctors provide the daily health care needs. According to the commission, between 70 to 80 percent of the region's rural medical problems can be competently handled by the nurse practitioners and other non-physicians. Thus, because Medicare does not reimburse for this non-physician care, the clinics lose money and cannot pay their way. As a recent ARC staff paper notes: "The prohibitive Medicare regulation is based upon objections raised by the American Medical Association during the 1972 hearings on amendments to the Social Security Act. At that time, such (nurse) practitioners were relatively unknown, and many physicians considered them a threat to the high standards of the medical profession. Times have changed and many physicians now use these practitioners extensively. Medicare has not changed, however."

Corrective legislation is now before both the Senate Finance Committee and the House Ways and Means Committee. At the moment, the bills are being debated by the American Medical Association, the American Nursing Association, the administration, the committees and the commission. Each party has its own position, based on its special interests. But what about the interests of the sick people in the mountains? It is already tragic enough that many of them are victimized by poor housing, lack of transportation, the effects of strip mining and insensitive coal companies. But now they have to sit still and wait for outsiders to argue it out about Medicare regulations. Even then, the 72 clinics offer only minor relief; the ARC estimates that 700 to 800 clinics are actually needed in Appalachia.

To delay changing the regulations means that many of the existing clinics will soon be closing. The commission argues persuasively that Medicare reimbursement should be given according to the care provided rather than according to the provider of the care. In other words, what difference does it make to the sick person if he is treated by a doctor or nurse practitioner as long as he is treated in an adequate way?

By Mr. HUDDLESTON (for himself, Mr. EASTLAND, Mr. TALMADGE, Mr. DOLE, Mr. MCGOVERN, Mr. HUMPHREY, and Mr. CLARK):

S. 106. A bill to provide for furthering the conservation, protection, and enhancement of the Nation's land, water, and related resources for sustained use, and for other purposes; to the Committee on Agriculture and Forestry.

LAND AND WATER RESOURCES CONSERVATION ACT OF 1977

Mr. HUDDLESTON. Mr. President, in 1974, Congress enacted legislation to provide long-term planning for the Nation's renewable resources. The Forest and Rangeland Renewable Resources Planning Act—Public Law 93-378—directs the Secretary of Agriculture to assess periodically the national situation regarding the forest and rangeland resources, and to submit, at regular intervals, recommendations for long-range Forest Service programs essential to meet future needs for those resources. In short, the act provides a process which should permit better informed choices to be made in the management and administration of the forest system.

However, the majority of the Nation's land is privately owned.

The conservation of this land, water, and related resources is a matter of great importance. This importance is reflected, in part, by the fact that the Federal Government makes considerable conservation investments on privately owned land. More than $500 million is expended annually by the Department of Agriculture alone for soil and water conservation programs.

And there is a growing demand on the land, water, and related resources of the Nation to meet present and future needs for food and fiber, rural and urban development, agricultural, industrial and community water supply, fish and wildlife habitat, recreational facilities, and the needs of the people.

Last session the Senator from Mississippi (Mr. EASTLAND) and I introduced legislation, S. 2081, which would establish a mechanism for making long-range policy to encourage the wise and orderly development of the Nation's soil and water resources. This bill was a companion bill to the Forest and Rangeland

Renewable Resources Planning Act. Generally, S. 2081 called for a continuous appraisal of water- and land-related resources. It directed the Secretary of Agriculture, through the SCS, to develop and direct a 5-year soil and water conservation program for furthering land and water conservation. And it required a report to Congress on the appraisal and program and the effectiveness in reaching the objectives set by Congress.

Mr. President, I ask unanimous consent that my remarks of July 10, 1975, regarding the Land and Water Resources Conservation Act be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

LAND AND WATER RESOURCE CONSERVATION ACT OF 1975

Mr. HUDDLESTON. Mr. President, I am pleased today to join with my distinguished colleague from Mississippi (Mr. EASTLAND), in introducing S. 2081, the Land and Water Resource Conservation Act of 1975.

This legislation is designed as a companion to the Forest and Rangeland Renewable Resource Act of 1974, which was authored by Senator HUMPHREY. It is an effort to set natural resource policy in a systematic and rational way so that we can deal with our natural resource needs in a timely and efficient manner.

In the past the legislative and the executive branches have often found it easy to defer natural resource decisions until many of our priceless resources were lost for all time.

This legislation provides a system which will keep us all aware of what is happening to our land and water bases and establishes a mechanism to make policy decisions to meet national needs for food and fiber, clean water, community development, recreation and wildlife protection in an environmentally sound setting.

Neither Senator EASTLAND nor I view this bill as an end all. The language is not locked in concrete. In the months to come we will work with many individuals and organizations to perfect the bill and ultimately produce legislation which will provide for getting the job done in the most efficient manner.

This was the procedure which Senator HUMPHREY used with his act. The result was that the Forest and Rangeland Renewable Resource Act has broad support all across the Nation, both from industry and from the environmental movement. We will be seeking this same consensus.

Mr. President, our Nation is vast in its land area, and sometimes in my opinion, we tend to think of it as limitless. But our population is still growing. In not too many years it will have reached 300 million. Metropolitan boundaries are expanding rapidly so that subdivisions now occupy what was once farmland.

Furthermore, the world has entered a new era of food scarcity. This has meant spiraling prices, shrinking grain supplies and regional famine in many nations.

Since the Depression years, U.S. capacity has exceeded demands for agricultural products. Excess capacity was fueled by a combination of rich natural resources and rapid technological advance.

But those days may be gone forever. The rate of technological development which permitted the American farmer to feed 52 people besides himself may be slowing down. We have asked our farmers to go all out—to plant virtually every available acre.

Now the time has come to ask the question: Will there be enough land to feed our citizens and to meet the export demand? Fortunately, the U.S. land resource base seems to be ample for future domestic needs—at least to beyond the year 2000. It also seems likely that our farmers will have land and technology sufficient to make sizable export commitments.

But it may not come easily. How well we do will depend on our potential for higher productivity per acre and the possibility of increasing crop acres.

And as we learned during the dust bowl era of the 1930's, when Nebraska topsoil made the sky black over the city of Washington, all-out production can be costly unless it is accompanied by sound conservation practices.

In some of our Western States, many acres of farmland are being lost to soil salinity. In some places in Iowa, as much as 100 tons of top soil per acre per year are lost to wind erosion.

Our land and water resources are essential to the Nation's economic and social well-being. They must be conserved, protected, and enhanced in order to avoid their loss, misuse, and damage.

Soil erosion creates a serious sedimentation problem. Sediment is by far the major pollutant of surface waters, and some of the highest sediment yields come from the most productive and most intensely cultivated soils. Water quality in lakes and streams is reduced by the nutrients and pesticides carried there by runoff water.

In recent years, there has been a shift away from soil conserving crop rotations. Much of the current production is either a continuous single crop, or a rotation of two intensive row crops, such as corn and soybeans. Modern fertilizers and pesticides have made this system feasible.

Although continuous single-cropping is efficient and profitable, it increases the erosion hazard and the need for soil conservation practices. There has been a recent movement toward elimination of shelter belts designed during the 1930's and 1940's to limit wind erosion.

In a report issued just last month, the General Accounting Office said:

"Unless actions are taken to encourage farmers to renovate and preserve existing windbreaks, rather than remove them, an important resource, which has taken many years to develop, could be lost, and adjacent croplands could erode and become less productive."

In 1973, Assistant Secretary of Agriculture Robert Long said at a meeting of soil conservation commissioners:

"This is no time to have a great plow up followed by a great wash away. If our soils become pollutants instead of a resource, the long investment that we and you have made will go down the drain and a good many futures with it."

Mr. Long and the Soil Conservation Service have initiated a national educational campaign, the theme of which is "Produce More, Protect More."

This is a laudable effort. But it does not take the place of the hundreds of soil and water conservation specialists who have been lost by the Soil Conservation Service, because of reductions in Federal employment. It does not fill the yawning gap in Federal polity embodied in the Office of Management and Budget premise that the job of the Soil Conservation Service was completed with the end of the dust bowl.

What we must have is a systematic appraisal of our water and land bases so that we have a comprehensive understanding of what is happening to these resources on a continuing basis.

Then we must devise a program for taking appropriate action to resolve the problems associated with these resources.

And finally we must have an analytical device that will provide Congress with the information needed regarding the stewardship of the Soil Conservation Service.

In essence, these three elements are what would be set up under this proposed Land and Water Resource Conservation Act.

This act declares it to be the policy of the United States to achieve and maintain, first, quality and quantity in the natural resource base for sustained use; second, quality in the environment to provide attractive, convenient, and satisfying places to live, work, and play; and third, quality in the standard of living based on community improvement and adequate income.

The Secretary of Agriculture shall promote the attainment of this policy by appraising the land, water, and related resources of the Nation and developing a program for furthering the conservation, protection, and enhancement of these resources on private and non-Federal lands. The appraisal and the program are required to be completed by December 31, 1976, and updated every 5 years.

The Secretary of Agriculture is further required to transmit to the Congress the report of the appraisal and the program each time it is updated. In addition, the Secretary shall report to Congress each year on the effectiveness of the program in attaining the objectives of this act.

As I see it, with the Forest Service and the Soil Conservation Service operating under the same kind of system of appraising problems and finding solutions to those problems, the activities of these two important resource agencies can interface in many instances in a cooperative effort to avoid duplication.

As I stated earlier, Mr. President, we will be anxious to hear from all parties who have an interest in this Nation's resources so that we can forge this bill into the best possible legislation. We will welcome any responsible comments in this regard.

Mr. HUDDLESTON. Mr. President, for the 90-day period following introduction of the legislation we worked diligently to refine and improve the bill and it was reintroduced as an amendment in the nature of a substitute on October 1, 1975.

Mr. President, I ask unanimous consent that my remarks at that time be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REFINEMENT OF THE LAND AND WATER CONSERVATION ACT OF 1975

Mr. HUDDLESTON. Mr. President, on July 10, I, along with my distinguished colleague from Mississippi (Mr. EASTLAND), introduced S. 2081, a bill to provide for furthering the conservation, protection and enhancement of the Nation's land, water, and related resources.

The legislation was designed as a companion to the Forest and Rangeland Renewable Resource Planning Act of 1974, in an effort to establish natural resource policy in a systematic and rational way so that we can deal with our resource needs in a timely and efficient manner.

Since introducing the legislation, we have worked with some of the Nation's leading conservationists to refine and improve the bill. I believe the amendment in the form of a substitute to S. 2081 which Senator EASTLAND and I are submitting today represents a considerable improvement over the original bill, and it is the vehicle on which the Subcommittee on Environment, Soil Conservation and Forestry will hold hearings in early November.

I would like to take this opportunity to express the thanks of Senator EASTLAND and myself to the following persons for their assistance on this legislation:

Dan Poole, Keith Harmon, and Lonnie Williamson of the Wildlife Management Institute; Mary Garner, Dave Unger, Gordon Zimmerman, and Ray Heinen of the National Association of Conservation Districts; Donald Williams; William Hyde of Resources for the Future; Lawrence Libby of Michigan State University; Bob Dennis of Zero Population Growth; Robert Wolf of the Congressional Research Service; John Gottschalk of the International Association of Game and Fish Commissioners; Carl Sullivan of the Sports Fisheries Institute; Dennis LeMaster of the Society of American Foresters; Tom Barlow of the Natural Resources Defense Council; Douglas MacCleery of the National Forest Products Association; William Towell of the American Forestry Association; and Kenneth Hampton of the National Wildlife Federation.

All of these people were invited by the subcommittee to submit suggestions for the improvement of the bill, and all of them responded magnificently. Using the "areas of agreement" approach of the American Forestry Association, I believe we have developed legislation on which all parties can agree, and of which we can be proud.

Mr. HUDDLESTON. Mr. President, S. 2081 was approved by the Senate in May 1976 and was passed by the House of Representatives during the closing days of the 94th Congress.

As enacted, the legislation directed the Soil Conservation Service to go out and appraise the situation regarding the condition and potential of private lands of the United States and then to develop a long-term coordinated voluntary program to maintain quantity, quality, and productivity of our natural resource base. But the bill never became law because it was pocket vetoed.

Mr. President, I rise today to reintroduce this highly important piece of legislation which is designed to further the conservation of land, water, and related resources. As I have said before, I feel this legislation will do a great deal to enhance the status of the Soil Conservation Service and to renew the Nation's interest in protecting and improving its land, water, and related resources.

Mr. President, I urge my colleagues to join me in supporting this bill and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 106

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Land and Water Resources Conservation Act of 1977".

FINDINGS

SEC. 2. The Congress finds that—

(1) There is a growing demand on the land, water, and related resources of the Nation to meet present and future needs.

(2) The Congress, in its concern for sustained use of the resource base, created the Soil Conservation Service of the United States Department of Agriculture which possesses information, technical expertise, and a delivery system for providing assistance to land users with respect to conservation and use of soils; plants; woodlands; watershed protection and flood prevention; the conservation, development, utilization, and disposal of water; animal husbandry; fish and wildlife management; recreation; community development; and related resource uses.

(3) Resource appraisal is basic to wise land and water conservation. Since individual and governmental decisions concerning land was water resources often transcend administrative boundaries and affect other programs and decisions, a coordinated appraisal and program framework are essential.

DEFINITIONS

SEC. 3. As used in this Act—

(1) The term "Secretary" means the Secretary of Agriculture.

(2) The term "land, water, and related resources" means those resources which come within the scope of the programs administered and participated in by the Secretary of Agriculture through the Soil Conservation Service.

(3) The term "land and water conservation program" means a framework for attaining the purposes of this Act.

DECLARATIONS OF POLICY AND PURPOSE; PROMOTION THEREOF

SEC. 4. (a) In order to further the conservation of land, water, and related resources, it is declared to be the policy of the United States and purpose of the Act that the conduct of programs administered by the Secretary of Agriculture for the conservation of such resources shall be responsive to the long-term needs of the Nation, as determined under the provisions of this Act.

(b) Recognizing that the arrangements under which the Federal Government cooperates with State soil and water conservation agencies and other appropriate State natural resource agencies such as those concerned with forestry and fish and wildlife and, through conservation districts, with other local units of government and land users, have effectively aided in the protection and improvement of the Nation's basic resources, including the restoration and maintenance of resources damaged by improper use, it is declared to be the policy of the United States that these arrangements and similar cooperative arrangements should be utilized to the fullest extent practicable to achieve the purpose of this Act.

(c) The Secretary shall promote the attainment of the policies and purposes expressed in this Act by—

(1) appraising on a continuing basis the land, water, and related resources of the Nation;

(2) developing and updating periodically a program for furthering the conservation, protection, and enhancement of the land, water, and related resources of the Nation using all of the resources of the Department of Agriculture; and

(3) providing to Congress and the public, through reports, the information developed pursuant to paragraphs (1) and (2) of this subsection, and by providing Congress with an annual evaluation report as provided in section 7.

APPRAISAL

SEC. 5. (a) In recognition of the importance of and need for obtaining and maintaining information on the current status of land, water, and related resources, the Secretary is authorized and directed to carry out, through the Soil Conservation Service, a continuing appraisal of the land, water, and related resources of the Nation. The appraisal shall include, but not be limited to—

(1) data on the quality and quantity of land, water, and related resources;

(2) an analysis of the potential of those resources;

(3) a determination of the changes in the status and condition of those resources resulting from various uses; and

(4) a discussion of current laws, policies, programs, rights, regulations, ownerships, and other considerations associated with the land.

(b) The appraisal shall utilize data collected under this Act and pertinent data and current information collected by the Department of Agriculture and other Federal, State, and local agencies and organizations. The Secretary shall establish an integrated system capable of using combinations of resource data to determine the quality and potential for alternative uses of the resource base and to identify areas of local, State, and national concerns pertaining to land conservation, resource use and development, and environmental improvement.

(c) The appraisal shall be made in cooperation with conservation districts and with State soil and water conservation agencies and other appropriate State agencies under such procedures as the Secretary may prescribe to insure public participation.

(d) A report of the appraisal shall be completed by December 31, 1979 and at each five-year interval thereafter.

LAND AND WATER CONSERVATION PROGRAM

SEC. 6. (a) In order to establish a framework for achieving the national land and water policy and purpose of this Act, the Secretary is hereby authorized and directed to develop, through the Soil Conservation Service, in cooperation with and participation by the public through conservation districts, State and national organizations and agencies, and other appropriate means, a national land and water conservation program (hereinafter called the "program") to assist land owners and land users, at their request, in furthering land and water conservation on the private and non-Federal lands of the Nation. The program shall set forth the direction for future soil and water conservation efforts based on the current land, water, and related resource appraisal developed in accordance with section 5 of this Act, taking into consideration both the long- and short-term needs of the Nation, the land owners, and the land users. The program shall also include, but not be limited to—

(1) analysis of the Nation's land, water, and related resource problems;

(2) analysis of existing authorities and adjustments needed;

(3) an evaluation, based on a system to determine the effectiveness of the soil and water conservation ongoing programs and the progress being achieved in meeting the soil and water conservation objectives of this Act;

(4) identification and evaluation of alternative methods for the conservation, protection, environmental improvement, and enhancement of land and water resources, in the context of specific time frames, and a recommendation of the preferred alternative using all appropriate authorities of the Department of Agriculture;

(5) investigation and analysis of the practicability, desirability, and feasibility of collecting organic waste materials, including manure, crop and food wastes, industrial organic waste, municipal sewage sludge, logging and woodmanufacturing residues, and any other organic refuse, composting, or similarly treating such materials, transporting and placing such materials onto the land to improve soil tilth and fertility. The analysis shall include the projected cost of collection, transportation, and placement in accordance with sound locally approved soil and water conservation practices; and

(6) analysis of the Federal and non-Federal inputs required to implement the program.

(b) The program plan shall be completed not later than December 31, 1979, and be updated at each five-year interval thereafter.

REPORT TO CONGRESS

SEC. 7. (a) On the first day Congress convenes in 1980 and at each five-year interval

thereafter, the President shall transmit to the Speaker of the House of Representatives and the President of the Senate, the appraisal report and the program as required by sections 5 and 6 of this Act, together with a detailed statement of policy intended to be used in framing budget requests of the Administration for Soil Conservation Service activities. Following the transmission of such appraisal report, program, and statement of policy, the President shall, subject to other actions of the Congress, carry out programs already established by law in accordance with such statement of policy or any subsequent amendment or modification thereof approved by the Congress, unless, before the end of the first period of ninety calendar days of continuous session of Congress after the date on which the President of the Senate and the Speaker of the House are recipients of the transmission of such appraisal report, program, and statement of policy, either House adopts a resolution reported by the appropriate committee of jurisdiction disapproving the statement of policy. For the purpose of this subsection, the continuity of a session shall be deemed to be broken only by an adjournment sine die, and the days on which either House is not in session because of an adjournment of more than three days to a day certain shall be excluded in the computation of the ninety-day period. Notwithstanding any other provision of this Act, Congress may revise or modify the statement of policy transmitted by the President, and the revised or modified statement of policy shall be used in framing budget requests.

(b) Commencing with the fiscal budget for the year ending September 30, 1979, requests presented by the President to the Congress governing Soil Conservation Service activities shall express in qualitative and quantitative terms the extent to which the programs and policies projected under the budget meet the policies approved by the Congress in accordance with subsection (a) of this section. In any case in which such budget so represented recommends a course which fails to meet the policies so established, the President shall specifically set forth the reason or reasons for requesting the Congress to approve the lesser program or policies presented. Amounts appropriated to carry out the policies approved in accordance with subsection (a) of this section shall be expended in accordance with the Congressional Budget and Impoundment Control Act of 1974, Public Law 93-344.

(c) The Secretary, during budget preparation for fiscal year 1980, and annually thereafter, shall prepare a report which evaluates the program's effectiveness in attaining the purposes of this Act. The report, prepared in concise summary form with appropriate detailed appendices, shall contain pertinent data from the current resource appraisal required to be prepared by section 5 of this Act, shall set forth the progress in implementing the program required to be developed by section 6 of this Act, and shall contain appropriate measurements of pertinent costs and benefits. The evaluation shall assess the balance between economic factors and environmental quality factors. The report shall also indicate plans for implementing action and recommendations for new legislation where warranted.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 8. There are authorized to be appropriated such funds as may be necessary to carry out the purposes of this Act.

EFFECTIVE DATE

SEC. 9. The provisions of this Act shall take effect on October 1, 1977.

SEC. 10. In carrying out this Act, the Secretary of Agriculture shall utilize information and data available from other Federal, State, and private organizations and shall avoid duplication and overlap of resource appraisal and program planning efforts of other Federal agencies.

By Mr. PEARSON:

S. 107. A bill to reform veterans' pensions, to avoid a reduction in veterans' pensions, concomitant with increases in social security benefits; to the Committee on Veterans' Affairs.

Mr. PEARSON. Mr. President, today veteran pensioners who also receive Social Security benefits, are effectively disadvantaged relative to nonveteran recipients each time social security benefit rates are increased. I am now offering a legislative proposal to assure that the impoverished former defenders of our Nation receive the full benefit intended from congressional action on social security rates.

As you know, Mr. President, the purpose behind veteran pensions, at least those unrelated to service-connected disabilities, is income maintenance. In that sense, the Veterans' Administration pension program overlaps with social security programs. But the philosophy that led originally to the veteran pension is more than a mechanism for merely maintaining a needy segment of our population. It is a philosophy of recognition for service given in defending our national freedom. It is a philosophy of providing recognition when most needed and in the most useful form. It is also a philosophy that is ignored under existing law.

As presently calculated, a veteran's pension is equivalent to an amount which maintains his entire income at not more than $3,540. The amount of his pension is dependent upon the difference between $3,540 and his total income from other sources. Since social security benefits are included in the sum of "other sources," his pension allowance is necessarily reduced with an increase in social security benefits. The amount of the reduction in the pension allowance varies in degree based upon differing levels of Veterans' Administration benefits, but all pensioners suffer some reduction. The result is that, when Congress attempts to improve the plight of those on social security with, for example, a 10-percent increase in benefits, the veteran pensioner receives less than the full 10 percent. The nonveteran social security recipient's lot is improved to the full extent of congressional intention, but the relative position of the veteran recipient is damaged. While experiencing a net gain, the veteran is inequitably treated in relation to a similarly situated nonveteran. The veteran clearly does not receive all that Congress intends.

In the last Congress, I cosponsored a measure which sought to correct this inequity and revive the philosophy of recognition expressed in the veterans' pension program. That bill would eliminate social security from being included in the income base on which veterans' pensions are calculated. This concept was incorporated into the Veterans and Survivors Pension Reform Act, which was passed by the Senate last year. Action in the other body prevented this provision from becoming law.

Mr. President, today I am reintroducing this bill and urge its favorable consideration. I ask unanimous consent to have the bill printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 107

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (g) of section 415 of title 38, United States Code, is amended by adding at the end thereof the following new paragraph:

"(4) In determining the annual income of any individual who is entitled to monthly benefits under the insurance program established under title II of the Social Security Act, the Administrator, before applying paragraph (1)(G) of this subsection shall disregard any part of any such benefit which results from (and would not be payable but for) the general increase in benefits under such insurance program provided by section 201 of Public Law 93-66 or any subsequent cost-of-living increase in such benefits occurring pursuant to section 215(i) of the Social Security Act."

(b) Section 503 of title 38, United States Code, is amended by adding at the end thereof the following new subsection:

"(d) In determining the annual income of any individual who is entitled to monthly benefits under the insurance program established under title II of the Social Security Act, the Administrator, before applying subsection (a)(6) of this section, shall disregard any part of any such benefit which results from (and would not be payable but for) the general increase in benefits under such insurance program provided by section 201 of Public Law 93-66 or any subsequent cost-of-living increase in such benefits occurring pursuant to section 215(i) of the Social Security Act."

(c) In determining the annual income of any person for purposes of determining the continued eligibility of that person for, and the amount of pension payable under the first sentence of section 9(b) of the Veterans' Pension Act of 1959, the Administrator of Veterans' Affairs shall disregard, if that person is entitled to monthly benefits under the insurance program established under title II of the Social Security Act, any part of any such benefit which results from (and would not be payable but for) the general increase in benefits under such insurance program provided by section 201 of Public Law 93-66 or any subsequent cost-of-living increase in such benefits occurring pursuant to section 215(i) of the Social Security Act.

SEC. 2. This Act shall apply with respect to annual income determinations made under the veterans' pension laws and section 415(g) of title 38, United States Code, for calendar years after 1973.

By Mr. BARTLETT:

S. 108. A bill to allow incremental crude oil production from new secondary and tertiary recovery projects to receive free market prices; to the Committee on Interior and Insular Affairs.

Mr. BARTLETT. Mr. President, this bill would allow incremental production from new secondary and tertiary crude oil recovery projects to receive free market prices and to be exempt from the calculation of the composite average price.

A major fault of the EPCA pricing scheme is that the production of additional upper-tier oil would cause a reduction in the price of all other oil. Further, the controlled upper-tier price is

not high enough to encourage producers to initiate expensive enhanced recovery projects which would be feasible at an uncontrolled price. This provision would permit an uncontrolled price for new production from new enhanced recovery projects, or new expansions of existing projects, but simultaneously would prevent a reduction in the price of existing production, because of the additional production from these projects. Because only new, incremental production would be decontrolled, existing oil prices would not increase, and consumers would face no price increases unless new oil is produced.

I believe this amendment to the Emergency Petroleum Allocation Act is essential to increase future production. I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 108

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 8 of the Emergency Petroleum Allocation Act of 1973 is amended by adding at the end thereof the following new subsection (k).

"(k)(1) Any regulation relating to crude oil prices, to crude oil ceiling prices, or to the weighted average first sale price for crude oil promulgated pursuant to subsection (a) of this section or section 4 of this Act shall not apply to the first sale of crude oil produced and sold from a property in the United States which production results from an enhanced recovery operation and which volume of production is in excess of the volume of production which would have been produced from the property in the absence of the enhanced recovery operation. The first sale price and volume of such crude oil shall not be used in the computation of the 'maximum weighted average first sale price' as defined in subsection (a) of this section.

"(2) For the purposes of this subsection, an 'enhanced recovery operation' is defined as an oilfield operation, or the expansion or modification of an existing enhanced recovery operation, which is initiated after February 1, 1976, and which is previously certified as an enhanced recovery operation; pursuant to the procedures specified in paragraph (3) of this subsection, and which, according to prudent engineering principles, is likely to increase the ultimate recovery of crude oil or the producing rate of crude oil from the property by the injection of liquids or gases from the surface including, but not limited to, pressure maintenance, water flooding, gas injection and cycling, miscible fluid injection, chemical flooding, microemulsion flooding, in situ combustion, cyclic steam injection, steam flooding, polymer flooding, caustic flooding or variations of each of these methods or similar such methods, singularly or in combination.

"(3)(A) Prior to the commencement of the enhanced recovery operation to which the exemption provided by this subsection would apply, the producer shall submit his application for certification as an enhanced recovery operation, which application shall include his estimate of the future rate of crude oil production from the property which would occur in the absence of the enhanced recovery operation, and the necessary supporting data and calculations, as required by appropriate Federal or State regulation, to the Federal Energy Administration, and—

"(i) in the case of a property under State jurisdiction, to the appropriate State regulation agency, or

"(ii) in the case of a property under Federal jurisdiction, to the United States Geological Survey.

"(B)(i) In the case of a property to which subparagraph (A)(i) applies, the State regulatory agency may act upon the application by granting certification or specifying in what material respects the application should be amended in order to become certifiable. If a State agency does not act on an application within ninety days, the producer may submit the application, estimate, and supporting data and calculations to the United States Geological Survey. The United States Geological Survey shall act upon the application, by granting certification or specifying in what material respects the application should be amended in orded to become certifiable, within sixty days, and any failure to act within sixty days shall be conclusively presumed to constitute an approval.

"(ii) In the case of a property to which subparagraph (A)(ii) applies, the United States Geological Survey shall act upon the application by granting certification or specifying in what material respects the application should be amended in order to become certifiable, within sixty days, and any failure to act within sixty days shall be conclusively presumed to constitute an approval.

"(iii) Following receipt of notice by the producer of any United States Geological Survey requirements regarding amendment of the application initially submitted pursuant to either subparagraph (A)(i) or (A)(ii), and submission of required amendments to the United States Geological Survey by the producer, the United States Geological Survey shall act upon the amended application within thirty days. Action shall consist of granting certification without comment or specifying in what material respects the amended application failed to meet the earlier required amendment and then granting a certification which shall include an estimate of the rate, based upon the best judgment of the United States Geological Survey using information available to it, of crude oil production from the property which would occur in the absence of the enhanced recovery operation.

"(C) For the purposes of making the certification pursuant to the procedures specified in subparagraphs (A) and (B), the appropriate State regulatory agency or the United States Geological Survey (as the case may be) shall assure that the estimate of the rate of crude oil production from the property which would occur in the absence of the enhanced recovery operation accompanying the application for certification has been made in accordance with sound engineering and economic principles and using accepted techniques.

"(D) The appropriate State regulatory agency or the United States Geological Survey (as the case may be) shall immediately report its certification to the Federal Energy Administration. The certified estimate of the future rate of crude oil production from the property which would occur in the absence of the enhanced recovery operation shall thereafter be used by the Federal Energy Administration and the producer to determine the volume of crude oil to be exempted pursuant to this subsection.

"(4) The United States Geological Survey and the agency designated by the President under section 5(b) of this Act for establishing and administering petroleum price controls, after consultation with one another and with appropriate State agencies, shall each, within thirty days of the effective date of this subsection, promulgate or cause to be published regulations implementing the provisions of this subsection. Each agency shall be responsible for implementing the matters assigned to it. Each agency shall have the authority to conduct necessary inspections during the succeeding administrative process associated with granting the certification provided for in this subsection."

By Mr. BARTLETT:

S. 109. A bill to assure the availability of natural gas in interstate commerce to essential agricultural uses; to the Committee on Commerce.

Mr. BARTLETT. Mr. President, I am pleased to introduce today a bill entitled "Natural Gas Agricultural Priority Act of 1977." The purpose of the act is to amend the Natural Gas Act so as to insure those natural gas users essential to agricultural food and fiber production of sufficient supplies of natural gas to carry out their operations. It assigns a priority second only to residential, hospital, small users, and so forth, to those users essential to full food and fiber production in the United States—including farmers, food processors, and food packagers—for whose operation natural gas is essential.

Appropriate uses are as fuel for irrigation pumps and for crop drying, fuel and/or raw material feedstock for fertilizer and other agricultural chemical products. The bill provides not only for current uses, but also for expanded production by existing users and for new users as well.

The Federal Power Commission is not burdened with the task of determining the necessity of the various agricultural natural gas uses or whether natural gas is required for each respective use. That would be inadvisable. The Natural Gas Priority Act of 1977 empowers and obligates the Secretary of Agriculture to certify necessary agricultural operations for which natural gas is essential, as well as the amount of gas required for each respective use.

In meeting the provisions of this bill, the Federal Power Commission is prohibited from tampering with natural gas in the intrastate market, as well as from allocating natural gas supplies between or among natural gas companies.

The highly technical modern agriculture industry in the United States, particularly in irrigated regions, is intimately dependent on a secure and uninterruptible supply of natural gas. Any regulatory policy which jeopardizes or reduces the availability of this precious energy source to agriculture will consequently lower food production and have a substantial negative impact on the affected local region, the State, the Nation, and the world.

For this reason, passage of the Natural Gas Agricultural Priority Act of 1977 is essential to insure not only the viability of individual agricultural gas users, but the integrity of a large segment of the U.S. economy as well.

I ask unanimous consent that my bill, Natural Gas Agricultural Priority Act of 1977, be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 109

Be it enacted by the Senate and House of Representatives of the United States of

America in Congress assembled, That this Act may be cited as the "Natural Gas Agricultural Priority Act of 1977".

SEC. 2. The Natural Gas Act is amended by adding at the end thereof the following new section:

"NATURAL GAS FOR ESSENTIAL AGRICULTURAL USES

"SEC. 25. Except to the extent that natural gas supplies are required to maintain natural gas service to residential users, small users, hospitals, and similar users vital to public health and safety as defined by the Commission, and notwithstanding any other provision of law or of any natural gas allocation or curtailment plan in effect under existing law, the Commission shall within 90 days of the date of enactment of this Act prohibit by rule any curtailment and permit new or expanded uses of natural gas for any agricultural, food processing, or food packaging purpose which in the opinion of the Secretary of Agriculture is essential to meet requirements for full food and fiber production and for which natural gas is essential, including but not limited to irrigation pumping, crop drying, use as a raw material feedstock or process fuel in the production of fertilizer and essential agricultural chemicals in existing plants (for present or extended capacity) and in new plants. The Secretary of Agriculture shall determine by rule the agricultural, food processing, or food packaging purposes which are essential to meet requirements for full food and fiber production and for which natural gas is essential. The Secretary of Agriculture shall also certify to the Commission the amount of natural gas which is necessary for such essential uses to meet requirements for full food and fiber production: *Provided, however,* that nothing contained herein shall empower the Commission to invoke the provisions of this section so as to affect the production, sale, transportation, resale, or end use of natural gas in other than interstate commerce or to mandate pipeline interconnections or the allocation of natural gas supplies between or among natural gas companies.".

By Mr. BARTLETT:

S. 110. A bill to amend the Natural Gas Act to assure adequate supplies of natural gas in interstate commerce; to the Committee on Commerce.

NATURAL GAS ACT AMENDMENTS OF 1977

Mr. BARTLETT. Mr. President, I am pleased to introduce today a bill entitled "Natural Gas Act Amendments of 1977." My introductory remarks today will be brief and to the point; a more comprehensive statement will follow.

The purpose of the bill is to amend the Natural Gas Act to assure adequate supplies of natural gas in interstate commerce. This assurance is effected through the deregulation of the price of new natural gas in interstate commerce.

New natural gas is defined as that, first, sold or delivered in interstate commerce for the first time on or after January 1, 1977; second, produced from wells initiated or completed on or after January 1, 1977, or recompleted or deepened into new reservoirs on or after January 1, 1977; or third, continued in interstate commerce after the expiration of an existing contract. Please note that nothing contained in the Natural Gas Act Amendments of 1977 is designed to diminish or affect the authority of the Federal Power Commission in regulating the transportation of natural gas in interstate commerce or the sale for resale by a pipeline company of natural gas in interstate commerce.

Provisions of the bill prohibit the Federal Power Commission from, first, disallowing prices previously paid for gas exempt from the act; second, disallowing any portion of the price paid to a company by an affiliate for natural gas, insofar as the price does not exceed that paid to nonaffiliates; third, rolling back the rate charged for gas once a sale or delivery has been finalized by the Commission; and fourth, denying or conditioning certification on the basis of the price of new natural gas.

It is extremely important to take immediate action on this vital issue. With each day that passes without Congressional action toward deregulation, this Nation's natural gas supply outlook worsens. I believe the Congress decision on this issue will largely determine whether this Nation will face a coming decade of adequate natural gas supply or increasingly disruptive shortages. Because legislative action on natural gas wellhead price deregulation has been deferred far too long, the Nation now faces mounting shortages of natural gas.

Deregulation of the wellhead price of new natural gas in interstate commerce can improve the gas supply outlook in three significant ways: First, by providing the economc incentive for producers to develop new and additional gas supplies from the Outer Continental Shelf—OCS—from Alaska, and from tighter, deeper onshore formations. Second, by encouraging more efficient natural gas usage, as the price is allowed over time to reflect the true economic value of this clean-burning fuel. And third, by gradually eliminating the current price disparity between the interstate and intrastate gas markets which now distorts our natural gas distribution.

In short, new natural gas price deregulation will dramatically increase the supplies of gas available to the interstate market. I, therefore, urge prompt favorable action on the Natural Gas Act Amendments of 1977.

The prospects for passage of this bill are most encouraging, because the Senate passed a similar, but not as effective deregulation bill in 1975, and because President-elect Carter said in a letter of October 19, 1976, to Governor Boren of Oklahoma:

> I will work with the Congress . . . to deregulate new natural gas.

If President-elect Carter will provide the leadership in new natural gas reregulation as President Ford did we should pass this in similar legislation in short order.

I ask unanimous consent that my bill, Natural Gas Act Amendments of 1977, be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD as follows:

S. 110

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Natural Gas Act Amendments of 1977".

SEC. 2. Subsection 1(b) of the Natural Gas Act [15 U.S.C. Sec. 717(b)] is amended by inserting before the period at the end thereof the following: "or to the sale or delivery by a producer of new natural gas: *Provided, however,* That nothing contained in the Natural Gas Act Amendments of 1977 shall modify or affect the authority of the Commission in effect prior to the date of enactment of such amendments to (A) regulate the transportation in interstate commerce of natural gas or the sale in interstate commerce for resale of old natural gas, or (B) regulate the sale for resale of natural gas by any natural gas company which transports natural gas in interstate commerce or by an affiliate thereof which transports natural gas in interstate commerce".

SEC. 3. Section 1 of the Natural Gas Act [15 U.S.C. 717] is amended by adding at the end thereof the following new subsections:

"(d) The Commission shall have no power to disallow, in whole or in part, in the rates and charges made, demanded, or received by any natural gas company the amounts actually paid for natural gas exempt from the Act pursuant to subsection (b) except as otherwise provided in subsection (e).

"(e) In any case where a natural gas company which transports natural gas in interstate commerce purchases natural gas from an affiliate or produces natural gas from its own properties, the Commission may not disallow any portion of the cost thereof in the rates or charges made by such company which is not in excess of current prices paid for comparable gas to nonaffiliates.

"(f) Once a sale or delivery of natural gas in interstate commerce shall have been previously determined by the Commission to be just and reasonable and such determination has become final and no longer subject to judicial review, the Commission shall have no power to order thereafter a decrease in the rate or charges made.".

SEC. 4. Section 2 of the Natural Gas Act [15 U.S.C. Sec. 717(a)] is amended by adding at the end thereof the following new paragraphs:

"(10) 'New natural gas' means (A) natural gas sold or delivered in interstate commerce for the first time on or after January 1, 1977: *Provided,* That any natural gas sold or delivered in interstate commerce prior to the date of enactment of the Natural Gas Act Amendments of 1977 pursuant to limited term certificates (5 years or less) or temporary emergency contracts shall not be considered, for the purpose of this provision, as having been committed to interstate commerce, (B) natural gas produced from any well initiated or completed on or after January 1, 1977, or from any well recompleted or deepened on or after January 1, 1977, and subsequently producing solely from any formation not theretofore produced in that well; or (C) natural gas continued in interstate commerce after the expiration of an existing contract by its own terms (and not through the exercise of any power to terminate or renegotiate contained therein).

"(11) 'Affiliate' of another person means any person directly or indirectly controlling, controlled by, or under common control with such other person.

"(12) 'Producer' means a person who engages in the production, gathering, or processing of natural gas from wells or reserves in the United States.

"(13) 'Old natural gas' means natural gas sold in interstate commerce other than new natural gas.".

SEC. 5. Section 7 of the Natural Gas Act [15 U.S.C. Sec. 717(f)] is amended by adding at the end thereof the following new subsection:

"(i) The provisions of this section shall not permit the Commission to condition the grant of or to deny a certificate of public convenience and necessity to a natural gas company which transports natural gas in interstate commerce for the transportation in interstate commerce or for the sale in inter-

state commerce for resale of natural gas, or for the facilities used therefor, based on the price of new natural gas: *Provided, however,* That any contract for new natural gas shall be filed with the Commission by the purchasing natural gas company which transports natural gas in interstate commerce.".

By Mr. CASE (for himself, Mr. PROXMIRE, Mr. WEICKER, Mr. JAVITS, Mr. BROOKE, Mr. ALLEN, Mr. LEAHY, Mr. STAFFORD, Mr. CHURCH, Mr. ABOUREZK, and Mr. DOLE):

S. 113. A bill to promote public confidence in the legislative, executive, and judicial branches of the Government of the United States; to the Committee on Government Operations.

FINANCIAL DISCLOSURE

Mr. CASE. Mr. President, on behalf of Mr. PROXMIRE, Mr. WEICKER, Mr. LEAHY, Mr. JAVITS, Mr. BROOKE, Mr. ALLEN, Mr. STAFFORD, Mr. CHURCH, Mr. ABOUREZK, Mr. DOLE, and myself, I introduce a bill to require full public disclosure of financial matters by the President, the Vice President, Members of Congress and the judiciary.

Over the years, I have introduced financial disclosure legislation in this Chamber many times. Indeed, this is the 11th Congress in which I have had a disclosure bill. At first, I was the sole sponsor, but support has grown and there were a number of cosponsors on my previous bills. And, indeed, there were several other financial disclosure bills introduced in both the House and the Senate.

In fact, twice during the second session of the 94th Congress the Senate passed financial disclosure legislation—only to find that the other Chamber had not kept pace.

We in the Senate are governed by standing rules on disclosure and those in the House also have standing rules. An Executive order applies to personnel in the administration and the Federal judiciary also polices itself—to a certain extent.

But all of these rules are somewhat different and in the case of the judiciary, disclosure is voluntary. And different rules that set up different standards which may or may not be followed are just not good enough.

We owe it to the public to enact uniform, mandatory legislation requiring public financial disclosure for we must accept—indeed we must embrace—the belief that the public is entitled to know the facts about those it elects or would elect to public office.

We hear on all sides of that chronic ailment—public disillusionment with Government. We must reverse this if our Government is to endure. Certainly, there could be no better way to show the public that Government once again is worthy of trust than to pass financial disclosure legislation.

I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD as follows:

S. 113

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the President and the Vice President, each Member of the Senate and the House of Representatives (including Resident Commissioners and Delegates), each civil or military officer of the executive branch or any department or agency thereof, each judge or justice of a court of the United States, and each employee of the legislative, executive, or judicial branch of the Government of the United States or any department or agency thereof who is compensated at a rate in excess of $25,000 per annum shall file annually, and each individual who is a candidate of a political party in a general election for Federal office, or Resident Commissioner or Delegates in the House of Representatives but who, at the time he becomes a candidate, does not occupy any such office, shall file within one month after he becomes a candidate for such office, with the Comptroller General a report containing a full and complete statement of—

(1) the amount and source of each item of income, each item of reimbursement for any expenditure, and each gift or aggregate of gifts from one source (other than gifts received from a member of his immediate family) received by him or by him and his spouse jointly during the preceding calendar year which exceeds $100 in amount or value; including any fee or other honorarium received by him for or in connection with the preparing or delivery of any speech or address, attendance at any convention or other assembly of individuals or the preparation of any article or other composition for publication and the monetary value of subsistence, entertainment, travel and other facilities received by him in kind;

(2) the value of each asset which is in excess of $1,000 held by him or by him and his spouse jointly, other than household furnishings, goods, jewelry and clothing, and the amount of each liability which is in excess of $1,000 owed by him or by him and his spouse jointly as of the close of the preceding calendar year;

(3) all dealings in securities or commodities which are in excess of $1,000 by him or by him and his spouse jointly, or by any person acting on his behalf or pursuant to this directions during the preceding calendar year and;

(4) all purchases and sales which are in excess of $1,000 of real property or any interest therein by him, or by him and his spouse jointly, or by any person acting on his behalf or pursuant to his direction, during the preceding calendar year.

(b) Except as hereinbefore provided, reports required by this section (other than reports so required by candidates of political parties) shall be filed not later than April 30 of each year. In the case of any person who ceases, prior to such date in any year, to accupy the office or position the occupancy of which imposes upon him the reporting requirements contained in subsection (a) shall file such report on the last day he occupies such office or position, or on such later date, not more than three months after such last day, as the Comptroller General may prescribe.

(c) Reports required by this section shall be in such form and detail as the Comptroller General may prescribe. The Comptroller General may provide for the groupings in securities or commodities, and purchases and sales of real property, when separate itemization is not feasible or is not necessary for an accurate disclosure of the income, net worth, dealing in securities and commodities, or purchases and sales of real property of any individual.

(d) Each report required by this section shall be made under penalty for perjury. Any person who willfully fails to file a report required by this section, or who knowingly and willfully files a false report under this section, shall be fined $2,000, or imprisoned for not more than five years, or both.

(e) All reports filed under this section shall be maintained by the Comptroller General as public records which, under such reasonable regulations as he shall prescribe, shall be available for inspection by members of the public.

(f) For the purposes of any report required by this section, an individual shall be considered to have been a Member of the Senate or House of Representatives, a Resident Commissioner, and Delegates or an officer or employee of the legislative, executive, or judicial branch of the Government of the United States or any department or agency thereof, during any calendar year if he served in any such position for more than six months during such calendar year.

(g) As used in this section—

(1) The term "income" means gross income as defined in section 61 of the Internal Revenue Code of 1954.

(2) The term "immediate family" means the spouse of an individual, and the child, parent, grandparent, grandchild, brother or sister of an individual and the spouses of such individuals.

(3) The term "security" means security as defined in section 2 of the Securities Act of 1933, as amended (15 U.S.C. 77b).

(4) The term "commodity" means commodity as defined in section 2 of the Community Exchange Act, as amended (7 U.S.C. 2).

(5) The term "dealings in securities or commodities" means any acquisition, holding, withholding, use, transfer, disposition, or other transaction involving any security or commodity.

(6) The term "court of the United States" means each court so defined by section 451, title 28, United States Code, and each of the following courts: the District Court of the Virgin Islands, the District Court of Guam, the Tax Court of the United States, and the Court of Military Appeals.

SEC. 2. Section 554 of title 5, United States Code, is amended by inserting at the end thereof the following new subsection:

"(f) COMMUNICATIONS TO AGENCY.—All written communications and memorandums stating the cirmumstances, source, and substance of all oral communications made to the agency, or any officer or employee thereof, with respect to such case by any person who is not an officer or employee of the agency shall be made a part of the public record of such case. This subsection shall not apply to communications to any officer, employee, or agent of the agency engaged in the performance of investigative or prosecuting functions for the agency with respect to such case."

By Mr. HOLLINGS:

S. 114. A bill to amend title 23 of the United States Code, relating to highways, in order to encourage the States to establish highway assistance patrols; to the Committee on Public Works.

S. 114

Mr. HOLLINGS. Mr. President, it seems that auto breakdowns on our interstate highways are quite common. I think that at one time or another we have all passed a stranded vehicle along the highway. In most cases one must simply wait for a passing car to volunteer assistance or else start walking. For

this reason, I am introducing a bill requiring the Secretary of Transportation to take such action as may be necessary to encourage States to establish highway assistance patrols on these heavily traveled highways. The Secretary would then make a study of the effectiveness of assistance provided by such patrols and report to the Congress as to the results of such study, including any recommendations with respect to establishing additional programs. Hopefully, this measure will go a long way toward relieving this ever growing problem.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 115. A bill to authorize the use of facilities at the Owyhee Indian Hospital of the Duck Valley Indian Reservation to provide certain medical care to non-Indians; to the Committee on Interior and Insular Affairs.

Mr. CANNON. Mr. President, on behalf of my colleague, Senator LAXALT, and myself, I introduce for appropriate reference a bill to authorize the use of facilities at the Owyhee Indian Hospital of the Duck Valley Indian Reservation to provide certain medical care to non-Indians.

The Owyhee Hospital is located on the Duck Valley Indian Reservation in Nevada and Idaho, in a remote and sparsely settled region of both States. There are some 600 non-Indian residents within a 50-mile radius of this hospital. When they need medical care, even for routine matters, they must travel considerable distances to reach a medical facility.

I believe the need is obvious for more readily available medical care for these people. This measure would authorize the Secretary of Health, Education, and Welfare, subject to the consent of the Indian tribes involved, to take such actions as may be necessary to utilize the Owyhee Hospital for the purpose of providing nonemergency medical care to non-Indians living within approximately 50 miles of the hospital. Such care would be provided on a fee-for-service basis.

Mr. President, this legislation will serve a dual purpose. It will humanely enable non-Indians living in this remote area to more readily obtain medical attention. It will also help assure that this facility will be adequately utilized, and the fees paid by non-Indians will contribute to the financial support of the hospital.

Mr. LAXALT. Mr. President, the Owyhee Hospital is located on the Duck Valley Indian Reservation in Nevada and Idaho, in a remote and sparsely settled region of both States. There are hundreds of non-Indians in a 50-mile radius of this hospital. When they need medical assistance they must travel over 100 miles to reach a medical facility. The need for more readily available medical service for these people is obvious. This measure would authorize and direct the Secretary of Health, Education, and Welfare, subject to the consent of the Indian tribes involved, to take such action as may be necessary in order to utilize the Owyhee Hospital for the purpose of providing nonemergency medical care to non-Indians living within approximately 50 miles of the hospital. Such care would be provided on a fee-for-service basis.

Mr. President, this legislation will enable non-Indians living in this remote part of our country to more readily obtain necessary medical attention. It will also help assure that this facility will be adequately utilized and the fees paid by non-Indians will contribute to the financial support of the hospital. I urge serious consideration of this proposal at the earliest possible opportunity.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 116. A bill to authorize the Director of the Bureau of Mines to extend certain assistance to certain individuals engaged in mineral exploration and development; to the Committee on Interior and Insular Affairs.

Mr. CANNON. Mr. President, on behalf of my colleague, Senator LAXALT, and myself, I introduce a bill to authorize the Director of the Bureau of Mines to extend assistance to certain individuals engaged in mineral exploration and development.

This measure will provide such assistance, financial or otherwise, as the Director of the Bureau of Mines determines is necessary to enable small, independent operators to engage in mineral exploration and development. At a time when our dependence on foreign sources for many raw materials is growing, I believe it is important that we encourage the exploration and development of our own untapped resources. This bill is prepared and is introduced at the request of veterans of the search for gold, silver, and other minerals throughout the West.

Despite the fact that the large mining companies are involved with complex electronic equipment in their continuing search for mineral resources, the individual prospector with jeep and burro still play an important role. Nearly all mineral discoveries over the past century have been the result of individual prospectors making the initial discovery and then being forced for financial reasons to go to the large companies for development. This bill will encourage this historic process in mineral development.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 117. A bill to provide that four publications detailing the history of the Indian tribes of Nevada shall be subject to copyright by the Inter-Tribal Council of Nevada; to the Committee on the Judiciary.

Mr. CANNON. Mr. President, my Nevada colleague, Senator LAXALT, and I have introduced an unusual and historically significant bill today, designed to authorize the Inter-Tribal Council of Nevada to copyright four publications covering the history of the Indian tribes of Nevada which will be published via the use of Federal funds and printed by the U.S. Government Printing Office.

Normally, such publications would be in the public domain and, normally speaking, I subscribe to that concept. In this instance, however, the situation is not normal. For example, this bill will not benefit any one individual, but rather it will safeguard the rights of generations yet unborn to be able to read and understand the history of their ancestors.

The compilation of that history truly was a communal undertaking. More than 6 years ago, recognizing the need for a written history, over 150 members of the four separate Indian tribes now existent in Nevada, collaborated in the creation of these four tribal histories.

These tribes are all that currently remain of four great Indian nations: the Northern Paiutes, the Southern Paiutes, the Washoe, and the Western Shoshone. Collectively, they form the Inter-Tribal Council of Nevada.

Their efforts to create these histories was a major project which, since it included the customs and mores of the four tribes, involved research, copying ancient records, personal interviews, the recording of old songs and legends, as well as the patient, painstaking development of ancient lore from all available sources.

Our interest here is, of course, only to have the published histories copyrighted for the benefit of all those people who have worked so hard to make their creation possible. It is worth noting, however, that they are going further by working to create curricular school material, maps, old photographs, pictures, artifacts, and other things of value in preserving the history of a people before it is lost forever.

Under those circumstances, copyrighting is the fair and equitable thing to do and may well encourage other tribes in other States to undertake similar valuable historical efforts before it is too late.

By Mr. CANNON:

S. 118. A bill to provide for the suspension of annual assessment work on mining claims held by location in the United States; to the Committee on Interior and Insular Affairs.

Mr. CANNON. Mr. President, on behalf of my colleague, Senator LAXALT, and myself, I introduce for appropriate reference a bill to provide for the suspension of annual assessment work on mining claims held by location in the United States.

Section 28 of title 30 of the United States Code now requires that on each mining claim located, and until a patent is issued, not less than $100 worth of labor must be performed annually or improvement worth that amount must be made each year in order to maintain the validity of the claim.

The need to conserve fuels makes the continued assessment requirement highly questionable. Additionally, the assessment work normally involves some surface disturbance of the mine site at a time when environmental concerns are growing. Finally, this requirement is hardly a practical means of maintaining a valid claim and I hope a more appropriate procedure may be considered during the suspension period.

The effect of this bill is to suspend the requirements of the Code as to all mining claims in the United States until July 1, 1980, provided that the claimant by July 1 of each year files a notice certifying his desire to continue to hold the mining claim involved. I hope the Interior Committee and the Senate will be able to look at this situation expeditiously and approve this moratorium.

By Mr. INOUYE:

S. 119. A bill to incorporate the Pearl Harbor Survivors Association; to the Committee on the Judiciary.

Mr. INOUYE. Mr. President, today I have introduced a bill to incorporate the Pearl Harbor Survivors Association. This measure would bestow Federal recognition on this private nonprofit association but would not affect its legal, corporate, or other status.

The association is comprised of men and women who defended our Nation against the historic Japanese attack on the U.S. Pacific Fleet and bases around Pearl Harbor on December 7, 1941. Since 1941, survivors of the Pearl Harbor attack have formed many local and regional groups, and there are now 101 active chapters located in almost every State. Their national organization, the Pearl Harbor Survivors Association, was incorporated in Missouri in 1958.

An estimated 12,500 surviving members of the U.S. Armed Forces served at Pearl Harbor and in the area of Oahu Island during the December 7 attack. Of that number, the Pearl Harbor Survivors Association has an active membership of 5,259 men and women. Anyone who was a member of the Armed Forces on Oahu or who was stationed aboard a ship located within 3 miles of the island on December 7, 1941, is eligible to join. Members must either have been honorably discharged or still be a member of our Armed Forces. The association conducts regular chapter, district, and State meetings, and a biennial national convention.

The motto of the organization is "Keep America Alert," which the association seeks to accomplish by: First, preserving historical momentos and chronicles of the Pearl Harbor attack; second, protecting graves of Pearl Harbor victims; and, third, stimulating Americans to take a more active interest in the affairs and future of the United States. The association has been particularly active in veterans causes and national preparedness.

The association is unique because it will exist only as long as there are Pearl Harbor survivors. In order for the association to be more effective, it is imperative that it be recognized through the granting of a Federal charter. I believe the association fulfills all of the necessary requirements.

I am proud to sponsor this legislation. I wish to insert into the CONGRESSIONAL RECORD a statement by the Pearl Harbor Survivors Association. I believe it best summarized the purpose of the organization.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

On that peaceful Sunday morning, December 7th, 1941, an enemy attack force hit Pearl Harbor with all its fury of death and destruction. In only thirty short minutes the attackers accomplished their most important mission; they had wrecked the battle force of the United States Pacific Fleet. We also lost half of the military aircraft on the island. We accounted for ourselves as military, by fighting back, not yet aware that history had been thrust upon us. Pearl Harbor was the actual beginning of the great war which was to change the entire political structure of the world. We Americans who were there demonstrated that we were prepared to give our lives, and did give them when necessary. Our sacrifices at Pearl Harbor united the nation and gave rise to a determination to protect and keep the American freedom. Our sacrifice alerted a relaxed nation, brought it to its feet and caused it to win World War II. The lesson we learned by our sacrifice will not be easily forgotten. Many of us are no longer of use as sailors, soldiers, marines and airmen. We must make ourselves useful at home, by dedicating ourselves to the principles of freedom; by doing everything within our power to bring about a commitment of patriotism. We survivors who are still alive, for those who did not survive, can never permit ourselves to become vulnerable again.

"REMEMBER PEARL HARBOR"

By Mr. ABOUREZK (for himself and Mr. TOWER):

S. 120. A bill to amend the Disaster Relief Act of 1974, and for other purposes; to the Committee on Public Works.

DROUGHT ASSISTANCE AMENDMENT OF 1977

Mr. ABOUREZK. Mr. President, today I am introducing the Drought Assistance Amendments of 1977. While the impetus for introducing this legislation is the particular situation in my home State of South Dakota, the Drought Assistance Amendments of 1977 are certainly applicable to many other States in the Midwest, Southwest, and West.

As you may know, South Dakota is experiencing a devastating drought. It has been called the most economically devastating drought in U.S. history. Farmers who lived through the tough years in the 1930's will readily attest to this. A brief look at the statistics will bear this out:

There has been a total crop loss of $660 million, 67 percent of potential output.

There has been a 42 percent cattle herd depletion, a 2 million head loss. In 2 counties, this has meant a sell down in excess of 85 percent; 7 counties, over 75 percent; and in 27 counties, over 50 percent depletion.

There has been a 74 percent alfalfa hay loss.

As of November 1, the loss from wind erosion has reached almost $8.5 million.

As far as water loss, 31 communities report severe water supply problems and 4 are hauling all or part of their water. In addition 33 percent of the stock dams are either dry or the water is unfit for the livestock.

While the effects of this drought are admittedly not as readily identifiable as those of other natural disasters, the need for Federal disaster relief is no less strong. As stipulated by the Disaster Relief Act of 1974, before Federal assistance can be extended to an area, it must first be designated by the President as a "major disaster" area. Just recently, President Ford turned down South Dakota's request for such a designation. South Dakota requested assistance in five general areas:

Economic Recovery Aid—As I indicated, a 67 percent crop loss occurred in 1976. Due to the feed shortages, cattle sell-down reached 42 percent by the end of 1976. Such statistics are of even greater significance to a State like South Dakota, where farm income comprises over half of the total personal income in 42 of 67 counties. Reductions in farm income will affect not only farm related business but also nonfarm business who will feel the pinch in the months to come in the form of reduced sales. The proposed drought amendments are necessary to alleviate the economic pressures caused by the severe decline of overall income.

Revenue Loss—Local governments and school districts face a considerable revenue loss due to the drought. The substantial cattle sell-downs have seriously eroded South Dakota's property tax base, since some counties derive over 10 percent of their property taxes from personal property taxes on cattle. In addition, because county governments are almost wholly dependent upon property tax revenues, this erosion will have an even greater impact and may likely precipitate financial crisis. With the drought-related decline in retail sales, cities will also suffer revenue losses due to the deteriorating municipal sales tax base. Last, but not least, tribal governments will be severely affected by defaults on the leased tribal trust lands. Unless there is to be elimination of basic governmental services, the community disaster loan program and the education grant program benefits must be extended to drought emergency areas.

Water needs—Many of South Dakota's municipalities are suffering from a severe shortage of water for just their basic needs. Use restrictions have been commonplace since midsummer and some communities have had to resort to hauling water from miles away. The solution calls for the deepening of existing wells or drilling for new ones. The substantial tax base needed for such projects is not available in South Dakota. The need for additional funds for development of municipal water sources is a real one if emergency conditions are to be alleviated.

Livestock water needs are not being met, either. By September of 1976, one third of the stock water dams were dry and there has been only negligible rainfall since. Letters from my constituents further underline the extent of the problem. One letter from Clark County stated:

Forty percent of the dugouts have dried up and another 40 percent are very low. There are sloughs and lake areas that are completely dry. People that were here in the 30's said they never went clearly dry.

Conservation needs.—The lack of water poses an alarming threat as far as wind erosion of the topsoil is concerned. The Soil Conservation Service has estimated that 2.6 million acres—a figure 10 times above normal—are now highly vulnerable to wind erosion. This wind erosion problem, unless checked, will more than likely create another Dust Bowl in South Dakota. Federal assistance is necessary to help implement such emergency land conservation programs as fencing, minimum tillage, and range seeding. In addition to these necessary stopgap measures, technical advisers are needed for conservation promotion and education and for the preparation of long-range conservation programs to aid in mitigating the effects of future disasters.

Emergency employment assistance.—The South Dakota Labor Department has indicated that there are over 7,000 farmers who are seeking off-the-farm employment who could be provided with public service jobs if the money were available. Unlike some other States, South Dakota does not have the capacity to handle such an influx of unemployed individuals without support from the public sector. Consequently, Federal funds are badly needed in this area.

The assistance which has been received thus far has done little to soften the impact of $160 million in drought-related extraordinary expenditures by farmers and ranchers. Beyond this, the loss of $1.18 billion to the economy of South Dakota and the erosion of future earning potential due to the forced depletion of 42 percent of our foundation cattle herds make speedy Federal assistance even more mandatory.

It is apparent from working with the present disaster programs that they were not designed for prolonged natural disasters like drought. It takes a long time for the total impact of drought to become known and it will take South Dakotans several years to recover from the losses that resulted from last year's crop failure.

I think the Federal Government must share the risk with the farmers and ranchers who are the producers of food for the Nation and the World. The Government must assume its share of this by providing assistance to people to recover from last year's crop failure as well as by enacting new programs to deal with the effects of future drought problems.

The prospects for next year look somewhat bleak and therefore we need to design a program that will deal with the drought both on a planning level and on a program level.

Mr. President, I hope I can have the support of the Senate in my efforts to bring the needed assistance to not only South Dakota but also many other States who are also suffering from the drought.

The bill I am introducing today amends the Disaster Relief Act of 1974. Briefly, this bill would:

First, direct the Federal Disaster Assistance Administration to provide special attention to droughts.

Second, require that, upon the declaration of a drought emergency, the President shall appoint a Federal coordinating officer to work with the Governor of the affected area.

Third, authorize Federal agencies, on the direction of the President, to provide assistance to protect and preserve property including, but not limited to:

1, conservation practices,

2, education and training for appropriate conservation practices,

3, in-depth water supply investigations,

4, the transportation of water, if necessary,

5, employment and/or manpower training.

Fourth, amend the existing disaster individual and family grant program to apply in case of drought emergency or major disaster caused by drought.

Fifth, amend the community disaster loan program to include drought emergencies.

Sixth, authorize the President to provide temporary assistance in the form of mortgage or rental payments to individuals or families who, because of a drought, have received foreclosure notice on land or equipment.

Seventh, provide economic recovery assistance to areas where a drought emergency had been declared, including providing funds to recovery planning councils to guarantee loans for facilities for industrial, farm, or commercial usage.

Eighth, amends the existing disaster law which provides assistance to school districts that have suffered a loss of revenue due to a major disaster. Makes school districts eligible during a drought emergency.

Ninth, amends the SBA Economic Injury loan program to provide for 1-percent loans.

By Mr. BIDEN (for himself, Mr. BROOKE, Mr. CASE, Mr. KENNEDY, Mr. MUSKIE, Mr. HART, Mr. LEAHY, Mr. HATFIELD, Mr. HEINZ, Mr. RIBICOFF, Mr. MATHIAS, Mr. HATHAWAY, and Mr. HUDDLESTON):

S. 121. A bill to establish a uniform and comprehensive legal regime governing liability and compensation for damages and cleanup costs caused by oil pollution, and for other purposes; to the Committees on Commerce, Interior and Insular Affairs, and Public Works, by unanimous consent.

FEDERAL OIL POLLUTION LIABILITY AND COMPENSATION ACT OF 1977

Mr. BIDEN. Mr. President, I am introducing today, on behalf of myself, Senator BROOKE, Senator CASE, Senator KENNEDY, Senator MUSKIE, Senator HART, Senator LEAHY, Senator HATFIELD, Senator HEINZ, and Senator RIBICOFF, Senator MATHIAS, Senator HATHAWAY, Senator HUDDLESTON, the Federal Oil Pollution Liability and Compensation Act of 1977.

This legislation is designed to provide a comprehensive and coordinated liability and compensation law to replace the several varied and narrowly focused laws that now govern the field of oil pollution liability. I introduced essentially the same legislation over 1 year ago, in November 1975. I regret the need to do so again, but despite increasing problems, Congress has not yet acted. This urgent issue must be addressed soon.

The specter of oil washed shores, devastated fish and wildlife resources and polluted waters is another one of the terrible consequences we endure as a result of our Nation's dependence on petroleum supplies. Yet, while our dependence on this resource has developed over the last century, our appreciation for the problems of preventing and containing oil pollution from the various operations by which we receive our supplies is a relatively recent event. Only since the *Torrey Canyon* shipwreck disaster of 1967 caused extensive and pervasive damage to the English and French shores has the problem of oil spill prevention been seriously addressed by national and international policymakers and the industries involved in the production, processing, and transportation of petroleum.

Despite the increasing magnitude of the problem, the issue tends to be neglected except when dramatic events focus our attention on it. Recently two environmental catastrophes—one an oil spill in the Delaware River and the other the spill off Nantucket—have again demonstrated the need for this legislation. As tragic as these two events are, liability legislation is equally necessary for those smaller, day-to-day events that do not make headlines, but can cause great cumulative environmental damage.

This Nation began concerted efforts to reduce the damages and control the discharge of oil from offshore and onshore facilities and vessels in 1970 with passage of the Water Quality Act of 1970. Additional safeguards have been provided through the Ports and Waterways Safety Act of 1972 and the Federal Water Pollution Control Act Amendments of 1972. In addition the special risks presented by the transportation of oil from Alaska's North Slope, and by the prospect of deepwater port development in the United States have led to the enactment of increasingly more stringent liability and compensation laws dealing with these specific operations. Provisions of the Transalaska Pipeline and Deepwater Ports Acts thus provide equitable means of compensating the victims of oil pollution while providing greater incentives for oil spill prevention and control from these sources.

Most recently, the Senate, in passing legislation to amend the Outer Continental Shelf Lands Act of 1954, put into statutory language a requirement that has existed in regulations since 1969, to make operators on the Outer Continental Shelf liable without limit for all cleanup costs associated with a spill. This provision also placed additional liability to a limit of $22 million on OCS operators to compensate victims who suffer damages to real or personal property as a result of an oil spill. Language from the Deepwater Port Act of 1975, to enable Federal and State Governments to recover funds they need to restore or rehabilitate public resources damaged or destroyed by an oil pollution incident was also incorporated in the OCS amendments.

Mr. President, the legislation I am introducing today incorporates the best provisions of each of these measures to which I have referred, in addition to providing even greater safeguards and incentives for oil pollution prevention and control on a more comprehensive scale than has ever existed before.

The bill covers spills from vessels, onshore and offshore facilities, pipelines and deepwater ports.

It imposes unlimited liability for all cleanup costs on the owner and operator of the vessel, facility or port from which a spill occurs.

Additional liability to cover damages caused by the spill is also imposed. In addition, a $250 million fund generated by a 5-cent-per-barrel charge on oil produced in or transported to the United States is available to compensate for costs which exceed the liability of the responsible party or to compensate for cleanup costs and damages in cases where the source or party responsible for the spill cannot be determined.

The incidence of oil spills is growing rapidly. In 1973, the Coast Guard reported 13,328 spills of a total volume of over 24 million gallons of oil. The number of spills in 1974 was 13,996, totaling nearly 17 million gallons. In 1975 over 58 million gallons were spilled. In the first 9 months of 1976, according to the Tanker Advisory Center in New York, 61.6 million gallons have been spilled. These 1976 figures do not include the two spills that occurred off Nantucket Island and in the Delaware River totaling over 7.7 million gallons.

The Coast Guard reports further that of 1,106 tanker accidents at sea in the period from 1969 to 1973, more than three-fourths occurred within 50 miles of the U.S. coastline.

Adjacent to my own State of Delaware, where close to 70 percent of oil imported to the east coast comes to port, nearly 40 discharges ranging from 100 to 200,000 gallons occur annually.

With cleanup costs that the Environmental Protection Agency estimates easily run as high as $25 per gallon, the immediate economic consequences of oil pollution are readily appreciated. But cleanup costs are only part of the economic impact accompanying a spill. Damage to private property, fisheries resources, public beaches, and coastline features also exact a high economic toll both in terms of current value and future productivity lost. These costs can amount to millions of dollars. Additional social costs, such as the loss of esthetic values, and the destruction of bird and other wildlife species are borne by us all in the wake of a spill.

Mr. President, actions by various governmental agencies, regardless of the diligence with which they are pursued cannot possibly hope to deal effectively and completely with the oilspill problem. For example, the Environmental Protection Agency alone is charged with administering and enforcing oilspill prevention regulations which apply to:

About 30,000 oil storage terminals, tank farms, and bulk plants.

About 285 oil refineries.

Several thousand production facilities, both onshore and offshore. The number changes almost daily as old oilfields are reopened, stripped, and closed or abandoned.

Large numbers of bulk oil consumers such as apartment houses, office buildings, schools, hospitals, farms, and Federal facilities.

The U.S. Coast Guard is charged with the responsibility for preventing and controlling oilspills from vessels and oil transfer facilities, pipelines, railroads, and tank trucks. These sources of oil pollution are involved in literally thousands of operations a day.

It is obvious to me that Government regulation and enforcement is not the whole answer to the oil pollution problem. Until those persons responsible for the equipment and operations involving petroleum are made directly responsible for preventing spills the problem will not be solved.

As petroleum operations increase, the potential for spills and massive polluting incidents will grow proportionately worse, and the effectiveness of Government administration and enforcement efforts to control oil pollution will decrease.

Those of us who live on the Atlantic and Pacific coasts are especially sensitive about the consequences of accelerated Outer Continental Shelf leasing. In addition, even in light of hopes for reduced oil imports, expectations for increased vessel transportation of petroleum supplies by new large capacity ships bring added concerns over massive oilspills.

For example, the Office of Technology Assessment has stated that:

Domestic shipment of oil within the United States will undoubtedly grow substantially by 1980 principally because of the introduction of new production from Alaska, estimated to total 2 million barrels per day by 1980. This oil will be shipped from the Alaskan North Slope to Valdez by pipeline and then to West Coast ports by tanker. Since this trade will equal all of the present U.S. coastwise trade by tanker, it will mean a significant increase in domestic tanker demand and use. If other oil is discovered in Alaska (such as in offshore regions) even greater demands for tanker trade will undoubtedly follow.

Mr. President, we have ample indication that in spite of past efforts, the oilspill problem will continue to plague us and may irretrievably destroy our valuable ocean and coastal resources unless we take concerted action now.

When I introduced this bill in 1975, I quoted from a news article concerning oilspill incidents resulting from OCS operations. According to that July 1975 account:

Twelve of the 20 oil firms which nominated areas for leasing in the Atlantic off Delaware have been responsible for more than half the accidents, including six deaths, at offshore operations in the Gulf of Mexico during the past year.

The dozen firms were involved in 74 of the 138 accidents reported between June 1, 1974, and May 31, 1975, according to inspection of monthly records at the U.S. Geological Survey (USGS) national center in Reston, Va.

Two of the fatal accidents occurred on Sun Oil Co. operations.

The others were on rigs or platforms operated by Cities Service, Exxon, Shell and Kerr McGee.

In what's called "an uneventful period" by USGS workers, most of the oil spills resulting from the accidents were only a few barrels in size. The largest was an estimated 2,213-barrel spill from a Shell pipeline that was not checked for damage after a hurricane ripped through the Gulf of Mexico.

Among the dozen companies, there were also 19 fires—about half of them related to careless welding—and six times work boats collided with oil equipment.

Most of the small spills were blamed on pipeline corrosion, malfunctioning sump pumps, failure of pressure sensors to shut protective valves, and human error or carelessness.

I believe that the importance of this legislation to the welfare of the American people cannot be overemphasized, and I look forward to its thoughtful consideration by the Members of this body.

Mr. President, to assist in the review and deliberations on this legislation, I ask unanimous consent that a section-by-section analysis and the text of the bill be printed at this point in the RECORD.

There being no objection, the section-by-section analysis and the text of the bill were ordered to be printed in the RECORD, as follows:

S. 121

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Oil Pollution Liability and Compensation Act of 1977".

DECLARATION OF POLICY

SEC. 2. (a) FINDING.—The Congress finds and declares that—

(1) The damages and cleanup costs resulting from oil spills are matters of major national concern.

(2) The transportation, production, and handling of oil in, on, or near inland and ocean waters create environmental risks, and may impair the rights of shoreline property owners and harm the general health and welfare of citizens of the United States.

(3) Existing law with respect to liability and compensation for oil pollution damage is inconsistent, inadequate, incomplete, inefficient, and inequitable.

(4) The legal rules applicable to oil pollution liability and compensation need to be rationalized and reformed to assure that adequate and timely compensation is available for oil pollution from all sources.

(b) PURPOSES.—It is therefore declared to be the purpose of the Congress in this Act to—

(1) enact a comprehensive national law governing oil pollution liability and compensation;

(2) maximize the incentive for all persons producing, transporting, or handling oil to take all steps necessary or appropriate to prevent the discharge of oil;

(3) establish a strict liability standard for cleanup costs and damages resulting from the discharge of oil;

(4) create a single and all-inclusive compensation fund to pay for all cleanup and damages resulting from such a discharge;

(5) provide adequate funds and an expeditious procedure to compensate those injured by such a discharge; and

(6) provide for the restoration, rehabilitation, or replacement of the natural resources damaged by a discharge of oil.

DEFINITIONS

SEC. 3. As used in this Act, unless the context indicates otherwise, the term—

(1) "Administration" means the Federal Oil Pollution Liability and Compensation Administration;

(2) "Administrator" means the chief executive of the Administration;

(3) "aquatic and terrestrial environment" includes but is not limited to the navigable waters of the United States (including the lands therein and thereunder), the adjacent shorelines (including waters therein and thereunder), the waters of the contiguous zone, the waters within the safety zone around a deepwater port, and waters superjacent to the Continental Shelf of the United States and any other lands or waters of the United States; the fish, wildlife, and other living resources of such lands and waters; and the recreational and scenic values of such lands, waters, and resources;

(4) "barrel" means 42 United States gallons at 60 degrees Fahrenheit;

(5) "cleanup costs" means all actual costs, including, but not limited to, administrative and other costs to the Federal Government, to any State or local government, to any foreign governments, or to their contractors or subcontractors, of (A) removing or attempting to remove, or (B) taking other measures to prevent, reduce, or mitigate damages to the public health or welfare, or to public and private property including but not limited to shorelines, beaches, and natural resources of the aquatic and terrestrial environment;

(6) "contiguous zone" means the entire zone established or to be established by the United States under article 24 of the Convention on the Territorial Sea and the Contiguous Zone (15 UST 1606; TIAS 5369) or otherwise by law or treaty;

(7) "damages" means all direct and proximate damages, except cleanup costs, suffered by any person as a result of a discharge of oil, including—

(A) the value of any loss or injury at the time such loss or injury is incurred, with respect to any real or personal property that is damaged or destroyed as a result of a discharge of oil;

(B) the cost of restoring, repairing or replacing any real or personal property that is damaged or destroyed by a discharge of oil; any income necessarily lost during the time such property is being restored, repaired, or replaced; and any reduction in the value of such property thereafter, by comparison with its value prior to such discharge;

(C) any loss of income or impairment of earning capacity due to damages to real or personal property, including natural resources, without regard to ownership of such property or resources, that is damaged or destroyed by a discharge of oil, if the claimant derives at least 50 per centum of his earnings from activities which utilize the property or natural resources;

(D) any costs and expenses incurred by the Federal or any State government in the rehabilitation of natural resources that are damaged or destroyed by a discharge of oil;

(E) any loss to citizens of any use of real property or of natural resources as a result of a discharge of oil, if such property or resources are owned, managed, held in trust, or otherwise controlled by the Federal or any State government; and

(F) any loss of tax revenue by a State or local government due to injury to real or personal property directly resulting from oil contamination.

(8) "deepwater port" has the meaning set forth in section 3(10) of the Deepwater Port Act of 1974 (33 U.S.C. 1502(10));

(9) "discharge" includes, but is not limited to, any spilling, leaking, pumping, pouring, emptying, or dumping, regardless of whether it occurred intentionally or unintentionally;

(10) "facility" includes, but is not limited to, any oil refinery, drilling platform, oil storage or transfer terminal, pipeline, or any appurtenances related to any of the foregoing, that is used, or is capable of being used, to refine, drill for, pump, produce, store, handle, transfer, process, or transport oil; the term does not include a vessel or a deepwater port;

(11) "Fund" means the Federal Oil Pollution Compensation Fund;

(12) "licensee" means a person who holds a valid license for the ownership, construction, and operation of a deepwater port;

(13) "natural resources" means land, fish, wildlife, biota, air, water, and other such resources owned, managed, held in trust, or otherwise controlled by the Federal or any State government;

(14) "offshore facility" means any facility located in, on, or under the navigable waters of the United States or waters of the contiguous zone, or any facility utilized in oil exploration or production activities on the Outer Continental Shelf of the United States;

(15) "oil" means petroleum, including crude oil or any fraction or residue therefrom;

(16) "onshore facility" means any facility located in, on, or under any land within the United States other than submerged land;

(17) "owner and operator" means (A) with respect to a vessel, any person owning, operating, or chartering by demise, such vessel; (B) with respect to an offshore or onshore facility, any person owning or operating such facility, whether by lease, contract, or other form of agreement; and (C) with respect to any abandoned facility, the person who owned or operated such facility immediately prior to such abandonment;

(18) "person" means an individual, a public or private corporation, partnership or other association, or a government entity;

(19) "person in charge" means the individual immediately responsible for the operations of a vessel, onshore or offshore facility, or deepwater port;

(20) "safety zone" means the safety zone around a deepwater port as defined pursuant to section 10(d) of the Deepwater Port Act of 1974 (33 U.S.C. 1509 (d));

(21) "Secretary" means the Secretary of Transportation;

(22) "State" includes each of the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Canal Zone;

(23) "transfer" or "transferred" includes, but is not limited to, both onloading and offloading between a facility and a vessel, between vessels, between facilities; or between a vessel and a deepwater port; and

(24) "vessel" means every description of watercraft or other contrivance that is used, or capable of being used as a means of transportation on water, whether self-propelled or not.

PROHIBITION, NOTIFICATION, AND CLEANUP

SEC. 4. (a)(1) The discharge of oil in harmful quantities as determined by the President under section 311(b)(4) of the Federal Water Pollution Control Act is prohibited.

(2) The owner or operator of a vessel, onshore or off-shore facility, or licensee of a deepwater port, from which oil is discharged in violation of this section shall be assessed a civil penalty of not more than $10,000: *Provided, however*, That such owner, operator, or licensee shall not also be assessed a civil penalty, under section 311(b)(6) of the Federal Water Pollution Control Act or section 18(a)(2) of the Deepwater Port Act of 1974, for the same discharge.

(b) Any person in charge of a vessel, onshore or off-shore facility, or deepwater port shall, as soon as he has knowledge of any discharge of oil from such vessel, facility, or port in violation of this section, immediately notify the appropriate agency of the United States Government of such discharge. Any such person who fails to notify immediately such agency of such discharge shall, upon conviction, be fined not more than $10,000, or imprisoned for not more than 1 year, or both: *Provided, however*, That no person convicted under this section shall also be convicted for the same failure to notify under section 311(b)(5) of the Federal Water Pollution Control Act or under section 18(b) of the Deepwater Port Act of 1974. Notification received pursuant to this section or information obtained by the exploitation of such notification shall not be used against any such person in any criminal case, except a prosecution for perjury or for giving a false statement.

(c)(1) Whenever any oil is discharged, the President shall act to remove or arrange for the removal of such oil, unless he determines such removal will be done properly and expeditiously by the owner or operator of the vessel, onshore or offshore facility, or deepwater port, from which the discharge occurs.

(2) Removal of oil and actions to minimize damage from oil discharged shall, to the greatest extent possible, be in accordance with the National Contingency Plan for removal of oil and hazardous substances established pursuant to section 311(c)(2) of the Federal Water Pollution Control Act.

(3) Whenever the President acts to remove a discharge of oil pursuant to this subsection, he is authorized to draw upon the money available in the Fund estabilshed pursuant to this Act. Such money shall be used to pay promptly for all cleanup costs incurred by the President in removing or in minimizing damage caused by such oil discharge.

LIABILITY FOR DISCHARGE OF OIL

SEC. 5. (a) CLEANUP.—All cleanup costs, incurred by the President, Secretary or any other Federal, State, or local official or agency, or any other person, in connection with a discharge of oil shall be borne by the owner and operator or licensee of the vessel, facility or deepwater port from which the discharge occurred.

(b) VESSELS.—(1) Notwithstanding any other provision of law and except as provided in subsection (d), the owner and operator of a vessel shall be jointly and severally liable, without regard to fault, for damages which result from a discharge of oil from such vessel. Such liability shall not exceed $150 per gross ton, except that if it can be shown—

(A) that such discharge was the result of gross negligence or willful misconduct, within the knowledge and privity of the owner, operator, or person in charge; or

(B) that such discharge was the result of a violation of applicable safety, construction, or operating standards or regulations; such owner and operator shall be jointly and severally liable for the full amount of cleanup costs and damages.

(2) The owner and operator of a vessel carrying oil which has been transported through the trans-Alaska pipeline and loaded on such vessel at the terminal facilities of the pipeline, shall be jointly and severally liable, without regard to fault, subject to the limits and conditions contained in this subsection, to residents or the Government of Canada for cleanup costs and damages resulting from the discharge of oil from such vessel.

(c) ONSHORE AND OFFSHORE FACILITIES AND DEEPWATER PORTS.—Notwithstanding any other provision of law and except as provided in subsection (d)—

(1) The owner and operator of an onshore facility shall be held jointly and severally liable without regard to fault, for damages which result from a discharge of oil from such facility. Such liability shall not exceed $50,000,000 except that if it can be shown that (A) such damages were the result of gross negligence or willful misconduct within the privity and knowledge of such owner or operator, or of the person in charge of such facility; or (B) that such discharge was the

result of a violation of applicable safety, construction or operating standards or regulations; such owner and operator shall be jointly and severally liable for the full amount of such damages.

(2) The owner and operator of an offshore facility shall be held jointly and severally liable without regard to fault, for damages which result from a discharge of oil from such facility. Such liability shall not exceed $50,000,000, except that if it can be shown that (A) such damages were the result of gross negligence of willful misconduct within the privity and knowledge of such owner or operator, or the person in charge of such facility; or (B) that such discharge was the result of a violation of applicable safety, construction, or operating standards or regulations; such owner and operator shall be jointly and severally liable for the full amount of such damages.

(3) The licensee of a deepwater port shall be liable without regard to fault for damages which result from a discharge of oil from such deepwater port. Such liability shall not exceed $100,000,000, except that if it can be shown that such damages were the result of gross negligence or willful misconduct within the privity and knowledge of the licensee or any person in charge of such port, or that such discharge was the result of a violation of applicable safety, construction or operating standards or regulations, such licensee shall be liable for the full amount of such damages.

(d) DEFENSES.—Liability for costs and damages resulting from a discharge of oil shall not be imposed on any person pursuant to subsection (a), (b), or (c), if the owner, operator, or licensee involved establishes that such discharge was caused solely by an act of war. In addition, liability with respect to damages claimed by a damaged party shall not be imposed under subsections (b) and (c) of this section if the owner, operator, or licensee involved establishes that such discharge was caused solely by the negligence or international act of such damaged party.

(e) SUBROGATION.—(1) In any case in which the owner and operator of a vessel are held liable, pursuant to subsection (a) or (b), for costs and damages resulting from a discharge of oil, such an owner or operator shall be subrogated, if such discharge was caused by negligence on the part of the owner or operator of an onshore or offshore facility or on the part of the licensee of a deepwater port, to the rights of any person who is entitled to recover any damages against such owner, operator, or licensee.

(2) In any case in which the owner and operator of an onshore or offshore facility are, or in which the licensee of a deepwater port, is held liable, pursuant to subsection (a) or (c), for cleanup costs and damages resulting from a discharge of oil, such an owner, operator, or licensee shall be subrogated, if such discharge was the result of the unseaworthiness of a vessel or the negligence of a vessel's owner or operator, to the rights of any person who is entitled to recover any damages against the owner or operator of such vessel.

(3) The provisions of this section shall not in any way affect or limit any rights that an owner or operator of a vessel, an onshore facility, an offshore facility, or a license of that the Fund may have against any third party whose acts may have caused or contributed to a discharge of oil.

(4) In any case in which the owner and operator of a vessel, onshore or offshore facility are, or in which the licensee of a deepwater port, is held liable, pursuant to subsection (a), (b), or (c), for costs and damages resulting from a discharge of oil that was caused solely by negligence on the part of the Federal Government in failing to maintain adequate aids to navigation, such owner, operator, or licensee shall be entitled to recover cleanup and damage expenditures from the Federal Government. In such cases, the Fund shall also be entitled to seek recovery from the Federal Government for cleanup and damage expenditures by the Fund.

THE FEDERAL OIL POLLUTION LIABILITY AND COMPENSATION ADMINISTRATION

SEC. 6. (a) ESTABLISHMENT.—There is hereby established in the Department of Transportation an agency which shall be known as the Federal Oil Pollution Liability and Compensation Administration.

(b) OFFICERS.—(1) There shall be at the head of the Administration the Administrator of the Federal Oil Pollution Liability and Compensation Administration. The Administrator shall be appointed by the President, by and with the advice and consent of the Senate, and shall be compensated at the rate now or hereafter provided for level IV of the Executive Schedule pay rates (5 U.S.C. 5315). The Administrator shall report and be responsible to the Secretary, except that decisions of the Administrator shall not be subject to review, delay, reversal, or other action by the Secretary or any other officer or employee of the Department of Transportation.

(2) There shall be in the Administration a Deputy Administrator of the Federal Oil Pollution Liability and Compensation Administration. The Deputy Administrator shall be appointed by the President, by and with the advice and consent of the Senate, and shall be compensated at the rate now or hereafter provided for level V of the Executive Schedule pay rates (5 U.S.C. 5316). The Deputy Administrator shall perform such functions as the Administrator shall from time to time assign or delegate, and shall act as Administrator during the absence or disability of the Administrator or in the event of a vacancy in the office of Administrator.

(3) There shall be in the Administration a General Counsel who shall be appointed by the President, by and with the advice and consent of the Senate, and shall be compensated at the rate now or hereafter provided for level V of the Executive Schedule pay rates (5 U.S.C. 5316).

(c) FUNCTIONS.—The Administrator shall—

(1) establish and maintain the Fund, in accordance with section 7;

(2) act as trustee of the natural resources of the marine environment, in accordance with section 8;

(3) require financial responsibility, in accordance with the provisions of section 9;

(4) establish regulations and provide for the fair and expeditious settlement of claims, in accordance with section 10;

(5) provide public access to information and conduct public education programs, in accordance with section 11;

(6) submit an annual report, in accordance with section 12; and

(7) perform such other functions as are prescribed by law or by the Secretary.

(d) POWERS.—In the performance of his functions, the Administrator is authorized to—

(1) appoint, fix the compensation, and assign the duties of such officers and other personnel as may be necessary or appropriate, and to delegate authority of the Administrator to any such personnel;

(2) utilize, with the consent of the agency concerned, the services or personnel, on a reimbursable basis or otherwise, of any Federal Government agency, of any State or local government agency, or of any organization, to perform such functions on behalf of the Administrator as are necessary or appropriate;

(3) make, promulgate, issue, rescind, and amend such rules and regulations as may be necessary to carry out the purposes of this Act;

(4) conduct such studies and investigations, obtain such date and information, and hold such meeting or public hearings as may be necessary or appropriate to facilitate the exercise of any authority granted to, or the performance of any function imposed on, the Administrator under this Act;

(5) enter into such contracts, agreements, and other arrangements as are deemed necessary or appropriate for the acquisition of material, information, or other assistance related to, or required by, the implementation of this Act; and

(6) issue and enforce orders during proceedings maintained pursuant to this Act including, but not limited to, issuing subpenas, administering oaths, compelling the attendance and testimony of witnesses and the production of books, papers, documents, and other evidence, and the taking of depositions.

THE FEDERAL POLLUTION COMPENSATION FUND

SEC. 7. (a) ESTABLISHMENT.—There is established within the administration a Federal Oil Pollution Compensation Fund. The Fund shall be a nonprofit corporate entity which may sue or be sued in its own name.

(b) DISBURSEMENTS.—(1) Moneys in the Fund shall be disbursed for the following purposes and no others:

(A) administrative and personnel expenses of the Fund, after appropriation in an appropriation bill;

(B) cleanup costs resulting from the discharge of oil incurred (i) pursuant to section 3 of this Act, (ii) pursuant to section 311 of the Federal Water Pollution Control Amendments Act of 1972 (Public Law 92-500), (iii) pursuant to any State or local law, or (iv) by the owner or operator of a vessel or onshore or offshore facility or a licensee if it can be shown that such discharge was caused solely by an act of war or negligence on the part of the Federal Government in establishing and maintaining aids to navigation;

(C) all damages not actually compensated pursuant to section 3 of this Act, and for damages whenever the source of the discharge cannot be determined or is beyond the jurisdiction of the United States; and

(D) research into methods for preventing, containing, and removing discharges of oil.

(2) Payment of compensation by the Fund shall be subject to the Fund acquiring by subrogation all rights of the claimant to recovery cleanup costs or damages from the discharger. The Fund shall diligently pursue recovery for any such subrogated rights.

(3) Notwithstanding the above, the Fund shall not be liable to pay cleanup costs and damages of any claimant whose negligence or intentional act was the sole cause of the discharge.

(c) REIMBURSEMENTS.—In all claims or actions by the Fund against any owner, operator, licensee, or other person providing financial responsibility, the Fund shall recover (1) the amount the Fund has paid to the claimant or to any governmental entity undertaking cleanup operations, without reduction, and (2) interest on that amount, at the existing commercial interest rate, from the date upon which the request for reimbursement was issued from the Fund to the owner, operator, licensee, or other person, to the date upon which the Fund is paid by such owner, operator, licensee, or other person.

(d) FEE COLLECTION.—(1) The Fund shall be provisioned through the levy and collection by the Administrator of a 5-cent-a-barrel fee imposed on the owner of oil when the oil is transferred between (A) a vessel and an onshore or offshore facility, (B) offshore or onshore facilities, or (C) a vessel and a deepwater port. All moneys in the trans-Alaska pipeline liability fund and the deepwater port liability fund shall be placed in the Fund. Any oil upon which a fee has once been levied pursuant to clause (A), (B) or (C) of this paragraph shall not be sub-

ject to a subsquent levy under this paragraph.

(2) The collection of the fee shall continue until the fund reaches $250,000,000 whereupon collection shall be suspended. The collections shall be resumed when the Fund is reduced below $200,000,000 and shall continue until the Fund again reaches $250,000,000. All sums recovered by the Fund from the party or parties responsible for a discharge under the provisions of this Act shall be deposited in the Fund and included in calculating the balance. All sums not needed for the purposes specified in subsection (b) of this section shall be prudently invested in income-producing securities issued by the United States and approved by the Secretary of the Treasury. Income from such securities shall be applied to the principal of the Fund.

(3) Each person responsible for contributing to the Fund in accordance with this subsection shall keep such records and furnish such information as the Administrator shall prescribe in regulations. Collection will be at such times and such manner as shall be prescribed in such regulations.

(4) Whenever the money in the Fund is less than the claims for cleanup costs and damages for which it is liable under this section, the Fund shall borrow the balance required to pay such claims from the United States Treasury at an interest rate determined by the Secretary of the Treasury.

SEC. 8. TRUSTEE OF NATURAL RESOURCES.—The Administrator, or the authorized representative of any State, shall act on behalf of the public as trustee of the natural resources to recover for damages to such resources. Sums recovered shall be used to restore, rehabilitate, or acquire the equivalent of such natural resources by the appropriate agencies of Federal or State government.

FINANCIAL RESPONSIBILITY

SEC. 9. (a) GENERAL.—Each owner or operator of a vessel or an onshore or offshore facility and each licensee shall establish and maintain under rules and regulations prescribed by the Administrator, evidence of financial responsibility based on the tonnage of the vessel, the capacity of the facility or deepwater port, and other relevant factors. Financial responsibility may be established by any one, or a combination of, the following methods acceptable to the Administrator: (1) evidence of insurance, (2) surety bonds, (3) qualification as a self-insurer, or (4) other evidence of financial responsibility satisfactory to the Administrator.

(b) DIRECT ACTION.—Any claim for cleanup costs and damages by any claimant or by the Fund may be brought directly against the bond, the insurer, or any other person providing financial responsibility.

(c) FAILURE TO COMPLY.—(1) Any person who fails to comply with the provisions of this section or any regulation issued hereunder shall be subject to a fine of not more than $25,000.

(2) The Secretary of the Treasury may refuse the clearance required by section 4197 of the Revised Statutes of the United States, as amended (46 U.S.C. 91), to any vessel subject to this section which has not furnished evidence of financial responsibility to the Administrator.

(3) The Secretary, in accordance with regulations promulgated by him, shall (A) deny entry to any port or place in the United States or navigable waters to and (B) detain at any port or place in the United States from which it is about to depart for any other port or place in the United States any vessel subject to this section which, upon request, does not produce evidence furnished by the Administrator that the financial responsibility provisions of paragraph (a) of this section have been complied with.

(d) The Administrator shall increase the requirements established under this section and under subsection (b) and (c) of section 4 annually, by an amount equal to the annual percentage increase in the Consumer Price Index.

CLAIMS, SETTLEMENT, AND ADJUDICATION

SEC. 10. (a) RULES AND REGULATIONS.—The Administrator shall prescribe and may from time to time amend, regulations for the filing, processing, settlement, and adjudication of claims for cleanup costs and damages resulting from the discharge of oil.

(b) PROCEDURE.—(1) Upon receiving information regarding a discharge of oil, the Administrator shall publish and distribute in the area of the discharge information and material on the filing of claims.

(2) Claims shall be filed with the Administrator not later than 2 years after the date of discovery of damage nor later than 6 years after the date of the incident which caused the damage. The Administrator shall prescribe appropriate forms and details for such claims, which shall include a provision requiring the claimant to make a sworn verification of the claim to the best of his knowledge. Each person's damage claims arising from one incident shall be stated in one form. Damages not included in the claim at the time compensation is made shall be deemed waived. Upon receipt of any claim, the Administrator shall as soon as practicable inform all affected parties of the claim.

(3) If the source of the discharge can be determined and liability is conceded, the claimant and the Administrator or the person responsible for the discharge may arrange a settlement which shall be final and binding upon the parties. If liability is not conceded or if a settlement on the amount of damages cannot be negotiated, any party may request a hearing before an Administrative Law Judge.

(4) If the source of the discharge is unknown or cannot be determined, the claimant and the Administrator shall attempt to arrange a settlement under procedures contained in regulations promulgated by the Administrator. If a settlement cannot be negotiated, the claim shall be submitted to an Administrative Law Judge.

(c) ADMINISTRATIVE HEARINGS.—(1) The Administrator shall promulgate regulations for hearings before an Administrative Law Judge. The Administrative Law Judge shall have the power to administer oaths, and subpena the attendance and testimony of witnesses, the production of books, records, and other evidence relative or pertinent to the issues presented for determination.

(2) Upon receipt of a request for a hearing, the Administrative Law Judge shall promptly schedule a hearing to determine the amount and validity of the damage claim. The hearing shall be held in the area where the damage occurred.

(3) Upon a decision by the Administrative Law Judge and without a request for judicial review, the amount shall be certified to the Administrator who shall promptly disburse the award. Such decision shall not be reviewable by the Administrator or the Secretary.

(d) JUDICIAL REVIEW.—(1) Any person suffering legal wrong, or who is adversely affected or aggrieved by the decision of an Administrative Law Judge may, no later than 60 days after such decision is made, seek judicial review of such decision in the United States court of appeals for the circuit in which damage occurred or for the District of Columbia.

(2) In any case in which the person responsible for the discharge, or the Administration, seeks judicial review, attorneys' fees and court costs shall be awarded to the claimant if the decision of the Administrative Law Judge is affirmed.

(e) CLASS ACTIONS.—(1) The Attorney General may act on behalf of any group of damaged citizens the Administrator determines would be more adequately represented as a class in the recovery of claims under this section. Sums recovered shall be distributed to the members of such groups.

(2) If, within 90 days after a discharge of oil in violation of this Act has occurred, the Attorney General fails to act on behalf of a group who may be entitled to compensation in accordance with section 3 any member of such group may maintain a class action to recover such damages on behalf of such group. Failure of the Attorney General to act in accordance with this subsection shall have no bearing on any class action maintained in accordance with this subsection.

(3) In any case where the number of members of the class exceeds 1,000, publishing notice of the action in the Federal Register and in local newspapers serving the areas in which the damaged parties reside shall be deemed to fulfill the requirement for public notice established by rule 23(c)(2) of the Federal Rules of Civil Procedure.

(f) REPRESENTATION.—The Administrator shall initially request the Attorney General to promptly institute court actions and to appear and represent the Administration or the Fund for all claims under this Act. Unless the Attorney General notifies the Administration that he will institute such action or will otherwise appear within a reasonable time, attorneys appointed by the Administrator shall appear and represent the Administration.

PUBLIC ACCESS TO INFORMATION

SEC. 11. (a) GENERAL.—Copies of any communication, document, report, or information transmitted between any official of the Federal Government and any person concerning liability and compensation for damage resulting from the discharge of oil shall be made available to the public for inspection, and shall be available for the purpose of reproduction at a reasonable cost, to the public upon identifiable request.

(b) RELEASE.—Nothing contained in this section shall be construed to require the release of any information of the kind described in subsection (b) of section 552 of title 5, United States Code, or which is otherwise protected by law from disclosure to the public.

ANNUAL REPORT BY ADMINISTRATOR

SEC. 12. Within 6 months after the end of each fiscal year, the Administrator shall submit to the President of the Senate and the Speaker of the House of Representatives (1) a report on the administration of the fund during such fiscal year; (2) a summary of the management and enforcement activities of the Administration; and (3) recommendations to the Congress for such additional legislative authority as may be necessary to improve the management of the fund and the administration of the liability provisions under this Act.

RELATIONSHIP TO OTHER LAW

SEC. 13. (a) STATE LAW.—This Act shall not be interpreted to preempt the field of liability or to preclude any State from imposing additional requirements or liability for any discharge of oil resulting in damages or cleanup costs within the jurisdiction of any State.

(b) DOUBLE RECOVERY.—Any person who receives compensation for damages or cleanup costs pursuant to this Act shall be precluded from recovering compensation for the same damages or cleanup costs pursuant to any other State or Federal law. Any person who receives compensation for damages or cleanup costs pursuant to any other State or Federal law shall be precluded from receiving compensation for the same damages or cleanup costs under this Act.

(c) COURT JURISDICTION.—The United States district courts shall have original jurisdiction of cases and controversies arising

under this Act, and proceedings with respect to any such case or controversy may be instituted in the judicial district in which any defendant resides or may be found, or in the judicial district in which the damages occurred.

AUTHORIZATION FOR APPROPRIATIONS

SEC. 14. There is authorized to be appropriated for the administration of this Act $2,500,000 for the fiscal year ending September 30, 1977; $10,000,000 for the fiscal year ending September 30, 1978; $5,000,000 for the fiscal year ending September 30, 1979; and $5,000,000 for the fiscal year ending September 30, 1980.

THE FEDERAL OIL POLLUTION LIABILITY AND COMPENSATION ACT OF 1977

SECTION-BY-SECTION ANALYSIS

Section 1. Provides for the Act to be titled "The Federal Oil Pollution Liability and Compensation Act of 1977", and describes as its purpose the establishment of a uniform and comprehensive legal regime governing liability and compensation for clean-up costs and damages caused by oil pollution of the aquatic and terrestrial environment.

Sec. 2. Findings and Declaration of Policy. This section expresses the national importance of and need for establishing a comprehensive uniform liability law and declares that it is the purpose of the Act to provide such a law and maximize the incentive for preventing oil pollution by establishing a strict liability standard for clean-up costs and damages resulting from a discharge of oil; to create a single all-inclusive compensation fund to pay for all clean-up costs and damages resulting from a discharge of oil that exceed the liability of the responsible party or for which the party responsible for a spill cannot be identified; to provide adequate funds and an expeditious procedure for compensating oil pollution victims; and to provide for the restoration of natural resources damaged by an oil pollution incident.

Sec. 3. This section defines the terms used in the Act. The phrase "aquatic and terrestrial environment" is defined to include all lands, waters and natural resources of the United States including waters of the contiguous zone, within the safety zone around the deepwater port or superjacent to the Outer Continental Shelf. The term also refers to the fish, wildlife, other living resources and the recreational and scenic values of such lands, waters and resources.

"Clean-up costs" are defined to include the costs of Federal, State, local and foreign governments that are incurred in removing, attempting to remove, or taking other measures to prevent, reduce, or mitigate damages to the public health or welfare or to public or private property and natural resources by an oil discharge.

In addition, "damages" as defined means costs other than clean-up costs suffered by any person due to a discharge of oil including: loss in value of real or personal property; loss of income or impairment of earning power; costs to Federal or State governments of rehabilitating natural resources; and loss of tax revenues to State or local government.

"Facility" includes but is not limited to any oil refinery, drilling platform, oil storage or transfer terminal or pipeline or any appurtenance related to any of the foregoing that is used to refine, pump, drill for, produce, store, handle, transfer, process, or transport oil.

Sec. 4. Prohibits the discharge of oil in harmful quantities as determined pursuant to the Federal Water Pollution Control Act. A civil penalty of not more than $10,000 is established for violations of this provision. Under this section a person in charge of an onshore or offshore facility, vessel, or deepwater port is required to report a discharge of oil as soon as he has knowledge of such an incident. Failure to report can result in a fine no greater than $10,000 or one year imprisonment or both.

This section also requires the Federal Government to act immediately to clean up a discharge unless it can be ascertained that the party responsible will act accordingly. Funds used by the government to clean up a spill can be made available immediately from the liability fund established pursuant to a subsequent section of the Act.

Sec. 5. Places unlimited liability for all cleanup costs on the vessel, deepwater port, offshore or onshore facility from which the discharge of oil occurs. In addition, liability for damages is limited for these various sources as follows: vessels—$150/gross ton; offshore facilities—$50 million; onshore facilities—$50 million; deepwater ports—$100 million.

If, however, it can be shown that the spill occurred as a result of gross negligence or willful misconduct within the privity and knowledge of the owner, operator or person in charge of the facility, vessel or deepwater port involved, or because of the violation of applicable safety, construction or operating standards of regulations, liability for both clean up costs and damages is unlimited. Liability for costs and damages resulting from a discharge of oil is not imposed if it can be shown that the spill resulted solely from an act of war, or by the negligence or an intentional act of the damaged party.

The rights of any person held liable pursuant to the Act are subrogated if the discharge of oil in question was caused by the owner or operator of any other facility, vessel or deepwater port subject to liability under the Act.

This section also enables any person held liable pursuant to the Act, and the Fund to seek compensation from the Federal government if the oil discharge in question was caused solely by negligence on the part of the Federal government in maintaining aids to navigation.

Sec. 6. Establishes the Federal Oil Pollution Liability Administration within the Department of Transportation and provides for the Administrator, Assistant Administrator and General Counsel to be appointed by the President with the advice and consent of the Senate. This section also prescribes the responsibilities, functions, and powers of the Administrator.

Sec. 7. Establishes a $250 million Federal Oil Pollution Compensation Fund and describes the procedures by, and circumstances under which payments from the fund are made and the manner in which the fund is maintained. Money in the fund is provided by a 5¢ per barrel charge on oil which is transferred between a vessel and an onshore or offshore facility, between vessels or facilities, or between a vessel and a deepwater port. This section also provides that only one such 5¢ fee shall be levied against any barrel of oil.

Sec. 8. Empowers the Administrator of the Fund or the authorized representative of any State to act on behalf of the public as trustee of the terrestrial and aquatic environment to recover such money as may be necessary to restore, rehabilitate or acquire the equivalent of any natural resources damages by a discharge of oil.

Sec. 9. Establishes standards and enforcement powers for the demonstration of financial responsibility sufficient to meet the liabilities imposed by the Act. Those who violate this provision are subject to a $25,000 fine.

Sec. 10. Empowers the Administrator to establish, and when necessary revise, regulations for the filing, processing, settlement and adjudication of claims made pursuant to the Act, and sets forth various time and procedural guidelines to be implemented by these regulations. Hearings before an Administrative Law Judge are prescribed for cases in which the source of a discharge cannot be determined. Judicial review of decisions made by such Judge is also prescribed.

In addition, the Attorney General of the United States is empowered to act on behalf of any group of persons who would be more adequately represented as a class, to recover damages under the Act.

Sec. 11. Assures public access to information relating to liability and compensation for damages under the Act.

Sec. 12. Requires the Administrator to submit an annual report concerning implementation of the purposes and provisions of the Act to the President and the Congress.

Sec. 13. Assures that State law is not preempted by the Act, but prevents a person from recovering compensation for the same damages under both State and Federal law. In addition, this section provides that the United States District Courts will have jurisdiction over cases and controversies arising under the Act.

Sec. 14. Authorizes the appropriation of funds to administer the Act.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a bill, introduced by Senator BIDEN, relative to establishing a uniform and comprehensive legal regime governing liability and compensation for damages and cleanup costs caused by oil pollution, and for other purposes, be jointly referred to the Committees on Commerce, Interior and Insular Affairs, and Public Works.

The PRESIDING OFFICER. There being no objection, it is so ordered.

By Mr. BROOKE:

S. 122. A bill to reform electric utility rate regulation, to strengthen State electric utility regulatory agencies, and for other purposes; to the Committee on Commerce, by unanimous consent.

ELECTRIC UTILITY RATE REFORM AND REGULATORY IMPROVEMENT ACT

Mr. BROOKE. Mr. President, I introduce S. 122, the Electric Utility Rate Reform and Regulatory Improvement Act and I ask unanimous consent that a section-by-section analysis of the bill be printed in the RECORD.

There being no objection, the analysis was ordered to be printed in the RECORD, as follows:

ANALYSIS OF THE ELECTRIC UTILITY RATE AND REGULATORY REFORM ACT OF 1977

TITLE I—GENERAL PROVISIONS

Sections 101 & 102 Findings and Purposes

These sections outline the problems posed by the current system of regulation of electric utility prices and state the need for reform of these practices. The rate schedules, that is, the retail prices, of electric utilities have not been designed on the basis of allocating the costs of producing a particular pattern of electricity for any given customer. Generally, the electric ratemakers have not equated the price of a product with the costs of producing it. Instead, three other concerns have traditionally guided them in developing rate schedules for different classes of customers.

The first traditional principle is the guarantee of a specific level of return on the capital investment of a utility. Second, ratemakers have sought to stabilize the flow of revenue over time. Third, they have maximized the comeptitive effects of the different

rate schedules, by favoring customers who have the choice of switching to alternative energy sources with lower prices.

Often regulatory agencies have not taken an active role in designing rates. They will allow certain levels of cost recovery and leave the actual allocation of costs among different consumers to the utilities.

Existing types of rate schedules promote several serious inequities. First, two customers, consuming identical amounts of electricity and requiring the electric utility to incur identical costs, may be charged different rates based on the recognition that the demnad of one is more sensitive to price increases or decreases than the other. Further, even within a class of customers, because the rate charged per kilowatt-hour declines as the total level of consumption increases, a high-use customer will pay a lower average rate per kilowatt-hour than a low-use customer.

Second, the utilization of generating capacity over time has been so apportioned as to promote high capacity costs and thus higher rates. The electric utility industry, in recognition of its natural monopoly of territorial franchises, assumes an obligation to meet all customer demands for service. Therefore, the amount of capacity a utility must build is dependent upon the peak load, or maximum level of demand placed on the system over time. However, when this peak load differs greatly from the typical demand on the utility system and occurs only for short periods of time, the utility is forced to acquire and maintain large amounts of capacity that remain unused most of the time.

When demand exceeds the capacity of the base-load equipment, the utility will begin to add peaking units, generally natural gas-fueled combustion turbines (jet engines) or oil-fueled combustion engines (usually diesel), which are far less efficient and burn more costly fuel than the base-load plants. So, in addition to the increased capacity costs necessitated by short peak demands, fuel costs per unit of output are also higher than usual.

Present rate schedules give no signals to customers to indicate whether or not they are contributing to peak loads. Rather than charging the higher costs of peak-time generation to those customers who directly use the peak power, these costs are spread to all rate payers. This unfairly charges the costs of peak generation to all consumers, regardless of the extent to which they individually contribute to the peak load. Therefore, consumers are not encouraged to make decisions about when to consume electricity in a way related to the variable capacity and fuel costs imposed on the utility system.

The legislation provides the guidelines for reforming the structure of electric rates to reflect more accurately the true costs of providing services to different customers.

Under existing rate schedules, the charges revised are chiefly energy charges; that is, a price is to set upon each kilowatt-hour consumed within a block, or range, of kilowatt-hours consumed, under a declining block rate schedule. Thus, the rate per kilowatt-hour declines as the total number of kilowatt-hours consumed by an individual customer increases.

However, the true cost of electricity production can and should be broken down into three distinct charges. The first is the customer charge, the measure of the costs involved in handling the customer's account, including meter reading and billing costs. Second is the capacity charge, which reflects the costs to the utility of providing the generating machinery, necessary to produce the flow of energy, or kilowatt-hours, a customer wants at any particular time. If the preferences of the customer dictate that he/she use a large amount of energy in a short time, he/she must be willing to bear the costs of the utility for providing generating capacity that will remain unused most of the time.

Similarly, the fuel costs, which are the major component of the third charge, the energy charge, for producing kilowatt-hours, vary between peak times and nonpeak times. Therefore, customers who use kilowatt-hours during peak periods should be levied a larger energy charge to reflect the more expensive fuel costs during peak times.

The legislation has as one purpose to mandate the cost of service approach to ratemaking, i.e. the costs associated with producing a given quantity of electricity over a given time period for a customer must be equated with the rate charged for the service. This will more closely align the costs with the benefits of electric generation and thereby lead to a better allocation of fuel and capital resources and a more equitable pricing system for consumers.

The legislation seeks to assist the implementation of the rate and procedural reform provisions by grants to State and regulatory authorities. While the majority of these grant funds are to finance improvements in the quality and quantity of state regulatory staffs, funds are also available to finance interventions in rate proceedings by persons representing vital, but unrepresented interests, including consumer interests; and to finance rate structure demonstrations.

Sec. 103 definitions

Subsection (a) provides definitions for this Act. Among these definitions are the following:

(2) The term "electric consumer" means any person, State agency, or Federal agency, to which electric energy is sold other than for purposes of resale.

(3) The term "electric utility" means any person, State agency, or Federal agency, which sells electric energy.

(4) The term "Federal agency" means any agency or instrumentality of the United States, but does not include the District of Columbia.

(5) The term "rate" means any price or pricing classification of electric consumers set for the sale of electric energy, and includes prices set for the sale of equipment or services incidental to the sale of electric energy.

(6) The term "ratemaking authority" means authority to fix, modify, approve, or disapprove rates.

(7) The term "sale" includes an exchange of, or a charge for transmission of electric energy, or any transfer of equipment or service incidental to the sale of electric energy to an electric consumer.

(10) The term "State regulatory authority" means any State agency which has ratemaking authority with respect to the sale of electric energy by any electric utility (other than by such State agency).

(11) The term "evidentiary hearing" means a proceeding (A) which includes notice to, and an opportunity for, participants to present direct and rebuttal evidence and to cross-examine witnesses, and a written decision based upon evidence appearing in a written record of the proceeding, and (B) which is subject to judicial review.

TITLE II—UTILITY RATE REFORM

Sec. 201 definitions

This section provides definitions for this Title, as follows:

(1) The term "rate base" means the value established by a State regulatory authority upon which an electric utility subject to the ratemaking authority of such regulatory authority is provided the opportunity to earn a specific rate of return.

(2) The term "rate schedule" means the rates which an electric utility charges electric consumers.

(3) The term "advertising" means the commercial use, by an electric utility, of any media, including newspaper, printed matter, radio and television, in order to transmit a message to a substantial number of members of the public or to such utility's electric consumers.

(4) The term "institutional advertising" means any advertising which is designed to create, enhance or sustain an electric utility's public image or goodwill with the general public or such utility's electric consumers.

(5) The term "political advertising" means any advertising for the purpose of influencing public opinion (A) with respect to any legislative, administrative, or electoral decision, or (B) with respect to any controversial issue of public importance.

(6) The term "promotional advertising" means any advertising for the purpose of inducing the public (A) to select or use the service or additional service of an electric utility or (B) to select or install any appliance or equipment designed to use such utility's service.

(7) The term "pollution control facility" means a facility which is used to abate or control water or atmospheric pollution or contamination by removing, altering, disposing, or storing of pollutants, contaminants, wastes, or heat and which is reasonably necessary to carry out a program of a State or Federal agency for abatement or control of water or atmospheric pollution or contamination.

Sec. 202 Coverage

This title applies only to sales of electric energy for purposes other than resale by an electric utility, and applies to such an electric utility in any calendar year only if sales of electric energy by such utility for purposes other than resale during the second preceding calendar year exceeded 200 million kilowatt-hours.

Sec. 203 National minimum

Standards for Electric Utility Rate Regulation

In subsection (a)(1), electric rates to a consumer are required to be designed, except in the case of lifeline rates permitted in subsection (a)(4), to reflect accurately, to the maximum extent practicable, the costs of providing electric service to that consumer and to any customer class in which the consumer is grouped. The determination of the costs of providing electric service is to be made by the State regulatory authority under Section 206, Determination of Costs of Service.

In subsection (a)(2), customer class groupings of consumers are required to be designed, except in the case of lifeline rates permitted in subsection (a)(4), to accurately reflect, to the maximum extent practicable, the costs of providing electric service to that class designation. The designation of customer classes is to be made by the State regulatory authority under Section 206, Determination of Costs and Service.

In subsection (a)(3), a rebuttable presumption is created, except in the case of lifeline rates permitted in subsection (a)(4), against declining block rates. This presumption may be overcome upon a showing by a utility that the costs of service to a consumer decrease as the consumption or demand of the consumer increases.

In subsection (a)(4), a per kilowatt-hour rate is permitted for the principal place of residence of residential consumers for a subsistence quantity of electricity for domestic lighting and food refrigeration. This rate may not be higher than the lowest charge per kilowatt-hour set for any other jurisdictional sale by the utility.

In subsection (a)(5), utilities are required to disclose with billing statements to each electric consumer at the commencement of service and upon the filing of any applica-

tions to change the consumer's rate schedule, existing and proposed rate schedules applicable to the consumer. Utilities are required to disclose yearly to each electric consumer a summary of rate schedules applicable to the major classes of consumers. Also, utilities must disclose in each billing statement to electric consumers the actual or degree day adjusted consumption of electric energy for the same billing period during the prior year.

In subsection (a)(6), advertising costs and expenditures which do not benefit electric consumers are separated from those which do and are prohibited from recovery in utility rates. Promotional advertising, which encourages increased electric use regardless of the time of use, is prohibited from treatment as an operating expense of the utility. So is political advertising, which intends to influence public opinion concerning candidates, issues, legislation, or referenda. Also prohibited from inclusion in operating expenses is institutional advertising, which is meant to improve and enhance the public image of the electric utility. Utilities are allowed, however, to include the costs of printing existing and proposed rate schedules or any notices required by law or regulation, and providing public information regarding service interruptions safety measures, emergency conditions, employment opportunities, or customer methods of energy conservation.

In subsection (b)(1), regulatory authorities are prohibited, effective 2 years after enactment of this bill, from setting rates for utilities without prior evidentiary hearings.

In subsection (b)(2), regulatory authorities are prohibited during the interim 2-year period provided in subsection (b)(1) above, and thereafter, from granting a fuel adjustment clause to a utility without requiring the utility to give prior public notice of any rate change to be effected through the fuel adjustment clause; without public proceeding to establish that the utility continually manages fuel purchases, uses, and generating facilities prudently and efficiently; without such rate changes for the fuel adjustment clause distributing fuel costs and charges consistently with the ratemaking standards of Title II; and without subsequently determining whether the rates adjusted through the fuel adjustment clause are unlawful. Payments made under rate schedules found to be unlawfully high shall be refunded with interest.

In subsection (b)(3), notwithstanding the provisions of subsection (b)(1), above, State regulatory authorities are permitted to grant rate increase requests without a prior evidentiary hearing upon finding that the request has been pending before the authority for 9 months and upon a showing by the utility that this delay is causing severe economic hardship to the utility. However, the authority must hold a subsequent evidentiary hearing on a rate increase request so approved and refund any portion of the request not proved by the utility to be just and reasonable under applicable law.

In subsection (b)(4), an additional variance to the evidentiary hearing requirement of subsection (b)(1), above, is provided in cases of declared national emergency.

Subsection (c)(1) incorporates and applies to State regulatory authorities the essential contents of Order No. 555 of the Federal Power Commission of November 8, 1976, in Docket No. RM75–13. Expenditures associated with construction work in progress may not be included in a utility's rate base except for expenditures associated with pollution control facilities or facilities to convert natural gas-burning plants to non-oil fuels or to convert oil-burning plants to non-natural gas fuels.

In subsection (d), regulatory authorities are permitted to grant variances from the requirements of this Title for rate schedules which the authority determines in an evidentiary hearing otherwise would cause severe economic hardship to existing service connections. Such variances may have a maximum term of one year, may be renewed and extended after the enactment of this bill, but may not be effective 5 years after the enactment of this bill, except in the case of variances occasioned by the requirements of Sec. 110 of the Clean Air Act, which may remain effective more than 5 years.

Subsection (e) is a clarification that no provision of this Title shall be construed as authorizing or permitting the recovery by a utility of a rate of return or level of revenue in excess of the amount of rate of return or level of revenue determined to be lawful under applicable State or Federal law.

Sec. 204 Load management techniques

In subsections (a) and (b), State regulatory authorities are required periodically in evidentiary hearings to consider alternative load management techniques and to require utilities to implement such load management techniques as are determined by the authorities to be cost effective. Load management techniques are techniques to reduce maximum kilowatt demand on a utility system, and include: peak load pricing, based on marginal cost determinations; ripple or radio control mechanisms; energy storage devices; interrupted or interruptible electrical services; customer-owned meters or load limiting devices; elimination of master metering; and other techniques to minimize inefficient end-uses of electricity.

In subsection (c), State regulatory authorities are required to exercise their authority to require utilities to establish conditions of service whereby customers with on-site generating facilities, including solar facilities, fuel cells, and generating facilities utilizing waste heat, shall be provided with back-up generation service from the utility and with opportunities to sell surplus electricity to the utility.

Sec. 205. Determination of cost of service

In subsection (a), the costs of service, which are to be the basis for rate schedules designed pursuant to section 203 of this title are required to be determined according to methods prescribed by State regulatory authorities. These methods must, to the maximum extent practicable, reflect differences in cost-in currence attributable to daily and seasonal time of use of service.

In subsection (b), State regulatory authorities are prohibited, beginning two years after the enactment of this bill, from allowing any rate increase request of a utility from going into effect, except after an evidentiary hearing upon the data provided pursuant to subsection (c) of this action. On the basis of this data, the authority is to make findings of fact as to: factors causing changes in daily and seasonal peak loads of the utility and of the customer classes of the utility; and the cost of servicing each customer class and of serving different consumption patterns within these classes, based on voltage levels and time of use.

In subsection (c), in order for the regulatory authorities to have sufficient data upon which an adequate hearing record may be established to determine cost of service rates pursuant to section 203, electric utilities are required to assemble in a uniform manner data with respect to:

Factors causing changes in the daily and seasonal peak loads of the utility and of the customer classes served by the utility.

Costs of serving each customer class and of serving each customer class and of serving different consumption patterns within such class, based on voltage levels and time of use.

Daily kilowatt demand load curves for all customer class for which there is a separate rate schedule.

Daily kilowatt demand curves by customer classes for each level of kilowatt hour consumption for which there is a separate rate.

Annual capital, operating and maintenance costs for transmission, primary distribution, secondary distribution, and for each generating unit to meet kilowatt demand on the electric utility.

For each generating unit, the times and dates of, numbers of times of, and fuel, operating and maintenance costs incurred in, starting of such units.

Annual fuel operating and maintenance costs, incurred to meet electric utility kilowatt hour consumption requirements, exclusive of such costs incurred in starting generating units.

For each generating unit, its annual and seasonal capacity ratings, annual hours of operation, scheduled outages for maintenance and repair, unscheduled outages, kilowatt hours generated, amount and types of fuel consumed, annual peak kilowatt demand upon the unit.

Cost of fuel incurred to meet each level of kilowatt hour consumption.

Energy loss factors experienced by transmission, primary distribution, and secondary distribution systems; annual capital, operating, and maintenance costs incurred for each customer class having a separate rate schedule with analysis of how such costs relate to the number and locations of electric consumers.

Planning for utility operations during the ensuing ten year period, including hourly forecasts of system loads and the data basis therefore, by customer class, assumptions made and applied in such planning, including assumptions regarding the effects of changes in the rate structure on system loads, both total loads and during daily and seasonal peaks of use, costs of new or enlarged power facilities, alternative means to meet short term peaking requirements, including that means which requires the least capital investment, and computations determining the relative likelihood of system load will exceed system capacity for generation, transmission, and distribution.

Although there may not be rate applications pending before them, State regulatory authorities must require the utilities to file with them and to publish, annually, the above data.

Sec. 206. Application of standards to utilities not subject to rate regulatory authorities

In this section, public utility systems, whether state or federal agencies, and cooperative utility systems are brought within the coverage of this title, except to the extent that a state regulatory authority has the same ratemaking authority with respect to rates of such public or cooperative system as the authority has with respect to other electric utilities subject to its jurisdiction.

Sec. 207 Establishment of the Office of Electric Utility Ratemaking Assistance

In this section an Electric Utility Ratemaking Assistance Office is established in the Federal Energy Administration, under the direction of a Director, who shall be appointed with the advice and consent of the Senate.

In subsection (b), the Director is empowered to appear as a fully participating party in regulatory hearings subject to the provisions of this title, upon request of a State regulatory authority, other State agency, public utility subject to this title, or upon the motion of any party to the hearing. It is intended that such participation by the Director advance the purposes of this title.

In subsection (c), the Director is required to publish a list identifying State regulatory authorities, public systems and cooperative systems to which the provisions of this title are applicable; to provide technical assistance for the implementation of this bill

and to continually inform the organizations on this list of important research and development activities regarding load management techniques, ratemaking, and methods of determining costs of service.

Sec. 208. Participation in regulatory proceedings by States and by electric consumers

In subsection (a), electric consumers and State agencies are given the right to intervene as parties in any proceeding before a State regulatory authority or before a public utility system subject to the provisions of this bill with respect to issues relating to the determination of compliance with the requirements of this title. In addition, electric consumers and State agencies are given the right to intervene as parties in judicial proceedings involving the review or enforcement of any action by a State regulatory authority in a proceeding in which the consumer or agency was a party, or in which the consumer or agency was denied intervention in violation of this section, and which proceeding affects the interests of such consumer or agency, and to the extent that such proceeding involves the determination of compliance with the requirements of this title.

In subsection (b), it is provided that if an electric consumer prevails in a ratemaking proceeding before a State regulatory authority, meaning that the authority or reviewing court disapproves or substantially modifies a rate proposed by a utility on grounds of noncompliance with provisions of this title first raised by the consumer, then the utility shall be liable to compensate the consumer for reasonable attorney fees, expert witness fees, and other incidental costs incurred. This requirement of compensation does not apply when an adequate alternative method of participation is provided by a State or regulatory authority for persons who have, or represent, an interest which would not otherwise be adequately represented, the representation of which is necessary for a fair determination of the proceeding, and who are unable effectively to participate in the proceeding due to lack of financial ability.

In subsection (d), electric utilities are required in proceedings before State regulatory authorities to provide to other parties transcripts of the proceedings at cost of reproduction.

Sec. 209. Enforcement

The provisions of this title, by their terms, apply to State regulatory ratemaking authorities assuming enforcement responsibility over electric utilities for determining whether the rate schedules of an electric utility comply with the requirements of this title. If a State regulatory authority does not assume this responsibility, the Federal Power Commission shall have enforcement responsibility for the provisions of this title over the electric utilities within the jurisdiction of the authority. In this case, all references in this title to State regulatory authority shall be deemed references to the Commission with respect to such utilities.

In subsection (b), it is provided that beginning two years after the enactment of this bill, no electric utility may increase any rate for the sale of electricity subject to the ratemaking authority of a State regulatory unless the rate is part of a rate schedule determined by the authority to meet the requirements of sections 203, 204, and 205 of this title. Likewise, beginning two years after the enactment of the bill, no public system subject to the provisions of this bill may increase any rate for the sale of electricity unless the increased rate is part of a rate schedule determined by the system to meet the requirements of sections 203, 204, and 205, made applicable by section 206(a).

In subsection (c), State and federal agencies entitled to obtain judicial review over regulatory authority action under section 208, may obtain a review in any statutory review proceeding available in the courts of the United States, or if there is no such statutory review proceeding available, by commencing a civil action in the United States Courts of Appeals for any circuit in which the regulatory authority or utility system is located, which court shall have jurisdiction under chapter 7 of title 5, United States Code.

In subsection (d), an electric consumer is entitled to obtain judicial review of regulatory authority or public system action as follows. For review of actions of public systems which are federal agencies, or of state regulatory authorities or public systems whose actions are not reviewable in State courts, consumers may obtain judicial review in any federal statutory review proceeding otherwise available. If no such statutory proceeding is available, consumers may commence a civil action in the United States Court of Appeals for any circuit in which the authority or utility system is located, which court shall have jurisdiction in accordance with chapter 7, title 5, United States Code. For review of actions of State regulatory authorities or State agency public utility systems, consumers may obtain judicial review in any State court of competent jurisdiction, and, if the action is reviewable by State court, the consumer may not obtain review by any court of the United States, except by the United States Supreme Court in writ of certiorari in accordance with section 1257, title 28, United States Code.

In subsection (e), persons who are members of cooperative utilities may obtain judicial review of cooperative action by commencing a civil action in any court or competent jurisdiction to enforce the requirements of this title.

In subsection (f), beginning two years after the enactment of this bill, the provisions of all contracts between a federal agency and an electric utility for the sale of electricity for resale must be consistent with the requirements of this title.

In subsection (g), it is provided that the United States district courts shall have jurisdiction, on application of any electric consumer to enjoin any electric utility from increasing any rate with respect to which a determination of compliance with the provisions of this title has not been made pursuant to subsection (b) of this section.

TITLE III—FINANCIAL ASSISTANCE TO STATE REGULATORY AUTHORITIES

The processes of regulation and consumer protection by regulatory authorities have been inadequate in large part to lack of funding. If the state regulatory authorities are to take active roles in developing new rate schedules and other means of conserving energy as well as effectively to oversee these activities of the utilities, they will need increased expertise. Also, with frequent and sizable demands for rate increases by utilities, consumers must be able to express their views in a constructive way. At present, the opportunities for consumers to intelligently participate, with competent legal and economic advice, in rate proceedings are limited by lack of funds. Title 5 provides for grants to State regulatory authorities to improve technical staffing to finance rate structure innovation programs, and to finance constructive consumer representation in ratemaking proceedings.

Sec. 301. Establishment of program

Under this section, grants to regulatory authorities, and through them, to consumer groups, may be made through the Office of Electric Utility Ratemaking Assistance, established under section 207 of title II. The Director of this Office will supervise the granting of funds for regulatory staff improvement to establish consumer-oriented and consumer controlled programs for participation in regulatory processes, to demonstrate efficiencies of innovative rate structures, designed to encourage energy conservation. Any grant under this title must be an addition to, and not in substitution of, funds available to State regulatory authorities from other sources. Each regulatory authority receiving assistance must demonstrate to the Director that it requires each electric utility under its jurisdiction to satisfy standards issued by the Director for: requiring and preserving customer deposits, estimating bills, and terminating electrical service.

Sec. 302. Grants to improve staffing

Under this section grants to improve the staff of State regulatory authorities may be made by the Director. However, State authorities must demonstrate to the Director that these additional funds are required to perform effectively and, also, that the authority is instituting a program to develop alternate source of funds to retain additional staff made possible by the grant when the grant expires.

Sec. 303. Grants for consumer representation

Under this section, the Director may make grants to State regulatory authorities to provide for the establishment and operation of consumer controlled programs meeting the requirements of section 208(b)(2) of title II.

Sec. 304. Grants for rate structure innovation

In this section, the Director is permitted to make grants to regulatory authorities to research and develop innovative rate structures encouraging conservation and complying with the requirements of title II. This will further assist regulatory authorities in taking active roles in the rational development and application of rate designs.

Sec. 305. Allotment of sums

In this section, limits are provided for the grants to be made under the other sections of this title to each State, generally on the basis of population. However, for grants to improve regulatory authority staffing, no State may receive less than one half of one percent or more than five percent the amount of funds granted to all States in any fiscal year. Also, with respect to grants to fund consumer representation, no State may receive less than one percent or more than three percent of the total amount granted during any fiscal year.

In subsection (b), the Director is empowered to withhold grant funds otherwise available under this title to a State regulatory authority if the Director finds that the authority is not carrying out the program described in the pertinent application or has violated assurances contained in the application.

Sec. 306. Authorization of appropriations

Appropriations for improving the staff of regulatory authorities may not exceed $30 million in any fiscal year. Grants for funding consumer representation in regulatory proceedings may not exceed $5 million. Grants for rate structure innovation may not exceed $5 million.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that a bill, introduced by Senator BROOKE, to reform electric utility rate regulation, to strengthen State electric utility regulatory agencies, and for other purposes be referred to the Committee on Commerce.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 123. A bill to amend the Social Security Act to provide for the payment of services by psychologists, and for other purposes; to the Committee on Finance.

Mr. INOUYE. Mr. President, today I am reintroducing legislation to amend title XVIII of the Social Security Act—medicare—in order to provide for the independent coverage of the services of licensed practicing psychologists. Last session a third of the U.S. Senate joined me in cosponsoring this measure and, I was pleased to learn that the Social Security Administration's Bureau of Health Insurance initiated a major demonstration project in the State of Colorado under which they will experiment with removing the current restriction that psychology services be "incident to those of a physician." Accordingly, it is my sincere hope that later on this session when the preliminary results become available from this study that the Finance Committee will decide to hold hearings on the merits of this legislation.

There are two facets of this bill which I feel deserve special attention. The first is whether or not the Congress believes that ready access to high quality mental health services is sufficiently beneficial to our elderly population so that additional efforts should be made to insure their availability. Various demographic analyses have indicated that although the elderly constitute approximately 10 percent of our population, in the past they have characteristically received less than 3 percent of the total outpatient mental health services, but at the same time make up 25 to 30 percent of the resident population of our mental health facilities.

In addition, it has been brought to my attention that this age group accounts for 25 percent of the suicides in the United States. Experts from the Department of Health, Education, and Welfare have testified that 50 percent of the elderly in nonpsychiatric institutions have significant mental disabilities and that approximately 3 million noninstitutionalized elderly suffer from moderate to severe emotional or mental disorders. In my judgment, this data clearly suggests that there is, indeed, a very real and pressing need for providing high quality mental health services for our senior citizens.

The second underlying feature of this legislation is whether or not organized psychology has obtained sufficient professional maturity so as to be entitled to perform clinical services independently of the supervision of doctors of medicine. During our brief deliberations last session on various national health insurance proposals, it became quite evident that the standards being considered for independent providership were essentially those of medicare. Accordingly, in my judgment, unless psychology is able to obtain independent recognition under medicare prior to the enactment of national health insurance, there would seem to be very little likelihood that they will be included under such a plan. And this, I strongly feel, would be most unfortunate both for their profession and for our nation as a whole.

Under our community mental health center legislation psychologists currently function at all levels of clinical and administrative responsibility, including chiefs of statewide divisions of mental health, heads of mental health centers; directors of special programs, and as various types of clinical specialists. Their profession is licensed or certified by statute in 49 States and the District of Columbia, as well as being formally recognized as independent providers under various Federal legislation as the Rehabilitation Act of 1973, the Federal health benefits program, Federal Employees Compensation Act—work insurers compensation program, and the Department of Defense's CHAMPUS program.

Recent estimates of the composition of our mental health manpower pool indicate that there are approximately 26,927 health service psychologists and 28,332 physicians specializing in psychiatry or neurology. Further, unlike the recent evidence of gross geographical maldistribution which we have witnessed in various medical specialists, our Nation's psychologist providers are generally distributed throughout the United States in a manner reasonably parallel to that of our general population. That is, at least on a regional level, geographical maldistribution does not exist.

The American Psychological Association has established the doctoral degree plus supervised clinical experience as the appropriate minimum standard for independent practice. In 1974, the profession established a National Register of Health Service Providers in Psychology in order to specifically identify those individuals whom the profession felt were qualified to maintain independent practices. It is my understanding that 12 percent of the original registrants were subdoctoral practitioners who possessed a minimum of 6 years of experience and further that after January 1978, the doctoral degree requirement will be mandatory. The Register has been accepted by a number of organizations including CHAMPUS and the Blue Cross/Blue Shield Federal employees program.

I woud like to take this opportunity to also remind my colleagues that the enactment of this bill would actually not increase the basic benefit package offered under medicare, but instead, by removing the physician supervision restriction, it would provide for freer access to those services which at least theoretically are presently already covered. It is time for us to take cognizance of the growing recognition within the professional community that ready access to mental health benefits results in significantly reduced medical-surgical and hospitalization costs, to the extent of nearly 50 percent. There is also similar substantial evidence that nearly 60 percent of the patients going to family physicians' offices for physical symptoms, in fact, have a psychological problem which is either the primary problem or which aggravates the physical condition. My own personal observations would suggest that this percentage is probably even higher among our elderly.

Finally, in drafting this legislation, I decided to amend the relevant sections of our professional standards review organization legislation in order to insure that psychology services reimbursed under medicare would be subject to continual review by their peers. Historically, the profession of psychology has always been in the forefront in urging that the Government take a more aggressive stance in insisting that the effects of all mental health services be objectively evaluated. Accordingly, I wish to do all that I can to actively encourage this most progressive posture.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 123

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first sentence of section 1861(r) of the Social Security Act is amended by inserting immediately before the period at the end thereof, the following: ", or (6) except for the purposes of section 1814(a), section 1835, and subsections (j), (k), (m), and (o) of this section, a psychologist, but only with respect to functions which he is legally authorized to perform as such by the State in which he performs them".

SEC. 2. Section 1861 of the Social Security Act is further amended by adding at the end thereof the following new subsection:

"(aa) The term 'psychologist' means an individual licensed or certified by State law, has a doctoral degree (or its equivalent) in psychology and at least 2 years of supervised clinical experience".

SEC. 3. Section 1152(a) of the Social Security Act (relating to Professional Standards Review Organizations) is amended by—

(1) redesignating subparagraph (B) of paragraph (1) as subparagraph (C), and

(2) inserting after subparagraph (A) of paragraph (1) the following:

"(B) an organization (i) which is a nonprofit professional association (or a component organization thereof), (ii) which is composed of licensed or certified psychologists engaged in the practice of psychology in such area, (iii) the membership of which includes a substantial proportion of all psychologists licensed or certified in such area, (iv) which is organized in such a manner which makes available professional competence to review health care services provided by psychologists licensed or certified, (v) the membership of which is voluntary and open to all psychologists licensed or certified to engage in such practice in such area without requirement of membership in or payment of dues to any organized psychological society or association, and (vi) which does not restrict the eligibility of any member for service as an officer of the Professional Standards Review Organization or eligibility for and assignment to duties of such organization, or subject to subsection (c)(1),".

By Mr. GLENN:

S. 124. A bill to amend the Internal Revenue Code of 1954 to provide a national energy conservation incentives program; to the Committee on Finance.

ENERGY CONSERVATION INCENTIVES ACT OF 1977

Mr. GLENN. Mr. President, it gives me great pleasure to introduce legislation today which will significantly augment the present Federal efforts to encourage and facilitate energy conservation. This legislation provides for a tax credit equal to 30 percent of the first $500 for qualified insulation and other energy-conserving component expenditures and the extension of the investment tax credit to qualified insulation expenditures. In December 1975, I introduced an amendment to provide for this same home insulation tax credit, but

despite my efforts it was not enacted. At that time I urged that it be enacted in time for last winter's heating season so as to help alleviate the then projected natural gas shortage. I am fearful that yet another winter will go by without this Federal energy conservation incentive in place. I therefore strongly urge early enactment of this bill.

Our country has developed and prospered in an era of plentiful fuel and low energy prices. It may be correct to say that at least until recently, the American way of life has included a constant search to relieve human physical activity and inconveniences by devices consuming, in the aggregate, significant amounts of fuel or electricity in their operation. The result has been a continual rise in energy consumption to the point where approximately one-third of the world's consumption of energy occurs in the United States.

The Arab oil embargo in 1973, however, forcefully brought to our attention a number of facts which could no longer be ignored.

First. American production of oil peaked in 1970, at 9.6 million bbls/day, and the present state of decline—current level: 8.2 million bbls/day—of this finite resource is as inexorable as the rising and setting of the Sun.

Second. Dependence on foreign sources of oil is a potential threat to national security. In the fall of 1973, we imported 6 million barrels of oil per day, accounting for 35 percent of domestic oil consumption. Today, despite our memories of the embargo, oil imports are on the order of 7 million barrels per day, representing 42 percent of the oil consumed in the United States. Furthermore, despite the hazards inherent in U.S. reliance upon OPEC, those countries, which provided 70 percent of U.S. oil imports before the embargo, are now supplying 82 percent. The situation with respect to oil is being followed in the case of natural gas as well.

Third. The American lifestyle has been affected by the promotion of energy consumption and wastefulness. We have been encouraged to buy large, heavy cars with low gas mileage, to use electricity profligately with the promise of the lowest rates to the greatest user, and to allow our community development patterns to take shape without any thought given to mass transit.

Clearly, any policy must contain a mix of the following courses of action:

First. Develop new and better techniques of exploration and recovery of oil and natural gas.

Second. Expand coal production and use.

Third. Expand use of nuclear power.

Fourth. Develop alternative sources of energy such as solar, geothermal, and synthetic fuels.

Fifth. Adopt and encourage conservation measures to reduce the growth of demand, dealt with in part by this proposed legislation.

It is self-evident that a society which has geared its entire development on the use of fossil fuels, particularly oil and gas, cannot make an immediate shift to alternate sources of energy. Time is needed for development of those sources.

For that reason, and because of the terrible drain on our economy of the wastefulness that characterizes our use of energy, there is an abiding need to make energy conservation a pillar of American energy policy. As a nation we must realize that our fuel supplies are finite and that they should be used wisely.

The energy which can be saved by applying the present level of energy conservation technology is well documented and those energy savings would be substantial. The investment required to install a wide variety of energy conservation measures can often be recouped within a few years, yielding substantial cost savings thereafter. ERDA has indicated that by the year 2000, energy conservation actions can result in energy savings equivalent to a boost of one-third in energy resources. The Ford Foundation's "middle case" technical fix scenario goes even further.

In the absence of a living conservation ethic among our people, it is imperative that action be taken at the highest levels of Government to promote energy conservation. A significant start was made in the last Congress by the passage of two landmark pieces of legislation, the Energy Policy and Conservation Act of 1975 and the Energy Conservation and Production Act of 1976. That effort to provide for a strong energy conservation policy should be continued with the enactment of the tax incentives program which I am introducing today.

This bill provides for a tax credit of 30 percent of the first $500, a maximum credit of $150, for qualified insulation and other energy-conserving component expenditures incurred by the homeowner in retrofitting his principal residence. The tax credit is to be made available for a 3-year period from January 1, 1977, to January 1, 1980, for homes in existence as of January 1, 1977. The tax credit is made refundable so that a taxpayer would receive a refund from the Treasury if the applicable tax credit amount exceeds his tax liability.

Items which will qualify for the tax credit will be found on a list of those items which the Secretary of the Treasury is required to formulate. He must draw his list from the list of qualified energy conserving component expenditures which the Administrator of the Federal Energy Administration is required to compose under the Energy Conservation and Production Act of 1976. The bill which I am introducing today would alter that listing requirement to the extent that the FEA list would have to establish a priority rating so as to insure that energy conservation measures with the greatest energy conservation effectiveness and the shortest payback periods are given the highest priority. The Secretary of the Treasury would then publish a list of the qualified insulation and other energy conserving components eligible for the credit maintaining the priority system. As an example, it is only sensible that improvements to home heating systems only be approved after ascertaining that more energy-saving insulation has already been installed. Hence, if the taxpayer wishes to avail himself of the tax credit, he must install those items with the highest priority in terms of energy conservation effectiveness prior to those with lower priority unless he has previously installed those items or they would be inappropriate if applied to his home. The purpose of this priority listing requirement is to seek the greatest energy conservation for each dollar of revenue lost to the Treasury.

The bill further provides for an extension to businesses of the investment tax credit for qualified insulation expenditures.

The benefits derived from such a tax credit program can be substantial—an estimated 50,000 to 100,000 barrels per day savings in oil or its equivalent by 1980. Furthermore, this is the type of Federal incentive which has considerable support throughout the country. An FEA national opinion survey conducted in April 1976 recorded that 75 percent of those sampled favored tax credits as a Federal incentive for energy conservation.

A full-scale effort to conserve energy is of vital importance. President-elect Carter is clearly in support of such an effort and I eagerly look forward to working closely with him toward that end.

By Mr. GLENN (for himself, Mr. MUSKIE, Mr. GRAVEL, Mr. HASKELL, Mr. HATHAWAY, Mr. KENNEDY, Mr. LEAHY, Mr. MATHIAS, Mr. MCINTYRE, and Mr. PROXMIRE):

S. 125. A bill to provide for review and reauthorization of tax expenditure provisions every 5 years, and for other purposes; to the Committee on Finance.

SUNSET TAX ACT OF 1977

Mr. GLENN. Mr. President, today Senator MUSKIE and I, with other Senators, introduced S. 2, the Sunset Act of 1977. That bill provides for a zero-base review and termination, unless reauthorized, of all Federal Government budget authorizations on a 5-year cycle. Title IV of that bill would apply that same zero-base review procedure to tax expenditure provisions as well.

During the last Congress I introduced an amendment to S. 2925, the sunset bill which I coauthored with Senator MUSKIE, which was substantially similar to title IV of the present sunset legislation. That amendment was accepted in subcommittee and became title V of the bill which was favorably reported from the Senate Government Operations Committee. By a unanimous-consent agreement, title V was referred to the Senate Finance Committee for its consideration. In executive session the Finance Committee on a tie vote of 7 to 7 failed to report out title V.

While I obviously hope the Sunset Act of 1977 is enacted as submitted, I would not want to see the act delayed for consideration because of title IV.

I and my fellow cosponsors are therefore introducing title IV separately in addition to its inclusion as an integral part of S. 2 because we wish that the Fi-

nance Committee have the option to consider this legislation fully. With that in mind we respectfully request that the Finance Committee schedule hearings as early as possible.

By Mr. CRANSTON (for himself, Mr. HAYAKAWA, and Mr. HOLLINGS):

S. 126. A bill to reduce the hazards of earthquakes, and for other purposes; to the Committee on Commerce.

EARTHQUAKE HAZARDS REDUCTION ACT

Mr. CRANSTON. Mr. President, I am today introducing for appropriate reference a bill that I consider a top item on my list of legislative priorities—the Earthquake Hazards Reduction Act.

The bill we are reintroducing today is basically identical to S. 1174, which passed the Senate unanimously in the last Congress on May 24, 1976. Subsequent to Senate passage of S. 1174, it was favorably reported from two committees of the House of Representatives: the Science and Technology Committee and the Interior and Insular Affairs Committee. Unfortunately, in the last hectic days of the 94th Congress, S. 1174 was derailed on a procedural vote in the full House of Representatives. I am confident that given an opportunity to consider the bill on its merits, the House of Representatives will in this new Congress act affirmatively on the Earthquake Hazards Reduction Act.

I have made one alteration in the language of S. 1174 as passed by the Senate last May. That change, which slightly increases the annual authorization levels, reflects advances that have been made in the last year in the earth sciences that suggest the wisdom of annual expenditures to mitigate the potential hazards of earthquakes somewhat higher than those contained in the bill the Senate passed last year.

Last year the Senate bill authorized $40 million for fiscal year 1977, $50 million for 1978 and $60 million for fiscal year 1979, for a total 3-year authorization of $150 million. The new bill would authorize a total of $220 million, broken down as follows: $60 million for fiscal year 1978, $75 million for fiscal year 1979 and $85 million for fiscal year 1980. These funds, as before, would be allocated primarily to the two existing lead Federal agencies in the earthquake area, the U.S. Geological Survey and the National Science Foundation. A portion of the funds would also be made available to other Federal agencies that have responsibilities in the earthquake hazards area.

The higher authorization levels contained in the reintroduced version of the Earthquake Hazards Reduction Act are based primarily upon a September 15, 1976, report prepared by the advisory group on earthquake prediction and hazards mitigation at the request of the President's Science Advisor. This report attempted to identify the program options available to the USGS and the NSF to conduct research necessary to develop the technological base for making earthquake predictions, improving design and construction methods for all types of structures, and assisting State and local officials with the task of disaster preparedness. The report identified three options for augmenting the USGS and NSF earthquake prediction and hazard mitigation research programs. Option C, the highest level of funding, is described as "clearly the preferred and most effective option for accomplishing the objectives spelled out in this plan." Option A, the lowest funding option, was considered to be "barely adequate to accomplish the objective of this plan and will require postponement of implementation of many important aspects of this plan." Option B, the intermediate level of funding presented, is that reflected in the revised authorization levels contained in the bill being introduced today. It is interesting that the fiscal year 1978 Federal budget, prepared by the outgoing Ford administration, reportedly reflects option B resulting in a recommended budget for USGS and NSF that more than doubles expenditures for fiscal year 1977.

I have included in the revised bill authorization levels which approximate the intermediate option B primarily because option B is closest to the level of funding endorsed by the Senate last May when it passed S. 1174. I would urge, however, that in the hearings and debate that I hope will occur soon on this reintroduced proposal full and careful consideration will be given to the possibility of option C, clearly preferred by the eminent scientists, engineers, and public officials who constituted the advisory group on earthquake prediction and hazard mitigation.

I want to emphasize to my Senate colleagues that the bill being introduced today is viewed as a starting point in the resumption of our efforts to upgrade the Federal earthquake program. As I have indicated, subsequent to Senate passage of S. 1174, the House of Representatives moved quite far down that road in the last Congress. The House made some important changes in the organizational structure envisioned by the bill passed by the Senate. I understand that legislation has already been reintroduced in the House this year, and I am hopeful that the excellent working relationship developed in the last Congress among the various Senators and Members of Congress interested in this legislation will be reestablished this year I am confident that early hearings will occur in both the House and the Senate and that the Earthquake Hazards Reduction Act will be enacted at long last in this calendar year.

Contrary to popular thinking, earthquakes are a hazard that can strike in many States, not just along the Pacific coast. Earthquakes occurred in the St. Lawrence River region on several occasions from 1650 to 1928, in the vicinity of Boston, Mass., in 1755, in the Central Mississippi Valley at New Madrid, Mo. in 1811–12, in Charleston, S.C. in 1886 and at Hebgen Lake, Mont. in 1959. Moreover, earthquakes affect human beings and their activities over widely spread areas. The 1906 San Francisco earthquake was felt over a 400,000 square mile area, and the massive New Madrid earthquakes in the winter of 1811–12 were felt over an area of 2 million square miles.

A recent study suggests that all or portions of 39 States lie in regions of major and moderate earthquake risk—with a combined population of more than 70 million persons.

Perhaps even more significant is the pattern of population migration over the past several decades. No longer are our people and our economic activities spread out across the vast land area of the United States. Especially in the years since World War II, our people have moved to the major cities along our two major coastlines, concentrating much of our national economic and human resources in the very areas most prone to earthquakes and related hazards. As destructive as the 1906 San Francisco earthquake was, if it were to happen again today, the losses would be measured in the tens of billions of dollars. The economic repercussions of such a disaster could not be limited to one locality or one State—it would be a burden that would have to be shouldered by all Americans in all States.

Earthquake activity worldwide over the past months has been extraordinarily destructive. Unofficial reports of the tragic July 27, 1975, earthquake which devastated the Tangshan-Tientsin region of north China place the life loss for that one event at more than 655,000 people and the injuries at nearly 800,000. If these reports are accurate, that July 27 earthquake was the most destructive earthquake to occur worldwide since the mid-16th century when Chinese records show that more than 800,000 people died in one earthquake. Last year, substantial loss of life and tremendous damage occurred elsewhere in major earthquakes in Guatemala, Italy, western New Guinea, Bali, and Mindanao in the Philippine Islands.

In the Los Angeles area, USGS scientists have discovered an uplift in the Earth's crust along a section of the San Andreas Fault that had been quiet since a great earthquake in 1857. This uplift is a cause of much concern to the 10 million people who live in the Los Angeles metropolitan area. While it may not be a sign that an earthquake is coming, it must nevertheless be carefully monitored. The program envisioned by the Earthquake Hazards Reduction Act would funnel needed resources into this effort.

Another area of growing concern among scientists is the question of induced seismicity—whether or not the introduction of man-made reservoirs inadvertently triggers earthquakes. There are over 20 cases worldwide where the filling of large reservoirs appears to have induced earthquakes, ranging from microearthquakes to one as large as 6.5 on the Richter scale of magnitude. The largest earthquake thought to be so induced, near the Koyna Dam in India in December 1967, resulted in 177 deaths, 2,300 injuries, and extensive damages. There is currently no accepted procedure for determining in advance of construction whether filling a reservoir will trigger an earthquake, and this seems to be an especially important area for an enhanced research effort.

We have been extremely fortunate here in the United States because the only great earthquakes to strike within our continental boundaries occurred in the last century, or in the case of the 1906 San Francisco earthquake at a time when the local population was much less. Only about a half million people were living in the San Francisco Bay Area when the great 1906 earthquake struck. And while that was a major catastrophe, it pales in comparison to what might result if the San Andreas were to give us an encore today. Californians living in the Bay Area were reminded just this past weekend by a series of moderate but nondamaging earthquakes that rocked the area. All were in the 4.5 to 5 magnitude range and seem to be centered on the Calavaras or the Hayward Faults east of the city of San Francisco.

Mr. President, it is inevitable that a major destructive earthquake will strike a major U.S. population center. We cannot yet predict when that catastrophe will occur. But there is much we can do in the meantime to prepare ourselves for the event in a manner which minimizes the damage, reduces the life loss and mitigates the economic disaster. The Earthquake Hazards Reduction Act can take us a long way down the road toward being prepared.

In closing, I ask unanimous consent that a speech made last month by Dr. Robert Hamilton, director of the earthquake program of the U.S. Geological Survey, be included in the RECORD at the conclusion of my remarks.

Mr. President, I further request unanimous consent for the text of the Earthquake Hazards Reduction Act to be printed in full following the speech by Dr. Hamilton.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 126

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Earthquake Hazards Reduction Act".

SEC. 2. FINDINGS

The Congress finds and declares the following:

(1) All 50 States are vulnerable to the hazards of earthquake occurrence, and at least 39 of them are subject to major or moderate seismic risk, including Alaska, California, Hawaii, Illinois, Massachusetts, Missouri, Montana, Nevada, New Jersey, New York, South Carolina, Utah, and Washington. A large portion of the population of the United States lives in areas vulnerable to earthquake hazards.

(2) Earthquakes have caused, and can cause in the future, enormous loss of life, injury, destruction of property, and economic and social disruption. With respect to future earthquakes, such loss, destruction, and disruption can be substantially reduced through the development and implementation of earthquake hazard reduction measures, including (A) improved construction methods and practices, (B) land-use controls and redevelopment, (C) prediction techniques and early-warning systems, (D) coordinated emergency preparedness plans, and (E) public education and involvement programs.

(3) An expertly staffed and adequately financed earthquake hazard reduction program, based on Federal research and contributions and State, local, and private participation, would reduce the risk of such loss, destruction, and disruption in seismic areas by an amount far greater than the cost of such program.

(4) A well-funded seismological research program in earthquake prediction could provide data adequate for the design, within 10 years, of an operational capability that would be able to predict accurately the time, place, magnitude, and physical effects of earthquakes in selected areas of the United States.

(5) There is a scientific basis for hypothesizing that the risk to life and property from a major earthquake may be moderated, in at least some seismic areas, by application of the findings of earthquake control and seismological research.

(6) The implementaion of earthquake hazard reduction measures would, as an added benefit, also reduce the risk of loss, destruction, and disruption from other natural hazards and manmade hazards, including hurricanes, tornadoes, accidents, explosions, landslides, building and structural cave-ins, and fires.

SEC. 3. PURPOSE.

It is the purpose of the Congress in this Act to reduce the risks to life and property from future earthquakes in the United States through the establishment and maintenance of an effective earthquake hazard reduction program.

SEC. 4. DEFINITIONS.

As used in this Act, unless the context otherwise requires:

(1) The term "Committee" means the National Advisory Committee on Earthquake Hazard Reduction established under section 6.

(2) The term "Director" means the Director of the United States Geological Survey in the Department of the Interior.

(3) The term "includes" and variants thereof should be read as if the phrase "but is not limited to" were also set forth.

(4) The term "program" means the earthquake hazard reduction program established under section 5.

(5) The term "seismic" and variants thereof mean having to do with, or caused by, earthquakes.

(6) The term "State" means each of the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Mariana Islands, and any other territory or possession of the United States.

(7) The term "United States" means, when used in a geographical sense, all of the States.

SEC. 5. NATIONAL EARTHQUAKE HAZARD REDUCTION PROGRAM.

(a) ESTABLISHMENT.—The President shall establish and direct to be maintained, in accordance with the provisions of this Act, a coordinated earthquake hazard reduction program, in order to reduce the loss of life, property destruction, and economic and social disruption from future earthquakes. The program (1) shall be designed and administered to achieve the objectives set forth in subsection (b); (2) shall include where appropriate each of the agencies listed in subsection (c); (3) shall include each of the elements described in subsection (d); and (4) shall take into account the recommendations of the Committee established under section 6. The President shall, by rule, within 180 days after the date of enactment of this Act, (A) identify the department, agency, or interagency task force which shall have primary responsbility for the development and implementation of the earthquake hazard reduction program; (B) assign and specify the role and responsibility of each appropriate Federal department, agency, and entity with respect to each such object and element (to the extent not specified in this Act); (C) provide for cooperation and coordination with, and assistance (to the extent of available resources) to, interested governmental entities in all States, particularly those containing areas of high or moderate seismic risk; and (D) provide for qualified staffing of the program and its components.

(b) OBJECTIVES.—The objectives of the program shall include each of the following:

(1) The development of technologically and economically feasible design and construction methods and procedures to make new and existing structures, in areas of seismic risk, earthquake resistant.

(2) The implementation, in all areas of high or moderate seismic risk, of a system (including personnel, technology, and procedures) for predicting damaging earthquakes and for identifying, evaluating, and accurately characterizing seismic hazards.

(3) The development, publication, and promotion, in conjunction with State and local officials and professional organizations, of model codes and other means to coordinate information about seismic risk with land-use policy decisions and building activity.

(4) The development, in areas of seismic risk, of improved understanding of, and capability with respect to, earthquake-related issues, including risk control, preevent planning, warning dissemination, emergency services, reconstruction, and redevelopment.

(5) The education of the public, including State and local officials, as to earthquake phenomena, the identification of locations and structures which are especially susceptible to earthquake damage, ways to reduce the adverse consequences of an earthquake, and related matters.

(6) Basic and applied research leading to a better understanding of the control or alteration of seismic phenomena.

(c) INVOLVEMENT.—The program shall, where appropriate, include each of the following Federal agencies: the United States Geological Survey, the National Science Foundation, the Department of Defense, the Department of Housing and Urban Development, the National Aeronautics and Space Administration, the National Oceanic and Atmospheric Administration, the National Bureau of Standards, the Energy Research and Development Administration, and the National Fire Prevention and Control Administration. The program shall also involve, and the Federal agencies shall seek the cooperation of, States and their political subdivisions, private organizations, and individuals, in the development of plans, standards, procedures, and methods for reducing the risk to life and property from future earthquakes.

(d) ELEMENTS.—The program shall include each of the following elements:

(1) Research and the implementation of research findings in tectonics, seismology, and geology. Such research and implementation shall be supervised by the Director. Such research and implementation shall include—

(A) the development of an operational system for predicting damaging earthquakes in the seismically active areas of the United States:

(B) the development and placement of instruments and networks of instruments capable of collecting appropriate data;

(C) seismicity studies throughout the United States;

(D) the evaluation of methods that may lead to the development of a capability to modify or control earthquakes in certain regions;

(E) zonation and microzonation for seismic risk in all parts of the United States, taking into account tectonic environment; seismicity; fault location; and intensity, location, and return time of expectable earthquakes; and

(F) the preparation of seismic risk analyses useful for emergency planning and community preparedness.

The Director is authorized, in the performance of any such studies and activities, to utilize the services of qualified persons and governmental entities (other than the Geological Survey), including institutions of higher education and private entities or organizations concerned with seismic risk and seismic mitigation research. The Director shall expend, to such non-Federal entities, a significant portion of the funds appropriated pursuant to section 8(b) of this Act for research purposes.

(2) Basic and applied research activities in engineering, education, planning, and the social sciences. Such activities shall be supervised by the National Science Foundation. Such activities shall include—

(A) basic earthquake engineering research and earthquake hazard reduction research;

(B) the collection and analysis of engineering seismology information relating to destructive ground motion and associated risks to urban communities;

(C) efforts to develop more accurate and reliable methods of earthquake engineering analysis for all types of structures and for a variety of ground conditions;

(D) efforts to develop improved methods of assessing the risk of earthquakes, with respect to high-density areas and other locations, based upon the seismological and geotechnical characteristics thereof;

(E) the development and application of methods, standards, and criteria for earthquake-resistant location, design, construction, and retrofitting;

(F) the development of ways to increase community consciousness and preparedness wih respect to earthquakes; and

(G) the study of ways to facilitate the granting of relief to, and the rehabilitation of, earthquake-damaged areas.

The methods, standards, and criteria developed under subparagraph (E) shall be developed in order to increase the protection afforded by existing structures and to maximize the protection afforded by new structures, against earthquake hazards, at the most economical cost practicable. The cost of protection shall be measured against the benefits of reducing social and economic disruption and avoiding or minimizing damage and loss to life and property. Priority shall be given to the development of such standards for dams, hospitals, schools, public utilities, public safety structures, high-occupancy buildings, and other structures which are especially needed in time of disaster.

(3) Effective information dissemination and education. Such activities shall be supervised jointly by the Director and the National Science Foundation. Such activities shall include timely dissemination of—

(A) instrument-derived data of interest to other researchers;

(B) design and analysis data and procedures of interest to the design professions and to the construction industry; and

(C) other information and knowledge developed to reduce vulnerability to earthquake hazards.

Such data, information, and knowledge shall be made available to Federal, State, and local government officials and to other interested persons.

(4) An assistance program to aid the States in carrying out their responsibilities under section 201 of the Disaster Relief Act of 1974 (42 U.S.C. 5131), by making available the results of research and other activities undertaken under this Act.

SEC. 6. NATIONAL ADVISORY COMMITTEE ON EARTHQUAKE HAZARD REDUCTION.

(a) ESTABLISHMENT.—There is established a National Advisory Committee on Earthquake Hazard Reduction.

(b) MEMBERSHIP.—The Committee shall be composed of 15 members (one of whom shall be designated as Chairman) to be appointed by the President. The members shall include (1) representatives of the research community (including the design professions) and of Federal, State, county, and local governmental entities concerned with the reduction of earthquake hazards, and (2) qualified individuals experienced in earthquake-hazard research, planning, implementation, or preparedness.

(c) DUTIES.—The Committee shall serve as an advisory body to the President, to review and advise on the progress, implementation, and coordination of the program and shall perform such other duties as the President may assign.

(d) COMPENSATION.—Members of the Committee shall be reimbursed for actual expenses incurred in the performance of such duties.

SEC. 7. ANNUAL REPORT.

The President shall, within 90 days after the end of each fiscal year, submit an annual report to the Congress describing and evaluating progress achieved in reducing the risks of earthquake hazards. Each such report shall include any recommendations for legislative and other action.

SEC. 8. AUTHORIZATIONS FOR APPROPRIATIONS.

(a) IN GENERAL.—There are authorized to be appropriated to carry out the program (in addition to the authorizations set forth in subsections (b) and (c), not to exceed $5,000,000 for the fiscal year ending September 30, 1978; not to exceed $5,000,000 for the fiscal year ending September 30, 1979; and not to exceed $5,000,000 for the fiscal year ending September 30, 1980.

(b) GEOLOGICAL SURVEY.—There are authorized to be appropriated to the Secretary of the Interior for purposes of carrying out, through the Director, the responsibilities assigned to the Director under sections 5(d)(1) and 5(d)(3) not to exceed $27,500,000 for the fiscal year ending September 30, 1978; not to exceed $35,000,000 for the fiscal year ending September 30, 1979; and not to exceed $40,000,000 for the fiscal year ending September 30, 1980.

(c) NATIONAL SCIENCE FOUNDATION.—To enable the Foundation to carry out its responsibilities under section 5(d) of the Earthquake Hazard Reduction Act, there are authorized to be appropriated to the Foundation not to exceed $27,500,000 for the fiscal year ending September 30, 1978; not to exceed $35,000,000 for the fiscal year ending September 30, 1979; and not to exceed $40,000,000 for the fiscal year ending September 30, 1980.

THE EARTHQUAKE THREAT TO CALIFORNIA

(By Robert M. Hamilton)

If one of you decided to walk to Los Angeles this year and you counted your steps on the way, you would reach a total of about 600,000 by the time you arrived. If you did it again twenty years from now, assuming your steps were still as long then as now, it would take you one less step. The reason for this savings in steps is that Los Angeles is moving closer to San Francisco at the rate of about 2 inches a year, or over 3 feet every twenty years.

As this rate of movement is likely to continue for millions of years into the future, your descendant living 10 million years from now will be able to reach Los Angeles merely by walking to the west side of Daly City, because by then Los Angeles will have become a new suburb of the San Francisco Bay region.

Now for those of you who feel that San Francisco possesses a certain charm and unique life style that is incompatible with that of Los Angeles, the unwelcome rafting of the southern metropolis to this area would seem to call at least for an environmental impact statement. But although an environmental impact statement can delay or stop most undertakings in this day and age, there is little hope it could interfere with the Earth's restless movement.

Your consolation can be that in 60 million years, Los Angeles will have passed San Francisco by, and will have moved to the coast of southern Alaska. There it will be carried down into the interior of the Earth to be melted down and recycled, reappearing on the Earth's surface in the far distant future during a volcanic eruption.

The forces that are moving Los Angeles northward relative to San Francisco are the same ones that cause California's earthquakes. The break in the Earth's crust along which the slip is occurring is the famous San Andreas fault system—a complicated network of fractures that extends downward from the land surface to a depth of at least 10 miles, and laces western California from Cape Mendocino in the north to the Imperial Valley in the south.

The San Andreas fault system is a major rift in the Earth's outer shell. It is a boundary between two large plates of the Earth's shell that move essentially as rigid units. San Francisco lies east of the fault on the so-called North American plate, while Los Angeles lies west of the fault on the Pacific plate.

The existence of the plates—there are about a dozen of them altogether—was a major scientific discovery of the last decade. The discovery grew out of increased exploration of the ocean floor in the 1960's, with the realization that great mountain ranges extend for thousands of miles along the ocean floor, and out of geophysical studies including the global distribution of earthquakes, and the magnetic properties of rocks on the ocean floor.

The resulting theory, which is called by several names—continental drift, sea-floor spreading, and plate tectonics—has led to a revolution in the earth sciences. It has important implications in many fields including exploration for energy and mineral resources, and explaining the occurrence of earthquakes. It provides the basis for the statement that another great earthquake in California is inevitable. It is also the basis for the belief that the further you are from the last quake, the closer you are to the next one. The slow movements deep in the Earth steadily build up the forces in the crust. When the forces are too strong for the rocks of the Earth's outer shell, sudden slip occurs, and the ground shakes. Once the forces are released it takes time for them to build again to a dangerous level.

The important question, of course, is: When will the next big tremor occur? Prediction of earthquakes is a proclaimed secret talent of mystics, and a long-sought goal of scientists. As recently as five years ago, most scientists were openly skeptical of the possibility of ever predicting earthquakes, but progress in recent years has changed this skepticism to optimism.

With regard to predictions by mystics or others using non-scientific methods, scientists have always been somewhat perplexed in deciding how to deal with such situations. We are always amazed at the amount of news coverage afforded a person who makes a vague prediction based on no apparent evidence whatsoever. Even people who have a consistent track record of missed predictions continue to receive publicity. Many scientists are wary of becoming associated with the controversies that often surround non-scientific predictors. The pitfalls seen by scientists perhaps can best be illustrated by relating a story in the textbook on seismology, by Professor Charles Richter, who devised the Richter scale for ranking earthquakes.

The story is true and took place in Italy in this century. A cobbler, who began his prediction career by foretelling local earthquakes, began to receive a lot of newspaper coverage through a reporter friend. One of Italy's leading seismologists became con-

cerned and wrote a paper challenging the seer in an attempt to set the record straight. He pointed out that small earthquakes were used to satisfy predictions of large ones, that predictions were changed in hindsight to fit the facts, and that some "facts" were invented. The attention thereby generated skyrocketed the cobbler's popularity and established him as a "rival" of the scientist. Instruments were acquired by the uneducated cobbler. During Mussolini's reign, the cobbler even invented a new planet, named after the dictator, of course, and used it to predict earthquakes. Finally, an observatory was named after the cobbler, and it was still in existence in 1958 when Richter wrote his book.

In pursuit of scientifically-based predictions, four nations of the world have undertaken major scientific programs aimed at prediction: Japan, the Soviet Union, the People's Republic of China, and the U.S. The earliest successes in prediction came in the Soviet Union, which started working on prediction about 25 years ago. The most spectacular success occurred in China, which started working on prediction about 10 years ago.

The Chinese success came in February 1975 when a magnitude 7.3 shock was predicted on the very day of its occurrence. The final warning was issued in the afternoon at 2 pm and the tremor came that evening at 7:30 pm. The town of Haicheng was 90% destroyed, yet few people were killed. Had the prediction not been issued, deaths would almost certainly have numbered in the tens of thousands and could have exceeded 100,000. The Chinese achievement represents the first and so far only case where a large and highly destructive shock was predicted and many lives saved.

How did the Chinese do it? Do they know something we don't know? They did it by making a massive effort, involving perhaps 10,000 paid workers, to monitor the same types of geological and geophysical phenomena that are monitored in the U.S. and other countries. They don't have any secret understanding of earthquakes.

The types of changes studied in China and elsewhere include: deformation of the land surface (uplift, warping, and horizontal shifting), anomalies in the electrical resistivity and magnetic field of the Earth, variations in the pattern of earthquake activity, anomalies in the gases in well waters and in the height of water in wells, changes in the velocity of seismic waves, and unusual animal behavior.

The Chinese prediction in 1975 was based on several of these phenomena. The advent of unusual earthquake activity in a place where it had not been seen before gave rise to the final prediction.

In the U.S. much of our effort to predict earthquakes has been focused here in California, mainly because, next to Alaska, California has the highest earthquake frequency. The U.S. Geological Survey has operated a network of instrumentation in the area south of Hollister for about 5 years and some important earthquake precursors have been recorded there.

More recently, attention has been directed toward southern California, where it has been discovered that the land northeast of Los Angeles has risen up to a foot over the last 15 years. The land uplift covers an area over 100 miles long extending along the San Andreas fault through the Mojave Desert area. Such an uplift sometimes precedes earthquakes, and is definitely cause for concern now. The Federal Government is sponsoring about two million dollars' worth of new studies in the area to assess the significance of the uplift and to watch for additional anomalies that could warn of a coming shock. Our current information has been published and formally communicated to Governor Brown by the Director of the U.S. Geological Survey. There is no basis at the present time for a prediction.

Overall the enthusiasm and excitement concerning development of a useful prediction capability is high among seismologists. Abundant capability to address the problem exists; particularly in the universities, and scientists are generally fascinated by the prediction challenge.

Predicting earthquakes, however, is only part of the approach to reducing earthquake losses. Earthquake-resistant design of structures and wise use of land to avoid faults and unstable ground are other elements, and it should be emphasized that these are the only elements available until prediction becomes a developed and proven capability.

The impact of a great earthquake in the region of Los Angeles or San Francisco would be enormous. Losses could reach thousands of lives and tens of billions of dollars in damage. One estimate indicates that in the San Francisco Bay area 10,000 to 20,000 people could be killed during business hours and 3,000 to 5,000 during non-business hours. This difference between daytime and nighttime losses shows that people are generally safer in their homes.

1976 has been an extremely bad year for earthquakes. Through the months the death toll has steadily risen:

23,000 killed in Guatemala, 1,000 in northern Italy, 300 to 6,000 in New Guinea, 600 in Indonesia, 100,000 or possibly many more, in China, 8,000 in the Philippines, and now most recently about 4,000 in Turkey.

This has in all likelihood been the worst year for earthquakes since at least 1927, a half century ago, when about 200,000 people died in a Chinese quake. The worst year before that one was 1737, when an earthquake near Calcutta, India, claimed about 300,000 lives. But 1556 was the worst year ever, when over 800,000 died in central China.

The great death tolls I have cited resulted mainly because people in much of the world live in adobe or unreinforced masonry houses with heavy tile or mud roofs. Such structures easily collapse when shaken by an earthquake. In the U.S. people are much less vulnerable because most of our population resides in wooden-frame houses, which rarely collapse, and in engineered buildings. Unfortunately, however, we have many hazardous structures in use that would be extremely costly to replace or abandon. This is especially true in the older cities of the eastern U.S. where the earthquake threat is very real.

The large death toll this year from earthquakes has not resulted from an increase in the number of large earthquakes. In an average year there would be 18 earthquakes of magnitude 7 or larger. To date, there have been 15 such shocks in 1976, so the rate is normal. Unfortunate coincidence has caused the high losses, with many of the shocks occurring close to cities.

As I mentioned before, earthquake losses can be greatly reduced through wise use of land to avoid active faults and unstable ground, use of earthquake-resistant construction techniques, and perhaps someday earthquake prediction.

In assessing and mitigating earthquake hazards, the responsibilities of the different levels of Government are fairly well established.

The Federal Government has responsibility for:

(1) developing new techniques through a research program involving Government laboratories, universities and private industry,

(2) conducting demonstration projects to test the new techniques and encourage their use, and

(3) assessing national and regional seismic risk, which is needed by Federal agencies for a variety of purposes including siting of critical facilities such as nuclear reactors, pipelines and dams.

State and local governments are responsible for:

(1) Regional and local seismic risk assessment as it relates to land use, and

(2) establishment of zoning requirements and building standards to take into account possible earthquake effects.

The degree of implementation of hazards assessment and mitigation by State and local governments has been uneven. California is in the forefront of the States in the implementation of earthquake disaster mitigation measures. Californians should not ignore or underestimate the earthquake threat. Nor should irrational fear of earthquakes be a diversion from rational preparations.

As frequently occurs, the solution of the technological problems associated with earthquakes does not necessarily provide the basis for solving the many related social and economic problems. The complexity of the issues that communities typically face is well illustrated by consideration of one of San Francisco's more significant earthquake problems: the Chinatown area of the city. According to my friends in the structural engineering profession, many of the buildings in Chinatown represent a serious collapse hazard. The area abounds with unreinforced parapets certain to rain bricks on the narrow and potentially crowded streets below in a significant earthquake.

Most of the buildings are constructed of unreinforced masonry walls with many weakening openings. The engineers are certain that many of these buildings will collapse in an earthquake like the one that struck in 1906, burying the occupants in a mound of rubble no less tragically than in Guatemala, China or Turkey in this year.

What are the options available to San Franciscans to deal with this problem? Clearly, Chinatown is a unique human and architectural resource, one of the most famous aspects of San Francisco. Demolition and redevelopment may be out of the question, and would certainly be highly controversial. Reinforcement of the hazardous buildings would be extremely expensive, not within the means of most property owners under the present financial and taxation circumstances. Given an accurate and reliable earthquake prediction, it might be possible to evacuate the occupants from the hazardous buildings, but this too presents difficult economic and social problems. Tourist revenues would be risked. Many residents of Chinatown would be understandably reluctant to leave even for a few days, particularly people not comfortable with English. None of these solutions is easy.

But the situation in Chinatown is not unique. Buildings presenting a collapse hazard exist south of Market Street and in other parts of the city. Nor is the problem unique to San Francisco. It is shared by several of the older communities in California and throughout the earthquake-prone regions of the nation.

A few years ago the British Broadcasting Corporation produced a television film about earthquakes entitled "San Francisco—The City that Waits to Die". In my view the title presents a prophecy with little basis.

The inevitable earthquake will indeed be a disaster, but with study and planning the losses can be greatly reduced. Many cities and communities have rebounded from terrible earthquakes to enjoy renewed economic and social vitality.

In dealing with the earthquake threat it is essential to look beyond the technology, beyond developments in engineering design and construction, beyond new understanding of hazardous ground conditions, beyond even earthquakee prediction. . . . The real challenge lies in devising solutions to the social, economic and political problems involved in applying this emerging tech-

nology—solutions that will make California a safer, and even more enjoyable place to live and work.

By Mr. INOUYE:

S. 127. A bill to amend chapter 55 of title 10, United States Code, to require the Armed Forces to continue to provide certain special educational services to handicapped dependents; to the Committee on Armed Services.

Mr. INOUYE. Mr. President, although the trend in coverage under the civilian health and medical program of the uniformed services—CHAMPUS—has been to realine the program with more common health insurance programs such as the Federal employees health benefits plan or Blue Cross/Blue Shield coverage, I am today reintroducing my bill to require the Armed Forces to reinstate special education and related services to handicapped military dependents.

This bill would more clearly define a serious handicap by including coverage for those who are hard of hearing or deaf, those who suffer from a speech impairment or a visual handicap, those who are seriously emotionally disturbed, those who have moderate or severe mental retardation, those who are crippled, and those who suffer from a health impairment or a specific learning disability requiring special education and related services.

In August 1973, the Office of the Civilian Health and Medical Program of the Uniformed Services announced that it would discontinue the funding of special educational services to military dependents. Effective immediately, no further applications for special educational services were to be accepted, and those applications which had been approved would be provided funds only until December 31, 1973.

Upon inquiry, I learned that this change in service was not due to the cost of these services, but because there was no legal basis which required CHAMPUS to provide such services. In fact, CHAMPUS was unable to provide me with any figures on the cost or on the number of children who were affected by this change in policy. As of December 13, 1973, CHAMPUS did not know who would be losing benefits a mere 3 weeks later. I need not tell you of the financial hardship that was thrust upon the affected families with so little warning.

In addition to the burden that was placed upon the families which were involved was the burden placed upon the States to absorb these students in the middle of the school year and the fiscal year.

This problem is acute in my own home State of Hawaii. To cite one example, there is a private school located on Pearl Harbor which has been providing special education for military dependents with learning disabilities. This school, the Armed Services Special Education and Training School known as ASSETS, has been under serious financial strain since virtually every one of their students received aid from CHAMPUS.

If these students at ASSETS and other special students elsewhere throughout the country are forced to discontinue their education prematurely, or if they are placed in an average public school classroom which does not provide them with the special services which their disabilities require, it will result in a rapid regression of their condition.

CHAMPUS claims that these services are strictly educational in nature, and not medical. I personally believe, and it can be documented by professionals in the field, that no such clear distinction is possible.

I see a great need to continue this service for the dependent children of active duty military personnel, and I urge rapid passage of this bill.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 127

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1079(b) of title 10, United States Code, is amended by striking out "subsection (a)" each time it appears and inserting in lieu thereof "subsections (a) and (d)".

(b) Section 1079(d) of title 10, United States Code, is amended by—

(1) striking out "who is moderately or severely mentally retarded or who has a serious physical handicap" and inserting in lieu thereof "who has a serious handicap"; and

(2) adding at the end thereof a new sentence as follows: "As used in this subsection the term 'serious handicap' means hard of hearing, deaf, speech impairment, visual handicap, seriously emotionally disturbed, moderate or severe mental retardation, crippled, or a health impairment or specific learning disability requiring special education and related services.".

(c) Subsection (e) of section 1079 of title 10, United States Code, is repealed, and subsections (f) and (g) of such section are redesignated as subsections (e) and (f), respectively.

SEC. 2. (a) 1086(a) of title 10, United States Code, is amended by striking out the period at the end of such section and inserting in lieu thereof a comma and the following: "including those benefits under section 1079(d)."

(b) Section 1086(b) of such title is amended by striking out "1079(a)" and inserting in lieu thereof "1079 (a) and (d)".

By Mr. INOUYE:

S. 128. A bill to amend section 1002 of title 38, United States Code, to authorize the burial in a national cemetery of the parents of certain members of the Armed Forces who die in active service; to the Committee on Veterans' Affairs.

Mr. INOUYE. Mr. President, the United States has established national cemeteries around the world to honor those who have defended our Nation. The spouse and children of these men and women have been permitted to join them in their final resting places, but I have found that in some cases the existing law does not go far enough and results in some tragic exclusions.

The situation I am familiar with and am attempting to remedy by this legislation involves a person who is an only child and dies in the service of his or her country. Quite often, the bereaved parents wish to lie at rest near the body of their child. The present regulations do not permit these parents to be granted their final wish.

I am now introducing a bill to amend that section of the United States Code on veterans' benefits to authorize the burial in a national cemetery of the parents of a person who is an only child, in such cases where the person died while serving on active duty, provided that his or her death precedes the death of his or her parents. I hope my colleagues will assist me in fuffilling this last wish of these parents by supporting this bill.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1002 of title 38, United States Code, is amended by redesignating paragraph (6) as paragraph (7) and adding after paragraph (5) a new paragraph (6) as follows:

"(6) The surviving parents of any member of the Armed Forces who was the only child of such parents and whose death occurs under honorable conditions while such member was serving on active duty for a period of more than thirty days."

By Mr. INOUYE:

S. 129. A bill to restore the wartime recognition of certain Filipino veterans of World War II and to entitle them to those benefits, rights, and privileges which result from such recognition; to the Committee on Veterans' Affairs.

Mr. INOUYE. Mr. President, in 1948 our Government struck from official U.S. Army records the names of thousands of Filipinos who had served with the U.S. Army or with the guerrilla forces fighting in behalf of U.S. interests, denying to those individuals the various rights, benefits and privileges accorded to those whose records were preserved.

In the intervening period, numerous efforts have been made to give recognition to those individuals whose names should not have been struck out. We now have available a systematically reconstructed list of veterans who have not been given their proper rights and privileges.

The legislation I am proposing today is long overdue. It would permit the excluded veterans to submit their claims to the appropriate authorities for resolution on a case-by-case basis. Upon the submission of reliable documentation of service with the U.S. Army or guerrilla forces, these veterans would be duly recognized and become eligible for assistance from the U.S. Government.

The removal of their names from Army records was a travesty of justice. For those who have since died, this bill is too late. Its enactment would serve, however, belatedly, to confirm our commitment to these men who fought so hard so that we might remain free.

Mr. President, I request unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 129

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That those Filipino war veterans who fought as members of the Army of the United States in the Philippines (Commonwealth Army) in World War II, and were recognized as such, wounded in action and/or awarded the Purple Heart or other American medals and decoration, and/or who were duly processed into the service, honorably discharged therefrom with the status of "Commonwealth Army Veterans" under the provisions of Public Law 89-613, or those who were inducted into the USAFFE (United States Armed Forces in the Far East) just before the outbreak of the Pacific war, saw service during that war in Bataan and Corregidor or other battlefields in the Philippines and reported to military control during the liberation, but whose military wartime records were subsequently revoked and/or nullified when their names were deleted, erased, stricken off, or otherwise removed from the official records of the United States Army shortly after the war, shall be duly restored or returned to their status as bona fide recognized veterans of World War II.

SEC. 2. Only those Filipino veterans of World War II who in either USAFFE (United States Armed Forces in the Far East) or the guerrillas and whose names were previously excluded, deleted, erased, stricken off, or otherwise removed from the official records shall be restored or returned to the records of the United States Army by virtue of this Act.

SEC. 3. The Secretary of Defense, in consultation with appropriate officers of the Republic of the Philippines, shall implement the provisions of this Act.

SEC. 4. This Act shall take effect on the date of its enactment, but nothing in this Act shall be deemed to entitle any individual to veterans' benefits for any period prior to such date.

By Mr. INOUYE:

S. 130. A bill to allow an additional income exemption for a taxpayer or his spouse who is deaf or deaf-blind; to the Committee on Finance.

Mr. INOUYE. Mr. President, today I am reintroducing legislation which would provide for an additional exemption for a taxpayer or his spouse who is deaf or deaf-blind. I originally introduced this measure in November 1973 after I realized that the Internal Revenue Service provides an additional exemption for blind taxpayers and their spouses, but that Hawaii is the only State to provide this same exemption for the deaf.

Despite the support that members of the deaf community showed for this legislation it never received any action by the Senate Committee on Finance.

Accordingly, I am again reintroducing this bill because I believe that its provisions are just, and that it will be quite beneficial in alleviating some of the economic discrimination with which the deaf are faced. This includes the exorbitantly high costs of hearing aids, the extra high costs of automobile insurance which many insurance companies require of their deaf customers, and the higher costs of education. Combine these expenses with the fact that most deaf individuals are underemployed given their abilities and education.

In addition, I believe that there is no cause for a fear that this will result in a great amount of lost revenue for the U.S. Treasury. There are approximately 450,000 profoundly deaf persons in this country. This number is only slightly less than the 470,000 legally blind persons. Of this 470,000, only 145,000 persons claimed the additional exemption in 1971. It is reasonable to assume that approximately the same proportion of the deaf would claim the deduction.

Mr. President, I hope that my colleagues will give early and favorable consideration to this humanitarian measure.

I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 130

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 151(d) of the Internal Revenue Code of 1954 (relating to additional exemption for blindness of taxpayer or spouse) is amended—

(1) by inserting "or deafness" after "blindness" in the heading;

(2) by striking out "blind" each place it appears in paragraphs (1) and (2) and inserting in lieu thereof "blind, deaf, or deaf-blind"; and

(3) by adding at the end thereof the following new paragraphs:

"(4) DEAFNESS DEFINED.—For purposes of this subsection, an individual is deaf only if his average loss in the speech frequencies (500 to 2000 Hertz) in the better ear is 86 decibels, I.S.O. or worse.

"(5) DEAF-BLIND DEFINED.—For purposes of this subsection, an individual is deaf-blind only if he is both deaf and blind."

(b) The amendments made by this section shall apply to taxable years beginning after the date of the enactment of this Act.

By Mr. INOUYE:

S. 131. A bill to amend the Internal Revenue Code of 1954 to provide credit against income tax for an employer who employs older persons in his trade or business; to the Committee on Finance.

Mr. INOUYE. Mr. President, the role of the elderly in American society has been drastically altered over past years.

While most of the Nation has been enjoying a rising prosperity, the aged have remained a pocket of poverty with little means of helping themselves. The economic growth and industrial expansion of past decades have not solved the basic economic problems of the retired aged; instead, these problems have been aggravated. The rising tide of inflation has diminished severely the purchasing power of social security and pension payments.

The economic difficulties facing our elderly population are often accompanied by emotional, psychological and physical problems. Our system of mandatory retirement can result in ill health, increasing medical needs and other problems which have caused the aged to grow apart from much of the rest of society. These people who have a lifetime of valuable knowledge and experiences to share are being pushed into isolation. This isolation can be a wrenching and profound shock as families may fail to keep in touch, as no one seeks their advice or counsel, and as the few friends who do maintain a relationship begin to die off.

The tragedy of this isolation is, in my view, shared by our entire society. The skills, insights, moral force, and cultural heritage which the aged are so qualified to pass on are lost forever.

The legislation I am introducing today is designed to provide businesses with the economic incentives required to keep those older employees on the job who might otherwise be put out of work and to hire these experienced aged persons whose potential productivity is quite high. I believe that such an incentive is justified. The fiscal impact of this measure will be minimal in that the Federal dollars that are expended will be offset by decreased welfare and economic assistance outlays which would otherwise be necessary. Also, Government revenues would be increased as the gainfully employed individuals pay their fair share of taxes. By providing an economic initiative to businesses, they need not displace younger workers in order to employ the elderly.

I believe this measure can serve to stimulate necessary employment in our economy by putting to work elderly men and women who have a great deal to contribute and to do this in a fiscally responsible manner. We have instituted policies to stimulate capital investment by our Nation's businesses many times. It is time to stimulate their investment in programs to utilize the tremendous skills and experience of older workers who have many more productive years to give to our economy. We cannot allow these scarce resources to be wasted by forcing these men and women into disuse and isolation.

I urge speedy consideration of this measure as we put together a comprehensive and coherent economic package to restore stability and growth to our industry and businesses.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 131

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits against tax) is amended by inserting immediately before section 45 the following new section:

"SEC. 44B. CREDIT FOR EMPLOYMENT OF OLDER PERSONS.

"(a) IN GENERAL.—In the case of an employer, as defined in section 3401 (d), there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount determined under subsection (b).

"(b) AMOUNT OF CREDIT.—The credit allowed an employer by subsection (a) for any taxable year shall be an amount equal to the increase in his cost of doing business during such year which results from the employment of older persons as determined under regulations prescribed by the Secretary. For purposes of this subsection, any expenditure made by an employer in the conduct of his trade or business (including insurance premiums, contributions to pension funds, contributions to medical costs, contributions to workmen's compensation funds, and any other trade or business expenses, including the increased cost of training an older worker and increased cost of maintaining an

increased medical and nursing staff necessary where older persons are employed, within the meaning of section 162), whether attributable to an individual employee or to the employees of such employer generally, shall be considered an increase in the cost of doing business which results from the employment of older persons to the extent that it would not have been required or made if the age of each employee involved were the lowest age at which an employee could reasonably (and consistently with the sound operation of the trade or business) be hired to perform substantially the same duties (and no factor other than age were taken into account).

"(c) CREDIT IN ADDITION TO DEDUCTIONS.—The credit allowed by subsection (a) shall be in addition to, and shall not reduce or otherwise affect, any deduction which may be allowable under this chapter.".

(b)(1) The table of sections for such part IV is amended by inserting immediately before the item relating to section 45 the following new item:

"Sec. 44B. Credit for employment of older persons.".

(2) Section 6096(b) of such Code (relating to designation of income tax payment to Presidential Election Campaign Fund) is amended by striking out "and 44A" and inserting in lieu thereof "44A, and 44B".

SEC. 2. The amendments made by this Act shall apply only with respect to taxable years ending after the date of the enactment of this Act.

By Mr. INOUYE:

S. 132. A bill to authorize the Secretary of the Army to make available to the State of Hawaii through it to the Queen's Medical Center physical facilities not needed by the Army at Fort DeRussy, Hawaii, for the purpose of establishing a mental health clinic in such facilities; to the Committee on Armed Services.

Mr. INOUYE. Mr. President, the Division of Mental Health of the State of Hawaii operates a clinic in the Waikiki area of Honolulu. This location was ideal for reaching the many visitors to Waikiki as well as those who reside in the area, for, unfortunately, the reality of Waikiki does not equal the utopian dreams which many have of this area. One of the unhappy truths of Waikiki is the high cost of living or operating a business there. These expenses forced the mental health clinic to close its doors.

In the heart of Waikiki is an Army post, Fort DeRussy, which would be an ideal location for a new mental health clinic. I have been informed that the Department of the Army has no objection to the use of certain office space on this installation by the State of Hawaii for the mental health clinic. The only obstacle to the clinic is a provision in the law that restricts the use of Fort DeRussy. I am, therefore, introducing a bill to authorize the Secretary of the Army to make available to the State of Hawaii certain physical facilities not needed by the Army at Fort DeRussy for the purpose of establishing a mental health clinic.

This clinic is a much needed facility which will greatly expand the services by the Department of Health to the people and visitors of Hawaii. I hope my colleagues will act with all due consideration to approve this measure.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 132

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of the Army is authorized to make available to the State of Hawaii or through it to the Queen's Medical Center such physical facilities at Fort DeRussy, Hawaii, as he determines are not needed by the Army and which are adequate for the purpose of permitting the State of Hawaii or through it the Queen's Medical Center to establish and operate a mental health clinic for the residents of Hawaii.

(b) The physical facilities made available by the Secretary of the Army under authority of subsection (a) shall be made available without charge to the State of Hawaii or through it to the Queen's Medical Center but shall be subject to such terms and conditions as the Secretary determines necessary to protect the interests of the United States.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 133. A bill to amend the Public Health Services Act to provide for financial grants to States in order to insure the delivery of high quality health services for persons who have recently immigrated to the United States; to the Committee on Labor and Public Welfare.

Mr. INOUYE. Mr. President, today I am introducing legislation entitled "the New Americans Health Service Act of 1977."

The lack of adequate public health care for the approximately 4 million aliens residing in the United States concerns all Americans.

Immigrants often come from regions where exposure to communicable diseases—some of them rare in this country—is universal. For them, life in the United States, a new country, is made up of emotional and economic stress that complicates their health problems.

Unaccustomed to preventive health services, and painfully aware of the high costs of medical care, many immigrants do not seek aid until health problems have reached crisis proportions. This situation is not only a threat to the immigrants, but also inflict harm on uncounted thousands of Americans.

I am well aware of the problems arising from inadequate health care for these people. Resident aliens account for well over 6 percent of the population in my State of Hawaii. The rate of immigration in Hawaii as a percent of the population is more than twice as high as any other State.

Moreover, the immigrants and American Samoans represent the highest percentage of residents in Hawaii treated for leprosy, tuberculosis, pediculosis, underweight children, mental health, and congenital malformation.

As you may know, over 70 percent of our immigrants reside in six States. Thus, we have a situation in which a few States are being asked to bear a disproportionate share of a national responsibility.

Mr. President, the bill I am introducing is long overdue. It will bridge the gap that has arisen between the awesome health problems of recent immigrants, and the insufficient health care provided. It will provide health services, and links to those services, for people who desperately need them. And, by helping them, we help those more fortunate who have been here since birth, by maintaining a more healthy general environment.

It is our national policy to allow immigrants into this country. We should not desert them. I hope my colleagues will join me in recognizing the importance of this bill and will act to secure its early consideration and passage.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 133

Whereas the annual number of new (aliens) immigrants to the United States has increased by 33 per centum since 1965 and that there are now in excess of 4,100,000 (aliens) immigrants residing in our country, and;

Whereas the immigration policy of our Nation is established by the Federal Government but that the individual States are required to provide for the health needs of these future citizens, and;

Whereas during the transitional period these future citizens have many unique health needs and difficulties because of cultural, language, and religious differences, and;

Whereas it is found that in 1973, nearly 70 per centum of our (aliens) immigrants resided in six States because of their geographical location—

The Congress of the United States therefore finds that a situation exists in which a few States are being asked to bear a disproportional share of a national responsibility.

Accordingly, the Congress of the United States further finds that the Federal Government should assist the States in insuring and providing for high quality health services for all our new Americans.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "New American Health Services Act of 1975".

SEC. 2. Section 325 of the Public Health Services Act (42 U.S.C. 252) is amended to read as follows:

"NEW AMERICAN HEALTH SERVICES

"SEC. 325. (a) The Secretary is authorized to make grants to the individual States for the purpose of insuring high quality comprehensive health services for (aliens) immigrants residing in the United States through the establishment and support of—

"(1) health services projects;

"(2) counseling and educational programs, and;

"(3) related evaluation efforts.

"(b) From the sums appropriated to carry out the purposes of this part, the Secretary is authorized to allot proportions to the individual States based upon the number of (aliens) immigrants residing in the States, and on his evaluation of the urgency of providing health services to designated high impact areas.

"(c) No application for a grant under this subsection may be approved unless the Secretary determines that—

"(1) there exists a formal State plan for the provision of health services to (aliens) immigrants which has been submitted to and approved by the Secretary which—

"(A) designates—

"(i) a State planning and advisory council, to be responsible for submitting revisions of the State plan and transmitting such reports as may be required by the Secretary.

"(ii) except as provided in clause (3), the State agency or agencies which shall administer or supervise the administration of the State plan and, if there is more than one such agency, the portion of such plan which each will administer (or the portion the administration of which each will supervise); and

"(iii) a single State agency as the sole agency for administering or supervising the administration of grants under the State plan, except that during fiscal year 1976, the Secretary may waive, in whole or in part, the requirements of this paragraph;

"(B) describes—

"(i) the quality, extent, and scope of services being provided, or to be provided, to (aliens) immigrants under such other State plans for federally assisted State programs as may be specified by the Secretary, and;

"(ii) how funds allotted to the State in accordance with this section will be used to complement and augment rather than duplicate or replace services and facilities for (aliens) immigrants who are eligible for Federal assistance under such other State programs;

"(C) sets forth policies and procedures for the expenditure of funds under the plan, which, in the judgment of the Secretary, are designed to assure effective continuing State planning, evaluation, and delivery of services (both public and private) for (aliens) immigrants.

"(D) contains or is supported by assurances satisfactory to the Secretary that—

"(i) applications for such funds from other public or nonprofit private agencies, institutions, and organizations will be seriously considered;

"(ii) such funds will be used to supplement and, to the extent practicable, to increase the level of funds that would otherwise be made available for the purposes for which the Federal funds are provided and not to supplant such non-Federal funds; and

"(iii) there will be reasonable State financial participation in the cost of carrying out the State plan;

"(E) provides that services and facilities furnished under the plan for (aliens) immigrants will be in accordance with standards prescribed by regulations, including standards as to the scope and quality of such services and the maintenance and operation of such facilities, except that during fiscal year 1976, the Secretary may waive, in whole or in part, the requirements for this paragraph.

"(F) provides that the State planning and advisory council shall be adequately staffed, and shall include representatives of each of the principle State agencies and representatives of local agencies and non-governmental organizations and groups concerned with health services for (aliens) immigrants: *Provided*, That at least one-third of the membership of such council shall consist of representatives of consumers of such services.

"(G) provides that the State planning and advisory council will from time to time, but not less than annually, review and evaluate its State plan approved under this section and submit appropriate modifications to the Secretary.

"(H) provides that the State agencies designated pursuant to paragraph (a) will make such reports, in such form and containing such information, as the Secretary may from time to time reasonably require, and will keep such records and afford such access thereto as the Secretary finds necessary to assure the correctness and verification of such reports.

"(I) describes the methods to be used to assess the effectiveness and accomplishments of the State in meeting the needs of (aliens) immigrants.

"(J)(i) provides for a statewide inventory of existing programs and facilities, and develops a survey of need including the assignment of priorities; and

"(ii) meets the requirements proscribed by the Secretary for furnishing needed services to persons made to pay therefore.

"(K) specifies the per centum of the State's allotment for any year which is to be devoted to construction or renovation of facilities, which per centum shall not be more than 25 per centum of the State's allotment or such lesser per centum as the Secretary may from time to time prescribe.

"(L) provides for such fiscal control and fund accounting procedures as may be necessary to assure the proper disbursement of and accounting for funds paid to the State under this part; and

"(M) contains such additional information and assurances as the Secretary may find necessary to carry out the provisions and purposes of this part.

The Secretary shall approve any State plan and any modification thereof which complies with the above provisions. The Secretary shall not finally disapprove a State plan except after reasonable notice and opportunity for a hearing to the State.

"(2) The State and area comprehensive planning agency designated under section 314 has approved such project.

"(3) Such projects are community based and whenever possible, are integrated with a wide range of public and private agencies.

"(4) Such projects are conducted in cooperation with the Department's Center for Disease Control.

"(5) There are adequate safeguards for the protection of the confidential nature of the doctor-patient and other surveyors of health service relationship.

"(6) The State shall insure that each applicant for State funds under this program:

"(A) has prepared a schedule of fees or payments for the provision of services, specified by the Secretary, designed to cover its reasonable costs of operating and a corresponding schedule of discounts to be applied to the payment of such fees or payments, which discounts are adjusted on the basis of the patient's ability to pay, which have been approved by the Secretary; and

"(B) has made and will continue to make every reasonable effort to secure from patients payment for services in accordance with such approved schedules: *Provided*, That in securing reimbursement for services to individuals who are entitled to insurance benefits under title XVII of the Social Security Act, to medical assistance under a State plan approved under title XIX of such Act or to assistance for medical expenses under any other public assistance program or private health insurance program, the applicant will collect reimbursement for the full amount of any fee or payment, without application of any discount; and

"(C) has submitted to the Secretary such reports as he may require to determine compliance with this paragraph.

"(7) there is provision for such accounting of financial controls as may be necessary to insure the proper disbursement of Federal funds; and

"(8) Federal funds made available under this part shall be used to supplement and not supplant the level of State, local, other non-Federal, or Federal assistance for which these projects might be eligible.

"(d) In making grants under this part, priority shall be given to those applicants who—

(1) demonstrate a capability to provide preventive health services such as, but not limited to:

"(A) dental services;

"(B) family planning services;

"(C) home health services;

"(D) nutritional services;

"(E) public health nursing services;

"(F) vision services;

"(2) provide procedures to identify and eliminate barriers for the effective delivery of health services to (aliens) immigrants.

"(e) For the purpose of this part, the term immigrant includes, but is not limited to, American Samoan.

"(f) Individuals who have resided in the United States for more than five years shall not be considered (aliens) immigrants for the purposes of this part.

"(g) There are authorized to be appropriated for the purpose of carrying out this part $50,000,000 for the fiscal year ending June 30, 1976; $70,000,000 for the fiscal year ending June 30, 1977, and $80,000,000 for the fiscal year ending June 30, 1978."

By Mr. BAYH (for himself, Mr. ABOUREZK, Mr. ANDERSON, Mr. BAKER, Mr. BELLMON, Mr. BROOKE, Mr. CHAFEE, Mr. CHURCH, Mr. CLARK, Mr. CRANSTON, Mr. DANFORTH, Mr. DECONCINI, Mr. DOLE, Mr. FORD, Mr. GLENN, Mr. GRAVEL, Mr. HART, Mr. HASKELL, Mr. HATFIELD, Mr. HATHAWAY, Mr. HUDDLESTON, Mr. HUMPHREY, Mr. INOUYE, Mr. JACKSON, Mr. JAVITS, Mr. KENNEDY, Mr. MAGNUSON, Mr. MATHIAS, Mr. MATSUNAGA, Mr. MCINTYRE, Mr. METZENBAUM, Mr. PACKWOOD, Mr. PELL, Mr. PROXMIRE, Mr. RANDOLPH, Mr. RIBICOFF, Mr. RIEGLE, Mr. SCHWEIKER, Mr. STAFFORD, Mr. STEVENSON, Mr. WILLIAMS, and Mr. ZORINSKY):

S.J. Res. 1. A joint resolution proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States; to the Committee on the Judiciary.

DIRECT POPULAR ELECTION OF THE PRESIDENT AND VICE PRESIDENT

Mr. BAYH. Mr. President, for more than a decade I and many of my colleagues have fought for enactment of a constitutional amendment to abolish the electoral college and to permit the American people to elect directly the President and Vice President. With the support of more than 40 Senators I am today introducing our proposal for electoral reform, and I am confident that the 95th Congress will pass this joint resolution by the necessary two-thirds vote and submit the direct election amendment to the several States for ratification. Many of my distinguished colleagues on both sides of the aisle are joining me in this bipartisan effort, and we intend to seek prompt action in the Senate this year. I will have more to say about the valuable role of so many of my colleagues in a moment.

Nothing is more important to the confidence of the American people in our political system and to the permanence and stability of our Government than the just and equitable selection of the President and Vice President. An overwhelming majority of the American people—more than 80 percent according to a Gallup poll—favor direct popular election. The American people look to us now to assure that in future elections their popular vote will elect the President without the present risk that the will of the people can be thwarted by

the faceless, undemocratic electoral college. This proposed constitutional amendment should wait no longer.

Only by sheer luck last November did we survive another round of electoral roulette with the popular will prevailing. A shift of about one-hundredth of 1 percent of the national popular vote—fewer than 10,000 votes—in two key States would have changed the outcome of the electoral college vote and would have denied the Presidency to President-elect Carter, even though he received a clear majority of the popular vote.

Three times in our history, in 1824, 1876, and 1888, the Presidential candidate who won the popular vote was kept from office because the popular will was subverted by flaws inherent in the archaic electoral college system. Indeed, in close elections, such as this election and the ones in 1960 and 1968, statistical studies have shown that there is only a 50–50 chance that the winner of the popular vote will also be the winner of the electoral vote. Stated another way, Mr. President, in close elections there is a 50–50 chance that the candidate who receives the most votes will not be elected President. That is, by simple definition, undemocratic. It is an affront to the principle of democracy—an affront which we tolerate, most ironically, only in the election of the two most important officials in our country. The confidence of the American people must no longer be suspended on such a narrow reed.

Mr. President, as members of this great legislative body, one of our weightiest responsibilities is to preserve and, when necessary, correct flaws in the Constitution of the United States for present and future generations of Americans. This duty must be fulfilled with the greatest of care and deliberation. It has happened, Mr. President, that as chairman of the Subcommittee on Constitutional Amendments for about 14 years, I have been involved in Senate passage of two constitutional amendments, as well as the proposed 27th amendment which has already been ratified by 34 States. But I do not take lightly the business of amending the Constitution. I do not propose to alter this nearly 200-year-old document casually. In fact, the long history of the study of electoral reform may very well establish this subject and the proposed direct election amendment as the longest considered and most carefully debated constitutional amendment in the history of our country.

For more than a century and a half, Mr. President, we have recognized the perils of a system that leaves the choice of President to a group of independent electors—electors whose freedom to disregard the will of the people is presently guaranteed by the Constitution. A Senate report published in 1826 caustically noted that the free and independent electors had "degenerated into mere agents in a case which requires no agency and where the agent must be useless if he is faithful and dangerous if he is not." Yet more than 150 years later we still are subjected to the grave risks that the popular will of the people can easily be thwarted, either by the strange arithmetic of the electoral system or by the mischievous deeds of a handful of power brokers.

More than a decade ago the Subcommittee on Constitutional Amendments began the current Senate study of electoral reform. Hearings on the election of the President began on February 28, 1966. In the following years the record of the subcommittee's hearings on electoral reform totaled nearly 2,600 pages. In September 1969, the House of Representatives approved a constitutional amendment for direct election by an overwhelming 339-to-70 vote. During Senate debate on Senate Joint Resolution 1 in 1970, we came within a handful of votes of breaking the filibuster which denied the American people even a vote on this crucial issue.

With this substantial history of study and debate, the Subcommittee on Constitutional Amendments plans to conduct further hearings in the early months of 1977.

Mr. President, it is gratifying that so many of my distinguished colleagues in the Senate have joined in the support of this proposal. Many have made major contributions to this effort over the years and richly deserve to be recognized. Unfortunately I cannot take the time now to recite by name the many distinguished colleagues who have contributed to Senate Joint Resolution 1 which we introduce today. Many of them, however, are cosponsors of this resolution. In particular, though, I wish to thank the distinguished majority leader, Senator BYRD of West Virginia, who in 1970 cast his first vote ever in support of cloture in the U.S. Senate in an effort to allow a vote on this important matter. The distinguished minority leader, Senator BAKER of Tennessee, long has been a strong supporter and a cosponsor of this resolution and was one of the first to join actively in its support again in preparation for introduction in this Congress. I also wish to recognize the efforts of my distinguished colleague from Oklahoma, Senator BELLMON, who has fought for the direct election amendment for more than a decade.

The distinguished Senator from North Dakota, Mr. BURDICK, also has been a cosponsor and supporter and several years ago dramatically demonstrated that the direct election amendment, if passed by Congress, will face favorable receptions in the State legislatures by polling 8,000 State legislators and finding that of the 2,500 who responded, nearly 60 percent favored direct election. My distinguished colleague from Michigan, Senator GRIFFIN, also has supported and cosponsored the direct election amendment in the past, and a few years ago polled 4,000 legislators from the 27 States thought most likely to oppose direct election; and 64 percent of those responding endorsed direct election.

Many of my other colleagues deserve to be recognized for their contributions to the resolution which we are introducing today, and I hope we may give appropriate recognition to them as we continue to work together for passage of this proposal. In addition I should note that direct popular election has been publicly endorsed by an impressive array of prestigious national organizations, among them the American Bar Association, the United States Chamber of Commerce, the AFL–CIO, the United Auto Workers, the National Federation of Independent Business, the National Small Business Association, and the League of Women Voters—representing broad philosophical and nationwide support.

Mr. President, in past years, the Harris and Gallup polls have shown that 78 percent and 81 percent of the American people, respectively, favor direct popular election. The extent of this feeling—it is important to note—is nationwide and fairly evenly distributed throughout the country. To cite excerpts from one of Mr. Gallup's polls, the figures reveal that 82 percent of the people in the East, 81 percent in the Midwest, 76 percent in the South, and 81 percent in the West think direct popular election is both desirable and necessary.

Mr. President, resolutions very similar to Senate Joint Resolution 1 are being introduced in the House of Representatives with bipartisan support. The resolution which we are introducing today is identical to the resolution which was introduced last year, with only one exception which I believe improves the resolution and at the same time comports with the version that is most favored in the House. This proposal provides that in the unlikely event no candidate receives 40 percent of the popular vote, the President and Vice President will be elected in a runoff election between the two pairs of candidates receiving the highest number of votes. I have long favored this provision to the alternative of having the Members of Congress to select the President and Vice President if no candidate receives 40 percent of the vote. I believe that most of the public, as well as most Senators and organizations who have studied the issue, now agree that a runoff election is preferable.

It is time, Mr. President, that we in Congress take the action that a great majority of our constituents long have supported and for which many of our colleagues long have labored, and pass the direct election amendment.

Mr. President, I ask unanimous consent to print in the RECORD the text of the proposed amendment and a section-by-section analysis.

There being no objection, the bill and analysis were ordered to be printed in the RECORD, as follows:

S.J. RES. 1

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

"ARTICLE —

"SECTION 1. The people of the several States and the District constituting the seat of government of the United States shall elect the President and Vice President. Each elector shall cast a single vote for two persons who shall have consented to the joining of their names as candidates for the offices of Presi-

dent and Vice President. No candidate shall consent to the joinder of his name with that of more than one other person.

"SEC. 2. The electors of President and Vice President in each State shall have the qualifications requisite for electors of the most numerous branch of the State legislature, except that for electors of President and Vice President the legislature of any State may prescribe less restrictive residence qualifications and for electors of President and Vice President the Congress may establish uniform residence qualifications.

"SEC. 3. The persons joined as candidates for President and Vice President having the greatest number of votes shall be elected President and Vice President, if such number be at least 40 per centum of the whole number of votes cast.

"If, after any such election, none of the persons joined as candidates for President and Vice President is elected pursuant to the preceding paragraph, a runoff election shall be held in which the choice of President and Vice President shall be made from the two pairs of persons joined as candidates for President and Vice President who received the highest numbers of votes cast in the election. The pair of persons joined as candidates for President and Vice President receiving the greater number of votes in such runoff election shall be elected President and Vice President.

"SEC. 4. The times, places, and manner of holding such elections and entitlement to inclusion on the ballot shall be prescribed in each State by the legislature thereof; but the Congress may at any time by law make or alter such regulations. The days for such elections shall be determined by Congress and shall be uniform throughout the United States. The Congress shall prescribe by law the times, places and manner in which the results of such elections shall be ascertained and declared. No such election, other than a runoff election, shall be held later than the first Tuesday after the first Monday in November, and the results thereof shall be declared no later than the thirtieth day after the date on which the election occurs.

"SEC. 5. The Congress may by law provide for the case of the death, inability, or withdrawal of any candidate for President or Vice President before a President and Vice President have been elected, and for the case of the death of both the President-elect and Vice President-elect.

"SEC. 6. Sections 1 through 4 of this article shall take effect one year after the ratification of this article.

"SEC. 7. The Congress shall have power to enforce this article by appropriate legislation."

S.J. 1—DIRECT ELECTION OF THE PRESIDENT

SECTION-BY-SECTION ANALYSIS

Senate Joint Resolution 1 contains the now customary provisions that the proposed new article to the Constitution shall be valid as part of the Constitution only if ratified by the legislatures of three-fourths of the States within 7 years after it has been submitted to them by the Congress.

Section 1 of the proposed article will abolish the electoral college system of electing the President and Vice President of the United States and provide for their election by direct popular vote. The people of every State and the District of Columbia will vote directly for President and Vice President. This section will prevent a candidate for either office from being paired with more than one person. Candidates must consent to run jointly.

Section 2 provides that voters for President and Vice President in each state must satisfy the qualifications for voting for the cost numerous branch of the State legislature in that State. The term "electors" is retained, but instead of referring to the electoral college, the term henceforth will mean qualified voters, as it does in existing provisions dealing with popular election of members of Congress. This clause also will permit the legislature of any State to prescribe less restrictive residency requirements and is necessary in order to prevent invalidation of relaxed residency requirements already or hereafter adopted by the States for voting in presidential elections.

The Congress also will be empowered to establish uniform residency qualifications. This authority will in no way affect the provisions dealing with residency requirements in presidential elections adopted as part of the Voting Rights Act of 1970. The Voting Rights Act abolished residency requirements for voting in presidential elections and established nation-wide, uniform standards relating to absentee registration and absentee voting in presidential elections. The provision, moreover, will not modify or limit in any way existing constitutional powers of the Congress to legislate on the subject of voting qualifications, nor will it in any way limit the Supreme Court's decision in Dunn v. Blumstein, 405 U.S. 330 (1972), which held State residency requirements in excess of 30 days to be unconstitutional. The District of Columbia is not referred to in section 2 because Congress now possesses the legislative power to establish voting qualifications for the District under Article 1, section 8, clauses 17 and 18.

Section 2 is modeled after the provisions of article 1, section 2 and the 17th amendment to the Constitution regarding the qualifications of those voting for Members of Congress. As a result, general uniformity within each State regarding the qualifications for voting for all elected Federal officials will be retained. Use of the expression "electors of the most numerous branch of the State legislature" does not nullify by implication or intent the provisions of the 24th amendment that bar payment of a poll tax or any other tax as a requisite for voting in Federal elections. The Supreme Court, moreover, has held as well that a poll tax may not be enacted as a requisite for voting in State elections. Harper v. Board of Elections, 383 U.S. 663 (1966).

Section 3 requires that candidates obtain at least 40 percent of the whole number of votes cast to be elected President and Vice President. The expression "whole number of votes cast" refers to all valid votes counted in the final tally. The term "whole number" is consistent with prior expressions in the Constitution, as in the 12th amendment. Section 3 further provides that if no pair of candidates receives at least 40 percent of the whole number of votes cast for President and Vice President, then a run-off election shall be held in which the choice for President and Vice President shall be made from those two pairs of candidates who received the largest popular vote totals.

Section 4 embodies provisions imposing duties upon the Congress and the States in regard to the conduct of elections. The first part of this section requires the State legislatures to prescribe the times, places, and manner of holding presidential elections and entitlement to inclusion on the ballot—subject to a reserve power in Congress to make or alter such regulations. This provision is modeled in part after the similar provision in article 1 dealing with elections of members of Congress. States will continue to have the primary responsibility for regulating the ballot. However, the Congress will be empowered to deal with such situations as occurred in 1948 and 1964 if a State seeks to exclude a major party candidate from inclusion on the ballot.

Section 4 also requires that Congress shall establish the dates for the regular election and for the contingency of a run-off election, and such dates will be uniform throughout the country. In no event shall a regular election be held later than the first Tuesday after the first Monday in November. Congress shall also establish whatever later date it determines to be wise for the contingency of a run-off election, within the constraints imposed by the 20th amendment so that there may be orderly assumptions of office by the President and Vice President on the 20th day of January. This conforms to the present pattern of a constitutional requirement for electoral voting (Article II, section 1), to which Congress has responded by establishing uniform days for the election of electors (3 USC 1) and for the meeting and vote of electors (3 USC 7), respectively.

Section 4 further requires Congress to prescribe the time, place and manner in which the results of such elections shall be ascertained and declared. The mandatory language is comparable to the mandatory duties imposed upon the States to provide popular election machinery for Members of Congress. In implementing this section, Congress may choose to accept State certifications of the popular vote as it now accepts electoral vote certifications under the provisions of 3 USC 9–15. Federal enabling legislation will be required to provide the legislative details contemplated in the amendment.

Section 5 empowers Congress to provide by legislation for the death, inability, or withdrawal of any candidate for President or Vice President before a President or Vice President has been elected. Once a President and Vice President have been elected, existing constitutional provisions will apply. Thus, succession to the Presidency following the death of the President-elect would be governed by the 20th amendment, and filling a Vice Presidential vacancy would be governed by the procedures contained in the 25th amendment. Section 5 also empowers the Congress to provide by legislation for the possibility of the death of both the President-elect and Vice President-elect before the procedures of the 20th amendment or the 25th amendment have been completed.

Section 6 provides that the article shall take effect 1 year after ratification. Since legislation will be necessary to fully implement and effectuate the purposes of the proposed amendment, a reasonable period of time should be provided between the date of completion of ratification and the date on which the amendment is to take effect. This provision affords both the Congress and the States an adequate opportunity to legislate, but it does not foreclose the possibility of securing ratification in time for the proposed article to be in effect before the 1980 Presidential election.

Section 7 confers on Congress the power to enforce this article by appropriate legislation. The power conferred upon Congress by this section parallels the reserve power granted to the Congress by numerous amendments to the Constitution. Any exercise of power under this section must not only be appropriate to the enforcement of the article but must also be consistent with the Constitution.

Mr. JACKSON. Mr. President. I am again cosponsoring Senate Joint Resolution 1, Senator BAYH'S proposed amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States.

I am optimistic that we can encourage prompt action on this measure early in the 95th Congress. It is vital that the American people have confidence in their Government; and a selection of our President and Vice President in a fairer manner can help to do just that.

In the last three Presidential elections, in 1968, 1972, and 1976, electors have

cast their vote for a candidate other than the one selected with the most popular vote in the elector's State. In my own State of Washington, during the last Presidential election, an elector cast his ballot for Ronald Reagan—with every legal right to do so in Washington State—when those he was elected to represent had cast their popular vote for Gerald Ford. The electoral college is archaic and presents real opportunities for danger since 538 electors could decide the Presidency quite independently of approximately 140 million persons of voting age.

Of more concern is an election in which none of three candidates receive an electoral majority. Rather than the election being decided in the House of Representatives as called for in the Constitution, the electoral college could quite easily determine the Presidency before the matter ever reached the House by bartering among themselves. These dangers can be avoided simply by eliminating the electoral college.

There are other problems with the electoral college system. We have seen the election of a President—as in the Hayes-Tilden election—who had fewer popular votes than his opponent, thereby not being the first choice of the majority of voters. We see the use of the "winner-take-all" formula State by State wherein all of the State's electoral votes go to the winner of the popular vote without respect to the margin of victory. Essentially, all voters who did not vote for the candidate who wins the popular vote in his State are deprived of their full voting power. Such a vote is simply not "counted"; and, in fact, since all electoral votes of a particular State go to the candidate who has won the popular vote, it is "given" to the popular vote candidate.

I feel that the narrow margin by which Governor Carter defeated President Ford last November will motivate the 95th Congress to adopt this constitutional amendment. I support the amendment now as I have in the last three Congresses.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

Mr. HATHAWAY. Mr. President, it is with pleasure and a sense of urgency that I join Senator BAYH and a number of my distinguished colleagues in the introduction of Senate Joint Resolution 1. This proposal would amend the Constitution to require a direct popular election of the President and would eliminate the anachronistic and inherently undemocratic institution of the electoral college.

In this regard Mr. President, I ask unanimous consent that a weekly column of mine be printed in the RECORD.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

WHY YOUR VOTE DOESN'T COUNT

Most citizens assumed that the next President of the United States was elected on Tuesday, November 2, 1976 by popular vote. He wasn't.

The only votes that count were not cast until Monday, December 13, 1976 by the Electoral College, which is composed of Presidential electors who are chosen by direct vote in each state. And the result is not officially declared until January 6, 1977.

In fact, in that November election, the voters only determined who their presidential electors would be. The number of electors in each state is determined by the sum of its U.S. Senators and Congressmen. In addition, the District of Columbia is entitled to three electors, making an overall college total of 538 since there are 535 Congressmen and Senators.

In Maine, the presidential candidate winning each congressional district is theoretically entitled to the vote of the elector for that district, and the winner of the state's popular vote as a whole gets the two remaining electoral votes. In all other states, whichever candidate wins the plurality of votes throughout the entire state, however small that winning margin might be, is entitled to all of that state's electoral votes.

On Monday, December 13, 1976, the electors gathered in each state to formally cast their votes. Surprisingly, they were not under any legal or Constitutional obligation to cast their votes in accordance with the November popular vote in their states. But they were under a strong moral obligation, since they pledged to the voters who chose them that they would vote for a particular candidate.

On January 6, 1977, the votes of the Electoral College will be officially tabulated and Congress will officially declare the winner, who will be inaugurated and assume the duties of President on January 20, 1977.

Except for three occasions, the last of which happened in 1888—the candidate receiving the most popular votes has also received the most Electoral College votes. But in 1960, 1968, and this year, a shift of only a few thousand votes in a few key states would have given the election (by virtue of the Electoral College system) to the candidate who did not win the most popular votes. This potential for political catastrophe was dramatically pointed out this past election when a change of 7,000 votes in the states of Ohio and Hawaii could have given the election to Gerald R. Ford, despite Jimmy Carter's 1.7 million vote plurality. We face that same problem every time there is a particularly close presidential election. In that light, it is evident that the Electoral College, first created as an equalizer in our federation of large and small states, is capable of performing a very undemocratic act: electing a President who is not the choice of most of the voters.

There are two basic reasons why the authors of the Constituion adopted an Electoral College system. First, by providing for at least three electors to each state regardless of population, the college system was viewed as a way to give small states some protection against domination by large states. Secondly, the writers of the Constitution felt that the Electoral College approach placed the choice of the President in the hands of persons presumably able, as the mass of the people at that time were not, to become acquainted personally with the various Presidential candidates.

Neither of these arguments is valid today. If anything, the Electoral College system works against the interests of the voters in the smaller states such as Maine. Because the small states cannot offer larger amounts of electoral votes, candidates may concentrate their efforts on winning the bigger states to put them over the top. Under the present system, the smaller states are not always needed to win the presidential election in the electoral college, whereas the individual votes in these states would count equally with those in the larger states in a direct popular election.

On the second point, relying on a "back up" election system because the public is considered incapable of making a decision on who its leader should be clearly undermines the "one man, one vote" philosophy which is the bedrock of our democracy. Furthermore, today we have televised debates with a nationwide audience of millions, and campaigns during which candidates travel thousands of miles and make hundreds of personal appearances. If anything, most voters feel they know more than they care to about candidates by the time the election rolls around.

It is for these reasons that the Electoral College should be abolished. And when Congress reconvenes in January, I will propose a Constitutional amendment which would eliminate the Electoral College and establish a system whereby the President of the United States is determined by direct, popular election.

Mr. HATHAWAY. Mr. President, it has been demonstrated many times through public opinion polls and other means that the vast majority of our constituents favor an end to the electoral college and a beginning of real democracy.

For example, the Maine opinion poll conducted by WGAN–TV located in Portland, Maine, asked on Wednesday, November 3, 1976, "Should the President be elected by popular vote only and not by the Electoral College?"—1,404 individauls, or 91 percent, responded "Yes" and only 134, "No".

At the same time, I have heard from some constituents, and have reviewed a number of editorials in Maine newspapers which have suggested that the present system ought not be scrapped.

They question whether a new system of pure popular vote would work as well as the old one in generating a quick result and avoiding long court struggles. They point out that the popular vote route could lead to extended recounts involving tens of millions of votes, whereas the present system is inevitably one which produces only State-by-State controversies.

I think the most recent election demonstrates that the State-by-State aspects of the present system drastically increases the potential for a constitutional crisis and that the popular vote for the Nation as a whole is less likely to be within a close enough margin to justify recounts and court controversy.

In this regard, I call to the attention of my colleagues and recommend highly an article by Prof. L. Kinvin Wroth of the University of Maine School of Law titled "Election Contests and the Electoral Vote" which appeared in the Dickinson Law Review, Volume 65. The article was published in 1961 while Professor Wroth served as a teaching fellow at Dickinson School of Law.

In this article, Professor Wroth details the myriad pitfalls and potential for disaster inherent in the present system. He examines the legislative history of prior attempts by Congress to rationalize this system and describes the controversy of 1876 in which Samuel Tilden won an absolute majority of the popular vote, yet was deprived of victory which went to Rutherford B. Hayes due to partisan considerations by the Commission appointed to resolve the dispute.

Some of these difficulties were resolved by the Electoral Count Act of 1887. But a number of problems remained and are

yet ticking as potential constitutional time bombs. These include the possibility of conflicting determinations by state authorities as to which candidate is entitled to the individual States' electoral votes, conflicting certifications of that result, or the possibility for inordinate delay in the States resolving their disputes.

While these disputes would most likely be ultimately resolved by Congress, Professor Wroth properly points out that,

A President chosen in this way could never completely refute the charge that his title depended on a mistake or illegality in the election process.

The President could further be under greater disadvantage of being the second choice of the voters.

We have delayed this necessary change to our Constitution for over 100 years. Let us not delay it any further.

Mr. CLARK. Mr. President, I am pleased to join with Senator BIRCH BAYH in the introduction of Senate Joint Resolution 1. This proposed amendment to the Constitution will provide for the direct popular election of the President and Vice President of the United States. By eliminating the electoral college, Senate Joint Resolution 1 finally will place the crucial decision of selecting the leaders of our Nation where that decision belongs—directly in the hands of the American people.

Senator BAYH, long an advocate of election reform, has spearheaded the fight in Congress for change in the electoral system for many years. Under his able leadership, the resolution we are presenting today represents, in my judgment, the best possible procedure for electing the President and Vice President. Certainly, now is the best possible time for acting on this urgently needed and long-overdue reform.

The Nation has just elected a new President, and Jimmy Carter's margin of victory was 1.7 million in the popular vote count. Yet, under the present system, the electoral college easily might have returned the Presidency to Gerald Ford, who had received fewer popular votes.

The electoral college, of course, is proportioned by State, with each State allotted votes equal to its number of Senators and Representatives, with all States but Maine employing the "unit rule" or winner-take-all system. In the last election, a shift of only 8,354 votes—4,667 in Ohio and 3,687 in Hawaii—would have delivered the electoral college votes of those two States to Gerald Ford. Thus, by a vote of 270 to 268, the electoral college would have declared the people's second choice to be President of the United States. A shift of only one-hundredth of a percent of the 79.8 million votes cast would have been all that was necessary for a serious constitutional crisis to have ensued.

Fortunately, such a crisis was narrowly avoided, but 1976 was our third close call in the last 20 years. In 1960, John Kennedy was the winner with 100,000 popular votes. Yet, a shift of less than two-hundredths of a percent would have given the electoral college victory to Richard Nixon. In 1968, only a seven-hundredths of a percent switch was needed to deprive the popular vote winner of an electoral college majority.

Also of great concern are the effects of third-party candidacies under the electoral system. It was George Wallace's avowed intention in the 1968 campaign to gain enough votes in enough States to deny either major party candidate an electoral college victory. Under the Constitution, the election would have been thrown into the House of Representatives, where Wallace allegedly hoped he could play "power broker," pledging his States' votes to the candidate who would make the most concessions to him.

In the 1976 election, the independent candidacy of Eugene McCarthy might have caused a different result. McCarthy's votes, many of which might have gone to Governor Carter, probably were enough to cost the Governor 4 States with 26 electoral votes—my own State of Iowa, plus Maine, Oklahoma, and Oregon. If the courts had ruled McCarthy's name off the New York ballot, Ford might have achieved a narrow plurality there, too—winning in the electoral college by 12 votes.

How is it that we find ourselves saddled by a system with so many shortcomings? The electoral college was born out of a compromise developed by the Founding Fathers at the Constitutional Convention in 1787. On one side of the debate were those constitutionalists who believed in the power of individuals to choose their own leader. On the other side were those framers who feared the power of the electorate. A "Committee of Eleven," assigned to forge an agreement, settled on a compromise solution which imposed a layer of electors above the general voters; electors who would actually vote for the President.

Alexander Hamilton defended the arrangement in Federalist No. 68:

A small number of persons selected by their fellow citizens from the general mass, will be most likely to possess the information requisite to such complicated investigation.

By 1800, however, the idea of an independent elite, selected by the State legislatures to choose the President, became almost meaningless with the appearance of political party candidates. The parties more accurately reflected the desires of the electorate than did the electoral college. By 1826, in fact, a Senate report stated that the electors had "degenerated into mere agents in a case which requires no agency and where the agent must be useless if he is faithful and dangerous if he is not."

Pressure for reform of this system of Presidential election has grown over the past century and a half; yet. today, the electoral college still retains its constitutional role. In recent years, through the determined efforts of Senator BAYH and others, the movement to abolish the electoral college has gained momentum. Scores of resolutions have been introduced, a constitutional amendment debated by the Senate—and killed by filibuster, and an amendment passed by the House of Representatives by more than the required two-thirds majority.

There have been a number of alternative plans proposed to reform the electoral college system. While no system is without its shortcomings, I believe that Senate Joint Resolution 1 provides the best approach to reform because of its simplicity and its guarantee of direct voter participation in electing the President and Vice President.

Senate Joint Resolution 1 eliminates the problems caused by the electoral college, and provides safeguards to prevent candidates with less than a plurality of popular votes from being elected President. Implementation of direct elections would give every Presidential ballot equal weight in deciding the outcome, for votes would not be divided by State, and the unit rule would not prevail. The smallest States would no longer have the advantage of being guaranteed three electoral votes regardless of population. Nor would candidates be tempted to concentrate solely on the largest States with huge blocs of electoral votes. For, unlike the present system, direct election would mean that the "loser's" votes in each State would no longer be discarded. No voters, no States, no regions could be written off. For the first time, every vote would count—and count equally—in the election of the President.

Mr. President, the serious decline in voter participation in recent years is a complicated phenomenon. I doubt we could blame lower turnout on the electoral college. But giving each citizen an equal, direct role in Presidential elections could only serve to increase participation, in my judgment.

Presently, the Constitution requires that in the event no candidate achieves a majority in the electoral college, the election shall be decided in the House of Representatives. Senate Joint Resolution 1 would eliminate that possibility. However, Senate Joint Resolution 1 does provide that in the unlikely event that no candidate should receive a plurality of 40 percent, a runoff would be held between the two leading candidates within 30 days of the first election. Such a runoff would guarantee that the electorate rather than an anonymous group of electors or the House of Representatives, would make the final decision on the leadership of the Nation.

Of course, the electoral college still has its defenders. Some argue that we need the electoral college, with its guarantee of a minimum number of electoral votes for each State, to undergird our federal system. But direct popular elections would not displace State and local governments, or the Senate, with its equal apportionment by State, or the many other checks and balances upon which federalism depends. Certainly American federalism does not depend on interposing a State role between the people and the selection of their President. Besides, we think of ourselves principally as national citizens when choosing a President, not as residents of a particular State.

Others argue that with direct election, candidates would concentrate only on the large urban States, ignoring smaller States. I believe the opposite would be true, because candidates could no longer rely on the large bloc of votes in a

handful of States to send them to the White House.

Finally, it is said that direct election would foster vote fraud, forcing recounts in every precinct of the Nation in a close election. Presently, however, fraud in one or two States theoretically could swing an entire Presidential election in a close contest. And, as a matter of fact, vote fraud has diminished drastically in recent decades. Recounts in recent close State elections have caused a vanishingly small net shift of votes—an average of only five-hundredths of a percent. There has never been a Presidential election in which the popular vote was that close.

Mr. President, an overwhelming majority of the American people believe it is time to turn away from our archaic and potentially dangerous method for selecting national leadership. The public opinion polls consistently register 80 percent approval for reform of the electoral college.

My own State of Iowa is no exception. and the point was driven home most effectively when the Iowa Presidential electors met in Des Moines last month. Besides casting their electoral votes, the electors themselves passed a resolution urging congressional action to reform the electoral college system.

Mr. President, the electoral college system reminds me a great deal of rolling dice. We have been pretty lucky up to now. But one of these days those dice are going to come up "snake eyes"—with the people electing one person President, and the electoral college choosing another.

It is time to stop gambling with the future of the country.

Last week we convened in joint session for the counting of the electoral college votes by Vice President Rockefeller. I hope that was the last time we are called upon to perform that ceremonial function. Now is the time to act on Senate Joint Resolution 1, so that by 1980 the Presidency will be directly in the hands of American people.

Mr. SCHWEIKER. Mr. President, I am proud to again this year join the distinguished Senator from Indiana, Mr. BAYH, and many others, in cosponsoring Senate Joint Resolution 1, to provide for the direct election of the President and Vice President.

I have cosponsored this constitutional amendment every year since I entered the Senate in 1969. It is my hope that this year, with the extremely close 1976 election still fresh in our memories, the Congress can finally pass this crucial voting reform.

The need for reform of our electoral system grows with each election, as smaller and smaller percentages of Americans vote. The electoral college must be abolished if we are to restore confidence in our electoral system, and make sure that it truly reflects the will of the people.

Fortunately, our country has once again been spared the agony of having the electoral college dictate a President who did not receive the most votes in the general election. But a change of only one-hundredth of 1 percent of the popular vote in just two key States in the 1976 election would have changed the outcome, despite the 1.7 million vote plurality for President-elect Carter. We must eliminate the possibility of a candidate winning the popular election but losing the electoral college vote.

It is also important to increase the sense of personal participation by the voters in their role in selecting the President of the United States. The principle of one-man-one-vote is essential to our system of democratic government. Yet this principle does not apply under the existing electoral college unit rule, whereby the plurality winner in a State receives all the electoral votes in that State. In effect, each voter who casts a ballot for someone other than the plurality winner is disenfranchised. And the voters who help give a candidate an overwhelming victory in one State do not proportionally add to their candidate's nationwide margin of victory.

Too many citizens in our Nation have become discouraged and dissatisfied with our Government. Abolition of the electoral college will be a large step in increasing each citizen's sense of participation in his government.

The proposals in Senate Joint Resolution 1 are sound. They include a provision for a runoff election if no candidate receives at least 40 percent of the popular vote. This insures that the decisionmaking process will stay with the voters of this country.

Reform of the electoral college system has been advocated for decades, and debated in both the Senate and the House of Representatives for many years. After each Presidential election, there is a brief flurry of interest in reform, which unfortunately has died out as the country moves on to other business. It is my hope that this year, the Congress will finally enact this vital reform.

By Mr. BUMPERS (for himself and Mr. MORGAN):

S.J. Res. 2. A joint resolution proposing an amendment to the Constitution to provide that, except in time of war or economic emergency declared by the Congress, expenditures of the Government may not exceed the revenues of the Government during any fiscal year; to the Committee on the Judiciary.

BALANCED BUDGETS SHOULD BE CONSTITUTIONALLY REQUIRED

Mr. BUMPERS. Mr. President, polls taken during the recent Presidential campaign show that inflation is the economic issue most troubling to the American people. I personally agree with this assessment and believe that the swollen Federal budget deficits that have characterized fiscal policy in recent years are one of the major causes of this economic disease. Inflation, it has been said, is the cruelest tax, because it bears disproportionately on our elderly citizens most of whom must exist on fixed incomes that may or may not be subject to occasional adjustment for increases in the cost of living. Although inflation is no longer in the double-digit range, as it was for a time in 1974 and 1975, even the recession that we still seem to be experiencing has not reduced the basic inflation rate below about 6 percent.

Many politicians and economists are saying that the problem is solved, but a steady inflation rate of 6 percent is, to me, simply not tolerable. Although I am not prepared to subscribe unreservedly to the monetary theories of Dr. Milton Friedman and others of his school, they do have a point. As the money supply goes up, the value of individual units of money must inevitably go down, unless productivity is rising at an equal rate. Thus, Federal budget deficits, which are necessarily financed simply by the printing of more money, have an inevitable inflationary effect. I believe it is time to put a stop to this ever-increasing spiral.

The Budget Act of 1974 was a giant step in the right direction, but the tremendous deficits run up during fiscal year 1975 and 1976 show, I fear, that the existing institutions of government are unwilling or unable to hold deficit spending down to a tolerable level. A constitutional amendment therefore seems the proper remedy.

A number of approaches to such an amendment have been made in recent years. In the 94th Congress, for example, the Senator from Nebraska (Mr. CURTIS) introduced Senate Joint Resolution 55. Under this proposal, a surtax would automatically be imposed to finance any budget deficit that was estimated for a given fiscal year. Senator TALMADGE and others, on the other hand, introduced Senate Joint Resolution 93 in the same Congress. Under this proposal, which I cosponsored, no budget deficit would be permitted except in time of war or national economic emergency declared by a concurrent resolution of both Houses.

The Subcommittee on Constitutional Amendments of the Committee on the Judiciary held a hearing on Senate Joint Resolution 55 and Senate Joint Resolution 93 on October 7, 1975, and I appeared at that time to testify in favor of the latter proposal. Unfortunately, although members of the Senate appearing at the hearing appeared favorably impressed, no action was taken to report either of these joint resolutions to the full Committee on the Judiciary for its consideration.

Mr. President, I am unwilling to give up the effort, difficult though it may seem, to restore a measure of fiscal responsibility to the Federal establishment. To be sure, there is hope that the new administration, soon to take office, will initiate steps in this direction, and I welcome such an initiative. This does not mean, however, that those of us in Congress who feel strongly about the matter should relax our vigilance. I am therefore introducing in the 95th Congress a proposed constitutional amendment modeled after Senate Joint Resolution 93 of the 94th Congress.

I ask unanimous consent that the text of the joint resolution be printed in the RECORD together with a table showing the surpluses—or surplus, I should say, since there was only one—and deficits for fiscal years 1965 through 1976 inclusive.

There being no objection, the joint resolution and table were ordered to be printed in the RECORD, as follows:

S.J. RES. 2

Resolved by the Senate and House of Representatives of the United States of America

in Congress assembled, (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States:

"ARTICLE—

"SECTION 1. Except as provided in section 2 of this article, the aggregate amount of expenditures made by the Government during any fiscal year shall not exceed the net amount of revenue received by the Government during that fiscal year.

"SEC. 2. The provisions of section 1 shall not apply to any fiscal year—

"(1) if at any time during that fiscal year the United States is in a state of war declared by the Congress pursuant to section 8 of article I of this Constitution, or

"(2) if, with respect to that fiscal year, the Senate and the House of Representatives agree to a concurrent resolution stating, in substance, that a national economic emergency requires the suspension of the application of section 1 for that fiscal year. In exercising its power under paragraph (2) of this section, the Senate and House of Representatives shall take into consideration the extent and rate of industrial activity, unemployment, and inflation, and such other factors as they deem appropriate.

"SEC. 3. The Congress shall have power to carry this article into effect by appropriate legislation.

"SEC. 4. This article shall take effect on the first day of the first fiscal year which begins after the date of its ratification.

"SEC. 5. This article shall be inoperative unless it is ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission to the States by the Congress.".

SURPLUSES AND DEFICITS

Year and surplus:	*Deficit*
1965	$1,600
1966	3,800
1967	8,700
1968	25,200
1969 $3,200	------
1970	2,800
1971	23,000
1972	23,200
1973	14,300
1974	3,500
1975	44,200
1976	65,600
197T	12,700

By Mr. CRANSTON:

S.J. Res. 3. A joint resolution relating to the withdrawal of all minerals in certain areas of the Los Padres National Forest, Calif., from all forms of appropriation under the mining law and from disposition under all laws pertaining to mineral leasing; to the Committee on Interior and Insular Affairs.

Mr. CRANSTON. Mr. President, I introduce for appropriate reference legislation to prevent mining on certain lands in the Los Padres National Forest, Calif.

Mr. President, a private company has filed an application with the Department of the Interior for a preference right lease to mine for phosphates in the Los Padres National Forest near the Sisquor and Sespe Condor Sanctuaries, about 50 miles north of Los Angeles. The same company already owns 15 gypsum mining claims in the same area.

The final environmental impact statement on the proposed preference right lease concludes that extensive environmental damage will occur should the lease be issued and the mining take place. A major adverse impact would be on the California condor, officially classified an endangered species by the Secretary of the Interior. Only about 60 condor remain and all can be found within the proposed mining area. According to the EIS, noise, air, and water pollution would disturb the condor's feeding and breeding habitats, causing an irreversible decline in the condor population.

In addition, the EIS spells out adverse impacts on other wildlife, aesthetics, recreation opportunities, soils, vegetation, and transportation and conflicts with the Ventura County general plan.

In my opinion, the economic benefits in no way justify the permanent environmental damage from the proposed mining. There is no overriding need to mine these particular mineral deposits. Adequate supplies of phosphates exist elsewhere in the United States to meet our current needs. Phosphate recycling, discovery of new sources, and reductions in phosphate use may eliminate any future demand.

The Secretary of the Interior is now considering whether to issue the preference right lease on the Los Padres National Forest. Although the potential for environmental danger is clear, there is a question as to whether the Secretary can deny the lease on the basis of environmental considerations or requirements of the Endangered Species Act of 1973. Under the Mineral Leasing Act of 1920, the Secretary must issue the lease if valuable mineral deposits are discovered. The U.S. Geological Survey has confirmed that the applicant has found valuable deposits of phosphates in the 2,434-acre area of the Los Padres National Forest.

The legislation I am introducing today terminates all mining in this area of the Los Padres National Forest. It covers not only the proposed phosphate mining, but also the mining of other minerals such as gypsum which exists in the same area of the forest.

Mr. President, I ask unanimous consent that the text of the resolution be printed at this point in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 3

Whereas an application has been filed with the Department of Interior for a preference right lease to mine for phosphates on 2,434 acres in the Los Padres National Forest, California, near the Sisquor and Sespe Condor Sanctuaries;

Whereas mining on 25 gypsum mining claims in the same area is also proposed;

Whereas the mining would create severe noise, air, and water pollution which would disrupt the sole feeding and breeding habitat of the California condor;

Whereas the California condor is officially classified as an endangered species by the Secretary of Interior;

Whereas the proposed mining would adversely impact other wildlife, air quality, soils, vegetation, scenic values, recreation, land use, and the Ventura County General Plan; and

Whereas there are adequate deposits of phosphates and gypsum elsewhere in the United States to meet our present needs:

Now, therefore, be it

Resolved by the Senate and the House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, all minerals in the following described area situated within the Los Padres National Forest, California, are hereby withdrawn from all forms of appropriation under the mining laws and from disposition under all laws pertaining to mineral leasing and all amendments thereto:

township 6 north, range 24 west, San Bernardino meridian:

section 1: lots 1, 2 (north half northeast quarter);

township 6 north, range 23 west, San Bernardino meridian:

section 5: south half southwest quarter;

section 6: southwest quarter northeast quarter, north half southeast quarter, north half southeast quarter, west half (lots 3, 4, 5, 6, 7, southeast quarter northwest quarter, east half southwest quarter);

section 7: south half northeast quarter, northeast quarter southeast quarter, northwest quarter (lots 1, 2, east half northwest quarter);

section 8: all;

section 9: southwest quarter, south half southeast quarter;

section 15: north half;

section 16: north half north half, southeast quarter northeast quarter; and

section 17: north half northeast quarter, northeast quarter northwest quarter.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S.J. Res. 4. A joint resolution establishing the Hawaiian Aboriginal Claims Settlement Study Commission, and for other purposes; to the Committee on Interior and Insular Affairs.

Mr. INOUYE. Mr. President, in December 1975, I introduced a joint resolution to establish the Hawaii Native Claims Settlement Study Commission. This resolution was referred to the Senate Interior and Insular Affairs Committee and was favorably reported out in the closing days of the 2d session of the 94th Congress. Unfortunately, with the press of other business, the Senate was unable to consider Senate Joint Resolution 155 further before adjournment. It remains a very important proposal, however, and I introduce it today in the hope that we may achieve early action in the 95th Congress.

Mr. President, the full repair of this injury is still the unfinished business of this Government. I am therefore reintroducing to the Senate a joint resolution which expresses the sense of the Congress that wrongful acts were committed by agents of the Government of the United States and, by which acts, dominion over the people and the kingdom of Hawaii and domain over the lands formerly owned in common by the Hawaiian Natives were acquired by the United States.

In the year 1893, the U.S. Minister accredited to the independent Kingdom of Hawaii, and the naval representative of the United States in Hawaii, acting wholly without the authority or knowledge of the Congress or the President, unlawfully committed and deployed Armed Forces of the United States in support of the overthrow of the lawful

Government of Hawaii. This joint resolution acknowledges this wrongdoing on the part of representatives of the Government of the United States and the need to make reparation to the native Hawaiian people. It recognizes the validity of claims against the United States by native Hawaiian people based on the 1893 incident and establishes a Hawaiian Native Claims Settlement Study Commission to conduct a study of the culture, needs, and concerns of the Hawaiian Natives; the nature of the wrong committed against, and the extent of the injuries to, the Hawaiian Natives by reason of the 1893 incident; and various means to remedy such wrong. The proposed study commission would submit a report of its findings to the Congress and recommend remedies to repair the wrong perpetrated against the Hawaiian Native people.

As noted in House Report No. 92–523 which accompanied the Alaska Native Claims Settlement Act of 1971.

Aboriginal title is based on use and occupancy by aboriginal peoples. It is not a compensable title protected by the due process clause of the Constitution.

That report went on to note that:

It has been the consistent policy of the United States Government in its dealing with Indian Tribes to grant them title to a portion of the lands which they occupied, to extinguish the aboriginal title to the remainder of the lands by placing such lands in the public domain, and to pay the fair value of the titles extinguished. This procedure was initiated by treaties in the earlier part of our history, and was completed by the enactment of the Indian Claims Commission Act of 1946. That Act permitted the Indian Tribes to recover from the United States the fair value of the aboriginal titles to lands taken by the United States (by cession or otherwise) if the full value had previously been paid.

The Indian Claims Commission has not been available to the Hawaiian Aboriginals. Except for the Hawaiian Homes Act of 1920 under which the U.S. Government designated 189,000 acres of Territorial, not Federal land, for the Hawaiian people, no action for restitution has been taken. No moneys were provided even for the administration of the Hawaiian Homes Act and today, some 57 years later only some 40,000 acres have been awarded to the Hawaiian natives and then only in the sense that those few Hawaiians receiving awards have been given legal squatters rights to the few acres of land awarded them. Additionally, much of that very limited land is unsuitable for either agriculture or home construction.

I was pleased to read clear recognition of the justification for redress in the report to the Senate on this bill by the Interior Committee. That report stated:

The Committee has examined the record of this historic, well-documented affair. The overthrow of the Hawaiian Kingdom is a dark chapter in American diplomatic and military history, made darker still by the long failure of the Congress to recognize the wrong that was done and to fashion a means for making reparation. The case for recognition of a validity of the Hawaiian Native claims is compelling. It is time for the Congress to vindicate the honor and sense of justice of the United States.

Some amendments to my original resolution were made by the Senate Interior Committee. The purpose of the resolution as reported by the committee remains to establish a Commission to determine suitable remedy for the wrong inflicted by representatives of the U.S. Government. The measure as reported and here introduced, recommends that a majority of the Commission be Hawaiian Natives of various degres of Native blood; insures that each of Hawaii's counties is represented on the Commission; insures that at least four members shall be conversant with Hawaiian Native culture, history or language and one member knowledgeable concerning Federal and State laws affecting Hawaiian Natives. The resolution as amended, provides that the legislation shall not be construed as authorizing suits against the United States or any of its officers or as precedent for reopening any past settlement involving any Native organization. The resolution, however, does not predetermine any fixed or maximum amount of compensation that the Commission may recommend to the Senate as justifiable compensation.

Instead, the joint resolution calls for the establishment of a Commission within 60 calendar days of enactment and a final report to be delivered to the Senate within 1 year from the date the legislation is approved.

The only limitations on the Commission are that its recommendations shall include:

a. Not direct grants but innovative uses of appropriate funds for loans or guarantees to or for Hawaiian Natives;

b. the provision of land including surplus Federal land;

c. the preservation and enhancement of Hawaiian Native culture and education of Hawaiian Natives;

d. the blood quantum requirements for eligibility to receive benefits; and,

e. the form or forms of organization best suited to receive, distribute, or administer the benefits.

I enthusiastically endorse the committee's amendments which will establish by means of this joint resolution a clear statement that a wrong has been committed; that such wrong has never been redressed and further to establish a vehicle in the form of a Hawaiian Aboriginal Claims Settlement Study Commission for the purpose of recommending to the Congress the extent of our unmet obligation and the means by which that obligation can be met.

There are some who are active in Hawaiian Native affairs who would like the Congress to move directly to award reparations to the Hawaiian people. Not all support the Commission approach but I believe it is the only approach which has any reasonable hope of adoption. Moreover, it is an approach which gives to the Hawaiian Native people a greater involvement in developing the means and nature of any redress than would be possible through direct legislation.

Mr. President, I request unanimous consent that the text of this joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 4

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled,

Whereas, in the year 1893, the United States Minister accredited to the sovereign and independent Kingdom of Hawaii, acting wholly without the authority or knowledge of the Congress or the President, unlawfully conspired with a small group of non-Hawaiian residents of that kingdom, including citizens of the United States, to overthrow the indigenous and lawful government of Hawaii; and

Whereas, in pursuance of such conspiracy, the United States Minister and the naval representative of the United States, also acting without authority, caused Armed Forces of the United States to be put ashore and deployed in support of the overthrow of such indigenous and lawful government; and the United States Minister thereupon extended diplomatic recognition to a provisional government formed by the conspirators without the consent of the people or of the lawful government of Hawaii, which provisional government was sustained solely by the Armed Forces of the United States; and

Whereas, on December 18, 1893, in a message to the Congress, President Cleveland did report fully and accurately on these illegal actions, which statement acknowledged that "by an act of war, committed with the participation of a diplomatic representative of the United States and without the authority of the Congress, the government of a feeble but friendly and confiding people has been overthrown", that "a substantial wrong has thus been done which a due regard for our national character as well as the rights of the injured people requires that we endeavor to repair", and that "the United States cannot fail to vindicate its honor and its sense of justice by an earnest effort to make all possible reparation"; and

Whereas a claim for repair of these wrongs to the Hawaiian people was presented to the Government of the United States of America by Queen Liluokalani, the lawful monarch of Hawaii and on July 15, 1893, a petition for redress was also presented by the Hawaiian Patriotic League, representing Hawaiian Natives; and

Whereas, in 1898, Hawaii was annexed to the United States, and by such annexation, among other things, the United States acquired ownership of vast landholdings that had been common property of the Hawaiian Natives prior to the overthrow of their indigenous government; and

Whereas some eighty-three years have now passed without the wrongs done the Hawaiian Natives having been repaired; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the Congress hereby declares that a wrong has been committed against the Native Hawaiians which the United States is obligated to endeavor to remedy; that no wrong such as this committed eighty-three years ago in far different circumstances to a specific people few of whom survive today can be fully rectified in this or future Congresses; that the Congress, however, is desirous of determining whether a suitable remedy for such wrong can be fashioned; and a commission of distinguished Hawaiian Natives and other citizens should be convened to advise the Congress on all matters pertaining to such remedy.

SEC. 2. (a) There is hereby established the Hawaiian Native Claims Settlement Study Commission (hereinafter referred to as the "Commission").

(b) (1) The Commission shall be composed of eleven members appointed by the President, of whom six shall be from a list of not less than twelve names submitted to the President by the Governor of Hawaii. Six of the members shall be of the blood of Natives

of the Hawaiian islands prior of the counties of Hawaii, Honolulu, Kauai, and Maui shall be of one-half degree or more of Native blood, two of whom shall be of one-quarter or more degree of Native blood, and two of whom shall be of any degree of Native blood. Each of the counties of Hawaii, Honolulu, Kauai, and Maui shall be represented on the Commission by a member of Native blood who is an inhabitant thereof. At least four members shall be conversant in Hawaiian Native culture, history, or language and one member shall be knowledgeable concerning Federal and State laws which are addressed to or significantly affect Hawaiian Natives.

(2) The Commission shall elect a Chairman and Vice Chairman from among its members.

(3) Six members of the Commission shall constitute a quorum, but a smaller number, as determined by the Commission, may conduct hearings.

(4) Vacancies in the membership of the Commission shall not affect the powers of the remaining members to execute the functions of the Commission and shall be filled in the same manner as in the case of the original appointments.

(5) Each member of the Commission shall receive $100 for each day such member is engaged in the actual performance of duties vested in the Commission. Each member shall be reimbursed for travel expenses, including per diem in lieu of subsistence, as shall be provided from time to time by regulations adopted by the Committee on House Administration of the United States House of Representatives.

(c) The first meeting of the Commission shall be called by the President within the sixty-calendar-day period following the date of the approval of this resolution.

(d) Subject to such rules and regulations as may be adopted by the Commission, the Chairman shall have the power to—

(1) appoint and fix the compensation of an executive director, a general counsel, and such additional staff personnel as he deems necessary, without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and without regard to chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates, but at rates not in excess of the maximum rate for GC–18 of the General Schedule under section 5332 of such title; and

(2) procure temporary and intermittent services to the same extent as is authorized by section 3109 of title 5, United States Code, but at rates not to exceed $100 a day for individuals.

(e) Each Federal department, agency, and instrumentality is authorized to furnish the Commission such data, reports, information, and other resources as the Chairman of the Commission may request.

SEC. 3. (a) The Commission shall, within one year from the date of the approval of this resolution—

(1) conduct a study of the culture, needs, and concerns of the Hawaiian Natives; the nature of the wrong committed against, and the extent of the injuries to, the Hawaiian Natives by reason of the actions set forth in the preamble of this resolution; and various means to remedy such wrong; and

(2) submit a report of its findings to the Congress.

(b) (1) The report required by this section shall provide recommendations for a remedy. Such recommendations shall include—

(A) the distribution, expenditures, investment, or other use of funds to be appropriated in equal increments over a period of years as a component of any such remedy: *Provided*, That emphasis shall be placed not on direct grants but on investment of funds by an Hawaiian Native organization or organizations and issuance of shares to Hawaiian Natives as stockholders therein, loans or guarantees of loans to or for Hawaiian Natives, or other innovative uses of the funds which will insure such moneys are employed successively for the benefit of Hawaiian Natives;

(B) the provision of land as a component of any such remedy through any method, including the surplusing of Federal land and amendments to the Hawaiian Homes Commission Act of 1920 (42 Stat. 109), except purchase or condemnation of lands by the Federal Government: *Provided*, That, should the surplusing of Federal lands be recommended as a component of any such remedy, the Commission shall propose a method or methods for resolving, whenever a tract of such land is offered, whether such tract shall be conveyed to the State under applicable law or the Hawaiian Natives under a subsequent Act to provide for such remedy;

(C) such other recommendations concerning the components set forth in clauses (A) and (B) of this paragraph as the Commission deems appropriate;

(D) the preservation and enhancement of Hawaiian Native culture and the education of Hawaiian Natives as principal purposes of any such remedy;

(E) the blood quantum requirements for eligibility to receive the benefits of any remedy and, if the Commission deems appropriate, to receive specific benefits or shares of benefits;

(F) the form or forms of organization best suited to receive, distribute, or administer the benefits of any remedy; and

(G) other matters concerning any such remedy, including but not limited to alienability and tax status of the benefits of any such remedy, provision of technical assistance to Hawaiian Natives on the use of such benefits, and the reporting of the disposition of such benefits to the Federal government and the Hawaiian Natives. (2) Any such recommendations shall, to the extent possible, be designed to insure that any such remedy—

(A) will be a final settlement which extinguishes all claims of Hawaiian Natives against the United States arising from the actions set forth in the preamble of this resolution;

(B) will be capable of prompt implementation with a minimum of litigation;

(C) will be in conformity with the real economic and social needs of the Hawaiian Natives;

(D) is fashioned and will be implemented with the maximum participation of Hawaiian Natives;

(E) will not create a wardship or trusteeship;

(F) will not replace or diminish any right, privilege, or obligation of the Hawaiian Natives as citizens of the United States or the State of Hawaii; and

(G) will not relieve, replace, or diminish any obligation of the United States or the State of Hawaii to protect and promote the rights and welfare of Hawaiian Natives as citizens of the United States or Hawaii.

SEC. 4. Upon the expiration of the sixty-day period following the submission of the report required by section 3 of this resolution, the Commission shall cease to exist.

SEC. 5. No provision of this resolution shall be construed as—

(1) constituting a jurisdictional act, conferring jurisdiction to sue, or granting implied consent to Hawaiian Natives to sue the United States or any of its officers with respect to claims arising from the actions set forth in the preamble of this resolution; or

(2) constituting a precedent for reopening, renegotiating, or legislating upon any past settlement involving land claims of, or other matters with, any Native organization or any tribe, band, or identifiable group of American Indians.

SEC. 6. There are hereby authorized to be appropriated such sums as are necessary to carry out the provisions of this resolution. Until such time as funds are appropriated pursuant to this section, salaries and expenses of the Commission shall be paid from the contingent fund of the Senate upon vouchers approved by the Chairman. To the extent that any payments are made from the contingent fund of the Senate prior to the time appropriation is made, such payments shall be chargeable against the authorization provided herein.

Amend the title so as to read: "Joint Resolution Establishing the Hawaiian Native Claims Settlement Study Commission, and for other purposes.".

SENATE RESOLUTION 25—SUBMISSION OF A RESOLUTION AMENDING RULE III OF THE STANDING RULES OF THE SENATE

(Referred to the Committee on Rules and Administration.)

READING OF THE JOURNAL

Mr. BUMPERS. Mr. President, under rule III of the Standing Rules of the Senate, the Journal of the preceding day must be read, and any mistake corrected, immediately after the presiding officer takes the chair at the beginning of each legislative day. The reading of the Journal may not be dispensed with or suspended without unanimous consent, and motions to correct or amend the Journal after it is read are privileged, must be proceeded with until disposed of, and are debatable.

The Constitution, article I, section 5, clause 3, requires each House to "keep a Journal of its Proceedings, and from time to time publish the same, excepting such Parts as may in their Judgment require Secrecy; and the Yeas and Nays of the Members of either House on any question shall, at the Desire of one-fifth of those Present, be entered on the Journal." Under rule IV, paragraph 1, of the Standing Rules of the Senate the proceedings of the Senate are to be "briefly and accurately stated on the Journal." Matters that must be entered include messages of the President in full, titles of bills and joint resolutions, such parts of bills as shall be affected by proposed amendments, every vote taken, and a brief statement of the contents of each petition, memorial, or paper presented to the Senate. In addition, paragraph 2 of rule IV requires:

The legislative, the executive, the confidential legislative proceedings, and the proceedings when sitting as a Court of Impeachment, shall each be recorded in a separate book.

The Journal, in other words, is a formal record of the Senate's proceedings. It is not a verbatim report, and in fact the Constitution does not require that a verbatim report be made or kept, though of course the CONGRESSIONAL RECORD, and before it the Annals of Congress and the Congressional Globe, have performed this function.

Since the CONGRESSIONAL RECORD is so complete and so readily available, with rare exceptions, on the day following a session of the Senate, there may really be no necessity for a Journal at all. The keeping of the Journal, however, is required by the Constitution, so nothing can be done about that, so far as an

amendment to the Senate rules is concerned. On the other hand, the details of rule III with regard to the reading of the Journal and the correction of it by motion were laid down by the Senate to begin with and are within the Senate's power to change as we see fit. Since the Journal contains messages of the President in full, parts of bills and joint resolutions that are affected by amendments, and every vote taken by the Senate, among other things, reading it in full can consume a considerable amount of time. As a matter of practice, the reading of the Journal is almost always dispensed with by unanimous consent, but it occasionally happens that a Member of the Senate, desiring to prolong proceedings for one reason or another, may object to dispensing with the reading, and if he does, the reading of the Journal must be continued until complete. A motion to approve the Journal before it is read, to dispense with the reading of the Journal, or to suspend the reading once it has begun, is not in order. In other words, if 99 Members of the Senate wish the reading of the Journal to be dispensed with, but one does not, the will of the one Member prevails.

Even after the Journal has been completely read, it is still possible to delay the Senate's progress toward legislative business by making motions to amend or correct the Journal. Such motions are privileged and must be proceeded with until disposed of, but they are also debatable. Occasionally motions are made to amend the Journal for purposes of delay. One tactic that has been used more than once, for example, is to amend the Journal by inserting the prayer given by the Chaplain of the Senate to open the prior day's proceedings.

Mr. President, the Journal is the official record of the Senate's proceedings, and it prevails in the event of inconsistency with the CONGRESSIONAL RECORD. It is not my purpose to detract from the status of the Journal or to degrade its importance as an official document. But a practice that permits one member of the Senate to require that the Journal, which is usually approved pro forma, be read in its entirety, and which then permits the same Member to make a series of motions to amend the Journal, each of which is debatable, can make this body look ridiculous. We claim to be the greatest deliberative body in the world, and all of us hope that the claim is just. So long as our rules permit frivolous quarrels over the official record of the previous day's proceedings, a record that is hardly ever referred to or used by the general public, the reality falls short of this claim.

I am today introducing for appropriate reference a resolution to amend rule III in two simple respects: first, it would be possible to suspend or dispense with the reading of the Journal by motion adopted by a majority vote, instead of simply by unanimous consent. Second, motions to dispense with the reading of the Journal, or to suspend its reading, or to amend or correct it, would not be debatable. Such motions are usually dilatory, in any event, and I cannot see that a great deal would be lost by requiring that such motions be determined immediately after they are made.

I urge my colleagues' favorable consideration of these modest amendments, and ask unanimous consent that the resolution be printed in full in the RECORD at the conclusion of these remarks.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

S. RES. 25

Resolved, that the second sentence of paragraph 1 of Rule III of the Standing Rules of the Senate be amended to read as follows:

"The reading of the Journal shall not be dispensed with or suspended unless by unanimous consent or on motion; and when any motion shall be made to suspend or dispense with the reading of the Journal, or deemed a privileged question, shall be proceeded with until disposed of, and shall be decided without debate."

SENATE RESOLUTION 26—SUBMISSION OF A RESOLUTION ENTITLED "STANDARDS AND CONDUCT RESOLUTION OF 1977"

(Referred to the Committee on Rules and Administration.)

Mr. BROOKE (for himself, Mr. ALLEN, Mr. CASE, Mr. CLARK, Mr. DANFORTH, Mr. HASKELL, Mr. LEAHY, Mr. JOHNSTON, Mr. MATHIAS, Mr. WALLOP, Mr. WEICKER, and Mr. HEINZ) submitted the following resolution:

S. RES. 26

Resolved, That this resolution may be cited as the "Standards and Conduct Resolution of 1977".

TITLE I—PROVISIONS RELATING TO THE SELECT COMMITTEE ON STANDARDS AND CONDUCT

MEMBERSHIP

SEC. 101. The first section of Senate Resolution 338, 88th Congress, agreed to July 24, 1964, is amended—

(1) by striking out "the President of the Senate" in the second sentence of subsection (a) and by inserting in lieu thereof "the Senate in accordance with the provisions of paragraph 1 of Rule XXIV of the Standing Rules of the Senate", and

(2) by adding at the end thereof the following new subsection:

"(d) (1) No Member may serve on the Select Committee for more than six years of continuous service.

"(2) Of the Members of the Select Committee—

"(A) one from the majority party and one from the minority party shall be Members who, at the time of appointment to the Select Committee, have served in the Senate for less than six years;

"(B) one from the majority party and one from the minority party shall be Members who, at the time of appointment to the select committee, have served in the Senate for less than twelve but more than six years; and

"(C) one from the majority party and one from the minority party shall be Members who, at the time of appointment to the select committee, have served in the Senate for twelve or more years.".

JURISDICTION AND FUNCTIONS

SEC. 102. Section 2(a) of Senate Resolution 338, 88th Congress, agreed to July 24, 1964, is amended—

(1) by inserting after "violations of law," in paragraph (1) "violations of any Code of Conduct applicable to Members of the Senate or officers or employees of the Senate,";

(2) by striking out "and" at the end of paragraph (3), striking out the period at the end of paragraph (4) and inserting in lieu thereof "; and ", and inserting after paragraph (4) the following new paragraphs:

"(5) examine all financial statements filed by Members of the Senate and officers and employees of the Senate under title II of the Standards and Conduct Resolution of 1977, and report to the Senate by a majority vote of the full committee any Member of the Senate or officer or employee of the Senate whom the select committee finds, after according to the individual concerned due notice and opportunity for hearing, has filed a financial statement containing any material false statement or fact, together with its recommendations for disciplinary action with respect to such filing;

"(6) report to the Senate by a majority vote of the full committee any Member of the Senate or officer or employee of the Senate whom the select committee finds, after according to the individual concerned due notice an opportunity for hearing, has failed to file a financial statement as required by such title II, or has failed to file a full and complete financial statement, together with its recommendations for disciplinary action to be taken with respect to such failure; and

"(7) investigate any matter disclosed by any financial statement filed under such title II which the select committee determines by a majority vote of the full committee could be the basis for an allegation under paragraph (1).".

INVESTIGATION OF COMPLAINTS

SEC. 103. Section 2 of Senate Resolution 338, 88th Congress, agreed to July 24, 1964, is amended by redesignating subsection (b) as (f), and by inserting after subsection (a) the following new subsections:

"(b) Each complaint filed with the select committee shall be in writing, shall be in such form as the select committee may prescribe by regulations, and except for a complaint filed by a Member of the Senate, shall be under oath.

"(c) (1) The select committee shall promptly conduct a full investigation of each complaint filed with it by a Member of the Senate and shall report to the Senate, as soon as practicable, the results of such investigation, together with its recommendations (if any) pursuant to subsection (a) (2).

"(2) If the select committee has not commenced an investigation pursuant to paragraph (1) of a complaint filed by a Member of the Senate within thirty days (not counting Saturdays, Sundays, and holidays) after receipt of such complaint, it shall be in order at any time thereafter for the Member who filed such complaint to move to proceed to the consideration of a resolution introduced by such Member directing the select committee to commence such investigation immediately. Any such motion shall not be debatable and no amendment to the motion shall be in order. If such motion is agreed to, debate on the resolution and all debatable motions and appeals in connection therewith shall be limited to not more than five hours, the time to be equally divided between and controlled by the majority leader and the minority leader or their designees. A motion to further limit debate shall not be debatable. No amendment to the resolution or motion to refer the resolution to a committee shall be in order.

"(d) The Select Committee shall promptly conduct a preliminary investigation of each complaint filed with it by any person who is not a Member of the Senate. If, as a result of such preliminary investigation, the Select Committee determines that there is no reason to conduct a full investigation, it shall report such determination to the Senate. If, as a result of such preliminary investigation, the Select Committee

determines that there is reason to conduct a full investigation, it shall conduct a full investigation, and report thereon, in the same manner as a complaint filed under subsection (c) (1) by a Member of the Senate.

"(e) Notwithstanding any other provision of this section, no investigation shall be made of any alleged violation of any law, Code of Conduct, rule, or regulation which was not in effect at the time the alleged violation occurred.".

DISQUALIFICATION OF MEMBERS IN CERTAIN PROCEEDINGS

SEC. 104. The first section of Senate Resolution 338, 88th Congress, agreed to July 24, 1964, is amended by adding after subsection (d) (as added by section 101 of this resolution) the following new subsection:

"(e) (1) A member of the Select Committee shall be ineligible to participate in any investigation relating to his own conduct and the determinations and recommendations of the Select Committee with respect thereto.

"(2) A member of the Select Committee, may at his discretion, disqualify himself from participating in any investigation pending before the Select Committee and the determinations and recommendations of the Select Committee with respect thereto. Notice of such disqualification shall be given in writing to the President of the Senate.

"(3) Whenever any member of the Select Committee is ineligible under paragraph (1) to participate in any investigation or disqualifies himself under paragraph (2) from participating in any investigation, the President of the Senate shall, subject to the provisions of subsection (d), appoint another Member of the Senate to serve as a member of the Select Committee solely for purposes of such investigation and the determinations and recommendations of the Select Committee with respect thereto. Any Member of the Senate appointed for such purposes shall be of the same party as the member who is ineligible or disqualifies himself.".

STAFF

SEC. 105. Section 3 of Senate Resolution 338, 88th Congress, agreed to July 24, 1964, is amended—

(1) by inserting after "fix the compensation of" in subsection (a) (7) the following: "counsel, assistant counsel, one or more investigators, and", and

(2) by amending subsection (b) to read as follows:

"(b) The Select Committee is authorized to retain and compensate counsel not employed by the Senate (or by any department or agency of the executive branch of the Government) whenever the Select Committee determines that the retention of outside counsel is necessary or appropriate to the investigation of any complaint or allegation which, in the determination of the Select Committee, is more appropriately conducted by counsel not employed by the Government of the United States as a regular employee.".

TITLE II—FINANCIAL DISCLOSURE REQUIREMENTS

DEFINITIONS

SEC. 201. As used in this title—

(1) the term "commodity future" means commodity future as defined in sections 2 and 5 of the Commodity Exchange Act, as amended (7 U.S.C. 2 and 5);

(2) the term "dependent" means dependent as defined in section 152 of the Internal Revenue Code of 1954;

(3) the term "immediate family" means (A) the spouse of an individual, (B) the child, parent, grandparent, grandchild, brother, or sister of an individual or of the spouse of such individual, and (C) the spouse of any individual designated in clause (B);

(4) the term "income" means gross income as defined in section 61 of the Internal Revenue Code of 1954;

(5) the term "Select Committee" means the Select Committee on Standards and Conduct;

(6) the term "security" means security as defined in section 2 of the Securities Act of 1933, as amended (15 U.S.C. 77b);

(7) the term "transactions in securities and commodities" means any acquisition, transfer, or other disposition involving any security or commodity;

(8) the term "political contribution" means a contribution as defined in section 301 of the Federal Election Campaign Act of 1971 (2 U.S.C. 431); and

(9) the term "expenditure" means an expenditure as defined in section 301 of the Federal Election Campaign Act of 1971 (2 U.S.C. 431).

INDIVIDUALS REQUIRED TO FILE REPORT

SEC. 202. (a) Each individual who for a period in excess of 90 days during a calendar year is—

(1) a Senator, or

(2) an officer or employee of the Senate and is compensated at a rate in excess of $20,000 a year,

shall file a report containing a full and complete financial statement for the preceding calendar year.

(b) Each individual described in subsection (a) who during any calendar year ceases to occupy an office or position described in such subsection shall file a report containing a full and complete financial statement for the portion of such year ending with the date on which he ceases to occupy such an office or position.

(c) Any individual who seeks nomination for election, or election, to the office of United States Senator shall file in any year in which such individual has—

(1) taken the action necessary under the law of a State to qualify for nomination for election, or election, or

(2) received political contributions or made expenditures, or has given consent for any other person to receive political contributions or make expenditures, with a view to bringing about such individual's nomination for election or election, to such office,

a report containing a full and complete financial statement for the preceding calendar year.

(d) The Secretary of the Senate shall submit annually to the Select Committee a complete list of Members, officers, and employees of the Senate who are required to file a report under this section and shall submit at the close of each calendar quarter a list of individuals who have begun or terminated employment with the Senate.

CONTENTS OF REPORTS

SEC. 203. (a) Each individual shall include in each report required to be filed by him under section 202 a full and complete statement, in such manner and form as the Select Committee may prescribe, with respect to—

(1) the amount and source of each item of income, each item of reimbursement for any expenditure, and each gift or aggregate of gifts from one source (other than gifts received from any member of his immediate family) received during the preceding calendar year which exceeds $100 in amount or value, including any fee or other honorarium received for or in connection with the preparation or delivery of any speech, attendance at any convention or other assembly of individuals, or the preparation of any article or other composition for publication;

(2) the fair market value and source of any item received in kind or aggregate of such items received from one source (other than items received in kind from any member of his immediate family), including, but not limited to, any transportation or entertainment received, during the preceding calendar year if such fair market value for such item exceeds $500;

(3) the identity and the category of value, as designated under subsection (b), of each asset, other than household furnishings or goods, jewelry, clothing, or any vehicle owned solely for the personal use of the individual, his sponse, or any of his dependents, held during the preceding calendar year which has a value in excess of $1,000 as of the close of the preceding calendar year;

(4) the identity and the category of amount, as designated under subsection (b), of each liability owed which is in excess of $1,000 as of the close of the preceding calendar year;

(5) the identity, the category of amount, as designated under subsection (b), and date of any transaction in securities of any business entity or any transaction in commodities futures during the preceding calendar year which is in excess of $1,000;

(6) the identity and the category of value, as designated under subsection (b), of any purchase or sale of real property or any interest in any real property during the preceding calendar year if the value of property involved in such purchase or sale exceeds $1,000;

(7) any patent right or any interest in any patent right, and the nature of such patent right, held during the preceding calendar year; and

(8) a description of, the parties to, and the terms of any contract, promise, or other agreement between such individual and any person with respect to his employment after such individual ceases to occupy an office or position described in section 202(a), including any agreement under which such individual is taking a leave of absence from an office or position outside of the United States Government in order to occupy an office or position described in section 202(a), and a description of and the parties with any unfunded pension agreement between such individual and any employer other than the United States Government.

An officer or employee of the Senate shall also include in such report the identity of any person, other than the United States Government, who paid such individual compensation in excess of $5,000 in any of the five years prior to the preceding calendar year and the nature and term of the services such individual performed for such person. The preceding sentence shall not require any individual to include in such report any information which is considered confidential as a result of a privileged relationship, established by law, between such individual and any person nor shall it require an individual to report any information with respect to any person for whom services were provided by any firm or association of which such individual was a member, partner, or employee unless such individual was directly involved in the provision of such services.

(b) (1) For purposes of paragraphs (3) through (6) of subsection (a), an individual need not specify the actual amount or value of each asset, each liability, each transaction in securities of any business entity or in commodities futures, or each purchase or sale required to be reported under such paragraphs, but such individual shall indicate which of the following categories such amount or value is within—

(A) not more than $5,000,

(B) greater than $5,000 but not more than $15,000,

(C) greater than $15,000 but not more than $50,000,

(D) greater than $50,000, but not more than $100,000, or

(E) greater than $100,000.

(2) Each individual shall report the actual amount or value of any other item required to be reported under this section.

(c) For purposes of paragraphs (1) through

(7) of subsection (a), an individual shall include each item of income or reimbursement and each gift received, each item received in kind, each asset held, each liability owed, each transaction in commodities futures and in securities, each purchase or sale of real property or interest in any real property, and each patent right or interest in any patent right held by him, his spouse, or any of his dependents within his control, or by him and his spouse or dependents jointly, or by any person acting on his behalf, except that no disclosure shall be required as to those items of the spouse and dependents of the reporting individual which represent their sole property and which are not in any way, directly or indirectly, past or present, derived from the income, earnings, investments, assets, dividends, property, holdings, or activities of the reporting individual.

FILING OF REPORTS

SEC. 204. (a) Each individual required to file a report under section 202(a) during any year shall file such report with the Select Committee not later than—

(1) May 15 of such year, or

(2) if later, the 30th day following the day on which such individual first fulfills the filing requirements of such section during such year.

(b) Each individual required to file a report under subsection 202(b) for a portion of a year shall file such report with the select committee on the last day he occupies an office or position described in section 202(a) during such year.

(c) Each individual required to file a report under section 202(c) shall file such report with the select committee not later than the thirtieth day following the day on which such individual first fulfills the filing requirements of such section during such year.

(d) The select committee may grant one or more reasonable extensions of time for filing any report but the total of such extensions shall not exceed ninety days.

(e) The select committee shall prescribe such rules and regulations as are required to carry out the provisions and purposes of this title.

PUBLIC ACCESS TO REPORTS

SEC. 205. (a) Except as provided in this section, the select committee shall make each report filed with it under this title available to the public within fifteen days after the receipt of such report, and shall provide a copy of any such report to any person upon a written or oral request.

(b) The select committee may require any person receiving a copy of any report under subsection (a) to supply his name and address and the name of the person or organization, if any, on whose behalf he is requesting such copy and to pay a reasonable fee in any amount which the select committee finds necessary to recover the cost of reproduction or mailing of such report excluding any salary of any employee involved in such reproduction or mailing. The select committee may furnish a copy of any such report without charge or at a reduced charge if it determines that waiver or reduction of the fee is in the public interest because furnishing the information can be considered as primarily benefiting the public.

(c) The select committee may refuse to permit a person to inspect a report filed with it under this title and to provide to such person a copy of such report, if it finds that there are reasonable grounds to believe that such person intends to use such report or copy—

(1) for any unlawful purpose;

(2) for any commercial purpose;

(3) to determine or establish the credit rating of any individual; or

(4) directly or indirectly in the solicitation of money for any political, charitable, or other purpose.

AMENDMENTS TO STANDING RULES

SEC. 206. (a) Paragraph 1 of rule XLIV of the Standing Rules of the Senate is amended to read as follows:

"1. Each individual who is required to file a financial statement under title II of the Standards and Conduct Resolution of 1977 during any calendar year shall file with the Comptroller General of the United States, in a sealed envelope a report containing a copy of the returns of taxes, declarations, statements, or other documents which he, or he and his spouse jointly, made for the preceding year in compliance with the income tax provisions of the Internal Revenue Code. Such report shall be filed not later than the date on which such individual is required to file a financial statement under such title II.".

(b) Paragraph 3 of such rule XLIV is amended to read as follows:

"3. Each individual who is required to file a financial statement under title II of the Standards of Conduct Resolution of 1977 during any calendar year shall file with the Secretary of the Senate, not later than the date on which such individual is required to file a financial statement under such title II, the accounting required by rule XLII for all contributions received by him during the preceding year, except that contributions in the aggregate amount or value of less than $50 received from any single source during the reporting period may be totaled without further itemization.".

EFFECTIVE DATE

SEC. 207. The provisions of this title shall take effect on January 1, 1977.

TITLE III—CODE OF CONDUCT

SEC. 301. Not later than 90 days after the date on which this resolution is agreed to, the Select Committee on Standards and Conduct shall recommend to the Senate, by report or resolution, a Code of Conduct for Members of the Senate and officers and employees of the Senate. In formulating the Code of Conduct, the Select Committee shall examine, among others, the following matters for possible inclusion:

(1) Annual public disclosure of financial affairs.

(2) Restrictions on, or the elimination of, outside income from honoraria, legal fees, gifts, and other sources of financial or in-kind remuneration.

(3) Conflicts of interest arising out of investments in securities or other sources.

(4) Official action and personal economic gain, including those circumstances, if any, under which a Senator should abstain from official action.

(5) Appropriate and accountable expense allowances.

(6) Employment or professional services after the termination of membership in the Senate.

(7) Congressional travel.

(8) The Separation of campaign funds from personal funds.

(9) Misuse of public funds regarding staff employment.

When it makes its report or resolution under this section, the Select Committee shall explain the inclusion or exclusion of provisions relating to these eight matters in the recommended Code of Conduct.

Mr. BROOKE. Mr. President, in recent years it has become increasingly apparent that a large segment of the American people has lost confidence in Congress as an institution. Indeed, according to one national survey taken last year, an appallingly low 9 percent of those polled gave Congress a favorable rating.

The causes for public disenchantment are many. But, in my judgment, a principal cause is the widespread belief that Congress has been unable or unwilling to investigate and, if necessary, discipline, those Members of Congress who have been accused of illegal or unethical conduct. For the truth is that while Congress is always more than eager to investigate members of the executive branch or the activities of the business community, it has been remiss in its constitutional responsibility to tidy up its own Houses.

In the wake of a number of congressional scandals in the mid-1960's, the Senate and the House of Representatives set up their respective Ethics Committees. It was a good idea then. And it still is. But the establishment of the Ethics Committees was meant to be only a start. Unfortunately, neither the Senate nor the House has learned the lessons of the past decade and consequently, little has been done to strengthen those committees.

The times demand that we respond now to the legitimate criticisms that have been leveled at our congressional disciplinary procedures. But a perfunctory response will not suffice. We must demonstrate to the American people our resolve, not just our rhetoric, to accomplish comprehensive reform. Just as the enactment of the Budget Reform Act in the last Congress demonstrated our commitment to fiscal discipline, we must now demonstrate our commitment to ethical discipline.

To help accomplish this end, I am introducing today a package of reform proposals. This legislation will have three principal purposes.

First, and perhaps most important, it would substantially amend the present procedural rules of the Senate Ethics Committee. Among other things the bill would limit membership on the committee to one term and provide a balance between veterans and younger members; broaden the jurisdiction of the committee; improve the complaint procedures; mandate thorough investigations and reports on the results of these investigations; and provide for additional staff, including, when necessary, the appointment of independent outside counsel.

This bill will give the Justice Department more time to investigate and prosecute violations of the election campaign law.

In light of the most recent revelations regarding possible congressional misconduct and the need to prevent future problems, I hope that the 95th Congress will address these issues promptly and thoroughly. Indeed, I hope that the Congress accords this type of legislation the highest priority. For, by demonstrating that it is willing and able to undertake such genuine fundamental reform, Congress will be well on the way to regaining the trust and confidence of the American people.

SENATE RESOLUTION 24—SUBMISSION OF A RESOLUTION RELATING TO THE TREATY POWERS OF THE SENATE

(Referred to the Committee on Foreign Relations.)

Mr. CLARK (for himself, Mr. KENNEDY, and Mr. CHURCH) submitted the following resolution:

S. RES. 24

Resolved, That this resolution may be cited as the "Treaty Powers Resolution".

PURPOSE, FINDINGS, AND DECLARATION

SEC. 2. (a) It is the purpose of this resolution to fulfill the intent of the framers of the Constitution and to ensure, through use of the rule-making and legislative power of the Senate, that no international agreement constituting a treaty will be implemented by the Senate without its prior advice and consent to ratification of that agreement.

(b) The Senate finds that—

(1) article II, section 2, clause 2 of the Constitution, empowers the President "by and with the advice and consent of the Senate to make treaties, provided two-thirds of the Senators present concur";

(2) the requirement for Senate advice and consent to treaties has in recent years been circumvented by the use of "executive agreements";

(3) the Senate may refuse to consider legislative measures to authorize or appropriate funds to implement those international agreements which, in its opinion, constitute treaties and to which the Senate has not given its advice and consent to ratification; and

(4) article I, section 5, clause 2 of the Constitution grants to the Senate plenary power to "determine the rules of its proceedings".

(c) The Senate declares that, under article II, section 2, clause 2, of the Constitution, any international agreement which—

(1) involves a significant political, military, or economic commitment to a foreign country;

(2) has not been expressly authorized by statute or treaty which takes effect prior to the date on which such agreement takes effect; and

(3) is not entered into pursuant to emergency circumstances which jeopardize the national security; should be submitted to the Senate as a treaty for its advice and consent.

ADVICE

SEC. 3. It is the sense of the Senate that, in determining whether a particular international agreement should be submitted as a treaty under section 2(c) of this resolution, the President should, prior to and during the negotiation of such agreement, seek the advice of the Committee on Foreign Relations.

CONSENT

SEC. 4. (a)(1) Where the Senate, by resolution, finds that any international agreement hereafter entered into which has not been submitted to the Senate for its advice and consent to ratification as a treaty, should be so submitted under section 2(c) of this Resolution, it shall thereafter not be in order to consider any bill or joint resolution or any amendment thereto, or any report of a committee of conference, which authorizes or provides budget authority to implement such international agreement.

(2) Any such resolution shall be privileged in the same manner and to the same extent as a concurrent resolution of the type described in section 5(c) of the War Powers Resolution is privileged under section 7 (a) and (b) of that law.

(3) This subsection shall not apply after such date as the Senate gives its advice and consent to ratification of such agreement as a treaty.

(b) Any (1) committee of the Senate which reports any bill or joint resolution, and (2) committee or conference which submits any conference report to the Senate, authorizing or providing budget authority to implement any such agreement, shall indicate in the committee report or joint statement filed therewith, as the case may be, that such budget authority is authorized or provided in such bill, resolution, or conference report.

ANNOUNCEMENTS OF HEARINGS

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. MUSKIE. Mr. President, on Friday, January 14, the Subcommittee on Intergovernmental Relations will hold a hearing to examine the current fiscal condition of the Nation's cities and the initial impact of the jobs bill on the cities' problems.

The hearing will focus on the countercyclical assistance program of aid to State and local governments where unemployment is the highest. Under this program—title II of the jobs bill—three quarterly payments have already been made to approximately 20,000 units of government throughout the country.

President-elect Carter has recommended an extension of the two major components of the jobs bill as part of his recently announced economic package. It is appropriate, therefore, that before we proceed with reenactment, we take a look at how these programs have worked thus far, and more particularly, at the impact they have had on our cities where the impact of recession has been most severe.

A tentative witness list for the hearing includes the following:

Mayor Kenneth Gibson of Newark, Chairman, U.S. Conference of Mayors.

Mayor Coleman Young of Detroit.

Mayor Pete Flaherty of Pittsburgh.

Mayor Lee Alexander of Syracuse.

The hearing will begin at 10 a.m. on Friday in room 1114 of the Dirksen Office Building.

COMMITTEE ON AGRICULTURE AND FORESTRY

Mr. TALMADGE. Mr. President, I wish to announce that the Committee on Agriculture and Forestry will hold a public hearing on the nomination of the Honorable ROBERT S. BERGLAND, of Minnesota, to be Secretary of Agriculture, at 10:15 a.m. on Tuesday, January 11, in room 322, Russell Senate Office Building.

COMMITTEE ON LABOR AND PUBLIC WELFARE

Mr. WILLIAMS. Mr. President, I wish to announce that the Committee on Labor and Public Welfare has scheduled a hearing on January 13, 1977, at 2:30 p.m., in room 4232 Dirksen Senate Office Building, on the nomination of Mr. Joseph A. Califano, of the District of Columbia, to be Secretary of the Department of Health, Education, and Welfare.

Persons wishing to testify or submit statements, please contact: Donald Elisburg, General Counsel, Senate Committee on Labor and Public Welfare, 4233 Dirksen Senate Office Building, Washington, D.C. 20510, 220–224–7664.

COMMITTEE ON LABOR AND PUBLIC WELFARE

Mr. WILLIAMS. Mr. President, I wish to announce that the Committee on Labor and Public Welfare has scheduled a hearing on January 13, 1977, at 10:30 a.m., in room 4232 Dirksen Senate Office Building, on the nomination of Dr. F. Ray Marshall, of Texas, to be Secretary of Labor.

Persons wishing to testify or submit statements, please contact: Donald Elisburg, General Counsel, Senate Committee on Labor and Public Welfare, 4233 Dirksen Senate Office Building, Washington, D.C. 20510, 202–224–7664.

COMMITTEE ON INTERIOR AND INSULAR AFFAIRS

Mr. JACKSON. Mr. President, I wish to announce for the information of the Senate and the public that the Committee on Interior and Insular Affairs will hold hearings on the proposed nomination of Gov. Cecil D. Andrus of Idaho to be Secretary of the Interior beginning on Monday January 17, at 10 a.m. in room 3110 of the Senate Dirksen Office Building.

Anyone wishing to testify on this proposed nomination should notify Mr. Patrick Berry of the committee staff at 224–3950.

APPOINTMENTS SUBSEQUENT TO SINE DIE ADJOURNMENT

Subsequent to the sine die adjournment of the Senate the following appointments were made:

COMMISSION ON POSTAL SERVICE

The PRESIDENT PRO TEMPORE, pursuant to the provisions of section 7(a)(1)(B), Public Law 94–421, appointed as members of the Commission on Postal Service the following from private life: James H. Rademacher and Rose Russell Blakely.

JOINT COMMITTEE ON ATOMIC ENERGY

The VICE PRESIDENT, pursuant to Public Law 79–585, and under the authority of Senate Resolution 584 of the 94th Congress, 2d session, appointed the Senator from New Mexico (Mr. DOMENICI) to the Joint Committee on Atomic Energy, in lieu of the Senator from New York (Mr. BUCKLEY), resigned.

NATIONAL TRANSPORTATION POLICY STUDY COMMISSION

The VICE PRESIDENT, pursuant to Public Law 94–280, and under the authority of Senate Resolution 584 of the 94th Congress, 2d session, appointed the Senator from Vermont (Mr. STAFFORD) to the National Transportation Policy Study Commission, in lieu of the Senator from New York (Mr. BUCKLEY), resigned.

ADDITIONAL STATEMENTS

SUMMARY OF SOCIAL SECURITY-RELATED LEGISLATION ENACTED INTO LAW IN THE 94TH CONGRESS

Mr. CHURCH. Mr. President, social security is clearly one of our Nation's most important institutions.

Nearly 33 million persons—one out of seven Americans—receive old-age, disability, or survivor cash benefits. Almost 25 million individuals are covered under medicare's hospital insurance and supplementary medical insurance programs. And approximately 4.3 million persons receive Federal supplemental security income payments, which are designed to build a Federal floor under the incomes of the aged, blind, and disabled.

In terms of sheer numbers, it is vitally important that these programs be sound from a policy, financial, and equity standpoint. Equally important, it is essential that they be administered fairly, efficiently, and impartially.

Over the years the Congress has taken important actions in establishing and perfecting these programs. During the 94th Congress several proposals were enacted to improve social security, medicare, and supplemental security income.

However, further actions are still needed for the 95th Congress, including strengthening the financing of social security, improving medicare coverage, and others.

The Social Security Administration recently prepared a short summary of major legislation enacted into law in the 94th Congress affecting social security, medicare, and SSI.

Mr. President, I commend this summary to my colleagues, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ENACTED SOCIAL SECURITY-RELATED LEGISLATION IN THE 94TH CONGRESS

Public Law 94–12 (H.R. 2166), "Tax Reduction Act of 1975," signed by the President on March 29, 1975.

Authorizes a $50 payment from general revenues to each social security beneficiary, supplemental security income recipient, and railroad annuitant or pensioner.

Provides for an income tax credit or rebate of 10 percent of earned income, excluding self-employment income, up to a maximum credit of $400. (P.L. 94–455 extended this credit through 1977.)

Public Law 94–44 (H.R. 6698) signed by the President on June 28, 1975.

Extends until June 30, 1976, the eligibility of certain SSI recipients for food stamps. (See P.L. 94–365.)

Public Law 94–114 (S. 1327) signed by the President on October 17, 1975.

Provides for the conveyance of certain U.S. lands and certain income produced by those lands to a number of Indian tribes and excludes any such income received from lands held in trust from being counted as income or resources for purposes of the SSI program.

Public Law 94–182 (H.R. 10284) signed by the President on December 31, 1975.

Removes the technical flaw in the Act which prevented increases in the Medicare part B premium.

Repeals section 1862(c) of the Act which provided that beginning January 1, 1976, Medicare would not pay for a covered service if such service was covered under a FEHB plan in which the beneficiary is enrolled.

Amends the economic index provision of P.L. 92–603 so as to provide that the prevailing charge for any physician's service in FY 1976 shall not be lower than the prevailing charge for that service in effect in FY 1975. (P.L. 94–368 provides that the prevailing charge for any period after FY 1976 shall not be lower than the charge in FY 1975.)

Extends until January 1, 1979, the Secretary's authority to waive for hospitals in rural areas the Medicare requirements that participating hospitals provide 24-hour nursing service.

Provides the Secretary with the authority to poll physicians in certain areas as to their preference for a local or Statewide PSRO.

Authorizes reimbursement from the hospital insurance trust fund for costs of hospital utilization review activities performed by a PSRO.

Extends until January 1, 1978, the period during which the Secretary may designate only physician organizations as PSRO's.

Provides that the 1973 edition of the Life Safety Code of the National Fire Protection Association will be used in Medicare's conditions of participation for skilled nursing facilities.

Directs the Secretary to study the appropriateness of reimbursement under part B for diagnostic professional services performed by optometrists on aphakic patients other than refractive services.

Public Law 94–202 (H.R. 10727) signed by the President on January 2, 1976.

Permits SSI hearing examiners to hear social security and Medicare cases until December 31, 1978.

Changes the time limitation in which a person can request a hearing after a claim for OASDI and SSI benefits has been denied.

Provides for annual reporting of social security earnings by employers beginning with earnings reported after 1977.

Requires the Secretary to give the States at least 18 months notice before any changes are instituted in the frequency of State deposits of social security contributions.

Permits West Virginia to modify its agreement with the Secretary to provide coverage for certain policemen and firemen for whom contributions were paid and wages reported erroneously.

Excludes as income for SSI purposes payments made by a State to its residents solely on the basis of duration of residence and age.

Public Law 94–241 (H.J. Res. 549) signed by the President on July 21, 1976.

Extends the OASDI (including Special Age-72 (Prouty) benefits) and SSI programs to the Northern Mariana Islands.

Public Law 94–331 (H.R. 10051) signed by the President on June 30, 1976.

Excludes for SSI purposes any support and maintenance received by an individual forced to leave his own home due to a national disaster occurring on or after June 1, 1976, and before December 31, 1976. Such support and maintenance would not be counted until the sixth month after the individual first received it. (P.L. 94–455 extended the exclusion until the 18th month after support and maintenance is first received.)

Public Law 94–365 (H.R. 14484) signed by the President on July 14, 1976.

Makes permanent the authority of the Secretary to repay a State directly for interim assistance paid by the State to an SSI applicant.

Extends until June 30, 1977, the eligibility of certain SSI recipients for food stamps.

Public Law 94–368 (H.R. 13501) signed by the President on July 16, 1976.

Provides that the prevailing charge for a physician service in any period after FY 1976 shall not be lower than the charge for that service in FY 1975.

Continues the updating of reasonable charge screens under part B on July 1 of each year rather than on October 1 which would have been the case in order to conform to the new fiscal year.

Delays until October 1, 1977, the implementation of the provision of the 1972 amendments dealing with the reimbursement of teaching physicians.

Public Law 94–375 (S. 3295) signed by the President on August 3, 1976.

Effective October 1, 1976, excludes from income and resources under the SSI program the value of assistance provided under several Federal housing programs.

Public Law 94–379 (H.R. 14514) signed by the President on August 10, 1976.

Permits the State of California to retain food stamp cash-out status.

Public Law 94–409 (S. 5), "Government in the Sunshine Act," signed by the President on September 13, 1976.

Amends the Freedom of Information Act thus further limiting the authority of the agency to withhold information collected in the administration of the Social Security Act from the public.

Public Law 94–432 (H.R. 14298), "Veterans Disability Compensation and Survivor Benefits Act of 1976," signed by the President on September 30, 1976.

Requires all Federal agencies to provide the Veterans Administration with information necessary to administer veterans programs.

Public Law 94–437 (S. 522) signed by the President on September 30, 1976.

Permits Medicare reimbursement to Indian Health Service facilities.

Public Law 95–455 (H.R. 10612), "Tax Reform Act of 1976," signed by the President on October 4, 1976.

Permits the States to use the social security number in the administration of any motor vehicle registration, driver's license, tax, or general public assistance law; makes it a misdemeanor to willfully, knowingly, and deceitfully use the social security number for any purpose.

Excludes from "employment" and covers as net earnings from self-employment remuneration received by certain fishermen.

Amends the provisions of the IRC affecting the social security coverage of self-employed U.S. citizens outside the U.S.

Excludes until the 18th month for SSI purposes any support and maintenance received by an individual forced to leave his own home because of a natural disaster occurring on or before June 1, 1976, and before December 31, 1976. (See P.L. 94–311.)

Extends the earned income credit provision through the end of 1977. (See P.L. 94–12.)

Public Law 94–460 (H.R. 9019) signed by the President on October 8, 1976.

Amends the definition and requirements of an HMO under Medicare to better conform with those of title XIII of the Public Health Service Act but makes no change in the services an HMO must provide Medicare beneficiaries.

Public Law 94–505 (H.R. 11347) signed by the President on October 15, 1976.

Establishes within HEW an Office of Inspector General with responsibility to direct, conduct, supervise, and establish policies dealing with audits and investigations of HEW programs and operations.

Public Law 94–540 (S. 1659) signed by the President on October 18, 1976.

Provides that funds awarded and distributed to the Ottawa Indians will not be counted as income or resources for SSI benefit purposes.

Public Law 94–563 (H.R. 15571) signed by the President on October 19, 1976.

Affects the coverage of individuals employed by nonprofit organizations where the organization failed to file a certificate electing coverage but paid the social security contributions and reported the earnings.

Public Law 94–566 (H.R. 10210), "Unemployment Compensation Amendments of 1976," signed by the President on October 20, 1976.

Provides for the referral of disabled and blind SSI recipients under age 16 for appropriate services.

Provides that an eligible SSI couple will have their income treated separately if one member is in a Medicaid facility for a full calendar month.

Preserves Medicaid eligibility for individuals who become ineligible for SSI payments because of cost-of-living increases in social security benefits in June 1977 and later.

Authorizes SSI payments to persons in publicly operated community residencies serving no more than 16 persons and excludes from income assistance based on need (including vendor payments) made to or on behalf of SSI recipients by State or local governments.

Disregards for purposes of determining the amount which the Federal Government

must contribute toward the cost of supplementary benefits provided by each of the three "hold-harmless" States any increases in Federal SSI benefits becoming effective after June 30, 1977, and before July 1, 1979. (See P.L. 94-585 for related amendment.)

Public Law 94-569 (H.R. 7228) signed by the President on October 20, 1976.

Excludes the value of a home in which an individual resides from the determination of the individual's resources.

Authorities the payment of SSI benefits for up to three months to presumptively blind applicants.

Public Law 94-581 (H.R. 2735), "Veterans Omnibus Health Care Act of 1976," signed by the President on October 21, 1976.

Clarifies the legal basis for reimbursement made by SSA for services furnished to Medicare eligible patients in certain Veterans Administration hospitals under sharing agreements with non-VA hospitals.

Public Law 94-585 (H.R. 13500) signed by the President on October 21, 1976.

Requires the States, as a condition for receiving Federal Medicaid funds, to maintain whatever supplements they have been paying when the Federal SSI level is increased beginning with SSI increases after June 1977; makes permanent hold-harmless protection for the three hold-harmless States.

MORALITY IN FOREIGN POLICY IS BEING STAUNCH IN OUR COMMITMENT TO THE REPUBLIC OF CHINA

Mr. GOLDWATER. Mr. President, on January 20 Jimmy Carter of Georgia will be sworn in as the 39th President of the United States. Among the many challenges and opportunities facing the new President is what course to steer in our relations with China. If the United States follows a course of extending the independence and freedoms of the Chinese people, as practiced in the Republic of China, we will advance the prospects of world peace and stability by helping the Chinese to harness their tremendous potential for economic and social progress. On the other hand, if we conduct our foreign policy from a position of supporting the dictatorship which controls the mainland of China and of ignoring the human rights of the Chinese people, then we will be hurt at home and in the way others view us.

Mr. President, the United States today legally and diplomatically recognizes the Republic of China, which is based on Taiwan, as the only China. Although we are exploring a policy of what is called the normalization of relations with the Chinese on the mainland, we have full diplomatic relations only with one China, the Republic. The fact that totalitarian Communists control by force some 850,000,000 unfortunate Chinese who live on the mainland has not been accepted as a reason for giving standing to the dictators as the lawful representative of the people whom they have enslaved.

It is only by continuing a clear policy, without change, of support for the mutual defense treaty and our official diplomatic relations with the Republic of China that we can have a moral foreign policy which represents what our people stand for, which is derived from adherence to our commitments, and which will convey strength around the world.

Mr. President, there are many reasons why the new administration should not be enticed with the possibilities of recognizing Red China or weakening our ties with the Republic of China. First of all, there is the value of our word, the willingness of the United States to be faithful to its commitments and not to betray its promises. The free Chinese on Taiwan have lived up to our expectations in every respect and supported the United States on all international issues of major importance. For us now to scrap our mutual defense treaty with a loyal ally would make our signature to other defense treaties worthless anywhere in the world.

President-elect Carter himself eloquently expressed the point I am making, when he stated in October that, insofar as we fail to be staunch in our commitments and give adequate attention to our allies, we are weak. Mr. Carter explained that "as far as the trust of our country among the nations of the world, as far as dependence of our country in meeting the needs and obligations that we have expressed to our allies, as far as the respect of our country even among our particular adversaries, we are weak"—when we depart from our principles and our commitments.

Another statement of President-elect Carter's confirms the need for continuing our official relations and defense treaty with the Republic of China. He has properly defined the standard for our country:

> We ought to be a beacon for nations who search for peace and who search for freedom, who search for individual liberty, who search for basic human rights.

Well, we cannot be those things if we cater to the totalitarian rulers on the Chinese mainland. We can hold firm to our basic principles only if we uphold the friendship and ties we have with the free people on Taiwan.

Mr. President, the Chinese people in the Republic of China are not only searching for freedom and individual liberty, they have achieved it and are constantly strengthening it. Taiwan is a land which allows free expression and free elections. Thirty-one daily newspapers and 1,400 magazines compete with 3 national television networks for the attention of audiences. Free world publications from foreign countries are openly circulated throughout the Republic.

On Taiwan, free education is extended to all. In fact, next only to the United States, the Republic of China has more school students per 1,000 population than any other country in the world. An independent court system exists on Taiwan and religion is freely practiced.

The advancement of human rights in Free China is matched by the economic progress of the people. From an island which was a predominantly agricultural area, Taiwan has become a major industrial power of the world. Not that agriculture has been slighted. To the contrary, the General Accounting Office has singled out the Republic of China as the model of how a developing nation can achieve tremendous success in food production with a system of economic incentives to private farmers.

In contrast, the performance of the Communist dictators on the China mainland depart in every instance from the principles of our Constitution's Bill of Rights and from every principle for which Americans have struggled throughout our history. The Chinese Communists are known to have executed several millions of landowners during the agrarian reform of 1949 to 1952. They are known to have conducted mass public trials at which more than 2 million political prisoners have been executed. They have by all knowledgeable accounts exterminated a minimum of 30 million people during their first decade of rule. Even today, the Red Chinese arbitrarily imprison over 16 million innocent political prisoners in labor reform camps, where they are subjected to the harshest of hard labor.

Moreover, there is no independent judiciary in Red China. There is no freedom of travel. There are no free elections, no freedom of the press, no free expression, no free trade unions.

And freedom of religious worship has been brutally suppressed by the Communists. Devotion to an almighty supreme being is persecuted and punished in Communist China. Millions of Protestants, Catholics, Moslems, and Buddhists have been intimidated, imprisoned, beaten, and murdered. Churches and religious buildings have been destroyed or converted into warehouses, stables, and the like. Missionaries have been forceably removed and religious schools, hospitals and orphanages outlawed. In fact, there is only one Roman Catholic cathedral and a single mosque still open in Peking, these for small numbers of visitors from foreign nations. To all purposes, for the first time in centuries there is no open practice of any religions in mainland China today.

Mr. President, it would be impossible for the United States to serve as a beacon for peoples who are searching for freedom and the most basic human rights if we should grant legitimacy to such an inhuman government. No; if our Nation is to hold forth a posture and an image to make us proud, we must not reward the lawlessness existing in Communist China.

A policy of retaining our official relations and defense treaty with the Republic of China would be in keeping with the wishes of the American people. If we follow the good judgment of ordinary Americans, we will preserve our commitment to Taiwan. The voice of the American people is loud and clear on this issue.

A Gallup poll of November 1975 revealed that 70 percent of Americans favor continuing our formal diplomatic relations with the Republic of China. The same majority of 70 opposed diplomatic relations with Communist China on the terms demanded by the so-called People's Republic.

A resolution introduced into the House of Representatives by a majority of that body also reflects the majority will of people in our country. This resolution urged the executive branch to do nothing to compromise the freedom of the Republic of China. Numerous petitions and official statements which have been adopted by local governments throughout the United States also uphold a policy of continuing diplomatic relations with free

China. So if we follow the true voice of the American people, if we tap their sound, common sense, we will adhere to our present policy of recognizing the Republic of China and maintaining the mutual defense treaty with Taiwan.

Mr. President, I am confident the Carter administration will not be beguiled by propaganda about the prospects of large-scale trade with Red China. This is a phony argument.

The real trade and commercial market in China is between the United States and the Republic of China based on Taiwan. In 1976, U.S. trade with Taiwan will reach $4.5 billion. Our erratic trade with Communist China will be only about $35 million. Our two-way trade with the Republic of China is 14 times larger than trade with Red China.

Nor is the potential for expanded trade with the Communist government encouraging. Thomas Corcoran, the distinguished attorney, businessman, and diplomat, has explained that:

As with all totalitarian nations, all trade with mainland China will be politically—not competitively—motivated. All such trade will be barter of advantages in political warfare. Totalitarian trade in commercial negotiations will pit competing and divided United States entrepreneurs against a monolithic totalitarian buyer and seller.

Dreams of commercial profit to U.S. firms are a "will-o'the-wisp." According to Mr. Corcoran:

Contrary to hopes of United States industry to do business with an indefinite mainland market, the takeover of Taiwan could directly solve many of Mainland China's economic problems without the cost of any of the imports from the western world from which American exporters and transporters could make a commercial profit.

And, as the American Chamber of Commerce in the Republic of China has concluded, the potential market for U.S. products in Red China "is limited to a few select product categories." The Chamber emphasizes that—

The absence of free choice by the consumer will restrict the ability of U.S. exporters to develop new markets for their products.

Thus, the opportunity for being staunch in our commitment to a dependable ally, for giving adequate attention to a friend, rather than an adversary, for not being beguiled by the stage management and rigged shows of Peking's tourist facade, and for gaining strength from doing what is right, will soon be squarely in the hands of Mr. Carter. The opportunity for keeping the 16 million Chinese on Taiwan free from enslavement by totalitarian communism and for preserving our friendship with the 20 million overseas Chinese who look to the Republic of China as their cultural homeland also will be Mr. Carter's shortly.

Mr. President, if Mr. Carter fulfills the great moral standards he has articulated for the Nation in the context of our relations with the free Chinese people, he will win the increased esteem of the American people and the respect of the entire world. On the other hand, if his administration caters to the Communist tyrants, it will disgrace the Nation and defeat human rights. I am confident that Mr. Carter will do the right thing.

HOME MORTGAGE DISCLOSURE ACT

Mr. PROXMIRE. Mr. President, last September 30, the first annual statistics compiled under the Home Mortgage Disclosure Act were made public by financial institutions in each of the Nation's metropolitan areas. These statistics have enabled municipalities, consumer groups, neighborhood associations, and newspapers to analyze and publicize the pattern of mortgage lending. In a great many areas, surveys of the data include that a disproportionate small volume of mortgage dollars are going to the older, low- and moderate-income neighborhoods of our cities.

Recently, the Cleveland Plain Dealer published one of the most exhaustive studies of mortgage lending using the information made available under the Home Mortgage Disclosure Act. One of the interesting facts revealed by the Plain Dealer is the wide variation among lending institutions. Apparently, a small number of lenders find it not only possible, but profitable, to keep the mortgage and home improvement dollars flowing to the older neighborhoods, and they are doing more than their share, while other lenders are active almost exclusively in the outlying suburbs.

I commend the Plain Dealer for an outstanding public service in disseminating this information, and I ask unanimous consent that the articles by reporter Thomas Andrzejewski be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Sunday Plain Dealer, Jan. 2, 1977]

PD SURVEY SHOWS HOME FINANCING FLED FROM THE CITY

(By Thomas S. Andrzejewski)

Intentionally or not, banks and savings and loan associations here have invested heavily in suburban residential mortgages, and placed few dollars in the city.

And when the number of conventional mortgages is compared to the number of houses, patterns emerge showing:

All-white or mainly white sections—with few exceptions—have received a far greater proportion of conventional mortgages than black sections. In one case, three white suburbs received nearly 87 times the proportion of conventional mortgages as a black section of Cleveland.

The suburbs average more than twice the mortgages for every 100 homes as the city—and more than three times those granted on the East Side.

Except for Cleveland Heights and University Heights, lenders have not been making many conventional mortgages in integrated suburbs.

The findings are part of a three-month Plain Dealer study into the lending practices in the residential real estate market.

The survey covers more than $1 billion in mortgages and home improvement loans made by banks and savings and loans for properties in Cuyahoga and western Lake counties.

The findings are based on information disclosed by lenders under the Home Mortgage Disclosure Act of 1975, a federal law aimed at stopping the practice of redlining, which is geographic discrimination in making home mortgage and improvement loans.

The information, from Cuyahoga, Lake and Lorain county lenders, was compiled by The Plain Dealer according to postal zip codes, and mainly covers periods of up to 18 months in 1975 and 1976.

None of the evidence proves or disproves that lenders engage in redlining or any other kind of mortgage discrimination.

But it shows that there is less conventional lending in older, poorer or integrated neighborhoods, which is one of the complaints of neighborhood groups here and in other cities.

Conventional mortgages are those which are not insured by any government program, such as Federal Housing Administration (FHA) or Veterans Administration (VA) loans.

The study does not indicate how many homes with four or fewer housing units were sold in Cuyahoga or western Lake counties in 1975 or 1976.

Nor does it contain any information about applications for conventional mortgages that were rejected.

But The Plain Dealer's study is the first comprehensive analysis of mortgages here, and an accurate reflection of mortgage activity as reported by lenders.

Lenders interviewed by The Plain Dealer took the position that they can only respond to a market—that is, they can only make loans in neighborhoods where there are home sales and where prospective buyers apply for mortgages.

But community group leaders, and some city officials, charge that some city neighborhoods are no longer attracting middle-income persons because they cannot obtain mortgages for houses in them.

To make fair comparisons among the patchwork of differing neighborhoods that span Cuyahoga and western Lake counties, The Plain Dealer compiled the numbers of residential structures of four units or less for each zip code. The data was collected in 1974 by Real Property Inventory.

The mortgage data applies to homes of four units or less—from one-family houses, to duplexes and doubles to four-suite houses and apartment buildings.

The number of conventional mortgages was then computed for every 100 homes in each zip code.

The big dollar totals for mortgages are overwhelming in the suburban zip codes, mainly because houses there are more expensive than in the city.

For example, there were $544 million worth of conventional mortgages made in the city and suburbs—the city's share being only $67 million, or 12.2%.

Of 19,193 conventional mortgages, 3,492, or 18.2%, were made in the city.

Significantly, the numbers of conventional mortgages per 100 homes varies greatly in various sections of the city and counties.

For example, as they are tracked from the core of the city to the outer suburbs, the ratio of mortgages gets greater.

Mortgages per 100 homes

Area:	
East Side	1.9
West Side	4.4
Total City	3.0
Inner Ring Suburbs	4.8
Middle Ring	6.5
Outer Ring	9.6
Western Lake	7.9
Total Suburbs	6.4
Total County	5.2

For purposes of the study, the city includes all zip codes that are mainly in Cleveland. The inner ring includes those zip codes touching the city, and the outer ring those touching the county borders. The middle ring is between.

The entire area examined has 360,172 homes, of which 116,676, or 32.4%, are in city zip codes.

In the parlance of urban experts and interlopers, the opposite of disinvestment, from which Cleveland suffers, is reinvestment. So last summer the city formed a reinvestment task force to bring together lenders, government and residents on the redlining issue.

Presently a committee of the task force is working on forming a mortgage consortium,

using community development block grant money, to boost mortgages in the city.

But members of the task force say that agreement on the issue—while made in principle—is still a month or two away.

Another solution aimed at preventing mortgage discrimination is a review panel recently established by Cuyahoga Plan of Ohio Inc. here.

The panel, made up of lenders and consumer credit groups, will review cases where redlining or racial discrimination is alleged, and if the prospective buyer is credit worthy, find a lender who would make the loan. It has just begun operation.

One member of the reinvestment task force said that one reason black neighborhoods have been receiving fewer conventional mortgages is that many blacks who have low or moderate incomes go first to the FHA or the VA because of the low down payment required.

He also said that lenders have found that many blacks apply for government-insured loans no matter how high their incomes may be and when they would otherwise qualify for conventional mortgages.

But groups like the Buckeye-Woodland Community Congress, which represents black, white and integrated neighborhoods, have maintained that whites and blacks are rejected for mortgages in some neighborhoods.

A study of Greater Cleveland mortgage applications by the U.S. comptroller of the currency, released in 1975, said that rejection rates for blacks were higher than for whites—26.6% for black and 16.2% for whites.

The study compared applications from whites and blacks in the same income groups.

A further analysis of the study by the Commission on Catholic Community Action showed that Spanish surnamed persons were rejected at a rate of 24.2%.

The study was made using data on 8,746 loan applications in Cuyahoga, Lake, Geauga and Medina counties from June to November of 1974.

The most extreme example of a low rate of mortgages in a black zip code found by The Plain Dealer was 44104, which covers the Central and Kinsman-Garden Valley neighborhoods. There were only 19 conventional mortgages there, or less than 0.3 per 100 houses.

Nearly 87 times as many were made in the 44022 zip, which includes Chagrin Falls, Moreland Hills and Hunting Valley. There was a total of 549 loans made there—33.2 per 100 houses.

The two zip codes in western Lake County showed great differences. The 44,092, or Willowick, zip code had only 2.4 mortgages per 100 houses—while 44094, Willoughby, had 19.1.

The largest average mortgage in a mainly residential community was in zip 44040, Gates Mills, and was $47,742. The smallest average mortgage was in 44103, which covers mostly the Superior-St. Clair neighborhoods, and was $8,677.

[From the Plain Dealer, Jan. 3, 1977]

MONEY FROM CITY BRANCHES BEING INVESTED IN SUBURBS

(By Thomas S. Andrzejewski)

Cleveland area banks and savings and loan associations have been investing savers' dollars outside city neighborhoods where many of them do the bulk of their business.

In fact, 82% of the conventional home mortgages made in Cuyahoga and western Lake counties were in the suburbs, according to a Plain Dealer study of home loans.

The study was made using information reported by lenders under the Home Mortgage Disclosure Act of 1975. The federal law was aimed at stopping redlining, the practice of mortgage discrimination against older neighborhoods.

Cleveland's banks, which do little mortgage business when contrasted with savings and loans, did 87% of their business in the suburbs.

All figures use numbers of mortgages, because the wide range of housing prices would make dollar comparisons unfair.

Values of the mortgages studied are $486.7 million in the suburbs and $67.3 million in the city.

Several lenders are found to have a poor balance between the percentage of their mortgages in given parts of Greater Cleveland and the proportion of their offices in those areas. That balance is normally to the detriment of Cleveland—that is, more offices in the city and fewer mortgages in the city.

Among the banks, the Cleveland Trust Co., Ohio's largest, made the smallest proportion of its mortgages in the city, considering the number of offices it has there.

Among the savings and loans, the lender with one of the smallest percentages in mortgages in the city when considering the number of its offices in the city is the First Federal Savings & Loan Association of Cleveland.

But three savings and loans had substantially better lending records in the city than the others when their number of offices in Cleveland is considered.

They are the Home Federal Savings & Loan Association of Lakewood, the Cleveland Federal Savings & Loan Associaton and the Peoples Savings & Loan Association.

Cleveland Trust made nearly 41% of the bank mortgages, or $24 million in the area studied.

Its record was below average. Twelve percent of its mortgages were made in the city, while it has 42% of its offices in Cleveland.

"I can't explain why we have 12% here and 88% there," said Fred J. Scism, senior vice president of Cleveland Trust, "other than that there was more sales activity in the suburbs of Cleveland.

"All of our branches are capable of taking loan applications with the intent of making a real estate loan," he said.

"Accusations can be made, but believe me, there is nothing deliberately being done in loan policy."

First Federal has 56% of its offices in Cleveland, but did only 21% of its mortgage business there.

Charles J. Koch, president of First Federal and president of the Northeastern Ohio Savings and Loan League, told The Plain Dealer that mortgages are made because a decent house is for sale and someone credit worthy want to buy it.

He said lenders do not rule out neighborhoods arbitrarily for home loans.

When asked whether they have a responsibility to put more conventional mortgage money into city neighborhoods to help keep them alive, Koch responded:

"Just throwing money at a problem doesn't work."

One suburban lender, the Home Federal Savings & Loan Association of Lakewood, made 23% of its mortgages in Cleveland—but has all its offices in suburbs.

Cleveland Federal made a larger percentage of its mortgages in the city than it has branches there, with only 12% of its offices in the city but 17% of its mortgages there.

Peoples has one of its three offices in Cleveland, at 4300 Clark Ave. SW. It made 44% of its home loans on the West Side.

Society National Bank had about twice the percentage of offices in Cleveland as the percentage of conventional mortgages it made in the city.

But that does not mean that city residents' deposits are being invested in the suburbs, said Arthur W. Wootton, Society National vice president and manager of the real estate department.

"I think we've done a good job," said Wootton. "After all, we are making loans with 10% down."

He said most of Society's mortgages are for new construction, and there is very little of that in the city. Also, he said, some Cleveland branches attract depositors at their place of employment—so suburbanites' money might be deposited in many city branches, especially downtown.

Stories in yesterday's Plain Dealer detailed how some sections of the city and suburbs—especially older ones with substantial black populations—have been receiving fewer conventional mortgages.

Stories today and yesterday are the result of a three-month computerized study of home loans by The Plain Dealer.

1975 LAW ENABLES SURVEY

The Plain Dealer's home loan survey was made possible by the Home Mortgage Disclosure Act of 1975.

Passage of the act, which had been sponsored by Sen. William Proxmire, D-Wis., was seen as a major victory for community groups fighting redlining, the geographic discrimination in making mortgages.

Last September, The Plain Dealer contacted Greater Cleveland banks and savings and loan associations to obtain copies of their disclosure statements, which were to be on file in lenders' offices by September 30.

The statements contain the number and dollar amounts of all government and conventional mortgages, home improvement loans and nonoccupant mortgages for all dwellings with four or fewer units.

All the institutions supplied copies.

There was major resistance to passage of the act, which originally was to include disclosure of deposits according to branches. The banking and savings and loan industries complained to Proxmire's committee on banking, housing and urban affairs that disclosure was costly, served no real purpose and would make public some secrets of competition. The provision was later removed.

Neighborhood groups have collected the disclosure statements on loans and have been working on them. Because of all the data included, The Plain Dealer used a computer to total and analyze it.

Organizations such as the Buckeye-Woodland Community Congress and the Commission on Catholic Community Action have not completed detailed studies of the data.

The city planning commission also collected the disclosures and is working on a study involving the entire city.

The Plain Dealer began to computerize the data in October. Programming was done by Roy R. Schinagle, research coordinator in the newspaper's market research department.

The result was hundreds of pages of printouts covering more than $1 billion in loans, showing patterns of residential lending.

While some Federal Housing Administration (FHA) and Veterans Administration (VA) mortgages are included in the Plain Dealer survey of home loans, the data provides only a partial picture of government-insured lending here.

The 1,193 FHA and VA mortgages for $52.6 million which were included in The PD survey are by no means all the government-insured loans made here in 1975.

Neighborhood groups say that in some sections of the city, government loans are the only ones being made.

Often such loans are either made directly by or sold to mortgage companies, which were not included in the survey. The survey included only banks and savings and loan associations because they are the only institutions here which fall under the Home Mortgage Disclosure Act of 1975.

A Cleveland disclosure ordinance, patterned after Chicago's and passed last year, was a result of Buckeye-Woodland pressure. It was sponsored by a councilman from Buckeye-Woodland.

Active Clevelanders Together, meanwhile, was trying, mostly unsuccessfully, to in-

timidate lenders into disclosing more loan information and investing more in older neighborhoods.

Its tactics included negotiation with lenders and bring savings and loan association executives to a community meeting where demands for more investment were presented.

The Buckeye-Woodland Community Congress secured a reinvestment agreement from State Savings & Loan Co. in December 1975.

Under the agreement, State Savings began a marketing program to attract home buyers in Buckeye-Woodland.

Last spring, Active Clevelanders Together signed a similar agreement for the near West Side with First Federal Savings & Loan Association of Cleveland.

Therefore, The PD survey will include no comparisons between conventional and government-insured loans nor any indication of the total housing turnover in a neighborhood or the entire county.

ACTION VARIES ZIP TO ZIP

Nearly 80% of the housing in a section straddling the Cleveland-Shaker Heights border consists of older frame houses, tightly packed on narrow side streets in integrated Cleveland neighborhoods.

But the conventional mortgages there seem to be going to the Shaker Heights portion, which has only about 20% of the housing in the entire section.

The section described above is postal zip code 44120.

The part of Cleveland in 44120 is known as Buckeye-Woodland, where the Buckeye-Woodland Community Congress has accused lenders of redlining.

The Plain Dealer's study shows there were about 3.5 conventional mortgages for every 100 houses in the 44120 area, which is more than in most East Side zip codes.

But the average mortgage is $32,559.

"The average loan we're talking about is more than the (total) cost of the average home in Buckeye-Woodland," asserted Diann M. Yambor, chairman of the congress' mortgage committee. "There isn't one over $35,000, and most are going for $16,000 to $28,000."

One interpretation, then, is that mortgages made in 44120 are mostly in Shaker Heights, one of the city's most affluent suburbs. It is also integrated.

"The age of housing and the ability to pay are not the only considerations used in making mortgages," said Harry A. Fagan, director of the Commission on Catholic Community Action.

Race of a buyer and location of a house are factors that highly influence lenders, Fagan charged.

"There are some things that don't appear on any form that are considered," he said.

Another zip code where citizen groups were active in the redlining issue is 44113, which takes in the near West Side.

The rate for conventional mortgages was slightly over 3 per 100 houses. But the average loan there was $12,229, indicating figures were not necessarily buoyed unrealistically by the Ohio City redevelopment.

The Rev. Kenneth E. Jones, president of Active Clevelanders Together (ACT), said his group has been studying the disclosure statements of several lenders on the near West Side. It found that lenders who provided 1976 and 1975 data made more mortgages last year, he said.

"I tend to believe that groups like ACT and Buckeye-Woodland have had a positive effect," he said.

One zip code that had fewer loans than expected was 44128, which includes Cleveland's Lee-Harvard and Lee-Seville-Miles neighborhoods, Warrensville Heights and North Randall.

It had 1.9 mortgages per 100 houses, one of the lowest city or suburban rates. All neighborhoods there are basically new. The obvious difference between them and similar sections of the city and the county is racial makeup. The city parts of the zip code are mostly black, and Warrensville Heights has a large number of blacks. North Randall is too small to be a significant factor in figuring the mortgage rate for the zip.

There was no comparison with actual numbers of blacks because accurate figures do not exist. The latest ones available are from the 1970 census, believed to be much outdated.

The city zip with the most mortgage activity was 44102, on the far West Side, just east of Lakewood. Its rate was nearly that of the suburbs, with 6.4 loans per 100 houses.

REDLINING WAS DEFINED WHEN CRITICS EMERGED

A prospective home buyer who meets credit qualifications for a mortgage has his application for the loan rejected—because of the neighborhood in which the house is located.

Or the interest rates, requirements for down payment or length of the mortgage are different from mortgages in suburbs.

Neighborhood groups call these practices redlining—geographic discrimination in making home mortgage or improvement loans.

Often the neighborhood is becoming integrated, and usually it is an older section of the city that is a little frayed at the edges or blighted.

An official of a lending institution may drive through the neighborhood and decide that it would be a risk to make a loan there.

That is how redlining takes place, say community groups.

Redlining has been a major issue among neighborhood groups here for the last two years.

It gained the attention of politicians and, not surprisingly, the lending community.

One of the main antiredlining organizations here is the Commission on Catholic Community Action, which has played a major role in organizing and financing neighborhood organizations.

It studied mortgages in Buckeye-Woodland and the near West Side to identify the extent to which mortgages were being made. The title of the study:

"You Can Bank On It: Redlining In Cleveland."

Neighborhood groups used the study to show redlining and to argue that city residents' deposits were being used to develop the suburbs.

Redlining had been an issue in other cities since 1969, when the Metropolitan Area Housing Alliance in Chicago began pushing for a disclosure ordinance.

City Council passed an ordinance requiring lenders who wanted to handle city funds to show their figures for deposits and mortgages in city neighborhoods.

In Cleveland, the Buckeye-Woodland Community Congress and Active Clevelanders Together have been involved in the redlining issue.

LENDERS BLAME MARKET FACTORS; DENY REDLINING

Home mortgage figures alone do not indicate whether a neighborhood is being denied such loans, said several lenders interviewed by The Plain Dealer.

But if the figures could, they would show that redlining does not exist, they said.

Charles J. Koch, president of the Northeastern Ohio Savings and Loan League, said the Plain Dealer study may show a lack of conventional mortgages in some neighborhoods. but not much else.

There are three things that have to work together to have a normal mortgage activity, said Koch, president of the First Federal Savings & Loan Association of Cleveland.

He listed the three as enough creditworthy prospective buyers and houses for sale; the desirability of a place to live, including municipal services, and available financing.

"All those things have to happen, or you're not going to have a mortgage," he said.

Savings and loans did 89% of the conventional mortgage business in Cuyahoga and western Lake counties.

Lake Giles, executive vice president and secretary of the league, said the Home Mortgage Disclosure Act of 1975 could be a step in a dangerous direction.

"The thing we worry about is that this is the prelude to the allocation of credit," said Giles.

Other lenders interviewed said the only way for a study to show mortgage discrimination is to include the number of mortgage applications and the number of houses for sale.

"This is one of the fallacies of the figures (from the Home Mortgage Loan Disclosure Act of 1975)," said Richard E. Livingston, vice president and manager of the mortgage banking division of Central National Bank.

"We know there are areas where we have very few or no loans," said Livingston. "But we have very few or no applications in those areas."

Giles said Ohio Savings Association, after being accused of redlining by neighborhood groups, did a mail solicitation of 12,000 persons for mortgages. That resulted in only two mortgage applications.

He and others said lenders are involved in neighborhood projects that are not always publicized.

"The Cleveland banks are dedicated to a number of programs dedicated to the housing stock of the city," said Arthur W. Wootton, vice president and manager of the real estate department of Society National Bank.

"That's something that we've not said too much about, but I think it's noteworthy."

For example, he said, the city's five largest banks are involved in a low-income housing project at E. 79th and Euclid Ave. Banks and savings and loans are also participating in the National Housing Services program here, which, is concentrating on revitalizing two sections of the city.

Giles said many of the savings and loans have undertaken projects for more housing in the inner city, especially in Hough.

One of the arguments presented by community groups is that lenders sometimes make loans to ventures that fail—one recent example being real estate investment trusts, some of which have lost millions of dollars for banks.

"When any bank made a loan to a real estate investment trust, no one made it thinking the money would be lost," said Livingston.

"We're looking to make loans that will be repaid," said Koch. He said if any property is worth making a loan for, and if the buyer is credit worthy, a mortgage will be made.

He echoed the general feeling of lenders that they cannot risk savers' deposits and should not be forced to make loans.

Koch and Giles complained that the disclosure legislation was costly because of more paperwork for lenders. The cost is paid by the consumer, they said.

"Do you think the people of Cleveland are getting their money's worth from this disclosure? They're paying for it, after all," said Koch.

THE EARLY CHILDHOOD EDUCATION ACT

Mr. MATHIAS. Mr. President, educational experts have been focusing for a considerable time upon the critical importance of the early years in a child's

development. Dr. Benjamin Bloom, the noted psychologist, estimates that as much as 50 percent of mature intelligence is developed by age 4 and an additional 30 percent by age 8. Dr. Lois-ellin Datta finds that, "Before they enter first grade, most children have developed all of the basic motor skills they will ever learn, many of the linguistic and cognitive skills and have established their temperamental and social characteristics." Appropriate instruction at an early age can pay immense dividends for a child's later performance in school. Professional guidance for a few hours a day in those years can mean success through all a child's year.

Conversely, if the child's development is impeded during those years, it can mean frustration at school and frustration in life. The Federal Government already spends a billion dollars annually for the support of remedial education programs and programs to combat the high dropout rate. This is in addition to the social costs of school failure in terms of welfare, crime, unemployment, and nonproductivity. If we can get children off to a sound start by appropriate efforts at the beginning, we will be repaid many times over through the elimination of some part of those tremendous social costs.

As I announced publicly on December 22, I have proposed legislation which is designed to take advantage of the knowledge that has been developed concerning the educational growth of young children. My early childhood education bill will provide $500 million annually to local departments of education for the purpose of establishing 4-year-old education in our schools. It is limited to assistance for education and is not intended to solve a very serious problem closely related to early childhood education; day care for children of working mothers. I fully support a broad commitment to the care of those children in wholesome educational environments and I recognize the serious need for such care in this country.

Although my bill neither precludes nor replaces efforts aimed at providing funds for care of children of all ages, I do recognize that it may draw attention from that issue. I have decided, therefore, to hold back introduction of my bill until discussion has begun on the other efforts and until the clear distinction between it and my bill can be clearly perceived.

"POLITE" DISCRIMINATION

Mr. BAYH. Mr. President, an article I would like to share with my colleagues appeared in the Washington Post on Monday, January 3. The article, written by Mr. Kirk Douglas, is entitled "Polite Discrimination." It is a sensitive personal account of discrimination in our society. It should be food for thought for us all.

During the 14 years I have been in Congress considerable time has been devoted to legislation which would prevent discrimination by race, religion, nationality or sex. This has been one of our highest priorities and I am proud of our record to date. But legislation cannot solve the problem of judging someone by the color of his skin or religion. All the laws in the world will not be able to change human nature, people have to change from within.

Mr. Douglas's article, written with such insight, illustrates many instances when discrimination takes place during common occurrences of a person's life. In many cases people have not purposefully set out to discriminate, but they do. His article is not aimed at white Protestant males only however. Discrimination exists in us all.

Mr. Douglas's last thought,

It will end when we dare to dislike, as well as like, a person for his or her own sake, not because of color or religion.

I, too, share this belief and hope that the time will come soon when this is reality.

Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Jan. 3, 1977]

"POLITE" DISCRIMINATION

(By Kirk Douglas)

The unseemingly scramble by key members of the incoming administration to resign from their "exclusive" private clubs would be amusing if the sneaking thought didn't occur that members of the outgoing administration are probably eager to get back into theirs.

Although every sort of anti-discrimination law imaginable is now on the books, I have to ask myself how much things really have changed since I was a boy growing up in Amsterdam, N.Y. Then, at least, there was no hypocrisy about it: I couldn't get a job delivering newspapers because I was a Jew, and no Jew was allowed to work at the largest factory in town. No one bothered to hide behind a mask of false piety, however; they were painfully direct.

I was about 11 years old when a bunch of kids pounced on me one day, beating me bloody and yelling: "You killed Jesus Christ." When my mother asked me what happened, I wailed: "They said I killed Jesus Christ and I don't even know who he is."

When I went to college at St. Lawrence University, the fraternities had a big rush week at the beginning of the school term. They pursued the freshmen they wanted as members, and their first step was to invite the prospect to dinner at the fraternity house.

I was invited, so I put on my one suit and tie and waited for the upperclassman who was supposed to come and escort me to dinner. I waited and waited. They had made a mistake in my case: Demsky was my name then, and they had thought I was Polish. When they discovered I was Jewish they lost interest. Nobody came to fetch me. They just left me there waiting.

Later, by a strange fluke—a change in the system of voting—I was elected president of the student body. (The alumni association was furious). After that, though, I was offered "house privileges" at a fraternity. This meant I could pay dues, eat meals, live at the house, even attend fraternity dances. But I could not attend their meetings, and I guess they wouldn't have taught me the secret handshake. I declined the kind invitation.

There weren't many Jewish students at the university, but a group came to me and suggested we form a Jewish fraternity. I thought not. "In destroying the enemy, you'd better be careful not to become the enemy," I said.

Of course, no fraternity men on that campus believed in discrimination. "It's just the rules 'national' hands down," they said.

Today those fraternity members are grown men. And where do they spend their weekends (those, at any rate, not tapped for cabinet posts)? I'll tell you where: at clubs that exclude blacks, Jews and Chicanos.

All I have to do is look around. Not far from my home is the Los Angeles Country Club—a beautiful layout with two 18-hole golf courses in the middle of some of the most desirable land you've ever seen. They exclude not only Jews and blacks but almost everyone from the world of entertainment. Can you imagine blackballing a whole industry?

Jews certainly are not innocent in this silly game. For years fancy Jewish clubs were dominated by German Jews who looked down on Polish and Russian Jews for having arrived in this country after they did. They excluded them from their clubs and avoided "intermarriage" like the plague.

Years ago, I visited former President Eisenhower at his home in the Palm Springs area. What a charming man! He lived at Eldorado Country Club, which doesn't have Jewish members—not even German Jews—or blacks, not even rich ones.

A couple of months ago, President Ford vacationed at Thunderbird Country Club in Palm Springs. It's just as discriminatory. President Ford liked the place so much he may decide to settle down in that highly restricted neighborhood.

And so in many places a "gentleman's agreement" is still in effect. It's all so polite. Rich Jewish members of Hillcrest Country Club have lunch occasionally with rich gentile members of the Los Angeles Country Club. Sometimes they even play golf together.

When will it end? Maybe with the next generation.

Recently my son Peter invited a black friend over to the house to play tennis. They got into a violent argument and Peter kicked him off the court. I don't know who was right or wrong, but I do know that, in their anger, neither one mentioned black or white. It was just two people who were mad as hell. A week later they had settled their differences and were back playing tennis again.

It will end when we dare to dislike, as well as like, a person for his or her own sake, not because of color or religion.

A TRIBUTE TO GUSTAVE LEVY OF NEW YORK

Mr. JAVITS. Mr. President, Gustave L. Levy, a great human being, a great New Yorker, one of the most able and effective philanthropic leaders of our time; as well as one of our country's most emminent financiers, and one of my closest friends passed away on November 3, 1976. I believe that the obituary in the New York Times and the eulogies by Rabbi Ronald B. Sobel, spiritual leader of the deceased's congregation in New York City—Temple Emanu-El, by Terrance Cardinal Cooke, Archbishop of New York, by the Vice President of the United States, Nelson A. Rockefeller, and by a close friend of the deceased, J. W. Burnham, chairman of Drexel Burnham & Co., are worthy of inclusion in the CONGRESSIONAL RECORD.

Mr. President, Gustave L. Levy, made a most significant mark in the life of his city, his State, and his Nation. He walked among the mighty but he dedicated his

life to assisting the humblest among Americans. Gustove Levy was in the tradition of the greatest American philanthropists. He was a friend to those who knew him and a friend to those who never knew him—perhaps not even his name—and equally solicitors of both.

I ask unanimous consent that the obituary and eulogies I have referred to be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CONGREGATION EMANU-EL
OF THE CITY OF NEW YORK,
New York, N.Y., November 10, 1976.

Mrs. GUSTAVE L. LEVY,
New York, N.Y.

DEAR MRS. LEVY: You and the children have lost a magnificent husband and father and the world has lost a giant.

The quality of Gus' life was, indeed, so extraordinary that the imprint of his achievements will live long in memory. His heart and his soul reflected the best in the human spirit and, at his core, he was a true son of our Jewish people.

Among Gus' many blessings was the fortunate fact that, a long time ago, he fell in love with you. You have been, to him, a magnificent wife and companion and, although your pain is deep and profound, I am confident that the passage of time will transform your bereavement into a sweet treasure house of magnificent remembrance.

Please convey these sentiments to Peter, Betty and the other members of your wonderful family.

I have enclosed the recording of the Service. I have not had an opportunity to listen to the tape myself; hopefully, the transcription will be clear. The last week or so, we have been having some slight difficulties with the recording instrument.

Finally, it is my hope that, in the future, only moments of joy will occasion our being together.

With great respect and deep sympathy, I am

Faithfully yours,

RABBI RONALD B. SOBEL.

[From the New York Times Nov. 8, 1976]

ROCKEFELLER EULOGIZES GUSTAVE LEVY OF WALL STREET AS "FABULOUS FRIEND"

(By George Dugan)

Vice President Rockefeller lauded the late Gustave L. Levy yesterday as a "fabulous friend" imbued with "great compassion."

Mr. Rockefeller delivered the principal eulogy at a funeral service for Mr. Levy, head of of the international investment firm of Goldman, Sachs & Company and one of the most influential men on Wall Street. He died Wednesday at the age of 66.

Mr. Levy was regarded as one of the nations top fund-raisers for philanthropic, religious and civic causes.

He was also a prominent Republican fundraiser, particularly during the political campaigns of Mr. Rockefeller, former Mayor John V. Lindsay and President Ford and former President Richard M. Nixon.

In a voice slowed by emotion, the Vice President told the 2,000 mourners at Temple Emanu-El, Fifth Avenue and East 65th Street, that "we are joined here because of the love we share for Gus Levy."

HIS ADVICE RECALLED

"What a fabulous friend," he said. "You looked at him for advice, and you always got it—not that you always liked it."

Then, with an uncertain smile, Mr. Rockefeller said, "I can still hear him on the telephone saying, 'Nelson, you're out of your cotton-pickin' mind.' "

"What an extraordinary man," the Vice President added. "Woe be it to the time-wasters when Gus said. 'Let's get on with it.' What a great American. His devotion to his country was unmatched. Gus leaves one of those voids no one among us can really fill. His great compassion always comforted you."

Before Mr. Rockefeller spoke, Terence Cardinal Cooke offered a prayer, intoned the 23d Psalm and, in a moment of reflection, recalled his long friendship with Mr. Levy.

"May the Lord give him peace forever," the prelate declared. "This is our prayer for our friend, Gus Levy."

Later the Cardinal met with members of the family at a private room in the synagogue.

"AMERICAN SUCCESS STORY"

In another eulogy, I. W. Burnham, chairman of Drexel Burnham & Company, called Mr. Levy "the great American success story, coming out of his beloved New Orleans to make his way in the big city."

Among his many accomplishments, Mr. Levy served for two years as chairman of the New York Stock Exchange.

The opening and closing prayers at the service were offered by Rabbi Ronald B. Sobel, spiritual leader of Temple Emanu-El.

Burial will be today in New Orleans at Metaire Cemetery, on Pontchartrain Boulevard. The service will be private.

Among the mourners were Senator Jacob K. Javits, Judge Irving R. Kaufman, Chief Judge of the United States Court of Appeals, and Mr. Lindsay.

The former Mayor, in a sidewalk interview after the service, said he was in a "state of shock" over Mr. Levy's death.

"In the years I was Mayor and in Congress,' Mr. Lindsay said, "Gus Levy helped me beyond measure."

[From The New York Times, Nov. 4, 1976]

GUSTAVE LEVY, INVESTMENT BANKER WHO LED GOLDMAN, SACHS, IS DEAD

(By Leonard Sloane)

Gustave Lehmann Levy, one of the most powerful men on Wall Street and head of the international investment banking firm of Goldman, Sachs & Company, died yesterday in Mount Sinai Hospital at the age of 66. Mr. Levy suffered a stroke on Oct. 26 and had been in the hospital's intensive care unit since then.

Perhaps the best-known figure in the monied world of investment banking and brokerage firms, Mr. Levy was also actively involved in a wide variety of corporate and civic endeavors and had long been one of the country's top fund-raisers for philanthropic and Republican causes.

In all of these roles he achieved such a measure of success and wealth that the name and accomplishments of Gus Levy, as almost everyone called him, were recognized far beyond the confines of New York's financial community, where he worked for 48 years.

As the senior partner and chairman of the management committee of Goldman, Sachs, he ran one of the nation's largest investment banking firms that has assets of $1.2 billion and last year raised $16 billion for corporations, states and municipalities. At his death, he was a member of the board of directors of the New York Stock Exchange and had previously been its chairman for two years.

Mr. Levy also served as a director of 16 major industrial corporations and as a trustee of the Bowery Savings Bank. In addition, he was a commissioner of the Port Authority of New York and New Jersey and a trustee of both the Museum of Modern Art and the John F. Kennedy Center for the Performing Arts in Washington.

Because of his expertise in financial matters, he was often elected treasurer of the nonprofit organizations to which he gave many hours, such as the Lincoln Center for the Performing Arts, the International Synagogue and the American Friends of Canada Committee.

For many years, Mr. Levy gave and raised large amounts of money for charitable

* * * * *

Jewish Appeal of Greater New York and the Federation of Jewish Philanthropies of New York.

CHAIRMAN OF FORD DINNER

He was a prominent Republican fundraiser too, responsible for obtaining money for the campaigns of former Mayor John V. Lindsay on the local level, former Gov. Nelson A. Rockefeller on the state level and former President Richard M. Nixon and President Ford on the national level. Just two weeks before his stroke, he was chairman of a $1,000-a-plate dinner in New York to raise funds for Mr. Ford.

It was on Wall Street, however, that Mr. Levy made his reputation in the high-pressure business of trading securities. He first attracted attention as an arbitrager—a person who takes advantage of simultaneous price variations in securities on different markets—and later broadened, his scope to encompass all kinds of big-block trading, as well as underwriting, corporate finance, mergers and acquisitions and other investment banking activities.

A tall, rugged man with boundless energy, Mr. Levy always sought to be first on the scene whenever a deal could be consummated and frequently achieved his goal to the profit of Goldman, Sachs. A Wall Street story has it that one broker had learned of a multimillion-dollar oil discovery on an Indian tribal reservation in the Northwest and had immediately flown to the area to try to sign up this tribe as a client. But, when he arrived, the chief told him, "Sorry, Gus Levy was here yesterday."

In his office at one end of the Goldman, Sachs trading room on the fourth floor of 55 Broad Street and separated from the commotion there only by a swinging door and a sliding glass panel, Mr. Levy kept aware of the firm's changing ownership positions in various stocks and bonds.

During the last five years, the concern traded an average of more than 100 million shares annually for itself and its clients on the New York exchange and Mr. Levy—basically a trader—was intimately familiar with the important dealings in these blocks of stock. A sign on the trading-room floor says "A 250,000-share Block a Day Keeps Gus Levy Away" and many of his associates believed it to be true.

"People respected him and liked him, but he was tough and difficult," said one of these associates. "He would be direct when you made a mistake, but he didn't hold grudges. He would give you hell at 9:30 and 9:32 talk to you rather calmly about something else."

Gustave Levy was born in New Orleans on May 23, 1910, the only son of Sigmund Levy, a carton manufacturer, and Bella Lehmann Levy, no relation to the Lehman family that founded Lehman Brothers, another leading investment banking concern. His father died in 1923 and his mother took him and his two sisters to live for a while in Paris.

After attending the American School here for a few years, the family returned to New Orleans and Mr. Levy enrolled at Tulane University in 1927. But his stay there was just two months long because his mother could not afford to pay the tuition. He came to New York in 1938 to work, living at first at the 92d Street Young Men's Hebrew Association.

Although he remained a resident of New York since then, a touch of the South remained in his mannerisms, particularly in the sincerity and heartiness of his handshake when greeting acquaintances. "He has had that handshake ever since he went out for football at Tulane," said one friend.

Mr. Levy, who moved out of the 92d Street "Y" still owing it $2, later became a major contributor, a three-time president and a fund-raiser for its parent organization, the Federation of Jewish Philanthropies. "They gave me friendship and confidence in myself at a time when I needed it badly," he said afterward, and made a substantial donation to make up for the $2 debt he had incurred.

His first job in 1928 was on Wall Street—"it was the thing at that time," he said—with the brokerage firm of Newborg & Company. Mr. Levy began as a runner and, as he learned the business, became a trader and then a member of the arbitrage department. He liked to say that he was "one of the few guys who didn't lose any money in the crash because I didn't have any money to lose."

While Mr. Levy worked at Newborg through 1932, he also attended New York University at night, but never graduated. In appreciation for its contribution to his education, he subsequently donated large sums to the university. And for the last five years, he taught, without fee, a once-a-week investment course at its College of Business and Public Administration as a distinguished adjunct professor of finance.

In 1933, Mr. Levy was recommended by a friend to Goldman, Sachs—an old line investment banking firm founded in 1869 in a one-room basement office by Marcus Goldman and his son-in-law, Samuel Sachs—and was hired for $1,400 a year. He quickly demonstrated his ability on the foreign bond desk and then on the arbitrage desk, and moved upward through the ranks.

During World War II, he served in the Army Air Corps as a nonflying officer in Europe and was discharged as a lieutenant colonel. Although Mr. Levy had flown his own Stinson Voyager one-engine plane before the war, he didn't have enough experience to qualify as a military pilot. "At 32, I was too old for training," he observed after leaving the service.

Mr. Levy returned to Goldman, Sachs as a partner in 1945, gradually assuming greater responsibility internally and developing into one of the best new business executives on the street. In 1969, he became its head when Sidney J. Weinberg moved into semi-retirement and was the undisputed boss of the partnership since then with an annual income (much of it retained in the firm) estimated to be in the millions.

Goldman, Sachs and its partners, however, were confronted with some problems during Mr. Levy's years at the helm, of the sort that Wall Street firms frequently face during periods of stock market declines or business downturns.

One continuing problem at Goldman, Sachs has been suits filed against it by companies and individuals who bought the commercial paper—unsecured promissory notes—of the Penn Central Transportation Company from the investment banking house shortly before the giant railroad went into bankruptcy in 1970.

Under Mr. Levy's guidance, Goldman, Sachs moved from what had been a one-man show to a more broadly based operation with the formation of a management committee, first containing six partners and now with eight. At the time of his death, there were 47 general partners and 18 limited partners with total capital of $78 million invested, none of the partners owning more than 10 percent of the firm, Goldman, Sachs's average annual income before partners' taxes over the last five years was more than $25 million.

Mr. Levy was also active in the Securities Industry Association, the trade association of brokerage and investment banking firms. Last summer, he was chairman of a committee that proposed the testing of an electronic order project for exchange specialists as a preparatory step toward the creation of a national market system for securities trading.

With his business affiliations beyond his primary identification with Goldman, Sachs and Wall Street, Mr. Levy—a member of both the New York and American stock exchanges—had great weight in the American industrial world. His directorships included Braniff Airways, Studebaker Worthington Inc. and the Witco Chemical Corporation, all of which are client companies of Goldman, Sachs. He was also a director of such businessmen's groups as the Economic Development Council of New York City and the New York Chamber of Commerce and Industry.

When Mr. Levy turned away from his business pursuits, he devoted much of his time to Mount Sinai Hospital, where he was taken after the Oct. 26 stroke at a commissioners' meeting of the Port Authority in Manhattan. He was chairman not only of the hospital, but also of the Mount Sinai Medical Center and the Mount Sinai School of Medicine. Last June, the school named him an honorary doctor of humane letters, his third honorary doctrate.

Besides his Manhattan apartment at 4 Sutton place, Mr. Levy had a home called Apple Hill Farm in Armonk, N.Y. He enjoyed playing golf at the nearby Blind Brook Club and was known to take the "red eye express"—the overnight flight from Los Angeles to New York—after a business meeting and drive right to the club for a round of golf.

Mr. Levy is survived by his wife, the former Janet Wolf, whom he married in 1934; a son, Peter A., a partner of Goldman, Sachs; a daughter, Betty Levy Hess; five grandchildren and two sisters, Mrs. Cecile Norton and Mrs. Rose Kagan.

Funeral arrangements were incomplete last night.

REMARKS BY TERENCE CARDINAL COOKE

God of our father you have called our brother and our friend, Gus Levy, to your eternal love. He brings with him the wonderful record of all the good he did and all the people whose lives he touched. With your help he lived as a valiant leader in our community and our nation and his love for his neighbor reached out beyond the limits of race or color or religious belief. Welcome him now into everlasting life where there will be no more sorrow, no more weeping or pain, but only peace and joy. This is our prayer for our friend, Gus Levy. May the Lord bless him, may he shine his countenance upon him and be merciful to him, may the Lord give him peace forever. Amen.

REMARKS BY RABBI RONALD B. SOBEL

Friends, the Jewish community, the City of New York, the nation and indeed the world, has lost a very great man. And you who knew him and loved him and respected him and admired him, have come to this great sanctuary in his moment of eternity to say to him a loving and affectionate and a respectful final farewell and good-bye. We have all gathered to pay the tribute of our hearts to everything that was so magnificent in his heart. To remember the unique grandeur of his character, for Gus Levy strode among us as a giant. We are deeply honored, your Eminence, by your presence on our altar in his moment. Your friendship with Gus was very deep and your presence here reflects the universal character of Gus Levy's concerns. To express the thoughts of all of us, to share our feelings, to speak our love, I call upon J. W. Burnham an old and cherished friend for almost half a century, and the Vice President of the United States, one of the great citizens of our world, Vice President Nelson Rockefeller.

REMARKS BY J. W. BURNHAM

Dear Janet, Betty, Peter, Rose, Cecile, Roger, Kim and the grandchildren, devoted partners and employees of Goldman Sachs and Co. and the many many friends of Gus Levy, we are here today to pay our respects to this truly great man who has often used the phrase in jest "has gone to meet his maker." I will not dwell on the details of the career of this outstanding individual. You can read it in the newspapers. I am here just to speak of my friend, our friend. I knew Janet, Skinny, as Gus loved to call her while we were both growing up in Baltimore. And I met Gus later on in 1931 shortly after we both had come to New York.

Three years later Janet and Gus began a love story that will never end. For me and for so many others a friendship that will never end. In truth, this country of ours has lost one of its great citizens, this city one of its greatest financiers and without question its outstanding philanthropic leader. And the national community has lost Gus Levy and that is all one need say. His name, reputation and contributions are legendary. Gus is truly the great American story. Coming from his beloved New Orleans to make his way in the big city and what a job he did.

This city will reclaim the imprint of the great work of Gus Levy long after all of us are gone. I knew Gus when he made his first contribution to Federation. It was $100. What he has done since then in terms of work, time, devotion and gifts to hospitals, universities, museums, the Lincoln Center, and all types of philanthropy regardless of race, religion or color has never been equal in my opinion. This fine brilliant, tender-hearted man could never say no to any friend or worthy organization. Above all Gus was loved and he gave back his love in his own form of friendship. I know he never turned a friend down. And probably there are few in this Temple who haven't at one time or another asked Gus 'can you get my friend into Mount Sinai', 'will you head our drive?', 'will you go on the committee?' 'please sit on the dais', 'we expect you to call the cards'. No one ever questioned that he would give financially and of himself.

Gus was involved and he wanted to be involved in business, politics, philanthropy, the arts, and the hospital. He was a problem solver and in every case he did it well because of his tremendous capacity for concentration, his boundless energy and his devotion to a cause—that of helping people. Gus loved athletics, golf, fishing, he just plain loved life. Above all he loved his devoted Janet, his children Betty and Peter and his five grandchildren. It is to them that all of us express our grief over this sudden tragedy that takes Gus from them and from us at the peak of his career and before any of us could believe he was ready to go.

Gus, old friend, your work is done, you have lived through a tension ridden hectic period of world history and despite all of these problems you, more than any other we know, have enjoyed active participation in that kind of life. Now you can rest. No one who ever knew you will ever forget you. Amen.

REMARKS BY HONORABLE NELSON A. ROCKEFELLER

Faith, hope and love. The Scriptures say that the greatest of these is love. This morning we are joined here together because of the love we share for Gus Levy. And for his faith and hope and his life time of relentless dedication of the well being of all mankind. Today it doesn't seem possible that we are without Gus Levy. That I just can't pick up the phone and call Gus, it just doesn't fit. For as with so many of you Gus was part of my life. What a fabulous friend. You sought him out with problems. He found answers. You looked to him for

advice. You always got it. And there were times when you didn't like it, but it was solid like the man himself.

You turn to him in sorrow, his warmth, his great compassion always comforted you. You called him to share joys and how jubilantly he joined you. His was laughter, open, full and deep. And when he called you with that "Say Nelson I have got something I think you ought do" you knew you were into it. But when his first words were "Say Nelson you're out of your cotton pickin mind" you braced yourself because you probably had it coming. What an extraordinary man. He was so big, yet he took time for the little things that made living worthwhile.

He was so successful that he refused to accept any inevitability of failure. Whether he was attacking complex corporate problems in the boardroom or heart rendering human problems in the hospital wards or the drug addicts. Gus Levy knew there had to be a way if we would but get together to find it. He was prodigious a worker in business, civic affairs, philanthropy, his dedication to Israel, that he provoked others into action with monumental results. If he had any intolerance it was an intolerance for those who had abilities and opportunities that wouldn't use them for themselves, for themselves, for their country and the community. And lo be it to the timewasters. And Gus said "come on, let's get on with it" I've never known a more highly organized or more efficient man. That's why he lived ten lives in one.

What a great American. His love of country was unmatched. He served not only as a soldier in wartime but as a protagonist of democracy throughout his life. He understood America. He knew our freedoms, our civil rights, our religious liberties, our individual economic freedoms, were indivisible. And he not only fought to preserve them but he gave of his means and himself to enhance them. He was a family man. All of us know how close he and Janet have been and how he drew strength from her, from his children and his grandchildren. He was a deeply moral man and he knew and we know how his faith sustained and encouraged him, and gruff sometimes seemed to those who didn't know him, he was a loving man who really enjoyed the company of others and the joy of life.

He was a sentimental man, sentimental about things that really count in life and with it all he had a marvelous sense of humor. Gus leaves one of those voids no one among us can really fill. But that's because he was a man of so many parts, all so admirably played. How are we going to carry on those manifold tasks he shouldered so ably and so long? I can almost hear Gus saying it "Well you sure as hell better get together and do something about it." What a privilege it has been for all of us to have walked with Gustave Lehman Levy.

REMARKS OF RABBI RONALD B. SOBEL

And so the words have been spoken eloquently by the Vice President, by Mr. Burnbarn, we have placed the period at the end of the last sentence. And now the book is about to be closed. But Mrs. Levy and the children and the family, you know as all of us know, that the book that was the life of your beloved will be opened and read and reread with great love and abundant admiration. And so to you, Gustave Levy, the world says lach ba shalom, go in peace. May peace and quiet be thy portion throughout all of eternity. Oh Lord help us to understand that grief and love go hand in hand, the sorrow of loss is but the measure of a love that is stronger than death. And even though we cry now in the silent bereavement of our hearts may we be all of us as children who know that their parents are near and cling unafraid to the trusted hand. It is oh God with this love, with this faith and this trust that we commit him to thy keeping this magnificent son.

FINAL REPORT OF ADVISORY COMMITTEE ON NATIONAL GROWTH POLICY PROCESSES

Mr. HUMPHREY. Mr. President, the final report of the Advisory Committee on National Growth Policy Processes was released at a press conference held here in the Capitol Building this morning.

The committee's report, entitled "Forging America's Future: Strategies for National Growth and Development," is a document well worth reading—cover to cover. While small in size—slightly over 100 pages—it is packed with many important recommendations for improving our Nation's Federal policymaking process. The recommendations are directed toward both the executive branch and the Congress, State, and local government, and the general public.

Mr. President, this committee was created by an amendment of mine that was adopted by the Senate in 1974 to the bill authorizing the creation of the National Commission on Supplies and Shortages. My amendment charged the advisory committee with the responsibility of developing recommendations:

As to the establishment of a policy-making process and structure within the Executive and Legislative branches of the Federal Government as a means to integrate the study of supplies and shortages of resources and commodities into the total program of balanced national growth and development, as a system for coordinating these efforts with appropriate multi-state, regional and state governmental jurisdictions.

I offered the amendment creating this special committee as a result of my growing frustration at our National Government's seeming inability to anticipate and deal with the large problems of our time, and concern that unless such capability is developed—and soon—America's position in the world and here at home could be irreversibly damaged.

As I said when I offered my amendment:

In today's world, everything relates to everything else. No problem, no policy issue, can be totally insulated from other problems and policy issues. What happens in agriculture affects our energy policy, our transportation policy, and our foreign policy. What happens in our energy policy affects our transportation policy, our economic policy and our foreign policy. And the litany of interrelationships between and among policy areas goes on and on.

But unfortunately, our governmental institutions and policy-making processes today are not designed or equipped to reflect those interrelationships or to provide for long-range policy analysis.

Mr. President, while the Advisory Committee on National Growth Policy Processes was given very little time, staff, and budget to perform its mission, it did an outstanding job. The committee, made up of distinguished leaders of business, labor, State and local government, the academic community, and of consumer and public interest groups, had as its Executive Director, Mr. James E. Thornton, who has been pioneering and providing initiatives in national policy planning for the past 10 years.

He and his committee associates have produced a very constructive report and set of recommendations, which if adopted, would greatly enhance our Nations's ability to think ahead and to develop national policy on a more comprehensive and integrated basis.

Present and emerging issues of national growth and development entail some of the most complicated issues and difficult problems our Nation has ever faced. Decisions made to meet them must be farsighted and based upon systematic investigations of their needs and consequences.

The United States in the shrunken, interdependent, complex, and ever-changing world that has developed since the end of World War II has found itself too often floundering in its search for accommodations and answers to problems—new ones and those arising from old decisions.

American citizens, as a whole, are coming dangerously close to disillusionment about Government's ability to govern.

Successive Presidents and their administrations have seemed to react only to fire bells in the night rather than anticipating potential dangers. Congress exhibits concern and frustration about erratic Executive leadership and its difficulties and its own inability to address important national issues more comprehensively. Cities, States, and regions find themselves wrestling with intractable problems that the Federal Government tries to solve with large, but largely palliative, financial assistance.

Domestic problems, that frequently should have been early seen, are dealt with on a piecemeal basis. Foreign influences on domestic prosperity and well-being, too often are not recognized in time.

The institutions and policymaking processes at Government's disposal are not equipped at present to evaluate the interrelationships of domestic and international problems, except perhaps in the area of national security, and do not now have the long-range policy analysis capacity needed.

While the advisory committee has taken no position on the goals of national policy, or about the subjects for which there should be goals, the committee does believe that the Government will discharge its responsibilities better if it and the public have a longer run, more comprehensive and more reliable view of the prospects of the society and of the consequences, direct and indirect of action taken.

There is at present such a lack—although it is not the only reason for deficiencies of public policy—which the committee decided to give the primary part of its attention. Suggestions are made in the committee's report that could be helpful in increasing and improving the amount of information, analysis, and options that should be available to the Executive, Congress, and the public for our governance.

The advisory committee found no lack

of desire among Government organizations to know in advance about emerging problems nor opposition to improving long-range policymaking processes. Nonetheless, they found performance in these areas needs substantial improvement.

Intensive studies have been done but recommendations—by commissions, committees, departments, and agencies—have been either half-heartedly implemented then dropped or completely ignored. Mechanisms that have been created to attack evident problems and policy requirements have been given too circumscribed ambits to effectively do what is needed. The organizations in the Executive Office of the President, are not now equipped to give the President the options he needs for more compresensive and long-range planning and policymaking, although some of them are adaptable to the task. The Advisory Committee directed its attention to the President's Office, rather than those run by his Cabinet members because his office is uniquely situated to bring together the totality of all the country's interests, needs, and desires.

Intergovernmental efforts have been grossly insufficient and fragmented, but some of the existing mechanisms might usefully be further examined in this regard.

As the committee notes in its report, there should be no trepidation about the word "planning." To a large extent, the United States, both in the public and private sectors, relies heavily on planning as a management tool. But most of this planning is narrow in scope, and not policy-directed.

The country can safeguard against the repressive aspects of planning if the planning is done openly with participation by the public as well as its elected representatives and ample provision made for public debate. Such policy planning should be approached with a humble recognition that solutions are not easily found and there are no technocratic absolutes. The consequences of not planning also must be considered and they are ominous.

Needed are new national strategies: recognizing where current policies are leading us, statements of required policies and options for their attainment, and careful monitoring of executive and legislative action taken. The dangers of a "planned" society against a "planning" society could thus be avoided.

There is a large irony that the United States should be concerned with the lack of long-range governmental planning. From the beginning of the Marshall Plan and through the period of intensive economic aid to developing countries, the Federal Government required that detailed, comprehensive and long-range plans for the spending of such assistance be prepared by the recipients before the money was advanced.

These requirements, and foreign countries' reliance on methods used for economic analysis pioneered in the United States, have brought many Western European nations and Japan to a point where their ability to integrate general economic, regional and sectoral development policies seem far to surpass our own.

The Federal Government also provides millions of dollars each year to State and local government to plan. However, for some strange reason it has been reluctant to engage in planning its own policies and activities.

Mr. President, I ask unanimous consent that the committee's recommendations in brief, along with a list of committee members, be printed in the RECORD immediately following the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HUMPHREY. Mr. President, I wish to commend and thank all the members of this Advisory Committee for a job well done. I hope both President-elect Carter and the 95th Congress not only read and study the committee's report, but adopt its recommendations. We must begin now to develop the analytical methods, policy development processes, and governmental structures that will eventually give our Nation the national policy planning capability it requires.

Two centuries ago Thomas Jefferson recognized the need to periodically reform our institutions of national governance when he wrote:

I am not an advocate for frequent changes in laws and constitutions, but those institutions must go hand in hand with the progress of the human mind. As that becomes more developed, more enlightened, as new discoveries are made, new truths discovered, and opinions change with change of circumstances, institutions must advance to keep pace with the times.

The Advisory Committee on National Growth Policy Processes makes the following recommendations in part II of its report.

EXHIBIT 1

THE NATIONAL GROWTH AND DEVELOPMENT COMMISSION

1(a) The Committee recommends that a National Growth and Development Commission be created as an independent agency in the Executive Branch of the Federal government. It should have a broad mandate to examine emerging issues of middle- to long-range growth and development, and to suggest feasible alternatives for the Congress, the President and the public. In creating the Commission, Congress should impose upon itself and upon the President the requirement that both respond to the reports issued by the Commission.

1(b) The Committee recommends that the responsibility for preparing the National Growth Policy Report be transferred from the President to the Commission.

THE EXECUTIVE OFFICE OF THE PRESIDENT

2(a) The Committee recommends broadening the Economic Report of the President so that it includes more analysis by sector and region and sets forth Presidential goals, plans, priorities, and initiatives for programs and policies related to national growth and development.

2(b) The Committee recommends that the staff of the Executive Office of the President be strengthened to help prepare the expanded Economic Report, to advise on technical, sectoral, interdepartmental, and intergovernmental problems, and to probe policy choices.

THE CENTER FOR STATISTICAL POLICY AND ANALYSIS

3(a) The Committee recommends a substantial increase in funds for the collection and analysis of data by Federal agencies.

3(b) The Committee recommends the creation of a Center for Statistical Policy and Analysis to coordinate statistical support for the work of the President and Congress. The Center should be provided funds to contract with other Federal agencies and with outside sources for the design of techniques and the acquisition of data to serve its own needs as well as those of senior Federal officials and other interested public or private institutions.

3(c) The Committee recommends that the Center develop a model of the American economy, broken down by region and sector.

3(d) The Committee recommends that the Center for Statistical Policy and Analysis be an independent agency in the Executive Branch, but outside the Executive Office of the President.

THE CONGRESS

4(a) The Committee recommends that Congress take steps to improve its ability to react to cross-cutting and longer-range problems which cannot be easily dealt with by the present narrowly organized Congressional structure. Party leaders and caucuses in each House should play a larger role than they now do in determining the nature of Congressional response to initiatives from the Executive Branch.

4(b) The Committee recommends that the Senate provide for the creation of ad hoc select committees similar to those that now function in the House.

4(c) The Committee recommends that the Congressional committee report accompanying each bill include an outline of the bill's foreseeable indirect and middle- to long-range effects, as well as a concise statement of the general goals and specific objectives to which the bill is directed.

4(d) The Committee recommends that the Federal Government move towards a multi-year budgetary cycle.

4(e) The Committee recommends that the Joint Economic Committee, which now responds to the Economic Report of the President, be continued, and that its staff and resources be expanded so that it can respond to those sectoral and regional analyses which we have recommended be included in the Economic Report of the President.

PUBLIC PARTICIPATION IN THE FEDERAL POLICY-MAKING PROCESS

5(a) The Committee recommends that responsible public participation in policy-making that affects national growth and development be encouraged by providing for public access at each stage of the process. Tax deductions should be permitted for moderate contributions to membership organizations seeking to influence government decisions, and direct financial assistance should be given to groups which could not otherwise be heard.

INTERGOVERNMENTAL/TERRITORIAL DIMENSIONS OF NATIONAL GROWTH AND DEVELOPMENT

6(a) The Committee recommends that the responsibilities of the Advisory Commission on Intergovernmental Relations be expanded to improve analysis of intergovernmental and territorial policy issues.

6(b) The Committee recommends that the special study of national growth and development problems authorized in the most recent amendments to the Public Works and Economic Development Act explore which regional organizations for cooperative Federal and state development planning are considered most appropriate by the Federal government, the Governors, and the local officials in each section of the country. The

findings and proposals of that study should be enacted as amendments to the Public Works and Economic Development Act.

MATERIALS AND COMMODITIES POLICY

7(a) The Committee recommends that steps be taken to rationalize the activities for data collection and analysis of the Departments of Interior and Commerce and other agencies that now gather information on materials and commodities. Statistical functions should be separated from policy advocacy within the departments, and intergovernmental cooperation should be arranged to make the collection and dissemination of such statistics efficient and comprehensive.

7(b) The Committee recommends that the President designate a Cabinet member or senior personal aide to monitor developments in the field of materials and commodities.

7(c) The Committee recommends that, if economic stockpiles are established, the criteria for creation, expansion, and disposal of stockpiled commodities be clearly defined.

7(d) The Committee recommends that Congress and the President give serious consideration to strengthening our nation's food and agricultural information systems, and to the establishment of a grain stockpile system (utilizing both government and private stocks) for purposes of economic stabilization.

ADVISORY COMMITTEE

James E. Thornton, Executive Director.

Arnold A. Saltzman, Chairman, The Seagrave Corporation.

Roger S. Ahlbrandt, Chairman, Allegheny-Ludlum Industries Corporation.

Norman Beckman, Acting Director, Congressional Research Service.

Jacob Clayman, Secretary-Treasurer, AFL–CIO, Industrial Union.

Carol Tucker Foreman, Executive Director, Consumer Federation of America.

John W. Gardner, Chairman, Common Cause.

Richard Hatcher, Mayor, Gary, Indiana.

Wassily Leontief, Professor, New York University.

Patrick J. Lucey, Governor, State of Wisconsin.

Richard E. Neustadt, Professor, Harvard University.

Charles Pillard, President, International Brotherhood of Electrical Workers.

William M. Roth, Director, Pacific National Life Assurance Company.

Richard B. Scudder, Chairman, Garden State Paper Company.

Herbert Stein, Professor, University of Virginia.

Simon D. Strauss, Executive Vice President, ASARCO, Inc.

Eric A. Walker, President Emeritus, Pennsylvania State University.

Ralph Widner, Director, The Academy for Contemporary Problems.

Harris Wofford, President, Bryn Mawr College.

Leonard Woodcock, President, United Automobile, Aerospace and Agricultural Implement Workers.

CONFLICTS OF INTEREST AND ETHICS; APPOINTEES' GUIDELINES

Mr. PROXMIRE. Mr. President, President-elect Carter has issued a statement on conflicts of interest and ethics applying to officials who will serve in his administration. The text of the rules appeared in the New York Times, January 5. I would like to take this opportunity to commend President-elect Carter for this important public interest action.

I am particularly gratified by President-elect Carter's stand against the revolving door practices whereby Government regulatory agencies have become a training ground for individuals on the way up the economic ladder leading to high paying jobs immediately after Government service in the very industry they regulated. These practices have led to short tenured Government service by many officials and weak regulation which has ill-served the American public.

I commend President-elect Carter's throughtful position on this important matter to my colleagues for consideration.

I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TEXTS OF CARTER STATEMENT ON CONFLICTS OF INTEREST AND ETHICS; APPOINTEES' GUIDELINES

PLAINS, GA., *January 4.—Following are the texts of the statement issued today by President-elect Carter on conflicts of interest and ethics, the agreement to be signed by top political appointees and the accompanying guidelines:*

STATEMENT

The transition group has studied existing laws and regulations bearing on conflicts of interest and the regulation of ethics of officials in the executive branch of government. The existing law is extremely strong in prohibiting outside earned income. Governor Carter heavily approves of that law and its policy.

The existing law and regulations do not go as far as Governor Carter felt appropriate as to the public disclosure of sources of income and statements of assets and liabilities. The President-elect, the Vice President-elect and all those appointed to Cabinet and White House posts will voluntarily make such statements available to the public shortly after the inauguration.

Under power delegated to the President by Congress, an executive order will be issued requiring such disclosure by all policy-making officials of the executive branch.

It appears that for those positions requiring confirmation by the Senate, a careful job is done by Senate committees of screening assets and liabilities of nominees for potential conflicts of interests and, in most cases, appropriate divestitures have been made.

However, there appears to be a need for more uniform policies and more thorough screening of assets and liabilities of policy-making officials in posts not requiring Senate confirmation.

Therefore, we are releasing today, guidelines designed to make more uniform the policies relating to divestiture, including policies on the characteristics of trusts. The new administration will give special emphasis to better enforcement of screening procedures for officials in policy-making posts not requiring confirmation by the Senate.

The transition study does not regard present laws on employment subsequent to Government service as adequate. Studies by Congressional committees and citizen groups show that further steps are needed to ensure that former Government officials cannot use their personal contacts gained in public service for private benefit.

Governor Carter has asked all persons nominated to positions in the executive branch and to independent agencies to make voluntary commitments in this regard. Those commitments are contained in an attachment.

It appears that additional legislative action will be needed to satisfactorily close the "revolving door." Such action will need to give separate attention to each agency or department. The Carter administration will work, beginning immediately after the inauguration, with interested citizens groups and the Congress to develop such legislation.

GUIDELINES

It will be the policy of the Carter-Mondale administration to appoint and nominate for appointment only persons of high ability who will carry out their official duties without fear or favor and with an equal hand, unfettered by any actual or apparent conflicts of interest.

To decree that no person can have any financial interests other than a salary from the Government would seriously limit the ability to recruit the most qualified persons.

The Carter-Mondale administration will require full disclosure of all continuing affiliations and of assets and liabilities of nominees and their families. It is hoped that except in rare circumstances, divestiture causing severe tax burdens will be unnecessary if the present laws and regulatory framework are diligently and fairly administered.

The following guidelines pertain to the assets and liabilities of the nominee, the spouse of the nominee and the nominee's minor child or children, partner, or any organization in which the nominee continues to serve as an officer, director, trustee, partner or employee while in the Government service or any private organization with which the nominee has negotiated or has any arrangement concerning prospective employment.

All nominees will be expected to comply with all relevant statutes (particularly 18 U.S.C. Section 208) and rules and practices of the particular department or agency served.

If the person is nominated to a Level I or II position, divestiture should occur if compliance with the provisions of 18 U.S.C. 208 indicates a conflict requiring disqualification from action for the Government more than rarely.

Nominees for positions at Level III and other positions of the Government should require divestiture because of conflicts arising under 18 U.S.C. Section 208 only if use of disqualification will seriously impair the capability of the officer to perform the duties of the office to which nominated.

Beyond the requirements of 18 U.S.C. Section 208, persons nominated to positions at Levels I or II should divest holdings and liabilities where the nature of the holding or liability is such that it will be broadly effected by governmental, monetary and budgetary policies.

Generally excepted from requirements of divestiture (unless the particular position indicates continuing conflicts arising in Government service with respect to a particular interest) will be made for:

A. Real estate interests whether in the form of participations in partnerships.

B. Savings certificates and accounts and U.S. and other governmental securities.

C. Other holdings which are diversified; e.g. less than a 1 percent holding of a world-diversified mutual fund or a total of not more than $500,000 invested in diversified assets.

Blind trusts will be recognized as appropriate methods of divestiture where divestiture is required provided:

A. The trustee is truly independent;

B. The assets transferred in trust are either cash or diversified assets;

C. The trustee is given entire discretion and expressed direction to sell or buy without discussion with the Government officer

or anyone close to such officer and the only reports given to the Government office are the schedules necessary to file with income tax returns (which schedules do not list anything more than total of taxable items from the trust).

The attention of nominees will be directed to the provisions of 18 U.S.C. Section 209 prohibiting receipt of any compensation for Government service from any party other than the United States.

While the matter of payments for services prior to entry into Government service is properly addressed by local counsel to the appointee and the organization making the payment, the following general guidelines seem appropriate:

A. If there is a pre-existing established plan of the particular organization to reward past service, obviously such plan can be recognized and followed.

B. If there is no pre-existing established plan of the particular organization it is suggested that a payment in excess of six months of salary or in excess of a range of $50,000 to $75,000 would need careful examination.

In all events, it is expected that payment of any severence benefits will be completed prior to the nominee's taking office in the Government or within a reasonable time thereafter and that a copy of a favorable opinion of counsel to the nominee and the organization making the payment that it is lawful will be furnished.

While 18 U.S.C. Section 209 (b) allows continuing participation in bona fide pension, retirement, group life, health or accident insurance, profit-sharing, stock bonus, or other employee welfare benefit plan maintained by a former employer, nominees will be asked generally to exercise any stock options prior to commencement of Government service (unless, because of the requirements of the Securities Exchange Act, such exercise should occur within a reasonable period after beginning Government service in which case the Government officer may exercise within such limited period, providing other guidelines are followed concerning conflicts of interest as above stated).

Nominees will also be asked not to have contributions made to profit-sharing plans by former employers based on earnings of the former employer after the Government officer takes office.

Deviations from the foregoing guidelines will only be made with the expressed consent of the President-elect with respect to Level I and II appointments and by heads of departments or agencies with reference to other appointments. The reasons for the deviations will be made public.

It is proposed to ask appointees to enter into a letter of commitment, which, in several respects, calls for the disclosure of financial information beyond the requirements of existing law and regulations.

It is contemplated that the financial disclosure requirements will be made subject to an executive order shortly after the new administration takes office.

The attached letter of commitment also describes certain restrictions requested of nominees following Government service shortly after the new administration takes office. Congress will be requested to take action along the lines spelled out in the attached letter of commitment.

It will be the policy of the new administration to encourage every department and agency of the Government to advise every new employee of existing laws and regulations relating to conflicts of interest and to have a prior screening of such conflicts at the time of the appointment.

It will be a further policy to encourage departments and agencies to institute procedures for continuing policing of conflicts.

It is the objective of the new administration to avoid any conflict which could in any way influence any Government officer except in the even interest of all the people.

AGREEMENT

Honorable Jimmy Carter
President-elect of the United States
Dear Sir:

Sharing your determination to assure the American people of the integrity of your administration and appreciating the confidence you have shown in me by proposing to nominate me to be (to be filled in).

In addition to complying with applicable Federal laws and regulations relating to conflicts of interest, if I am nominated, confirmed and take office, I agree that:

(1) I have already filed or will file within 30 days of taking office with those persons you specify, the following information which may be made available to the public as you may direct:

(A) A complete current net worth statement itemizing all assets and liabilities of myself, my spouse, my minor children, and other members of my immediate household; and

(B) A sources of income statement for the year 1975 and for the period of time ending no earlier than 60 days before the above date listing all sources and amounts of all items of value received by me, my spouse, my minor children and other members of my immediate household including, but not limited to, salaries, wages, fees, honoraria, or other compensation, dividends, interest, rents, royalties, proceeds from the sale or exchange of property, and gifts.

(2) While in office, in addition to complying with 18 U.S.C. Section 208, I will similarly refrain from participating in any particular matter, as that term is used in Section 208, in which any party as here in after specified had a direct and substantial interest:

(A) any party with which I am associated for financial gain within the year prior to taking office as officer, employe, director, trustee, partner, or owner of more than one per cent of value of the outstanding equity ownership; or

(B) with which I am negotiating or have an arrangement whether as a consultant, employe, partner, or any other position to be held for financial gain; has a direct and substantial interest.

(3) In addition to complying with the restrictions which may be imposed on me by Federal law after termination of my Government service, including those contained in 18 U.S.C. Section 207, I will not for two years following such termination, engage in any activity from which Section 207(b) will bar me during the first year after such termination. Also for two years following termination of Government service, I will not, for compensation or financial gain, on behalf of any party other than the United States, make any formal or informal appearance before, or contact with, any officer or employee of the executive branch with respect to any particular matter as defined in Section 207 which was within my official responsibility as defined in 18 U.S.C. Section 202(b) during the 12 months preceding termination of my Government service.

(4) For one year following termination of my Government service I will not, for compensation or financial gain, on behalf of any party other than the United States, make any formal or informal appearance before, or contact with, any officer or employee of the (insert appropriate name of department or agency).

(5) I will, while in Government service and for two years after leaving Government service, file periodically in accordance with regulations to be promulgated by you statements of sources of income more particularly described in subparagraph (1)(b) above.

(6) In accepting the position for which you propose to nominate me it is my intention to serve for the entire term for which you appoint me and, if my term is indefinite, it is my intention to serve as long as you wish me to serve.

Very truly yours,

In order to prevent possible financial conflicts of interest while President, Governor Jimmy Carter is taking the following actions:

1. All common stock is being sold, consisting of 100 shares of Rich's, Inc. and 956 shares of Advanced Investors. A small net loss on this stock is likely.

2. Jimmy Carter's interest in (a) Carter's Warehouse and Carter Farms, Inc., and any funds related to them (b) all property except the private home and personal items, and (c) his father's estate will be transferred to a trust. Income or principal from the trust will be available to Jimmy Carter but only as distributions of cash.

3. No reports will be made to Jimmy Carter from the trustee or any investment advisers other than minimum tax information and an annual statement of the net value of the trust. Such information, when received, will be made available to the public.

4. All salaries, profits and direct or indirect benefits from the farms or warehouse will be terminated as of Jan. 20, 1977, except as described above.

5. Trust agreement will require that investment decisions be delegated to an independent institution if investment assets, other than land, exceed $200,000.

6. Carter Farms, Inc., comprised of all farm land owned by members of the immediate family (Jimmy Carter his wife and children) will be retained by the trust but will be rented and for an annual fixed amount. Annual after tax income to Jimmy Carter will not exceed the amount established during the first year (calendar year 1977). Thus, the Carter family will not be affected financially from profits or losses of any of the farm operations. Jimmy and Rosalynn Carter are resigning as officers and directors of this corporation.

7. Carter's Warehouse, a partnership consisting of Jimmy Carter, his brother Billy and his mother Lillian, will be either leased for four years for a fixed amount or sold, at the discretion of the trustee. Again, neither Jimmy Carter, his wife nor children will be affected financially from profits or losses of any of the warehouse operations.

8. An independent charitable foundation will receive contributions, outright ownership of a book of speeches soon to be published and royalties from "Why Not the Best?" The primary purpose of this foundation will be to establish a future library to house Presidential papers, documents and memorabilia.

RURAL MEDICINE

Mr. LEAHY. Mr. President, the New York Times of January 6, 1977, carried an excellent article entitled "Rural Medicine" by Karen Davis, a senior fellow at the Brookings Institution. Ms. Davis cogently and concisely pointed out the fact that an urban bias exists in many Federal programs for extending health services to disadvantaged Americans, despite the fact that the health needs of many rural Americans are equal to or greater than those of many of our urban dwellers.

The Health Manpower Act of 1976 contained a number of provisions to help alleviate the shortage of physicians and other health professionals in many parts of rural America. In addition, the Department of Health, Education, and Welfare has initiated a number of innovative projects for improving health care delivery in those areas. Notable in that regard is the increased use of nurse-

practitioners who treat patients under the supervision of physicians in nearby communities.

However, present medicare policies prohibit the reimbursement of nurse practitioners unless a doctor is physically present at the time of treatment. Likewise the medicaid programs in most States do not cover these services. These policies obstruct the access of many elderly and impoverished rural Americans to the health care they need. In some cases they have forced badly needed clinics to close down. In others, they do not open in the first place, because of the threat of having to close down 1, or 2 or 3 years after developmental funding runs out.

As Ms. Davis concludes in her article, it is time for these policies to be reversed. There is ample evidence to alleviate past concerns about the quality of care provided by nurse practitioners. There can be little, if any, doubt that medicare and medicaid reimbursement for nurse practitioner services would greatly improve the health of millions of rural Americans.

Mr. President, I commend this article to my colleagues, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

RURAL MEDICINE

(By Karen Davis)

WASHINGTON.—Federal programs have done much in the last ten years to extend health care to disadvantaged Americans. Unfortunately, these programs contain urban biases that cause them to largely bypass many rural people, who generally have greater health needs and fewer health services than urban residents. These restrictions also have impeded the growth of innovative programs that have emerged to overcome the difficult problems of developing stable rural medical-care delivery systems.

The myth that rural people enjoy good health and need less care persists despite solid evidence to the contrary. Infant-mortality rates are shockingly high in many rural areas. Age-adjusted death rates are higher in non-metropolitan than in metropolitan areas and have been declining at a slower rate. Chronic conditions afflict rural people more frequently and more severely than urban residents. Respiratory illness among adults and occupational accidents are particularly serious problems. Immunization rates and preventive-health services are also deficient.

There are many interrelated reasons for the failure of rural residents to share fairly in the benefits of modern medicine. Poverty rates are higher and private health insurance coverage is more limited. Furthermore, about 35 million rural residents live in areas with a shortage of physicians and other health professionals.

To try to alleviate this shortage, Congress recently passed a major health manpower act increasing the number of scholarships and insured loans to students in the health professions agreeing to practice in underserved areas.

Yet, while the health manpower legislation strongly encourages rural practice, other Federal programs are biased against rural areas. Medicaid, for example, was designed to deal mainly with urban poverty. Furthermore, most of the rural poor live in the South, where Medicaid programs are inadequate.

These factors, together with the shortage of health resources in rural areas, have contributed to great disparities in the distribution of Medicaid benefits: Medicaid payments average $5 annually per child in rural areas, compared to $76 for children in central cities.

Medicare pays rural physicians 60 percent less than their urban counterparts because it compensates physicians on the basis of prevailing charges, which are lower in rural areas. This practice makes it difficult to attract and retain rural physicians.

Several innovative approaches to delivering rural health services have been initiated recently. The Department of Health, Education and Welfare supports a limited number of rural health practices staffed by temporary National Health Service Corps physicians. The Robert Wood Johnson Foundation supports a model rural practice demonstration program. This program establishes nonprofit group health practices staffed by a professional manager, two or more physicians and non-physician health professionals to relieve physicians of some of the burdens of overwork and professional isolation typical in solo rural practices.

Many smaller towns cannot support their own doctor. In a number of communities, health centers have been established with financial support from state governments, the Appalachian Regional Commission, private philanthropy and community fund drives.

These centers are staffed by nurses or other health practitioners who see patients under the supervision of physicians in more distant communities.

Medicare has followed the policy of refusing to pay for patient care provided under these circumstances; most states do not cover these services under Medicaid. These restrictions threaten one of the most economical techniques of providing rural health services in remote areas. Without adequate reimbursement, many primary health centers will close when initial demonstration funds expire.

The experience of the Black Belt Community Health Program in Epes, Ala., exemplifies many of the obstacles that confront innovative rural health projects. Epes is situated in Sumter County, where two-thirds of the residents are black, one-fourth are illiterate and half live in housing without such services as indoor plumbing and telephones. Infant mortality is 2.5 times the national average. Hypertension, diabetes and impetigo are major health problems. The Federation of Southern Cooperatives, in Epes, has struggled since 1972 to establish a health clinic there. After an initial planning grant, the Government has declined to offer any direct assistance. With support from a private foundation, the Black Belt Center opened in April 1976, staffed by a physician from the area and two nurses.

Its financial future is uncertain. While nearly all of its patients are poor, Medicaid covers only one in four.

Without reform of Medicare and Medicaid to cover all the poor and to compensate rural health clinics adequately for the services they provide, the Black Belt Center and similar efforts to bring quality health care to Americans in hundreds of other rural communities will fail.

DEATH OF ROBERT HALE

Mr. MUSKIE. Mr. President, Robert Hale, who served Maine in the House for eight terms, died November 30. A Portland native, graduate of Bowdoin College, and a veteran of World War I, he began his political career in 1923, with four terms in the Maine House of Representatives, including one term as Speaker of the House.

He was elected to the Federal legislature in 1943, and his 16 years are the longest tenure of any member of the House from Maine in this century.

He was a strong and sharp-witted defender of his political philosophy, and as such he gained the respect of people in Maine of all political philosophies.

He served his State well as a member of the Merchant Marine and Commerce Committees, and continued a family tradition of service to Maine in Congress.

I thoroughly enjoyed my association with Bob when he was a member of the Maine congressional delegation during my service as Governor of Maine. He and Mrs. Hale were always warmly hospitable to me and Mrs. Muskie.

Mr. President, I ask unanimous consent that an article on Robert Hale in the December 2 edition of the Washington Post be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ROBERT HALE, 87, DIES, LAWYER, FORMER MAINE CONGRESSMAN

Former Rep. Robert Hale (R-Maine), who had maintained a law practice here since leaving the House of Representatives in January, 1959, died Tuesday at George Washington University Hospital after apparently suffering a heart attack.

He was stricken while en route to his office at 1125 15th St. NW. His death came one day after his law associates had honored him at a party marking his 87th birthday.

Mr. Hale, who first took his seat in Congress in 1943, was defeated for reelection in 1958. Just months prior to that last campaign, a House Elections Subcommittee had decided that he had won a bitterly contested 1956 election in Maine's First Congressional District by 111 votes.

During his eight terms in Congress, he was considered a caustic and witty opponent of Democratic administrations.

In 1952, when President Truman ordered government seizure of the nation's steel mills to avert a strike, Mr. Hale joined an unsuccessful move on Capitol Hill to cut off all funds for government operation of the mills.

He introduced a resolution designed to start the ball rolling for impeachment proceedings against the President. But both Republican and Democratic leaders shied away from such a move.

Born in Portland, Maine, a member of a prominent political family, Mr. Hale was a graduate of Bowdoin College. He was a Rhodes scholar at Trinity College, Oxford. He attended Harvard Law School and later practiced law in Boston and Portland.

During World War I, he served as an officer with the American Expeditionary Force in France.

In 1919, he was a legal adviser to the field mission sent by the American Commission to Negotiate Peace to Finland, Estonia, Latvia and Lithuania.

Mr. Hale was a member of the Maine House of Representatives from 1923 to 1930, serving as speaker during the last two years.

Shortly after he left Congress, President Eisenhower appointed him to a commission to conciliate differences between the United States and Switzerland.

Mr. Hale had been an overseer for many years of Bowdoin College and was active in its Washington Alumni Club and the Maine State Society here, which honored him with its "M" for distinguished service.

He was a member of Phi Beta Kappa, the American Bar Association and the Metropolitan Club.

He also had been a member of the Committee of 100 of the Federal City and was past president of the City Tavern Association.

He is survived by his wife, Agnes Burke Hale, of the home, 2722 N St. NW; a daughter, Mrs. Cornelius J. Tyson, of New York City, and six grandchildren.

The family suggests that expressions of sympathy may be in the form of contributions to Bowdoin College.

NATIONAL "PRAYER FOR THE PRESIDENT" DAY

Mr. ALLEN. Mr. President, the members of the South Avondale Baptist Church of Birmingham, Ala., have undertaken the sponsorship of a Prayer for the President Day to be observed on Sunday, January 16, 1977, and they have requested the President to proclaim this day as a national observance, a request in which I have joined.

As a people whose heritage is deeply rooted in religious faith, I believe that it is entirely fitting and proper for Americans to thank God for His past blessings and to pray for His continued guidance for our national leaders and for our country.

I am proud that this congregation in my home State has initiated this Prayer for the President Day, and I join my fellow Alabamians in urging that this observance be nationwide.

Mr. President, I ask unanimous consent that the explanation of this special day be printed in the RECORD, along with a copy of the message from Rev. H. L. Martin, national chairman of Prayer for the President Day and interim pastor of South Avondale Baptist Church, to President Ford.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

NATIONAL PRAYER FOR THE PRESIDENT DAY, JANUARY 16, 1977

Believing that the principles on which this Nation was founded were from God, and also believing that the sustenance of it is dependent upon the leadership of God, we submit the following purposes of this "Prayer for the President Day":

To encourage all churches and other places of worship in America to pray for President-elect Carter and his administration at a worship service on this day.

To ask Americans everywhere to spend more time in personal prayer on this day for President-elect Carter.

To ask Americans to commit themselves to praying daily for America and its leaders.

SOUTH AVONDALE BAPTIST CHURCH,
Birmingham, Ala.

Senator JIM ALLEN,
The Senate Building,
Washington, D.C.:

The following mailgram was sent to President Ford, we will appreciate any support you can give in having the President proclaim this national date of prayer.

Realizing the tremendous responsibility that rest on the leaders of our Nation and realizing the need for God's guidance in these responsibilities, the congregation of South Avondale Baptist Church, Birmingham, Ala., has voted to sponsor a National Prayer for the President Day on January 16, 1977. On this day we want to encourage people all over America to pause and pray for our Nation and its leaders and to commit themselves to continue prayer.

We, as a small congregation, but a congregation feeling strongly, about the power of prayer, ask that you proclaim January 16, 1977, as a National Day of Prayer.

We want to assure you of our gratitude for your great leadership and of our prayers for you and your continued service to our country.

H. L. "LINDY" MARTIN,
Pastor.

STUDIES AND MANPOWER REPORT CONTRIBUTE PERSPECTIVE TO NATION'S UNEMPLOYMENT AFFLICTION

Mr. HUMPHREY. Mr. President, in the past 3 months since we last met, I am happy to report the Republic has survived. But I am unhappy to report that the "economic pause that refreshes" has become the lull that depresses.

Since October, the unemployment rate has risen to 8.1 percent. Growth of the country's output of goods and services has slowed and stagnated. This is in the middle of a supposed recovery. The need for congressional action to alleviate the human suffering has never been more urgent.

What we failed to do in the 94th Congress haunts us today at the beginning of the 95th. We cannot be complacement, but neither should we belabor the past; we should learn from it, and not repeat our policy errors of omission. This can be a Congress of which historians will say, "they cared, they listened, they thought, they acted wisely." And with Mr. Carter in the White House, our opportunities for addressing the domestic crisis of underproduction and underutilization of the Nation's productive labor and capital resources are bountiful. But if we botch it, and miss those opportunities, the blame will be ours as it has never been before.

That is why I wish to share with my colleagues the conclusions of several important studies completed since we adjourned which add to the wealth of evidence supporting a comprehensive commitment to full employment through public policy.

First, I call your attention to the November Labor Department Employment and Training Administration study, "Federal Supplemental Benefits Post-Exhaustion Study."

When I first came to Capitol Hill, I was shocked to learn that economists did not believe we could sustain less than 4 percent unemployment. Gradually, however, some economists have expounded the thesis that that figure has edged up to 5 or 6 percent. And remember that every percentage point is about a million people that need food, shelter, and self-respect. Well, maybe I am old-fashioned, but I pledge never to reconcile myself to that.

Currently, of course, unemployment is higher than anyone's conception of a fully employed economy.

And why? Some economists, typically those who believe the so-called natural rate of unemployment is creeping up, have suggested that extended supplementary unemployment benefits kill the incentive to work, and add a percentage point or more to the unemployment rate. We are all familiar with that contention. If they are right, then we are in a paradoxical situation: relieving the suffering of the unemployed results in more unemployment! But if they are wrong, then we must look elsewhere for the reason why unemployment has stuck of late at the historically high and unacceptable rate of about 8 percent. And, we must look elsewhere for the remedies.

It seems plausible that, if unemployment insurance causes unemployment by inducing people to remain in the labor force without accepting jobs, when benefits cease, they will either accept a job or drop out of the labor force.

The Labor Department started with that hypothesis and then with the cooperation of the State employment security agencies in California, Missouri, Nevada, New York, and Wisconsin, tested it empirically. They found that, within 2 months of exhaustion of benefits, 80 percent of the exhaustees responding were still in the labor force. Sixty-three percent of the exhaustees were still unemployed 2 months later. Thirty percent of those who did leave the labor force cited retirement as the reason. Perhaps most instructive, the study found only 6 percent of the exhaustees relied on welfare after the unemployment benefits ended, and half of those had received it while on unemployment insurance.

According to the study, "the low reemployment rate and the low incidence of labor force withdrawal shortly after exhaustion do not support the hypothesis that longterm beneficiaries 'ride with' the system and then immediately take jobs or leave the labor force."

Another study, this one by a respected private research organization, Mathematica, Inc., entitled "Experiences of Unemployment Insurance Recipients During the First Year After Exhausting Benefits," generally confirms the Labor Department's findings and conclusion. The study was conducted under contract with the Manpower Administration.

This research focuses upon interviews of 2,000 individuals whose unemployment benefits expired in October 1974, in Atlanta, Baltimore, Chicago, and Seattle. Unlike the Labor Department's own study, this included three interviews over the course of a year.

The study found that, "our exhaustees did indeed continue to have labor-market trouble long after the original benefit termination." Within 4 months, re-employment was between 24 and 25 percent. A year after exhaustion, it "had still only reached 36 percent." The study notes that the findings are consistent with earlier post-exhaustion studies. Likewise, labor force attrition was not extraordinary: after 4 months, 14 percent had left the labor force, and after a year, 24 percent had left. "[O]nly among older exhaustees and women of childbearing age are there significant numbers with long periods of nonparticipation" within the course of the year following exhaustion, the study concludes. Of those who find a job within a year, the job is approximately 12 percent less remunerative than their previous employment. Of those who leave the labor force, over 11 percent do so because they retire, 4 percent because of ill health or disability, and 20 percent because of frustration and discouragement at their reemployment prospects. Such frustration seems understandable in a group without work in a hostile labor market for so long.

REPORT OF THE NATIONAL COMMISSION FOR MANPOWER POLICY

Finally, we should pay careful attention to the recommendations of the Na-

tional Commission for Manpower Policy which released its second annual report to the President and Congress last month. The Commission, established under title V of CETA, is chaired by Dr. Eli Ginzberg, professor of economics at Columbia, and counts among its prestigious members Dr. Juanita Kreps, the next Secretary of Commerce.

The 20 recommendations outline an action program fundamentally compatible with the direction charted by the Humphrey-Hawkins Full Employment and Balanced Growth Act which Congressman AUGUSTUS HAWKINS and I will reintroduce in the next few days. The program shares the values embodied in that legislation.

Recommendation No. 1 implores the Congress to recognize the costs of a drifting economy:

Early action by the Congress to insure that full employment is a national commitment. The pursuit of this goal should have priority until it is realized.

There are some differences between the Commission recommendations and the specifics of the Humphrey-Hawkins bill. For example, in striving for full employment, the Commission urges policy targets in three statistical categories: the unemployment rate, the net change in the number of employed persons, and the changes in the unemployment rates of groups characterized by differentially high unemployment. I take these suggestions as constructive criticism which should be thoroughly explored in developing a national full employment strategy. And to the extent they are broader than those embodied in Humphrey-Hawkins, they are permissible under the discretionary provisions of the act. Additionally, the unemployment rate target is 5 percent rather than the implied 4 percent overall rate envisioned in the bill. This is a matter for discussion where reasonable people might differ.

The Commission recommendations contain details for an expanded experimental manpower program so we may learn those things we do not already know about how such efforts are most efficiently designed and administered. Youth unemployment is singled out in an extensive set of subrecommendations which concentrate on ameliorating the well-recognized plight of those "young people, in or out of school, from disadvantaged backgrounds who lack competence and skill and who, if they are not helped, may never make an effective link to the world of work."

I strongly urge all Senators to read the summary of recommendations from the "Second Annual Report of the National Commission for Manpower Policy," it would be well worth the time. I ask unanimous consent that the summary be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

I. SUMMARY OF RECOMMENDATIONS

This summary presents the major recommendations developed by the National Commission for Manpower Policy in its *Second Annual Report*. The full recommendations, together with supporting analyses, are contained in the text of the report.

The Commission recommends the following steps to establish an employment strategy for the United States:

(1) Early action by the Congress to insure that full employment is a national commitment. The pursuit of this goal should have priority until it is realized. The Commission holds that full employment is attained when the number of job opportunities approximates the number of jobseekers able and willing to work at existing wage levels.

Since the number of jobseekers changes in response to a wide range of individual, market, and societal forces, full employment is a movable rather than a fixed, goal. Since the proportion of individuals seeking to work full-time or less than full-time during a year or throughout their active adult lives is likely to change as the society and the economy change, the Commission recommends that:

(2) The Congress, in establishing a national commitment to full employment, adopt a measure other than a specific unemployment rate, which may not be appropriate for some future time when the nation may be closer to a balance between job opportunities and jobseeker.

(3) Since progress toward the goal of full employment requires the establishment of interim targets, each step must be monitored and, when indicated, corrective actions initiated; moreover new targets must be set as earlier ones are reached.

(4) Three measures be used to assess the nation's progress toward full employment: the unemployment rate, the net change in the number of employed persons, and the changes in the unemployment rates of groups characterized by differentially high unemployment.

(5) The President and the Congress set, as a target to be achieved within four years, an unemployment rate of 5 percent and that special efforts be made to reach this objective prior to the end of 1980.

The importance of measuring the progress of the nation in achieving full employment in terms of net new jobs created stems from the fact that the unemployment rate is directly affected by large fluctuations in the numbers who enter and leave the labor force. The President has suggested a job expansion of 2.5 million in 1977. In the Commission's view, achieving this goal would represent a marked improvement in the employment situation. Consequently, the Commission recommends:

(6) Intensive efforts in the four-year period ahead, 1977–1980, by the leaders of government, business and labor working together to establish a climate conducive to achieving a rate of job formation in the range of 2.5 million per year.

Since it is estimated that the labor force will grow in excess of 1.5 million annually, if the nation is to achieve a 5% unemployment target by 1980, it will require a continuing high rate of job expansion.

In the Commission's view, there is little prospect that the nation will achieve a 5% unemployment rate by 1980 through the use of macro-economic instruments—that is, through budget deficits, tax reductions, increased expenditures, and changes in monetary policies—without rekindling the dampened, but not extinct, embers of inflation. Therefore, the Commission urges the considerable expansion of manpower programs which, when carefully correlated with macroeconomic policies, can provide the underpinning for sustainable economic development with significantly lowered unemployment helping to hold the threat of renewed inflation at bay.

The third interim target that must be aggressively pursued is the more rapid reduction in the unemployment rate of disadvantaged groups, particularly those whose members are characterized by low skills, low income, minority status, or limited job experience. The unemployment rate of black adults has been twice the national average over most of the last two decades. Minority youth currently have an unemployment rate five times the national average.

Accordingly, the Commission recommends that:

(7) The unemployment rate for members of disadvantaged groups be carefully monitored by the Joint Economic Committee of the Congress and, unless the gap between their unemployment rate and the aggregate unemployment rate is being narrowed steadily and substantially, their labor market difficulties be reassessed so that federal manpower programs can be rechanneled better to serve their needs.

The Commission believes that there is a need to create employment opportunities for many who currently receive income transfer support. To accomplish this, the Commission proposes an "assured jobs program" which will provide work, on a voluntary basis, for those with low family income and a demonstrated labor force attachment, who have been receiving unemployment compensation for at least 15 weeks.

This program would consist of pilot projects in ten sites to be selected by the Secretary of Labor on the basis of plans submitted in response to his specifications. The principal aims of such a program would be: (a) to learn more about the preferences of unemployed individuals for work, even for modest pay; (b) to test the capability of local governments to prepare worthwhile projects the work forces on which would not compete unfairly with regular employees who receive prevailing wages and benefits; and (c) to learn about some other dimensions involved in the government's capacity to assure jobs, at modest wages, to unemployed individuals with a labor force attachment, (e.g., potential scale, supervision, transition to regular employment, etc.). In order to be eligible for these "assured jobs," applicants would have to meet an income test, such as that recently written into Title VI of the Comprehensive Employment and Training Act (CETA).

The Commission recommends, then, pilot projects at ten sites, at two of which the requirement of prior labor force attachment might be waived, which would create jobs for a maximum total of 50,000 enrollees, at an annual cost of about $6,000 per job. Accordingly, the Commission recommends:

(8) The appropriation of $300 million for a two-year demonstration program of "assured jobs" with a maximum enrollment of 50,000 workers in 10 selected sites.

The Commission notes that the second Congressional Budget Resolution provides for a maximum of 500,000 CETA Title VI public service jobs and that funds have been appropriated up to the present for 260,000. In light of the current disturbingly high unemployment rate, the Commission recommends that:

(9) The Congress, as soon as possible, appropriate funds to increase the level of CETA Title VI public service employment to 500,000.

The Commission makes this recommendation despite its previous warnings about the dangers of a rapid expansion of PSE. In now recommending the expansion of 500,000 PSE jobs, the Commission has been encouraged by recent improvements in the legislation governing PSE, such as the use of the project approach, which minimizes the likelihood of prime sponsors substituting federal dollars for their own thereby eroding the job creating potential; the involvement of nonprofit and community based organizations; the necessity that enrollees meet an income test and that the target populations consist of persons who have been unemployed for 15 or more weeks, exhausted their unemployment benefits, or are on welfare.

The Commission is convinced that none of the objectives cited above, the 1980 5 percent unemployment target, an annual average

rate of job creation in the 2.5 million range and a faster than average reduction in the unemployment rates for disadvantaged groups, can be achieved by the federal government alone. To accomplish each goal will require a national effort which will involve every major sector of our society, including state and local governments, business, labor, nonprofit institutions, and community-based organizations. Since the private sector is the cutting edge of the American economy and since two out of every three jobs are in the private sector, the only prospect of achieving accelerated job expansion, reduction of unemployment, and the absorption of large numbers of the disadvantaged into the regular economy is through the active involvement of business and labor, working in close association with government toward the accomplishment of these priority national goals. Accordingly, the Commission recommends that:

(10) The President-elect, early in his administration, explore with the leadership of the groups named above, particularly the leaders of business and labor, the ways in which they can most effectively participate in helping the nation to achieve its employment objectives. There should be continuing dialogue and interaction in which the private sector is encouraged to make an input into governmental manpower policy at the same time that it agrees to a more active role in implementing manpower programs.

Since almost half of the 7.8 million unemployed are young people between the ages of 16 and 24, the Commission recommends a sizable manpower effort over and above that currently supported under the Comprehensive Employment and Training Act. It further recommends that much of the $2.3 billion of CETA funds now expended on services for youth be reprogrammed along the following lines.

Most young people experience some difficulty in transition from school to work and could profit from a greater infusion of career elements into their educational experience. The center of the Commission's concern, however, is young people, in or out of school, from disadvantaged backgrounds who lack competence and skill and who, if they are not helped, may never make an effective link to the world of work. Accordingly, the Commission recommends:

(11) The development of a stronger youth program focused on improving the employability and employment of the nation's disadvantaged youth. Such an approach should include:

(A) A doubling of the Job Corps level to serve an additional 20,000 youth. This expansion should be contingent on the establishment of training-job linkages, such as those currently in effect whereby construction unions supervise pre-apprenticeship training in selected centers and guarantee employment for graduates.

(B) The conversion of the Youth Conservation Corps program from an eight-week summer program to a year-round training program for 50,000 young people from low income families, particularly (but not exclusively) those from rural backgrounds.

(C) The establishment for 400,000 in-school youth of a year-round, skill training and work experience program which can pay training stipends to disadvantaged youths who otherwise would be unprepared to obtain and keep jobs when they leave school. The success of the effort will require, at a minimum, strong local leadership which should include educators, labor, community based organizations, local government officials and the involvement of employers, both large and small, in every sector—private nonprofit and government—to assure an adequate number of suitable training and work experience opportunities.

(D) The expansion of training and employment programs for out-of-school, unemployed youth between the ages of 18 and 24 who are so discouraged that they have ceased looking for work. The Commission recommends a program which will serve 250,000 youth. The Commission hopes that different communities will explore different program designs to implement this effort. It is convinced that well managed programs which will provide meaningful work, strong training components and, above all, close linkages with employers, will substantially assist these young people to move into regular employment. The combined cost of the four programs focused on assisting disadvantaged youth will require $1.5 billion of new expenditures and a refocusing by the CETA prime sponsors of $1.5 billion of the several billion dollars of CETA funds now expended on services for youth.

The Commission is concerned about the high unemployment rate among young veterans, especially those who belong to minority groups. Accordingly, the Commission recommends that:

(12) The President establish a new interagency committee of representatives from the Departments of Defense, Labor, and Health, Education and Welfare, the Veterans Administration and Office of Management and Budget to determine the scale and scope of training and related manpower services that will enable these young people to make the transition to civilian life and employment. The Commission recommends that Congress appropriate the funds required to the Department of Defense to help prepare prospective returnees.

In 1975, in the face of a deepening recession, the Commission recommended to the Congress that Federal Supplemental Benefits (FSB) be paid to unemployment insurance beneficiaries for an additional 26 weeks, up to a total of 65 weeks. Now, however, the Commission recommends that this legislation, which will expire at the end of March 1977, not be reenacted. In consonance with its belief that it is better for employable persons to work or to be in training for work than to receive extended unemployment compensation benefits, the Commission recommends that:

(13)(A) In lieu of further FSB, which cost about $3.3 billion in FY '76, this funding be rechanneled for manpower services, e.g., public employment jobs, training opportunities, or mobility allowances, to help meet the needs of persons who have exhausted their UI benefits, and who meet an established criterion of need. However, since the FSB program may be terminated prior to the expansion of alternative manpower programs, Congress should consider a brief extension of the FSB program up to September 30, 1977, to permit an orderly phase-down and the transition to manpower programs of those in continuing need of assistance.

(B) The scale of placements in the WIN program be doubled during the coming year, through greater reliance on placing employable WIN enrollees in PSE jobs in local governmental or nonprofit organizations such as schools, child care centers, and hospitals. The cost of such an expanded effort would be in excess of $400 million. In addition to more intensive placement efforts, it would be desirable to provide occupational training for some WIN registrants so that they could compete for more than the lowest paying and least attractive jobs.

At present, registrants under WIN and the Food Stamp program are subject to different work tests but, informed federal officials believe that the over $30 million expended annually on applying the work test to food stamp recipients is not productive. The Commission recommends that:

(14) The two work tests for Food Stamps and WIN be standardized and if the Employment Service cannot find job placements in the private sector, it should refer employable persons to programs (primarily CETA prime sponsors) which provide training or employment in a public service job.

Despite its preference for work instead of welfare, the Commission recognizes that many millions of individuals need extended income transfers for reasons of health, family responsibility, age, or because of a lack of employment opportunities. The Commission therefore recommends:

(15) Early Congressional action to strengthen the existing income maintenance system by establishing a minimum level of federal benefits for all individuals and families.

If the Administration and the Congress seek additional reforms of the income transfer system these should include:

(16) Legislative and administrative changes that would strengthen work incentives by providing income supplementation to the working poor so that they receive more income for working than for not working.

Since the severe recession of 1974–75 demonstrated the need that the nation have an antirecessionary manpower program in place before unemployment rises again, the Commission recommends that:

(17) A permanent, standby antirecessionary program be put into place and that it contain at least the following elements:

(A) Expanded remedial education and basic skill instruction which will be available in a period when the net social cost of training is lower because many potential trainees cannot find jobs.

(B) A program of antirecessionary public service employment, involving federal, state, and local governments, nonprofit agencies and community organizations.

(C) An inventory of selected antirecessionary public works, including community development projects which would employ considerable numbers of unskilled residents in low income areas.

(D) Countercyclical revenue sharing arrangements with the states and localities which will help them maintain basic public services.

Although the federal government became involved in manpower programs in the early 1960s in an effort to provide retraining for skilled workers who had lost their jobs, the Commission believes in the importance of quality training for enhancing the employability and employment of the hard-to-employ who, by definition, lack skills and competences. The quality of the training component in manpower programs has also declined during the recent recession, in part because prime sponsors under CETA have sought to stretch their dollars over the largest number of enrollees. In light of these weaknesses in the training effort, the Commission recommends that:

(18)(A) The Department of Labor, in association with the Department of HEW, provide technical assistance to prime sponsors who desire to strengthen their training facilities and programs.

(B) Congress provide the Secretary of Labor with an additional $100 million for incentive grants to be distributed among prime sponsors, on a competitive basis, who agree to strengthen their training efforts and to reallocate some of their Title I funds to this end.

(C) In view of the substantial reduction in on-the-job training in the private sector during the recent recession, the Secretary of Labor should launch a renewed effort to encourage the nation's major corporations to accept targeted numbers of hard-to-employ persons, including those who have exhausted their unemployemnt insurance benefits, out-of-school youth, and employable persons on the welfare rolls.

The key elements in such a drive would include a basic training subsidy of around $2,000 to $3,000 per person, simplified ad-

ministrative and record-keeping requirements, and an effort to create public understanding and appreciation of the importance of this effort.

Since the outlays for manpower programs in Fiscal Year 1976 totaled around $4.8 billion and since several billion additional dollars are required to implement the recommendations contained in this report, the Commission considers it essential that the knowledge and information base which informs the design, implementation, and evaluation of these manpower programs be broadened and strengthened. The Commission therefore recommends that:

(19)(A) Congress provide that 1% of total program appropriations be devoted to reesarch and 2% be utilized for experimental and demonstration programs. The Commission notes that it is less expensive for the nation to invest small sums in determining whether a new approach would be effective than to establish a new program and to learn later that the approach is inherently flawed.

(B) With respect to experimental and demonstration efforts, the Commission recommends a range of exploratory approaches, including:

New ways to use tax and other financial incentives to encourage employers to hire, train and retrain hard-to-employ persons; the potentialities of "supported work" projects, directed to enhancing the employability and employment of such difficult-to-place groups as ex-offenders, ex-drug addicts, female heads of households who have been out of the labor force, and ex-mental patients; development of part-time employment opportunities in public agencies or community organizations close to the homes of women on welfare with young children and senior citizens who would welcome the opportunity of being engaged in useful work.

The effectiveness with which the federal dollars are translated into manpower services for unemployed and underemployed persons throughout the country depends on the effectiveness with which these programs are designed, coordinated, and delivered. The Commission has been given a continuing responsibility by the Congress to address the effectiveness and coordination of manpower and related programs. In April 1977, it will submit its second major report on the coordination of manpower and related programs. The Commission recommends, at this time and prior to the completion of that report, action along the following lines:

(20)(A) Arrangements within the Executive Branch of the federal government to assure improved coordination at the decision-making level between the macro-economic decisionmakers and those responsible for manpower policies and programs.

(B) The Congress hold periodic meetings of the Joint Economic Committee and the Committees on Labor in the House and Senate to assure simultaneous consideration of macro-economic and manpower policies. To facilitate such coordination, the Employment and Training Report of the President should be recast to provide policy guidance and, together with the reports from the Council of Economic Advisers, serve as a point of departure for Congressional exploration and assessment.

(C) Every level of government (federal, state and local) seek to increase the participation of the principal nongovernmental sectors, particularly business, labor, and community-based organizations in the design, management and operation of manpower programs. The Commission believes that one of the most serious shortcomings in the manpower arena since the early 1960s has been the failure to involve these nongovernmental groups.

The principal program recommendations advanced in this Report of the Commission can be summarized as follows:

An expansion of proven existing programs, such as WIN, the Job Corps, and public service employment;

A rechanneling of financial resources now paid to unemployment compensation beneficiaries for more than 39 weeks to manpower training and employment;

A reprogramming of the summer and in-school youth efforts into a year-round program for in-school youth to provide training and structured work experience;

Creation of a new employment and training program for disadvantaged inner city and rural out-of-school youth.

The financial resources required to accomplish the most expensive of these initiatives, that of expanding the current level of PSE under Title VI of CETA from 260,000 to 500,000 jobs, have already been provided for in the second Congressional Budget Resolution, but the funds must still be appropriated.

The expansion of the services for disadvantaged youth can be largely accomplished by a rechanneling of a significant portion of the almost $2.3 billion currently expended on manpower services on their behalf. Over the next two years, to allow for new and improved mechanisms to be put in place and expanded, additional funds of up to $1.5 billion may be required.

A substantial amount of federal monies are currently expended to provide benefits to those receiving unemployment compensation beyond thirty-nine weeks. Such funding should be used, instead, to expand the training and employment opportunities for those presently receiving Federal Supplemental Benefits.

The total net new appropriations spread over FY '77 and FY '78 would be in the range of $4.5 billion. At the peak level of enrollment, some 780,000 people would be provided services by this increased level of resources, and this could decrease the unemployment rate by about one half of one percent.

The Commission, in recommending sizable additional funding for manpower programs, is not oblivious to the size of the federal deficit and the undesirability of adding to it. However, the Commission is influenced by the following considerations:

High unemployment is a major cause of the large deficit;

Unless the high unemployment rate is reduced, the deficit will increase;

Assisting hard-to-employ persons to acquire skills and enhance their employability would add to the growth potential of the economy which holds the greatest promise of avoiding further deficits.

The Commission's plans for 1977 include a continuing assessment of the actions taken to implement the foregoing recommendations and the progress that is being made to achieve the goals set forth. On the basis of this continuing assessment, it will formulate revised and new recommendations to assure that the nation moves as rapidly as possible towards the achievement of full employment.

The Commission will continue to be responsive to its specific Congressional charges. These include several new mandates: a study of the substitution effects of PSE; advising the newly established National Commission on Employment and Unemployment Statistics; working with the National Advisory Council on Vocational Education; and offering counsel to the new National Commission on Unemployment Compensation when it is established. As noted earlier, the Commission is preparing a major report to the Congress on the delivery and coordination of manpower programs.

The Commission will also pursue investigations in the following aspects of an employment strategy:

Immigration policy and illegal immigrants;

The factors affecting the rate of job expansion, including the influence of foreign trade policy, taxes and other barriers to the expansion of employment;

The employment outlook in health, scientific and other technologically based industries;

The manpower implications of the nation's energy policy;

The experience of Organization for Economic Cooperation and Development countries in dealing with their employment problems and the relevance of this experience for the United States.

PUBLIC CONCERN ABOUT RURAL HEALTH CARE

Mr. CLARK. Mr. President, I am pleased to report signs of progress and reasons for hope in the effort to bring health services to rural America. Within the past several months, citizens from across the Nation have joined in a variety of forums to discuss the path that must be followed to achieve the goal of better access to primary care in rural areas and small towns.

In October, policymakers, health practitioners, and citizens from 14 States met in Nashville for the Southern Rural Health Conference. During that same month, the Senate Rural Development Subcommittee began an inquiry into rural health services through a series of field hearings in Iowa. Last November, a segment of the program at the Second National Conference on Rural America held in Des Moines was devoted to rural health issues. Finally, my office and Rural America, Inc., convened a meeting in December of about 100 congressional aides and interest group representatives to initiate a legislative effort in this area.

Indicative of this new public concern is the increased media attention being given to health problems of rural citizens. I am submitting for inclusion in the RECORD some examples of articles appearing in the past few months.

Two of the articles describe State and regional efforts to bring health manpower to medically underserved areas. A Washington Post article demonstrates how the WAMI program—a regional medical education program sponsored by the States of Washington, Alaska, Montana, and Idaho—provides us with an excellent model that should be duplicated elsewhere.

A recent article in the University of Iowa Spectator outlines the successful efforts of the university's college of medicine in expanding its statewide family practice residency program. During the October rural health hearings, I visited several rural satellite clinics in Iowa that were staffed by young physicians participating in the residency program.

The New York Times published an op-ed piece on rural medicine by Karen Davis, perhaps this country's most knowledgeable expert on the impact of Federal health programs upon rural Americans. Finally, a Washington Post editorial identified discriminatory medicare reimbursement policies as a major obstacle to improving health services in small towns and rural areas.

The Post editorial concluded by stating:

The usefulness of the conference being held in Nashville—the first of its kind—will be measured as much by the follow-up of its recommendations as by the actual discussions.

It is now our responsibility to implement the changes in Federal health programs that are necessary to address the health needs of rural citizens.

I ask unanimous consent that the articles on rural health be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

A DOCTOR'S CHOICE: FORKS, WASH., AND NOT THE BIG TIME

(By Natalie Davis Spingarn)

FORKS, WASH.—One might think this small logging town at the northwestern corner of the United States would have had little trouble attracting a new doctor. It boasts many attractions: Towering dark firs. Clean air. Clear streams and lakes you can fish. Dramatic beaches with huge rocks jutting into the Pacific. A new community hospital and clinic, and the veteran doctor, who had served the 10,000 people hereabouts for a quarter century, getting ready to retire.

But potential replacements came—and did not stay. For more than four years, the hospital stood virtually empty, and people here began calling it the "million dollar band-aid station." Expectant mothers and injured loggers had to travel 60 miles around Lake Crescent to the hospital at Port Angeles. Forks (pop. 2,000) put up a sign at the edge of town: "Welcome to Forks, Doctor Needed."

The faded sign is gone now. Dr. Stephen H. Kriebel settled in after completing his residency in July, 1975. Now this bearded,, 30-year-old physician runs a five-person medical team and serves as chief of staff at the hospital. Before he arrived, not one child had been born at Forks Community Hospital. In the first half of this year, 60 babies were delivered. The number of surgical procedures—appendectomies, hernia repairs, cyst removals—has risen from zero to more than 70.

The doctor's wife, Lela, conducts childbirth education workshops at the clinic for prospective parents. This summer the Kriebels and their 2-year-old daughter moved into a new home on a 15-acre riverside spread just outside Forks. It looks as though Forks has its new young doctor at last.

The success story was due in large part to WAMI, a decentralized regional medical educational program which takes its name from its four participating states—Washington, Alaska, Montana and Idaho. WAMI whetted Kriebel's appetite for modern rural practice and gave him the chance to find out if he was suited for it.

GREEN TWIGS

Whether the overall doctor shortage is a thing of the past is a matter of controversy. But one can definitely say there is a need for more rational doctor distribution. Nearly two and a half times as many physicians practice in metropolitan areas as in small towns and rural America. The proportion of doctors who consider themselves general practitioners dropped from 50 to 16.4 per cent between 1949 and 1974, while the proportion of specialists rose from 37 to 80 per cent.

WAMI was founded in 1971, with funds from a private foundation and the Department of Health, Education and Welfare, as a regional effort to address such problems. It is a vast region with five time zones, 6 million people (most of them in the Puget Sound area), 20 per cent of the U.S. land mass—and one medical school, at the University of Washington in Seattle.

"When the twig is green, we begin to bend it." So says M. Roy Schwarz, the University of Washington physician who runs WAMI. Experience has shown that half the medical students from rural areas return there to practice and 70 per cent of those who complete the last phase of their training in a rural area become country doctors. WAMI is built around these two findings, together with the fact that building a medical school at a cost of $80 to $100 million was simply not an option.

Participants are admitted as regular U. of Washington students, but many begin their education away from Seattle—at the Universities of Alaska and Idaho, Montana State and Washington State at Pullman. There, in addition to their basic science studies, they spend half a day once a week working alongside a local physician or preceptor. They visit remote Alaskan villages, Indian reservations in Idaho and Montana and migrant farm camps in Washington.

Romance is a word Dr. Schwarz uses a good deal when he talks about WAMI: "We don't expect students to learn about diagnosis and treatment of disease in that first year. It's romantic at that point. We only expect doctors to enthuse their students. Show them what rural practice is like. Simply, what's their lifestyle? Are the people happy or aren't they? What do they do for cultural experience and education?"

In the second and third years, students return to Seattle for more traditional training in a major medical center. After the second year they choose a "pathway" or major field of study.

Then, when the students have gained more medical sophistication, they go back into the small communities for from six weeks to several months' clerkships in family medicine, pediatrics, obstetrics/gynecology, internal medicine and psychiatry at community clinical units (CCUs) in 14 towns across the region, towns such as Kodiak, Alaska, or Missoula, Mont. Supervised by community physicians, they work in doctors' offices, in community clinics, hospitals and emergency rooms.

It takes a long time to make a doctor like Stephen Kriebel, and the students who entered WAMI's first year will not finish their training until 1978. But the WAMI clerkships are also open to post-M.D. residents.

Kriebel, a graduate of the University of Pennsylvania medical school in Philadelphia, was tired of the hassle and dirt of urban life when he and Lela moved to Seattle for his residency in family medicine. But he has never seriously considered small town practice—probably, he believes now, because, like most young doctors, he had trained at a big city academic medical center and thought you had to practice near such a center to offer patients the advantages of modern quality care.

MEETING THE COMMUNITY

That changed when he spent two months at the WAMI Community Clinical Unit at Omak, an isolated little town in north central Washington. There WAMI students deal with everyday medical problems: An elderly lady feels queasy; a man suffers severe stomach pains; a new patient comes in for a complete checkup; a baby falls down or suffers convulsions. They work as team members with practicing doctors and other health workers, such as nurse practitioners.

They also get a taste of life outside the office. They attend the county medical society meetings, meet local bigwigs, get to know how the school board and chamber of commerce are structured. They visit the mills and stores where patients work. They sample local hiking, fishing or hunting.

If the WAMI student is married, the program pays transport for his or her spouse to and from the clerkship assignment and provides the couple with a furnished apartment. Dr. Schwarz explained: "If a doctor's wife doesn't like it, he'll either leave or get himself a new wife. Neither is desirable."

Pointing to the conservatism of small towns, Schwarz said, "We have to be careful not to send any 'arrangements' out there." But sometimes different lifestyles can be accommodated. A woman in labor rejected a WAMI student with a lengthy hairdo and other counterculture accoutrements. "I have enough troubles," she told him. "I don't want you and your lifestyle." The student consulted his supervisor, shaved off his beard, changed his clothes—and delivered the baby. Now the two couples—doctor and patient and their respective spouses—are good friends.

What drives most doctors away from rural practice—and what probably kept a new doctor away from Forks for so long—is the isolation; they feel alone out there. At Omak, Kriebel liked his first encounter with a well-run modern rural practice. He was part of a team; he did not feel isolated from the medical mainstream.

Through WAMI's continuing education program, University of Washington faculty members visit the community clinics each month. Courses are offered in subjects from "Alcoholism" to "Treating the Untreatable." In addition, community clinic doctors, holding part-time appointments on the university faculty, visit Seattle for conferences and courses and can consult specialists there through a 24-hour-a-day telephone hookup called Med-Com.

"SPREAD THE WORD"

Before he completed his medical education, Steve Kriebel signed up with the National Health Service Corps, a U.S. Public Health Service program which recruits doctors for underserved areas and guarantees them a minimum salary. Upon completion of his residency, he examined the Corps' list of communities in need, noticed the name of Forks and remembered that years earlier, while passing through on a backpacking trip, he and Lela had noticed that sign: "Welcome to Forks, Doctor Needed." They decided to give it a try.

Steve could have fulfilled Corps regulations by going to work in a city slum or a larger country town. He has, he believes, made the right choice: "The more I live here the more I appreciate it. You have to be honest because everyone knows everyone else. You have to be open and friendly. You can't hold grudges because you run into the same people every day. There's space."

"It's a great place," Lela said. "Spread the word—the people are great, the closeness is nice. You have to be good to your neighbors because they know everything about you. If you need help, people are ready to help."

True, it rains too much, and school is not a big priority; with $100 a day to be made in the woods, there is a high dropout rate. But classes are small and, the Kriebels feel, the teaching is better than in many big city schools. They have had no trouble making friends. The average age in this community is 25, and the doctor and his wife enjoy working with young families. Obstetrics, the doctor said, is a happy part of practice.

Forks too remote? Why, they can get cable TV in town, and travel abroad with more ease than most of us (from Port Angeles to Victoria in British Columbia in two hours.) They can drive to Seattle in four.

Fork's macho reputation? "There's no more frontier violence here than there is in Washington, D.C.," Lela says. You don't have to lock your car or even your house, Steve adds.

Lela's worries center around her husband: "I'm afraid he'll work too hard and we will never see him. I'm afraid that we won't be able to find a doctor who will be willing to stay and share the responsibility." Though veteran Dr. Edwin Leibold has not yet actually retired, he is tapering off and Kriebel had a taste of 20-hour days before Dr. John Hemmen, another NHSC recruit, joined the Forks clinic team this past summer. "You cannot really practice alone here," Kriebel says. But he knows that Dr. Hemmen may

leave for further residency training next summer when he fulfills his work obligation in return for the Corps' financial help toward his medical tuition.

Still, Kriebel is practicing family medicine now in the way he wants, treating patients regardless of age, sex or disease and emphasizing continuous care and maintenance of good health. Patients—about 40 a day—get an introductory slip of paper when they come into the office. "Family Practice," it reads, "is a revitalized concept of General Practice. Professionals being trained in Family Practice today are trained not only for the usual acute type problems, but also for preventive care and behavioral and emotional support for the family."

Kriebl's job satisfaction is partly, he says, a personality thing. "I'm attracted to a challenge" and he finds family practice a challenge. "I like having long-term direct contact with patients, with the whole families and with a community. In other people-oriented specialties, even in psychiatry, you don't get to know people over a whole lifetime."

The hospital emergency room sees about 600 patients a month. Specialists now visit Forks on a regular basis—a general surgeon twice and an orthopedic surgeon once a week, and an optometrist and several pediatricians periodically. But 95 per cent of the care Dr. Kriebel and his team offer is, he says, "definitive." If he needs a consultation, he can get the best via two toll-free lines to Seattle.

The clinic charges patients a fee for services averaging $9.25 per patient visit. Most patients' bills are covered by private or public health insurance, including Medicare, Medicaid and the Indian Health Service.

There are, of course, some problems: slow paying patients, an important local insuror who balks at the rates of paraprofessionals. On the whole, however, the clinic is doing well. It is attracting federal grants, including HEW funds to hire a badly needed counselor for alcoholics, and it is reimbursing the NHSC which supplied the start-up funds most young doctors need to launch a practice. The way things are going, it will turn into a self supporting group practice, with Dr. Kriebel doubling his present $20,000 salary.

A WORKABLE FORMULA

So, no expensive Park Avenue practice, no big shot super-specialty. The Kriebels seem satisfied with that prospect, and they may be more representative of the contemporary ethic than most people realize. Only four or five members of Steve's med school class were attracted to family medicine; this year 60 per cent of all graduating medical students chose to specialize in internal medicine, family medicine, obstetrics/gynecology or pediatrics. "Its a generational thing." Steve believes.

Here in the Northwest, WAMI's leaders are encouraged by results of their program thus far. More medical students are opting for primary care practice; the number in the three classes who chose the family practice "pathway" after WAMI got started was 147 as compared to 88 in the three pre-WAMI groups. Evaluation seems to demonstrate that there is no difference between the academic performance of the students who spend their first year at the medical school in Seattle and those who spend it out at the cooperating universities. And the attrition or drop-out rate is no different (a low 3 per cent across the country). After some misgivings, the University of Washington Medical School faculty has come to accept and support the program, and it has gained accreditation for the full seven years.

Without a cent spent on expensive brick and mortar, the number of far Northwest residents who have had the chance to attend medical school has increased enormously (40 per cent in Washington, 500 per cent in Montana and 900 per cent in Alaska). And almost two out of three of the doctors who, like Kriebel, have been through the WAMI training program and completed their residencies have begun to practice in rural areas—45 per cent in towns of less than 5,000 like Forks, and 15 per cent in towns of 5,000–15,000.

This fall, after three years of wrangling, largely over the extent to which the government can influence medical education, Congress enacted a new three-year, $2.3-billion health manpower act. President Ford signed the measure with some complaints about its size of the funds authorized. Among many other provisions, the act beefs up both the National Health Service Corps program and WAMI-like decentralized education projects called Area Health Education Centers.

Under the law, medical schools continue to receive "capitation" funds for each student enrolled (now more than $1,000 each), and students are not required to join either program. But there is a *quid pro quo;* the medical schools must train a portion of their residents—half by 1980—for primary care.

In the next decade, then, we will probably see many more doctors like Stephen Kriebel practicing in communities that desperately need them—in big city slums as well as isolated rural towns.

[From the University of Iowa Spectator, December 1976]

IOWA'S NEW FAMILY DOCTORS

Ten small Iowa towns have new doctors this year, the beginning of a healthy payoff for College of Medicine officials who've focused their efforts on correcting rural Iowa's doctor shortage.

Six years ago the College set up a family practice specialty training program, then began to develop residency programs throughout the state.

Three years ago a statewide system for training family practice residents was funded by the Iowa Legislature.

This year 24 physicians finished the three-year residency program and 15 of them stayed in Iowa, 10 locating in towns with fewer than 9,000 residents. The doctors settled in Glenwood, Lone Tree, Waukon, Fredericksburg (2), Cresco, Osage, Centerville, Webster City and Fairfield.

When the statewide system is operating fully, 60 family physicians should finish each year. Officials expect to have 175 residents in training two years from now; currently there are 128 residents in the three-year system. Six years ago, officials point out, there were no family practice residents training in Iowa.

Today's statewide program includes seven hospitals in six cities: Cedar Rapids, Davenport, Des Moines, Iowa City, Mason City and Sioux City. An eighth program in Waterloo is scheduled to open next year and a ninth, to train osteopathic medical graduates in Des Moines, is being organized.

In a report to the Board of Regents, Paul Seebohm, associate dean of medicine and chairman of the family practice advisory committee, points both to the 10 new rural-area doctors and to the Iowa medical students' increasing interest in family practice careers as good signs for the future. Last year 36 medical students (25 percent of the graduating class) entered family practice residencies. This year 31 entered family practice residencies, 18 of them in Iowa.

Studies consistently show that doctors are likely to settle in areas where they've trained as residents.

Seebohm reports that more than 150 Iowa communities have indicated an interest in attracting physicians to their towns. The College's office of community-based programs offers information services to residents and to Iowa communities and works to bring the two together.

Seebohm also cited two special models aimed at correcting the geographical maldistribution of physicians:

The Muscatine Community Health Center was started three years ago to provide primary care to a town rapidly losing its doctors. The unit combines the primary care specialities of family practice, internal medicine and pediatrics with physician's assistants. In the past three years, 75 per cent of the Muscatine population has been served in some way, Seebohm says.

A Regional Primary Care Center has been set up in Red Oak (6,000 population) to demonstrate the importance of group practice for physicians recruitment efforts and to test ways of providing service to smaller nearby communities in Southwestern Iowa. This unit has attracted three young board-certified family physicians to return to Iowa, the first in 20 years to start practice in Red Oak, Seebohm reports.

Both of these model programs have received substantial grants from the Kellogg Foundation.

Seebohm's report to the Regents asks that $2.6 million in state funds be provided for the next two years of the statewide residency system. This represents less than 20 per cent of the costs of the network, he reports.

[From the New York Times, Jan. 6, 1977]

RURAL MEDICINE

(By Karen Davis)

WASHINGTON.—Federal programs have done much in the last ten years to extend health care to disadvantaged Americans. Unfortunately, these programs contain urban biases that cause them to largely bypass many rural people, who generally have greater health needs and fewer health services than urban residents. These restrictions also have impeded the growth of innovative programs that have emerged to overcome the difficult problems of developing stable rural medical-care delivery systems.

The myth that rural people enjoy good health and need less care persists despite solid evidence to the contrary. Infant-mortality rates are shockingly high in many rural areas. Age-adjusted death rates are higher in non-metropolitan than in metropolitan areas and have been declining at a slower rate. Chronic conditions afflict rural people more frequently and more severely than urban residents. Respiratory illness among adults and occupational accidents are particularly serious problems. Immuniztion rates and preventive-health services are also deficient.

There are many interrelated reasons for the failure of rural residents to share fairly in the benefits of modern medicine. Poverty rates are higher and private health insurance coverage is more limited. Furthermore, about 35 million rural residents live in areas with a shortage of physicians and other health professionals.

To try to alleviate this shortage, Congress recently passed a major health manpower act increasing the number of scholarships and insured loans to students in the health professions agreeing to practice in underserved areas.

Yet, while the health manpower legislation strongly encourages rural practice, other Federal programs are biased against rural areas. Medicaid, for example, was designed to deal mainly with urban poverty. Furthermore, most of the rural poor live in the South, where Medicaid programs are inadequate.

These factors, together with the shortage of health resources in rural areas, have contributed to great disparities in the distribution of Medicaid benefits: Medicaid payments average $5 annually per child in rural areas, compared to $76 for children in central cities.

Medicare pays rural physicians 60 percent less than their urban counterparts because it

compensates physicians on the basis of prevailing charges which are lower in rural areas. This practice makes it difficult to attract and retain rural physicians.

Several innovative approaches to delivering rural health services have been initiated recently. The Department of Health, Education, and Welfare supports a limited number of rural health practices staffed by temporary National Health Service Corps physicians. The Robert Wood Johnson Foundation supports a model rural practice demonstration program. This program establishes nonprofit group health practices staffed by a professional manager, two or more physicians and non-physician health professionals to relieve physicians of some of the burdens of overwork and professional isolation typical in solo rural practices.

Many smaller towns cannot support their own doctor. In a number of communities, health centers have been established with financial support from state governments, the Appalachian Regional Commission, private philanthropy and community fund drives.

These centers are staffed by nurses or other health practitioners who see patients under the supervision of physicians in more distant communities.

Medicare has followed the policy of refusing to pay for patient care provided under these circumstances; most states do not cover these services under Medicaid. These restrictions threaten one of the most economical techniques of providing rural health services in remote areas. Without adequate reimbursement, many primary health centers will close when initial demonstration funds expire.

The experience of the Black Belt Community Health Program in Epes, Ala., exemplifies many of the obstacles that confront innovative rural health projects. Epes is situated in Sumter County, where two-thirds of the residents are black, one-fourth are illiterate and half live in housing without such services as indoor plumbing and telephones. Infant mortality is 2.5 times the national average. Hypertension, diabetes and impetigo are major health problems. The Federation of Southern Cooperatives, in Epes, has struggled since 1972 to establish a health clinic there. After an initial planning grant, the Government has declined to offer any direct assistance. With support from a private foundation, the Black Belt Center opened in April 1976, staffed by a physician from the area and two nurses.

Its financial future is uncertain. While nearly all of its patients are poor, Medicaid covers only one in four.

Without reform of Medicare and Medicaid to cover all the poor and to compensate rural health clinics adequately for the services they provide, the Black Belt Center and similar efforts to bring quality health care to Americans in hundreds of other rural communities will fail.

[From the Washington Post, Oct. 11, 1976]

RURAL HEALTH CARE

In the past few years, a number of events and movements suggests that rural citizens are learning that problems in such areas as health, housing, education and the environment are more likely to be faced up to when citizens organize their own power. Recent examples are common, from the might of the American Electric Power Company being tempered by some rural North Carolinians who successfully defended their section of the New River, to some tenants in Indiana County in western Pennsylvania who forced their landlord to improve housing conditions. Another event that shows promising of leading to useful reforms is a meeting now under way in Nashville of the Southern Rural Health Conference.

Policy-makers, physicians, nurses and citizens from 14 states have come together to see what can be done about the delivery—or non-delivery—of health services in the rural South. The absence of these services is behind such bleak statistics (according to the conference) as a 22 per cent higher death rate for rural citizens and an infant mortality rate that is 65 per cent higher for rural blacks than rural whites.

Even if every rural community did have its own clinic or hospital, poor health would still be common because of the absence of preventive care. Some of the well-known factors contributing to a greater vulnerability to sickness and disease include: contaminated water, poor housing, inadequate nutrition (children who avoid unhealthy water by drinking sugary soda pop may not get intestinal parasites but they are exposed to dental diseases), occupational hazards (coal dust for miners, inhaling chemicals for farmworkers) and mental depression caused by feelings of political powerlessness.

As for the contributions of public policy, Medicare does not reimburse nurse practitioners or physician assistants. This means that unless a doctor is on hand at a clinic, the clinic cannot be reimbursed for services provided by the nurses or others; it loses money and cannot pay its way. Another cause of poor health care is that medical schools tend to be biased against rural areas. A report presented last year to the task force on Southern Rural Development in Atlanta noted that few scholarships and few internship or residency programs are available for medical students interested in rural practice.

The usefulness of the conference being held in Nashville—the first of its kind—will be measured as much by the follow-up of its recommendations as by the actual discussions. However useful the talk itself may be, it is not exactly a secret among thoughtful HEW policy-makers or staff volunteers in mountain health clinics that a crisis in health care is needlessly victimizing rural Americans.

NEW YORK CITY'S ROCKY ROAD

Mr. PROXMIRE. Mr. President, on Saturday, January 1, the New York Times lead editorial called on embattled New York City to recognize its immense resources and strength and resolve to follow through with the tough sacrifices and painful effort the city has made to succeed in 1977.

The Times picked Cap'n Andy of "Showboat's" shouted New Year's Eve encouragement to Magnolia to smile through her tears and carry on.

Last month the Banking Committee held 2 days of hearings on New York's progress. We found the city because of sacrifices that included cutting city jobs by more than 60,000, freezing wages, stopping almost all capital improvements, and drastically reducing services is well on its way toward an achievement very few Senators thought was possible when we debated and passed the New York City seasonal loan legislation in the last Congress. The good news is that all the evidence indicates that New York City is going to balance its budget in the year beginning next July 1, and that it will have in place at that time an accounting system that will be as honest, credible—as clear and reliable as the accounting system of any big city in the country.

Some of the top financial experts believe that the city will not be able to get fully back in the capital markets to finance its seasonal borrowing needs in 1978 as the legislation passed by the last Congress required.

Frankly, I think New York City will get back in the private markets for one very simple reason: It will have to do so.

And with a balanced budget, with an accounting system that tells the truth, and with private financial resources and a capital market in New York City that is the greatest by far in the world, I simply cannot believe New York cannot do it.

At any rate, the city—its Mayor Beame and Governor Cary as well as many other leaders as well as all its people deserve resounding congratulations on what it has done so far, and a "Smile, Nola, Smile" in the spirit of Cap'n Andy and "Showboat" for its gallant spirit.

I ask unanimous consent that the editorial to which I have referred, from the Saturday, January 1, New York Times, be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

SMILE, NOLA, SMILE

New Year's Day provides so obvious a psychological point to pivot on that readers and playgoers may wonder why its emotional potential has seldom been exploited in popular art. One use did indeed occur in the old Noel Coward movie, "Cavalcade," which extracted extra sentimental juice from family crises by playing them against a musical background of Londoners singing "Auld Lang Syne." An equally rare New Year moment in the theater that may apply more forcefully in New York occurred in that now-venerable American operetta, "Show Boat."

For those whose memories have failed them, or were not long enough to begin with, it may be recalled that "Show Boat" celebrated the fortunes—some good, more bad—of Magnolia Hawks Ravenal, the fictional daughter of the equally fictional Cap'n Andy Hawks, a showboat impresario whose audiences lived along the banks of the Mississippi. Miss Hawks eloped with the showboat company's juvenile lead, an incurable gambler, named Gaylord Ravenal. At the nadir of Ravenal's worst losing streak, Magnolia realized that she had to earn her own living by returning to the stage, this time on land. She picked for her arena the Trocadero Restaurant in Chicago (vast proliferations of the plot have been eliminated in this harshly pruned summary). She chose to make her debut on New Year's Eve. Without Mrs. Ravenal's prior knowledge, her father, Cap'n Andy himself, sat among the audience, having perhaps imbibed somewhat too freely in honor of the New Year, a weakness to which the other revelers had also succumbed.

Magnolia, or Nola, as she was known to her familiars, was perhaps overawed by the setting, by the impending crisis of her marriage, or, perhaps, her voice was simply drowned out by the natural laughter of the revelers. She could not be heard; people mocked her. As her career lay in ashes about her, and starvation at the hands of her wastrel husband loomed ahead, Cap'n Andy unexpectedly rose to his feet and called to his daughter above the chaos of the room: "Smile, Nola, Smile!"

This precious advice carried the day. Clearly it recalled to Magnolia the tradition of the showboat, her own performing genealogy, her talent, her confidence, and the peculiar skills of the stage personality which she had absorbed since infancy. As the on-stage audience gradually controlled its raucousness, her physical stature grew, her voice swelled, her presence asserted itself, and her

independence from Ravenal was established. Her future career was assured. At the brink of the New Year, certain defeat was turned into gallant victory.

Cap'n Andy's advice — "Smile, Nola, Smile!"—is not irrelevant to present New Yorkers. They too are clearly down on their luck, in part as the result of the gaudy optimism that inspires gamblers like Ravenal. The growl of unfriendly voices and mocking laughter have tended to drown out the efforts of New Yorkers to improve their fortunes. We do not suggest that smiling will carry the day, but rather that the confidence to draw on past strengths and traditions provides, as did Cap'n Andy for Magnolia, the emotional basis for successful exploitation of New York skills.

"Smile, Nola, Smile!" calls on New Yorkers to remember their proven capacity for achievement, the better to prepare for the hard work, the bitter choices, the probably unequal sacrifices that lie ahead. On New Year's Day, "Smile, Nola, Smile!" offers a sentiment, admittedly even a sentimentality, worth remembering.

In the operetta, incidentally, Nola's final triumph left never a dry eye in the house.

PRIMARY HEALTH CARE FOR SMALL COMMUNITIES

Mr. LEAHY. Mr. President, in trying to solve the problem of providing primary health care for small communities, the central characteristic in each successful effort is community support and commitment for whatever combination of medical personnel is utilized in a particular case. I have serious doubts whether we in Washington can design any system of health care on any community if that commitment and support does not exist.

Recently the citizens of Londonderry, Vt., faced with the possibility of having no medical services for the area's 2,346 permanent residents and thousands of vacationers resolved their problem through imaginative logical initiative and hard work. This successful effort is described in the winter 1976 edition of Commitment, a publication of the U.S. Department of Health, Education, and Welfare. The article, entitled "Londonderry Air," by John B. Dunne, points out the need for breaking down some of the barrier erected by the Federal Government which tend to discourage local efforts to provide rural health care, the need for consumer involvement, and for the utilization of nurse practitioners as primary care givers with physician backup.

I believe that this experience in a small community in Vermont can be a valuable guideline in fashioning legislation to provide quality health care for underserved rural communities, and ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LONDONDERRY AIR

(By John B. Dunne, M.P.H.)

The title of this article refers, not to the traditional Irish tune, but to the atmosphere around Londonderry, Vermont, in November of 1972. The air was thick with gloom because the only physician in the area had suffered a second heart attack and it appeared that there would be no medical services for the area's 2,346 permanent residents, the approximately 3,000 summer vacationers and 5,000 more who ski there. The town of Londonderry, 35 miles south of Rutland, lies in the center of the Bromley, Magic and Stratton Mountains—all major ski areas. Also the area long has been a popular summer vacation ground for middle-aged and older New Englanders.

At a meeting of concerned citizens who discussed this acute problem, it was decided to solicit the help of the Connecticut Valley Health Compact, a health planning agency serving southeastern Vermont and southwestern New Hampshire and the Vermont Medical Society. The Compact had been suggested because that agency had demonstrated an interest in advocacy of improved health care for the towns served in this mostly rural section of northern New England.

Another meeting was arranged for the following week and the Londonderry people were urged to invite representatives from the surrounding towns of Landgrove, Peru, Weston, Windham and Winhall. Since the Compact had worked cooperatively with the Dartmouth Medical School Department of Community Medicine on other projects, it was considered beneficial to invite the assistant director, J. Michael Taylor, M.D., to participate in the meeting in Londonderry.

The more than 100 people gathered in the Floodbrook School that night were not deterred by the early snow quite common to Vermont in November. These people came and freely expressed their concern about having no physician to provide medical care when needed. An ad hoc committee was appointed, and Mrs. Jean Julius, a registered nurse who lived in South Londonderry and served in the intensive coronary care unit at the Springfield Hospital, was named its head. This committee was charged with meeting with the Compact and Dartmouth's community medicine department to plan a course of action.

After preliminary exploration, Dr. Taylor and the Compact staff concurred that the Londonderry area might be an ideal setting for a comprehensive health center which would provide physician, nurse practitioner, visiting nurse, mental health clinic, and other backup services. It was decided to recommend that the towns band together and form a health council that would set its sights on the development of a health center. At the next meeting of the ad hoc committee in early 1973 this plan was presented and enthusiastically received. It also was emphasized that obtaining a solo practitioner for the area would not really meet the needs of the communities because such a doctor soon would be overworked and perhaps would become discouraged and leave.

Both Dr. Taylor and the Compact staff emphasized the need to establish a council which would be incorporated as a not-for-profit agency so that it could receive tax deductible contributions from all sources. Also the need for forming task forces was stressed so that work on membership, public relations, fund raising, site selection and building, physician recruitment, and finance could proceed simultaneously. The selectmen of each of the six towns appointed two members to the council. The Compact also had brochures printed for the organization which adopted the name Mountain Valley Health Council.

The enthusiasm of the area citizens increased in intensity as they became aware that a health center was not an impossible dream. The fund raising drive began to show impressive results and there were benefit affairs held throughout the area. The total contributed and pledged exceeded $180,000. This successful effort was climaxed in July of 1974 with the donation by Mr. and Mrs. Willard Kiggins of three prime acres of land across from the Floodbrook School which serves the area.

Ted Lewis, of Fleck and Lewis, resident architect for Dartmouth College, contributed time, efforts and architectural drawings of a building which would blend in with the surroundings and provide a suitable home for the health center.

In January 1975 the Mountain Valley Health Council members determined that they were far enough along to seek approval from the health planning agencies to comply with Section 1122 of the Social Security Amendments, Public Law 92-603. Ms. Jury Bail of the Compact staff assisted in preparing the proposal. An areawide Comprehensive Health Planning (CHP) agency review was held by the Compact March 25, 1975, and the review board approved the proposal for building a comprehensive health center in the town of Londonderry at a cost of $247,000.

(It would be fair to ask how can an agency like the Compact, which provided so much help to assist in developing the council, provide an objective review. This was accomplished by selecting a new review board comprised of persons from as far away from the subject area as possible for each proposal. Two members of this particular board traveled more than 100 miles to participate in the review. In this way there was less chance of conflict of interest, it was determined.)

Chairperson Julius presented to the review board the proposal which said in part:

"With the guidance of Compact, and using the resources of various health agenices, an in-depth study was conducted to assess the health needs of the area. This study covered population (growth and breakdown); area income; area growth and development; geographical restrictions; and physician, hospital and medical services utilization. Most important, the council talked with the people, both residents and transients, about their needs and difficulties in obtaining health care."

"From this we determined the problems of health care delivery within our community to be—

1. Inadequate physician coverage in the community.
2. Topograph—going any direction out of the area necessitates travel on a mountainous road, which our elderly tend to avoid.
3. Distance to physician—the topography and time involved in reaching physician care dissuades the people from seeking early care.
4. Physicians in outlying areas—they hesitate to take new patients, particularly those outside their own communities.
5. Crisis care is prevalent—many wait until they are critically ill before seeking care.
6. High emergency room usage—hospital emergency room is used often for what should have been an office visit.
7. High hospitalization rate—this results because of the delay in seeking early care.
8. High total costs—due to the emergency room usage, the increased cost of gasoline, the toll call to the physician, and missing time away from the job, a visit to a doctor amounts to not only the cost of an office call, but loss of a half-day of wages or more.
9. There is a lack of follow-up on office visits or laboratory work.
10. Many pre-school children do not receive routine physicals and inoculations.
11. Visiting nurse is poorly utilized, there is no central referral service, and outlying physicians are not oriented to her availability here.
12. Mental health—this service is on a limited basis only.
13. Senior citizens—they have no program available and no homemaker activities.
14. Ambulance—while our excellent rescue squad is making a trip to the hospital, the area is uncovered for an hour or more."

The review board heard from several persons from the towns involved. There was only one dissenter among those giving testi-

mony and her interest was in developing a health center in a town outside the area. The Compact review board voted unanimously to approve the proposal.

The proposal then went to the Vermont 314A CHP Agency where it was approved, reportedly after lengthy debate. It was sent to the Department of Health, Education, and Welfare, where final approval was granted, thereby making the health center eligible to receive Medicare and Medicaid payment for services.

During this period Mrs. Julius, at no little sacrifice to herself and family, completed the nurse practitioner course at Maine Medical Center in Portland—where Dr. Taylor had become director of the Department of Community Medicine. She returned to Vermont and served her preceptorship with Warner E. Jones, M.D., in the Springfield Hospital. When the Mountain Valley Health Center opened in temporary quarters, she was on hand to assist Roger Fox, M.D., who had been recruited from Boston to head the center.

Ground was broken in May 1975. A grant for equipment was made by the Vermont Hill-Burton office, and the Northern New England Regional Medical Program assisted with a staffing grant. Funds also were provided for an administrator by the Robert Wood Johnson Foundation Rural Practice Project.

The health center was dedicated on July 24, 1976, and Dr. Fox, Nurse Practitioner Julius, Administrator. J. M. Ross and the entire staff were beaming with pardonable pride. Their elation mirrored that of all the devoted citizen members of the Mountain Valley Health Council.

At the ceremonies, Vermont Governor Thomas P. Salmon paid tribute to the people who contributed time, money, and effort to bring the comprehensive primary care clinic into being. He said that the facility "came about because of the indomitable spirit of Vermonters." He also declared that this was "Dr. Pingree's day," referring to Elizabeth Pingree, a country doctor in the finest tradition and doyenne in the Londonderry area of that vanishing breed. Dr. Pingree, who stood modestly in the crowd until asked to assist in the ribbon-cutting, was credited as being the prime mover behind the clinic.

Now the Londonderry air is different. It is charged with a new sense of accomplishment and a view of the future with a reasonable solution to the health care problems of the area's six rural communities.

It is hoped that by relating the success of the Mountain Valley Health Council, encouragement may be extended to other communities or clusters of towns with similar problems. The cooperative efforts of citizens working in a council are essential if facilities are to be built and physicians and other health personnel are to be recruited for an area to meet the health care needs.

CONSOLIDATING THE COMMITTEE SYSTEM

Mr. TALMADGE. Mr. President, it was my privilege Thursday to have an opportunity to testify before the Committee on Rules and Administration on proposals for reorganizing and consolidating the committee system of the Senate. I have long felt that Congress ought to act to curb the bureaucratic sprawl that we have seen take place in recent years in the Senate and in the House of Representatives. Action is needed to bring about more efficiency, on the part of committees and subcommittees and on the part of individual Members of Congress. Action is needed to help cut the cost of operating Congress and to keep the cost from getting higher and higher year after year.

I support efforts of the Temporary Select Committee to Study the Senate Committee System to achieve these goals.

This is an important issue and the new Congress has an excellent opportunity to take the initiative in this matter.

I bring to the attention of the Senate my statement before the Rules Committee, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR HERMAN E. TALMADGE ON SENATE RESOLUTION 4

Mr. Chairman, I am pleased to have this opportunity to share my views on S. Res. 4, introduced by the Chairman of the Temporary Select Committee to Study the Senate Committee System.

First, I would like to commend the Chairman and members of the Select Committee for their conscientious work. Their job was not easy. Any recommendation to reorganize or change the existing order is bound to affect a lot of individual interests.

Committee jurisdictions, whether defined by historical considerations or logical organization, may represent rather sacred ground. But the Select Committee in its report has been able to make sound recommendations while minimizing potential conflicts.

We have heard increasing concern from the public about government bureaucracy and waste, and rightly so. The taxpayer surely must feel frustrated when he sees an ever-growing portion of his paycheck going to support huge and duplicating bureaucracies. And I think we all must admit that such waste is not unique to the Executive Branch of government.

Since 1947, the cost of operating the Senate has grown from $6,708,322 to $137,300,000 last year, an increase of over 2000%.

The number of our employees has increased 335% from 1,710 to 6,733 in the same time.

The number of committees, subcommittees, select committee, special committees and joint committees has almost quadrupled since 1947.

Given our own record, can we, in good conscience, criticize the proliferation of the Executive Branch bureaucracy but turn the other way when it comes to the bureaucracy we have created for ourselves?

Can we tell our constituents that we are in favor of saving money if we let our own budget go out of control?

As I understand it, the Stevenson-Packwood Resolution seeks to increase the effectiveness of the Senate in two ways: First, by reducing the committee workload on individual Senators, and second, by reducing the wasteful duplication in the overall work of committees.

Over the years, as new tasks have come along, it has been easy to create a new committee to take over each new responsibility. Yet priorities change, and rather than change our committee organization to handle new priorities, it has been easier just to create another committee.

Pretty soon we have a proliferation of committees and, of course, supporting staff—to a point where it must look as if we are competing with the Executive Branch to see which of us can create a bigger and more bloated bureaucracy.

Now these little bureaucracies we have created not only represent an inefficient use of the taxpayers' money but also impair the effectiveness of the government.

Treasury Secretary William Simon was quoted recently as saying that he usually spent three days a week testifying before numerous congressional committees. And every time a member of the Executive Branch testifies before a committee or subcommittee, exhaustive preparations must be made at the staff level—both in Congress and in the Administration.

Now, I fully believe that the Administration's officials should be responsive to the Congress but we should consider how much time we will permit them to perform the administrative functions of government in between visits to the Hill.

Another and more direct problem associated with committee proliferation is the workload these committees place on individual members of Congress.

I currently serve on no fewer than a dozen committees and subcommittees. Now all of these are fine committees in their own right. Each was created to respond to very real needs.

But I find that committee meetings absorb a growing and disproportionate amount of my time. Between meetings of my committees, select committees, joint committees, special committees, and subcommittees, I wonder where there is time for anything but going to meetings. Frankly, the only way I can resolve most of these conflicts is, simply, not to attend most of these meetings.

At present, subcommittee hearings and meetings are scheduled without any thought as to the impact of these meetings on the Senator's total legislative workload. Often, we cannot find even one Senator to preside over a hearing, and it sometimes has been necessary to have a committee staff member hear the testimony. I have come to the conclusion that there just has to be a better way to organize the workload of the Senate.

Another problem created by the proliferation of the committee structure has been the difficulty for any one committee in getting its work done. I don't know how many hours of Senators and highly-paid staff have been wasted waiting to get a quorum at committee meetings because members must split so much time between committees. Sometimes when a Senator has two or three committee meetings at the same time, I wonder how much effective attention he can give to any one subject.

Gentlemen, we cannot escape the conclusion: If we try to spread ourselves too thinly, we must end up with a shoddy job.

One solution is to continue to abdicate more and more responsibility to the staff. When I look at the numbers of staff crowding the Senate chamber, and committee meetings and, yes, even chairing public hearings, I can't help but feel that we have created our own monster—a bureaucracy by which we are controlled rather than over which we have control.

If we continue the present trend, we will reduce ourselves to no more than a debating society where the real business is run by staff.

We owe the people who elected us much more than that.

I don't need to remind you of the very low standing the Congress has come to hold in the public's eye. In a recent survey of farmers across the nation, less than 20% rated the Congress as excellent or good, while over 50% gave the Congress a fair to poor rating. The public's belief in the credibility of their leaders is falling to all-time lows.

With a bureaucracy which is proliferating out of control, it is no wonder why.

Two years ago we passed S. Res. 60, a resolution which added over 200 new staff members and almost 4 million dollars to our budget. However, the resolution that was originally introduced would have cost the taxpayer about $30,000,000 annually.

I opposed this resolution because I felt we are treating the symptom rather than the problem, but I was delighted to play a role in reducing its cost.

Each committee, in good faith, must come up with its own solution to certain problems, but because we have so many committees and their responsibilities so frequently overlap, we end up with a lot of duplicating solutions and executive machinery.

It seems, then, that committee proliferation is directly contradictory to what we have been trying to achieve under the Budget Control and Impoundment Act—namely, to establish overall priorities and to reduce the tendency for the budget to become the sum of special interests rather than the balance of priorities.

We just can't afford a large number of committees, each independently establishing priorities and programs. Therefore, we must bring the committee structure under control by rationalizing lines of jurisdiction and providing greater balance of responsibility. Only then can we gain control over the budget and the machinery of government.

This resolution will not be without controversy.

Some groups will feel they are losing "their committees." I would suggest that the recommendations of the select committee will do just the opposite.

The proposed reorganization would restore greater emphasis to the legislative committees—and, thereby, provide more effective forums for real action. Perhaps we would see fewer hearings and less verbiage, but greater potential for getting things done.

Now it might be nice if every special interest group could have a committee it could view as its advocate. But we must be sensible about this. We just can't create a special committee for athletics, fishermen, midgets, bookkeepers, small children, and watchmakers. It is obvious that such an approach would be impossible. Rather, we must make sure that we have a committee system which represents everyone equally, objectively, fairly and without prejudice.

We must insure that we have a committee system that is not so cumbersome that it directs energies away from effective action. We must build a committee system that is able to act positively and effectively in balancing all interests.

I am convinced that is a better way to handle our business and that the report of the Select Committee provides us with good opportunity to move forward with constructive changes. We know that we simply must cut down the number of committee meetings and hearings. This means fewer committees and greater balance in the responsibilities of each committee.

The Select Committee has tried to establish a set of committees which represent balance in terms of workload, attractiveness and jurisdiction. There are some people who will not be completely pleased with the recommendations of the Select Committee. However, I firmly believe that the Congress should have committees where specific groups can be heard and understood but I do not think that it is a good idea to let each interest group have its own committee.

Perhaps an attack on government waste should begin by putting our own House in order.

Gentlemen, we stand before an opportunity to make constructive changes in the way we do business.

We now have an opportunity to reduce the waste and duplication which has emerged since the Senate last embarked on organizational reform over thirty years ago.

We have an opportunity to better organize the work of the Senate to permit better use of each member's time.

We have an opportunity to streamline the committee process to permit more reasonable demands on the high officials of the Executive Branch who must periodically appear before us.

But this opportunity is a fragile one.

Should parochial interests be placed above the need for reform, the work of the Select Committee, which I feel is both sound and reasonable, will come apart.

And should the package come apart the opportunity for reform will likely be passed to another Congress.

As the committees and Senators begin to think of ways they would like to change the report of the Select Committee, I would like them to ask themselves what such changes mean in terms of the overall objectives of committee reorganization. I think we must ask whether such changes will improve the efficiency of the operation of the committee system. We must ask whether such changes will impair the balance of jurisdiction and workload between committees. We must ask whether the changes will result in a more effective organization of work.

Gentlemen, we have increasing concern from the public about government bureaucracy, and rightly so.

It is in the interest of reform, of making better use of the taxpayer's dollar then, that I support the recommendations of the Select Committee to study the Senate Committee system and accept these recommendations as a package.

Mr. Chairman, and members of the committee, I, therefore, urge your favorable consideration of the resolution before you.

ELIMINATION OF DUTY ON DEHYDRATED POTATOES

Mr. HATHAWAY. Mr. President, I was recently informed of an attempt to put dehydrated potatoes on the generalized system of preferences list. This would result in the complete elimination of duties on dehydrated potatoes and would amount to an official U.S. declaration to the world that we seek and court dehydrated potato imports.

At this very moment, Mr. President, a hearing is taking place on this issue in Boise, Idaho. The U.S. International Trade Commission is conducting the hearing and they can be expected to rule on this matter in the near future.

I wish to take this opportunity to warn Members of the Senate, especially those from States in which potatoes are grown or processed, of this threat to the domestic industry. It is a foolish idea to do away with tariffs on dehydrated potatoes and I ask unanimous consent that my letter of December 15 to Ambassador Dent, protesting this proposal, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WASHINGTON, *D.C.*,
December 15, 1976.

Hon. FREDERICK DENT,
Special Representative for Trade Negotiations, Washington, D.C.

DEAR AMBASSADOR DENT: The State of Maine is one of the most important potato producing States in the union. I want you to know of my concern over your announcement in the Federal Register of November 19, 1976, that dehydrated potatoes, Tariff Item 140.50, are proposed to be included on the Generalized System of Preferences List. If carried out, this proposal would reduce the present duty of 1.3 cents per pound on imported dehydrated potatoes to zero. This would constitute an official United States invitation to the world to start shipping dehydrated potatoes to our markets.

Today, potato farmers are increasingly dependent upon processors, who generally purchase the growers' crops under contract and manufacture a variety of potato products which have had a growing consumer acceptance. Per capita consumption of potatoes has slowly risen in the past decade primarily because of the increasing popular consumption of processed potatoes. Dehydrated potatoes comprise a significant share of this manufactured output. It is a very important market for Maine potatoes.

This year, our farmers, stimulated by our own Government's policy and responding to the prospect of world hunger, produced the largest potato crop in history. As a result of the anticipated surplus, prices offered to growers fell to distress levels. Were it not for the unusually large export market which has developed as a result of the drought in Europe, growers in Maine would have received returns substantially *below* the cost of production. In addition to such losses, surplus of unsold potatoes would not have been consumed in the fresh, processed or other markets, since the demand for starch is quite narrow and other schemes—e.g., potatoes as cattle feed—face difficult problems of their own.

The unfortunate listing of dehydrated potatoes on the Generalized System of Preferences would mean that the banks in Maine which advance funds to Maine growers would be reluctant and might even refuse to lend money to growers with which to buy their seed and fertilizer for next year and for next fall's harvest. The banks' rationale would be that the potato processors, who absorb a significant part of the Maine crop, might be expected to offer an even lower price in 1977 than in 1976. In turn, the rationale of the processors would be the expectation of a rise in competing imports of foreign dehydrated potatoes at low prices.

Since the purpose of reducing a U.S. duty is to encourage and increase imports, there would be little reason to expect banks and processors to respond in any other way.

It is now virtually certain that Europe won't be subjected to another drought for the third season in a row. As a matter of fact, weather reports from abroad indicate that the drought has broken and normal conditions will follow. Europe therefore will *not* import potatoes from the U.S. as she had the last two years—and other export markets similar to the two-year market in Europe are nowhere to be found. We are on our own again.

I have called your attention to only a few of the many reasons why I urge you to reconsider the listing of item 140.50 on your G.S.P. list. The Kennedy Round of Tariff Negotiations came to be known as the period when U.S. agriculture was "sold down the river." I trust that the current negotiations arising under the Trade Act of 1974 do not demand a recurrence of that judgment.

I ask, then, that you reconsider the listing of item 140.50 on your G.S.P. list. Frankly, I find it very hard to imagine why this proposal should ever have been made or who might be behind it. So in addition to your reconsideration of this ill-conceived matter, I should like to have a written report containing the reasoning upon which this proposal rests and the identities of the parties, domestic or foreign, who have requested the elimination of this duty.

Sincerely,

WILLIAM D. HATHAWAY,
U.S. Senator.

DEATH OF PETER LISAGOR

Mr. MUSKIE. Mr. President, Peter Lisagor's death leaves Washington without one of its most likable, entertaining, and talented institutions. And it is a measure of Peter Lisagor that he would have objected loudly, strenuously, and eloquently to being called an "institution."

I am sure it was difficult for anyone

who met him not to consider him a friend. Those of us who fell under his professional gaze can attest to a "bedside manner" which enabled him to ask sharp questions which did not sting, and to make astute judgments which we respected even when we disagreed.

Pete was a professional. While his commentary was often brilliant, and always witty and informed, he was at base a reporter. His raw material was information. And his talent was in communicating that information simply, understandably and, as a result, eloquently.

Peter Lisagor was a good reporter. He was also an impressive human being. He was an opinionated observer of the national scene. And he had the talent to express those opinions with force while not seeming overly aggressive. He was absolutely unafraid, and completely unaffected by things and people with power or influence. And most importantly, he had that peculiar ability to react to people in Washington on a human as well as a professional level.

It was these qualities, I think, which made him so valuable to Americans. Most people knew him through television—his nasal questioning at Presidential news conferences, his fiesty commentary on news analysis programs, his wit and irreverence on a network panel show.

We saw in him a quintessentially average American, in Washington because that was where the stories were, a man who always looked up, and never down his nose.

America will miss him. And I will miss him.

TRIBUTE TO SENATOR PHILIP HART

Mr. HUMPHREY. Mr. President, the death of Philip Hart is a great loss to the Congress and the Nation. Not only have we lost a personal friend, but this body as a whole has lost a foremost exemplar of justice, integrity, and courage.

Philip Hart was a man for whom justice was an attainable ideal—not a remote abstraction to be acknowledged and forgotten, but a practical goal to be approached more closely every day.

During the great decade of social improvement in the 1960's, when this country recognized its long-overdue moral debt in civil rights, no Congressman was more dependable or more dedicated to that cause than Philip Hart. And no one approved himself to be a more conscientious and able advocate of equality for all than Philip Hart did when he successfully managed the historic passage of the Voting Rights Act of 1965.

For this tireless effort on behalf of human justice, Philip Hart received little public recognition or popular acclaim. But everyone in this Chamber knows that wherever the bright sunshine of human rights is shining, it does so in large part, because of Senator Philip Hart.

He was also a man for whom incorruptible integrity was not a posture, but a part of his character. Over his three terms in this body, Philip Hart authored and sponsored the kind of legislation which has the immediate benefit of our citizens and consumers at heart, often despite the efforts of powerful interests.

As every public servant knows, it is not always easy to promote the welfare of the common man—especially when his interests may run counter to those of powerful political and economic forces in our society. But as strong as the pressures were to relent, Philip Hart fought and continued to fight for improving the quality and safety of our citizens' lives. Much of the time he won, and the fruits of those victories are evident every time a child is saved from harm by a dangerous drug, or a consumer is protected from an unscrupulous manufacturer.

Finally, Philip Hart was a man of profound personal courage. If he appeared gentle and soft spoken to his colleagues and constituents, it was not for want of an iron will and indomitable bravery. He proved that to all of us by facing a terrible and premature death with grace, nobility and a quiet dignity which is the rarest and strongest form of courage.

In the final analysis, it can be said of Philip Hart that in his life he showed us how to live and work with honor. And in his death he showed us how to face the end with wisdom and with strength. That is as much as a man can do with his life.

I am deeply grateful to have had Philip Hart as a friend and a colleague for many years. His memory for me, as for so many Americans, will be all the dearer for knowing that we will not see his like again.

TAX REFORM

Mr. HATHWAY. Mr. President, the 95th Congress and the administration which is about to take office will be addressing themselves to further reform of our system of taxation. Because taxation and lack of taxation constitute such powerful means of encouraging or discouraging various forms of economic activity, it is clear to me that any reforms contemplated or undertaken will have profound effects upon all Americans. Rather than shirk from this task, it is my hope that we shall embrace it and accept its challenge. Toward that end I offer a few of my thoughts on the approaches we might consider taking in our expected attempts at simplification of our tax code and achieving more equitable effects. For make no mistake about it, everyone is affected by the tax laws, whatever their income.

Everywhere we go we hear people criticize the food stamp program or the welfare program, and one would think that these critics were not the beneficiaries of any kind of subsidy at all. But it turns out that almost every man, woman, and child in the United States is the beneficiary of some kind of a Federal subsidy. I think it is important to look at tax reform in this context.

We have a lot of subsidies that are paid out of money that we collect in taxes. We pay them directly with cash subsidies to the shipbuilding industry, irrigation systems, and student grants. We have credit subsidies whereby we guarantee loans to pay up the difference in interest in order that the beneficiary may pay a low-interest rate.

We have benefits in kind whereby we build public housing projects and give away surplus property. We have what we call purchase subsidies whereby we buy farm products at a higher price than the price prevailing in the market. We have what we call regulatory subsidies through our various regulatory agencies. We subsidize the field of transportation, for example.

Then we also have a large number of subsidies out of money that we do not collect—money that we do not collect in taxes as a result of allowing certain individuals and corporations specific deductions, credits, or exemptions for social or economic purposes.

I think that we should recognize that all of these expenditures, whether they are moneys not collected or money paid out directly, by credit, benefits in kind, purchase, or through regulation are expenditures, expenditures, expenditures, regardless of what name they are called.

If a tax break is given to an individual or a corporation, this is really an expenditure out of another taxpayer's pocket, because we have to make up for the revenue that is lost in order to provide that deduction for that specific taxpayer.

In all these expenditures, whether they are tax expenditures or direct expenditures, we first should consider whether or not they are worthwhile; and if they are not, just drop them regardless of whether they are direct or tax expenditures.

Then we should consider whether we can do them directly. Sometimes the bureaucracy that would be created in order to make the expenditures directly would be overburdening and would not be worth the price we have to pay. More often than not, though, it is because it is not politically feasible to make some of these expenditures directly that we resort to the tax code in order to make them.

I think we should examine the entire tax code with those guidelines in mind; first, whether or not a certain deduction does provide for a worthwhile purpose; second, whether or not it should be done by a direct expenditure; and third, whether or not it should be changed from a deduction to a credit.

I would like to point out that if we decide we have to go the tax expenditure route in order to accomplish social or economic objectives, whatever they may be, we should examine it very carefully. Just look at the situation we have now. We allow a $750 exemption for the dependents of any taxpayer.

If we were to say to the American public that we are going to let the poor people of this country have $105 for every dependent they have, and that we are going to allow the wealthier people of this country to have $375 for every dependent they have, you would have people outside of the Capitol steps right now with big signs and clubs.

But that is exactly what we do when we allow the exemption for dependents, because the person in the 14-percent tax bracket, who is taking this exemption as a deduction, does get 14 percent of $750, which is $105, and that is his tax saving. That is the money that the Government does not collect from him or, in effect, gives to him.

The person in the 50-percent bracket, who needs the exemption far less than the person in the 14-percent tax bracket, gets $375 from the Government, and there are many other deductions, of course, as we all know, that produce the same result to give the wealthier taxpayer a bigger break than the poorer taxpayer. We should examine all of these deductions first to determine whether they are worthwhile expenditures, or whether we can accomplish the objective better through a direct rather than through an indirect route. Then we should see if we cannot make the tax expenditure itself more worthwhile by putting it on a more equitable basis, such as a tax credit, which would give each individual taxpayer a certain percentage, say, of his allowed expense to be subtracted from his actual tax bill, rather than deducted from his income.

If we said to every taxpayer of the country, "You can deduct $200 from your tax bill for every dependent that you have," it would be far more equitable than it is at the present time, especially if you made that $200 credit a refundable credit so that the low-income person, if his tax bill were only $150 would still get a $50 check from the Federal Government.

It is my hope that when we come to consideration of measures proposed for the purpose of simplifying our tax code we shall keep in mind the general rule that a tax credit is a more equitable and universal treatment than an increased deduction from income.

But additionally, we must look at the tax expenditure—and its purposes—before mindlessly simplifying its use.

Most tax expenditures are enacted for an indefinite period, and establish a special tax situation for a group that is not only well organized but powerful politically. The result is that they are never the subject of review except when public pressure for tax reform builds to such a point that it is unavoidable.

This is not a rational way to legislate. Most tax expenditures remain in the code long after they have served their original usefulness, simply because the only group for whom they are of particular interest is the group who benefits. There is no Government "bureaucracy" to flog their existence for the public, and the beneficiaries are well equipped to resist the intrusions of outside reformers. Applying sunset legislation to tax expenditures would deal with this situation. To establish a set period for the review of tax expenditure provisions would mean that these vested interests would periodically have to defend their provisions. But by the same token, it would insure taxpayers of the ability to plan ahead, both for their own actions and for the actions of Congress. It would enable Congress, the business community, and private individuals to take taxes into account in planning investment decisions.

Legislation of this type would be similar to a bill introduced jointly in the 92d Congress by Senator MANSFIELD and the then-chairman of the Ways and Means Committee, Mr. MILLS.

As Senator MANSFIELD indicated upon introduction of his proposal in the 92d Congress, the fact that a termination date is attached to each tax expenditure provision does not indicate whether the provision is desirable or undesirable. It merely mandates a review by the Congress to determine whether a given tax expenditure should be retained, modified, or deleted from the tax law in accordance with its effectiveness in promoting its economic objectives.

I would urge the Congress to include tax expenditures within the sunset provisions. To do so implies no position on any of the tax expenditures involved, any more than applying sunset provisions to the appropriations process implies any position on any of the issues involved in those areas. Instead, it merely implies that tax expenditures, like other Federal outlays, should be subject to periodic congressional scrutiny.

The first piece of legislation I introduced as a Senator was a concurrent resolution to scrap the entire Internal Revenue Code and to start over. I had introduced the same piece of legislation as a Congressman in the House. In effect, that is what sunset legislation would enable us to do—it would establish an orderly process for the periodic scrapping and overhaul of the Internal Revenue Code.

And I think that is exactly what it needs, along with simplification of what we retain.

THE GENOCIDE CONVENTION AND THE START OF A NEW CONGRESS

Mr. PROXMIRE. Mr. President, today marks the beginning of the 10th year I have urged the Senate to ratify a very important treaty. That treaty is the Genocide Convention.

This convention has been exhaustively discussed over the years. For the benefit of the new Members of the Senate, and for a better understanding of the convention, I would like to present to you its objectives and provisions.

The treaty, made up of 19 articles, the first 9 being of a substantive nature, the others, procedural.

Article I describes genocide as a crime under international law.

Article II specifies that any of the following acts, if accompanied by the intent to destroy, in whole or in part, a national, ethnic, or religious group, constitutes the crime of genocide: Killing members of one of the above groups; causing serious bodily or mental harm to members of one of the above groups; deliberately inflicting on the group conditions of life calculated to bring about its physical destruction in whole or in part; imposing measures intended to prevent births within the group; and forcibly transferring children of the group to another.

Article III specifies that five acts involving genocide shall be punishable. These acts are: The crime of genocide itself; conspiracy to commit genocide; direct public incitement to commit genocide; attempt to commit genocide; and complicity in genocide. The parties agree in article IV to punish guilty persons, irrespective of their status.

In article V, the parties undertake to enact, "in acordance with their respective constitutions," the legislation necessary to implement the provisions of the convention.

Article VI says that any person charged with the commission of any of the five genocidal acts enumerated in article III shall be tried by a court in the state in which the act was committed, or by such international penal tribunal as may have jurisdiction with respect to those states accepting such jurisdiction. Acts of genocide committed in American territory would be tried in American courts.

Article VII specifies that the parties agree to extradite, in accordance with their laws and treaties, persons accused of committing genocidal acts.

Article VIII recognizes the right of any party to call upon the United Nations for such action that may be necessary and appropriate under the charter for the prevention and termination of genocidal acts.

Finally, article IX provides that disputes between parties relating to the interpretation, application, or fulfillment of the convention shall be submitted to the International Court of Justice when any party to a dispute so requests.

Mr. President, with the provisions and articles clarified in this manner, it is my hope that the convention will be better understood by the Senate and that this body will see that the convention simply defines genocide and makes it compulsory for the states to prevent and punish genocide within their own territories.

It is my profound hope that with this better understanding, the United States will act at once and ratify the Genocide Convention.

CONSTITUTION DAY

Mr. CHURCH. Mr. President, with the conclusion of our Bicentennial Year, and the commencement of a New Year with the inauguration of a new President, it is most fitting to look forward to another bicentennial of unique moment in our Nation's history; namely, the 200th anniversary of the signing of our Constitution. The Bonneville Tricentennial Commission, formed in Idaho, the first such commission in the United States, has resolved that this date, September 17, 1987, be made a legal holiday.

I believe that this suggestion has much merit. While our Declaration of Independence stands as the birthstone of our Republic, it is the Constitution which has given us the framework of our freedom.

The centennial celebration of Constitution Day in 1887 was a noteworthy event. In ensuing years, Constitution Day has emphasized patriotism and citizenship, recalling the spirit in which the Constitution was written. Events in recent years, Mr. President, have led to a reaffirmation of the central role of the Constitution in the preservation of our free society. It is, therefore, indeed appropriate that they should culminate in a celebration of our Constitution's bicentennial year. As September 17, 1987, draws nearer, I hope support will grow for the Bonneville Tricentennial Commission's goal for a fitting commemoration.

To this end, I ask unanimous consent that the commission's resolution be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

CONSTITUTION DAY

Whereas, We have just celebrated the biggest and best Bicentennial ever dedicated to the birth of freedom and human rights, and

Whereas, July 4th is observed as a National Holiday because it is directly and exclusively the birthday of the first of the two most important, inspired proclamations of religious and political principles, ever declared to be the foundation of a new nation, and

Whereas, the first—the Declaration of Independence—opened the way for the second—the Constitution of the United States, and

Whereas, the Constitution made the magnificent principles enunciated in the Declaration a living reality and became the great and far-reaching step in creating our nation—a Land of Liberty, choice above all lands, and

Whereas, September 17, 1987, will be the 200th anniversary of the adoption of that treasured document of freedom, the United States Constitution,

Now, therefore be it resolved, that the Bonneville Tricentennial Commission (first such commission in America) recommends herewith to the President and the Congress of the United States that commencing with the Bicentennial anniversary of the adoption of the Constitution that *"Constitution day"* be declared a legal holiday in America and be celebrated as such from that date forward each September 17th.

IS THE AIRCRAFT CARRIER STILL NEEDED?

Mr. HART. Mr. President, the New York Times of January 7 contains an editorial on the need for the aircraft carrier, "The Behemoths at Sea," which I wish to bring to the attention of my colleagues.

The aircraft carrier is, with the submarine, the most effective ship in the Navy. It is the ship which potential enemies fear most. Its ability to project a substantial force of tactical aircraft into almost any area around the world makes it a powerful deterrent to Soviet adventurism.

However, as the Times correctly notes, the nuclear powered aircraft carrier is very expensive. If the cost of its task force escorts is added in, the price at least doubles from the $2 billion cost of the carrier itself. And because it is so expensive, we can afford very few carriers—only 13 at the present time.

The debate regarding the carrier should focus on this fact—that we can only afford a small number of large, nuclear powered carriers—rather than just focus on carrier size, propulsion plant, or the type of aircraft carried.

Why? Because the Soviet anticarrier concept, to which a significant portion of their fleet is devoted, depends not on the size of the opposing carrier, or even on the type of aircraft carried. The Soviet anticarrier concept is designed to deal with a small number of aircraft carriers in each tactical situation. The heart of the Soviet concept is having only a small number of opposing carriers. Therefore, numbers are of key importance; if we can force the Soviets to face a large number of carriers, their chances of success diminish rapidly.

It is in this context, the context of the importance of numbers, that the issue of carrier size becomes important. Smaller carriers should be cheaper carriers, therefore, we should be able to afford more of them. The more carriers we have, the weaker the Soviet anticarrier strategy.

I hope that my colleagues, particularly those on the Armed Services Committee, will approach the carrier issue this year with this realization in mind.

I hope the Senate will keep in mind that it is not only the carrier which costs money, but also its escorts. The newest proposed carrier escort, the strike cruiser, will cost between $1 and $1.5 billion—close to the cost of the carrier itself. We must ask if we would not produce a more effective force by giving carriers more defensive armament, and reducing the need for escorts. Any money saved in this manner could, again, be used to raise the number of carriers, and strike at the heart of the Soviet naval concept.

Mr. President, I ask unanimous consent that the New York Times editorial, "The Behemoths at Sea," be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE BEHEMOTHS AT SEA

Through sea changes in weaponry, in the balance of power and in the number and nature of potential adversaries, our Navy has designed itself for 50 years around 15 mighty capital ships, the ceiling that emerged from the Washington Naval Treaty of 1922. Capital once meant battleships, eventually attack carriers.

The magic, mysterious number 15 became enshrined, but the price thereof, of course, has gone steadily higher along with the ships' combat capacity. When it came time to replace four of the 15 carriers in recent years, the cost was further raised by going from conventional to nuclear power to drive them. In 1975, at the behest of Admiral Hyman Rickover, the Congress overrode Administration objections and stipulated that all future carriers, their escorts and other major combat ships must be nuclear-powered, at a cost of up to 80 percent more than the conventional.

Now comes word that the expiring Ford Administration has rejected a Navy request for yet another nuclear-powered carrier. Unless reversed by the Congress or the Carter Administration, this decision could mark the beginning of the end of the super-carrier era. We hope it will.

It has not been shown—since the destruction of the Japanese fleet three decades ago—what conceivable war requires an American fleet of 15 super-carrier task forces (Russia has none, nor is it building any). Rising costs forced the decommissioning of two of these task forces last year, but the country's carrier admirals, still dominant in the Pentagon, have persisted in wishing to invest the largest part of their resources to preserve the carrier fleet.

The giant nuclear carrier can attain greater sustained speed, carry more high-performance jet fighters and maneuver independently from fleet oilers. But the carrier task force as a whole remains dependent on conventionally powered ships for escort, defense and supply. When nuclear escorts are added to reduce this dependence, the soaring costs reach into outer space.

The conventionally powered carrier John F. Kennedy cost $280 million in 1967. The nuclear-powered Nimitz, completed in 1975, cost almost $2 billion. Former Defense Secretary Schlesinger proposed three years ago that we quit with four nuclear carriers and let the total number of carriers decline to 12, with eight smaller non-nuclear replacements costing only $550 million each.

A return to something like that plan—which would give the fleet, in addition, some "sea control" ships carrying helicopters and vertical take-off planes—would improve the Navy's ability to handle its overriding mission in war: keeping open the sea lanes to our allies in Western Europe. Costly carriers are not effective in that role.

The Congressional Budget Office estimates that $7 billion could be saved over five years by turning from a preoccupation with supercarriers to attack Soviet targets—a mission of doubtful value. The savings could be spent on the smaller warships needed to hold the sealanes against Russian submarines, the main Soviet naval threat.

Defining the right mission for the right weapon must be our chief concern in evaluating military spending. The next Pentagon budget will give the Carter Administration another chance to make sense of the country's $40 billion at year Navy and its ten-year, $70 billion shipbuilding program.

Carriers remain useful floating air bases in an era in which the nation may still want to project its power into troubled waters. By abandoning the mystique of 15—and the obsession with 90,000-ton nuclear-propelled behemoths—the Navy could build the fleet needed for an Atlantic war and the more limited naval challenges that may occur elsewhere.

MAINE ARCHITECTURE FEATURED IN OCTAGON EXHIBIT

Mr. MUSKIE. Mr. President, my home State of Maine is perhaps best known for her coast, and her unspoiled rural beauty. Maine's beauty is, of course, much more than that, as E. B. White's Stuart Little discovered on his trip North:

In the loveliest town of all, where the houses were white and high and the elm trees were green and higher than the houses, where the front yards were wide and the back yards were worth finding out about . . . in this loveliest of all towns Stuart stopped to get a drink of sarsaparilla.

For those of my colleagues who have not had occasion to visit one of our lovely communities, I call their attention to a survey of the achitectural heritage of Maine on exhibit at Octagon House beginning January 12. It is a heritage with which we Mainers are blessed, and of which we are proud, indeed.

Mr. President, I ask unanimous consent that a descriptive announcement of the exhibit be printed in the RECORD.

There being no objection, the announcement was ordered to be printed in the RECORD, as follows:

MAINE ARCHITECTURE FEATURED IN OCTAGON EXHIBIT

A survey of the architectural heritage of the state of Maine will be the focus of the Octagon's first exhibition in the 1977 program.

The exhibition, entitled "Maine Forms of American Architecture" will be on view from January 12, 1977 through March 10, 1977. Originating at the Colby College Art Museum, Waterville, Maine, the exhibition includes paintings, photographs, architects' drawings, models and three-dimensional objects. Among the artifacts are "View of the Original Statehouse" by Charles Codman, a flag pole model of a Greek Revival church, a quilt patterned by schoolhouse motifs, an isometric view of Poland Hill Village of the Alfred Shaker Community, office signs, sheet music, and architectural features including a wooden fan from a Federal period front door.

"Maine Forms of American Architecture" received the largest single grant awarded by the Maine Bicentennial Commission which

was in turn matched by contributions from the Friends of Art of the Colby College Art Museum and private donors. The exhibition was also the recipient of installation grants from the Maine State Commission on the Arts and Humanities.

The exhibition is accompanied by a book of the same title. A publication of Down East Magazine and edited by Deborah Thompson, the exhibition director, it includes 132 color and black and white illustrations. The catalogue is available for purchase at the Octagon.

Institutional lenders to the exhibition include the Colby College Art Museum, the Avery Architectural Library, Columbia University, the Maine Historical Society, the Maine State Museum and the Henry Francis du Pont Winterthur Museum.

HARRY BYRD: VANISHED POLICIES AND ENDURING PRINCIPLES

Mr. ALLEN. Mr. President, Mr. Douglas Arant, a distinguished and highly respected attorney in Birmingham, Ala., and a long-time friend of mine, has called my attention to the autumn 1976, issue of the Virginia Quarterly Review in which appears an article entitled "Harry Byrd: Vanished Policies and Enduring Principles" which was written by James R. Sweeney. The article reviews the life, philosophy, and accomplishments of the late Senator Harry Flood Byrd, Sr., father of our friend and colleague, the senior Senator from the Old Dominion, Senator HARRY BYRD, Jr.

The history of our great Nation, dating back to the earliest English settlement at Jamestown, is replete with the names of leaders who were native sons of the Virginia Colony and the State of Virginia. Senator Harry Byrd, Sr., is prominent among that long list of outstanding Virginians who have served our country so well.

Mr. President, the 95th Congress, and the new administration which will take office in just a few days, shoulder tremendous responsibilities because the actions which we take, and which President-elect Carter takes after he assumes office, will affect the American people and people throughout the world for generations to come.

I feel that the life story of the late Senator Byrd will prove inspiring to all of those who read it, and it is particularly timely that the Virginia Quarterly Review has just such an article in print.

Mr. President, I ask unanimous consent that the article referred to be printed in the RECORD, so as to make it readily available to all Senators and the general public.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

HARRY BYRD: VANISHED POLICIES AND ENDURING PRINCIPLES

(By James R. Sweeney)

No Virginian of the 20th century has left so deep an imprint on the politics of the Old Dominion as did Senator Harry F. Byrd, Sr., who died ten years ago this fall. While some Virginians regarded the aristocratic Byrd as a symbol of reaction, others saw in him the essence of all that was good in Virginia: honor, conviction, courage, and a selfless dedication to the public weal. The decade since 1966 has produced political conflict and change in Virginia beyond anything imaginable in the years when Senator Byrd presided over the state's dominant political organization. The Byrd Machine has disappeared, but the political philosophy of its leader remains powerful in the Commonwealth.

Historically, Senator Byrd has a dual significance. He is remembered not only as the preeminent figure in Virginia politics but also as a leading conservative Democrat in the United States Senate. Ten years can provide only a limited historical perspective. Yet after the unfilled promises of the Great Society, the agony of Vietnam, and the disillusionment of Watergate, Americans are seeking to rediscover the basis of their political beliefs. The political philosophy of Harry Byrd should be reexamined to determine what value it may have for contemporary society.

The basic facts of Byrd's life are well known. Descended from one of Virginia's oldest and most illustrious families, Byrd was aware at an early age of the Commonwealth's place in the nation's history. He was born 22 years after Lee's surrender at Appomattox. The Virginia of Byrd's youth suffered from the physical destruction and impoverishment left by the war. Both his father, Richard E. Byrd, and his uncle, Henry D. Flood, were active in politics. The elder Byrd served as commonwealth's attorney for Frederick County, speaker of the Virginia House of Delegates, and United States district attorney from the western district of Virginia. Flood was a powerful congressman and a confidant of Senator Thomas S. Martin, leader of the Virginia Democratic party.

Although Harry Byrd matured in a political environment, his first success came in the family business. At 15 he left high school to save his father's newspaper the *Winchester Evening Star* from bankruptcy. Hard work and scrupulous avoidance of additional debt enabled the teen-aged businessman to maintain the newspaper's solvency. After his success in publishing, Byrd leased and bought apple orchards in the Shenandoah Valley. His apple business prospered, and eventually he became the largest private apple grower in the world. He entered politics in 1908 when he won election to the Winchester city council. Seven years later he was elected to the state Senate.

When Senator Martin, Congressman Flood, and State Chairman Rorer James died within a two year period (1919–1921), Byrd rose rapidly in the hierarchy of the Democratic organization, As state chairman he led a successful campaign in 1923 to defeat a proposed $50 million bond issue for highway construction. While overseeing political campaigns, the young state chairman was making friends across Virginia. In 1925, he was elected Governor at the politically tender age of 38. During his tenure as governor, he initiated tax reform, reorganization, and simplification of the state government and an ambitious program of highway construction. The roads were built on a pay-as-you-go basis, *i.e.*, as the revenue became available from gasoline taxes. Byrd also signed the most stringent anti-lynching law in the nation. When he left the Governor's mansion in 1930, Harry Byrd did not relinquish his leading role in the Democratic organization. Governor John Garland Pollard appointed him to the United States Senate in 1933. During his 32 years in that body, Byrd gained a reputation as an opponent of fiscal irresponsibility and the centralization of power in Washington. As chairman of the Senate Finance Committee and the Joint Committee for the Reduction of Non-Essential Federal Expenditures, he became a powerful and respected member of the conservative coalition of Southern Democrats and Republicans.

II

Harry Byrd was not a political philosopher so much as a master of the arts of practical politics. Only on rare occasions, such as the 42nd apple orchard picnic held on Aug. 15, 1964, did he discuss his political creed. The annual gatherings at Berryville drew Byrd's friends and supporters from all sections of the state. Standing on the flat bed of an apple truck and clad in his familiar white linen suit, Byrd sounded the theme of "sound progress" on that hot August afternoon. He recalled a remark made by the scholarly editor and historian, Douglas Southall Freeman, who had described him as "a progressive based on fiscal conservatism." He decried the unsound financing and increasing centralization of power in the federal government. To correct these dangerous tendencies and to promote sound progress, the American people must rededicate themselves to "responsible citizenship, good government, and fiscal soundness." Byrd had no difficulty telling his audience what sound progress did not mean; however, he was disconcertingly vague when describing specific programs needed to attain this objective.

A reading of Byrd's speeches during his 32 years in the Senate does not add significantly to the vague and negative precepts he propounded at the apple orchard picnic two years before his death. His letters reveal little about the foundation of his political beliefs. In October 1964, the senator expressed his thoughts on the topic "The Christian and Politics" in a lengthy and profound letter to Dr. Joe W. Sandifer, a Presbyterian minister. This letter makes it clear that Byrd's political convictions were rooted in his religious faith.

At the beginning of his letter to Dr. Sandifer, Byrd quoted Alexis de Tocqueville's comment that "Religion must be regarded as the first of the Americans' political institutions." For Byrd, de Tocqueville's observation was fundamental truth. The great inspiration of our nation, Byrd wrote, was expressed in the preamble to the Constitution—"To secure the blessings of liberty to ourselves and our posterity." Liberty was the sublime purpose of the new nation as conceived by the founding fathers. In this context liberty had a deep religious significance for Byrd. He interpreted liberty to mean "a spiritual refinement of freedom." By accepting the divinity of Christ, we had established a moral authority superior to all earthly political rulers. Henceforth, individual conscience must guide our conduct. All-powerful government and Christianity are mutually contradictory because, as he expressed it: "Absolute rule exalts the state and debases the individual. Christianity dignifies the individual as a child of God." The conservative Virginian was emphasizing the most subversive and radical tenet of Christianity, but he seemed oblivious to the consequences of his beliefs. He cited the American Revolution as an example of Christians' casting off despotic rule and appealing to a higher moral authority. That abolitionists of the 1840's and civil rights workers of the 1960's might also be fulfilling a divine injunction did not occur to him.

Byrd defined liberty as "freedom restrained by responsible self-government." He held that Jesus Christ as Son of God taught that, if men would learn to govern themselves, it would be possible to conduct worldly affairs on the divine pattern. Christianity, then, emphasized self-discipline. The political theory underlying the United States Constitution was a logical development of Christian principles. The Constitution created a governmental system under which individuals might enjoy the liberties of responsible citizens in a society which encourages individuals to restrain themselves under divine guidance. Byrd believed that the characteristic division of powers in the American political system was the ultimate guarantee of liberty and that the people had to be protected from the abuse of authority by the central government. The framers of the Constitution had wisely set narrow limits to the powers granted to the central government so that individual liberty might be safeguarded. The senator stated that the government of the United States is based upon the dignity of the individual and a

moral code of honorable individual conduct. If man is indeed honorable, he said, we must conclude that self-government is desirable. Thus centralization of power in the federal government is both a violation of the Constitution and a repudiation of the teachings of Christ.

Since the success of the American political experiment depends on man's capacity for self-government, Byrd believed that each American must develop the qualities required by our political system. Primarily, the citizens should realize that individual rights can only be justified by the acceptance of individual responsibilities. The exercise of a right, Byrd wrote, was too often more satisfying than the acceptance of the accompanying responsibility. The principal weakness in the American system was "the tendency to claim the right as an individual and pass the inseparable responsibility over to the government." Carried to its logical conclusion this tendency would lead to despotic government and the destruction of liberty. Times and circumstances might change, he concluded, but "fundamental principles, based on eternal truth, do not change."

Before applying Byrd's "fundamental principles" to the political issues of his time, one should reflect on his analysis of the relationship of Christianity to politics. In his concentration of the individual Byrd seemingly overlooked a vital part of Christ's message: love thy neighbor as thyself. Such a love is not selective, and in our complex society it may have to be expressed through the collective action of the citizenry as performed by their agent, the government. The student looks in vain through Byrd's speeches for a recognition of man's social responsibility to his fellow man. His political philosophy developed in the context of late 19th and early 20th-century Virginia. The conservative Democrats who governed the state believed that government should uphold the state's honor, keep order, and safeguard life and property. Byrd retained this limited concept of the role of government throughout his life.

III

Despite Byrd's view of himself as a progressive, political analysts have properly called him a conservative or, equally as often, a reactionary. He was a self-made man, and he believed that, if a person possessed intelligence, ambition, and competence, he would succeed. Many of the Virginian's contemporaries, including President Herbert Hoover and Governor Alfred E. Smith of New York, shared his faith in rugged individualism. By the 1960's, however, Byrd's views were political anachronisms. He clung tenaciously to his fundamental principles and exhibited no flexibility in their application. Thirty years after the New Deal most Americans accepted a more positive role for the Federal government, but Byrd continued to resist that role as a perversion of the Constitution and a barrier to sound progress. Former Virginia Governor Colgate W. Darden, Jr. has reflected on the senator's place in history: "One of the things you have got to remember in assessing Harry's impact is that he was essentially an agrarian. He never understood, nor did he concern himself too much with understanding, the deep problems of an industrial civilization that was beginning to find its place in Virginia." An agrarian, an orchardist, a countryman, Byrd did not understand the metamorphosis of the federal government's relationship to the individual citizen which occurred during his public life. As his friend, James J. Kilpatrick, put it, "his [Byrd's] only serious weakness [was] that change of almost any sort was anathema to him." Unwillingness to change is unfortunate in anyone, but it is especially lamentable in a public servant. Byrd's intransigence obscured what was valuable in his political convictions.

If consistency were the mark of a statesman, Byrd would be ranked among the preeminent leaders in the history of the Republic. On March 19, 1935, after two years of virtual silence, the Virginian made his first major speech in the Senate. He was proposing an amendment to reduce the appropriation for the new Works Progress Administration from four billion dollars to one billion dollars. In a sense the speech was the only one he ever made in the Senate. He stated that the American businessman was troubled by the enormous expenditures of the federal government and confused by the experiments with the free enterprise system which the government was conducting. Temporary and emergency legislation should be terminated and governmental expeditures reduced. Businessmen would gain a new confidence that the government would protect their property rights. This assurance would stimulate new investment, in Byrd's opinion, and new investment would produce economic recovery. A sampling of the senator's speeches across the three subsequent decades confirms the impression that reduction of federal spending and limitation of federal functions were his two unvarying themes.

Decreased federal expenditures obsessed the senator. In 1950, he debated the scholarly Senator Paul H. Douglas of Illinois before the American Academy of Political Science. In those critical days of the Cold War Byrd offered no appeal to the human spirit. He spoke of money, debt, and national insolvency, a condition which he defined as the inability to raise sufficient taxes in peacetime to balance the budget.

Deficit financing and the soaring national debt are, of course, legitimate political issues. Such concerns are even more pressing today as the American people view with apparent indifference budget deficits which dwarf those of the Truman-Eisenhower-Kennedy era. Byrd, however, emphasized the fiscal problem above all others. "Once the American dollar goes down," he wrote, "we will go into an age of international darkness. The American dollar is the only thing today that is holding the world together." Balancing the budget was "the first and foremost priority." The starkness of these statements seems to contradict the religious basis of Byrd's politics. But the Virginia leader regarded federal spending as a moral question. He expressed this view in 1952, to an audience in Norfolk: "I believe improvident political promises and programs are sinful; that they are evils perpetrated on innocent citizens by demagogues."

Byrd's abiding concern with fiscal responsibility deserves further analysis. The history of the Commonwealth and his early business experiences confirmed his faith in frugality. Virginia's post-Civil War poverty was compounded by the burden of a prewar debt incurred in the financing of internal improvements. By 1870 the total state debt exceeded $45,000,000, and the annual budget payments of $2,700,000 consumed a substantial part of the state's revenues. Virginia's conservative leaders, who advocated repayment of the debt in full, temporarily lost control of the state government to the Readjusters, who called for scaling down the debt and spending more money on public schools. Although the Virginia Democratic Party accepted the Readjusters' settlement of the debt question, such conservatives as Flood and Martin reaffirmed their faith in fiscal integrity. Young Byrd's involvement with the *Winchester Evening Star* seemed to demonstrate the validity of that faith. The financially mismanaged newspaper could not even obtain newsprint on credit. Byrd paid cash each morning for only enough newsprint to meet the afternoon's requirement. Restoring fiscal stability to the *Evening Star* made a profound impression on him. In a sense, he never outgrew the political environment of late 19th-century Virginia and the memories of his own struggle to overcome debt.

Byrd's dire warnings of impending financial ruin for America went unheeded. Repetition of the same message year after year dulled the sensibilities of the American people. In his last three years as a senator (1963–1965) the combined federal deficit was 12.3 billion dollars. For the fiscal years 1970–1972, the total deficit was 49 billion dollars. From 1973 to 1975, the combined deficit increased to 62 billion dollars. Byrd decried the domestic programs of President Lyndon Johnson's Great Society as "acorn spending programs . . . from which giant expenditures will develop in the future." He was quite correct in this prediction. The basis for today's deficits can be found in the extraordinary expansion of domestic spending during the Johnson administration. Federal domestic spending rose from $68 billion in fiscal 1965 to $221 billion in fiscal 1975. Much of the increase was unavoidable because it was written into the language of the program legislation. Byrd's fears have been realized. Some of the social programs, however, have responded to human needs. Instead of constantly attacking such federal initiatives perhaps Byrd should have supported them provided they were financed out of tax revenues.

Byrd believed, however, that massive federal spending and centralization of power are inseparable companions. Centralization, in his view, was changing our system of government by subtle, but effective means The device being used was what Byrd described as "so-called federal aids, subsidies, decrees and other tools of Central Government power, force and intimidation." In his debate with Senator Douglas, he remarked, "There is no such thing as a federal grant. We have to get that into the minds of the people of this country." Fourteen years later, in 1964, the senator was still warning of the dangers of federal aid. Speaking to the ceremonial joint session of the Virginia General Assembly at the restored colonial captiol in Williamsburg, Byrd warned that federal control would inevitably accompany federal grants and subsidies. Addressing the Wakefield, Virginia Ruritans at the shad-planking, the annual Southside Virginia political rite of spring, he cast himself as the defender of state rights who along with other conservatives had their "backs to the wall." He paused to wonder "if the people of this country realize how much power over their liberty the Federal Government has usurped in recent years."

The public's failure to respond to his pleas for a halt to centralization must have keenly disappointed Byrd. During the 1960's the American people looked with favor upon an expanding role for the federal government. The anti-Washington mood set in many years later. The senator could only list examples of federal intrusion into areas he believed reserved for the states. He summarized his analysis of contemporary America in his Law Day Address at the University of Virginia in 1963: "We are being enticed into centralization by Federal paternalism, forced into centralization by Federal usurpation of power, and driven to centralization under the burden of public debt."

To some extent Byrd's comments on government centralization and the resultant regimentation of people's lives were prophetic. Two examples of the much wider role played by the federal government in people's lives today are the equal opportunity/affirmative action hiring programs and court-ordered busing to achieve racial balance in public schools. Senator Harry F. Byrd, Jr. contends that his father foresaw the widening of federal authority. The younger Byrd says his father "predicted 25 years ago exactly what would happen if the federal

government became deeply involved in the educational process . . . government decrees and regulations and government domination, and that's exactly what happened."

The elder Byrd did not realize, however, that state rights imply state responsibilities. The federal government has become involved, perhaps too much so, in areas where the states neglected their responsibilities. The senator's stinging criticisms of federal programs might have been heeded more closely if he had suggested alternative solutions to the problems of urban-industrial America in the 20th century. As late as 1963, however, he criticized federal appropriations for public assistance, health, and higher education because these were "things that people should do for themselves."

Harry Byrd's faith in limited government and dedication to fiscal responsibility affected his opinions on foreign as well as domestic issues. He opposed the post-World War II foreign aid programs, including the Marshall Plan and Point Four, as well as extensive military commitments around the world. As he saw it, we had been playing "the role of world banker, world policeman, and world Santa Claus" too long. The result was deficits in our balance of international payments. Foreign aid must be stopped or reduced drastically. Senator Byrd also opposed the Greek-Turkish aid program which President Truman requested in a crisis atmosphere in 1947. His opposition arose from two convictions. He did not approve bypassing the United Nations. "When we acted alone in Greece and Turkey," Byrd demonstrated, "we violated a fundamental principle upon which the new world organization was founded, namely that no member should take single-handed action involving force or military intervention without previous approval by the United Nations." Perceptively he noted that, if the United States took this action unilaterally, we could not consistently condemn Russia or other nations for taking similar action. The second reason for his opposition to the Greek-Turkish aid bill was more characteristic. He believed the program would cost too much and set a dangerous precedent. Sole attempts to "buy off" Communist influence with American dollars would not work. "Our money by itself," Byrd concluded, "is not the panacea for all the ills of the world." Many years and many billions of dollars in aid were required to teach the American people and their leaders that lesson.

Byrd's response to the Indochina crisis of 1954 illustrates the limits he placed on America's role in the world. He opposed military intervention to save the French. "For years," he said, "I have been convinced that Russia deliberately is seeking to sap our strength and weaken us both financially and militarily by trapping us into sideline wars which may be preliminary to direct attack on this country." American intervention in Indochina, in Byrd's opinion, would have been such a "sideline war." We must realize," he concluded, "our resources are not unlimited. We must not undertake commitments we cannot meet." The days after the French defeat at Dienbienphu were critical for the resolution of American policy. No such watershed marked America's deepening entanglement in Vietnam in the 1960's. Unfortunately, President Johnson's escalation of the Vietnam War began during Byrd's last months in the Senate when he was too ill to analyze the question closely and take a resolute stand as he did in 1954.

V

Byrd's position on civil rights may be traced to the post-Reconstruction period of Virginia history. The Virginia Democratic Party recaptured control of the state from the Readjusters in the 1880's with the argument that Democrats must be united to save white civilization from Negro-Republican rule. The constitutional convention of 1901–1902 wrote suffrage restrictions into the state's fundamental law. Poll tax and literacy requirements disfranchised most blacks and many lower-class whites. The Martin organization consolidated its control by means of the restricted and manageable electorate. It is ironic that the race issue continued to play an important role in the history of the Byrd organization because Byrd was from the Shenandoah Valley, where the black population was numerically insignificant. The Democratic organization, however, received its most loyal support from Southside Virginia, a predominantly rural area stretching from Suffolk to Martinsville. Southside had a sizable black population, but political control was in the hands of the white voters who would resist any change in racial segregation. Byrd and the other leaders of the organization upheld the desires of their most devoted supporters.

Harry Byrd's opposition to federal civil rights legislation and to U.S. Supreme Court decisions in civil rights cases was as forceful as it was ultimately futile. He denounced President Truman's mild civil rights proposals of 1948 as "the greatest mass invasion of states rights, local prerogatives, and the privilege of individual self-determination ever perpetrated on this nation." Byrd's most notable—or notorious—stand against national policy followed the Supreme Court's 1954 school desegregation decision. "If we can organize the Southern states for massive resistance to this order," Byrd proclaimed, "I think that in time the rest of the country will realize that racial integration is not going to be accepted in the South." He had uttered the phrase—"massive resistance"—which would signify the white South's defiance of the Supreme Court. Byrd and Senator Strom Thurmond of South Carolina were chiefly responsible for the "Declaration of Constitutional Principles" or Southern Manifesto issued on March 12, 1956 and signed by 101 Southern members of Congress. The manifesto, an attack upon the constitutional basis of the desegregation decision, was a sharp challenge by the leaders of the South to federal law and authority in their states.

Byrd's intransigent stand against the *Brown* decision was prompted by several considerations. Although he was not a virulent racist, he believed in white racial superiority and was convinced of the desirability of maintaining racial segregation. He declared that the Supreme Court decision was illegal and a federal usurpation of power reminiscent of the Reconstruction era. The Supreme Court had transgressed the rights of the states. The issues involved the form of government set up by the Founding Fathers. Almost one hundred years before, Virginia had provided some of the South's ablest leaders in the Civil War. Once again the South looked to Virginia for leadership in the struggle to maintain its way of life against Northern interference. The *Brown* decision had precipitated what Byrd bemoaned as "the gravest crisis since the War Between the States." "If Virginia surrenders, if Virginia's line is broken," he cried, "the rest of the South will go down, too."

As the foremost figure of the organization, Byrd was instrumental in framing the bizarre massive resistance proposals enacted by the Virginia General Assembly in 1956. These laws provided that the governor had to close all schools under court order to integrate. If the local school boards were willing or ordered to open the schools on an integrated basis, state funds were to be denied to all schools in that district. As a result, schools were closed in Warren County, Charlottesville, and Norfolk. In the end, the massive resistance policy accomplished little else but delay. In January 1959, the statutes were declared unconstitutional by the Virginia Supreme Court of Appeals and a three judge federal district court in Norfolk. Senator Byrd's plan had reached a dead end; nevertheless, he was incensed by Governor Lindsay Almond's refusal to carry on the resistance in defiance of the courts and risk imprisonment.

Byrd continued his opposition to federal civil rights legislation until his death. He held that federal interference in the South's racial problems could only retard the Negro's progress. The Civil Rights Act of 1964 was "a monstrous grab for federal power" and the Voting Rights Act of 1965, "an offense to Virginia." Undoubtedly the civil rights laws expanded federal authority and eroded the rights of the states. Yet once more, Byrd offered no alternative state solution to the problem of securing the blacks' rights in American society, and in offering only defiance to the laws of the land, he was offering only another lost cause to the white South.

An assessment of Senator Byrd should include an evaluation of his character. As Virginius Dabney, the former editor of the *Richmond Times-Dispatch*, has written, Byrd set an example in personal integrity for all public officials. No hint of corruption or dishonesty ever touched his public service. At the height of his popularity and power, he declared, "I believe public office in all branches of government is a public trust and that it should be held only by those with rigid codes of honor." He refused more than $200,000 in federal soil conservation payments to which he was legally entitled because he believed that a public servant should not profit from a law for which he had voted. He would not even sell apples from his orchards to the federal government. A senator, Byrd's view, should accept from the federal government only his salary as a member of Congress. He was shocked by the scandals of the Truman Administration, though the influence peddling and graft of that period seem insignificant after the revelations of recent years.

Byrd's high moral standards permeated the Virginia political organization he headed. The machine had many shortcomings—narrowminders, cronyism, indifference to education, lack of concern for social welfare—but it provided honest and relatively efficient government. Graft was almost completely unknown even after Byrd began to concentrate on national affairs and leave the operation of the state organization to subordinates. Writing after Byrd's death, journalist David Lawrence concluded that "simply stated, the departed senator was unequivocally the champion of common honesty in government and the public servant's obligation to spend taxpayer's money and borrowed funds with the same frugality as if it were his own private income."

The perspective of ten years provides a new vantage point to evaluate the philosophy and career of Harry F. Byrd. When the Virginian announced his resignation from the Senate in 1965, columnist Kenneth Crawford casually dismissed his record as "almost totally negative." Byrd's mark in American history, Crawford wrote, was "deep, unambiguous, and consistent . . . the mark left by tenaciously sustained foot-dragging." Such was the verdict of one Washingtonian in the halcyon days of the Great Society. Arthur Krock presented a more thoughtful analysis in the *New York Times*. There could be no doubt, Krock admitted, that at the time of Byrd's resignation his political career appeared to be a failure. The American people seemed to be moving further away from his political views pointed out, Byrd's fundamental principles have "a rugged ancestry . . . and since they have been repudiated before and restored after experimentation with their opposites, the lesson of history is that they may prevail again."

Krock's analysis seems quite relevant in 1976, when many Americans are expressing disillusionment with excessive centralization and massive federal spending programs. California's young Democratic Governor Edmund G. (Jerry) Brown is among the prominent politicans who have voiced this feeling: "I'm a critic of centralization of power in Washington . . . It's not just my own particular feeling, but an increasing number of people are raising serious questions about unlimited growth, about the effectiveness and results of increasing government intervention in our lives." An excerpt from a recent position paper issued by the Conference of Democratic Governors might have been written ten years ago by Byrd himself. The Governors' statement concludes: "The federal government has become so large, unwieldy, and unavailable that it can no longer adequately respond to the basic needs of our citizens or adjust to new conditions and problems."

Yet one must recognize that the new generation of Democratic leaders is not advocating the strictly limited government and the emphasis on state rights that Byrd preached. They are concerned with improving the structure of government so that programs might work more effectively. As Governor Michael Dukakis of Massachusetts has put the problem: "What's needed, quite simply, is a clear and intelligent division of functions between the federal government on the one hand, and state and local governments on the other. The federal government must do what it, and only it, can do well, and free us at the state and local levels to do what we do best." These modern Democrats perceive the limitations of government action and bureaucracy but have not, as did Byrd, abandon the idea of government as an instrument of social justice.

On the other hand, in foreign affairs, both liberals and conservatives in the 1970's seem to be echoing Senator Byrd's warnings against overcommitment overseas. No longer are Americans willing to accept the bold and unlimited pledges of John F. Kennedy's inaugural address—that America would "pay any price, bear any burden . . . to assure the survival and success of liberty" everywhere in the world. The war in Vietnam prompted a reassessment of our commitments which prompted Richard Nixon to declare "the time has passed when America will make every other nation's conflict its own." When conservatives and liberals in the Senate joined to prohibit additional covert American aid to forecs in Angola, Rhode Island Senator Claiborne Pell called for "a new definition of interests and commitments . . . which recognizes the limitations of America's ability to influence events everywhere in the world."

Thus Arthur Krock's prediction that the "rugged ancestry" of Byrd's fundamental principles would in the end endure seems to be borne out. The best of Harry Byrd's qualities—high integrity, dedication to public service, belief in man's capacity for self-government—appear destined to prevail, while the worst—his adherence to racial segregation, his penny pinching, his negative concept of the responsibilities of state and federal governments to provide for the general welfare—hopefully lie buried with his bones.

PRELIMINARY NOTIFICATION OF PROPOSED ARMS SALES

Mr. HUMPHREY. Mr. President, section 36(b) of the Arms Export Control Act requires that Congress receive advance notification of proposed arms sales under that act in excess of $25 million or, in the case of major defense equipment as defined in the act, those in excess of $7 million. Upon receipt of such notification, the Congress has 30 calendar days during which the sale may be prohibited by means of a concurrent resolution. The provision stipulates that, in the Senate, the notification of proposed sale shall be sent to the chairman of the Foreign Relations Committee.

Pursuant to an informal understanding, the Department of Defense has agreed to provide the committee with a preliminary notification 20 days before transmittal of the official notification. The official notification will be printed in the RECORD in accordance with previous practice.

I wish to inform Members of the Senate that a number of such notifications were received during adjournment.

Interested Senators may inquire as to the details of these preliminary notifications at the offices of the Committee on Foreign Relations, room S–116 in the Capitol.

PROTECTING OLDER AMERICANS FROM OVERPAYING THEIR INCOME TAXES

Mr. CHURCH. Mr. President, each year the Committee on Aging—of which I am chairman—publishes a checklist of itemized deductions to protect older and younger Americans from overpaying their income taxes.

This summary also includes a listing of key tax relief provisions to ease the tax burden of the elderly, such as the total or partial exclusion on .the gain of a sale of a personal residence, the elderly credit, and others.

The 1976 Tax Reform Act made major changes in the tax law, including several with a direct impact upon older Americans.

These modifications are included in the committee's checklist.

Hearings conducted by the Committee on Aging have made it clear that many older Americans needlessly overpay their Federal income tax each year. Some are overwhelmed by the complexities in the tax law and the tax forms. But others are simply unaware of helpful deductions, credits, and exemptions which can save them precious dollars.

The summary can also be useful for taxpayers who may subsequently discover that they forgot to claim an allowable deduction on a prior return.

These individuals can still obtain a refund for these expenditures by filing an amended return—form 1040X—for the year in question. Form 1040X, though, must be filed within 3 years after the original return was due or filed or within 2 years from the time the tax was paid, whichever is later.

Mr. President, the Committee on Aging's checklist can be of important value in safeguarding older and young Americans from paying more income tax than the law requires.

For this reason, I ask unanimous consent that this publication—"Protecting Older Americans From Overpayment of Income Taxes"—be printed in the RECORD, as follows:

There being no objection, the list was ordered to be printed in the RECORD, as follows:

PROTECTING OLDER AMERICANS AGAINST OVERPAYMENT OF INCOME TAXES

(A revised checklist of itemized deductions for use in taxable year 1976)

CHECKLIST OF ITEMIZED DEDUCTIONS FOR SCHEDULE A (FORM 1040)

Medical and dental expenses

Medical and dental expenses (unreimbursed by insurance or otherwise (are deductible to the extent that they exceed 3% of a taxpayer's adjusted gross income (line 15c, Form 1040).

Insurance premiums

One-half of medical, hospital or health insurance premiums are deductible (up to $150) without regard to the 3% limitation for other medical expenses. The remainder of these premiums can be deducted, but is subject to the 3% rule.

Drugs and medicines

Included in medical expenses (subject to 3% rule) but only to extent exceeding 1% of adjusted gross income (line 15c, Form 1040).

Other medical expenses

Other allowable medical and dental expenses (subject to 3% limitation):

Abdominal supports (prescribed by a doctor).
Acupuncture services.
Ambulance hire.
Anesthetist.
Arch supports (prescribed by a doctor).
Artificial limbs and teeth.
Back supports (prescribed by a doctor).
Braces.
Capital expenditures for medical purposes (e.g., elevator for persons with a heart ailment)—deductible to the extent that the cost of the capital expenditure exceeds the increase in value to your home because of the capital expenditure. Taxpayer should have an independent appraisal made to reflect clearly the inorease in value.
Cardiographs.
Chiropodist.
Chiropractor.
Christian Science practitioner, authorized.
Convalescent home (for medical treatment only).
Crutches.
Dental services (e.g., cleaning, X-ray, filling teeth).
Dentures.
Dermatologist.
Eyeglasses.
Food or beverages specially prescribed by a physician (for treatment of illness, and in addition to, not as substitute for, regular diet; physician's statement needed).
Gynecologist.
Hearing aids and batteries.
Home health services.
Hospital expenses.
Insulin treatment.
Invalid chair.
Lab tests.
Lipreading lessons (designed to overcome a handicap).
Neurologist.
Nursing services (for medical care, including nurse's board paid by you).
Occupational therapist.
Ophthalmologist.
Optician.
Optometrist.
Oral surgery.
Osteopath, licensed.
Pediatrician.
Physical examinations.

Physical therapist.
Physician.
Podiatrist.
Psychiatrist.
Psychoanalyst.
Psychologist.
Psychotherapy.
Radium therapy.
Sacroiliac belt (prescribed by a doctor).
Seeing-eye dog and maintenance.
Speech therapist.
Splints.
Supplementary medical insurance (Part B) under Medicare.
Surgeon.
Telephone/teletype special comunications equipment for the deaf.
Transportation expenses for medical purposes (7c per mile plus parking and tolls or actual fares for taxi, buses, etc.)
Vaccines.
Vitamins prescribed by a doctor (but not taken as a food supplement or to preserve general health).
Wheelchairs.
Whirlpool baths for medical purposes.
X-rays.

Taxes

Real estate.
State and local gasoline.
General sales.
State and local income.
Personal property.

If sales tax tables are used in arriving at your deduction, you may add to the amount shown in the tax tables only the sales tax paid on the purchase of five classes, of items: automobiles, airplanes, boats, mobile homes, and materials used to build a new home when you are your own contractor.

When using the sales tax tables, add to your adjusted gross income any nontaxable income (e.g., Social Security, Veterans' pensions or compensation payments, Railroad Retirement annuities, workmen's compensation, untaxed portion of long-term capital gains, recovery of pension costs, dividends untaxed under the dividend exclusion, interest on municipal bonds, unemployment compensation and public assistance payments).

Contributions

In general, contributions may be deducted up to 50 percent of your adjusted gross income (line 15c, Form 1040). However, contributions to certain private nonprofit foundations, veterans organizations, or fraternal societies are limited to 20% of adjusted gross income.

Cash contributions to qualified organizations for (1) religious, charitable, scientific, literary or educational purposes, (2) prevention of cruelty to children or animals, or (3) Federal, State or local governmental units (tuition for children attending parochial schools is not deductible). Fair market value of property (e.g., clothing, books, equipment, furniture) for charitable purposes. (For gifts of appreciated property, special rules apply. Contact local IRS office.)

Travel expenses (actual or 7 cents per mile plus parking and tolls) for charitable purposes (may not deduct insurance or depreciation in either case)

Cost and upkeep of uniforms used in charitable activities (e.g., scoutmaster).

Purchase of goods or tickets from charitable organizations (excess of amount paid over the fair market value of the goods or services).

Out-of-pocket expenses (e.g., postage, stationery, phone calls) while rendering services for charitable organizations.

Care of unrelated student in taxpayer's home under a written agreement with a qualifying organization (deduction is limited to $50 per month).

Interest

Home mortgage.
Auto loan.
Installment purchases (television, washer, dryer, etc.).
Bank credit card—can deduct the finance charge as interest if no part is for service charges, loan fees, credit investigation fees, or similar charges.
Points—deductible as interest by buyer where financing agreement provides that they are to be paid for use of lender's money. Not deductible if points represent charges for services rendered by the lending institution (e.g., VA loan points are service charges and are not deductible as interest). Not deductible if paid by seller (are treated as selling expenses and represent a reduction of amount realized).
Penalty for prepayment of a mortgage—deductible as interest.
Revolving charge accounts—may deduct the "finance charge" if the charges are based on your unpaid balance and computed monthly.
Other charge accounts for installment purchases—may deduct the lesser of (1) 6% of the average monthly balance (average monthly balance equals the total of the unpaid balances for all 12 months, divided by 12) or (2) the portion of the total fee or service charge allocable to the year.

Casualty or theft losses

Casualty (e.g., tornado, flood, storm, fire or auto accident provided not caused by a willful act or willful negligence) or theft losses to nonbusiness property—the amount of your casualty loss deduction is generally the lesser of (1) the decrease in fair market value of the property as a result of the casualty, or (2) your adjusted basis in the property. This amount must be further reduced by any insurance or other recovery, and, in the case of property held for personal use, by the $100 limitation. You may use Form 4684 for computing your personal casualty loss.

Credit for child and dependent care expenses

Certain payments made for child and dependent care may now be claimed as a credit against tax instead of as an itemized deduction.

If a taxpayer maintained a household that included a child under age 15 or a dependent or spouse incapable of self-care, a taxpayer may be allowed a 20% credit for employment related expenses. These expenses must have been paid during the taxable year in order to enable the taxpayer to work either full or part time.

For detailed information, see the instructions for Form 2441 on page 17.

Miscellaneous

Alimony and separate maintenance (periodic payments).

Appraisal fees for casualty loss or to determine the fair market value of charitable contributions.
Union dues.
Cost of preparation of income tax return.
Cost of tools for employee (depreciated over the useful life of the tools).
Dues for Chamber of Commerce (if as a business expense).
Rental cost of a safe-deposit box for income-producing property.
Fees paid to investment counselors.
Subscriptions to business publications.
Telephone and postage in connection with investments.
Uniforms required for employment and not generally wearable off the job.
Maintenance of uniforms required for employment.
Special safety apparel (e.g., steel toe safety shoes or helmets worn by construction workers; special masks worn by welders).
Business entertainment expenses.
Business gift expenses not exceeding $25 per recipient.
Employment agency fees under certain circumstances.
Cost of a periodic physical examination if required by employer.
Cost of installation and maintenance of a telephone required by a taxpayer's employment (deduction based on business use).
Cost of bond if required for employment.
Expenses of an office in your home if employment requires it.
Payments made by a teacher to a substitute.
Educational expenses required by your employer to maintain your position or for maintaining or sharpening your skills for your employment.

Political Campaign Contributions.—Taxpayers may now claim either a deduction (line 32, Schedule A, Form 1040) or a credit (line 52, Form 1040), for campaign contributions to an individual who is a candidate for nomination or election to any Federal, State, or local office in any primary, general or special election. The deduction or credit is also applicable for any (1) committee supporting a candidate for Federal, State, or local elective public office, (2) national committee of a national political party, (3) State committee of a national political party, or (4) local committee of a national political party. The maximum deduction is $100 ($200 for couples filing jointly). The amount of the tax credit is one-half of the political contribution, with a $25 ceiling ($50 for couples filing jointly).

Presidential Election Campaign Fund.—Additionally, taxpayers may voluntarily earmark $1 of their taxes ($2 on joint returns) for the Presidential Election Campaign Fund.

For any questions concerning any of these items, contact your local IRS office. You may also obtain helpful publications and additional forms by contacting your local IRS office.

Other tax relief measures

Filing status	Required to file a tax return if gross income is at least—
Single (under age 65)	$2,450
Single (age 65 or older)	3,200
Qualifying widow(er) under 65 with dependent child	2,850
Qualifying widow(er) 65 or older with dependent child	3,600
Married couple (both spouses under 65) filing jointly	3,600
Married couple (1 spouse 65 or older) filing jointly	4,350
Married couple (both spouses 65 or older) filing jointly	5,100
Married filing separately	750

Additional Personal Exemption for Age.—Besides the regular $750 exemption allowed a taxpayer, a husband and wife who are 65 or older on the last day of the taxable year are each entitled to an additional exemption of $750 because of age. You are considered 65 on the day before your 65th birthday. Thus, if your 65th birthday is on January 1, 1977, you will be entitled to the additional $750 personal exemption because of age for your 1976 Federal income tax return.

General Tax Credit.—A new general tax credit is available. For this credit, the taxpayer may claim the greater of (1) $35 per exemption shown on line 6d, Form 1040A or Form 1040, or (2) 2 percent of taxable income (line 15, Form 1040A or line 47, Form 1040) but not more than $180 ($90, if married, filing separately).

Multiple Support Agreements.—In general, a person may be claimed as a dependent of another taxpayer, provided five tests are met: (1) Support, (2) gross income, (3) member of household or relationship, (4) citizenship, and (5) separate return. But in some cases, two or more individuals provide support for an individual, and no one has contributed more than half the person's support. However, it still may be possible for one of the individuals to be entitled to a $750 dependency deduction if the following requirements are met for multiple support:

1. Two or more persons—any one of whom could claim the person as a dependent if it were not for the support test—together contribute more than half of the dependent's support.

2. Any one of those who individually contribute more than 10 percent of the mutual dependent's support, *but only one of them,* may claim the dependency deduction.

3. Each of the others must file a written statement that he will not claim the dependency deduction for that year. The statement must be filed with the income tax return of the person who claims the dependency deduction. Form 2120 (Multiple Support Declaration) may be used for this purpose.

Sale of Personal Residence by Elderly Taxpayers.—A taxpayer may elect to exclude from gross income part or, under certain circumstances, all of the gain from the sale of his personal residence, provided:

1. He was 65 or older before the date of the sale, and

2. He owned and occupied the property as his personal residence for a period totaling at least 5 years within the 8-year period ending on the date of the sale.

Taxpayers meeting these two requirements may elect to exclude the entire gain from gross income if the adjusted sales price of their residence is $20,000 (this amount will increase to $35,000 for taxable years beginning after December 31, 1976) or less. (This election can only be made once during a taxpayer's lifetime.) If the adjusted sales price exceeds $20,000 (this amount will increase to $35,000 for taxable years beginning after December 31, 1976), an election may be made to exclude part of the gain based on a ratio of $20,000 (this amount will increase to $35,000 for taxable years beginning after December 31, 1976) over the adjusted sales price of the residence. Form 2119 (Sale or Exchange of Personal Residence) is helpful in determining what gain, if any, may be excluded by an elderly taxpayer when he sells his home.

Additionally, a taxpayer may elect to defer reporting the gain on the sale of his personal residence if within 18 months before or 18 months after the sale he buys and occupies another residence, the cost of which equals or exceeds the adjusted sales price of the old residence. Additional time is allowed if (1) you construct the new residence or (2) you were on active duty in the U.S. Armed Forces. Publication 523 (Tax Information on Selling Your Home) may also be helpful.

Credit for the Elderly.—A new, expanded, and simplified credit for the elderly has replaced the former more complex retirement income credit.

A taxpayer may be able to claim this credit and reduce taxes by as much as $375 (if single), or $562.50 (if married filing jointly), if the taxpayer is:

(1) Age 65 or older, or

(2) Under age 65 and retired under a public retirement system.

To be eligible for this credit, taxpayers no longer have to meet the income requirement of having received over $600 of earned income during each of any 10 years before this year.

For more information, see instructions for Schedules R and RP.

Earned Income Credit.—A taxpayer who maintains a household for a child who is under age 19, or is a student, or is a disabled dependent, may be entitled to a special payment or credit of up to $400. This is called the earned income credit. It may come as a refund check or be applied against any taxes owed. Generally, if a taxpayer reported earned income and had adjusted gross income (line 15c, Form 1040) of less than $8,000, the taxpayer may be able to claim the credit.

Earned income means wages, salaries, tips, other employee compensation, and net earnings from self-employment (generally amount shown on Schedule SE (Form 1040) line 13). A married couple must file a joint return to be eligible for the credit. Certain married persons living apart with a dependent child may also be eligible to claim the credit.

For more information, see instructions for Form 1040 or 1040A.

VIEWS OF DR. WERNHER VON BRAUN

Mr. ALLEN. Mr. President, Senators, and indeed, the American people, are saddened to learn of the continuing serious illness of Dr. Wernher von Braun, who helped pioneer the United States to mastery in space technology, and we pray that he might regain his health.

On October 29 of the past year, Dr. von Braun prepared a philosophical dissertation which was read to a synod of the Luthern Church of America held in Philadelphia. This paper was reviewed by Peter Cobun, a fine young staff writer for the Huntsville Times, of Huntsville, Ala., and his article was printed in the Sunday, December 19, 1976, issue of that newspaper.

Because of the great respect which we hold for Dr. von Braun and because his remarks are pertinent to all of us, I request unanimous consent that the article, "Dr. Wernher von Braun Presents His Views in a Paper Called 'Almost a Confessional,'" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

DR. WERNHER VON BRAUN PRESENTS HIS VIEWS IN A PAPER CALLED "ALMOST A CONFESSIONAL"

(By Peter Cobun)

Calling the flush toilet "the most disastrous invention ever made by man" and confessing to doubt the concept of "original sin," Dr. Wernher von Braun expressed these and other intimate thoughts in a lengthy paper delivered this fall.

The 82-page paper was read for Von Braun to a synod of the Luthern Church of America held Oct. 29 at Philadelphia, Pa., and has been termed by one of the space pioneer's colleagues to be "almost a confessional."

Written by Von Braun over a period of several months during hospitalization for a series of operations to curb a spreading cancer, the philosophical dissertation was read to the synod because of Von Braun's inability to attend.

In his introduction, Von Braun alludes to the heavily philosophical nature of the paper, and apologizes.

Yet within its pages Von Braun has articulated a lengthly list of mankind's problems and, in turn, presented his own remedies and views—views sought for months by scholars, scientists and Von Braun's closest friends.

His topics include science, technology and morality and the question of taboos; the motivation for scientific study and research; a list of mankind's most pressing problems; a hierarchy of scientific priorities; and some provocative thoughts on the relationship between science and religion.

Irritated by the oft-asked question, "If we can send men to the moon, why can't we . . .," Von Braun says the endless enumeration "of all the grim problems besetting humanity" lie outside the domain of science and technology. Some of the problems can indeed be solved, he believes, "provided we are willing to spend an adequate amount of effort and money."

But then there is the ethical question: Is everything that is scientifically possible also permissible? Should we attempt, he asks, to develop a set of taboos declaring certain scientific studies off limits?

"I think the majority of scientists are convinced that very wise and cautious statesmanship and ironclad international treaties are absolutely mandatory to protect mankind from the abuse of its newly won scientific capabilities. It appears to me the time to flash up the red no-go sign is not at the very early stages of any basic scientific pursuit," says Von Braun. Quoting Plato: "We can easily forgive a child who is afraid of the dark, the real tragedy of life is when men are afraid of light."

Concerned about the over-enforcement of taboos, he believes laws on science should be established only after the area of potentially dangerous abuse "of an otherwise promising and beneficial scientific discovery can be clearly identified and isolated."

"No judge," he writes, "would condemn a human embryo to death because it has the potential to become a criminal.

"I fervently believe that not everything that is scientifically possible is per se permissible—in the ethical or religious sense. But the stoplight for scientific research should be applied only after we discern the beneficial from the detrimental, the good from evil."

To address what Von Braun terms "the most pressing problems of our generation," he conceives a dome supported by five pillars which encompass and represent the survival of mankind. The five pillars, represent resources survival, environmental survival, spiritual survival, nuclear survival and scientific survival.

And thus for 50 pages of his text, Von Braun goes into an eleborate discussion of human survival, in which he says that science can provide the appropriate solutions to problems which he admits have been festered by science itself.

In addressing each problem area, one intriguing solution repeatedly appears: the reliance on information-gathering satellites.

Data from these satellites—some already in orbit for limited use—"have taken polluters to court, led geologists to oil, given land planners a regional picture faster (at far less cost than traditional surveys), analyzed plant health for farmers and forecasters, corrected maps, and showed the Sahel (African drought-famine region).

"Such information from satellites," says

Von Braun, "has been called as epoch-making as the first use of fire as a tool, or the first practical use of the wheel."

Von Braun calls the brain "man's most precious resource," and is scornful that "the vast majority of mankind uses it most sparingly. The reason," he says, "is inadequate education."

The solution? A communications satellite, such as the one already hovering over India, beaming educational television to 2,500 of India's remotest villages. But then there are the questions of morality. "Can we," asks Von Braun, "or the Indians themselves, really assess the impact of bringing, within the time span of a single generation, literacy to half a billion people? What changes will that cause to the social and political fabric of a predominantly rural country?"

Von Braun admits to being "deeply involved in this particular satellite and the India educational experiment. Speaking for myself, we have no moral right to deny (education) to them."

To buttress this moralistic argument, Von Braun relates a personal experience which occurred during his 20-year residence in Huntsville, where he was first assigned to work on the Army's missile research program, and later became director of the George C. Marshall Space Flight Center.

"Maybe the fact that I spent 20 years of my life in Huntsville has something to do with (my) conclusion. When I arrived there in 1950, the opinion was widespread among the predominantly white population of Huntsville that most black children were either not ready for first-class education, or that a general rise in their educational standards would only lead to trouble with job placements.

"Today," writes Von Braun, "Huntsville has some of the finest integrated schools in the nation, and few, if any, of the predicted problems have arisen."

Optimistic of rapid improvements in the environment within the next decade, Von Braun nevertheless is struck by the irony "that some of civilization's most applauded accomplishments have become the most serious threats to our environment."

He presents, as an example, the flush toilet. "The river, as a convenient sewer, led to the invention of the flush toilet, which some environmental experts in modern sewage treatment now consider one of the most disastrous inventions ever made by man. It led to the habit of committing not just our body wastes, but most of our other wastes as well, to sewage water, which we now find we must remove from that water in expensive sewage treatment plants again before committing it to the river. In retrospect, an earlier invention of the chemical toilet and of energy-producing incineration of dry garbage would have been a better, overall approach."

The dominating Von Braun humor seeps into his discussion of the environment when he writes, "Let me leave you with some food for thought and maybe a smile." Today's environmental impact statements "may be easy to applaud, but not always are they so easy to implement."

His example: Suppose the Elder Henry Ford would have had to file an environmental impact statement to mass-produce his Model "T." Would the critical reviewer have approved the concept if he had known of the "unpleasant odor of exhaust gas" or that in 1975 over 46,000 Americans alone were killed in auto accidents and 2 million injured?

"But I am sure," writes Von Braun, "that both Mr. Ford and his critical reviewer would have missed what was probably the most important item in their impact statement: The fact that the automobile would rid American cities of the housefly." The housefly—dubbed "one of the worst killers known to man" by Von Braun—found its breeding ground in the horse-and-buggy days in the horse stables and the manure-laden streets of the cities. The auto, theorizes Von Braun, thus made the cities healthier.

To those who embrace the ideological concept of "Zero Growth" to curb the world's growing population, Von Braun says pointedly that concept "should be rejected as half-cocked and downright dangerous."

"There is no question," he writes, "that some growth trends should indeed be of great concern, but continued growth in other areas is a vital necessity for the survival of humanity. The indiscriminate philosophy of "No Growth" makes no difference between growth of population and growth as means for continuing survival. We must reject this simplistic concept."

In answering the self-imposed questions of "What drives man to explore the unknown? Why are we flying to the moon? What is the essential justification of the exploration of space?," Von Braun says he is convinced "the answer lies rooted not in whimsy but in the nature of man. I guess it is all just in the basic makeup of man as God wanted him to be. I happen to be convinced that man's newly acquired capability to travel through outer space provides us with a way out of our evolutionary dead alley."

In a lengthy and complex section on nuclear survival, Von Braun writes that it is "hardly surprising that leading nuclear physicists are alarmed and recommended in congressional testimony a complete export ban on certain critical equipment such as plutonium extraction systems, isotope separation plants or technology helpful in the perfection of the still highly experimental breeder reactors.

"But the truly worrisome question is, of course, whether the horse isn't out of the barn already. The thought of nuclear bombs in the hands of terrorist groups or madmen is frightening indeed."

Von Braun is troubled that many scientists cannot visualize God.

"What strange rationale," he asks, "makes some physicists accept the inconceivable electron as real while refusing to accept the reality of God on the ground that they cannot conceive him? One cannot be exposed to the law and order of the universe without concluding that there must be a Divine Intent behind it all. Speaking for myself, I can only say that the grandeur of the cosmos serves only to confirm my belief in the certainty of a Creator. The better we understand the intricacies of the universe and all its harbors, the more reason we have found to marvel at God's creation."

Throughout this obvious painstaking assembling of thoughts, Von Braun often alludes to his relationship with God. All allusions are optimistic; all show evidence that Wernher von Braun has come to terms with his God.

But, however bemusedly, Von Braun adds: "While I am ready to confess that I am a sinner, worse still, that I sometimes even enjoy being one, I must also confess that I have a hard time myself accepting the concept of original sin."

"In this reaching of the new millennium through faith in the words of Jesus Christ," writes Von Braun, "science can be a valuable tool rather than an impediment. The universe revealed through scientific inquiry is the living witness that God has indeed been at work.

"Understanding the nature of the creation provides a substantive basis for the faith by which we attempt to know the nature of the Creator."

COMMITTEE REFORM PROPOSALS

Mr. HATHAWAY. Mr. President, it is my strong hope that the work of the 95th Congress will be facilitated by substantial reform of the Senate committee structure.

The Committee on Rules will be reporting a resolution on or before January 19, and thereafter we shall be considering these proposals in detail.

I believe the Committee on Committees has done an excellent job in highlighting our current difficulties, but I also have a number of alternative proposals which I hope can receive consideration.

In this regard, I testified before the Rules Committee on January 5 and outlined specific recommendations on current shortcomings in the Stevenson-Packwood resolution, and areas for improvement.

Because of the strong interest of my colleagues in these matters, and because this body will be devoting itself to these proposals in a short time, I ask unanimous consent that my testimony be printed in the RECORD.

There being no objection, the testimony was ordered to be printed in the RECORD, as follows:

TESTIMONY OF SENATOR WILLIAM D. HATHAWAY ON COMMITTEE REORGANIZATION PROPOSALS

Mr. Chairman, I am pleased to have the opportunity to express my views regarding the proposed Resolution to reorganize the Senate committee system which was introduced last week and subsequently referred to this committee.

At the outset, I wish to make clear as a cosponsor of this Resolution jointly authored by Senators Stevenson and Packwood, as well as the prior Stevenson-Brock proposal, that my sole purpose was to bring the broad question of committee reform before the Senate for discussion.

I am not wedded to all of the particulars of the proposal as presently drafted.

In fact, I have a number of criticisms, suggestions, and alternatives. But I do agree that consolidation and reform of the committee structure is necessary and I commend the members of the Committee on Committees for their able work in highlighting the dimension and scope of our present jurisdictional jungle.

1. The Need for Reorganization—

The Senate in unanimously adopting the resolution creating the Committee clearly expressed its view that the present structure with its 31 committees and 174 subcommittees is simply not doing the job as well as it could.

Our present predicament is not unlike that of a police force attempting to function with a cruiser fleet comprised of horse-drawn buggies or model T's—traditional, historical, and quaint, but not very well suited for catching modern day bank robbers.

Furthermore, the bank robbers we must corral—dwindling energy sources, inflation, the staggering economic, social and psychological costs of inadequate job opportunities—are more intractable, deeprooted, and destructive than any gang in the old west.

So, despite our individual proclivities as to what the ideal system might be, it is critically important that we scrap the current structure and reach some consensus as to its replacement.

We must not lose this opportunity, or postpone it under the delusion that a better plan might materialize in the future.

The opportunity for change and improvement has never been better.

On Tuesday 18 new Senators were sworn in. Yesterday we elected new leaders on both sides of the aisle. We have delayed making committee assignments in order to lessen the impact of felt needs to retain newly established bases of power.

On January 20 a new President will be inaugurated who is committed to reorganizing the whole executive branch.

This is a unique opportunity to put our own house in order, to restore it to efficiency and effectiveness. If we take up this challenge and respond to it we would go a long way toward restoring public trust in Congress as an institution and restoring equality among the three branches of our government.

In addition to these more important goals, we should not overlook the impact which reorganization could have on each of us as individual Senators. The Committee on Committees has well documented the current anarchy in the scheduling of committee meetings, meetings with constituents, subcommittee meetings, floor debate, votes and so on.

The teaching of Isaac Newton notwithstanding, we are forced to structure our daily schedules to be three and four places at once, and dash helter-skelter from one side of Capitol Hill to the other. Votes are inevitably missed, meetings cut short or never attended, floor debates occur which are never heard by the vast majority of Senators.

I serve on four full committees—the Committee on Finance, the Committee on Labor and Public Welfare, the Select Committee on Small Business, and the Select Committee on Intelligence. On Finance, I am chairman of the Revenue Sharing Subcommittee, and a member of four other subcommittees —Energy, Financial Markets, Supplemental Security Income, and Health. On Labor and Public Welfare, I am chairman of the Alcoholism and Narcotics Subcommittee and a member of six other subcommittees—Labor; Education; Health; Employment, Poverty and Migratory Labor; Children and Youth; and Arts and Humanities. On Small Business, I serve as chairman of the Subcommittee on Government Procurement, and am a member of the subcommittees on Monopoly, and Financing and Investment. On Intelligence, I am chairman of the Subcommittee on Budget and a member of the Subcommittee on Intelligence and Rights of Americans. Thus, I am chairman of four subcommittees and a member of a total of seventeen subcommittees. These committees, all four of them, often meet at the same time, and given subcommittees of these same committees have been known to schedule simultaneous hearings and markups.

I do not cite these staistics as a personal complaint—rather they are typical of many members of the Senate and a symptom of the overall problem we face. Given the system as presently structured, we must of necessity undertake these extensive duties in order to ensure that in representing our constituents we are doing all we can as individuals to shape the legislation which affects their daily lives. But inevitably, we are spread too thin and our overall effectiveness suffers. The system must change.

2. Consolidation of Existing Committees and Limitation on Committee Assignments—

I strongly favor cutting the present number of 31 standing, joint, select, and special committees approximately in half, and restricting individual Senators to no more than three of these committees and to a total of no more than half a dozen subcommittees.

In a body comprised of 100 members, we cannot justify the existence of 31 separate entities, each with their own staff, policies and functions. The overlap and wasted effort which results now is well known to all of us and must be eliminated if we are to present a credible case to our constituents that we stand for efficient and effective government.

3. Subcommittee Authority and Limitations on Assignments—

The resolution's proposal to limit each Senator to three committee assignments and five subcommittee assignments is laudable.

On the other hand, its exemption of committee chairmen and ranking minority members from the subcommittee assignment limitation is disappointing.

This exemption could result in the chairmen and ranking minority members dominating the subcommittee proceedings and thereby frustrate the original intention of subcommittees—to provide the full committee with a specific, separately arrived at, legislative proposal shaped by the expertise of the individual subcommittee members, which then can be modified as the full committee desires. Allowing chairmen to be members of all the committee's subcommittees could subvert this valuable filtration process.

In addition to bringing all committee members under the subcommittee assignment limitation, any reorganization proposal ought to contain language which specifically recognizes and delineates the functions of subcommittees to hold hearings, make recommendations, and initiate legislation for the consideration of the full committees of which they are a part.

Virtually all of our present standing committees include such provisions in their own rules—but there is one notable exception to this practice—the Committee on Finance, on which I serve.

Not until the 94th Congress were there any subcommittees whatsoever on this critically important committee. But as constituted, these committees exist in name only, with no authority to develop and report legislation. Because the subcommittees lack this power, the full committee does not have the benefit of previously thrashed-out consensus language, but instead must debate in marathon sessions many highly technical provisions of law involving gains and losses of billions of dollars of federal revenue in a virtual vacuum.

4. Mandatory Rotation of Committee Members and Chairmen—

No Senator should serve on any one committee for more than eight years and chairmanships of committees and subcommittees should change at least as often.

In addition to cutting back on day-to-day conflicts and burdens, we should try to maintain a broad exposure to a great many subject areas, which is perhaps the only benefit of the current scheduling chaos.

These seemingly contradictory goals could be accomplished if membership on a given committee were for a maximum of eight years, with one-fourth of the existing membership rotating off the committee every two years, at which time they would be assigned to a new committee.

All of our committees would benefit from this infusion of new ideas and new approaches. Each of us would benefit from being exposed to the problems faced by the different committees and to the viewpoints of more of our colleagues on how these problems might be solved. Committee chairmen should in no way be immune from this proposal, and might well benefit from it to even a greater extent than their junior colleagues.

After having been a member of a particular committee for some time, each of us tends to view national problems from the perspective of that committee's legislative authority and the programs over which it has oversight.

We would greatly benefit from a procedure which would force us to step outside this potentially stultifying perspective, and at the same time we might be less critical of the work of some of the committees with which we might not always agree if we were forced to undertake directly their work from time to time.

There is precedent for such a rotational process in one of our existing committees—the Select Committee on Intelligence as created by Senate Resolution 400 adopted during the last session, and on which I am privileged to serve.

Members were initially appointed to this committee on staggered 2, 4, 6, and 8 year terms with succeeding members to serve a maximum of eight years. The legislative history makes clear that this was done in order to ensure that members of the committee in overseeing the intelligence community did not themselves become a part of the intelligence establishment, and thereby be less vigilant or critical of abuses.

This principle is no less valid with respect to any of our committees. None of our agencies or departments should be able to become comfortable or cozy in dealing with just a few Senators and should be subject to a constantly changing group of Senators which better represent the needs of all parts of our nation.

Committee chairmanships should rotate more frequently, perhaps every four years, in order to foster broad based accountability on which the principle of rotation is based.

5. A Major Standing "Committee on Armed Services and Veterans' Affairs"—

I have been contacted over the last few weeks by a great number of my constituents who are concerned about the resolution's proposal to eliminate the current Veteran's Affairs Committee and instead merge its functions into a new Human Resources Committee. I share their concern.

The proposed Human Resources Committee would have jurisdiction over matters now largely handled by the current Committee on Labor and Public Welfare and would subsume the welfare and assistance programs now under a number of other committees.

The veterans and their families understandably feel that their programs and concerns would not be adequately addressed by an umbrella committee which must also deal with education, aging, health, labor and so on.

As a veteran of World War II, I understand and share this sentiment. The thirty million living veterans and their families and dependents together comprise nearly half the population of the country.

Every citizen of our country owes an inestimable debt to each of these thirty million veterans and to the many million more no longer living and it is appropriate that the Senate of the United States give recognition to this reality in its committee structure.

At the same time it is clear that if we are going to make headway in our efforts to reorganize we must consolidate those committees which are compatible and which would lead to greater economy for us and for the taxpayers we represent. For it does little good to have a separate Veterans Affairs Committee dedicated to the recognition of these vital accomplishments if that committee does not have full equality and legislative functions equivalent to all other committees.

While it is true that the Veterans' Affairs Committee currently has broad oversight over federal programs totaling nearly $20 billion in benefits and services per year, this committee's legislative activity has largely been confined to fine-tuning amendments to existing legislation which has been in effect for over twenty years.

Given the goals of this overall reorganization effort, I can appreciate the desire of the

Committee on Committees to merge the Veterans Committee with another committee. But we ought to merge it with a compatible major committee which would guarantee that the concerns of our veterans would be fully addressed and highlight our concern by incorporating "Veterans' Affairs" into the title of the committee.

I believe that the Committee on Armed Services is such a committee and therefore that a new Committee on Armed Services and Veterans' Affairs would be an acceptable and appropriate entity to all our veterans.

The veterans would benefit from this merged structure in becoming directly associated with the committee which presently has jurisdiction over existing programs of benefit to some of them, such as military retired pay. Through this merger, they could also play a greater role in affecting the deliberations of legislation of interest to all veterans—the overall level of our national security, the relative merits of procuring various weapons systems, the preparedness of our armed forces and so on.

6. A Major Standing "Committee on Small Business and Finance"—

I have also been contacted by many small business men and women who are concerned about the Stevenson-Packwood resolution's proposal to merge the functions of the current Select Committee on Small Business into a new Committee on Agriculture and Small Business. I too share their concern.

As a member of the Select Committee on Small Business, I am well aware of the importance of small business to our economy and society. 97% of businesses in this country can be classified as small business; they employ over half of all employees and account for one-third of our gross national product. They have been responsible for many of our most revolutionary technical advances.

But independent of any statistical analysis, small business is important to our society and preserves and protects many of our most cherished values which might not otherwise survive in our increasingly fragmented and stressful society.

Small business men and women may be unique in today's increasingly mobile society in that they are committed to their geographical area, to their neighborhood schools, their local government, to charities and local hospitals. They are also more likely to build up personal ties with their employees and care about their welfare more deeply than large corporations which hire and fire depending on the cycle of the economy. Given this importance, the Small Business community is entitled to formal recognition in our committee structure and ought to be able to look to one major committee as the logical lighting rod for its complaints and concerns.

This committee must have legislative authority to remedy these complaints and not simply be a sounding board.

As the author of Senate Resolution 104 which gave to the current Select Committee on Small Business and direct legislative authority over the programs of the Small Business Administration I am most sensitive to all of these concerns. That resolution was approved by the Senate last spring by an overwhelming margin and is to take effect in this Congress.

But even this resolution, long-awaited and sought by small business groups succeeded only in giving to the Small Business Committee jurisdiction over just one agency affecting small business and did not guarantee any immediate impact over the dozens of other agencies and departments which affect its operations. We tried for a broader mandate but were required to narrow the scope of the resolution to the point where it is clear that the SBA is the one and only agency which the committee can deal with legislatively.

So, to fulfill the goals of small business and our reorganization goals, we ideally would structure a new committee which gives small business the recognition it deserves and at the same time has substantial legislative responsibilities keyed to remedying the problems felt by small business and would not overlap the programs of any other committee.

But, this is impossible since matters which affect small business inevitably cut across all our current committees and any future committees we might propose.

We must accept the fact that our choice is limited to one between a select committee approach which has legislative authority over the SBA and otherwise acts only as a sounding board *or* merge the select committee functions within a full, standing committee which has substantial legislative authority to affect real improvements in a greater number of areas.

The consolidation route, while admittedly less, than the ideal of small business, seems a far preferable alternative to the present position as a hybrid select committee with extremely limited legislative authority.

But the resolution's proposal to merge the Small Business Committee with the Committee on Agriculture seems ill-advised and unlikely to fulfill this goal.

A merger with the Committee on Finance seems far more logical and likely to benefit small business.

A new Committee on Small Business and Finance, and I use that order of billing deliberately, would be able to consider and legislate tax measures of direct benefit to small business and would also be able to lead the way in simplifying paperwork burdens which are currently strangling small business.

This consolidation would also have a positive impact upon the committee's overall deliberations of tax measures in general. Currently we pay too much attention to the tax proposals fostered by corporate giants and give inadequate emphasis to tax equity for the vast majority of Americans.

This new committee would undertake all of the current duties of the Select Committee on Small Business including legislative authority over SBA and would, I hope, continue to play a vital role in pointing out to all other committees deficiencies in the programs falling under their jurisdiction.

7. A Major Standing "Committee on Agriculture and Rural Development—We already have a Committee on Banking, Housing and Urban Affairs. I therefore propose that there be a new Committee on Agriculture and Rural Development. It makes sense for us to officially give equivalent recognition to the problems of our rural areas. But it should be more than a symbolic or cosmetic gesture. This new Committee should be given the economic development programs currently under the aegis of the Public Works Committee.

8. Elimination of the Appropriations Committee—The Committee on Appropriations ought to be eliminated and all of its various functions transferred to the respective committees having authorization jurisdiction over the programs, departments and agencies involved.

After the enactment of the Congressional Budget and Impoundment Control Act of 1974, there are no valid reasons to continue the existence of the Appropriations Committee.

The Budget Committee now does the job of setting an overall ceiling on outlays which must be approved by the Senate as a whole. These totals are allocated on the basis of functional categories and ensure that our federal spending policies are predetermined and debated and therefore constitute a binding consensus of what our national priorities are, within our ability to fund them.

Given this guidance with these functional ceilings having been imposed, the authorizing committees would be capable of determining to which programs and to what extent federal revenues ought to be obligated. Having considered and approved the authorizing legislation the members of these committees are the ones best prepared to determine how these funds ought to be allocated.

If our goal in this reorganization is to eliminate duplication of effort and overlap of jurisdiction, we should eliminate the most egregious overlap of all in our structure.

The agencies and departments would certainly be grateful—they would no longer be forced to appear before both the authorization and appropriations committees.

Our legislative procedures would be made more understandable to the public at large, and to those seeking legislative redress.

9. A Major Standing Committee on Judiciary and Senate Rules Administration and Standards—If we are sincere in our reorganization goals we ought not to stop at consolidating the groupings of committees which deal with programs of the executive branch and the subject areas of outside interest groups.

We should in addition look for ways the committees dealing with our own internal matters might be adjusted in the same fashion, and whether these functions might be compatible with those of other committees.

The resolution in proposing a new Committee on Rules and Administration and Standards does this to some extent, but this goal could be further fostered if the functions of that committee were also merged with the Committee on the Judiciary to create a new Committee on Judiciary, Rules; Administration and Standards.

This seems a most compatible grouping and would succeed in demonstrating to our constituents that we are in no way exempting the committee dealing with the matters affecting this body or the committee affecting the judiciary from our reorganization efforts.

Matters proposed to be included under the jurisdiction of the resolution's Committee on Rules, Administration and Standards such as federal election law and presidential succession are equally suitable for consideration by the Committee on Judiciary which now has jurisdiction over congressional apportionment, meetings of Congress, attendance, incompatible offices, and constitutional matters in general. Matters affecting the Standing Rules of the Senate would likewise be compatible.

The remaining functions of the Rules Committee including Senate house keeping matters could easily be handled by this merged committee.

10. Need to Streamline Senate Floor Procedure—There is no logical reason to cut short our reform efforts to affect simply the committee structure. It will do little good to have a smoothly functioning, efficient committee setup if chaos remains the rule on the floor.

The resolution has some sound suggestions on scheduling which should be given more teeth.

But additionally the rules affecting floor proceedings are in substantial need of being cleaned up to eliminate unnecessary delay and confusion.

Yesterday I urged the Democratic Caucus to support my proposals to eliminate the possibility for long delay in the daily reading of the Senate Journal, and in quorum calls. I shall be introducing this formal over the next few days and urge that it be incorporated in the final reorganization package.

BELL: "A GOOD MAN FOR A CLEAN-UP JOB"

Mr. TALMADGE. Mr. President, I was very interested to read the Washington Post an editorial article by Eugene Patterson on Judge Griffin Bell, who has been designated by President-elect Carter for the position of Attorney General of the United States.

Mr. Patterson, a native of Adel, Ga., is editor and president of the St. Petersburg Times and one of the Nation's most respected writers and journalists. He succeeded the late, distinguished Ralph McGill as editor of the Atlanta Constitution and served for several years as vice-chairman of the U.S. Civil Rights Commission. Mr. Patterson describes Griffin Bell as "an able and incorruptible lawyer of the highest character and integrity" who is eminently qualified for Attorney General.

I bring this article to the attention of the Senate and ask unanimous consent that it be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Jan. 6, 1977]

BELL: "A GOOD MAN FOR A CLEANUP JOB"

(By Eugene Patterson)

Carter's larger reasoning in picking Griffin Bell, knowing in advance he would draw a troublesome reaction, is more reassuring than disturbing to those of us who have known Bell well over the last 20 years. Carter's whole cautious approach to his Cabinet selections shows he's not inclined to gamble or attract controversy lightly to his appointments. Why, then, did he expose himself deliberately to the heat he knew Bell's appointment as Attorney General would bring, with its surface overtones of political cronyism once again at Justice?

Chances are, the appointment signals a Carter determination to clean house at the department, including the FBI. For, when the dust settles, Bell is likely to be seen for what he is: An able and incorruptible lawyer of the highest character and integrity and a principled man, who on the balance of his actions over the last two decades, can be depended upon to demand that civil rights laws be obeyed.

If this runs counter to the impression given by the single-shotting of his background, his overall record need only be examined.

To comprehend what has happened during the last 15 years in Dixie, it is necessary to understand who, including Carter and Bell, made it happen. These are men who turned against Southern popular custom and their own ancestry to work toward rectification, in one generation, of racial wrongs spanning two centuries. Until that fact sinks in, along with the majestic meaning of it, the nation will continue to find it hard to understand the Southern administration that leads it.

True, there were greater white heroes than Carter and Bell in moving the South toward desegregation in the 1960s. But the pace of the march was less important than the direction the few leaders took in that time when too many politicians and judges were clinging to the safe popularity of the past. To go back from the present and glean isolated errors from the past of such men is to lose sight of their true measure: The sustained thrust of their courage and commitment in a time when it took courage to have courage. Bell qualified, as did Carter, and we Southerners who watched them through those years know them for what they are.

I watched Bell come out of an Atlanta establishment law firm in the 1950s to serve as chief of staff to an upright but segregation-trapped governor of Georgia, Ernest Vandiver. Bell helped ease Vandiver into appointing a blue-ribbon panel, called the Sibley Commission, to hold hearings across Georgia for the purpose of educating the segregationists on the inevitability of public school desegregation. And when Alabama-style riots broke out when the University of Georgia was forced by the courts to desegregate, Bell was among the few who persuaded Vandiver not to follow George Wallace's example of inaction in the Autherine Lucy riot, but to send in the State patrol, which reclaimed the Georgia campus from the mob and protected the black students there.

These were critical, almost politically suicidal steps in that time, primitive as they may seem now. But they marked out the men of the future. Southerners measure men now on where they stood then.

Bell took the Georgia chairmanship of John F. Kennedy's campaign before it was by any means certain a Catholic and a "liberal" on civil rights could carry that state in 1960.

And once on the bench of the federal Circuit Court of Appeals, where he perceived himself to be a moderate bridge between the liberal judges and the conservatives who didn't want to move on civil rights, Bell wrote a strong record of upholding black rights to vote and to go to integrated schools.

Nobody's perfect. I felt Bell voted wrong in finding that the Georgia constitution empowered its legislature to deny a seat to an elected representative, Julian Bond. He didn't address the right or wrong of the legislature's act, as I recall. He simply felt it had the power to act, rightly or wrongly. The Supreme Court reversed him. So he erred. So that was one case. His record shows a voluminous and unswerving series of opinions requiring justice for blacks, including a period when, as he says, he was practically acting as "the superintendent of schools for Mississippi." That record deserves a fair examination by the hawks swooping at his Southern head.

Last February, when Bell resigned from the federal bench to re-enter private practice, I interviewed him and printed his own words, which state his philosophy at a time when he had no pressure on him and no reason to dissemble:

"The type of case coming to us has gotten mighty routine," he said, explaining his resignation at age 57. "I'll bet 40 percent of them are criminal cases involving narcotics. It got to be a production line. There was little time to reflect. This was not the reflective court I went on 14½ years ago, judging great issues. . . . [T]he pace was too slow after the cases I'd known with larger meaning for the society and the nation. . . ."

Bell went on to recall with pride his part in ending the notorious county unit system of elections in Georgia; in helping to reapportion state legislatures and force just representation for all; in giving life to the Voting Rights Act for blacks in the South; and, exceeding all others in stress, in requiring desegregation of the schools of his native South.

"We contained a social revolution," Bell said 11 months ago. "The law did that. It was one of the most remarkable achievements in history when you look back on it. The federal court system proved to be a great instrument for the general good."

Taken whole, Griffin Bell is a level-headed lawyer of dependable character whose tough commitment to the principles of political rectitude and racial justice were case-hardened in the pressures of the 1960s when commitment counted. The Senate and the nation most likely will come to see that the President-elect has nominated a pretty good man for a cleanup job that can lead to restoration of faith in the Justice Department.

STEPS TO PREVENT FUTURE OIL SPILLS

Mr. HUMPHREY. Mr. President, in the last 3 weeks we have witnessed two environmental disasters of potentially enormous magnitude. The wreck of the *Argo Merchant* off Nantucket Island may damage the fishing grounds of Georges Bank resulting in economic ruin for many New England fishermen. The grounding of the *Olympic Games* in the Delaware River is almost certain to cause irreparable damage to much of the wildlife on the river. These catastrophes demonstrate only too clearly the inadequacies and ineffectiveness of our present laws in preventing such disasters and protecting our environment from them.

Reasonable and prudent congressional action needs to be taken to prevent future accidents. In addition, action is needed to insure that the cleanup of any future oil spill proceeds promptly and efficiently and that those persons suffering economic loss from a spill are compensated for their loss. The oil spilled by the *Argo Merchant* and the *Olympic Games* is only a thimbleful compared to that which could be spilled by a supertanker or discharged from an offshore drilling platform. These accidents may be only a sample of things to come.

Mr. President, in an effort to stimulate additional thought and discussion about oil spills, the damage they cause, and means to prevent future accidents, I am drafting a bill which would amend the Federal Water Pollution Control Act. As I see it, such legislation would strengthen existing law by doing the following:

First. Extend provisions of the Federal Water Pollution Control Act relating to the cleanup liability for pollution by oil and other hazardous substances to the outer boundary of the fishery conservation zone. The present law only covers accidents in contiguous waters;

Second. Increase the shipowner's total liability from $14 to $30 million. This sum includes both liability for cleanup costs and liability for economic loss. The current law imposes a liability only for cleanup costs; and,

Third. Request that the President initiate an international conference which would establish formal regulations governing such things as ship structure standards, crew training and qualifications, and navigational and safety equipment.

This proposal is not a panacea. I recognize that it may be only a partial solution to the problem. But, it is a start and it will hopefully stimulate us and other concerned citizens to think about new legislation which would solve the problem. I welcome comments on the proposal I have outlined for discussion from other interested Senators and outside experts.

WAMI: A SOLUTION TO HEALTH MANPOWER PROBLEMS

Mr. CHURCH. Mr. President, WAMI stands for the States of Washington,

Alaska, Montana, and Idaho working in cooperation to establish physicians in areas with health delivery problems. It is a program well-known throughout the country, closely watched for its progress to be applied to the national dilemma perhaps most critical to the realization of adequate health care for all Americans—having manpower so that health care can be delivered

Recently a report by a Liaison Committee on Medical Education, representing the American Medical Association and the Association of American Medical Colleges, completed an extensive survey of the WAMI program. Because this survey is essentially an accreditation procedure, the committees full report will not receive wide public dissemination. But its glowing evaluation of the WAMI program, terming it so successful to be startling in its praise, requires ubiquitous attention. I shall ask unanimous consent that an introductory passage and a lengthy portion of the Committee's report, including several tables, be printed in the RECORD at the conclusion of my remarks.

The WAMI program, Mr. President, proceeded on several straight-forward facts and premises. First, the States of Alaska, Montana, and Idaho have no medical colleges. In Idaho, proposals to establish a medical school have been deemed financially prohibitive. At the University of Washington School of Medicine in Seattle, there has been the typical press of applicants far exceeding capacity, including applicants from the other three States for whom national needs would dictate strong consideration. The resolution WAMI provides has the University Medical School admitting students from all four States, with financial participation by the States' governments, and educational participation by the States' universities. A most important fiscal feature of this aspect of WAMI is the expanded medical school classroom availability provided at other campuses, without any additional capital expenditures, and the concurrent expansion and diversification of faculty and students.

Mr. President, I have been a strong advocate of the WAMI program, but I do not know if anyone can match the enthusiasm the evaluation committee found among the students, faculty, and administrators on its campuses. In fact, the word "enthusiasm" appears again and again in the visitation reports at the universities. Nevertheless, the WAMI program has gone forward with caution, doing detailed analysis of attitudes, problems, and results. Those results, as documented by common tests are outstanding: WAMI students are indistinguishable from students taking courses entirely at the Medical School in Seattle.

At the heart of WAMI is the provision of health care for the many medically underserved areas of the four States involved. In this most crucial facet of the program, WAMI takes its students into community clinical units in these States. Not only does this furnish these students an excellent learning experience, but also it augments—directly and immediately—health manpower and delivery of health care. In the committee's visitation reports on these units, the word again is "enthusiasm," but now coupled with recommendations for more students to them, to add to the significant success that the overall report assessed.

But, again, WAMI proceeds with caution. The ultimate goal is, of course, the establishment of physicians in underserved areas. Although those completing the entire program are still few in number, their decisions so far strongly indicate that the WAMI experience does attract them into permanent practice in such locations.

Mr. President, the reason that WAMI has been followed so closely across the country is best stated by the five goals WAMI set for itself:

First. To increase the number of students from WAMI States who are being admitted to schools of medicine;

Second. To increase the number of primary care physicians being trained;

Third. To bring the resources of the Seattle Medical Center to WAMI communities;

Fourth. To avoid construction of more facilities to educate students; and

Fifth. To improve the poor geographical distribution of physicians by encouraging medical students from rural communities to return to similar communities to practice.

The evaluation committee, from the American Medical Association and the Association of American Medical Colleges, concluded that the first four of these goals are being met, and that the fifth and most important is apparently being met. Its comments on the program are so positive that they must impress even its strongest advocates.

Mr. President, I ask unanimous consent that the report and tables be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD. as follows:

INTRODUCTION AND BACKGROUND OF THIS VISIT

On invitation of the administrative officers of the School of Medicine, the Liaison Committee on Medical Education organized a survey of the Medical School of the University of Washington. The survey was scheduled in 1975 instead of the more "normal" time in 1978 because a re-evaluation seemed timely in view of the development of a major program of decentralized undergraduate medical education in the years since the 1971 survey. Accordingly, a team of nine members conducted the survey during the interval of October 16 to October 25, 1975. The members of the survey team were:

Chairman: Christopher C. Fordham, M.D., Dean, University of North Carolina, School of Medicine.

Secretary: Glen R. Leymaster, M.D., Executive Director, American Board of Medical Specialties.

John A. Dixon, M.D., Dean, University of Utah School of Medicine.

William J. Grove, M.D., Executive Dean, University of Illinois College of Medicine.

Andrew D. Hunt, M.D., Dean, Michigan State University School of Medicine.

Hayden C. Nicholson, M.D., Glen Ellyn, Illinois.

Terence A. Rogers, Ph. D., Dean, University of Hawaii School of Medicine.

W. Albert Sullivan, Jr., M.D., Associate Dean, University of Minnesota—Minneapolis Medical School.

Roy C. Swan, M.D., Chairman, Department of Anatomy, Cornell University Medical College.

The team and the University authorities agreed that while it was necessary to conduct a complete accreditation survey, it was also desirable to concentrate on the WAMI (Washington, Alaska, Montana, Idaho) program.

The team procedure was as follows. The activities described in this section were in addition to an abbreviated evaluation of the University of Washington program in medical education in Seattle. Drs. Fordham, Leymaster and Swan traveled to Fairbanks, Alaska for a one day visit to personnel and facilities at the University of Alaska. The next day they traveled to Anchorage for a visit with the community clinical unit in Psychiatry, interviewing the Director, faculty, students and the resident. On returning to Seattle this group conducted the survey of the Seattle facilities with Dr. Swan returning to Cornell at mid-week.

The entire team of nine assembled for a meeting Sunday night, October 19, to review the objectives and the strategy of the survey. The entire team met with University of Washington personnel, particularly Dean Van Citters and his staff, throughout Monday to receive an overview of the total program.

On Monday evening, Drs. Sullivan and Rogers started their visit, traveling during the ensuing days to Moscow (Idaho) and to Pullman (Washington) where they reviewed the two university programs, namely the Washington State University and the University of Idaho. On Wednesday, October 22 they visited the Obstetrics community clinical unit at Boise, Idaho and on October 23 the Pediatric community clinical unit in Pocatello, Idaho, returning to Seattle in the evening.

On October 21 Drs. Grove and Nicholson journeyed to Bozeman, Montana where they surveyed the medical program at Montana State University. The following day they visited the Pediatric community clinical unit in Great Falls, Montana and the next day journeyed to Missoula, Montana where they visited the Internal Medicine community clinical unit, returning to Seattle in the evening.

On Tuesday, October 21, Drs. Dixon and Hunt traveled to Anacortes, Washington where they visited the Family Medicine community clinical unit then to Omak where they visited the Family Medicine clinical unit on October 22. On October 23 they visited the Wenatchee, Washington Internal Medicine community clinical unit, returning to Seattle on Thursday evening.

By Thursday evening in spite of snow storms, icy roads, and late plane schedules, the team had re-assembled at the hotel where reports were exchanged.

Each team was provided detailed descriptive material of the programs which they were to visit, plus full information regarding the medical school departments at Seattle. If wanted, information was available, on every program to each member of the team. Prior to deployment of the team members to the northwestern United States, the Secretary provided each team member with a brief outline which might guide its fact-finding and evaluative opinions (See Appendix V(a) for copy of Guidelines). Each team was requested to write a brief statement of evaluation for the guidance of the entire team, the readers of the survey report, and the University. Each team did write such reports and they are included, suitably identified, in Appendix V (b, c, d, e). These handwritten reports have been given only the lightest editorial touch since they seem to capture well the enthusiasm of the evaluators for the WAMI program.

The survey team members individually and collectively registered their enthusiasm for the WAMI program. The goals which it seeks to meet are important ones. The program is well planned and executed in an effort which is thought to have an excellent chance of

meeting these objectives. With a few minor exceptions, the program is superbly managed with outstandingly good communications over long distances and among divergent groups of people. Morale on the part of faculty and students seems to be high. Community acceptance seems good. There is no evidence, at least as yet, that the three states other than Washington feel that they are getting anything but full value received for their investment of tax money.

There are relatively minor weaknesses and problems identified in a small number of the individual portions of the WAMI program, as noted in this report. However, they seem to be known to those with primary responsibility for the success of the program and efforts are underway to correct the significant ones.

GENERAL INTRODUCTION

The WAMI territory

The WAMI territory is located in the northwestern portion of the United States and comprises four states or 22 percent of the land mass of the United States. Covering six time zones and containing slightly more than six million people, the states of Washington, Alaska, Montana and Idaho (hence, the acronym WAMI) are, in the main, a sparsely populated, rural region which affords innumerable outdoor recreational opportunities. Rich in natural resources and agriculture, the WAMI territory nevertheless faces serious challenges in the fields of health care and health education.

The challenges

What are the challenges for health professionals in the WAMI territory?

Shortage and maldistribution of physicians. While there is considerable disagreement as to the number of physicians necessary for high quality medical care, there does appear to be a shortage and serious maldistribution of certain kinds of physicians in the WAMI territory. Employing the MD to population ratio as a measure, it is apparent that the WAMI states have fewer physicians per unit population than the national average (Table 1). Furthermore, within a given state this ratio may vary considerably as exemplified by the nine counties in the WAMI territory that are without a physician.

A critical appraisal of the types of physicians in the region leads to the conclusion that there are too few physicians delivering primary care (Table 2). Assuming a 4 percent attrition rate, it will be necessary to add 73 family or general practitioners per year to maintain the present number of physicians without affecting the present deficit.

Access to medical education. From 1963 to 1973 the number of students applying for admission to medical schools in the United States rose from 17,668 to 36,135 (110 percent) and the number of positions in medical schools increased from 9,063 to 14,124 (55 percent). This national phenomenon has been nowhere better exemplified than at the University of Washington School of Medicine (UWSM). As Table 3 indicates, in the 1963 to 1973 10-year period, the number of students from the WAMI territory applying to UWSM has risen 155 percent. In the same 10-year period, the number of positions at UWSM increased from 75 to 125 (67 percent). As a result of this "crunch", competition for admission to medical school has become exceedingly keen. This is especially critical for schools in the West that are expected to educate not only the residents from their own states, but also students who are residents from states without medical schools, including Alaska, Montana and Idaho (the AMI states). As the size of the applicant pool increases, state-supported medical schools can expect progressively greater pressure to admit only residents from their own state. As a consequence of such pressure, residents from the AMI states may expect progressively greater difficulty in being admitted to medical schools.

Demand for Medical Education. Coincidental with the increased demands for undergraduate medical education and the growing class size have come additional demands on medical schools for continuing medical education (CME). These latter demands can be expected to increase for two reasons. First, the possibility of professional recertification will require a more formal emphasis on CME. Second, the establishment of Professional Standards Review Organization (PSRO), which will review the quality of care being delivered, should define the educational requirements to bring the care to predefined levels. Among these needs will be (a) the education of medical school students, residents and physicians concerning Patient Care Appraisal (PCA) a system of medical audit, how it is implemented and how it can improve the quality of medical care; (b) the development of educational courses designed to correct deficiencies defined by PCA and (c) a more formal emphasis on lifelong learning by the physician. In the Pacific Northwest and Alaska, these needs are especially challenging because of the large geographical areas involved and the absence of medical schools in Alaska, Montana and Idaho.

Patients for Medical Training. Over the past decade, the size of medical school classes at UWSM has increased significantly. This increase has placed a significant burden on the patient resources available for clinical training in Seattle.

Costs of Medical Education. Available evidence strongly suggests a progressively greater preoccupation and concern with the costs of medical education. Recently, studies on the costs of medical education were published by the Association of American Medical Colleges (AAMC) and the Institute of Medicine (IOM). The former study reported an average instructional cost of $8,600 per student per year (range $5,700 to $10,200) while the IOM study indicated a net average educational expenditure of $9,700 (range $5,150 to $14,150).

Since the early 1950's, the Western Interstate Commission on Higher Education (WICHE) has facilitated the transfer of funds from states without medical education programs to states with medical schools in return for the admission of residents. In view of the cost studies referred to, it is apparent that the $5,000 per year supplied by the sending state is significantly less than the costs of medical education. In addition, Deans for Admissions at state-supported medical schools in the West have indicated that this cost-sharing arrangement no longer has a significant influence on the admissions process. It is reasonable to conclude, therefore, that unless a new arrangement is forthcoming, state-supported medical schools may be forced to reduce greatly, if not eliminate enrollment of residents from states other than the one supporting the medical school.

It is also apparent that the legislature in a state without a medical school would be reluctant to spend the entire cost of medical education for their residents outside of their state. On the other hand, it is generally accepted that the amount of capital and operating costs necessary for a medical school argues against the development of medical schools in the states of Alaska, Montana, and Idaho.

The WAMI program

To meet these challenges, the University of Washington School of Medicine in 1971 embarked upon an experiment in decentralized medical education. The WAMI program, as it is called, has a number of specific objectives.

Improve the health of citizens in WAMI states through decentralized medical education.

Increase the number of positions in medical schools without major capital construction.

Increase the number of primary care physicians in the WAMI states.

Correct the maldistribution of physicians in the WAMI region.

Broaden the educational experience of future physicians through the use of clinical resources in communities.

Improve and expand continuing education programs for physicians and other health care professionals throughout the WAMI region and integrate these programs into an overall plan which includes undergraduate and residency training.

Expand the financial base for medical education by encouraging all states to pay the full costs of educating their residents.

Assist adjacent states with the development of medical and other health professional education.

The WAMI concept

The WAMI concept consists of two separate phases. In the first or university phase of the WAMI program, students receive the first year of medical school training at the University of Alaska, Washington State University, the University of Idaho, Montana State University or the University of Washington School of Medicine. For this portion of the curriculum, faculties and facilities already in existence are used. Existing courses at the cooperating universities have sufficed in some cases, while in others, new courses have been developed. By decreasing the burden on the resources in Seattle during the first year, it is hoped that the number of students admitted to medical school can be increased.

This plan is consistent with the medical school curriculum which was adopted at the University of Washington in 1968. The curriculum change emphasized an integration of the basic and clinical sciences, stressed flexible career choices at an earlier time in medical education, allowed for graduation in three years and established a Department of Family Medicine.

It was anticipated that following the experience at these universities, the students would join the portion of the class that began in Seattle for the second year of medical education.

At the conclusion of the basic curriculum, the students enter the elective phase of their education, which is predominantly clinical in nature. Under the WAMI concept, students during the elective period would receive a portion of their training at the University of Washington School of Medicine and a portion from physicians in communities of the four-state region (community phase). These community centers of medical education, or community clinical units (CCUs), have been established in those disciplines for which there is a need and in which the physician manpower is currently maldistributed. Included in this category are family medicine, internal medicine, psychiatry, pediatrics and obstetrics and gynecology. It was anticipated that these units could be used for a portion of the residency training in the discipline for which they were established. Since the greatest need of the WAMI region is (and was) for family physicians to practice in rural parts of the WAMI region, the first of the community clinical units were to be established in family medicine in rural communities. Finally, the units provide access to a patient population for instruction which is not presently available in the University of Washington affiliated hospitals.

From the beginning of the planning, it was anticipated that if practicing physicians were to be involved in the community clinical units, they would be required either to increase the number of hours they work or to reduce the scope of their practice. In

either situation, these community teachers would require reimbursement for their educational effort. While some are willing and able to participate, others find it impossible to do so and still supply the health care needs of the community.

In addition, it is generally accepted that residents tend to practice in the area where they received their training. It was anticipated that residents would not only reduce the physician's burden of instruction for the undergraduate medical students and consequently free the physicians for more patient care, but would also allow the resident first-hand experience in how his or her discipline is practiced in a community setting. If the resident was accompanied by spouse and children, they too could become involved in the community and gain an appreciation of the life a physician leads in that community. It was hoped that these experiences would create new attitudes in the future practitioners and their families, and act as a recruiting device for the rural areas in the WAMI region.

The founders of the WAMI program felt that community clinical units could also serve as a focus for the continuing education of physicians in the area. In part, this was to be achieved by having inquisitive students interact with physicians over a period of time. In addition, the visits of the community-based faculty to the medical center and visits of the medical center faculty to the communities would provide a continuing emphasis on learning. Finally, specific programs from the medical center could be transported to the community for use by all physicians in the area. In this way, the continuum of learning throughout professional life could be emphasized. Physicians in training could participate in the development and implementation of new policies and programs which may eventually affect them. In addition, consultation would be available to the communities and the sense of isolation that many rural practitioners feel could be reduced.

In addition to the community clinical units, state universities without medical schools could play a major role in the process of continuing education for health professionals. This goal would be accomplished by periodic visits to the universities by faculty from the University of Washington School of Medicine.

Finally, it was hoped that the community clinical units could eventually be used to train the various health care professionals as a team. This development could lead to a more effective integration of their efforts and an awareness of the roles that each professional may play.

Rationale for WAMI program

Considering the needs for health care in the WAMI territory, a number of justifications emerged for implementing the WAMI experiment.

Provided the university phase of the WAMI program proves to be an effective way to teach the beginning portion of medical education, the WAMI program offers a way to increase the number of physicians in training without requiring new investments in "bricks and mortar". In addition, the WAMI program can reduce the impact that larger numbers of students would have on the medical center in Seattle.

Since physicians, in large part, tend to practice in those areas where they received their training, the decentralization of a portion of the undergraduate clerkships and the residency training programs may reduce the maldistribution of physicians that now exists in the WAMI territory.

It is now generally accepted that the AMI states, or those without medical schools, cannot financially support a medical school, nor are they paying the costs of educating their own residents in medicine. In addition, there appears to be no possibility of developing a single medical school which would serve more than one state in this area, as was proposed by Dr. Ward Darley in 1958 for Montana, Wyoming, Nevada and Idaho. WAMI provides an alternative solution to this dilemma by allowing a portion of educational appropriations of a given state to be spent in that state. Finally, WAMI offers the universities involved an opportunity to broaden their curricular offerings. These components of the WAMI program provide a basis for a partnership and, in turn, justify the expenditure of "state" funds at UWSM to pay the actual costs of medical education. As such, it broadens the base of support for medical education in the WAMI region and distributes the burden in an equitable way.

If the WAMI experiment is educationally sound and financially and logistically feasible, then it will be possible to increase the opportunities for medical training available for students from all of the WAMI states, including the state of Washington.

Through the efforts of the federal government and the medical schools, large numbers of highly trained basic scientists have been educated in the last 10 to 15 years. Some of these scientists are working as faculty members in universities without medical schools and were judged to be effective instructors during their graduate or post-graduate training. In addition, clinical training programs have produced a pool of highly trained manpower which may also be used for instruction. Such teaching represents a resumption of teaching activities required of residents or fellows. The WAMI concept provides a way to involve both manpower pools in the training of physicians without requiring that they be in Seattle.

It was reasonable to assume that the community experiences will be of acceptable academic quality for a number of reasons. (1) The peripheral faculty are thoroughly evaluated before they are chosen to participate in the program. (2) The periodic visits by full-time faculty to the units and by the clinical (part-time) faculty to the medical center provide a continual monitoring of the program. (3) The educational experiences will, for most of the disciplines, occur after the students have received their basic hospital training in that discipline at the medical school. As such, the students will require less supervision in the community setting than they would require if this were their first major exposure to clinical medicine. (4) Since residents in the various disciplines are assigned to the units, they assist in the instruction of the undergraduate students in the same way they do in the medical center. (5) Learning resources support is being developed to amplify and reinforce the concepts and knowledge which are germane to the various curricular objectives.

By decentralizing a portion of the clinical training for medical students and residents, the pressure on the clinical teaching resources at the medical center and affiliated hospitals is reduced. Access to patients in the communities will also provide students experience with diseases which they may not now see in university-related hospitals in Seattle.

A decentralized program of medical education should provide a more effective basis for recruiting students, including disadvantaged students, from the WAMI area. For example, Alaskan native leaders feel the presence of the WAMI program will be instrumental in convincing native students that medicine is a career option for them. This is especially critical since only one Alaskan native is documented as having been admitted to a medical school.

The decentralization of a portion of medical education has expanded the number and kinds of educational experiences available to medical students from the University of Washington. By capitalizing on the assets available inside as well as outside the metropolitan setting, students should have a broader background of knowledge, skills and understanding to apply in their professional lives. This background will also provide a better basis for selecting careers, and where these careers will be pursued, than has been available before.

Should the WAMI concept of decentralized cooperative medical education prove to be viable, then the concept may be transferred to other fields of health professional education. As such, it was expected that the presence of a medical education program in a state would serve as a central point around which a wide range of health-related education programs would develop.

Because the WAMI concept envisioned using the University of Washington School of Medicine as a home base and incorporating facility and faculty resources already in existence elsewhere in the region, it was possible to implement WAMI more rapidly than most new medical education programs. The initial goal was to have the program in operation by 1971, or two years after the birth of the plan. In fact, this was achieved in 15 months.

If even a portion of these expectations for WAMI are realized, it is reasonable to conclude that the overall health of the people in the WAMI territory should be improved. This conclusion rests on the assumption that medical education as presently constituted is ultimately beneficial to the health of the people who make it possible.

Progress to date

University Phase. In September 1971, nine students began the first semester of medical education at the University of Alaska. This experience was repeated in 1972 with 30 students in Alaska and Idaho and at the Washington State University. In 1973 Montana State University, the fourth and final university in the program, was added and 40 students, distributed equally among the four sites, were involved. The entire first year of the curriculum was provided at the University of Alaska beginning in the fall of 1974 and a similar program at the other universities began in 1975.

While in these settings, the students enroll in courses which are equivalent to the courses being taught at the University of Washington Medical School. These courses are conjointly designed by the faculties of all universities involved, including UWSM. In addition, faculty from the University of Washington participate in the teaching program in the four institutions as visiting faculty. These visits and a conjointly designed evaluation of the program including a common examination at the end of each course are being used, along with National Board results and performance in subsequent courses, to assess the quality of education and to compare the performance of WAMI students with students who begin their medical education in Seattle.

During the course "Medicine, Health and Society" the students visit rural villages in Alaska, Indian reservations in Idaho and Montana, migrant farm camps in Washington, and community clinical units in all of the states. These visits are designed to expose students to the problems in the delivery of adequate health care to rural areas of the WAMI region. The students also spend half a day per week working with physicians in the local communities to obtain an understanding of the practice of medicine in that community. The majority of these preceptors are primary care physicians.

Community Phase. The first two community clinical units were established in family medicine in Omak and Grandview, Washington, in March 1971. The selection procedure, which is used in establishing all units, involves informing the members of the

State Academy of Family Physicians of the educational program available. Along with this announcement is a description of the objectives and a proposal which physicians can complete and return if they are interested. A joint selection committee composed of faculty from UWSM and practicing physicians then reviews the proposals and recommends sites to the Dean.

Since 1971, additional units in family medicine have been established in Oak Harbor and Anacortes, Washington and in Whitefish/Kalispell, Montana. In each of the units, two students are now spending six weeks under the supervision of physicians who have been given "clinical" (part-time) appointments in the Department of Family Medicine. Each unit is visited by "home-based" medical school faculty at least once every six weeks. In addition, the community faculty members come to Seattle two to four times a year for orientation, education and planning, and are paid for their educational efforts under a contract with the University of Washington.

In addition to the family medicine units, a unit for obstetrics and gynecology has been established in the Treasure Valley of Idaho and involves the cities of Boise, Caldwell and Nampa. Three additional units in pediatrics are operating in Great Falls, Montana; Pocatello, Idaho and Spokane, Washington. Most recently, units have been established in psychiatry (Anchorage, Alaska) and in internal medicine (Wenatchee, Washington and Missoula and Billings, Montana). The thirteen units will accommodate over 240 students and residents per year. This is equivalent to space tor 26 full-time students and 13 full-time residents.

SUMMARY REPORT OF WAMI

The WAMI Program was initiated in 1971 to address five programmatic goals:

(1) Increase the number of students admitted from the WAMI states.

(2) Increase the number of primary care physicians being trained.

(3) Bring the resources of the medical center to communities in the WAMI territory.

(4) Accomplish the programmatic goals without the requirement of new "bricks and mortar" or capital building programs.

(5) Place physicians in the areas of need or in other words, redress the geographic maldistribution that now exists in the WAMI territory.

The Program consists of two phases, the University and Community Phases. The University Phase was initiated in 1971 at the University of Alaska and subsequently, was expanded to encompass Washington State University, Montana State University and the University of Idaho. In the five years since the WAMI Program has been in operation, a total of 196 students have gone through the University Phase (Table I). An evaluation of the performance of students who participated in the University Phase as compared to their colleagues who began in Seattle, has been on the three main bases over the course material taken at WAMI Universities:

(1) Common exams.

(2) Performance on the National Boards.

(3) Performance on courses taken concurrently once the students have returned to Seattle.

In all three comparisons, we have been unable to detect differences in the performance of the two groups. We concluded from that, therefore, that the students are not educationally disadvantaged because of their experience in the University Phase.

Having completed the University Phase, students return to Seattle where they take a second three quarters of the Human Biology courses, or the basic curriculum. In the latter part of that three quarters they are asked to select Pathways for their clinical, or elective, phase of their undergraduate medical education. As indicated in Table II, 54% of the participants in the WAMI undertaking are choosing Family Medicine vs. 38% of their colleagues who spent their first year in Seattle.

Once the students reach the clinical phase of their training, they have the option to elect participation in the Community Clinical Units of WAMI. At the present time, 13 such Units operate in the states of Washington, Alaska, Montana and Idaho: They are:

Family medicine: Anacortes, Washington; Oak Harbor, Washington; Grandview, Washington; Omak, Washington; Whitefish-Kalispell, Montana.

Internal medicine: Billings, Montana; Missoula, Montana; Wenatchee, Washington.

Pediatrics: Spokane, Washington; Great Falls, Montana; Pocatello, Idaho.

Obstetrics and gynecology: Boise, Idaho.

Psychiatry: Anchorage, Alaska.

Results to date

Goal 1: If the number of residents from the WAMI states that were admitted to the School of Medicine in the five years before the WAMI Program is compared with the number admitted since the advent of the Program, it is clear that all four states profited by the presence of this Program in terms of the number of students admitted. This may be seen on Table III. It can be noted that there has been a 43% increase in Washington residents, a 900% increase in Alaska, a 500% increase in Montana and a 422% increase in Idaho in terms of the number of residents admitted before and after the advent of the WAMI Program. For the states of Alaska, Montana and Idaho, the percentage will grow even larger as increments of 10 (Alaska), 20 (Montana) and 20 (Idaho) students are admitted in the next three years. We conclude that the first goal of the Program has been met.

Goal 2: The WAMI Program has trained an increased number of primary care physicians as evidenced by the number of students selecting the Family Medicine Pathway at the end of their second year (Table II). Since in excess of 95% of these students retain this Pathway expression at the time they select an internship and/or residency program(s), it is attractive to believe that the great majority of them will continue in this "pathway" when they practice.

Goal 3: As indicated in Tables IV and V, over 1400 health professionals received formal education from 28 University of Washington faculty visits to the Community Clinical Units during the 1974–75 academic year. In addition, 1,000 individuals attended the Circuit Course which contacted 17 communities in the WAMI territory. Thus, the Program is bringing the resources of the medical center to the communities in the WAMI states.

Goal 4: No new "bricks and mortar" have been required for the WAMI Program to date. This has been possible by using existing facilities at universities and communities in the WAMI states. As such, this goal has been achieved.

Goal 5: As may be seen on Table VI, a great majority of the products of the Community Phase of WAMI (residents who rotated through the Units as a part of their residence training), a very sizeable percentage, albeit a very small number, have set up their practice in rural locations. In part, this has reflected the presence of the National Health Service Corps that has facilitated such placement. These data, while not convincing, are encouraging.

In summary, then, the Program appears to be meeting at least four of the five goals it set for itself and the preliminary data strongly suggest the possibility that some impact is being made on the fifth, or geographic maldistribution of physicians goal.

TABLE I.—WAMI STUDENTS AT PERIPHERAL UNIVERSITIES

	1971–72	1972–73	1973–74	1974–75	1975–76	Total
University of Alaska	9	11	10	12	15	57

THE STATE OF THE STATE

Mr. ANDERSON. Mr. President, the 70th session of the Minnesota Legislature convened in St. Paul, Minn. on January 4. The next day Gov. Rudy Perpich, my distinguished successor, delivered the traditional state of the State of Minnesota address to a joint session of the legislature.

Governor Perpich is one of Minnesota's most gifted public servants. He has held

elective public office for nearly 20 years as a member of the Hibbing Board of Education, as a member of the Minnesota Senate, as Lieutenant Governor, and now as our State's thirty-fourth chief executive.

Governor Perpich is the son of a proud and remarkable immigrant Croation iron miner. He is the State's first Governor from the Minnesota Iron Range and the first Roman Catholic Governor.

The philosophy of government which guides our imaginative and forceful new Governor was most eloquently and succinctly articulated in Governor Perpich's January 5 state of the State address and I commend his remarks to the Senate and ask unanimous consent that his remarks be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

STATE OF THE STATE ADDRESS BY GOVERNOR RUDY PERPICH

Mr. Chief Justice and Members of the Court, Mr. President, Mr. Speaker, Members of the 70th Minnesota Legislature; fellow constitutional officers, distinguished guests, good friends, and fellow citizens:

This is the beginning of my eighth full day as Governor of Minnesota. It's my first opportunity to appear before you.

Some of you have been my friends and colleagues in this state government for as long as fourteen years.

You have shared the burden—and the satisfaction—of making this the most progressive and successful state in the Union.

To those of you who are also here for the first time, as new members of this outstanding Legislative body, I say "Welcome."

To the veteran Legislators in this Assembly, and to your leaders, I say "Well done."

This is the hardest working, most productive Legislature in the nation.

As one with a deep interest in Minnesota history, I can tell you today that we never had a Governor who accomplished more than Wendell Anderson;

And we never had a Legislature that made as big a mark on the life of Minnesota people as you have made in the past four years.

It is now our challenge to continue that remarkable record.

I am not here today to lay out a detailed Legislative program or budget. We will be back in this Chamber in twenty days to begin that task.

Today I simply want to tell you how I feel about Minnesota, our government, and our people.

This nation has just ended its Bicentennial year. But it is not a conclusion. It is a beginning.

It is time to look ahead, in this first year of America's third century, to what the future holds for the people of our state.

I know our people, and I'm optimistic.

As Minnesota Chairman of the Bicentennial, I traveled to more Minnesota communities and met more Minnesota citizens than any other elected official in our 119-year state history.

They have taught me the meaning of the Minnesota spirit.

The people of this state are an inexhaustible resource of faith and optimism, pride and high expectations.

They try hard. They work hard. They look forward to better lives for themselves and their children, and better lives for those who haven't been so fortunate.

Our people are committed to education and to opportunity. They believe you can succeed if you work at it.

They know Minnesota is not perfect. But they think we do better than just about anybody else. They are proud of the Minnesota effort to build and maintain a high quality of life.

They support the Minnesota partnership for progress—with personal effort and the hard cash of their tax dollars. They think it's worth it.

But they expect our leaders to live up to their promises—and live up to their ability.

We can do that. And now is the time to begin.

Minnesota is just emerging from a damaging national recession. Our economy has done better than the nation's. Our unemployment is far below the national average. Our state budget is balanced, and our state credit is good.

But too many Minnesota workers still do not have jobs. And a savage, unrelenting drought has struck a tragic blow to farm families, their communities, and our vital farm economy.

Raging forest fires have severely damaged our important timber, resort, and outdoor recreational industries.

The most important thing we have to do this year is put people back to work—provide jobs where we can, use the help of the federal government where we can, give real help to those who really need it.

We can *do* that:

First, through an even stronger state housing effort, to create productive jobs for construction workers and help people find decent places to live.

Second, through the Governor's Task Force on drought aid we established last week, to bring state and federal resources to bear on the immediate problems of our farmers.

Third, through using special resources to provide temporary work for farm families and others in need of help.

Today I am announcing a special $2 million work program for hard-pressed farm families in our worst drought areas.

We will use federal funds from the 1976 Public Works Employment Act.

We will offer public service jobs for up to 15 weeks at prevailing wages.

The Governor's Manpower Office and the State Department of Agriculture will put this program into operation next week.

These are not state government jobs. They will not affect our state budget. But they are a responsible and productive way to make use of federal help.

These temporary jobs will help our farm area families who are suffering the most. They will help farmers through the winter to spring planting time. And that is what we must do.

Fourth, we can, and must, do much more to develop good economic information and sound economic planning in Minnesota. In the long run, that is how we can insure permanent jobs and stable economic growth.

We can do better. I will ask the Minnesota State Planning Agency to see that we do.

The main emphasis of my message today is jobs. But we can also do better in health.

This state is blessed with many of the best health care resources in the nation.

We have excellent professional training. We work hard to improve the environment in which our people live. We have superior health facilities.

But we are missing some great opportunities.

Health care costs are too high.

We don't put enough emphasis on illness prevention, or physical fitness, or active recreation.

And we have done too little to help the nation make progress against serious and crippling diseases.

I want to take steps, through our state departments, the University, and the Mayo Clinic, to use our opportunities. That will take your help.

One of the recommendations I will make to you is to support a new research effort in basic health and health care delivery.

Minnesota can and should be a model of excellence in health research. We can make it one, if we invest state funds carefully in the fine resources we now have.

In the process, we can alleviate pain and suffering and heartbreak that too many of our people experience when a loved one is struck down by one of the crippling diseases.

We have made many important state commitments in the past six years. This year we need to dedicate a portion of our human and financial resources to finding some of the answers to better health for more people.

Every dollar of our investment will bring five or six or seven additional dollars of federal, private, and foundation funds. I believe we can keep such a commitment, and I hope that you will help me do it.

Minnesota's environmental quality and energy crisis also demand our serious attention.

The Dakota Indians named the state Minnesota—"Minne" for water and "Sota" for white.

The Indians understood the environment, lived in it, and loved it.

Perhaps the most tragic story of all in our decades of environmental exploitation is the story of how we destroyed the land, the independence, and the way of life of American Indians who preceded us by centuries on this land.

This administration will give special emphasis to improving state services for Indians. My recommendations will be included in the budget message.

Jobs are a major concern for all of us—what we can do to get people back to work.

But there is no need to abuse the environment to protect jobs. In fact, Minnesota history shows that the destruction of our natural resources means the destruction of industries that put people to work.

Our first major industry in what we now call Minnesota was furs—there were more than 150 fur outposts in Minnesota.

In that era, our leaders thought there was no end ever to the fur-bearing animals. They would continue to multiply no matter how many pelts were taken.

Wars were fought over the fur industry. This area was colonized because of its fur-bearing animals.

There was no thought of tomorrow, and so those animals were destroyed. They are just starting to come back.

Less than a century ago, miles and miles of white pine stretched all the way from southeastern Minnesota to the Canadian border. Thousands were employed as mill hands or lumberjacks in a great timber industry.

Our leaders in the 1880's were convinced there was no end to the white pine industry in Minnesota.

Most of those early lumberjacks were farmers. They harvested crops in the fall, trees in the winter.

Farmers planted crops. But nobody planted trees. Government could have demanded that one section be replanted as soon as cutting started on another. If that had been the law, we might still have a white pine industry in Minnesota, and majestic white pine trees today.

Bu no one made them do it. And 67 million board feet of lumber left Minnesota. So did a major industry, and the jobs that went with it.

Commercial fishing is the same story. That industry in Minnesota, for all practical purposes, is gone—because nobody thought ahead.

When the fish are gone, the jobs are gone.

When the trees are gone, the jobs are gone.

When the fur-bearing animals are gone, the jobs are gone.

Minnesota's natural iron ore took 1.5 bil-

lion years to form. In one person's lifetime—75 years—we mined all the natural ore in Minnesota.

Nothing was done to preserve the environment in Northern Minnesota. Nothing was done about mine reclamation.

Minnesota's natural ore mines employed many more people than we have working now in the taconite industry. When the ore was gone, the jobs were gone. If we had just demanded mine reclamation, there would be more jobs in Minnesota—jobs that restore our environment.

Today we are witnessing the destruction of another magnificent natural resource—Lake Superior. In 20 years, we have polluted Lake Superior. It will take 500 or 1,000 years before the asbestiform fibers settle out of the water.

But we still have not found a way to stop Reserve Mining Company from dumping into that Lake, and preserve the jobs of 3,000 Minnesota human beings at the same time.

We must do that, and we will, together, in this Legislative session.

Lately we have started to do better.

But we've been lucky. We've had a second chance to turn environmental exploitation into environmental protection.

Minnesota developed a way to use low-grade ore, and revitalized our mining industry.

Minnesota is looking carefully at how we can use our vast copper-nickel reserves and our vast peat reserves—without destroying the environment. We are assessing the environmental, social, and economic effects of developing these great resources. I'm proud of those efforts, and I will continue to support them.

We are also facing the terrible effects of drought on our water resources. They must be preserved and perpetuated.

The first step is to find out what we really have. We must finish the public water inventory of surface waters now underway. And we must start as soon as possible to make a comprehensive inventory of our underground water.

The record has improved in recent years.

Our air is better. Our natural beauty is better protected. Our water is cleaner. We have a better forest management, better outdoor recreation.

But most important, our attitude is better. We are trying harder to keep what we have left.

We must also try much harder to preserve what we have left of our national energy resources.

That means we must stop wasting energy. Except for peat, Minnesota has no natural energy resources at all.

Energy conservation must become a major state goal. Not because it's the proper thing to do, but because it's the only sane thing to do. Our quality of life depends on it.

We have some of the nation's pioneer energy conservation measures.

But they are not enough.

This year I will ask the Legislature to approve the farthest-reaching and most comprehensive energy conservation program ever considered by any state.

It won't be an easy program to pass. It will affect a great many people.

It will require some difficult changes for all of us. But there is no alternative—except disaster.

My proposals will include another state government energy conservation program to cut our own energy use by another ten percent. It will require consideration of alternative energy in any new state buildings.

Conservation can do more than save energy. It can give us the time to develop alternative energy sources.

We must support plans to bring Alaska's oil and natural gas into Minnesota. We must also support the proposed coal use plan of Minnesota's Environmental Quality Council.

And I pledge today that I will do everything I can to continue the Anderson Administration's effort to bring the new National Solar Energy Institute to Minnesota.

We have an opportunity to become a model state in energy conservation and research. I can't imagine a more important goal.

But whatever we do to conserve energy, we are still going to need more of the electrical power it provides.

Because of your good work, we now have state laws that regulate the siting of power plants or power lines in this state. But some of our citizens think they are unfair.

You already have Governor Anderson's recommendations before you.

And I want to announce today that Speaker Sabo and Majority Leader Coleman have agreed to hold joint hearings on power line siting within the next two weeks.

They will be held in the area affected by the UPA–CPA line. Lieutenant Governor Olson will represent me at those hearings, and he will give the power line conflict priority attention.

So will I. We will need more electric power in Minnesota. We must be sure that we get it the right way.

Our energy and environmental needs require a new commitment of government, industry, and the people of Minnesota to form a partnership for the future.

In the long run, our high quality of life depends on our ability to keep a healthy environment, healthy people, and a healthy economy.

To do that, we must also have a healthy relationship with the federal government in Washington.

That's why I have assigned Lieutenant Governor Olson to improve state-federal cooperation and coordination.

Vice President Mondale comes from this state. We have two strong Senators, and real Minnesota leadership in the U.S. House of Representatives.

They can help us, and I know they will.

Not only to bring more federal dollars to Minnesota.

But also to help cities and counties and school districts keep doing a good job for our people.

We can speak for all of Minnesota government, state and local. And that is what I am asking Alec Olson to do.

The State of Minnesota does a good job for its people.

We have identified and assisted those with special needs.

We have developed many programs and improved many others. We have invested heavily in opportunity for our people.

We have tried to make state and local government work well, and give our people more equal services through fair taxes and fair funding.

We have also improved our management of state funds and state budgets.

We have been able to do our work and serve our people without increasing any major state taxes during the past two Legislative sessions.

And we will not increase them in this session either.

We will have enough revenue to keep our state budget balanced for the next two years. That makes us more fortunate than many other states.

But there will be no extra money.

The resources provided by our taxpayers are precious. They come from people who work hard for a living.

We already ask more from them than most states do. They expect us to be prudent with their money.

It is time for us to enter a new era in Minnesota state government.

The time is coming when Governors and Legislators will no longer be judged on the number of their new proposals or their success in passing them.

Instead the test will be our wisdom and skill in making present laws work for our people.

There will continue to be a need for some new laws, and for refinement of the laws we have.

But our highest priorities should be management, responsiveness, cooperation instead of competition—the best possible service at the lowest possible cost.

We must pay as much attention to the quality of our stewardship as we do to the nobility of our purpose.

That is what our people want, and that is what they deserve from us.

For my part, I do not intend to make promises that we cannot fulfill.

We already have excellent state government leadership. The condition of the Executive Branch is far better than it was when I became Lieutenant Governor—thanks to Governor Anderson, the Leap Program, and this Legislature.

Our financial stability has earned this state government a triple A credit rating, the highest there is.

Because of administrative and organizational reforms, we have better tools than we have ever had.

Now, together, it is time to use these tools.

We do *not* need more state employees.

We *do* need to get full value for every dollar we spend.

All of us meet today to celebrate the Minnesota spirit—that people are the strength and purpose of government.

As I see it, I have three tasks before me:

To run the Executive Branch honestly, efficiently, openly, and compassionately;

To cooperate with you, the Legislature, in making sound policy and carrying it out well.

Above all, to listen to, and talk with, the people.

As I try to do that, my goal will be government that works hard for people and not for self-preservation.

My goal will be government that responds more imaginatively to the needs—and the rights—of the people of Minnesota.

The number of women and minority citizens in positions of responsibility is insignificant compared with their contributions to society. I pledge to bring more minorities and women into major policy positions in state government.

I will also work for more participation and involvement of the people who give us their resources and our strength.

Many people have volunteered to help. And I have no doubt that they can help.

They have much to show us. And we have much to show the nation by making good use of them.

I am determined to do that.

I am also determined to give individual Minnesota citizens the information and help they need from our state agencies.

This state has pioneered open meetings. But real openness means being willing and prepared to answer the questions of citizens with great respect and greater speed.

It also means listening to complaints and suggestions, taking recommendations seriously.

The openness of government people to the public is the key to responsive, compassionate, and truly effective government.

I approach my new tasks with great enthusiasm for what has been accomplished, and great excitement for what still remains to be done.

I promise today to work untiringly with you to fulfill our Minnesota spirit.

I've worked in this building for a long time. Most of you know me well, and the rest soon will. My office and my staff will help you in any way we can.

But I also need your help. I ask for it, and I welcome it. We can all succeed if we work together.

We have been blessed by the land in this state. Our resources have given us productive farms and forests, mines and other industries.

But our state has not been made great just because of those resources. It is our people who have made those resources productive—farmers and forest managers, miners and factory workers, good business people, good Legislators, good public officials.

The real resource of this successful society is our people—and the Minnesota spirit they have produced.

Have a good session.

Thank you very much.

SOLAR ENERGY

Mr. DOMENICI. Mr. President, virtually everyone agrees that we must make increased use of the limitless potential of solar energy in meeting the future energy needs of this country. However, a vast gulf exists between the rapidly developing research and development programs carried out in our scientific laboratories and the day-to-day energy demands of our society. We must bridge this gulf if the solar energy technology now on hand or soon to be developed is to have any significant influence in reducing our dependence on present sources of energy. The problems of widespread deployment of new energy technologies are complex, and participation of private industry at an early stage is essential.

In this regard I would like to call the attention of my colleagues to an article in last Friday's Washington Post describing a proposal by the Public Service Co. of New Mexico for adding a solar booster to a conventional gas or oil fired powerplant. The solar addon would permit generation of electricity for use directly in the commercial power grid under peak load conditions. This would result in an immediate savings of the additional fossil fuel usually consumed for this purpose. I believe this represents an excellent example of the sort of government-industry partnership essential for rapid commercialization of solar technology.

Mr. President, in order that all Senators will have an opportunity to see this article, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SOLAR ENERGY: DOING IT WITH MIRRORS

(By Hal Willard)

A New Mexico electric utility company has developed a "booster" system for existing power plants that would use acres of mirrors in a field to reflect the sun's heat to a boiler full of water atop a 1,000-foot tower.

The water would turn to steam and run generating turbines.

By adding such a solar energy system to a power plant fueled by natural gas or oil, consumer costs and fuel usage would be reduced whenever the sun shined.

A proposal to build a demonstration project was submitted to the Energy Research and Development Administration on Wednesday by Public Service Co. of New Mexico and was received "positively," according to George Kaplan of ERDA's solar division.

"We were aware they were working on it and encouraged them," Kaplan said. "We feel very positive about this not only because we feel it will work, but it is being done at the initiative of a utility company and they are willing to spend some of their own money."

ERDA itself has been pushing a project to build an experimental electricity generating plant powered entirely by solar energy and yesterday picked a site at Barstow, Calif., for the station—which will be operated by a team of utility companies.

That plant also would work on the "power tower" principle, Kaplan said.

He said the sole physical proof the system will work was a small experiment made successfully in France last summer under ERDA auspices, but there was "no reason to doubt" its practicality.

The New Mexico plan envisions a maximum cost of $30 million to add the solar system to existing plants, which cost hundreds of millions of dollars to build—in the case of a one-unit nuclear plant, $1 billion.

J. D. Maddox, spokesman for the New Mexico firm and principal developer of the proposal, said the biggest obstacle to success is the cost of solar components, primarily heliostats—mirror devices that would reflect the sun's rays to the power tower.

Approximately 5,000 of them would be needed for a demonstration project, Maddox said, and with the plant itself they would cover at least 170 acres of land.

While not every existing power plant has a minimum of 170 acres surrounding it, Maddox said his firm had identified about 600 plants in the Southwest alone that could be adapted to what he calls the "solar hybrid repowering system."

Maddox said the "booster" concept is designed primarily for plants fueled by natural gas and oil because those fuels cost the most and are in short supply.

"There is a point at which using the solar hybrid idea becomes economical," Maddox said. "If coal was in short supply, and we ran out of uranium, the idea would become economical for coal-fueled plants and nuclear plants as well."

The power tower concept is necessary, the New Mexico firm explained, because the heat must be concentrated to raise the temperature of the water to about 1,000 degrees Fahrenheit as required by steam cycle power plant generators.

The usual solar energy method of collecting heat from the sun and transmitting it to water and then to a storage tank dilutes the sun's energy and produces temperatures of 200 degrees or less, the firm said.

The height of the tower is governed by the number of heliostats, and therefore the amount of power, needed: the higher the tower the more heliostats it can handle.

Maddox said the project his firm intends to develop with ERDA assistance would use three towers 430 feet high instead of a single 1,000-footer, considered the maximum height.

A small test facility to experiment with the power tower concept is being built at Sandria Laboratories in Albuquerque, but the facility will not generate electricity.

The New Mexico firm's proposal calls for an appropriation by ERDA of $800,000 for a year's planning, involving economic and feasibility studies, Maddox said. After that, it would take about 2½ years to build the demonstration facility and test it. It would be about 20 times the size of the model being built by Sandria, Maddox said.

Public Service Co. of New Mexico is one of a handful of electric utility companies with full scale programs for development of solar energy.

The firm's president, J. D. Geist, said five homes were being built to demonstrate various types of solar heating and allow the company "to make specific recommendations to customers based on cost, performance, and expected backup energy requirements."

RECESS UNTIL 2 P.M.

Mr. ROBERT C. BYRD. Mr. President, I move that the Senate stand in recess until the hour of 2 p.m. today.

The motion was agreed to, and at 1:39 p.m., the Senate recessed until 2 p.m.; whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. HART).

ORDER FOR RECESS UNTIL 3 P.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 3 p.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECESS FROM TUESDAY UNTIL 8 P.M. WEDNESDAY, JANUARY 12, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that when the Senate completes its business tomorrow it stand in recess until the hour of 8 p.m. on Wednesday, January 12, 1977.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER DESIGNATING A PERIOD FOR ROUTINE MORNING BUSINESS TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that tomorrow after the two leaders or their designees have been recognized under the standing order there be a period for the transaction of routine morning business of not to exceed 1 hour with statements limited therein to 15 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, it is understood that no controversial matter will be taken up on tomorrow but that the session will be purely for the making of speeches, the introduction of bills and resolutions, and so on.

ORDER DESIGNATING PERIOD FOR ROUTINE MORNING BUSINESS ON WEDNESDAY, JANUARY 12, 1977, AND ORDER FOR ADJOURNMENT UNTIL FRIDAY, JANUARY 14, 1977

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on Wednesday, after the two leaders or their designees have been recognized under the

standing order, there be a brief period for the transaction of routine morning business with statements limited therein to 2 minutes each, such period not to extend beyond the hour of 8:30 p.m. at which time there be a quorum call and that when the President has completed his state of the Union message on that evening the Senate stand in adjournment until the hour of 12 o'clock noon on Friday, January 14, 1977.

The PRESIDING OFFICER. Without objection, it is so ordered.

PROGRAM FOR WEDNESDAY

Mr. ROBERT C. BYRD. Mr. President, on Wednesday evening the Senate will convene at 8 p.m. and after the two leaders or their designess are recognized under the standing order there will be a brief period for the transaction of routine morning business permitting Senators to make statements and introduce bills and resolutions, such statements not to extend beyond 2 minutes each, but at no later than the hour of 8:30 p.m. a quorum call will be had and the Members of the Senate will join in a body at approximately 8:40 p.m., and that time may be changed, but circa 8:40 p.m. to march in a body to the hall of the House of Representatives to hear the State of the Union address by the President of the United States, Mr. Ford. Following that address the Senate then will stand in adjournment until the hour of 12 noon on Friday.

RETIREMENT OF SENATOR CARL T. CURTIS

Mr. BAKER. Mr. President, it has been brought to my attention today that one of our most distinguished and long-serving colleagues, Senator CARL CURTIS of Nebraska, has announced that he will not be a candidate for reelection to the office of U.S. Senator from that State.

I am sure I express the sentiments of all Republicans and indeed I believe all Members of the Senate when I say that we will sorely miss CARL CURTIS, who served not only for a great length of time in the Congress of the United States but with great distinction in both bodies.

I have known CARL CURTIS since before I came to the Senate and grown to admire him for his competence, skill, and diligence. I believe few of us can ever claim to the distinction of representing our States with the fidelity and efficiency that CARL CURTIS has.

Mr. President, there are many things I could say about our good friend and our distinguished colleague, and I am sure others will wish to say them as the next 2 years proceed and before he leaves us at the expiration of this term.

I am sure all of us will express in our own way our reluctance to see him go and our regret that he is ending a distinguished career at this time.

Mr. President, for the moment, then, I will content myself by asking unanimous consent, which I now do, to print in the RECORD a compendium of the long and distinguished service of CARL CURTIS which may appear appropriately in the RECORD for today.

There being no objection, the compendium was ordered to be printed in the RECORD, as follows:

AN ALL-TIME RECORD IN PUBLIC SERVICE WILL BE ESTABLISHED

At the completion of Carl T. Curtis' present term of office, he will have served 40 years in the Congress of the United States. No other Nebraskan has served that long in Congress or in a statewide elective office.

A tabulation of the election results in the races for the U.S. House of Representatives and the U.S. Senate in which Carl T. Curtis has been involved is as follows:

1938 Election results for the Fourth Congressional District

(Republican primary of August 9)

Howard W. Churchill of Fairfield	5,513
E. E. Jackman of Grant	9,709
Carl T. Curtis of Minden	11,144

(General Election of November 8)

Charles G. Binderup of Minden	42,957
Carl T. Curtis of Minden	59,794

1940 Election results for the Fourth Congressional District

(Republican Primary of April 9)

Howard W. Churchill of Fairfield	4,260
Fred G. Johnson of Hastings	6,070
Carl T. Curtis of Minden	3,846

(General Election of November 8)

Charles G. Binderup of Minden	19,807
R. O. Canady of Hastings (formerly of Minden)	29,311
Carl T. Curtis of Minden	66,966

1942 Election results for the First Congressional District

(Republican Primary of August 11)

William Edward Johnson of Lincoln	1,677
Lloyd E. Chapman of Lincoln	3,343
Oren S. Copeland of Lincoln	10,835
Carl T. Curtis of Minden	18,803

(General Election of November 3)

Claude C. Earley of Lincoln	3,534
Ralph G. Brooks of Wymore	31,422
Carl T. Curtis of Minden	69,651

1944 Election results for the First Congressional District

(Republican Primary of April 11)

Carl T. Curtis	22,515

(General Election of November 7)

Charles A. Chappell of Minden	43,401
Carl T. Curtis of Minden	100,816

1946 Election results for the First Congressional District

(Republican Primary of June 11)

William Morphew of Lincoln	4,395
Carl T. Curtis of Minden	36,109

(General Election of November 5)

William H. Meier of Minden	37,280
Carl T. Curtis of Minden	73,602

1942 Election results for the First Congressional District

(Republican Primary of August 11)

William Edward Johnson of Lincoln	1,677
Lloyd E. Chapman of Lincoln	3,343
Oren S. Copeland of Lincoln	10,835
Carl T. Curtis of Minden	18,803

(General Election of November 3)

Claude C. Earley of Lincoln	3,534
Ralph G. Brooks of Wymore	31,422
Carl T. Curtis of Minden	69,651

1944 Election results for the First Congressional District

(Republican Primary of April 11)

Carl T. Curtis	22,515

(General Election of November 7)

Charles A. Chappell of Minden	43,401
Carl T. Curtis of Minden	100,816

1946 Election results for the First Congressional District

(Republican Primary of June 11)

William Morphew of Lincoln	4,395
Carl T. Curtis of Minden	36,109

(General Election of November 5)

William H. Meier of Minden	37,280
Carl T. Curtis of Minden	73,602

1954 Election results for U.S. Senator

(Republican Primary of August 10)

Walter A. Neilsen of Omaha	2,592
James L. Harrison of Omaha	2,782
David Martin of Kearney	18,283
Terry Carpenter of Scottsbluff	30,767
Robert B. Crosby of North Platte	43,580
Carl T. Curtis of Minden	64,410

(General Election of November 2)

Keith Neville of North Platte	162,990
Carl T. Curtis of Minden	255,695

1960 Election results for U.S. Senator

(Republican Primary of May 10)

Carl T. Curtis of Minden	125,741

(General Election of November 8)

Robert B. Conrad of Genoa	254,837
Carl T. Curtis of Minden	352,748

1966 Election results for U.S. Senator

(Republican Primary of May 10)

Carl T. Curtis of Minden	161,331

(General Election of November 8)

Frank B. Morrison of McCook	187,950
Carl T. Curtis of Minden	296,116

1972 Election Results for U.S. Senator

(Republican Primary of May 9)

Otis Glebe of Lincoln	8,143
Christine Millard Kneifl of Omaha	10,941
Ronald L. Blauvelt of Thedford	30,138
Carl T. Curtis of Minden	141,213

(General Election of November 7)

Terry Carpenter of Scottsbluff	265,922
Carl T. Curtis of Minden	301,841

In four of Carl Curtis' eight elections to the House of Representatives, he was opposed in the general election by Democrat candidates who originated in the City of Minden and by one petition candidate who was also a Mindenite. Curtis' predecessor in the House of Representatives was Charles G. Binderup of Minden, who served for four years. Minden has been represented by one of its citizens in the House of Representatives or in the Senate since the election of 1934.

At the end of the present 95th Congress, 10,739 individuals will have served in the House of Representatives and/or the Senate since the convening of the first Congress at the founding of the Republic in 1789. At the end of his present term, Senator Curtis' record for length of service will be twenty-second from the top. In other words, only twenty-one of 10,739 individuals will have served in the Congress longer than Senator Curtis.

PROMISES ARE KEPT

Senator Curtis always has campaigned as a conservative. As he was seeking office, he pledged to the voters of Nebraska his efforts against deficit spending, against the expansion of government, against the welfare state and against the excesses of the union bosses. Senator Curtis' record in Washington completely conforms to the commitment he has made to the voters of Nebraska. This consistency of promises and performance has earned for him the respect of all including those who disagree with him.

An overall view of a member's voting record can best be had by looking at the ratings given to him both by conservative organizations and by liberal organizations. The two leading conservative rating organizations are the Americans for Constitutional Action (ACA) and the American Conservative Union (ACU). The two principal liberal organiza-

tions which issue voting records are the Americans for Democratic Action (ADA) and the AFL–CIO Committee on Political Education (COPE).

The cumulative ratings of Senator Curtis throughout the years that these organizations have been rating members of Congress tell the story.

The Conservative score for Senator Curtis is: ACA, 96 percent; ACU, 95 percent.

The Liberal score for Senator Curtis is: ADA, 2.3 percent; COPE, 5 percent.

In January of 1976, *Human Events* magazine reported that Senator Curtis over the years voted against the excesses of union bosses more times than any other member of Congress, according to COPE's own ratings.

A PLACE OF LEADERSHIP

With the Democrats in control of the Congress, no Republicans serve as chairmen of Senate committees. Members of the minority party cannot hold a position above that of ranking minority member of a committee. During his time in the Senate, Senator Curtis has served as the ranking Republican member of four full committees:

The Committee on Rules and Administration

The Committee on Aeronautical and Space Sciences

The Committee on Agriculture and Forestry

The Committee on Finance

As a member of the Committee on Finance he has earned a reputation for expertise in the field of taxes and in the field of Social Security.

At the beginning of the 94th Congress, Senator Curtis was elected by his Republican colleagues to the post of Chairman of the Republican Conference. In addition to his duties as the party's presiding officer, the Chairman appoints the Republican Committee on Policy, the Senatorial Campaign Committee, and the Committee on Committees.

Because of Senator Curtis' seniority and the respect which he commands, he was designated by the President of the United States to represent the President at Presidential inaugurations in Nicaragua and Argentina. In the fall of 1976 he headed a Presidential mission to the People's Republic of China, having been appointed by President Ford.

PAY-AS-YOU-GO CONSTITUTIONAL AMENDMENT

Most American homes are feeling the continued upward spiraling cost of living most seriously. This inflation is linked directly to the huge spending of the Federal government with the resulting annual deficits and mounting national debt. A constitutional restraint against spending that would compel pay-as-you-go operation of the Federal government is desperately needed. For more than a quarter of a century Senator Curtis has sponsored such a contitutional amendment.

It is a difficult battle, but Senator Curtis has advanced it farther than any other individual in America. The Curtis proposal has more than twenty Democrats and Republicans as cosponsors. In the committee hearings in the 94th Congress, a formidable record was assembled.

A nationwide organization has been formed. It is called the Americans for a Balanced Budget and has more than 40 members representing every state. It was organized by Senator Curtis, a Republican, and State Senator James C. Clark of Maryland, a Democrat. State Senator Clark has served five terms in the Maryland Senate, where he is Chairman of the Finance Committee.

In a speech on the Senate floor in 1975, Senator Curtis said that "it is totally immoral and dishonest to vote for more welfare state programs than (the Congress) is willing to collect the taxes to pay for. Our only salvation lies in the adoption of an amendment to the Federal constitution that will compel the Federal government to go on a pay-as-you-go basis. If the government in Washington must collect the taxes and end the borrowing, the Congress and the executive will trim down and eliminate many government programs."

Among those who have testified in favor of the Curtis proposed constitutional amendment are some of the most eminent authorities in the country including economists Roger A. Freeman of the Hoover Institute at Stanford University, C. Lowell Harris of Columbia University and James M. Buchanan of Virginia Polytechnic Institute and State University at Blacksburg, Virginia.

An all-out drive will be made in the 95th Congress to advance this pay-as-you-go constitutional amendment and secure its adoption.

FEDERAL ESTATE TAX RELIEF

The 1976 Tax Reform Act did not carry any relief from the Federal Estate Tax when it passed the House of Representatives. Senator Curtis, as the ranking minority member of the Senate Finance Committee, was able to get the Committee to adopt his proposal for Federal Estate Tax relief as an amendment to the House-passed bill. The Senate passed the Curtis Amendment and the Conference between the House and Senate approved the relief. When the bill becomes fully effective, the present $60,000 exemption will be raised to the equivalent of $175,000. The marital deduction, which at the present time is one-half of the estate, was increased to $250,000 or one-half the estate, whichever is the greater. There is also a provision which requires that consideration be given to what a property will earn in determining its value as contrasted to having to accept a valuation based solely on inflated selling prices. This Curtis accomplishment will prevent the forced sale to pay estate taxes of many small businesses and farms.

INDIVIDUAL RETIREMENT ACT

Over the years, an individual who was not covered by a company pension had a great disadvantage in saving money for his own retirement. He had to pay income tax on all of his earnings. If he were able to save something from his earnings, the income on these savings likewise was taxed.

On the other hand, company pensions received very favorable tax treatment. Money placed in the pension fund was tax-free. The earnings of the pension fund were likewise free from tax.

The Curtis Individual Retirement Act which was passed in 1974 gives individuals who do not have the advantage of a company pension the same tax break. The Curtis Act makes a tax benefit for saving for retirement available to farmers, professional men, businessmen, and other self-employed persons and employers as well as employees who are not covered by a company pension plan. In fact, it benefits one-half of the population of the country who were otherwise treated unfairly before it was enacted. This is perhaps the greatest single item of tax reform in the history of the Federal Income Tax Law.

The following example illustrates what was accomplished by the Curtis Individual Retirement Act:

Take the case of an individual who does not have the benefit of a company pension plan. Assume that he earns $50 for saving and that he is in the 19 percent tax bracket. His $50 earned would be reduced to $40.50 because of the income tax. Assume that his savings earn 5 percent interest and that the interest earned is likewise taxed. If such an individual earned $50 per month for saving and kept it up from age 35 for 30 years or until he was 65, he would accumulate $27,498. This would pay him a lifetime annuity at age 65 in an estimated amount of $221 a month.

Now if the same individual earns $50 to be saved and has the benefit of the Curtis Individual Retirement Act, the $50 is not taxable and so the full amount goes into his retirement fund. The earnings from his $50-a-month saving likewise are tax-free. This person with the generous tax treatment would, over the same 30-year period, accumulate $39,864, or enough to pay him a lifetime annuity at age 65 in an estimated amount of $319 a month.

The Curtis act makes it possible for individuals to save for their own retirement in spite of the high taxes.

A POSITIVE RECORD FOR SOUND SOCIAL SECURITY

Senator Carl T. Curtis made the first all-out effort to extend Social Security to all the people, including those who were already aged, and he introduced the first bill in the Congress of the United States to extend Social Security to self-employed persons and to state and municipal employees. These efforts are best described by quoting from a speech given by the Senator in 1972:

"When I became a Member of Congress, only a portion of our people were covered by Social Security. These were those who fell in the category of employees. There was no Social Security for the corner grocer who ran an unincorporated store, the farmer, the man who ran a shoe repair shop, the school teacher, the state, city and county employees and officials, the college instructor, the janitor at the schoolhouse, the people who were already old and many other categories. Yet at that same time, a corporation director was covered by Social Security because the Social Security Administration held that his director's fees were wages and, therefore, he was an employee. With all humility I can say that I have had a significant part as a former member of the House and Ways Committee and now as a member of the Senate Committee on Finance in extending Social Security to these forgotten Americans. There isn't a college professor, school teacher, farmer or municipal employee in the State of Nebraska whose Social Security coverage was not brought about in part by my efforts."

As a Congressman, he began an intensive and continuing study of our Social Security system. The Social Security Act was passed in 1935 before he became a Member of Congress. Fifteen years after the enactment of Social Security we had 12.4 million individuals in the United States 65 years of age or over. Only 1.3 million were drawing Social Security. Another 900,000 were eligible but were not drawing benefits. This meant that 10.2 million individuals 65 and over were totally outside of the Social Security program. With all wage earners and employers paying the Social Security tax but with only a small portion of the aged receiving a benefit, an unrealistic, distorted and unwise financing system developed.

For years the maximum annual Social Security tax on an employee was only $30. Mr. Curtis was a lone voice in Washington pointing out that there was trouble ahead and that the Social Security taxes would become unbearably heavy in a few short years. That time has arrived. At the present time there are employees in Nebraska who pay as much as $965.25 per year in Social Security taxes and self-employed Nebraskans who pay as much as $1,303.50 per year in Social Security taxes.

In the early years of Social Security there were great numbers of individuals who retired and received the maximum Social Security benefit and who had paid less than $100 in Social Security taxes in their entire lifetime. For years after the payment of So-

cial Security benefits started the greater share of the individuals retiring had paid in only enough money, including their employer's share, to provide their benefits for a few months. Yet at that time a man 65 years of age had a life expectancy of 12 years and a woman's life expectancy was 14 years.

A staff and committee of the U.S. Chamber of Commerce had likewise studied Social Security financing. The U.S. Chamber of Commerce proposed that all the aged be made eligible for a minimum Social Security benefit. Mr. Curtis who was then a Congressman introduced the proposal recommended by the U.S. Chamber of Commerce.

If it had been enacted, it would have rendered justice to all of our aged and it would have forced the Social Security program into a sound financing system. It would have ended the distortion of taxing the many and paying benefits to only a few. It would have saved the general Federal budget billions of dollars each year which had been paid out in old age assistance.

The work of the U.S. Chamber of Commerce on Social Security was in 1953 and 1954, when Mr. Curtis served as Chairman of a subcommittee of the House Committee on Ways and Means which studied the system. The U.S. Chamber of Commerce plan which had been introduced by Mr. Curtis to extend Social Security to the then aged was not enacted, but the Social Security Act of 1954 did carry out many of the Curtis recommendations. The Amendments of 1954 extended Social Security to more than 10 million additional citizens. They liberalized the work clause and raised the benefits. They included a Curtis amendment which extended benefits to approximately 100,000 widows and aged parents and 100,000 children who were denied benefits by an inequity in the program.

The cost of the Medicare program is paid for by the Social Security tax. This is one of the factors which has made the Social Security tax very high. Under the Medicare program, the hospital and medical bills are paid by the Social Security taxpayers for all beneficiaries including the very wealthy who have high incomes and unlimited property. When the Medicare program was adopted, Senator Curtis offered an amendment which would have geared the Medicare benefits to an individual's income. It would have lessened the cost of Medicare greatly and would have affected only those persons of considerable property and income. It would not have affected the Medicare benefits to 80 percent of our citizens over 65 years of age. The Curtis amendment lost on the Senate floor by a vote of 51 to 41.

Senator Curtis has voted for innumerable bills that have increased Social Security benefits. He has opposed some of those bills when he was convinced they were unsound or inadequately financed. In 1972 the Committee on Ways and Means of the House voted to raise Social Security benefits by 5 percent and provided the necessary revenues for the increase. Later the Senate voted to raise the Social Security benefits by 20 percent but made no provision for the extra revenue needed for the increase from 5 to 20 percent. Although the election of 1972 was at hand, Senator Curtis voted against the 20 percent increase in benefits because, in his opinion, it would jeopardize the Social Security Fund and was unfair to all citizens who look to the Social Security program for future benefits. The reserve in the Social Security Fund had dropped so low that the money there would pay benefits for less than a year.

It is not always easy to take a stand for sound financing of Social Security. It is not always popular. It provides an opportunity for an irresponsible demagogue to charge falsely that a conscientious legislator is against Social Security.

LABORED WITHOUT FANFARE OR COMPENSATION OF ANY KIND

On January 7, 1975, American Beef Packers, Inc., of Omaha and its wholly-owned subsidiary, Beefland International, Inc., of Council Bluffs filed for bankruptcy in Federal Court at Omaha. The livestock industry throughout a 13-state area including Nebraska went into shock. Cattle feeders faced losses of approximately $22 million when checks paid to them for livestock they had sold to American Beef Packers, Inc., bounced. Many family farmers faced financial ruin unless recovery could be made through a reorganization of the company under the supervision of the Federal court and a renewed line of credit that would enable the company to pay its bills.

Affected farmers and feeders organized a creditors' committee but the picture remained dark for any recovery from assets of American Beef Packers, Inc., as the company proceeded to bankruptcy. Consultations were held with Senator Curtis and his advice was sought. The Senator went directly to top officials of the General Electric Credit Corporation, the largest creditor. He pointed out the great losses faced by individual feeders and farmers and by the economy of Nebraska. He made an appeal to General Electric Credit Corporation suggesting that good corporate citizenship would require the firm to put some more money into the packing company to keep it opearting so that farmers could get their money or at least part of it. General Electric Credit Corportion had the option of doing nothing, thereby merely allowing the bankruptcy proceeding to go ahead. Through its president, the General Electric Credit Corporation responded to Senator Curtis' request. There were several meetings and countless telephone calls extending over several months. At one point, it appeared that all efforts for a settlement whereby General Electric Credit Corporation would advance some more money to be used for payment on the claims of the farmers and feeders were about to fail. The discouraged creditors' committee again consulted with Senator Curtis. He asked that officials of General Electric Credit Corporation meet with him. The meeting was held in the Senator's Washington office. The officials of General Electric Credit Corporation, although they had a legal "out" and could not have been compelled to do anything, resumed negotiations and participated in a settlement to the end that the farmers and feeders received a payment under an arrangement whereby it is hoped most of them will recover all of their losses from the earnings of the reorganized company.

By the end of 1975, the final plan had been worked out and approved by all parties. Farmer-feeders with claims up to $5,000 against American Beef Packers, Inc., were given the option of immediate settlement at the rate of 80 cents on the dollar or of extended settlement on the same basis as those having losses in excess of $5,000. Those having losses in excess of $5,000 were given an initial payment of 55 cents on the dollar, with provision for collecting the remaining 45 cents as cash is generated plus interest up to seven percent if sufficient revenues are attained.

On February 12, 1976, the National Livestock Feeders Association, meeting at Omaha, presented a certificate to Senator Curtis "in recognition of our appreciation for valuable services." The certificate stated that "without the able and dedicated assistance of Senator Curtis, a Plan of Arrangements to pay Creditors would not have been successfully consummated following the American Beef Packers, Inc., bankruptcy."

In presenting the award at a luncheon session, Herb Albers, Jr., of Wisner, a director of the Association and Chairman of the Official Creditors' Committee, said of Senator Curtis: "He is one who labored without fanfare or compensation of any kind. . . ."

Mr. Albers further described the Senator's role: "It is doubtful the country, or the creditors of American Beef Packers, Inc., themselves, for that matter, will ever fully realize the delicate balance which existed between complete failure and possible success at any number of points in time during the proceedings. Sending the firm crashing down the road toward straight bankruptcy—under which livestock creditors would have recovered little, if any, of their losses—was a very real threat at recurring times during the negotiations.

"I am sure all of you can appreciate the fact that the parties directly involved in such an exhausting and crucial exercise can very easily reach an impasse. This did occur at various times among the parties directly involved in the American Beef Packers, Inc., proceedings.

"You are also aware that a third party can often be very effective in getting the parties back together, and in so doing, 'get the show back on the road', so to speak.

"At said times, Senator Curtis graciously performed an effective, timely, and essential mediation role. The degree of his success was evidenced by the willingness of the president of General Electric Credit Corporation to discuss the matters at issue with him and, in fact, to openly accept his services in this regard and to use his office for this purpose.

"Senator Curtis, I want to add my personal thanks to you for helping turn the American Beef Packers, Inc., disaster into something less damaging to livestock creditors, and on behalf of the creditors and the National Livestock Feeders Association, I present to you this certificate of recognition and appreciation."

PACKER BONDING

As a result of the American Beef Packers, Inc., financial collapse, Senator Curtis cosponsored with Senator Dick Clark of Iowa a bill in the Senate to require bonding of meat packers under the Packers and Stockyards Act. Congressman Charles Thone of Nebraska led the effort in the House.

The new law requires bonding of packing firms that handle more than $500,000 in livestock purchases annually. Packer assets are held in trust until all payments are made to the farmers and feeders.

This law will protect the producers from losses in the event of future failures of packing plants.

IRRIGATION, FLOOD CONTROL AND SOIL AND WATER CONSERVATION

Senator Curtis was first elected to Congress from the old Fourth Congressional District in the wake of the devastating flood of 1935 in the Republican River Valley at which time 110 Nebraskans lost their lives. He sought and obtained a place on the House Committee on Flood Control. Senator Curtis, who was then a Congressman, introduced resolutions for the investigations and studies of the Republican Valley. He was the author of the resolution requiring a report from the Army Corps of Engineers that resulted in the Missouri River Basin Plan, also known as the Pick-Sloan plan. This was the first major Army Corps of Engineers-Bureau of Reclamation basin-wide project ever authorized.

The Pick-Sloan plan for the Missouri River Basin and its tributaries including the Republican River was authorized by the Flood Control Act of 1944. Senator Curtis sponsored the legislation relating to the Missouri River Basin and served on the conference committee. In addition to the mainstream structures on the Missouri River and the development of the tributaries, the act adopted provided for use of the electrical power revenues from upper basin mainstream generation to subsidize irrigation projects on

the tributaries. This has made possible the financing of all Bureau of Reclamation projects in Nebraska which have been constructed since the 1944 act.

Since his earliest days in Congress, Senator Curtis has been actively involved in Federal legislation and programs that would provide flood protection, irrigation, recreation, hydroelectric power, fish and wildlife, and general conservation of resources—all to the benefit of Nebraskans and Nebraska.

Elmwood Dam

One of Senator Curtis' most recent accomplishments in the field of irrigation was the approval of a plan and a Bureau of Reclamation loan of about $10 million for construction of the Elwood Dam. This is an addition to the Central Nebraska Public Power and Irrigation District project which was a PWA project of the 1930's. The Elwood Dam is now under construction. It will provide full water service to 33,642 acres now receiving partial water and will add 9,158 acres of new irrigation. The Elwood Dam was made a reality because of Senator Curtis' 1974 appeal to President Richard Nixon for the project. President Nixon's approval constituted the go-ahead for the Bureau of Reclamation and the Office of Management and Budget.

Two major new developments for Nebraska which Senator Curtis sponsored and helped to get funded are the O'Neill and North Loup irrigation projects. Funds for actual construction of these projects were provided in fiscal 1976, and they were the only Bureau of Reclamation projects on which construction was begun in the entire United States in 1976.

O'Neill unit

An important meeting was held early in 1972 which resulted in getting the O'Neill project moving. The plans had been in the Bureau of Reclamation a long time but had not been transmitted to Congress. The case made by Senator Curtis and the group from O'Neill before the Reclamation officials and Budget officials resulted in the transmittal of the project to the Congress. Congressman Dave Martin introduced the House bill and Senator Curtis the Senate bill authorizing this project. The project was authorized in 1972.

In fiscal year 1976, the first funds for actual construction were appropriated in the amount of $1,102,000. Fiscal 1977 appropriations included $1,519,000 for construction. When completed, the O'Neill unit will provide water for 77,000 acres of farmland in north-central Nebraska.

North Loup project

Senator Curtis and others made a presentation to officials of the Office of Management and Budget and other agencies in behalf of the North Loup project. Nebraskans who were in Washington for this meeting pointed out that the presentation made was responsible for the transmission of the Bureau of Reclamation's North Loup project plans to the Congress. Again Congressman Dave Martin ably handled the matter in the House of Representatives, while Senator Curtis sponsored the project in the Senate. The North Loup project was authorized for construction in 1972. In fiscal 1976, the first year of construction funding, North Loup received $603,000. Fiscal 1977 appropriations included $1,199,000 for construction. When built the North Loup project will supply water to 52,570 acres of farmland in central Nebraska.

Ainsworth project

In 1956 Senator Curtis was instrumental in securing the passage of Public Law 84–531 which approved for construction the Ainsworth irrigation project. Major construction was completed in 1966. Located in north-central Nebraska, the Ainsworth project provides irrigation for nearly 34,000 acres of cropland.

Farwell project

Senator Curtis introduced the legislation in the Senate that authorized construction of the Farwell irrigation project in 1956. The project provides surface irrigation for 52,530 acres of farmland. The major construction on the project was completed by 1964 and included the Sherman Reservoir, the Arcadia Diversion Dam on the Middle Loup River, and the main canals and laterals to deliver water to the many farms.

Mid-State project

This was a project planned for the main stem of the Platte River, encompassing land in Buffalo, Hall and Merrick Counties. The project would have added to the surface irrigation and supplemented existing irrigation. On November 14, 1967, the Public Law was signed which authorized the Mid-State project. Senator Curtis introduced the Senate bill which brought about this authorization. He participated in countless committee hearings, departmental discussions and other meetings in connection with the project. The project is not to be built, however, because of local controversy and environmental opposition.

Republican Valley development

Senator Curtis has been the chief legislative sponsor of all the legislation that has brought flood protection and provided for irrigation on the Republican River and its tributaries. Today the Republican Valley has almost total protection from floods. The program consists of the Frenchman-Cambridge and Bostwick Irrigation projects and includes Harlan County Dam and Reservoir, the Trenton Dam and Reservoir, the Enders Dam and Reservoir, the Cambridge Dam and Harry Strunk Lake, the Red Willow Dam and Reservoir, and the Bonny Dam and Reservoir.

Since construction of the Republican River projects, thousands of acres of farmland have received irrigation water each year while fishing, boating, hunting and other recreational benefits have increased. Although very few recreational benefits were attributed to the costs of construction of the Republican River projects, recreation has become a major benefit. Harlan County Reservoir has had nearly one million visitors annually for the past few years. The recreational benefits have become so important that Senator Curtis has asked the Corps of Engineers for an extensive study to upgrade recreational facilities, and he is pursuing legislation for a special recreational improvement project. Additional improvements are being sought in the Republican River projects by Senator Curtis including the conversion of 55 miles of open laterals in the Frenchman-Cambridge irrigation district to pipe. The first funds for this project were provided in fiscal 1977 appropriations.

Salt Creek flood control

Sound conservation requires foresight and long-range planning. On June 21, 1944, the Flood Control Committee of the House of Representatives approved a resolution introduced by Congressman Curtis calling for a survey and an investigation by the Army Engineers to bring flood protection to the Salt Creek Basin. The Army Engineers then started their work. Senator Curtis has been a participant in all the legislation and all the efforts that have followed. This program is a reality, having been completed in 1970. The Army Engineers have built ten dams in the Salt Creek Basin. These dams give flood protection to hundreds of acres of farm land and flood protection to several sizeable areas in Lincoln and vicinity. This program also provides opportunities for boating, fishing, and other water sports and recreational activities.

Gering Valley flood control

After a history of severe flooding that caused millions of dollars in damages, studies were undertaken by the Army Corps of Engineers to develop a flood protection plan for the Gering Valley in the Nebraska Panhandle. Senator Curtis introduced bills in the Senate to authorize the project, and in 1958 the Gering Valley Flood Control Project was authorized by Congress in the Omnibus Rivers, Harbors and Flood Control Bill. A unique project, Gering Valley is one of the few major flood control works of its kind that was a joint venture of the Army Engineers and the Agriculture Department's Soil Conservation Service. By the late 1960's the major works of the project were completed and in place, providing flood protection for thousands of acres of farmland and the city of Gering.

Papillion Creek

Papillion Creek, oftentimes referred to as the Papio, has flooded many times in recent years. The problem has become more acute by reason of the intensive development in that watershed. Much of this area, which not too long ago was primarily farmland, is built up with factories and other businesses, houses and apartments, and new roads and streets, all of which accelerate the force of the run-off from rain.

Senator Roman Hruska took the lead in the Senate in developing a project to solve the flooding problem in the Papio Basin. Senator Curtis has supported the efforts of Senator Hruska.

The Papillion Creek project was authorized by the Flood Control Act of 1968. It was signed into law on August 13, 1968, and became Public Law 90–483. It provided for the construction of a series of flood control dams located from northwest to southwest of metropolitan Omaha. It would provide protection for the City of Omaha and neighboring communities of Douglas and Sarpy Counties.

Initial construction funds for the Papio project were provided in fiscal year 1972. Two dams have been completed and a project reviewed by the Corps of Engineers in 1975 resulted in the planned replacement of nine dams with a single larger dam in the upper basin of the Big Papillion Creek. The Corps review also resulted in the elimination of five smaller structures of a total of eight that were planned for the West Branch of the Papio. As a result of the review by the Army Engineers, considerable controversy arose over the project. Senator Curtis has met with officials from the three eastern Nebraska counties involved and has attended meetings and hearings with Federal officials and committees. He continues to work with local and Federal officials to help resolve the dispute so that flood protection can be provided for the area without unnecessary loss of land.

Platte and Elkhorn Rivers and Tributaries

Floods have been frequent on the Platte and Elkhorn Rivers and their tributaries. A flood that caused much property damage occurred on the Elkhorn in 1971 and considerable flooding occurred on the North Platte and Platte Rivers in the early 1970's. Senator Curtis has spent a great deal of time visiting the area, conferring with individuals and attending meetings. He called for a study by the Corps of Engineers of the Elkhorn basin, but no proposal had been submitted which, in the opinion of the local people, would bring about the development they then desired. It became apparent that an over-all plan involving all Federal and State agencies was needed and that studies and investigations would be directed to this end.

Senator Curtis participated with Senator Hruska and Nebraska Congressmen Charles Thone, John McCollister and Dave Martin in securing an appropriation of $350,000 in 1971 for an over-all study of the Platte River Basin, which included the Elkhorn and Tributaries. The comprehensive study of the Platte River Basin was completed in 1976. It is the major Federal-state reference to iden-

tifying and implementing future water resource projects and developments, including flood control, irrigation, recreation, fish and wildlife, and domestic water supplies.

Missouri River Flooding

Although the major works of the Missouri River have been completed, an area in northeast Nebraska was threatened with serious flooding in 1975 because of record upstream river flows. A 55-mile segment of the Missouri River stretching from Gavins Point Dam to South Sioux City was not included in the navigation or agricultural levee programs for the basin. Senator Curtis participated in meetings in Nebraska as well as hearings and meetings in Washington to get a project approved to provide flood protection for this final segment of the Missouri River in Nebraska.

He worked to get appropriations approved in fiscal year 1977, and contracts were awarded in late 1976 for construction of demonstration projects under the Streambank Erosion Control Evaluation and Demonstration Act of 1974. Senator Curtis continues to work for completion of a total system of flood control for Nebraska along the Missouri River.

Local flood protection projects

Among some of the other flood control projects for which Senator Curtis has worked are the Norfolk flood control project on the Elkhorn River which was completed in 1969, the Columbus flood control dike on the Loup River which was completed in 1971, the Fairbury project completed in 1971, and the Broken Bow project completed in 1975. Senator Curtis has worked on numerous other projects which have been completed including those at Bartley, Indianola, Pierce, Schuyler, Waterloo, West Point, Macy, Meadow Grove, Hooper, Madison and Seward. Still many other local flood control projects are under study, and Senator Curtis is committed to working for Federal approval and funding of these projects where local communities do not have the resources or funds to construct necessary protective works.

Small Watershed Act

Senator Curtis was the author of a proposal that helped shape the Small Watershed Act. This is the law that authorizes the Department of Agriculture to jointly build projects with the Natural Resources Districts which are too large for an individual farmer or an individual district to handle alone. It involves ponds, retention dams, water courses, plus the terracing, contouring, and other conservation and erosion control work. It is a partnership arrangement, and the localities share the costs with the individual landowners and the Federal government. Senator Curtis introduced one of the bills in the House. When the bill was passed it bore the name of the Chairmen of the Agriculture Committees and was called the Hope-Aiken bill, referred to as the Public Law 566 Small Watershed Program. The program was initiated by sixty-two pilot projects for the entire nation. Of this number, four were located in Nebraska.

Since the inauguration of this program there have been more than 100 applications for studies of watershed projects in Nebraska. A total of 62 watersheds covering 6,575,385 acres have reached the approval stage for planning or beyond. Nineteen projects covering 465,406 acres have been completed; another 26 covering 2,173,803 acres have been approved for construction; and 29 others covering 3,936,176 acres are in various stages of planning.

FOOD STAMPS AND WELFARE

Since it began in 1964, the Food Stamp program has grown faster than any Federal program in modern history. In the first year the program cost $30 million and had 360,000 beneficiaries. Now there are approximately nineteen million people drawing food stamps—a number more than twice the total number of farmers in the entire country—and in 1976 the program cost almost $6 billion.

In 1976 Senator Curtis led efforts on the floor of the Senate to amend the Food Stamp Act to tighten qualifications and eliminate food stamps for persons who are abusing the program. He pointed out that the food stamp program—conceived as nutritional aid and administered by the Department of Agriculture—was designed to assist the poor of this nation to obtain sufficient food to prevent hunger and malnuorishment and it was not intended as a program of supplemental income for anyone who could use it.

Senator Curtis offered ten amendments to reform the food stamp program. One of his amendments would have prevented food stamps from going to strikers. Another Curtis amendment would have denied food stamps to students. The taxpayers are paying the costs of building and operating universities, and many programs for grants and loans are available to students. Senator Curtis did not believe free food should be provided for all students who decided to take up housekeeping. Similarly, the other eight amendments were directed at specific abuses. A roll call was had on each of the ten amendments. Senator Curtis' amendments were voted down but had they been enacted into law, they would have reduced the food stamp program by more than $2 billion.

Senator Curtis was the principal Senate sponsor in the 94th Congress of the National Welfare Reform Act, which would have saved approximately $1.7 billion to $2.2 billion—again, funds that could be used to meet more adequately the needs of legitimately deserving persons and their families who are truly needy.

MEAT IMPORTS

Almost 70 percent of the income from the sale of agricultural products for the State of Nebraska comes from livestock. Thousands of Nebraskans make their livelihood in the meat-packing industry. Additional thousands are engaged in the transportation, buying and selling of livestock, and in other related activities.

All of agriculture gains when meat imports are limited and all of agriculture loses when meat imports are increased. It is not only the cattle rancher and the cattle feeder who suffer a loss, but grain farmers likewise suffer a loss. It is estimated that it takes about 16 to 17 pounds of grain to place a pound of meat on the table. If that meat is produced outside the country, a significant market for grain is lost.

Within a few years after the ending of World War II, meat imports increased very rapidly and cattle prices tumbled. From 1957 to 1963, beef and veal imports from foreign countries jumped from 2½ percent to nearly 11 percent of United States consumption.

On July 1, 1964, the Senate Committee on Finance approved by a record vote of 12 to 2 the Curtis amendment to the measure then before the committee. The Curtis proposal limited imports and provided for quotas. The bill as amended by Senator Curtis passed the Senate on July 28, 1964.

Because of the opposition of the State Department and Agriculture Secretary Orville Freeman, the House Conferees resisted the Senate bill and the measure agreed upon by the conference was not as strong as the original Curtis language, but it is the law under which the country is operating at the present time, and it is of great benefit to the economy of Nebraska. It is known as Public Law 88-482.

In 1976 a loophole was developed in the meat import law which was very damaging to all agriculture in the United States. Australia had lost a good part of its markets for meat in Europe and Japan, and was desperate to exceed the United States quota. The Meat Import Quota Law applies to fresh, frozen and chilled meats. Processed meats are not covered by the quotas. An operation was set up in Mayaguez, Puerto Rico, in which huge quantities of Australian meat were shipped into the Mayaguez Free Trade Zone. This meat was cut up in small cubes and packaged. It was then brought into the United States as processed meat. The cutting up and packaging of this meat was not processing. It was clearly a loophole.

The Senate Committee on Finance approved a proposal offered by Senator Curtis that closed the Mayaguez loophole—a loophole through which 100 million pounds of meat would have entered the United States from January 1, 1976, to February 1, 1977. The Senate passed the Curtis measure, but the Congress adjourned sine die before the bill was completed in the House of Representatives and in Conference Committee. The Senate having spoken on the matter, the Department of Agriculture by executive action issued a regulation which closed the Mayaguez loophole. It was the efforts of Senator Curtis which brought this about.

CONSERVATION AND HISTORICAL PRESERVATION

On May 21, 1976, the U.S. Senate passed a bill introduced by Senator Curtis to establish the George W. Norris Home National Historic Site at McCook. The House of Representatives had not acted on the bill by the end of the 94th Congress, and the Senator is continuing his efforts to have the Norris Home in McCook established as a historic site in the National Park System. Senator Curtis had an unprecedented 55 cosponsors in the U.S. Senate on his bill.

Senator Norris served in Congress 39 years and 10 months, from March 4, 1903 to January 3, 1943," and was recognized for his leadership and sponsorship of the rural electrification program, the Tennessee Valley Authority and the 20th Amendment to the Constitution.

In 1965 Senator Curtis joined Senator Roman Hruska and Congressman Dave Martin in sponsoring legislation to establish the Agate Fossil Beds National Monument in Western Nebraska. Public Law 89-33 was signed on June 5 that year. It set up the monument to preserve outstanding paleontological sites and geological and archaeological phenomena near Agate Springs Fossil Quarries in Sioux County. In 1976, studies by the National Park Service cleared the way for construction of permanent facilities at the monument. There will replace the present temporary facilities, and will include a visitors' center, display facilities, headquarters, lodging and maintenance facilities.

Senator Curtis introduced the legislation in the Senate in 1971 that led to the establishment of the Samuel R. McKelvie National Forest in Nebraska. Located near Valentine, the McKelvie Forest was named to honor another of Nebraska's outstanding leaders.

Along with other members of the Nebraska Congressional delegation, Senator Curtis has been involved in the efforts pertaining to the Fort Niobrara National Wildlife Refuge, the Northern Plains Fishery Station near Valentine, the Nebraska National Forest, the Fort Niobrara and Crescent Lake National Wildlife Refuges, the Valentine Migratory Waterfowl Refuge, the Oglala National Grasslands, and the national historical sites in Nebraska, including Scotts Bluff National Monument near Scottsbluff and Gering, Homestead National Monument near Beatrice, and Fort McPherson National Cemetery near North Platte.

SOUTH SIOUX CITY BRIDGE

The bridge across the Missouri River at South Sioux City was more than 100 years

old and a new one was desperately needed. The bridge was vital to the local traffic but was necessary and important also to state and interstate traffic. Its replacement under the regular highway program would have been an unjust burden on the state and local interests. In 1966 Senator Curtis conceived of the idea of an extension of Interstate 29, that served western Iowa, so that northeast Nebraska would have access to the Interstate, and at the same time provide a much-needed bridge for the South Sioux City area. Some people ridiculed the Curtis proposal but he went to work on it. He enlisted the aid of Chairman Jennings Randolph of the Senate Public Works Committee and other officials. The 2.4 miles of Inter-State highway and the four-lane bridge at a cost of $39,101,656 were completed and opened to traffic on November 22, 1976. Ninety percent of the costs came from the Federal Highway Trust Fund.

ECONOMIC DEVELOPMENT

Tax-free industrial development bonds have enabled establishment of many industries in Nebraska, resulting in the employment of great numbers of our citizens. During the Johnson Administration, a Treasury ruling brought an end to the use of such bonds for industrial development. It was through the efforts of Senator Curtis in getting a measure through the Congress that the tax-free status of industrial development bonds was established in law. At the present time, there is a $5 million limit per issue. Senator Curtis has continued to press for a substantial raise in the limit.

It was at the request of Senator Curtis that the President of the United States established a Cabinet Committee on Rural Affairs. Later, the Senate Agriculture Committee on which Senator Curtis serves launched a rural development program. Senator Curtis was the ranking minority member on the subcommittee chaired by Senator Humphrey that held extensive hearings in Washington and over the country on rural development. Nebraska was one state chosen for hearings, which were held at McCook. A rural development program was finally enacted into law, and it has assisted many communities materially. It is administered by the Farmers Home Administration.

TRANSPORTATION

While agriculture is the backbone of Nebraska's economy, and small business and manufacturing play an important role, transportation is of equal importance.

It provides the vital link to connect the farms with the markets, the industries with the distributors, and the small businesses with the consumers. Transportation is vital to the entire economy of Nebraska, and Senator Curtis has been involved in development and maintenance of a good transportation network for the state that includes highways, commercial air service, and railroads.

Senator Curtis led in the efforts that resulted in air service for out-state Nebraska. He assisted the out-state cities in organizing and presenting their case before the Civil Aeronautics Board in 1957. He made the principal presentation and argument before the Civil Aeronautics Board. The effort succeeded, resulting in CAB approval in 1958 of scheduled commercial air service for a number of our out-state cities.

At the present time, air service is provided at Columbus, Grand Island, Hastings, Kearney, North Platte, McCook, Scottsbluff, Alliance, Chadron, and Norfolk, as well as Omaha and Lincoln. Senator Curtis has continued with efforts to maintain the service and improve the schedules.

Over a period of years, Nebraska's agricultural economy has been threatened and jeopardized by a lack of railroad grain cars. The situation has improved considerably through the efforts of Senator Curtis, who secured tax changes providing for rapid amortization of the cost of manufacturing more grain cars, who supported legislation that compelled a return to the western railroads of the grain-hauling cars they owned, and who was in constant contact with and appealed to regulatory agencies for assistance.

When the National Railroad Passenger Corporation was established, Senator Curtis worked with Senator Hruska to ensure that at least one Amtrak route would serve and cross Nebraska. Amtrak did locate an east-west route across southern Nebraska, linking Chicago with Denver via Omaha with stops in Lincoln, Holdrege and McCook along the Burlington Northern Railroad line. There has been considerable interest in locating a second Amtrak route across Nebraska and Senator Curtis has supported efforts for such a new route on the Union Pacific line serving Columbus, Grand Island, Kearney, North Platte and Sidney.

COLLEGES AND FOUNDATIONS

Senator Curtis is a champion of the private and church colleges and universities. He believes in their mission. Also, he is aware that the private and church colleges in Nebraska are providing an education to 13,554 students. This means that if the private and church colleges were to disappear, the burden upon the Nebraska taxpayers would be increased greatly. These colleges and universities cannot continue to exist if the tax incentives for giving are decreased or materially diminished. Neither can they exist without the benefit of foundations. In his work on tax-writing committees, Senator Curtis consistently has opposed efforts that would lessen the tax incentives for giving and for philanthropy in general.

In the 1976 Tax Reform Act, Senator Curtis was the author of two amendments relating to foundations which were successful. The foundations were faced with a mandatory pay-out requirement which in many instances would destroy the corpus of their funds. Also, they were faced with an auditing tax of 4 percent when the amount needed for auditing by the government was less than 2 percent. Senator Curtis proposed to limit the mandatory pay-out to 5 percent and to reduce the tax from 4 percent to 2 percent. Both of the Curtis amendments were approved by the Committee on Finance and passed by the Senate. In the conference between the House and the Senate, the pay-out limitation was retained but the reduction in the tax was rejected.

POSTSCRIPT

This summmary of Senator Carl T. Curtis' record could be extended to include many additional items such as his consistent support of farm legislation and rural electrification as well as the very important position that he has held in the fight to preserve private enterprise and to resist destructive and complicated tax proposals. All of this will have to be done at a later time.

PRESIDENTIAL TASK FORCE ON MIA'S AND POW'S

Mr. DOLE. Mr. President, I send a concurrent resolution to the desk and ask unanimous consent that immediate consideration be given to my concurrent resolution.

The PRESIDING OFFICER. The concurrent resolution will be stated by title.

The legislative clerk read as follows:

A concurrent resolution (S. Con. Res. 3) to urge the establishment of a Presidential task force on MIAs and POWs.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the concurrent resolution?

Mr. CRANSTON. Mr. President, I object.

The PRESIDING OFFICER. Objection is heard.

The resolution will go over under the rule.

MISSING AMERICAN SERVICEMEN AND THE PARDON

Mr. DOLE. Mr. President, I am proposing a concurrent resolution to support creation of a Presidential task force on missing American servicemen in Southeast Asia.

Being more than simply a reaffirmation of congressional commitment to the families of our MIA's, this resolution actively promotes a tangible force for seeking out remaining information about those never accounted for. It does not itself, of course, create the task force. The resolution simply calls for Presidential creation of an MIA task force at the same time that any Executive pardon is issued for Vietnam-era draft evaders. The President-elect has indicated on several occasions that he intends to issue such a pardon within a week following his inauguration.

Ironically, the anticipated blanket pardon will occur almost 4 years to the day that the Paris peace accord was formally signed. As we all know, that document did not merely promise release of captive prisoners. It guaranteed that all parties—including North Vietnam—would "help each other to get information about those military personnel and foreign civilians of the parties missing in action, to determine the location and take care of the graves of the dead so as to facilitate the exhumation and repatriation of the remains, and to take any such other measures as may be required to get information about those still considered missing in action." Neither the letter nor the spirit of that pledge was fully met by Hanoi. Indeed, the full-scale invasion of South Vietnam by the North in 1975 ridiculed the entire peace accord.

The North Vietnamese have disseminated available information about our MIA's at sporadic intervals arbitrarily determined by no one but themselves. As recently as last September, the Hanoi regime released additional information about 12 American MIA's which conclusively established their deaths. This most recent leak of available information was juxtaposed with renewed calls by Hanoi for American war reparations and with revived efforts to gain admission to the United Nations. Clearly, the North Vietnamese possess further information about Americans who disappeared within their borders, but demand a price for its release.

WHY SET UP A TASK FORCE?

The last military unit searching for missing Americans in Indochina left the area last June. The House Select Committee on MIA's has recently expired after indicating in its final report that additional information on MIA's is probably available. Thus, this would be a most appropriate time for the President to establish a special task force of his own to continue the efforts already started by earlier military and congressional groups.

Information obtained by those units clearly indicated that additional information about missing servicemen does exist.

The efforts of a Presidential task force could do much to assist the Department of Defense in its reclassification efforts which are expected to resume this year. In the long run, those efforts would also serve to remove existing obstacles to improved relations with Vietnam, including consideration of trade, diplomatic recognition, and U.N. membership.

It is also important, I think, to point out that the concept of a Presidential task force endorsed by this resolution appears to have broad bipartisan acceptability. Both the Democrat and Republican party platforms of 1976 endorsed further accounting efforts. Both President Ford and President-elect Carter, during the recent campaign, called for creation of a special task force or delegation to seek further information about missing servicemen. Indeed, sincere and effective efforts to locate our MIA's must continue to reflect a nonpartisan character.

WHY TIMING WITH THE PARDON IS IMPORTANT

The President-elect has indicated his desire to close the final chapter of the Vietnam war, and to heal the wounds it created. I submit that these worthy objectives cannot be achieved without equal consideration being given to all those affected by the war to our forgotten Americans and their families, as well as to those who forgot America.

Establishment of the task force during January would provide timely continuity with the expiring House select committee, and would give early notice to Hanoi of the new administration's intention to pursue accounting efforts. The issuance of a Presidential pardon alone would symbolize little more than an apology for the American effort in Vietnam. This resolution will put Congress on record as supporting continued efforts to account for MIA's and will add measurable authority to future diplomatic efforts to achieve that accounting.

PERSONAL OPINION ABOUT PARDON

For the record, I want to make it clear that I personally am opposed to issuance of a blanket pardon for all Vietnam-era draft evaders. I would not want this resolution to be interpreted as supporting the pardon. The wording of the resolution neither supports nor opposes issuance of the pardon. It merely takes cognizance of the fact that the President-elect has announced that he intends to exercise his constitutional authority to grant an Executive pardon before the end of January. Since the President is not required by law to obtain congressional approval for such an act, he will presumably proceed on this matter as his own conscience dictates. This resolution simply calls for commensurate executive attention to the MIA matter.

I personally believe the MIA issue deserves early priority action while the pardon issue does not. But those who cosponsor and support this resolution do so for their own considerations which do not necessarily match my own on the pardon issue. I intend to elaborate on my own reasons for opposing the Presidential pardon of draft evaders later this week.

THE TASK FORCE CONCEPT

This resolution simply mandates creation of the task force simultaneously with issuance of the pardon. It does not directly outline the composition and precise duties of the force, which would be points of Presidential discretion.

However, my own concept is of a special commission of civilians—perhaps headed by the Vice President—who are knowledgeable about the MIA issue. Members of the National League of Families should have direct input into the activities of the task force, given their long experience and particular knowledgeability about the subject area. The force should initially review and consolidate all previous reports and findings on missing U.S. servicemen before undertaking their own investigation, to prevent duplication of efforts and to provide a context for their own work.

The task force may want to reanalyze earlier conclusions and recommendations on the MIA issue, but should concentrate on seeking the means to obtain additional existing information about the fates of these missing servicemen. Interviews and perhaps on-site inspections should be conducted. The force should make periodic progress reports to Congress and the President, along with appropriate recommendations for Government policy and negotiations relating to MIA's.

Only with an intensive investigation of this sort—supported by Executive mandate—can we hope to account as fully as possible for the 2,500 Americans still officially classified by the Department of Defense as having "not returned" from Vietnam, Laos, and Cambodia. Only with a final accounting can we truly hope to fully "heal the wounds" of the Vietnam war. I hope my colleagues on both sides of the aisle will give their support to expeditious approval of this resolution, and thereby encourage the new President to establish an MIA task force early in his administration.

Mr. President, I ask unanimous consent that the full text of this resolution be printed at the completion of my remarks.

S. CON. RES. 3

Whereas there are approximately 12,000 convicted or indicted American draft resisters who refused to accept their military responsibility during the Vietnam War era, and who rejected an earlier opportunity to lists approximately 2,500 United States service for this country;

Whereas the Department of Defense still lists approximately 2,500 United States servicemen missing or not returned from Southeast Asia; and

Whereas the governments of Vietnam, Laos, and Cambodia have failed to abide by basic humanitarian principles to provide the fullest possible accounting for all Americans listed in a missing status in their respective territories: Now therefore, be it

Resolved, That it is the sense of the Congress of the United States that there should be established, simultaneously with the issuance of a general amnesty or pardon for United States draft evaders of the Vietnam War era, a Presidential Task Force on Prisoners of War and Missing in Action to propose courses of action to achieve the fullest possible accounting for all Americans listed in a missing status in Southeast Asia, including the return of remains, and to make recommendations concerning Federal policies relating to prisoners of war and missing in action.

QUORUM CALL

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HART). Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Does any Senator seek recognition at this time?

PROGRAM

Mr. ROBERT C. BYRD. Mr. President, the Senate will shortly stand in recess until the hour of 3 o'clock p.m. tomorrow.

After the two leaders or their designees have been recognized under the standing order on tomorrow, there will be a period for the transaction of routine morning business of not to exceed 1 hour, with statements therein limited to 15 minutes each. If additional time is needed on tomorrow for statements, the leadership on this side of the aisle will certainly be agreeable to accommodating such Senators.

Bills and resolutions, of course, and statements may be introduced into the RECORD tomorrow as late as 5 o'clock p.m., by unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Then when the Senate completes its business on tomorrow, and no rollcall votes are expected on tomorrow, the Senate will stand in recess until the hour of 8 o'clock p.m. on Wednesday, thus allowing committees to meet tomorrow morning without interruption and floor action, and allowing committees to meet all during the day on Wednesday without interruption from the floor.

After the two leaders or their designees have been recognized on Wednesday evening, there will be a very brief period for the transaction of routine morning business, with no votes anticipated, for the purpose only of allowing bills and resolutions, petitions and memorials, and statements to be introduced into the RECORD, and then a quorum call will be had, during which Senators will meet to march in a body to the Hall of the House of Representatives to hear a State of the Union Address by the President of the United States, and upon the conclusion of that address the Senate will stand in adjournment until the hour of 12 o'clock noon on Friday.

It is possible that rollcall votes could occur on some matter on Friday, but as for tomorrow and Wednesday, I would anticipate no rollcall votes.

Let me reiterate that the leadership is attempting, as best it can, to have as few floor sessions as possible within the months of January and February, so as to allow the committees of the Senate to meet, to conduct hearings on nominations and on legislation, and to begin to report legislation to the Senate for action.

This does not mean that unforeseen occasions may not arise which would necessitate Senate sessions more often. But it is the desire of the leadership on this side of the aisle to forego having Senate sessions as much as possible during the months of January and February, so as to allow committees to meet, and when Senate sessions are deemed necessary, it will be my intention and desire to convene the Senate, whenever possible, especially during those 2 months, at an hour not earlier than 12 o'clock noon and more nearly to 1 p.m. or even 2 p.m. during the afternoon, conceivably even 3 p.m., so as to give committees all the possible time that they can be given; and I hope all committee members and committee chairmen will take advantage of this opportunity during January and February to hold committee hearings, with the assurance that they will be interrupted as little as possible.

Mr. BAKER. Mr. President, will the Senator yield briefly?

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Mr. President, I find it difficult to express the extent of my agreement and appreciation for what the majority leader has said about the nature and type of Senate schedule for the next 2 months. I think all of us have understood the necessity for earlier sessions of the Senate and for long sessions of the Senate, but I think there is good logic, and this is a good beginning, in having as few legislative sessions of the Senate as possible in these first 2 months.

I hope that our colleagues will understand that doing this intensifies the necessity and desirability for them being in attendance on the floor when we are in session. I think one of the best things we can do to improve the deliberations of the Senate is to regularize our schedule so there is time for committee work and time for floor work, and that we devote ourselves to them, respectively, and not try to do it, unless necessary, simultaneously.

So I commend the majority leader for this schedule for the first 2 months. I pledge to him our support in that respect, and I hope it will serve as a good example for ordering our time thereafter.

Mr. ROBERT C. BYRD. I thank the distinguished Republican leader, and I am glad he emphasized the desire of the joint leadership to have as many Senators as possible on the floor when sessions are being conducted. I join him in urging all of us to take advantage of opportunities when the Senate is not in session, including Saturdays, to conduct hearings, so that we can get legislation, and especially nominations, to the floor at the earliest possible moment, because the more work that is done now and the more expeditious we are in handling our business now, there will be pay dirt at the end of the session, hopefully, down the road along about the 1st of October.

Mr. BAKER. Hopefully pay dirt in terms of home dirt.

Mr. ROBERT C. BYRD. Yes.

Mr. BAKER. Going home.

Mr. ROBERT C. BYRD. Yes.

RECESS UNTIL 3 P.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until the hour of 3 o'clock tomorrow afternoon.

The motion was agreed to; and, at the hour of 2:18 p.m., the Senate recessed until tomorrow, January 11, 1977, at 3 p.m.

NOMINATIONS

Executive nominations received by the Senate January 10, 1977;

SUPERIOR COURT OF THE DISTRICT OF COLUMBIA

Edwin C. Brown, Jr., of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of 15 years, vice George W. Draper II, deceased.

Robert McCance Scott, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of 15 years, vice Richard R. Atkinson, retired.

Robert Alan Shuker, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of 15 years, vice Harry T. Alexander, retired.

Annice McBryde Wagner, of the District of Columbia, to be an Associate Judge of the Superior Court of the District of Columbia for the term of 15 years, vice Theodore R. Newman, Jr., elevated.

CORPORATION FOR PUBLIC BROADCASTING

The following-named persons to be members of the board of directors of the Corporation for Public Broadcasting for terms expiring March 26, 1982:

Charles H. Crutchfield, of North Carolina, vice Robert S. Benjamin, term expired.

Leslie N. Shaw, of California, vice Virginia Bauer Duncan, term expired.

Paul M. Stevens, of Texas, vice Jack Wrather, term expired.

IN THE DIPLOMATIC AND FOREIGN SERVICE

The following-named Foreign Service officers for promotion in the Foreign Service to the classes indicated:

Foreign Service officers of class 1:
David Anderson, of New York.
George R. Andrews, of Tennessee.
Diego C. Asencio, of New Jersey.
Helene A. Batjer, of Nevada.
Harry E. Bergold, Jr. of Florida.
Roger C. Brewin, of Ohio.
Carroll Brown, of Alabama.
Frederick Z. Brown, of Pennsylvania.
Harry A. Cahill, of Virginia.
Eugene E. Champagne, Jr., of Pennsylvania.
George T. Churchill, of Virginia.
Robert S. Dillon, of Virginia.
L. Milner Dunn, of California.
Hunter L. Estep, of Texas.
Alan W. Ford, of California.
David L. Gamon, of Florida.
Paul F. Gardner, of Texas.
John L. Gawf, of Colorado.
Alan A. Gise, of California.
Raymond E. González, of California.
John V. Hedberg, of Maryland.
Harold E. Horan, of Texas.
Ernest B. Johnston, Jr., of Alabama.
David Adolph Korn, of Maryland.
Dennis H. Kux, of New York.
Earl H. Lubensky, of California.
Alan W. Lukens, of Pennsylvania.
Francis J. McNeil III, of Florida.
Hawthorne Q. Mills, of California.
Robert C. Mudd, of Virginia.
Charles Willis Naas, of Maryland.
Harvey F. Nelson, Jr., of California.
Daniel A. O'Donohue, of Maryland.
Lawrence Pezzullo, of New York.
Anthony C. E. Quainton, of Washington.
Francis X. Ready, of New Hampshire.
Robert G. Rich, Jr., of Florida.
Stephen H. Rogers, of Virginia.
Edward M. Rowell, of California.
Robert J. Ryan, Jr., of Massachusetts.
John D. Scanlan, of Hawaii.
Peter Sebastian, of Florida.
David E. Simcox, of Kentucky.
Christopher A. Squire, of the District of Columbia.
Roger W. Sullivan, of Massachusetts.
Joseph Terranova, Jr., of Arizona.
Charles R. Wilds, of Georgia.
William M. Woessner, of Virginia.
Charles T. York, of Maryland.
Albert L. Zucca, of Florida.

Foreign Service officers of class 2:
Alfonso Arenales, of Texas.
James E. Baker, of California.
William G. Barraclough, of Pennsylvania.
John P. Blane, of Alabama.
Michael P. Boerner, of New Jersey.
John Condayan, of Virginia.
Goodwin Cooke, of New York.
Willard B. Devlin, of Pennsylvania.
Theodore B. Dobbs, of Virginia.
William L. Dutton, Jr., of Iowa.
William J. Dyess, of Alabama.
James M. Ealum, of California.
Joseph O. Eblan, of New Hampshire.
James R. Falzone, of California.
James P. Farber, of Florida.
Harvey J. Feldman, of Illinois.
John R. Ferchak, of Virginia.
Robert L. Flanegin, of Illinois.
Alexander S. C. Fuller, of Connecticut.
Russell C. Heater, of California.
Martin G. Heflin, of Florida.
Ashley C. Hewitt, Jr., of California.
George Borman High, of Illinois.
Alton L. Jenkens, of West Virginia.
Betty-Jane Jones, of Wisconsin.
Lowell C. Kilday, of Wisconsin.
James E. Kiley, of California.
Sheldon Jack Krys, of Maryland.
Herbert Levin, of Vermont.
David E. L'Heureux, of New Hampshire.
Samuel Eldred Lupo, of California.
Stephen R. Lyne, of the District of Columbia.
Richard C. Matheron, of California.
Wade H. B. Matthews, of Texas.
Charles W. McCaskill, of Texas.
Joseph Meresman, of New York.
William F. Miller, of Massachusetts.
John D. Negroponte, of New York.
Leonardo Neher, of Illinois.
Joseph B. Norbury, Jr., of Arkansas.
Joseph E. O'Mahony, of Maryland.
J. Theodore Papendorp, of New Jersey.
Edward L. Peck, of California.
J. William Plez, of Colorado.
Larry G. Piper, of Texas.
Henry Precht, of Georgia.
Lawrence R. Raicht, of New York.
Gerald A. Rosen, of New York.
James D. Rosenthal, of California.
John Hall Rouse, Jr., of Maryland.
Lawrence D. Russell, of Florida.
Frederick H. Sacksteder, Jr., of New York.
George B. Sherry, of the Virgin Islands.
John W. Simms, of Pennsylvania.
R. Peter Spicer, of Ohio.
James Stromayer, of Illinois.
Wayne A. Swedenburg, of Virginia.
James L. Tull, of Iowa.
Marten H. A. van Heuven, of Connecticut.

Richard Noyes Viets, of Texas.
James R. Wachob, of Maryland.
Lannon Walker, of Maryland.
Frank E. Wallace, of Tennessee.
Albert W. Whiting, of Texas.
Albert N. Williams, of Michigan.
Arthur H. Woodruff, of Florida.
Warren Zimmermann, of Virginia.

Foreign Service officers of class 2 and Consular Officer of the United States of America:
Harry R. Melone, Jr., of New York.
Richard B. Owen, of Michigan.
Woodward Romine, of Indiana.

Foreign Service officers of class 3:
Francesco J. Alberti, Jr., of California.
Dexter Anderson, of New Jersey.
Richard C. Barkley, of Michigan.
Frank C. Bennett, Jr., of California.
Jack R. Binns, of Washington.
Robert D. Blackwill, of Nevada.
C. Thomas Bleha, of Michigan.
Merwin Carl Blust, of the District of Columbia.
Gordon S. Brown, of the District of Columbia.
Kenneth L. Brown, of California.
Richard C. Brown, of New Mexico.
Thomas R. Buchanan, of Maryland.
Pierce K. Bullen, of Florida.
James R. Bullington, of Tennessee.
Ann P. Campbell, of Connecticut.
Martha C. Carbone, of Washington.
Thomas J. Carolan, Jr., of Maryland.
David J. Carpenter, of Maryland.
Anne L. Carroll, of Idaho.
Joseph P. Cheevers, of Kansas.
William P. Clappin, of Virginia.
Warren Clark, Jr., of New York.
Harry L. Coburn, of New York.
Richard E. Combs, Jr., of California.
Elinor G. Constable, of New York.
Marion V. Creekmore, Jr., of Tennessee.
Thomas E. Cummings, of California.
Carl C. Cundiff, of Nevada.
Stephen P. Dawkins, of New Jersey.
Richard S. Dawson, Jr., of California.
John J. Degan, Jr., of New York.
Richard N. Dertadian, of California.
Jerrold Mark Dion, of Washington.
Richard J. Dols, of Florida.
Michael L. Durkee, of New York.
Richard A. Dwyer, of Indiana.
Regina Marie Eltz, of Alabama.
Dayid A. Engel, of New Jersey.
Henry A. Engelbrecht, Jr., of Virginia.
David C. Fields, of California.
Ronald D. Flack, of Minnesota.
Ludlow Flower III, of the District of Columbia.
Martin C. Forrester, of Maryland.
Anthony G. Freeman, of New Jersey.
Charles W. Freeman, Jr., of Rhode Island.
Jay P. Freres, of Illinois.
Roger R. Gamble, of New Mexico.
Coradino E. Gatti, of Connecticut.
Paul John Glasoe, of Ohio.
Michael H. Goldman, of Maryland.
Augustine J. Gorman, of Massachusetts.
Richard C. Graham, of Virginia.
John O. Grimes, of Virginia.
William H. Gussman, of New York.
Donald Keith Guthrie, of New Mexico.
Donald F. Hart, of Maryland.
Douglas James Harwood, of Connecticut.
James D. Hataway, Jr., of Georgia.
Donald D. Haught, of California.
John H. Hawes, of New Jersey.
Charles Higginson, of Massachusetts.
John L. Hirsch, of New York.
Harry D. Hobbs, of Florida.
Marvin J. Hoffenberg, of Maryland.
Wallace F. Holbrook, of Massachusetts.
David C. Holton, of Virginia.
Richard B. Howard, of Florida.
Frances Dodd Howell, of North Carolina.
Michael P. E. Hoyt, of Indiana.
James F. Hughes III, of New York.
George Merwin Humphrey, of New Jersey.
Arnold M. Isaacs, of Illinois.
Harriet W. Isom, of Virginia.
Grafton Harry Jenkins, of the District of Columbia.
Peter B. Johnson, of California.
Andrew R. Kay, Jr., of Virginia.
John E. Kelley, of Hawaii.
Carolyn E. Kingsley, of Nebraska.
Francis M. Kinnelly, of Maine.
Harmon E. Kirby, of Ohio.
Charles J. Konya, of Maryland.
Kenneth A. Kurze, of Rhode Island.
James S. Landberg, of Washington.
Vladimir Lehovich, of New York.
Melvyn Levitsky, of Maryland.
Hallock R. Lucius, of New York.
Hugh Cooke MacDougall, of New York.
Edward M. Malloy, of New York.
Gerald Eugene Manderscheid, of California.
John J. Maresca, of Connecticut.
James A. Mattson, of Minnesota.
Howard M. McElroy, of New York.
George A. McFarland, Jr., of Texas.
Donald F. Meyers, of Wisconsin.
Thomas F. Milliren, of Pennsylvania.
Harlan G. Moen, of the District of Columbia.
Gerald Joseph Monroe, of New Mexico.
Robert B. Morley, of New Jersey.
Byron B. Morton, Jr., of New Jersey.
Lillian Peters Mullin, of Illinois.
George Clay Nettles, of Alabama.
Jerrold M. North, of Illinois.
F. Pierce Olson, of Wyoming.
Gerald G. Oplinger, of Pennsylvania.
Allan W. Otto, of Illinois.
Gus P. Peleuses, of Ohio.
Robert H. Pelletreau, Jr., of Connecticut.
Vernon D. Penner, Jr., of New York.
Gary S. Posz, of California.
Arthur L. Price, of Tennessee.
Frederick D. Purdy, of Pennsylvania.
Reynold A. Riemer, of California.
Chandler P. Roland, of California.
Alan D. Romberg, of Maryland.
David Rowe, of Maryland.
Ernest C. Ruehle, of Missouri.
Theodore E. Russell, of Maine.
John J. St. John, of Pennsylvania.
Irving L. Sanders, of Washington.
James Sartorius, of New Jersey.
Teresita C. Schaffer, of New York.
Andrew D. Sens, of the District of Columbia.
Pierre Shostal, of New York.
Lester P. Slezak, of Pennsylvania.
Elaine Diana Smith, of Illinois.
Robert R. Strand, of Ohio.
Gordon L. Streeb, of Minnesota.
Charles T. Sylvester, of Rhode Island.
Daniel Taher, of New Jersey.
Carl Taylor, of Vermont.
Clyde Donald Taylor, of Maine.
Francis Hugh Thomas, of Pennsylvania.
John B. Tipton, of Illinois.
George A. Trail III, of Pennsylvania.
Frederick S. Vaznaugh, of California.
Sandra Louise Vogelgesang, of Ohio.
Howard K. Walker, of Maryland.
James A. Weiner, of California.
Martin A. Wenick, of New Jersey.
Herbert E. Wilgis, Jr., of Maryland.
H. L. Dufour Woolfley, of Louisiana.
William B. Young, of New Hampshire.

Foreign Service officer of class 3 and a Consular Officer of the United States of America:
James Francis Shea, of Maryland.

Foreign Service officers of class 4:
Marc Allen Baas, of Michigan.
F. Brenne Bachmann, of New Jersey.
Ward Davis Barmon, of New York.
Bruce Anthony Beardsley, of Nevada.
Joseph F. Becelia, of New York.
Robert W. Beckham, of Florida.
Alan H. Bergstrom, of North Dakota.
J. Richard Bock, of Washington.
David L. Boerigter, of Michigan.
James F. Brackman, of West Virginia.
Timothy Michael Carney, of Florida.
Hervey Parke Clark, Jr., of California.
Thomas M. Coony, of Connecticut.
James P. Covey, of New York.
Charles L. Daris, of California.
Rust M. Deming, of the District of Columbia.
James P. Dodd, of Kentucky.
Daniel Linus Dolan, of Pennsylvania.
Charles H. Dudley, of Florida.
Morton R. Dworken, Jr., of Ohio.
Wesley W. Egan, Jr., of North Carolina.
Dennis Finnerty, of New Jersey.
Galen W. Fox, of Hawaii.
Leon S. Fuerth, of Florida.
Edward F. Fugit, of New Jersey.
Harold W. Geisel, of Illinois.
Jon M. Gibney, of New York.
Frank Ralph Golino, of Pennsylvania.
G. Gene Griffiths, of Tennessee.
Manuel R. Guerra, of Texas.
J. Guy Gwynne, of Arkansas.
George H. Haines III, of Rhode Island.
Ovsanna Harpootian, of Rhode Island.
Roger G. Harrison, of California.
Dennis G. Harter, of New Jersey.
W. Donn Heaney, of Maryland.
Alan Shaw Hegburg, of Florida.
Thomas C. Hubbard, of Alabama.
J. Alexander Mannings Jackson, of Pennsylvania.
Donald L. Jameson, of California.
Jo Ann M. Jenkins, of Virginia.
Gregory L. Johnson, of Washington.
Mark Johnson, of Montana.
Stephen Tillman Johnson, of California.
Douglas R. Keene, of Massachusetts.
John H. King, of New Jersey.
Douglas S. Kinney, of Florida.
Donald R. Knight, of Iowa.
Donald Kreisberg, of New York.
Gilbert D. Kulick, of California.
Joseph Edward Lake, of Texas.
Douglas Langan, of New Jersey.
David Burton Langhaug, of Michigan.
Robert M. Maxim, of New York.
Rafael L. Marin, of New York.
Richard A. McCoy, of New Jersey.
Robert Bruce McMullen, of Illinois.
Joseph H. Melrose, Jr., of Pennsylvania.
Mary Ann Meysenburg, of Nebraska.
David Norman Miller, of Nebraska.
Murrow B. Morris, of Virginia.
Robert C. Myers, of Virginia.
James P. Nach, of New York.
Sheila-Kaye O'Connell, of Massachusetts.
Robert E. Park, of California.
Wesley H. Parsons, of Arizona.
B. Lynn Pascoe, of New York.
David R. Patterson, of Arkansas.
Charles E. Pedonti, of Massachusetts.
Anthony Carson Perkins, of the District of Columbia.
Lee M. Peters, of Virginia.
Donald J. Planty, of New York.
Mark J. Platt, of Connecticut.
Gene R. Preston, of California.
James J. Reid, of Texas.
Algirdas J. Rimas, of Virginia.
Lionel A. Rosenblatt, of Pennsylvania.
Theodor Rumme, of Massachusetts.
Dorothy M. Sampas, of Maryland.
James T. Schollaert, of Pennsylvania.
William F. Schrage, of Illinois.
Richard T. Scully, of Virginia.
Edric Sherman, of Washington.
Michael M. Sherman, of California.
Samuel Vick Smith, of Washington.
E. Michael Southwick, of California.
Kenneth A. Stammerman, of Kentucky.
David H. Stebbing, of the District of Columbia.
William W. Struck, of Kentucky.
Larry C. Thompson, of Oklahoma.
Ward C. Thompson, of New Hampshire.
William S. Tilney, of California.
Thomas F. Timberman, of Maryland.
Tain Pendleton Tompkins, of California.
Stanislaus R. P. Valerga, of Texas.
Phyllis S. F. Villegoureix-Ritaud, of Massachusetts.
John Way Vincent, of Illinois.
James Donald Walsh, of Pennsylvania.
Frank P. Wardlaw, of Texas.
Louis B. Warren, Jr., of New Jersey.
Daniel F. Waterman, of New York.
Irving A. Williamson, Jr., of Missouri.
Andrew Jan Winter, of New York.
Lacy A. Wright, Jr., of Illinois.

Donald J. Yellman, of Iowa.

Foreign Service officers of class 5:
David Michael Adamson, of New York.
Leslie M. Alexander, of New York.
Norman Alexander, Jr., of Louisiana.
Alan Whittier Barr, of California.
Robyn M. Bishop, of Florida.
James E. Blanford, of Wyoming.
Robert A. Bradtke, of Pennsylvania.
Ralph Lynn Braibanti, of North Carolina.
Kevin C. Brennan, of California.
Donald S. Bryfogle, of Virginia.
Ralph M. Buck, of Florida.
Roger E. Burgess, Jr., of Nevada.
David L. Cardwell, of Pennsylvania.
Frederick R. Cook, of Illinois.
Brian Dean Curran, of the District of Columbia.
Charles Gilman Currier, of New York.
Karl Imants Danga, of New York.
Gary D. DeVight, of Hawaii.
George Anthony Dies III, of New York.
Richard M. Dotson, of Michigan.
Michael J. Duffy, of Massachusetts.
H. Roy Eidem, of Illinois.
Michael F. Gallagher, of Pennsylvania.
Daniel C. Gamber, of Florida.
John Michael Garner, of Texas.
Robert Lindsey Glass, of Massachusetts.
Russell Frost Graham, of Connecticut.
Bruce N. Gray, of California.
Andrew Grossman, of New York.
Eileen M. Heaphy, of Connecticut.
Janet L. M. Henneke, of Texas.
Michael J. Hogan, of Utah.
Thomas L. Holladay, of Arizona.
William J. Hudson, of California.
Rodney L. Huff, of Maryland.
Marie T. Huhtala, of California.
Sandra Nelson Humphrey, of New Jersey.
Ferris Richard Jameson, of Ohio.
Gilbert Matthew Johnson, of Michigan.
Judith R. Kaufmann, of New Mexico.
Patrick Francis Kennedy, of Illinois.
Ronald K. Kirkpatrick, of Wisconsin.
Robert J. Kott, of New York.
William Karl Krauss, of New Jersey.
Albert D. Krehbiel, of Hawaii.
James A. Larocco, of Illinois.
Alan P. Larson, of Iowa.
Frederic William Maerkle III, of California.
Luciano Mangiafico, of Connecticut.
Dana M. Marshall, of New York.
Joseph Neal McBride, of Massachusetts.
Paul M. McGonagle, of Virginia.
John P. McGuinness, of Ohio.
Douglas B. McNeal, of New York.
Michael W. Michalak, of Ohio.
Robert A. Millspaugh, of New York.
John Scott Monier, of Illinois.
Russell E. Morrow, of Texas.
Paul T. Murphy, of Connecticut.
Mark Robert Parris, of Virginia.
David Pfotenhauer, of Iowa.
John A. Polansky, Jr., of Texas.
David C. Pugh, of Florida.
John R. Ratigan, of Virginia.
Thomas Lee Robinson, of Michigan.
John F. Scott, of Iowa.
Jeffrey R. Siegel, of New Jersey.
Karl H. Sprick, of California.
Bruce D. Strathearn, of Wisconsin.
Richard J. Tierney, of Massachusetts.
Eric D. Tunis, of California.
Helen Weinland, of the District of Columbia.
Dean L. Welty, of Indiana.
James D. Whitten, of California.
Dan A. Wilson, of Texas.
Walter James Woolwine, of West Virginia.
Gerald A. Wunsch, of Indiana.

Foreign Service officers of class 6:
Jeffrey A. Bader, of Florida.
Robert A. Benzinger, of Arizona.
Thomas V. Biddick, of California.
James D. Bindenagel, of Illinois.
John William Blaney, or Virginia.
Steven Robert Buckler, of Michigan.
Harold Tony Angelea Burgess, of Connecticut.
Shaun M. Byrnes, of Indiana.
John Campbell, of Virginia.
James J. Carragher, of California.
Wendy Chamberlin, of Illinois.
Carolyn S. Christian, of California.
Gary W. Christian, of Missouri.
Laura A. Clerici, of South Carolina.
Oscar Willard Clyatt, Jr., of Florida.
Frederick Bishop Cook, of Florida.
Jerry V. Cook, of Texas.
Caryl M. Courtney, of West Virginia.
Robert B. Courtney, of West Virginia.
Howard Caldwell Davis, of Oklahoma.
John R. Dawson, of Michigan.
Georgia J. DeBell, of California.
Lynwood M. Dent, Jr., of Virginia.
James R. Doyle, of Massachusetts.
Timothy John Dunn, of California.
Peter D. Eicher, of Connecticut.
Stephen E. Eisenbraun, of Florida.
Robert W. Fitts, of New Hampshire.
George Ernest Hamilton, of Texas.
James D. Hansen, of New Mexico.
Stephen Michael Harner, of California.
Timothy P. Hauser, of Illinois.
Kenneth Richard Hedstrom, of California.
Donna Jean Hrinak, of Pennsylvania.
Nancy Hudson, of Texas.
Paul F. Hurley, of Massachusetts.
Charles Kartman, of the District of Columbia.
Charles F. Keil, of Texas.
Susan M. Kling, of New York.
Michael Klosson, of Maryland.
Margaret Teresa Kromhout, of Minnesota.
Joseph A. Limprecht, of California.
Michael W. Marine, of Connecticut.
Dianne E. Markowitz, of Pennsylvania.
Linda M. Mathews, of California.

Bert R. Algood
Frederick D. Allard, Jr.
Douglas J. Allen
Gregory J. Allen
Maxwell Allen
Jerry B. Alverson
Edward A. Anderson
Michael E. Anderson
Nicholas A. Anderson
Phillip D. Anderson
Steven W. Anderson
Gene J. Andreoletti
Thomas L. Andrews III
William R. Arguello
Edward D. Armbruster
Ernest C. Armond, Jr.
Alfred E. Artho
Daniel Q. Aucremanne
Craig K. Austad
Alan J. Avera
Kimball C. Ayers
Helen J. Bach
John T. Bader
Dennis R. Baer
Philip W. Bagwell
Tony M. Bailey
Richard S. Bakalar
Dwight E. Baker
James M. Baker
Terrance L. Baker
John L. Ball
Richard J. Ball, Jr.
Mark W. Balmert
Denise M. Banghart
George Baranchulk
Edward M. Barber
Timothy W. Bardell
John F. Baretich
James E. Barnes
Steven B. Barnes
Robert D. Baron
Steven A. Barton
Wesley A. Barton
John E. Batten IV
Douglas O. Beck
Jeffrey A. Beckman
Michael I. Beckner
Theodore W. Beidler
Gregory R. Bell
Melvin Bell
Robert B. Bell
Willie J. Bell III
Allan J. Bellacicco
George E. Bennett
John S. Bennett
Vincent J. Bennett
William W. Bennett
Charles E. Bentsen
Julia J. Bentzinger
Gustave L. Berg III
Charles R. Bernstein
Russell S. Beyer
Donel S. Bianchi
Timothy F. Biggins
George R. Bilowus
Thomas J. Bily
David W. Birt
David N. Bize III
Gerald K. Blaine
Thomas H. Blake
David H. Blalock
Samuel E. Bland
Fred W. Blower
Mark D. Blue

*Appointment sent out Ad Interim (during the recess of the Senate).

SENATE—*Tuesday, January 11, 1977*

(Legislative day of Monday, January 10, 1977)

The Senate met at 3 p.m., on the expiration of the recess, and was called to order by Hon. WENDELL R. ANDERSON, a Senator from the State of Minnesota.

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Trust in the Lord with all thine heart; and lean not unto thine own understanding.

In all thy ways acknowledge Him, and He shall direct thy paths.—Proverbs 3: 5, 6.

O God, make us to know Thy presence, not only in the moment of prayer, but also in the hours of work. Show us how to worship while we work. Make us aware of Thee in our homes, in our travel, in our social occasions, in our rest, and in our play. May there be no time apart from Thee.

Alert us to the greatness of our opportunity—to make these days the dawn of a new era when vision is expanded, goals are lifted higher, and past failures are redeemed; when in the unity of the spirit and the bonds of peace we concert our best efforts for the common good.

May we find Thy highways through the fields of time and sense. Breathe through the things that are seen, the peace of the unseen and the eternal.

We pray in the Redeemer's name. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND):

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., January 11, 1977.

To the Senate:

Being temporarily absent from the Senate on official duties, I appoint Hon. WENDELL R. ANDERSON, a Senator from the State of Minnesota, to perform the duties of the Chair during my absence.

JAMES O. EASTLAND,
President pro tempore.

Mr. ANDERSON thereupon took the chair as Acting President pro tempore.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Monday, January 10, 1977, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SENATE RESOLUTION 27—ELECTING A DEPUTY PRESIDENT PRO TEMPORE OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a resolution and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated.

The assistant legislative clerk read as follows:

Resolved, That Hubert H. Humphrey of Minnesota be, and he is hereby, elected Deputy President pro tempore of the United States Senate, effective January 5, 1977.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 27) was agreed to.

SENATE RESOLUTION 28—AMENDING PARAGRAPH 2 OF RULE XXV OF THE STANDING RULES OF THE SENATE

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a resolution and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated.

The assistant legislative clerk read as follows:

Resolved, That paragraph 2 of Rule XXV of the Standing Rules of the Senate is amended by striking out of the item relating to Budget, the number "14" and inserting in lieu thereof "16".

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the resolution?

There being no objection, the Senate proceeded to consider the resolution.

Mr. BAKER. Mr. President, before the Chair acts, I might simply say for the benefit of the Senate that the majority leader and I have conferred on this point. This raises the number of designees to the Budget Committee by two and gives three committees two additional members. I intend to make a nomination for two additional vacancies in

other committees. I understand the majority leader will have no objection to that.

I have no objection at this point.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 28) was agreed to.

SENATE RESOLUTION 29—MAKING TEMPORARY MAJORITY APPOINTMENTS TO THE COMMITTEE ON THE BUDGET

Mr. ROBERT C. BYRD. Mr. President, I send to the desk a resolution and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated.

The assistant legislative clerk read as follows:

Resolved, That Senator Anderson of Minnesota (temporary) and Senator Moynihan of New York (temporary) be, and they are hereby, assigned to service on the Committee on the Budget.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the resolution.

The resolution (S. Res. 29) was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I reserve the remainder of my time.

Mr. BAKER. Mr. President, I reserve my time under the standing order.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed 1 hour, with statements therein limited to 15 minutes.

S. 143—MEDICARE- MEDICAID ANTIFRAUD AND ABUSE AMENDMENTS

Mr. TALMADGE. Mr. President, I am introducing today amendments to the medicare and medicaid programs intended to put more teeth into Federal and State efforts designed to detect and punish fraud and abuse in those programs.

Congressional hearings and investigations during the past several years have revealed widespread and deep-rooted fraud in medicare and medicaid.

Those hearings have underlined how pervasive and how costly fraud is.

Fraud cheats virtually all of us.

It cheats the taxpayers of this Nation who see billions of dollars going down the drain.

It cheats the poor and elderly who often receive what can best be characterized as marginal care from the fast buck artists. It cheats our State and local governments, many of which are desperately trying to maintain fiscal stability.

And, it cheats the large majority of health care practitioners and institutions who are doing an honest professional job.

While the large majority of doctors, hospitals, and others are honest, it should be noted that those who practice fraud and abuse receive a disproportionate amount of payments.

I believe that what we need in this country is an administrative and reimbursement system—including effective law enforcement—under which the detection and punishment of fraud and abuse becomes a probability instead of only a possibility, as is the case today.

Following up on this, I introduced in the last Congress a bill designed to bring about comprehensive medicare and medicaid reform.

That proposal, S. 3205, was designed to do everything we can within the existing medicare and medicaid structure to bring about necessary tightening up.

Perhaps S. 3205 did not go as far as we should go.

Perhaps, in the final analysis, some kind of federalization of medicaid is what will be required to assure an equitable and satisfactory program of health coverage for our low-income population.

It is my intention to reintroduce legislation designed to bring about comprehensive administrative and reimbursement reform in medicare and medicaid.

In view of the fact that President-elect Carter, during the campaign, endorsed S. 3205's provisions in general, I intend to delay reintroduction of the proposal until I have had a chance to consult in detail with the new administration.

My objective in that regard will be to see whether we can agree on a bill which would be supported by the administration.

As I have noted, Mr. President, truly basic reforms are required in medicare and medicaid.

Perhaps 90 percent of our problems with medicaid stem from a generally ineffective administrative structure.

In my opinion, effective administration would resolve most of these problems, including fraud and abuse.

It might be reasonable to ask: What can we do now?

Well, Mr. President, what we can do is to give a clear, loud signal to the thieves and the crooks and the abusers by making a start now—no matter how small a beginning.

The medicare and medicaid antifraud amendments I am introducing today make that point.

The Senate will recall that many Senators joined with me last September in introducing and supporting S. 3801, the antifraud and antiabuse amendments.

The Senate recognized the urgency of the problem.

The provisions of S. 3801 were approved by the Finance Committee as amendments to another bill and promptly approved by the full Senate.

Unfortunately, due to procedural difficulties, those necessary amendments were not brought up before the full House in this past Congress.

During the adjournment period it has been my pleasure to work closely with the chairman of the Subcommittee on Health of the Committee on Ways and Means, Congressman DAN ROSTENKOWSKI, and with the chairman of the Subcommittee on Health of the Interstate and Foreign Commerce Committee, Congressman PAUL ROGERS, in developing an improved version of S. 3801.

That cooperative effort has, I believe, resulted in an even better bill.

Representatives ROSTENKOWSKI and ROGERS introduced our antifraud and antiabuse amendments in the House last Tuesday. It is their intention to hold joint hearings on the bill in early February.

The bill which I introduce today is identical in every respect with the Rostenkowski-Rogers amendments, excluding section 5 of the House proposal.

Section 5 of that bill includes a series of comprehensive changes in the PSRO program.

Many of those changes appear necessary.

However, it is my belief that they cannot truly be characterized as antifraud and antiabuse provisions and, for that reason, they are not included in the Senate version.

Additionally, the Permanent Subcommittee on Investigations of the Senate Government Operations Committee, under the leadership of Senator SAM NUNN and Senator CHARLES PERCY, has worked long, hard, and effectively in disclosing serious and, quite possibly, criminal activities in the administration of the HMO program.

In particular, their efforts have uncovered activities in the prepaid health plans in California which have been shocking.

It is my intention, working with the members of the Permanent Subcommittee on Investigations, to develop a number of additional changes designed to clean up fraudulent and abusive activities such as those which have been disclosed by the Permanent Subcommittee on Investigations.

At a subsequent time we will, therefore, offer an additional section to the bill which I introduce today.

Mr. President, I ask unanimous consent that a summary of the medicare and medicaid antifraud and antiabuse amendments appear in the RECORD immediately following these remarks.

The PRESIDING OFFICER (Mr. FORD). Without objection, it is so ordered.

(See exhibit 1.)

Mr. TALMADGE. Mr. President, I am pleased to offer this vitally needed change on behalf of myself and Senators LONG, RIBICOFF, DOLE, ROTH, HARRY F. BYRD, JR., GRAVEL, HASKELL, NUNN, ALLEN, BURDICK, CHILES, CHURCH, DOMENICI, EASTLAND, HOLLINGS, HUDDLESTON, INOUYE, JAVITS, KENNEDY, MORGAN, PELL, PERCY, RANDOLPH, STEVENSON, STONE, THURMOND, TOWER, WEICKER, BENTSEN, HATHAWAY, CURTIS, and ANDERSON.

EXHIBIT 1

SUMMARY OF MEDICARE-MEDICAID ANTIFRAUD AND ABUSE AMENDMENTS

Section 1.—The Medicare-Medicaid Anti-Fraud and Abuse Amendments.

Section 2.—Would modify existing law in both Titles XVIII and XIX to clarify the ban on the use of factoring arrangements in the payment of Medicare and Medicaid monies to physicians or other persons providing services under either program. The provision would make clear that a power-of-attorney could not be used to circumvent existing antiassignment rules.

Section 3.—Would require providers (other

than individual physicians) and suppliers participating in either program to disclose upon request specified ownership information and information pertaining to business transactions with related parties.

This provision would also define a "shared health facility" (a so-called "Medicaid mill") so that Professional Standards Review Organizations can increase their review given to this type of ambulatory facility.

Section 4.—Would clarify and upgrade the criminal penalties for fraudulent activities under Medicare and Medicaid. Except for penalties involving Medicare beneficiaries or Medicaid recipients, all penalties would be upgraded to felonies.

Section 5.—Would give the General Accounting Office subpoena power to assist it in its monitoring, review and oversight activities related to the Social Security Act programs.

Section 6.—Would require the Secretary of Health, Education and Welfare to suspend individual practitioners from the Medicare program who are convicted of a criminal offense related to their involvement in either Medicare or Medicaid. Similarly, Medicaid would be modified to require that States suspend from Medicaid, any individual practitioner who is convicted of a criminal offense related to his involvement in either Medicare or Medicaid.

Section 7.—Would require prospective providers of services or those seeking recertification under either Medicare, Medicaid, or Title XX social services to disclose in the application for program participation the name of any person who has a five percent or more ownership or controlling interest in the applicant provider and who has been convicted of a criminal offense relating to a prior involvement with a program authorized under either Title XVIII, XIX, or XX of the Social Security Act. The Secretary of Health, Education and Welfare or appropriate State agency is not required to enter into any agreement or contract with a provider who, although otherwise qualified, has an owner who meets such criteria. In the case of an application disclosing an ownership or control interest outlined above, the Secretary or appropriate State agency shall notify the Inspector General of both the receipt and disposition of such application.

Section 8.—Would allow Federal access to the books of providers of services under Medicaid in the same manner that such access is presently provided to State agencies.

Section 9.—Would allow 75 percent Federal matching towards the cost of operating an approved Medicaid claims processing and information system if the system provides explanation of benefits information to a sample group of individuals. This modifies present law which only allows the higher matching if the explanation is furnished to all recipients. The strict matching requirements of existing law have limited the growth of this type of claims processing and information system.

Mr. TALMADGE. Mr. President, I ask unanimous consent to have printed in the RECORD a statement by the distinguished Senator from Delaware (Mr. ROTH).

The PRESIDING OFFICER. Without objection, it is so ordered.

STATEMENT BY SENATOR ROTH

MEDICARE AND MEDICAID ANTIFRAUD AND ABUSE AMENDMENTS

I am today joining Senator Talmadge in sponsoring legislation to eliminate any fraud and abuse that exists in the Medicare and Medicaid program. These two programs will soon account for almost $45 billion in State and Federal expenditures. I believe that it is our obligation to assure the taxpayers that this money is spent efficiently, effectively, and with integrity.

The purpose of the Medicare and Medicaid programs is to provide needed medical services for the elderly, disabled and poor, who otherwise would not be able to afford quality health care. As we have seen in the past year, the Medicare-Medicaid programs have been found to be riddled with fraud and abuse, and senior citizens and taxpayers have been the victims of this fraud. We must take steps to curb these abuses in order to insure that every federal and state dollar is used to provide the greatest possible medical services.

It is important to stress that the majority of physicians and beneficiaries of the programs are honest and are not taking advantage of the system. A great number of doctors deserve recognition for their service and sacrifices to provide quality health care to those who cannot afford it. However, we must move promptly to assure that those who are defrauding these programs are caught and punished, and that any future possibilities for abuse are eliminated.

The Medicare and Medicaid Anti-fraud and Abuse Amendments would clarify and upgrade criminal penalties, and provide for more comprehensive monitoring, review and oversight activities of the programs. While this legislation is not a complete answer to all of the problems that exist in these programs, it will be a starting point. As a member of the Finance Committee, I intend to address other areas of inefficiency, waste and abuse as the session progresses.

MEDICARE-MEDICAID ANTIFRAUD AMENDMENTS

Mr. RIBICOFF. Mr. President, today I am cosponsoring with Senator TALMADGE and Senator LONG legislation to combat fraud and abuse in the medicare and medicaid programs.

Widespread and costly fraud and abuse in these programs has been documented in congressional hearings, investigations, and news stories. This fraud and abuse is an affront to honest physicians and hospitals. It is an affront to the poor and elderly who receive mediocre care from chiselers. And it is an affront to State and local governments who are trying to hold the line on costs.

Fighting fraud and abuse in health programs is an important first step in this Congress. We cannot deal with the gaps in medicare and medicaid coverage until we reform the administrative and reimbursement system.

The amendments I am cosponsoring today address a part of this problem. They put teeth in the Federal and State efforts to find and to punish fraud and abuse. Health service providers would be required to disclose ownership information. Fraudulent activities would become felonies.

These provisions will make the detection of abuse easier. When fraud moves from misdemeanor status to fraud status, prosecution becomes more worthwhile, and punishment more severe.

These amendments send a clear signal that we will not tolerate the subversion of worthy health programs by shysters.

These amendments are very similar to provisions approved by the Senate late during the last Congress. They have already been introduced in the House of Representatives by Congressman DAN ROSTENKOWSKI and Congressman PAUL ROGERS.

We will continue work on a comprehensive medicare-medicaid administrative reform bill. These antifraud amendments are an important start.

TENNESSEE-TOMBIGBEE

Mr. EASTLAND. Mr. President, I was shocked Monday morning to read a newspaper account of a court trial in my State in which there were suggestions of impropriety on the part of one of the Senate's senior and most respected Members.

At the trial in Jackson, Miss., witnesses hinted that in order to obtain Federal approval of construction projects, payments were made to Senator JENNINGS RANDOLPH, chairman of the Senate Public Works Committee. Mr. President, nothing could be farther from the truth. I have known JENNINGS RANDOLPH for many years. I know the manner in which he operates and I know that the very idea of receiving money to influence legislation is as repugnant to him as it is to me.

The trial in Mississippi ended last Saturday with the conviction of our former State highway director of embezzling $100,000 in State highway funds. According to an account in yesterday's New York Times:

> The defense several times implied that the money had been used to gain the influence of Senator Jennings Randolph, Democrat of West Virginia, Chairman of the Senate Public Works Committee.

One witness was quoted as having been told by the defendant, E. L. Boteler, Jr., that Senator RANDOLPH "takes his pound of flesh out of every public works contract."

Mr. President, JENNINGS RANDOLPH has long been a friend of the State of Mississippi, but he has been understanding and considerate of the needs of every State in our country. He is a man who believes strongly in the importance of public works to help build a strong and healthy America.

There is no evidence that I have ever seen indicating that he has not acted with the greatest integrity in discharging his responsibilities as the chairman of the Committee on Public Works.

The Mississippi trial related to efforts to obtain Federal funds to build highway bridges across the Tennessee-Tombigbee Waterway in my State. I strongly supported this effort as did my distinguished colleague, Senator JOHN STENNIS. Federal funding of this purpose is entirely consistent with current Federal policy and was provided in the Federal Aid Highway Act of 1976 which became law last May.

A brief review of this issue is necessary so that we may understand that this legislation was handled in a straightforward manner. The Congress first approved the Tennessee-Tombigbee project in 1946. Its cost at that time was estimated at $117 million and the States of Mississippi and Alabama would have been required to spend $3.5 million for new roads and bridges associated with the project. In 1972 when construction began, the cost estimate had increased to $390 million. It is now more than $1.6 billion.

In 1952, Congress passed legislation authorizing the Federal Government to pay for replacement of existing bridges on future waterway projects. Having been authorized in 1946, the Tennessee-Tombigbee bridges were not eligible for this full Federal funding. Cost of the

bridges is now estimated at $220 million, of which $180 million is in Mississippi and clearly beyond the financial capability of my State. The Federal Aid Highway Act of 1976 authorized Federal funds of $100 million to be provided in fiscal year 1977 and 1978 to help pay for these bridges. This amendment was placed in the Highway Act by the House of Representatives and not by the Public Works Committee of the Senate. The conferees, however, did accept the amendment by the House of Representatives. The act made existing law retroactive in this instance in recognition of the heavy increase in costs. It made the 1952 act applicable to the Tennessee-Tombigbee Waterway and this was additionally valid when we consider that actual construction did not begin until considerably after 1952.

Mr. President, I regret the embarrassment that surely has been caused to the distinguished senior Senator from West Virginia by the suggestions made in a Mississippi trial. The record must show that there has been no impropriety on the part of Senator RANDOLPH. The investigation which led to the prosecution of Mr. Boteler was carried out by the Legislative Audit Committee of Mississippi. This committee does all investigations of improprieties in our State government. That committee met in special session yesterday and issued this statement:

Due to recent publicity concerning U.S. Senator Jennings Randolph of West Virginia, the Legislative Audit Committee (Peer), State of Mississippi, feels compelled to issue a statement.

The Audit Committee investigation "— and they are the ones that pointed the finger at Mr. Boteler—", revealed no evidence indicating Senator Jennings Randolph received any money whatsoever emanating from the $200,000 misappropriated from the Mississippi Highway Department.

That was signed by Representative Doug Abraham, chairman.

In addition, the attorney general of the State of Mississippi, the chief law enforcement officer of our State, made a complete and exhaustive investigation of the matter and sought only one indictment, that of Mr. Boteler.

General Summer, commenting to local newsmen, stated:

We traced and documented all of the missing money for which Mr. Boteler went to trial and the evidence we found did not remotely implicate anyone else.

I will state that again:

We traced and documented all of the missing money for which Mr. Boteler went to trial and the evidence we found did not remotely implicate anyone else.

That is the attorney general of the State of Mississippi.

In conclusion, I think it should be said that since there was an intimation that these misappropriated Highway Department funds were used for lobbying in connection with the Tennessee-Tombigbee Waterway, Mr. President, there have never been any so-called lobbying expenses connected with this project. There is a five-State compact ratified by Congress, composed of the States of Kentucky, Tennessee, Mississippi, Alabama, and Florida. The representatives of the compact have been the sole persons involved in the promotion of this waterway and these activities have been limited to appearances before congressional committees. There has been none of the so-called lobbying activities connected with this association.

Mr. STENNIS. Mr. President, will the Senator yield to me, briefly?

Mr. EASTLAND. I yield.

Mr. STENNIS. Mr. President, together with my colleague from Mississippi, I was greatly disturbed when I heard of this slander and libel—a combination of both—that has been thrown in the direction of our colleague from West Virginia. He needs no defense among those of us who know him.

This testimony is hearsay at the very best. No one swore to this testimony; not even the defendant swore to it. Of course, he is afraid to—if he were inclined otherwise.

These charges do not fit the Senator from West Virginia. He is cut out of the other cloth. He has been in Congress for more than 30 years. I have worked with him for many of those years. We now work on public works matters together. He is chairman of the Committee on Public Works.

I have had the privilege of handling the money bill. I sent for him and asked him to come and help us. We rely on his judgment and take his word totally—of course, I do.

I regret exceedingly that this matter came up in this way and then was transmitted to the public, who do not have personal knowledge of the Senator.

Our investigating committee down there had traced this money and developed all the testimony. Nothing, absolutely nothing, pointed toward the Senator. The attorney general of the State was looking after the actual prosecution. They are sure that they covered all the money that is missing, and nothing points toward the Senator from West Virginia.

I denounce such statements, as any person who knows the facts would, but especially I am grieved that they relate to our friend from West Virginia and that this came out of an unfortunate matter in our State. Senator EASTLAND and I and many others on the floor know all about the legislation and what happened. The record of the Senator from West Virginia is as clean as a pin.

I thank the Senator for yielding to me. It is a privilege to be able to make these remarks.

Mr. President, I ask unanimous consent to have printed in the RECORD a telegram I have received from the Legislative Audit Committee, Jackson, Miss. with reference to this matter.

There being no objection, the telegram was ordered to be printed in the RECORD as follows:

TELEGRAM

Due to recent publicity concerning United States Senator Jennings Randolph of West Virginia, the Legislative Audit Committee (Peer, State of Mississippi) feels compelled to issue a statement: The Audit Committee Investigation revealed no evidence indicating Senator Randolph received any money whatsoever emanating from the 200,000.00 misappropriated from the Mississippi Highway Department.

DOUG ABRAHAM,
Chairman.

Mr. SPARKMAN. Mr. President, will the the Senator yield to me, briefly?

Mr. EASTLAND. I yield.

Mr. SPARKMAN. I wish to add to that.

Of course, I have been interested in the Tennessee-Tombigbee project throughout the years. Not only that, but I have served 30 years with JENNINGS RANDOLPH. I served with him in the House of Representatives. We were on two committees in that body.

This charge is ridiculous on its face, and I do not think anybody would take it seriously at all.

I have been interested in the Tennessee-Tombigbee project. I was in the House of Representatives in 1946 when we authorized it for the first time. I have worked for it, have worked on the program through the years. I am as certain as I am standing here that this charge is absolutely baseless, and I want the Senator from West Virginia to know this.

Mr. FORD. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. BUMPERS). Does the Senator from Mississippi yield to the Senator from Kentucky?

Mr. EASTLAND. I yield.

Mr. FORD. Mr. President, first, I compliment the two Senators from Mississippi, because I think it is important that we in this body correct any wrong that might be stated or printed about our colleague. I compliment these two fine gentlemen for coming to the aid of the distinguished Senator from West Virginia.

I have worked with the distinguished Senator from West Virginia, and as Governor of Kentucky I have been involved in the Tennessee-Tombigbee. Never during that time has there ever been a suggestion of wrongdoing.

This man has worked hard and diligently during all his legislative years to see that not only his State but also this Nation prospers.

I wish to add my words to the words of the other Senators who have preceded me. I think that the distinguished Senator from West Virginia has been put upon by those in a trial in Mississippi.

Mr. PERCY. Mr. President, will the Senator yield, so that this colloquy may be bipartisan?

Mr. EASTLAND. I yield.

Mr. PERCY. Mr. President, in the decade that I have known JENNINGS RANDOLPH, I have never known a man of more impeccable integrity, decency, and judgment. I cannot believe that there is a shred of truth to the allegations that have been made.

I thank my distinguished colleague.

Mr. EASTLAND. The Senator is correct.

The people who did the investigating and the chief law enforcement officer of the State say there is not a word of truth in the allegations. They have traced every dollar that was misappropriated.

Mr. PERCY. I thank my distinguished colleague for leading this colloquy.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. SPARKMAN. Yes, I yield.

Mr. CRANSTON. I wish to join in the expression of admiration of the two Senators from Mississippi for what they have done today and for the Senator from West Virginia (Mr. RANDOLPH) whose integrity is well known to all of us who have served with him.

It is an honor to serve with him, and I know these charges must be baseless.

The PRESIDING OFFICER (Mr. FORD). The Senator from West Virginia.

Mr. RANDOLPH. The Senator from West Virginia, who is in his 33d year of service in the House and in the Senate, is very, very appreciative of the statements of Senator JAMES EASTLAND and Senator JOHN STENNIS, both of the State of Mississippi. I am exceedingly grateful for their expressed confidence and their spoken trust.

I am also very appreciative of the comments of Senator JOHN SPARKMAN, Senator CHARLES PERCY, Senator WENDELL FORD, and Senator ALAN CRANSTON.

In the years I have served not only in the two bodies on this historic hill but particularly in the area of public works legislation, I want the record this afternoon to include these words: I have never received a single dollar, an amount of money in any degree, in connection with any public works project in the State of Mississippi or in any State of the Union. I have acted with, I hope, a reasoned understanding of the importance of these projects. I have advocated their construction and development.

But I regret that the situation which developed in Mississippi has caused me to stand at my desk and to speak the words I have spoken.

I underscore my appreciation for the initiative and action of the two Senators from Mississippi in making these statements today and in placing in the RECORD the findings of the audit committee of the State of Mississippi, and the declaration made by the attorney general of that State.

I thank the Chair.

Mr. BAKER. Mr. President, I listened with great interest to the preceding colloquy with respect to our esteemed and distinguished colleague from West Virginia (Mr. RANDOLPH), and I found it a source of amazement that any such suggestion would be made. It would be extraordinary to me if many of us were not compelled, as I am now, to rise to our feet and pay tribute to Senator JENNINGS RANDOLPH not only for his long service and his distinguished career but because of our absolute belief in his integrity and the absolute absence of any credibility to any suggestions or innuendos of any impropriety which may have been involved in any lawsuit.

I have known JENNINGS RANDOLPH for 10 years. It has been my privilege to serve with him, as the ranking Republican on the Public Works Committee when he was chairman of the Public Works Committee, and I can testify firsthand not only to his consideration and his courtesy, as I attempted to lead the minority on the Public Works Committee, but to the absolute reliability of this man, who is our chairman, and the integrity of every action that he took.

I know of no man in this body who deserves our respect and our trust more than Senator RANDOLPH of West Virginia, and I wish to take this opportunity to express my absolute confidence in him and to pay my respect to him as an honest, decent man, and a great Senator.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. ALLEN. Mr. President, I was shocked and outraged when the distinguished Senator from Mississippi (Mr. EASTLAND) reported that charges had been made in a trial in the State of Mississippi alleging improprieties on the part of the distinguished senior Senator from West Virginia (Mr. RANDOLPH).

Senator RANDOLPH needs no defense by me or for that matter by any Member of the Senate because his honor, integrity, and character need no defense because I know of no man in the Senate or in the entire world, for that matter, who has greater character, more integrity, or greater honor than does the distinguished Senator from West Virginia (Mr. RANDOLPH). I have known Senator RANDOLPH, it is strange to say, for some 35 years, but have known him more intimately since I have been in the Senate during the last 8 years. I have been a member of the Senate prayer breakfast groups with Senator RANDOLPH. He is a God-fearing man, and he walks close to his God. I would have no hesitancy whatsoever in staking my life on the honor, integrity, and character of this great man. He is above anything that is petty. He is above anything that is not in line with the highest principles and the highest tradition of the great and honorable life that he has lived.

So I think it is certainly a sad day when this great and honorable man has been accused, though certainly without any merit whatsoever, by someone who has leveled false charges at him in order to try to curry some sort of favorable position for himself.

We all have the greatest of confidence in the distinguished senior Senator from West Virginia. We honor him. We pay tribute to him. We know that he is a most honorable man, and certainly it is an honor and a privilege to be able to serve in the Senate with him and to be one of his colleagues.

Mr. ROBERT C. BYRD. Mr. President, for more than 18 years, it has been my privilege and opportunity to work with my cherished colleague from West Virginia, JENNINGS RANDOLPH, in the Senate. Our association, however, goes back much further than our service in this body. Other Senators have spoken today of their trust and esteem for JENNINGS RANDOLPH. I concur with their expressions of confidence.

It is difficult to describe in mere words the dedication of a man of the stature of JENNINGS RANDOLPH. West Virginia and our country are the better for his constant devotion to duty. His life has been one of dedication to service and it has been service of a selfless kind.

Individuals and official bodies of responsibility in the State of Mississippi have formally attested to the noninvolvement of Senator RANDOLPH in the embezzlement case in that State. To anyone who knows him, it is inconceivable that Senator RANDOLPH would act improperly. He is committed to building a better America and to helping provide a better life for our Nation's citizens. I have implicit confidence and trust in him.

Mr. RANDOLPH. Mr. President, I reinforce what I have earlier said in appreciation to those who have spoken. I am also very grateful to Senator HOWARD BAKER of Tennessee and to Senator JAMES ALLEN of Alabama. I treasure the words of my friend and colleague from West Virginia, Senator ROBERT C. BYRD.

And again, I indicate to my colleagues very genuine thanks for what has been said at this time.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Marks, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

REPORT OF THE OFFICE OF ALIEN PROPERTY, DEPARTMENT OF JUSTICE—MESSAGE FROM THE PRESIDENT—PM 13

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on the Judiciary:

To the Congress of the United States:

I herewith transmit the annual report of the Office of Alien Property, Department of Justice, for the fiscal year ended June 30, 1975, in accordance with section 6 of the Trading With the Enemy Act.

GERALD R. FORD.

THE WHITE HOUSE, *January 11, 1977.*

ENERGY CONSERVATION AND PRODUCTION ACT OF 1976—MESSAGE FROM THE PRESIDENT—PM 14

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Government Operations:

To the Congress of the United States:

Under the provisions of section 162(b), P.L. 94-385, the Energy Conservation and Production Act of 1976, I am required to submit recommendations to the Congress on the reorganization of Federal energy and natural resources activities.

A study of alternative organizational arrangements has been underway since May 1976 under the leadership of the

Office of Management and Budget and the Energy Resources Council.

After considering the alternatives, I have decided to recommend that the Congress approve creation of a Department of Energy. The details of the proposed organization, together with the necessary legislation, are included in the enclosed report which was prepared by the Office of Management and Budget and the Energy Resources Council.

I commend the report to the attention of the Congress and urge prompt action to create a Department of Energy.

GERALD R. FORD.

THE WHITE HOUSE, *January 11, 1977.*

REPORT OF THE SINAI SUPPORT MISSION—MESSAGE FROM THE PRESIDENT—PM 15

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, which was referred to the Committee on Foreign Relations:

To the Congress of the United States:

I am pleased to transmit herewith the Second Report of the United States Sinai Support Mission. This report, following that which I forwarded on April 30, 1976, describes the manner in which the Mission is carrying out its responsibility for operating the early warning system in the Sinai, as specified in the Basic Agreement between Egypt and Israel and its Annex signed on September 4, 1975. This report is provided to the Congress in conformity with Section 4 of Public Law 94–110 of October 13, 1975.

The Report includes a summary of the operations of the early warning system since its inauguration on February 22, 1976, and a description of the Mission's permanent base camp facilities which were officially dedicated on July 4.

With the completion of major construction activity, it has been possible to reduce somewhat the number of Americans working in the Sinai in accordance with the wishes of the Congress. The United States Sinai Support Mission will continue to analyze carefully all aspects of the Sinai operation to identify ways whereby the numbers might be further reduced.

The proposal to establish an American-manned early warning system in the Sinai was made at the request of the Governments of Egypt and Israel. With the concurrence of the Congress, we accepted this undertaking because the United States strongly seeks the achievement of peace and stability in the Middle East.

The United States Sinai Support Mission plays an important role in support of the Basic Agreement. Both sides have recently reaffirmed their confidence in the manner in which the United States has been carrying out its responsibilities in the Sinai, and as long as it continues to enjoy this support, the United States role will represent a meaningful contribution to the prospects for attaining a just and lasting peace in the Middle East.

GERALD R. FORD.

THE WHITE HOUSE, *January 11, 1977.*

REPORT OF COUNCIL ON WAGE AND PRICE STABILITY—MESSAGE FROM THE PRESIDENT—PM 16

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States which was referred to the Committee on Banking, Housing and Urban Affairs:

To the Congress of the United States:

In accordance with section 5 of the Council on Wage and Price Stability Act, as amended, I hereby transmit to the Congress the eighth quarterly report of the Council on Wage and Price Stability. This report contains a description of the Council activities during the third quarter of 1976 in monitoring both prices and wages in the private sector and various Federal Government activities that lead to higher costs and prices without creating commensurate benefits. It discusses in some detail the Council's study of collective bargaining negotiations for 1976, health costs, aluminum prices, and chlorine, caustic soda prices as well as its filings before various Federal regulatory agencies.

During the remainder of 1976, the Council on Wage and Price Stability will continue to play an important role in supplementing fiscal and monetary policies by calling public attention to wage and price developments or actions by the Government that could be of concern to American consumers.

GERALD R. FORD.

THE WHITE HOUSE, *January 11, 1977.*

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated.

By Mr. FORD:

S. 140. A bill for the relief of Dr. Kok Liong Tan, and his wife, Gloria Siao Tan; and

S. 141. A bill for the relief of Dr. Orlando Fusilero Bravo; to the Committee on the Judiciary.

By Mr. ZORINSKY:

S. 142. A bill for the relief of Gaspar Louis Sayoc; to the Committee on the Judiciary.

By Mr. TALMADGE (for himself, Mr. LONG, Mr. RIBICOFF, Mr. DOLE, Mr. HATHAWAY, Mr. ROTH, Mr. HARRY F. BYRD, JR., Mr. GRAVEL, Mr. BENTSEN, Mr. CURTIS, Mr. HASKELL, Mr. NUNN, Mr. ALLEN, Mr. BURDICK, Mr. CHILES, Mr. CHURCH, Mr. DOMENICI, Mr. EASTLAND, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. INOUYE, Mr. JAVITS, Mr. KENNEDY, Mr. MORGAN, Mr. PELL, Mr. PERCY, Mr. RANDOLPH, Mr. ANDERSON, Mr. STEVENSON, Mr. STONE, Mr. THURMOND, Mr. TOWER, and Mr. WEICKER):

S. 143. A bill to strengthen the capability of the Government to detect, prosecute, and punish fraudulent activities under the medicare and medicaid programs, and for other purposes; to the Committee on Finance.

By Mr. GOLDWATER:

S. 144. A bill for the relief of Samuel S. H. Leung, his wife Carol O. K. Leung, and his sons Johnny C. Y. Leung and Jimmy C. M. Leung; to the Committee on the Judiciary.

S. 145. A bill to amend the Federal Aviation Act of 1958 relating to emergency locator transmitters; to the Committee on Commerce.

By Mr. GOLDWATER (for himself, Mr. STONE, Mr. BARTLETT, Mr. YOUNG, Mr. MORGAN, Mr. MCCLELLAN, Mr. LAXALT, Mr. DOMENICI, Mr. NUNN, Mr. RIBICOFF, Mr. STAFFORD, Mr. LEAHY, Mr. ABOUREZK, Mr. WEICKER, Mr. GARN, and Mr. INOUYE):

S. 146. A bill to repeal the earnings limitation of the Social Security Act for all workers age 65 and over; to the Committee on Finance.

By Mr. BENTSEN:

S. 147. A bill for the relief of Dr. Antonio Panganiban Serrano, his wife, Dr. Lesley B. Tiongko Serrano, and their son, Kenneth Neil Serrano; and

S. 148. A bill for the relief of Dr. Laurence T. Gayao, his wife, Edith Gayao, and their child, Lorraine Gayao; to the Committee on the Judiciary.

S. 149. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit for employers who increase the number of individuals they employ, or who, in periods of high unemployment, maintain full employment levels; to the Committee on Finance.

By Mr. STEVENS:

S. 150. A bill for the relief of Lawrence Fox: to the Committee on the Judiciary.

By Mr. PEARSON:

S. 151. A bill to amend section 403 of the Congressional Budget Act of 1974 to require cost estimates of proposed legislation covering a 5-year period and to include costs to be incurred by nongovernmental entities; and to require Federal regulatory agencies to estimate and report on public and private costs of proposed regulations; to the Committee on Government Operations.

By Mr. YOUNG:

S. 152. A bill for the relief of Loi Lin Irene Chung (Tsui); and

S. 153. A bill for the relief of Dr. Timothy Kam-Hung Chung; to the Committee on the Judiciary.

By Mr. CRANSTON:

S. 154. A bill for the relief of Dea Lay-Hong;

S. 155. A bill for the relief of Antonio Zamora-Mendoza, his wife, Josefina Padilla Zamora, and their sons, Alberto Antonio Zamora-Padilla, Victor Zamora, Leopoldo Zamora, Jaime Zamora, and Jose Zamora;

S. 156. A bill for the relief of George L. Smith;

S. 157. A bill for the relief of Rose Gipson; and

S. 158. A bill to amend the Immigration and Nationality Act with respect to the waiver of certain grounds for exclusion and deportation; to the Committee on the Judiciary.

By Mr. CRANSTON (for himself and Mr. TOWER):

S. 159. A bill for the relief of Ciola J. Stewart, Lois Souby, Jane Robertson, and Norma Jean Ridgeway; to the Committee on the Judiciary.

By Mr. BUMPERS:

S. 160. A bill to amend the Arms Export Control Act to require approval by joint resolution of any governmental or commercial sale of any defense article or service for $100,000,000 or more; to the Committee on Foreign Relations.

By Mr. HEINZ:

S. 161. A bill to establish a program for repairing and replacing unsafe highway bridges; to the Committees on Public Works and Finance jointly by unanimous consent.

By Mr. HUDDLESTON (for himself and Mr. FORD):

S. 162. A bill to exempt normal farming and forestry activities from permit requirements for discharges of dredged or fill materials, and other purposes; to the Committee on Public Works.

By Mr. STEVENS:

S. 163. A bill to amend the National Forest Management Act of 1976 to classify the

State of Alaska as all other States are classified with respect to the building of certain roads by the Secretary of Agriculture for purchasers of timber qualifying as "small business concerns"; to the Committee on Agriculture and Forestry.

By Mr. STEVENS (for himself and Mr. GRAVEL):

S. 164. A bill to establish the Seward National Recreation Area in the State of Alaska, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. HUMPHREY:

S. 165. A bill for the relief of Miss Sue Ae Park.

S. 166. A bill for the relief of Miss Germa Videta Rowe; to the Committee on the Judiciary.

By Mr. MATSUNAGA:

S. 167. A bill to provide for a congressional scholarship program; to the Committee on Labor and Public Welfare.

By Mr. STONE:

S. 168. A bill to deny Members of Congress any increase in pay under any law passed, or plan or recommendation received, during a Congress unless such increase is to take effect not earlier than the first day of the next Congress; to the Committee on Post Office and Civil Service.

By Mr. CRANSTON (for himself and Mr. WILLIAMS):

S. 169. A bill to improve education by increasing the freedom of the Nation's teachers to change employment across State lines without substantial loss of retirement benefits through establishment of a Federal-State program; to the Committee on Labor and Public Welfare.

By Mr. HUMPHREY (for himself, Mr. JAVITS, Mr. ABOUREZK, Mr. MATSUNAGA, Mr. CASE and Mr. INOUYE):

S. 188. A bill to establish the Boston Harbor National Recreation Area in the Commonwealth of Massachusetts; to the Committee on Interior and Insular Affairs.

By Mr. STONE:

S.J. Res. 5. A joint resolution relating to the compensation of Members of Congress; to the Committee on the Judiciary.

By Mr. HELMS:

S.J. Res. 6. A joint resolution proposing an amendment to the Constitution of the United States guaranteeing the right of life to the unborn; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. GOLDWATER:

S. 145. A bill to amend the Federal Aviation Act of 1958 relating to emergency locator transmitters; to the Committee on Commerce.

EMERGENCY LOCATOR TRANSMITTER ACT OF 1977

Mr. GOLDWATER. Mr. President, on September 15 of last year, the Senate passed a very simple bill which would have provided aircraft operators with relief from a strict technical requirement that all civil aircraft be equipped with emergency locator transmitters, regardless of the justification for making a temporary exemption. The bill had been reported by the Senate Commerce Committee and passed by the Senate in response to numerous complaints from aircraft operators who pointed out that their aircraft was being grounded needlessly and arbitrarily due to the complete lack of any flexibility in the statute. Unfortunately, the corrective legislation passed by the Senate, and which was based upon a bill I had introduced early in 1975, was so burdened down with a number of unrelated aviation amendments added in the House of Representatives that it failed of enactment. What happened is that the House amended the original simple bill 1 day before the close of the session and then adjourned sine die before the Senate message concurring in the House amendments with an amendment had been received.

Mr. President, today I am reintroducing the bill as reported by the Senate committee and without any of the extraneous amendments. I might suggest that those provisions are much better suited for inclusion in an omnibus aviation bill than in the measure I am introducing.

Now, to explain, all this bill would do is simply to give discretionary authority to the Administrator of the Federal Aviation Administration so that he could authorize the temporary operation of civil aircraft without an ELT, if it is out of the aircraft for repair or replacement. The problem is that under existing law, there is no room for an exemption of any kind. Yet many aircraft operators are experiencing defective ELT units or running into service difficulties. These delays may run into a few weeks at best to a couple of months or more at worst. All the while, the aircraft is grounded, imposing great hardship on the operator.

Mr. President, the bill does not remove the general requirement that ELT's be installed on private aircraft. It will only permit aircraft to be operated temporarily in those cases when the FAA determines that a limited exemption is in the public interest.

Mr. President, the original bill itself is noncontroversial and I do not think there was one objection to it at the hearings which were held in September of 1975. I hope that the bill will receive favorable action by both the Senate and the House early in this session of Congress.

By Mr. GOLDWATER (for himself, Mr. STONE, Mr. BARTLETT, Mr. YOUNG, Mr. MORGAN, Mr. MCCLELLAN, Mr. LAXALT, Mr. DOMENICI, Mr. NUNN, Mr. RIBICOFF, Mr. STAFFORD, Mr. LEAHY, Mr. ABOUREZK, Mr. WEICKER, Mr. GARN, and Mr. INOUYE):

S. 146. A bill to repeal the earnings limitation of the Social Security Act for

all workers age 65 and over; to the Committee on Finance.

REPEAL THE ROBBERY OF OUR SENIOR CITIZENS

Mr. GOLDWATER. Mr. President, I call today for the complete repeal of the means test on social security benefits paid to workers who are aged 65 and older. I am joined in this proposal by Senators STONE, BARTLETT, YOUNG, MORGAN, MCCLELLAN, LAXALT, DOMENICI, NUNN, RIBICOFF, STAFFORD, LEAHY, ABOUREZK, WEICKER, GARN, and INOUYE.

By "means test," I refer to the penalty imposed on persons who are otherwise fully eligible for social security checks, but who earn more than $3,000 a year.

Although there have been improvements in recent years, because of the automatic provision for cost-of-living increases in the earnings test, social security recipients still have $1 deducted from their checks for every $2 earned over the $3,000 exempt amount. The only exclusion is for persons 72 and older.

Mr. President, the social security means test is a shameful robbery by the law of money belonging to our senior citizens. This money is not the Government's to keep. It is the employees', who have paid their "premiums" all of their lives.

According to the best figures I can get from the Social Security Administration and economists, at least 2 million elderly citizens and their families are injured by the earnings limitation. Some 1.4 million persons lose all or some of their benefits. Another group of about 600,000 Americans are now not working, or are holding their incomes below the ceiling, on account of the means test.

Whatever the numbers affected, I believe the earnings penalty is wrong. In my opinion, it stands as a broken promise to the American working men and women who have been led to believe benefits will be paid "as a matter of right," because of the payroll contributions which they and their employers have made over lifetimes of work. Whatever the Social Security Administration and its defenders can say about what "a matter of right" means to them, as understood by employees it is a pledge that the scheduled benefits will be paid automatically to workers once they reach the statutory age.

Also, I oppose the means test, because it transforms a contributory program into a welfare program. A worker must prove he has a need for benefits, because of a loss in earnings, in order to qualify for them.

Mr. President, there are many other reasons why the means test should be repealed. It arbitrarily forces early retirement upon great numbers of workers who wish to continue employment, and in doing so, it may shorten the lifespan of those persons. There is no question, but that the income test has an important effect on the accelerated rate of retirement. Census data on labor force participation by age shows a striking drop at age 65—the age when persons become eligible for full social security benefits. Expert studies prove that only a small portion of the drop is the result of health reasons. Up to half of the decline in working may be attributable to the earnings limitation.

Other studies find that the means test has the same effect upon discouraging employment, but they reach this conclusion from a different approach. Instead of examining the declining work rate of persons who reach 65, which is the onset of the earnings test, these studies analyze the labor force participation of workers who reach age 72, the age at which they become eligible for social security benefits regardless of their work income. Far from finding a steadily declining rate for persons who reach age 72, as one might expect if age and health were a decisive factor in keeping older persons from working, the opposite result was discovered. There is a sharp increase in the labor force participation of persons entitled to social security benefits once they reach age 72. This is strong evidence of the tragic impact of the means test upon persons who are ages 65 through 71.

Next, I oppose the means test, because it discriminates against the poor who cannot afford to retire. It penalizes wage earners only. Under the means test, a family's total cash flow does not matter so long as it is from nonwage income. Interest, rentals, dividends, and so forth, will have no effect upon a person's right to receive social security benefits. Now, the answer is not to double the error by taking away the social security checks of those with nonwage income. Rather, the proper solution is to repeal the means test for everyone.

Finally, I would point out that the earnings limitation does not only have an impact upon the human beings who are forced to retire or to hold down their incomes, but there is a very real cost to the U.S. economy from this law. One economist has made an estimate of the cost in real output of the means test and he has calculated that for a 12-year period, it may have caused a reduction in the GNP of up to 2.4 percent—a two-tenths percentage point decline in the annual growth rate. If true, this means that although one of the major objections to the elimination of the means test has been its cost, the present cost of the income test in terms of smaller economic output will be saved by eliminating it.

And speaking of costs, Mr. President, the highest estimate that the Social Security Administration has given me is that the present contribution rate of employers and employees would have to be increased by two-tenths percent, if the means test were eliminated. This would cost $28 a year maximum to present workers. Of course, payroll taxes need not be increased at all, if general revenues are used. In contrast, the Social Security Administration has been requested to estimate, but never calculated for me, the amount of additional social security taxes that would flow into the Treasury, because of additional earnings stimulated by eliminating the test. Nor has it come up with an estimate of the additional Federal income taxes which elimination of the earnings limitation, and the resultant increase in work, would generate.

And, when the opponents of repealing the means test talk about cost, they ignore the value that must be placed upon the well-being of those elderly persons who are now suffering physical and mental harm by being forced to retire sooner than they wished, solely because of the earnings ceiling. The opponents also ignore the loss to the U.S. economy of an important productive resource, the skills, and labor of the elderly.

Mr. President, the decision to repeal the means test cannot be put upon a cost-effectiveness basis. The test is wrong. It is illogical. And it should be repealed immediately.

SOCIAL SECURITY RETIREMENT TEST

Mr. RIBICOFF. Mr. President, today I am pleased to cosponsor legislation to repeal the so-called retirement test in the social security program.

Every year working men and women who have paid social security taxes their whole lives reach the age of 65 only to discover that their wages make them "too rich" for the social security benefits they thought they had earned.

These working men and women discover that they must choose between earning less than $3,000 and getting their social security or earning more than $3,000 and giving up some of those benefits. In addition, they must continue to pay social security taxes.

Yet the man next door who draws interest income or a high private pension suffers no reduction in his social security benefits.

This retirement test means the social security program discriminates against those who must continue to work. The retirement test is not a true means test: Only wages and not interest or dividend or pension income count.

Today we talk about the damage done by forced retirement to the morale and the physical health of workers. Yet every year we force working men and women into an early retirement. In doing this, our country loses the benefit of their skills and their labor.

The social security system is supported by millions of working Americans, because they think they are buying the right to receive payments at age 65. How long can we expect men and women to support a system which misleads them—which taxes them for a benefit it promises, but does not deliver?

Now is the time to eliminate this inequity.

By Mr. BENTSEN for himself and Mr. PERCY):

S. 149. A bill to amend the Internal Revenue Code of 1954 to provide a tax credit for employers who increase the number of individuals they employ, or who, in periods of high unemployment, maintain full employment levels; to the Committee on Finance.

A NEW POLICY TOOL FOR ECONOMIC STABILIZATION

Mr. BENTSEN. Mr. President, today I am introducing the Employment Tax Credit Economic Stabilization Act of 1977 to promote economic stability by giving American business tax incentives to maintain and enlarge their work forces during periods of high unemployment.

The experience of the last 2 years should convince every American that new ideas are sorely needed to help solve our twin problems of high unemployment and rapid inflation. In the last 2 years,

joblessness has reached levels unknown since the Great Depression. Millions of bread winners and their families have suffered great hardships. But this tragic waste of human productive capacity has itself not produced stable prices. Inflation remains one of our most serious social problems. It continues to adversely affect the budget of every American family and it continues to wipe out much of the purchasing power of the savings of those who have been thrifty. Most importantly, inflation is still eroding the confidence the people have in our economic system. Without that confidence, our free market system cannot function effectively.

Economists have given the economic condition of the last 2 years a new name—stagflation. We do not, however, have to live permanently with stagflation. There is a way to create jobs and hold down prices in the bargain. Moreover, these jobs do not have to be expensive public service ones which cost the taxpayers anywhere from $8,000 to $12,000 a piece. I am talking about a way to put our machine tool operators, our foundry workers, our heavy equipment operators back where they really want to be and should be—at the highly skilled and highly productive jobs in the private sector that they were trained to do.

We give business tax credits to encourage the purchase of machinery. Why not give similar tax incentives to employers who invest in our most precious national resource, the working men and women of America? Employers should be given tax incentives to keep workers on the payroll during times when business is bad and to hire more workers when business begins to pick up. These tax reductions would reduce layoffs, create jobs, and temper inflation by lowering labor costs to business.

How would my system of employment tax credits work? It is simple. When the national rate of unemployment reaches or exceeds 5 percent for 3 consecutive months, the system would go into effect automatically. Employers receive a tax credit amounting to 5 percent of the wages of all workers hired or retained over an employment base which rises and falls automatically according to the level of unemployment. At 5 percent, the employment base would be the number of full time workers on the payroll for the 12 months preceding the triggering of the system. When the unemployment rate reaches the 6 percent for 3 consecutive months, the employment base would be 95 percent of that number and a 7 percent or more unemployment rate for 3 consecutive months would produce an employment base 90 percent of that number. Any employer, for example, who had 100 people on his payroll for the 12 months preceding the triggering of the system would be entitled to the credit for all workers over the base of 90 if the rate of employment equaled or exceeded 7 percent for 3 consecutive months.

As unemployment declines, the system gradually phases itself out. When the unemployment rate dips below 5 percent, the system is completely phased out.

This variable base employment tax credit system provides an incentive for firms to retain workers during a downturn since each worker laid off would reduce the firm's tax credit. It would work to encourage so-called labor hoarding which goes on even without this system during recession periods. There is a great deal of evidence indicating that firms do treat short-run cyclical downturns as in fact what they are, short-run downturns. Therefore, some relatively unproductive labor may be maintained to avoid the long run nonwage costs of rehiring, retraining, and perhaps of losing valuable workers to other firms or occupations. That is why labor productivity tends to fall off during an economic downswing. The evidence is that when the ratio of nonwage to wage costs is high, much labor hoarding goes on. The variable base employment tax credit, by lowering wage costs, would increase the ratio of nonwage to wage costs.

This variable base system would also give firms an incentive to speed hiring during periods of recovery since each new worker hired would increase the value of the credit.

Can a system so simple work? An employment tax credit lowers effective wage rates. This is the mechanism which is peculiar to this kind of tax cut. To suggest that this mechanism will not work is to say that wage rates do not influence a manager's decision to hire new workers or to retain old ones during a downswing. Commonsense would suggest that one important variable which management has to consider in its employment decision is the wage rates it pays its workers. This is particularly true in the service sector of the economy and that sector is becoming the dominant employer in the economy.

A recent study by Profs. Gary Fethke and Sam Williamson at the University of Iowa concludes that 2 million more people would have jobs today if a system similar to the one I described above had been in effect in the fall of 1975. And inflation would be almost 2 percent lower.

How can a program which creates jobs also lower inflation? The answer is easy—by lowering the cost of labor to business. A tax reduction given to a firm for hiring a new employee or keeping an old one on the payroll in effect lowers the wage the firm pays the worker without reducing the worker's income. This means that industry's labor costs fall. In turn, this encourages employment and it also reduces inflationary pressures in the economy.

How much would my bill cost? That would depend on the severity of the downswing. At the current rate of unemployment, the direct Treasury revenue loss would be about $3 billion annually. But this revenue loss is only a fraction of the tax reductions historically enacted as countercyclical stimulus during periods of recession. Moreover, the direct revenue loss from my bill would be temporary since the system phases out as the economy recovers. Most importantly, as the Fethke-Williamson study shows, the net cost would be very close to zero when the revenue gains produced by reduced unemployment are included in the calculation. Finally, the direct Treasury revenue loss per job created under my proposal would be about $1,500 and this compares very favorably with the $8,000 to $12,000 cost of each public service job.

Tax credits for human investment create jobs with a future in America's private industry. Government sponsored public service jobs may be necessary as a last resort in emergency situations. But Government job programs invariably mean expanded Government bureaucracy. Tax incentives to stimulate employment, on the other hand, will not enlarge the size of Government.

An employment tax credit system has never really been tried in this country. Our economic problems are as difficult and perplexing as any we have faced in our 200-year history. That is why it is necessary for us to move from the outmoded policies of the past to imaginative, innovative policies which address the new economic realities we now confront.

I ask unanimous consent that the fact sheet on the Employment Tax Credit Economic Stabilization Act be printed in the RECORD at this point together with the bill.

There being no objection, the bill and fact sheet were ordered to be printed in the RECORD, as follows:

S. 149

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Employment Tax Credit Economic Stabilization Act of 1977".

SEC. 2. CREDIT ALLOWED FOR INCREASED EMPLOYMENT.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allotted) is amended by inserting immediately before section 45 the following new section:

"SEC. 44B. EMPLOYMENT TAX CREDIT.

"(a) GENERAL RULE.—If the rate of unemployment for the United States is 5 percent or more for any 3 consecutive months of the taxable year, there is allowed to an employer as a credit against the tax imposed by this chapter for that taxable year, an amount equal to 5 percent of the employment factor of that employer for the taxable year.

"(b) DEFINITIONS; SPECIAL RULES.—

"(1) RATE OF UNEMPLOYMENT.—The term 'rate of unemployment' means the unemployment rate for the United States calculated as a percentage of the civilian labor force for all individuals 16 years of age and over as determined by the Bureau of Labor Statistics of the Department of Labor.

"(2) EMPLOYER.—The term 'employer' is defined in section 3401(d).

"(3) EMPLOYMENT FACTOR.—

"(A) IN GENERAL.—The employment factor of a taxpayer for the taxable year is the product of—

"(i) average annual gross wages, multiplied by

"(ii) the number by which the number of fulltime employees of the taxpayer for the taxable years exceeds the number of fulltime employees of the taxpayer for the preceding taxable year.

In determining that number, parttime employees, and employees who are employed for less than 10 months of the year shall, under regulations prescribed by the Secretary, be treated as proportionate fulltime employees for the taxable year.

"(B) AVERAGE ANNUAL GROSS WAGES.—The term 'average annual gross wages' means the Annual Average Gross Eearnings-Total Private Non-Agricultural as determined by the Bureau of Labor Statistics of the Department of Labor for the calendar year end-

ing with or within the taxable year of the taxpayer.

"(C) NEW FIRMS.—An employer who was an employer for less than 6 months during the preceding taxable year shall be considered, for purposes of subparagraph (A), to have had a number of employees for the preceding taxable year equal in number to 95 percent of the number of employees he has for the current taxable year.

"(D) ADJUSTMENT FOR HIGH RATES OF UNEMPLOYMENT.—If the rate of unemployment for the United States for any period of 3 consecutive months during the taxable year is equal to, or more than 6 percent but less than 7 percent, the number of fulltime employees of the taxpayer for the preceding taxable year shall be reduced (for purposes of making the computation required by subparagraph (A)) by 5 percent, if such rate for any such period during the taxable year is equal to, or more than, 7 percent, the number of fulltime employees of the taxpayer for the preceding taxable year shall be reduced (for purposes of making the computation required by subparagraph (A)) by 10 percent.

"(E) EMPLOYEES.—The term 'employee' means an individual who is an employee within the meaning of section 3121(d) who is employed in the United States or its possessions.

"(c) CONGRESSIONAL REVIEW.—The Congress hereby declares its intention to review the operation of the provisions of this section before January 1, 1980, and before every third January thereafter for the purpose of determining whether the credit allowed by subsection (a) should be allowed for taxable years beginning after December 31, 1979.".

(b) REFUNDABILITY.—

(1) Section 6401(b) of such Code (relating to amount treated as overpayments) is amended—

(A) by inserting "44B (relating to employment tax credit)," before ", exceeds", and

(B) by striking out "and 43" the second time it appears and inserting in lieu thereof a comma and "43 and 44B".

(2) Section 6201(a)(4) of such Code (relating to assessment authority) is amended—

(A) by striking out "39 or 43." in the caption of such section and inserting in lieu thereof "39, 43, or 44B.", and

(B) by striking out "or section 43 (relating to earned income)," and inserting in lieu thereof a comma and "section 43 (relating to earned income), or section 44B (relating to employment tax credit),".

(c) TECHNICAL AND CONFORMING AMENDMENTS.—

(1) The table of sections for such subpart A is amended by inserting immediately before the item relating to section 45 the following new item:

"SEC. 44B. EMPLOYMENT TAX CREDIT.".

(2) Section 6096(b) of such Code (relating to designation of income tax payment to Presidential Election Campaign Fund) is amended by striking out "and 44A" and inserting in lieu thereof "44A, and 44B".

(d) EFFECTIVE DATE.—The amendments made by this section apply with respect to taxable years beginning after December 31, 1976.

THE EMPLOYMENT TAX CREDIT ECONOMIC STABILIZATION ACT OF 1977

GENERAL DESCRIPTION

The bill would give any firm or other employer a tax credit against its Federal income tax for every worker hired or maintained on its payroll above its employment base. The amount of the credit is 5 percent of the annual average gross earnings for production and non-supervisory workers as determined by the Bureau of Labor Statistics for each qualifying worker (currently) the credit would be about $500 per qualifying worker).

The employment base rises and falls automatically according to the level of unemployment. Unemployment of 5 percent or more for three consecutive months triggers the system. The employment base becomes the number of full-time employees on the payroll in the 12 months preceding the triggering of the system. A business would be eligible for the tax credit only by expanding the size of its work force. When the unemployment rate reaches 6 percent for three consecutive months, the employment base would be 95 percent of the number of full-time workers on the payroll for 12 months preceding the triggering of the system and a 7 percent or more unemployment rate for three consecutive months would produce an employment base 90 percent of that number. Any employer, for example, who had 100 people on his payroll for the 12 months preceding the triggering of the system would be entitled to the credit for all workers over the base of 90 if the rate of unemployment equaled or exceeded 7 percent for three consecutive months.

The system phases itself out as unemployment declines with a complete phase out occurring when unemployment falls below 5 percent.

SPECIFIC PROVISIONS

1. The tax credit applies for taxable years beginning after December 31, 1976. All business firms and other employers who pay Federal corporate and other income taxes are eligible. The Congress is mandated to review the operation of the tax credit system before January 1, 1980 and every three years thereafter to determine whether it should continue.

2. To make the bookkeeping requirement as simple as possible for qualifying firms and to provide the greatest incentive to hire or retain low wage relatively unskilled workers who are generally laid-off first during a recession, the amount of the credit is computed as 5 percent of "the annual average gross earnings for production and non-supervisory workers" as determined by the Bureau of Labor Statistics for each qualifying worker.

3. Employees qualifying for the credit are defined as those hired or retained on the payroll above the firm's employment base.

(a) If unemployment equals or exceeds 5 percent for three consecutive months, the employment base is equal to the average number of full-time employees on the payroll for the 12 months preceding the triggering of the system. If unemployment equals or exceeds 6 percent for three consecutive months, the employment base is 95 percent of that number and if unemployment equals or exceeds 7 percent for three consecutive months, the employment base is 90 percent of that number.

(b) To provide a reasonable amount of certainty for firms using the tax credit system, once an employee qualifies for the credit he or she remains creditable for, at least, one year regardless of the National rate of unemployment.

(c) The tax credit formula automatically pro-rates the credit earned for employees not on the payroll for the entire year.

(d) New firms—a new firm will be considered to have an employment base equal to 95 percent of the number of full-time workers on its payroll for the first year of its operation.

(e) Only workers employed in the United States or its possessions could qualify for the employment tax credit.

4. Because some firms may not have sufficient earnings during a downswing, the credit is refundable.

EMPLOYMENT EFFECT AND COST

A recent econometic study by Professors Gary Fethke and Sam Williamson at the University of Iowa concludes that two million more people would have jobs today if a system similar to the one described above had been in effect in the Fall of 1975. And inflation would be almost 2 percent lower. The direct Treasury revenue loss will depend on the severity of the downswing.

At the current rate of unemployment, the direct Treasury revenue loss would be about $3 billion annually. But this revenue loss is only a fraction of the revenue loss which results from the tax reductions which have been historically enacted as countercyclical stimulus during periods of recession. Moreover, the direct revenue loss from the bill would be temporary since the system phases out as the economy recovers. Most importantly, as the Fethke-Williamson study shows, the net cost would be very close to zero when the revenue gains produced by reduced unemployment are included in the calculation. Finally, the direct Treasury revenue loss per job created under my proposal would be about $1,500 and this compares very favorably with the $8,000 to $12,000 cost per public service job.

By Mr. PEARSON:

S. 151. A bill to amend section 403 of the Congressional Budget Act of 1974 to require cost estimates of proposed legislation covering a 5-year period and to include costs to be incurred by nongovernmental entities; and to require Federal regulatory agencies to estimate and report on public and private costs of proposed regulations; to the Committee on Government Operations.

ECONOMIC IMPACT STATEMENT ACT OF 1977

Mr. PEARSON. Mr. President, today I am introducing a bill designed to strengthen the Congressional Budget Act of 1974, and to extend the legislative cost analysis concept contained in the act to Executive regulatory action. My intention is to require a thorough review of all Government action to determine, as accurately as practicable, the total cost of Government, not only in direct expenditures, but also in terms of consumer and industry impact.

As you know, Mr. President, the Congressional Budget Act already requires that an estimate be made to reflect the cost, to the Federal Government, of proposed authorization legislation during a 5-year period. This provision served us well during the 94th Congress. But the provision overlooks an important and quantifiable cost of legislation. In addition to measuring Federal cost, we must also project what a bill is going to mean to State and local governments and to the private sector.

To correct this oversight, one provision of my bill requires the Director of the Congressional Budget Office to prepare an estimate of cost to be incurred not only by the Federal Government, but also by State and local governments and by nongovernmental entities. In this way, we can begin to measure a legislative proposal's long-term fiscal impact in the public and private sectors. Hopefully, we can avoid unnecessarily escalating Government imposed costs with resulting unintended inflationary pressure.

Including all Government and private sector costs in economic analysis of legislation is, I believe, a logical expansion of the provisions already adopted in the Congressional Budget Act. I also believe that requiring similar executive branch analysis for proposed regulations is a rational and essential concomitant to this expanded cost-analysis requirement.

For that reason, Mr. President, my proposal mandates Federal regulatory agency consideration of the economic impact of future regulations that they

may promulgate. The health, safety, or other goals behind regulations are important ones, but it is also important that Congress be aware of the cost that these actions impose on regulated industries and, of course, ultimately on the consumer. Such an economic analysis will encourage an agency to consider less costly means of achieving its regulatory goals. My bill simply requires agencies proposing a rule to give Congress an estimate of the cost to be incurred by the Government and by the private sector, including businesses and individual consumers. In this way, for the first time, the American public will know the cost, as well as the benefits of regulatory action.

It is my understanding that through Executive Order 11821 all executive branch agencies must now analyze at least the inflationary impact of major regulations that they propose. The Council on Wage and Price Stability and the Office of Management and Budget have conceived and implemented procedures for compliance with this Executive order and have begun to develop the expertise for undertaking economic analysis.

Their experience indicates that analyses such as I propose can be effectively conducted and profitably shared with Congress.

Mr. President, my proposal is, therefore, a modest one. It calls for a more complete evaluation of the cost of legislative action and, for the first time, a reporting to Congress on the cost of regulatory action. The benefits seem to be obvious. We will be able to make better informed judgments on the propriety and advisability of our legislative acts. The American people, through their elected officials, will be able to measure the cost and benefits of regulatory action. By bringing the action of regulators into account by elected officials, I am confident that we will have better regulation and more cost effective implementation of congressional intent.

Mr. President, since the goal appears attainable and is clearly desirable, I urge favorable consideration of this bill. I ask unanimous consent to have the bill printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 151

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Economic Impact Statement Act of 1977".

SEC. 2. Section 403(1) of the Congressional Budget Act of 1974 is amended to read as follows:

"(1) an estimate of the costs which would be incurred by the Federal Government, by state and local governments, and by nongovernmental entities in carrying out such bill or resolution in the fiscal year in which it is to become effective and in each of the four fiscal years following such fiscal years, together with the basis for each such estimate; and".

SEC. 3. The provisions of section 904 of the Congressional Budget Act of 1974 shall apply to the amendment made by section 2 as if such amendment were included in section 403 of such Act at the time of its enactment.

SEC. 4. Whenever any officer or agency in the executive branch of the Federal Government (including any independent establishment of the United States) proposes to prescribe or place in effect any rule or regulation to be used in the administration or implementation of any law of the United States or any program established by or under such a law, or proposes to make or place in effect any change in such a rule or regulation, such officer or agency shall submit the proposed rule, regulation or change to the appropriate committee or committees in each House of Congress having jurisdiction over the matters contained in such rule, regulation or change together with a report containing a full explanation thereof. Such report shall include, but not be limited to, a summary of such rule, regulation or change, a description of the effect of such rule, regulation or change on interstate commerce, and an estimate of the costs to be incurred by the Federal Government, by state and local governments, by nongovernmental entities, and by individuals, including consumers of such products or services affected by such rule, regulation or change, in carrying out such rule, regulation or change in the fiscal year in which it is to become effective and each of the four fiscal years following such fiscal year, together with the basis for each such estimate.

By Mr. BUMPERS:

S. 160. A bill to amend the Arms Export Control Act to require approval by joint resolution of any governmental or commercial sale of any defense article or service for $100 million or more; to the Committee on Foreign Relations.

ARMS SALES OF $100 MILLION OR MORE

Mr. BUMPERS. Mr. President, the grim realization that this country has no arms export policy was dramatically and abruptly brought home to me last September when the administration in one fell swoop, proposed sales of $6 billion to 11 countries. The cynical tack of the administration was all too clear at that time: to inundate us at the session's 11th hour with a flood of sales that we could not hope to examine properly before adjournment. Swamped as we were and encouraged by Mr. Kissinger not to question the sales, we bent under the pressure and refused to hold the transactions up to the light and give them the close scrutiny they deserved.

Prior to that time I had doubted those Jeremiahs who heatedly proclaimed that our unprecedented arms sales were morally indefensible and essentially out of control. I am convinced that there is no more important task facing the 95th Congress than to bring our arms sales back within the ambit of responsible planning and reasonable restraint.

My distinguished colleagues, Senators HUMPHREY and NELSON, together with many others have been active for years in efforts to control arms exports. Largely through their efforts, Congress now has the authority to halt by concurrent resolution arms sales of $25 million or more, or sales involving major weapons systems with development costs of $7 million or more. I championed the establishment of that authority in the Congress. It was long overdue. Unhappily, as witnessed by 2 years of operation under Nelson amendment procedures, we in Congress have proven reluctant to invoke our powers and halt those arms transactions which seemed clearly contrary to our own best interests, and to global peace.

My bill, therefore, would force a more active role by the Congress in formulating arms export policy. It would supplement the Nelson amendment by requiring both Houses and the Executive to approve by joint resolution all arms sales of $100 million or more to a single country. Without such approval, the transactions could not be consummated. Approval would be necessary both in the case of government-to-government sales and commercial sales.

To give you some idea of the number of congressional resolutions that would be required, in 1975 and in the first three quarters of 1976 there were 146 filings of government-to-government sales with the chairman of the Foreign Relations Committee under the Nelson amendment. Of those sales, 49 involved arms to individual countries valued at $100 million or more.

Moreover, of the $6 billion package made public last September, the following sales would not have been finalized under my bill without congressional and Executive action:

Iran, $3.8 billion for F–16 fighters, various missiles and support equipment.

Saudi Arabia, three contracts totaling $605 million for training and military construction.

Norway, $100 million for missiles.

Singapore, $109.7 million for F–5 jet fighters.

There are two significant questions inherent in what I am proposing that I would urge my colleagues on the Foreign Relations and Armed Services Committees to examine. First, to what extent should this legislation be adhered to when an ally is at war and in need of immediate armaments? Obviously, one opponent to the sales in the Senate or the House could delay and perhaps ultimately impede consideration of the transfer simply by parliamentary maneuvering.

Second, care must be taken to prevent piecemeal sales for the purpose of avoiding the requirements of this bill, when sales in the aggregate would total $100 million or more.

Mr. President, I have every confidence that the new administration will be as anxious as I am to stop this current orgy of weapons activity. We all know the tragic statistics which depict the recent trends in arms trade:

Sales in excess of $14.4 billion in 1976—in 1970, sales of equipment totaled less than $1 billion.

American sales representing over 50 percent of the worldwide market.

Eighty percent of our arms sales today going to the Persian Gulf States and to the Middle East.

Iran alone purchasing $13.8 billion in military goods since 1972.

Added to this depressing array of figures is the fact that in the last 30 years there have been 119 armed conflicts involving 69 nations.

How we can we pretend to be a leader for world peace when we, by our daily actions, are making it that much easier for rival nations to roll the iron dice, as Adlai Stevenson once described it, and run this disturbing total up even higher.

Since our catastrophic involvement in Southeast Asia our foreign policy, under Mr. Kissinger's aegis, has undergone a palpable shift. Rather than a policy

predicated on our own armed interventions on behalf of friends, we have opted for the safer course of arming our allies to the teeth through these mammoth weapons transactions. It has been argued by the proponents of this policy shift that this strategy benefits everyone. It means a generally healthier economy with more jobs at home and a better balance-of-payment posture. At the same time we are shoring up our friends and the bulwark they represent to international communism.

But the essential inconsistency with our avowed goal of international peace remains. It is far better in my opinion to promote the strength and beauty of American democracy by sharing our bounty with the world than by trading willy nilly in death and destruction. If balance of payments is all we are worried about, let us increase our agricultural production and our food exports, which is exactly what farmers in my State would like. That would be eminently preferable to trafficking in Sidewinder missiles and F–16's.

There are other drawbacks to our present course. We are so seriously depleting our own inventories that Pentagon officials are beginning to question the wisdom of this pellmell rush to sell our latest weapons systems. Training of foreign armed services represents another problem. As American "advisers" continue to burgeon in Iran, Saudi Arabia, and elsewhere, the risk of American entanglement in another foreign conflict grows commensurately.

We in Congress can be justly proud of our recent reassertion of our constitutional powers, particularly in the area of foreign affairs. The war powers resolution was a dramatic illustration of this. Our subsequent actions with respect to appropriations for Southeast Asia and Angola also attest to it, as does the arms export legislation.

I urge my colleagues to continue in this vein with the adoption of my bill. Time is short. The sheer volume of our current arms sales suggests the absence of any rhyme or reason. Aggressive congressional direction, quite simply, is essential in this critical policy area. If we do not come to grips with the issue—if we continue to permit these sales to spin aimlessly out of control, we will have failed in an area where it is imperative that we succeed.

Mr. President, I ask that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 160

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 36 of the Arms Export Control Act is amended by adding at the end thereof the following new subsection:

"(e) In the case of a letter of offer to sell any defense articles or services under this Act for $100,000,000 or more, and in the case of an application by a person (other than with regard to a sale under section 21 or 22 of this Act) for a license for the export of any defense articles or defense services sold under a contract in the amount of $100,000,000 or more, no such letter of offer or license (as the case may be) may be issued unless approved by joint resolution.".

By Mr. HEINZ:

S. 161. A bill to establish a program for repairing and replacing unsafe highway bridges; to the Committee on Public Works and Finance, jointly, by unanimous consent.

BRIDGE SAFETY ACT OF 1977

Mr. HEINZ. Mr. President, today I am introducing the Bridge Safety Act of 1977. This legislation is the result of months of study and consultation with highway and transportation officials throughout the country. It recognizes that the problem of unsafe bridges in the United States is so great that it will never be solved by piecemeal legislation.

This bill builds on the present Federal Aid Highway Assistance Act and makes the amount of money, $720 million per year, committed to the special bridge reconstruction and replacement program realistic and commensurate with the magnitude of the nationwide problem it is intended to solve.

It extends the highway trust fund through 1990, a time sufficiently long to get the job done. Most importantly, this legislation encourages the immediate repair of existing bridges, thus reducing the threat to human life. Also, by repairing these bridges now, the effect of inflation and cost of total replacement later will be greatly reduced.

As we begin to establish our priorities for the 95th Congress, I hope we take the time we need to act on legislation that is urgently needed to resolve the problem of unsafe bridges.

The current special bridge reconstruction and replacement program was established by Congress almost 10 years ago. The act was a direct result of the tragic collapse of the Silver Bridge in West Virginia which resulted in the deaths of 46 people. Since then estimates of critically deficient bridges have varied from 89,000—1970 Highway Needs Report—to 35,000—1975 Federal Highway Administration data.

Unsafe bridges have attracted the attention of the public. But I am afraid that Congress will not be moved to act on this critical issue until another major bridge disaster occurs and more lives are lost. We have already waited too long. It was as early as 1975 GAO reported to Congress that the bridge problem was—

. . . of such magnitude that the marshalling of all pertinent highway programs, including the safety programs, is needed to make any prompt progress.

At $180 million a year—about half the amount needed to replace or repair the bridges in Allegheny alone, my home county in Pennsylvania—the present program has not had sufficient funding. Nor does it have a workable matching ratio. The special bridge replacement program is not presently sufficient to meet today's needs. The estimated cost of replacing those bridges identified as being unsafe has been estimated between $10 and $31 billion plus additional costs as others become unsafe. It is unreasonable to believe that these costs could be met within this century without a massive increase in the annual funding level of the existing program. But without a change in the existing law, we are inviting tragedy. The potential danger of collapse, the traffic hazards at narrow and poorly aligned bridges reduce both the safety and the economic efficiency of the Federal-aid system.

To date, there have been only 670 bridges replaced under the Federal program, an annual rate of about only one bridge in each State. At this rate it will take a minimum of 80 years to bring our Nation's bridges to a standard of safety which citizens of this country have every right to expect. For those who remember the Silver Bridge and other disasters, 80 years is too long a time to gamble that more rotting bridges will not collapse.

The bill I introduce today will be of great benefit to all States. However, the bill recognizes that for various reasons, including their essentiality for public use, topography, population, length span, and load carrying capacity, certain States and counties depend on bridges much more than others. This bill directs the Department of Transportation to identify these areas and give first priority to those with the most critical need. Moreover, a certain percentage of the total appropriation each year will be set aside so that individual counties may apply for emergency funds, without respect to their State's appropriation.

I first introduced this legislation in the 94th Congress and received strong support from such well-respected groups as the National Association of Counties, Pennsylvania Parent-Teachers Association, the American Road Builders Association, and the Iron and Steel Institute. This support, I believe, is based on the fact that this bill would not only attack the problem of unsafe bridges but would also have a direct impact on unemployment. In fact, a Library of Congress analysis estimated that this legislation would create approximately 34,000 jobs of 1 year's duration.

This would include 17,136 onsite jobs and 17,280 offsite jobs per year. Also, it has been estimated that an additional 48,000 jobs might be created over a several year period for each $720 million outlay, due to the multiplier effect of such an expenditure.

Mr. President, the Bridge Safety Act of 1977 is aimed at solving a national problem. All over this country unsafe "killer bridges" present a clear and present danger. Immediate action on a comprehensive solution is absolutely vital.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the bill introduced by the Senator from Pennsylvania (Mr. HEINZ) be referred jointly to the Committee on Public Works and the Committee on Finance.

The PRESIDING OFFICER. Without objection, it is so ordered.

By Mr. HUDDLESTON (for himself and Mr. FORD):

S. 162. A bill to exempt normal farming and forestry activities from permit requirements for discharges of dredged or fill materials, and for other purposes; to the Committee on Public Works.

Mr. HUDDLESTON. Mr. President, despite strong efforts by many during the last Congress, a clear-cut decision could not be reached on how best to implement or revise the regulations promulgated under section 404 of the Federal Water Pollution Control Act (P.L.

92–500). My colleagues will remember section 404 as that section of Public Law 92–500 listing the requirements for the permits necessary for so-called dredge and fill operations affecting navigable waters and adjacent wetlands. As it now stands the Corps of Engineers is responsible for regulation of such activities.

Quite unfortunately in my view, the corps now has in place regulations which demand extensive conditions to be met before any type of dredge and fill operations can be used in the production of food, fiber, and forest products. In a U.S. Department of Agriculture analysis it is estimated that our Nation's farmers must file some 360,000 permit applications each year in order to meet present corps' requirements. Alone, the delays in farming production activities caused by the processing time for these applications 4 months or more, highlight the absurdity of the present situation.

The bill I introduce today will exempt from the corps' burdensome requirements agricultural, ranching, or sivilcultural lands. Also excluded from the permit requirements are federally assisted projects which must already file tremendous amounts of environmental justification material with the Congress, which in turn must approve or reject funding the project on its merits.

It is not my intention to tamper with the definition of navigable waters, nor is it my intention to open the door to widespread dumping of dredge and fill material.

Rather, what I want to do is simply this—allow farming, soil and water conservation, and forestry practices to be undertaken without unnecessary burdensome Federal regulation.

I believe it is outrageous that under present regulations farmers in the western portion of my State, much of which is a wetlands area, can now be forced to obtain a Federal permit before fencing, constructing a farm building, or installing a conservation measure in their drive to increase production of food and fiber products.

My bill sets reasonable parameters within which farmers can operate without exposing our Nation's wetlands to danger from discharges of excessive amounts of dredge and fill materials. Therefore I urge prompt action on this bill by the committees of jurisdiction.

By Mr. STEVENS:

S. 163. A bill to amend the National Forest Management Act of 1976 to classify the State of Alaska as all other States are classified with respect to the building of certain roads by the Secretary of Agriculture for purchasers of timber qualifying as small business concerns; to the Committee on Agriculture and Forestry.

Mr. STEVENS. Mr. President, today I am introducing a bill which would amend the National Forest Management Act, Public Law 94–588, to allow lumber companies in Alaska, which qualify as small business concerns to request that the U.S. Forest Service construct logging roads.

This bill simply classifies Alaska in the same category as the rest of the States in the Union. When the National Forest Management Act passed in the 94th Congress, the act allowed in section 14(i)(1) timber companies, which qualify as small businesses in the rest of the United States, to request that the Forest Service construct logging access roads for them. However, Alaska was excluded during the conference committee which was held on this bill. No explanation was given in the bill or its report for this exclusion and there is no justification for this exclusion. Therefore, I am introducing this bill to correct the matter.

Loggers in Alaska need the benefits of this provision as much, if not more, than other States, since our cost of living is much higher. Also it costs Alaska loggers much more than their competitors to ship to markets.

It is extremely important to Alaska to give our developing timber industry the same advantages as the rest of the United States. In order for Alaskan industry to compete in the national market we must not hinder their access to the resources. Allowing the Forest Service to construct logging roads for small timber companies in Alaska will not only allow them to compete economically, it will also insure that the roads are built in the most ecologically sound manner possible.

I hope to see quick consideration for this bill during this session.

I ask unanimous consent that this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 163

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 14(1)(1) of the National Forest Management Act of 1976 (P.L. 94–588; 90 Stat. 2949) is amended by striking out the colon and all remaining material in paragraph (1) and substituting in lieu thereof a period.

By Mr. STEVENS (for himself and Mr. GRAVEL):

S. 164. A bill to establish the Seward National Recreation Area in the State of Alaska, and for other purposes; to the Committee on Interior and Insular Affairs.

Mr. STEVENS. Mr. President, I am pleased to introduce today for myself and my colleague, Senator GRAVEL, a bill to establish the Seward National Recreation Area.

The bill would establish a Seward National Recreation Area encompassing spectacular forests, glaciers, lakes, rivers, wildlife, and other resources in the Chugach National Forest and nearby lands on the Kenai Peninsula in Alaska. It would contain approximately 1.4 million acres and would be administered by the Secretary of Agriculture as a part of the Chugach National Forest.

Rich in history, spectacularly beautiful, the Seward National Recreation Area contains a wealth of recreation resources and opportunities. Its boundary lies about an hour's drive away from Anchorage, which is Alaska's most populous city, and the air crossroads of the world.

The story of civilization within the proposed recreation area began in the late 1700's. The fur of the sea otter attracted Siberian fur hunters and Russian traders, who enlisted as hunters the original inhabitants of the region—the Kenaitze Indians. In the 1850's, gold was first discovered, and in 1880, the town of Hope welcomed discovery at Resurrection Creek which started a human stampede in search of the precious metal.

Wildlife is a main attraction of the area. Moose wander near the main roads at certain times of the year, and Dall sheep and mountain goats can be seen on the steep mountain slopes. There are black bear, brown bear, and abundant porcupines and grouse. Hunting is good and fishing very popular, particularly when the salmon are running.

Most of the recreation area is rugged mountainous terrain with a maximum elevation of around 6,000 feet. The combination of mountain, lakes, streams, glaciers, and a variety of vegetative cover, produce a striking and varied landscape.

Ice fields and glaciers are prevalent. The recreation area includes one of the largest ice deposits in North America, the Harding Ice Field. It also contains one of the major established glacial attractions in Alaska—the Portage Glacier. This outstanding geological feature draws thousands of persons each year from all sections of the Nation and from many parts of the world. From a parking lot observation point on the western edge of Portage Lake one can get an excellent view of the face of the glacier, the expanse of the lake itself, and the steep surrounding mountains. The unique feature of this panorama, however, is the floating mass of gigantic icebergs which regularly calve off the face of the glacier. These irregular chunks of ice drift across the lake and come within close range of the observation point. Few other places in the world afford such a closeup view of icebergs from a vantage point on land.

This bill is patterned after legislation which established other national forest recreation areas. During the 94th Congress this bill passed in the Senate in the form of S. 847. The bill directs the Secretary of Agriculture to manage recreation areas for public outdoor recreation benefits and conservation of biotic, scenic, scientific, geologic, historic, and other values. Management, utilization, and disposal of natural resources are permitted so long as they are compatible with the recreational purposes and programs in the area. Minerals are withdrawn from location and entry under the mining laws, but can be leased or removed under permits by the Secretary of the Interior if the Secretary of Agriculture determines these would have no significant adverse effects on administration of the area. Permits and leases can contain conditions prescribed by the Secretary of Agriculture to protect the area's resources.

The Secretary is also directed to cooperate with the State of Alaska and its subdivisions in administering the area.

Copies of a map of the proposed national recreation area are available in the office of the Chief of the Forest Service in Washington and in the Alaska Regional Forester's office in Juneau.

Mr. President, enactment of this bill will bring an important new concept to bear in the management of Federal recreation resources in Alaska. This will establish the 1st Federal recreation area in the 49th State. We hope for and look forward to its early consideration.

I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 164

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in order to provide for the public outdoor recreation use and enjoyment of certain spectacular forested areas, geological areas, lakes, rivers, and streams, and other recreational features and resources on the Kenai Peninsula in the State of Alaska by present and future generations and the conservation of scenic, scientific, historic, geologic, and other values contributing to public enjoyment of such lands and waters, there is hereby established, subject to valid existing rights, the Seward National Recreation Area (hereinafter referred to as the "recreation area"), comprising approximately one million four hundred thousand acres. The boundaries of the recreation area shall be those shown on the map entitled "Proposed Seward National Recreation Area", dated November 1975, which is on file and available for public inspection in the Office of the Regional Forester, Alaska Region, and in the Office of the Chief, Forest Service, United States Department of Agriculture.

SEC. 2. The administration, protection, and development of the recreation area shall be by the Secretary of Agriculture (hereinafter called the "Secretary") in accordance with the laws, rules, and regulations applicable to the national forest system, in such manner as in his judgment will best provide for (1) public outdoor recreation benefits; (2) conservation of biotic, scenic, scientific, geologic, historic, and other values contributing to public enjoyment; and (3) such management, utilization, or disposal of natural resources as in his judgment will promote or are compatible with, and do not significantly impair the purposes for which the recreation area is established.

SEC. 3. Within one year after the effective date of this Act, the Secretary shall publish in the Federal Register a detailed description of the boundaries of the recreation area and such description shall have the same force and effect as if included in this Act: *Provided, however,* That correction of clerical and typographical errors in such legal description may be made.

SEC. 4. Within the boundaries of the recreation area the Secretary is authorized to acquire lands, waters, or other property, or any interest therein, in such manner as he considers to be in the public interest to carry out the purposes of this Act. Any lands, waters, and interests therein owned by or under the control of the State of Alaska or any political subdivision thereof may be acquired by donation only. Lands acquired by the Secretary within the recreation area shall become part of the recreation area and of the Chugach National Forest.

SEC. 5. The Secretary shall permit hunting, fishing, and trapping on the land and waters under his jurisdiction within the recreation area in accordance with applicable Federal and State laws; except that the Secretary may issue regulations designating zones where and establishing periods when no hunting, fishing, or trapping shall be permitted for reasons of public safety, administration, fish or wildlife management, or public use and enjoyment. Except in emergencies, any regulations pursuant to this section shall be issued only after consultation with the Alaska Department of Fish and Game.

SEC. 6. The lands within the recreation area, subject to the valid existing rights, are hereby withdrawn from location, entry, and patent under the United States mining laws. The Secretary of the Interior, under such regulations as he deems appropriate, may issue permits or leases for the removal of the nonleasable minerals from lands or interests in lands within the recreation area, and he may permit the removal of leasable minerals from lands or interests in lands within the recreation area in accordance with the Mineral Leasing Act of February 24, 1920, as amended (30 U.S.C. 181 et seq.), or the Acquired Lands Mineral Leasing Act of August 7, 1947 (30 U.S.C. 351 et seq.), if the Secretary of Agriculture finds that such disposition would not have significant adverse effects on the administration of the recreation area: *Provided,* That any lease respecting such minerals in the recreation area shall be issued only with the consent of the Secretary of Agriculture and subject to such conditions as he may prescribe. All receipts derived from permits and leases issued under the authority of this section for removal of nonleasable minerals shall be paid into the same funds or accounts in the Treasury of the United States and shall be distributed in the same manner as provided for receipts from national forests. Any receipts derived from permits or leases issued on lands within the recreation area under the Mineral Leasing Act of February 25, 1920, as amended, or the Act of August 7, 1947, shall be disposed of as provided in the appliable Act.

SEC. 7. The jurisdiction of the State of Alaska and the United States over waters or any stream included in the recreation area shall be determined by established principles of law. Nothing in this Act shall constitute an express or implied claim or denial on the part of the Federal Government as to exemption from State water laws.

SEC. 8. The Secretary shall cooperate with the State of Alaska or any political subdivisions thereof in the administration of the recreation area and in the administration and protection of lands within or adjacent to the recreation area owned or controlled by the State or political subdivisions thereof. Nothing in this Act shall deprive the State of Alaska or any political subdivision thereof of, its right to exercise civil and criminal jurisdiction within the recreation area, or of its right to tax persons, corporations, franchises, or other non-Federal property, including mineral or other interests, in or on lands or waters within the recreation area.

SEC. 9. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

By Mr. MATSUNAGA:

S. 167. A bill to provide for a congressional scholarship program; to the Committee on Labor and Public Welfare.

CONGRESSIONAL SCHOLARSHIP ACT

Mr. MATSUNAGA. Mr. President, to enable many deserving high school seniors with outstanding records of scholastic achievements to pursue advanced training and education in institutions of higher learning, I am introducing today a bill to establish a congressional scholarship program.

Patterned after the selection process for military academy appointees, the program would be open to all qualified applicants, regardless of financial status. The emphasis will be on recognition and encouragement of scholastic achievement.

Inflated and rising costs of a college education presently thwart many deserving high school graduates from pursuing advanced training and learning in their prime areas of interest and talent because their family resources disqualify them for public and private scholarship awards or loans.

The program, as designed by my bill, would grant an annual award of $5,000 for a maximum of 4 years to a total of 5 qualified young people from each congressional district, including the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and the Commonwealth of the Northern Marianas. This award would be based on academic achievement, scholastic aptitude test, and preliminary scholastic aptitude test scores. The student's financial need would play no part in the selection process. Scholarship recipients would be selected by a committee comprised of the school superintendents and principals from each congressional district.

The bill would be in keeping with the overall purpose and objective of providing quality education to meet the needs of all students, regardless of their financial resources. It would aim to train, educate, and develop those who have shown the greatest potential for academic excellence and national leadership in their respective fields.

By Mr. STONE:

S. 168. A bill to deny Members of Congress any increase in pay under any law passed, or plan or recommendation received, during a Congress unless such increase is to take effect not earlier than the first day of the next Congress; to the Committee on Post Office and Civil Service.

Mr. STONE. Mr. President, in July 1975, Congress voted to link the salaries of Members of Congress to those of general schedule Federal employees for the purpose of obtaining automatic, annual cost-of-living increases. No one would argue that Members' salaries do not need periodic revision, but in this instance, when the country was in the grips of recession and everyone agreed Federal spending had to be kept to a minimum, the timing and the method could not have been worse. It looked particularly odious to the public to see newly elected, first-term Members voting themselves a raise.

In September of 1975 a bill was introduced which would have amended the Legislative Reorganization Act of 1946 to prevent Members of Congress from receiving salary increases during the Congress in which the increase was enacted. The bill provided that a general election must fall between the time when a congressional pay increase is voted upon and the time when it goes into effect. I am introducing a similiar bill this session. This legislation does not address itself to the merits of any specific

increase, just the timing of any future ones.

In conjunction with this bill I am also reintroducing a resolution to amend the Constitution with regard to Members' salaries. The amendment that I am proposing is not new. The idea of placing constitutional restraints on Members' ability to increase their own salaries is almost as old as the Constitution itself.

Nearly 200 years ago, in the House of Representatives, James Madison proposed a number of amendments to the newly adopted U.S. Constitution. Twelve of these amendments were passed by the House and the Senate and sent on to President Washington in 1791 for transmission to the States. Ten of the amendments were ratified by the requisite 11 States and became our Bill of Rights. One of the two amendments that failed should have been ratified, in the opinion of this Senator. The text of that amendment was simple and direct; it provided that:

No law, varying the compensation for the services of the Senators and Representatives, shall take effect, until an election of Representatives shall have intervened.

There are several reasons why I feel a constitutional amendment is needed in addition to the change in the 1946 Reorganization Act. The first is the permanence of a constitutional amendment. Only once in our history has an amendment to the Constitution been repealed. The accompanying bill, which would be instrumental in implementing the amendment once it is ratified and which would fill the gap between the time of passage by the Congress and ratification by the States, could be changed as easily as the Federal Salary Act of 1967 was in July 1975.

The second reason is to rectify a mistake made back in the early history of our Nation. Only 6 of the then 14 States ratified the amendment when it was offered back in 1791. The 12 amendments were offered as a group. They were to be a "bill of rights" which many States felt was a necessary addition to the Constitution. The two amendments which failed were not regarded as fundamental individual rights and, therefore, were not considered proper for a "bill of rights." Additionally, some States did not think that there should be any amendments to the Constitution because they feared it would endanger the stability of the new Government. Three of these original States did not ratify any of the first 12 proposed amendments until 1939.

My third reason for introducing a constitutional amendment is that the two approaches—statutory and constitutional—are not mutually exclusive, but are complementary. Approaching the problem in two ways makes it more likely that one of the approaches will succeed.

Public sentiment is now clearly antagonistic to Government. When Congress acts as it did last session to tie its salary to general schedule Federal employees for the purpose of obtaining cost-of-living increases, the public has reason to feel distrustful. I do not think that the Congress has often abused its power in this regard, but many people in this country are wary of the potential for abuse. As James Madison said in his statement of introduction to the amendment in the House of Representatives:

Perhaps of all the powers granted, it is least likely to abuse; but there is a seeming impropriety in leaving any set of men without control to put their hand into the public coffers, to take out money to put in their pockets; there is a seeming indecorum in such power, which leads me to propose a change.

Time has borne out Madison's sense of the impropriety of the situation. Obviously Congress must always take ultimate responsibility for increasing Members' salaries. My amendment would not take away that responsibility, but it does relieve newly elected Members of having to vote on immediate salary increases for themselves and, theoretically at least, relieves all Representatives of necessarily voting themselves a raise.

Mr. President, I ask unanimous consent that the text of the bill and the joint resolution be printed in the RECORD.

There being no objection, the bill and joint resolution were ordered to be printed in the RECORD, as follows:

S. 168

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 601 (a) of the Legislative Reorganization Act of 1946 (2 U.S.C. 31) is amended by adding at the end thereof the following new paragraph:

"(3) Notwithstanding paragraphs (1) and (2) of this subsection, section 225 of the Federal Salary Act of 1967, or any other provision of the law, an individual referred to in paragraph (1) may not have his rate of pay increased—

"(A) by or under any law passed during a Congress;

"(B) under paragraph (2) of this section (except to the extent subparagraph (A) of this paragraph applies), if an alternative plan transmitted by the President under section 5305(c)(1) of title 5, United States Code, does not take effect by reason of the adoption during a Congress of a resolution disapproving such plan; or

"(C) under recommendations taking effect under section 225 of the Federal Salary Act of 1967 which were transmitted by the President during a Congress;

unless such increase is to take effect not earlier than the first day of the next Congress."

SEC. 2. The amendment made by the first section of this Act shall apply with respect to laws passed by either House of Congress after June 30, 1975, and alternative plans and recommendations regarding pay transmitted by the President after such date.

S.J. RES. 5

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, (two-thirds of each House concurring therein), That the following article is proposed as an amendment to the Constitution of the United States, to be valid only if ratified by the legislatures of three-fourths of the several States within seven years after the date and final passage if this joint resolution:

"ARTICLE —

"SECTION 1. No law varying the compensation for the services of the Senators and Representatives, shall take effect until an election of Representatives shall have intervened.

"SEC. 2. Congress shall have the power to enforce this article by appropriate legislation.".

By Mr. CRANSTON (for himself and Mr. WILLIAMS):

S. 169. A bill to improve education by increasing the freedom of the Nation's teachers to change employment across State lines without substantial loss of retirement benefits through establishment of a Federal-State program; to the Committee on Labor and Public Welfare.

MOBILE TEACHERS' RETIREMENT ASSISTANCE ACT

Mr. CRANSTON. Mr. President, I am today introducing the Mobile Teachers' Retirement Assistance Act of 1977.

Joining me as cosponsor is the distinguished chairman of the Senate Committee on Labor and Public Welfare, Senator HARRISON A. WILLIAMS, JR.

The bill is to protect the retirement benefits of teachers who move across State lines to teach. It is identical to legislation I cosponsored with Senator WILLIAMS in the 92d, 93d and 94th Congresses.

It is my fervent hope, Mr. President, that the 95th Congress will enact this legislation. It addresses a serious and growing problem: The inability of teachers to carry earned retirement benefits with them across State lines, thereby hampering employment opportunities wherever they might occur.

Mr. President, the Federal interest in quality education is not limited to materials and programs. The Congress has made a definite and continuing commitment—through the Education Professions Development Act of 1967, the Smith-Hughes Act of 1917, and the National Defense Education Act of 1958—to the development and maintenance of a skilled national teaching force to serve every level of American education.

There are some serious problems in the teaching profession right now. There are problems of severe unemployment, inequitable pay, of class size, and of working conditions, particularly in our inner cities.

And one of the most serious problems, Mr. President, is the long-standing difficulty of mobility within the profession itself. The average American family moves once every 5 years. That means that a great many American children change schools every year and often more than once within a single year. And more and more, as we address the problem of equality of educational opportunity, we have to think in terms of a national supply and demand in the education professions, with all the problems of the labor marketplace. I believe it is both unrealistic and costly, Mr. President, to recognize—and in many ways, promote—a national mobility, without making sure that the teachers of the Nation's children have the ability

to move, unimpeded, where the demand for their skills is greatest or where their professional interests direct them. That is not possible now. And that is why I am introducing this bill.

In California, about half of California's 218,895 elementary, secondary, and community college teachers taught in other States before moving to California. Nationally, 26 percent of America's teachers have taught in at least two States. Those teachers, who spent an average of 8 years working in other States, lost their retirement benefits when they moved. That loss of benefits means reduced pensions when they retire and discourages teachers with special talents from moving to locations where these talents can be better utilized.

Right now, teachers who become mobile do so at the price of sacrificing hard-earned retirement rights—and, with them, benefits and financial security for their retirement years. The loss of these retirement credits comes about for two reasons: The "outgoing" State may not allow for early vesting of retirement credit for years of teaching service performed outside its jurisdiction. A good example of the effect of this is the college teacher in a public college who wishes to cross State lines to accept a special research function in another State college. Without the provisions just outlined, he is forced to reject the offer or lose his retirement rights in accepting it. His counterpart in the private college is generally free to move as he is needed and not sacrifice retirement rights. Another drastic example is the need for specialized teachers or administrators in our deprived urban and rural areas. Even social security is denied many American teachers with participation denied them in 14 States, because of their participation in a State retirement program that lacks that portability of a Federal pension program.

Several effects of this misguided policy are immediate and clear:

Teachers may choose not to cross State lines to teach, even though their skills and interests beckon elsewhere.

Teachers may choose not to retire when they would like, but keep teaching, to accumulate more years of credit—particularly if they have lost years of credit by making a move. Teachers are penalized, then, for advancement within their own profession, and younger teachers are kept unemployed by colleagues who would rather retire.

The dilemma is no better expressed than by teachers themselves. Listen to these comments from letters written me by California teachers.

From San Diego:

I have been teaching for eighteen years and find myself with only four years credited to my eventual retirement. . . . My previous teaching was done in Iowa and in American Samoa, and when I accepted a teaching position in the San Diego Unified system I lost the contributions made toward retirement made by those systems.

From Fresno:

My Washington teaching was during the low wages era ($750–$2000 annually) with big classes, poor equipment, long hours. . . . Our married years in Los Angeles, I did classroom volunteer work among several handicapped children, daily until my husband's death. . . . Now I am penalized with few retirement years' credit, thus an inadequate pension . . .

Or from Long Beach:

When I had been out of Missouri 5 years, I was contacted and asked to draw my accumulated retirement out . . . the amount was of no concern to me then, or now, but the 9 years of teaching experience means a great deal.

Mr. President, I believe this situation is not only unfair, but unwise. By failing to act on this problem, now we deny our active public teachers the ability to provide equitably for their retirement. At the same time, I believe we are storing up for the future a massive national problem, as increasing numbers of mobile teachers, denied the benefits of social security because of their participation in a State retirement program, come to retirement with inadequate resources to meet the basic needs of everyday living.

The bill I am introducing today is of enormous importance to teachers across the Nation. Teachers constituents of every Senator and Congressman would be profoundly affected by passage of my bill. In my State of California alone, over 100,000 teachers have taught in other States, but cannot obtain credit under the California State Teachers Retirement System. Though no State corrective legislation has been passed, the California Assembly has adopted a resolution supporting the bill I am introducing today.

The bill would establish a Federal-State program to assist in the funding of these benefits for public schoolteachers. It would enable teachers who have taught in two or more States to retire at the end of their careers with benefits substantially the same as they would have received by teaching in a single State for their entire careers.

The bill would extend Federal funds to aid in the financing of recognized out-of-State service credit for those States who wish to participate. In order to qualify for Federal funds, participating States must by law: First, permit teachers to purchase at least 10 years of out-of-State public school teachings not vested elsewhere, whereby the teacher and the employer share in the cost; and second, provide for vesting of retirement rights after not more than 5 years of service in the retirement system.

The stranglehold on the natural mobility of the teaching profession will be greatly alleviated by this sharing of cost in purchasing out-of-State credit and the security of early vesting for deferred benefits.

Many of our fine State retirement systems have made attempts toward alleviating this problem, but the State based nature of American education and the limited funds available have not permitted the States to make any great strides in this direction. Some States utilize the basic concept of out-of-State credit; however, in nearly all cases, the teacher must pay the employer's share, his own share, and an interest fee, which, taken together, are usually financially beyond the limits of the teacher's income.

It should be noted that in any State where an attempt is made to preserve the retirement credits for mobile teachers the methods used are the methods used in this bill. The teacher retirement administrators throughout the country have supported these concepts for nearly a quarter of a century. However, the States, and rightly so, realize that their primary commitment is to utilize their financial resources for improving education within their own boundaries. Therefore, it seems both fitting and proper that the Federal Government assist the States in solving this important interstate problem.

As pointed out by James R. Kirkpatrick, associate secretary of the American Association of School Administrators—an organization supporting the bill—mobility is very much a part of the American way of life. This freedom of movement has often been employed to solve imbalance of labor shortages and needs in various parts of the country. Until now, however, retirement considerations have hindered the staffing problems in many school districts, which mobility might solve.

These considerations have been a significant deterrent for many school districts in achieving the staff skills and qualities that are critical to our educational system.

As one witness observed when hearings were held in the House, the bill is sensitive to State prerogatives and the value of State retirement systems. It is not compulsory. It is an incentive bill, which I believe to be most appropriate for Federal legislation in this and other areas of education.

The bill is a result of long and hard work by education organizations, Members and committees of Congress, and representative teacher groups. It carries the full support of the National Education Association's Representative Assembly, the National Council on Teacher Retirement, and other groups.

I feel this bill, if enacted, could be the most significant piece of legislation directly affecting teachers yet to emerge from the Congress.

Mr. President, I ask unanimous consent to have printed in the RECORD, following my remarks, the text of the bill, a statement of purpose and provisions, and a table showing the current status of vesting and out-of-State retirement systems to which teachers belong.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 169

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Mobile Teachers' Retirement Assistance Act".

FINDINGS AND STATEMENT OF PURPOSE

SEC. 2. The Congress finds that the transfer of qualified teaching personnel between schools operated by public educational agencies in one State and schools operated by public educational agencies in another

State is seriously impeded because of the possibility of forfeiture of retirement benefits in the system from which a teacher transfers and that the resulting immobility of teachers impedes the mobility of the Nation's work force by hindering the growth and development of new communities. It is therefore the purpose of this Act to protect commerce by facilitating the interchange of teaching personnel from a public educational agency in one State to a public educational agency in another State by providing Federal financial assistance in the transfer of credits from one State to another State.

DEFINITIONS

SEC. 3. For purposes of this Act—

(1) The term "State retirement system" means a State retirement system established under State law, or local public retirement system recognized or established by State law, in which teachers participate.

(2) The term "teacher" means an individual who is employed in a professional educational capacity by a board of education.

(3) The term "covered teacher" means a teacher who is a member of a State retirement system.

(4) The term "board of education" means any board, committee, commission, or agency authorized by State law to direct a public educational system, school, or institution of higher education.

(5) The term "State" includes the District of Columbia and Puerto Rico, and any other territory of the United States which has a public retirement system which includes teachers.

(6) The term "Commissioner" means the United States Commissioner of Education.

(7) The term "out-of-State service" means public teaching service performed in another State or in elementary or secondary schools operated by the United States Department of the Interior and United States Department of Defense and recognized by the system in which the teacher is a member for the purpose of service credit under the terms and conditions of the law governing the operation of such system.

(8) The term "vesting" means a right of a teacher who separates from covered employment after having at least the minimum years of credited service required under the State retirement system, and has left his contributions in the retirement fund of such system, to a retirement benefit upon reaching an age specified in the law governing the terms and conditions of the system, which benefit is based at least in part on public contributions.

SEC. 4. (a) In order to participate in the program provided for in this Act, a State retirement system must—

(1) provide for payment of retirement benefits on account of out-of-State service by a covered teacher as required in section 5(c),

(2) allow covered teachers at least ten years of out-of-State credit for public teaching service not covered by the system which is not vested under another State retirement system, upon payment by the covered teacher by the date of retirement of a portion of the cost involved and payment from public funds of the remainder,

(3) require no more than one year of in-State service for each year of out-of-State service credit granted,

(4) provide that the teacher's payment for out-of-State service credit shall not exceed 25 per centum of the total cost of the out-of-State service credit,

(5) provide for vesting after not more than five years of creditable service in the State retirement system,

(6) provide for making such reports, in such form and containing such information, as the Commissioner may reasonably require to carry out his functions under this Act, and for keeping such records and for affording such access thereto as the Commissioner may find necessary to assure the correctness and verification of such report.

(b) If the Commissioner determines a State retirement system meets the requirements of subsection (a), he shall approve it for participation in the benefits of this Act.

OUT-OF-STATE CREDIT PROVISIONS

SEC. 5. (a) The Commissioner shall, as soon as practical after the end of each calendar year, make a Federal contribution to each State retirement system which he has approved under section 4(b) on account of each covered teacher who is a member of the system who retired during the fiscal year (or other twelve-month period designated by the system) which ended in such calendar year with credited out-of-State service as a teacher. The Federal contribution on account of each year of each such teacher's credited out-of-State service as a teacher shall be an amount equal to 50 per centum of the total cost as determined by the retirement system at such teacher's age on date of retirement: *Provided*, That if the teacher has not reached age sixty, the cost shall be determined as if the teacher were age sixty.

(b) The Federal contribution under this section to a State retirement system shall be limited to the reserve required to provide not more than ten years of out-of-State service credit: *Provided*, That the Commissioner may determine maximum reserve factors at each age, beginning at age sixty, for purposes of the Federal contribution.

(c) The Federal contribution under this section to a State retirement system shall be used for the same purposes, and subject to the same terms and conditions, as are funds of the system derived from other sources. Retirement benefits under such system attributable to service credited under this section shall not be paid on a basis less favorable to the retired teacher than the payments made under such system which are attributable to service other than that so credited.

COST OF ADMINISTRATION

SEC. 6. The Commissioner shall each fiscal year make a grant to each State retirement system which is approved to participate in this Act. Each such grant shall be an amount equal to 2 per centum of the Federal contribution made under section 5.

EFFECTIVE DATE

SEC. 7. This act shall become effective October 1, 1977, with respect to teachers who retire on or after such date.

APPROPRIATIONS AUTHORIZED

SEC. 8. For the purpose of making such Federal payments, there is hereby authorized to be appropriated for the fiscal year ending September 30, 1978, and for each succeeding fiscal year the amount necessary to effectuate the provisions of this Act.

MOBILE TEACHERS' RETIREMENT ASSISTANCE ACT

PURPOSE

To permit teachers to change employment across State lines without substantial loss of retirement benefits.

To participate in the program provided for in this act, a State retirement system must:

(1) Provide for payment of retirement benefits on account of out-of-State service by a covered teacher;

(2) allow covered teachers at least 10 years of out-of-State credit for public teaching service not covered by the system which is not vested under another State retirement system, upon payment by the covered teacher by the date of retirement of a portion of the cost involved and payment from public funds of the remainder;

(3) require no more than 1 year of in-State service for each year out-of-State service credit granted;

(4) provide that the teacher's payment for out-of-State service credit shall not exceed 25 percent of the total cost of the out-of-State service credit;

(5) provide for vesting after not more than 5 years of creditable service in the State retirement system;

(6) provide for making such reports, in such form and containing such information as the Commissioner may reasonably require to carry out his functions under this act.

OUT-OF-STATE CREDIT PROVISIONS

(a) The Commissioner will make an annual Federal contribution to each qualified State retirement system on account of each covered member teacher with credited out-of-State service who has retired during any 12-month period as designated by the system. For each year of credited out-of-State service, the Federal payment will be an amount equal to 50 percent of the total cost as determined by the retirement system at such teacher's age on date of retirement, provided that if the teacher has not reached age 60, the cost shall be determined as if the teacher were age 60.

(b) The Federal contribution to a State retirement system shall be limited to the reserve required to provide not more than 10 years of out-of-State service credit; provided that the Commissioner may determine maximum reserve factors at each age, beginning at age 60, for the purpose of the Federal contribution.

(c) Federal contributions to a State retirement system must be used for the same purposes and be subject to the same terms and conditions as funds derived from other sources and may not be paid on a basis less favorable to the retired teacher.

TABLE 1.—VESTING PROVISIONS AND MAXIMUM OUT-OF-STATE SERVICE IN STATE AND LOCAL RETIREMENT SYSTEMS TO WHICH TEACHERS BELONG

Retirement system (1)	Type of membership [1] (2)	Years of service and/or age requirements for vesting [2] (3)	Maximum years of out-of-State service creditable (4)
1. STATEWIDE RETIREMENT SYSTEMS			
Alabama	T	(a) 15 years at any age; (b) 10 years if in service at age 55.	None.
Alaska [3]	T	10 years	10 years.
Arizona	P	5 years	None.
Arkansas	T	(a) 20 years at any age; (b) 10 years, age 60.	10 years.
California [3]	T	5 years	None.
Colorado [3]	P	do	Do.
Connecticut [3]	T	10 years	10 years (reciprocal).
Delaware	P	20 years	None (4 years may be counted toward 30 years' service retirement requirement).
Florida [4]	P	10 years	None.
Georgia	T	20 years	10 years (reciprocal).
Hawaii	P	5 years	None.
Idaho	P	10 years	Do.

Footnotes at end of table.

TABLE 1.—VESTING PROVISIONS AND MAXIMUM OUT-OF-STATE SERVICE IN STAT E AND LOCAL RETIREMENT SYSTEMS TO WHICH TEACHERS BELONG—Continued

Retirement system (1)	Type of membership [1] (2)	Years of service and/or age requirements for vesting [2] (3)	Maximum years of out-of-State service creditable (4)
Illinois [3]	T	5 years	10 years.
Indiana	T	(a) 15 years' service and age 50; (b) 10 years at age 65.	8 years (limit may be exceeded under certain circumstances.)
Iowa	P	(a) 8 years; (b) age 55 regardless of years of service.	None.
Kansas	P	10 years	Do.
Kentucky [3]	T	5 years	8 years.
Louisiana [3]	T	(a) 20 years; (b) 10 years if teacher withdraws to enter public-school teaching in another State.	None.
Maine [3]	P	10 years	10 years.
Maryland	T	15 years	5 years.
Massachusetts [3]	T	(a) 20 years; (b) 6 years if if position is abolished or the teacher not reemployed.	10 years.
Michigan	S	(a) 25 years; (b) 10 years and age 50.	15 years.
Minnesota	T	10 years	None.
Mississippi	P	(a) 20 years for full vesting; (b) 16 years for partial vesting.	Do.
Missouri	T	20 years	10 years.
Montana	T	5 years	5 years.
Nebraska	S	5 years	10 years.
Nevada	P	(a) 20 years for full vesting; (b) 15 years with partial benefit.	None.
New Hampshire	P	15 years	Do.
New Jersey	T	do	10 years.
New Mexico	S	5 years	5 years.
New York	T	10 years	10 years.
North Carolina	P	12 years	None.
North Dakota	T	No vesting	Unlimited.
Ohio	T	5 years	None (unlimited credit allowed to meet the eligibility requirements for retirement in Ohio).
Oklahoma	S	20 years	5 years.
Oregon	P	5 years	None.
Pennsylvania	S	10 years	12 years.
Rhode Island	P	do	5 years.
South Carolina	P	15 years	Unlimited.
South Dakota	T	10 years	None.
Tennessee	T	(a) 10 years; (b) 4 years for college and university.	Do.
Texas	S	10 years	10 years.
Utah	P	No vesting	None.
Vermont	T	15 years	None (10 years toward 15-year eligibility for disability retirement).
Virginia	P	5 years	None.
Washington	T	do	Do.
West Virginia	S	20 years	Varies; on same terms as other States provide credit for West Virginia public school service.
Wisconsin	T	Immediate	None for members of combined group (with social security); out-of-State credit available to some separate group members under certain circumstances.
Wyoming	P	4 years	None.
Puerto Rico	T	10 years	Do.
2.-LOCAL RETIREMENT SYSTEMS			
California:			
Los Angeles	T	5 years	Do.
San Francisco	P	(a) 10 years; (b) if accumulated contributions exceed $1,000.	Do.
Colorado: Denver	S	10 years	None.
District of Columbia: Washington.	T	5 years	10 years.
Illinois: Chicago	T	(a) 20 years; (b) 10 years and age 55.	Do.
Iowa: Des Moines	T	20 years and age 45	None.
Maryland : Baltimore	P	No vesting	Do.
Michigan: Detroit	S	(a) 15 years' continuous service and age 50; (b) 25 years, with last 10 years continuous; (c) 15 years' continuous service and subsequent retirement from another public agency.	10 years; 15 years if service is in Michigan.
Minnesota:			
Duluth	T	No vesting	None.
Minneapolis	T	7 years	Do.
St. Paul	T	10 years	5 years.
Missouri:			
Kansas City	S	5 years and age 40	None.
St. Louis	S	5 years	Do.
Nebraska: Omaha	S	20 years	5 years.
New York: New York City.	T	15 years	15 years.
Oregon: Portland	T	5 years	None.
Tennessee: Knoxville	P	15 years	Do.
Wisconsin: Milwaukee	T	Immediate	Do.

[1] In this column, T=teachers and professional school employees only; S=all school employees; P=teachers and other public employees.
[2] The requirements listed are other than those needed for early retirement.
[3] No social security coverage.
[4] In December 1970, Florida consolidated its retirement systems. All new teachers will become members of this system and will automatically be covered by social security. Teachers under the old system had the opportunity to elect coverage in the new system and with it social security coverage.

By Mr. HUMPHREY (for himself, Mr. JAVITS, Mr. ABOUREZK, Mr. MATSUNAGA, Mr. CASE and Mr. INOUYE):

S. 170. A bill to provide meaningful and productive work for the Nation's youths and to provide comprehensive job counseling and placement services for youths, and for other purposes; to the Committee on Labor and Public Welfare.

COMPREHENSIVE YOUTH EMPLOYMENT ACT OF 1977

Mr. HUMPHREY. Mr. President, on Monday I introduced the Full Employment and Balanced Growth Act of 1977. This new version of the Humphrey-Hawkins bill establishes goals for full employment and for reducing inflation, and establishes new mechanisms for directing our economic policy toward achieving those goals

One of the most important sections of the Humphrey-Hawkins bill calls for Congress and the President to develop a comprehensive and effective program to reduce youth unemployment and to help youths cope with the many problems they face when they first enter the job market.

To fulfill this section, I am today introducing a companion bill to alleviate the problem of high unemployment among our Nation's youths—the Comprehensive Youth Employment Act of 1977.

My good friend, Senator JAVITS, who has been one of the most ardent and effective champions of young people during his distinguished career in the Senate, has worked very closely with me in preparing this legislation, and I am proud to be associated with him on this bill.

In addition, this bill has benefited from valuable discussions and comments from many State and local government officials across the Nation, from many youth service workers who have daily contact with unemployed and discouraged young people, and from concerned private citizens who have taken the time to write and talk about this problem.

PROVISIONS OF THE ACT

The Comprehensive Youth Employment Act of 1977 has three very important parts.

The first amends the Comprehensive Employment and Training Act by creating a new title VII—"Youth Employment and Community Service Programs"—which provides CETA prime sponsors with funds to establish a wide variety of programs for alleviating the employment problems faced by youths today. Enactment of this new title to CETA would provide four major new youth programs:

Youth community service. This program will give our Nation's unemployed youths the opportunity to work on useful and productive projects in their local communities. It will guarantee to young people who choose to participate an opportunity to do meaningful work and to gain job training and work experience. It will provide many youths with a sense of accomplishment and worth that could be the start of a lifetime of real productive contributions to our society. Furthermore, the program will provide important benefits to local communities receiving the human, social, and community services performed by the young people. The Youth Community Service will focus on work—good, hard productive work—for young people. And it will be meaningful work, accomplishing visible goals within the youth's own community.

Youth opportunities in private enterprise. The best training ground for many young workers is right where they will work as adults—in private enterprise. Our Nation's dynamic private businesses have an unlimited potential for providing productive, meaningful, and well-paid work for youths. What we must do is provide the right climate to bring employers together with the many young people who are ready, willing, and able to work but just need a little help.

Under the youth opportunities in private enterprise program, CETA prime sponsors will provide youths, and disadvantaged youths in particular, with all the support services they need to find and perform a job in private enterprise, such as counseling, remedial education, and transportation expenses, and will provide employers with all the services they need to hire and train a youth for a job.

In addition, prime sponsors can develop new work-study and apprenticeship arrangements under this program, and can subsidize the on-the-job training costs of youths.

Work experience for in-school youth. During the past few years, we have discovered that a great chasm exists between our schools and the workplace. Too many young people believe that school offers nothing that can be of use at work, and drop out with little or no preparation for a job. Many others graduate with no skills. And almost all have so little contact with work that they cannot make informed career choices, too often ending up in low-paying, dead-end jobs.

This program aims toward solving this problem by providing in-school youths with work experience through education-related part-time jobs with public and private employers. Training costs, guidance, counseling and other support services would be subsidized. The program would be directly administered by local educational agencies and would be fully integrated with, and give added meaning to, their educational programs.

Occupational information and career counseling. This program under the CETA prime sponsors, will focus entirely on the job counseling, job information, and job placement needs of our Nation's youths and young workers. It will place trained professional job counselors in our Nation's high schools and junior colleges, so that every youth will have ready access to someone who can help with career plans, educational plans, and job information, and someone who can actually help young people find the jobs they want and need. It will establish a national databank on entry-level jobs for youths; it will provide training opportunities for counselors; it will establish counseling offices in urban and rural neighborhoods to bring job counseling and placement services to areas where youth unemployment is disgracefully high; and it will put computer terminals into high schools and other convenient service offices so that interested youths can readily obtain information on job openings, job requirements, and job rewards.

The second part of the bill establishes a National Conservation Corps. The NCC would provide youths up to the age of 24 years with work and training on projects in our national parks, national forests and other public lands and waters, performing a wide variety of conservation work, such as reforestation, fire prevention, campground improvement, and soil erosion control. Most National Conservation Corps projects will be under the Secretaries of Agriculture and Interior, but State governments may apply for funds to carry out projects on State-owned parks and forests, and an innovative provision of this proposal would allow local governments to apply for funds to improve and conserve urban parkland. Any youth may participate in the corps, but preference is given to youths from areas with substantial or persistent unemployment.

The third part of the bill provides funds to double the size of the very successful Job Corps, in order to increase the assistance going to disadvantaged youths who need the most help to become employable.

THE PROBLEM OF YOUTH UNEMPLOYMENT

Mr. President, this is a particularly difficult time for a young person to be planning a career and looking for work in this country. Teenagers and young adults suffer from higher unemployment rates than any other group of workers. For example, almost 20 percent of our Nation's youth were unemployed at any one time during 1976, triple the rate for adults. For black youths in our central cities, the unemployment rate averaged a staggering 40 percent last year. This enforced idleness struck 3.5 million youths on the average last year—almost half the total number of jobless American workers. And the rest of this decade portends more of the same.

This is a terrible burden to place on our young people and our economy. It denies youths the opportunity to learn the responsibilities and rewards of work; it denies them job skills; and it tells them they have no productive role to play in our society. It wastes $40 billion in potential output per year. It means that future workers will be less skilled and less productive. And, it denies them the opportunity to begin moving up the ladder to more productive, more interesting, and more rewarding jobs.

Joblessness tells these young people that they have no productive role to fill in our society, that they have been rejected by society even though they desperately want to participate and have talents and energy galore to offer.

We may not be able to see the psychological and emotional damage, the insecurity, and the alienation unemployment causes young people, but we can see the skyrocketing crime rate it has caused among those under 25, and the increased drug and alcohol abuse among our Nation's youths.

It is also a terrible waste for our Nation's employers, who will find the young workers needed to expand production in the future less well-trained, less skilled, and less attuned to the needs of the workplace.

From any point of view, we have sorely neglected the job needs of our youths and it has been a big mistake.

A NATIONAL CALL FOR A YOUTH EMPLOYMENT ACT

It is time to correct this mistake.

Economic recovery alone will not solve the tragic problem of youth unemployment. Much youth unemployment is structural—the result of decaying cities, failing businesses, poor work skills and education, and artificial barriers which must be dealt with directly through specially-targeted youth employment programs. The vicious circle, whereby youths are denied jobs because they lack sufficient work experience and are thus unable to obtain the requisite experience, must be broken.

The severity of this problem has made passage of a comprehensive youth employment program a priority for a number of nationwide organizations that are directly concerned with the unemployment problems of youths.

Recently, the National Collaboration for Youth—an organization representing a number of nationwide youth groups, including the Boy Scouts, the Girl Scouts, the Boys Clubs, the Girls Clubs, the YMCA, the YWCA, the Red Cross, and other organizations—issued a position paper on youth which makes an eloquent plea for enacting a youth employment program. I would like to quote from this position paper:

Fundamental to finding and keeping a decent job is having adequate skills. The responsibility for developing the necessary competencies of reading, writing, comprehension and computational skills is clearly the responsibility of the publicly-financed education system. There is a growing consensus that changes are necessary in the general education system so that it will more effectively fulfill its mission to meet the needs of youth. Such preparation will reduce the number of young people who find themselves out of school and out of work—usually both—because of lack of adequate skills. Public support for the education system should stress this basic responsibility, with the recognition that the task may be more difficult than ever before as increased numbers of students stay longer in school without regard to their abilities, motivation or family encouragement.

If young people are kept in situations in which they are denied mature responsibilities and from which they are expected not to intrude on the adult world, they cannot gain the experience needed to become mature, self-reliant adults. They need opportunities for experiences that develop responsibility, self-reliance and initiative. Such opportunities abound in the programs of voluntary agencies, cooperative education programs and the full range of service opportunities. Expanded opportunities for community service, as part of the transition from school to work, would offer an individual the chance to develop a sense of responsibility and self-worth. Such service by young people, if responsive to community needs, might also engender more receptive attitudes towards young people among employers.

Another issue has been the failure to provide appropriate categories of employment for youth. Examples are part-time employment, jobs in which it is understood that training and development of workers is as important as immediate productivity, and jobs in which it is accepted that the young worker is experimenting with an occupation to explore its possibility for career commitment. There may be other alternative ways of structuring jobs so that there is a place for young people entering the job market. Federal funding could be used to ex-

plore alternatives and stimulate the development of such openings.

Finally, there is considerable evidence that employer attitudes toward young people may limit the hiring of them for any kind of job. Too often the individual employer views young people as a class lacking in maturity. Personnel practices will reflect that attitude. Direct appeals to employers with or without innovative government programs must be part of a national approach to the youth employment question.

At its 1976 convention, the U.S. Conference of Mayors—the organization which represents the elected officials who must live with the consequences of youth unemployment, the high crime, vandalism, alcoholism and drug abuse, and rising taxes—passed a major resolution on youth unemployment, and I would like to read that resolution for my colleagues:

Whereas, the future of our nation depends on the development of our youth; and

Whereas, chronic unemployment, now reaching a rate of 30–40%, exists among the youth of our cities; and

Whereas, youth are inadequately prepared during the school years for the world of work; and

Whereas, youth access to work and service experiences affording productive earning and learning opportunities is overly restricted; and

Whereas, there is an underdevelopment of both youth advocacy and representation of legitimate youth interest and needs; and

Whereas, conditions of poverty, unemployment, and dependency leave urban youth permanently disenchanted with the idea of full participation in the economic and social structure of this society; and

Whereas, our approach to youth problems is characterized by a patchwork of services and programs,

Now, therefore, be it resolved that the United States Conference of Mayors calls for Congress and the President to establish a comprehensive youth services policy, directed toward the educational, training, employment, and social needs of youth; and

Be it further resolved that such policy include:

Emphasis on improving and expanding the role of education in transitioning youth from school to work and in helping youth develop and achieve broader career objectives throughout their work years;

Programs combining training, work and service in both the public and private sectors;

Opportunities for work on urban restoration projects, community service programs, and rural conservation projects;

Improved access to health, recreational, social service, juvenile justice, and other programs available in the interest of health and productivity;

Development of research tools to measure the needs of youth and the kinds of resources required.

Be it further resolved that the United States Conference of Mayors supports increased funding of current employment programs under Title 111 of the Comprehensive Employment and Training Act of 1973; and

Be it further resolved that youth programs must include private sector and labor union involvement and experiences; and

Be it further resolved that the United States Conference of Mayors calls for the creation of a youth advocacy function—with policy and program responsibilities—at the highest levels of Federal Government with both private and public leaderships involved; and

Be it further resolved that the United States Conference of Mayors supports local youth programming to be managed by a wider authority, based on collaborative relationships among Local Elected Officials and their representatives, business, industry, educators, voluntary organizations, parents, youth, and committed citizens.

Finally, Mr. President, I want to call the attention of my colleagues to some of the comments and recommendations on youth unemployment contained in the December 1976 report to the President and Congress by the National Commission for Manpower Policy, entitled "An Employment Strategy for the United States, Next Steps." Here is what the report said:

A large proportion of the nation's youth are failing in or being failed by, the labor market. At any one time in 1975, 3.6 million jobseekers between the ages of 16 and 24 were unable to find jobs. The unemployment rate for teenagers (16–19 years old) was almost three times that for persons 25 and over, while the rate for young adults (20 through 24 years old) was more than twice the rate for older adults. The absolute and relative rates of youth joblessness in the United States are significantly above those in most other industrialized nations.

The situation is much more critical for minority youth, especially those living in central cities and those residing in low-income rural areas. Nearly three of every ten non-whites under the age of 25 who seek work cannot find it. This unemployment rate is almost double that for young whites.

The employment problems of young people cannot be blamed solely on the poor state of the economy. Their problems have been severe for many years. A major factor has been the rapid growth of the youth cohort. Between 1960 and 1975, the number of 16 to 24 year-olds rose by nearly seventy percent, or more than triple the increase in persons over 25. Despite the increasing numbers who remain in school longer, the labor force participation rate for the 16 to 24 year-olds rose from 56 to 65 percent. The youth portion of the labor force grew from 17 percent in 1960 to 24 percent in 1975. Clearly, much of the current difficulty that youths face in seeking and holding jobs is the result of the vast increase in the numbers who are entering the labor force who have neither skills nor experience.

The Commission distinguishes among the following aspects of youth employment:

The transitional aspect characteristic of all youth as they move out of the educational-training system into the world of work. The age at which most youth complete the transition is between 16 and 24 with large numbers leaving high school in their eighteenth year to continue their education or training or to seek a job.

The special difficulties that many youths, particularly those from low income families and minority groups, face because of the dysfunctional nature of their family, school or community experiences which leave them lacking in basic skills, competences and experience that employers seek.

The large number of youths who are no longer in school but who have failed to make a satisfactory transition into the regular job market. Many are unemployed; some are so discouraged that they no longer look for jobs; others find only short-term employment that pays little and leads nowhere, with the result that they quit or are discharged.

Transitional difficulties and erratic labor market the behavior are also characteristic of many young people from middle and even high income families, a considerable proportion of whom flounder for years before they find themselves.

Another problem that many young people face during their high school years or post-secondary education is the difficulty of finding part-time jobs during the school year and full-time work during their vacations.

There are no precise measures of the number of youths experiencing different types and degrees of labor-market difficulties. However, the Commission believes that the number in need of manpower services is manageable. In the Commission's view, a reasonable estimate is that there are currently about 400,000 youths in need of intensive training and employment services. Probably two to three times that number could profit from assistance in the form of occupational training and placement services. Finally, there are large numbers of youths who need or want part-time and/or summer jobs.

At the end of last year, the Joint Economic Committee held a day of hearings on the problem of youth unemployment. We had excellent witnesses—Congressman ANDREW YOUNG; Pittsburgh Mayor Pete Flaherty; Howard Samuel, vice president of the Amalgamated Clothing and Textile Workers Union, AFL–CIO; Beatrice Reubens, professor of economics at Columbia University; Bernard Anderson, professor of economics at the Wharton School; and Paul Barton, executive director of the National Manpower Institute—and all of them agreed that youth unemployment has reached a crisis stage in this country and that it will be a great national tragedy if we fail our young people.

The difficulty of solving this problem was illustrated in the remarks before the Joint Economic Committee of my friend and colleague, Congressman ANDREW YOUNG:

In a recent editorial in the New York Times, Roger Wilkins made the shocking statement that it may be harder to deal with the problems of unemployed young people than it was to deal with the problem of integrating former slaves into our society at the end of the Civil War. For the former slaves were economically participants in the system, and it was simply a matter of beginning to set up political and educational opportunities. But their economic wellbeing and work was already established. That is not today the fact with our young people, black and white, from the ages of 18 to 21. They are perhaps the group in our society that we spend the least amount of money on, unless they stay within the public education system.

Congressman YOUNG presented the alternative we will soon face if we fail to provide decent job opportunities for these young people:

When we are talking about roughly 50 percent of our youth population who are not now a part of the ongoing economy of this Nation, we are running the risk of having them set up a criminal counter-economy. They will not be inactive. This is the most active stage in life. They will do something. The question, I think, that is put before the Government is, will they be encouraged to do something constructive and creative, or will they be allowed to sink into chaos and destructive activity and become part of a criminal counterculture that we will spend far more money to try to counteract. I think very simply that is the choice that is before us.

We can no longer fail our youth. For too long, this Nation has ignored its

youth, and the result has been rising crime, rising drug abuse, rising youth disaffection, and a rising drain on our national resources.

The Comprehensive Youth Employment Act would signal a new commitment to developing and using the talents of our young people and a new dedication to the goals and needs of our Nation's youth.

I ask unanimous consent that a summary of the bill be printed in the RECORD together with the bill, following the speech by my good friend and colleague, Senator JAVITS.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibits 1 and 2.)

Mr. JAVITS. Mr. President, today I join with my colleague, Senator HUMPHREY in introducing the Comprehensive Youth Employment Act of 1977.

For some time, Mr. President, it has been my belief that the serious and persistent problem of youth unemployment in the United States could be ameliorated only by enactment of comprehensive national legislation designed to address the disparate causes and several characteristics of youth unemployment.

Shortly after the Joint Economic Committee held hearings on youth unemployment in September 1976, I requested the minority staff on manpower of the Committee on Labor and Public Welfare, to undertake research on this vexing problem with a view towards the development of a major piece of legislation to be introduced early in the 95th Congress. Our efforts to this end were nearing fruition in early December when Senator HUMPHREY suggested we join in forging a single comprehensive bill, which would fuse together the major elements of our separate initiatives. The Comprehensive Youth Employment Act is the product of our coauthorship, and I am pleased to introduce it with Senator HUMPHREY today.

Mr. President. It is time we began to relieve some of the disproportionate burden of joblessness borne by young Americans. Joblessness among the young people of our country is a once ubiquitous problem that has reached crisis proportions. Six quarters of economic recovery have left our youth almost as badly off in terms of employment as they were during the 1973–1975 recession. And, for all practical purposes, that recession was a depression as far as youths were concerned. Hence, youth unemployment is a problem that will not just "go away," regardless of the vigor of economic growth in the next few years and needs special measures.

At the present time, fully one-half of the total number of unemployed persons in the United States are under the age of 24. The National Commission for Manpower Policy reports that "at any one time in 1975, 3.6 million jobseekers between the ages of 16 and 24 were unable to find jobs." In November, 1976, the unemployment rate of teenagers stood at 19 percent, three times greater than the unemployment rate of those over 20 years of age.

Since even this abnormally high rate represents average unemployment among all youths in the United States, it is necessary to disaggregate the total and to focus upon the specific categories of youth unemployment, in order to observe the severity of unemployment among the more disadvantaged groups. While the unemployment rate of white teenagers held at the unacceptable crisis level of 17.1 percent last November, the unemployment rate of black teenagers exceeded 35 percent nationally. In many cities, it is not unusual for the unemployment rate of black youths to exceed 50 percent. And reliable estimates have placed the unemployment rate of metropolitan poverty area blacks to approach 60 percent.

It is significant to emphasize that the absolute and relative rates of youth unemployment in the United States are far above those recorded in most other industrialized nations.

The following table, included in a recent report on this problem by the Congressional Budget Office indicates the relative severity of this problem in the United States.

INTERNATIONAL COMPARISON OF UNEMPLOYMENT RATES, AVERAGE OF 1968, 1970, 1974

	Teenagers (1)	All working ages (2)	Difference (1)−(2)	Ratio (1)÷(2)
United States	14.7	4.7	10.0	3.1
Australia	5.0	1.7	3.3	2.9
Canada	12.6	5.4	7.2	2.3
France [1]	7.3	2.6	4.7	2.8
Germany [2]	2.5	.9	1.6	2.8
Great Britain [3]	7.0	3.8	3.2	1.8
Italy [4]	15.0	3.8	11.2	3.9
Sweden	5.6	1.9	3.7	2.9
Japan	2.3	1.3	1.0	1.8

[1] Average of 1968 and 1970 only.
[2] Average of 1968, 1970 and 1973.
[3] 1971 annual data.
[4] Average of 1968, 1970 and 1972.

Source: U.S. Department of Labor, Bureau of Labor Statistics, Office of Productivity and Technology.

Note: Teenage defined as 16–19 years old in United States, France, and Sweden; 15–19 in Australia, Canada, Germany, Great Britain, and Japan; and 14–19 in Italy.

Clearly, with teenage unemployment rates of 5, 7.3, 2.5, 7, 5.6, and 2.3 percent in Australia, France, Germany, Great Britain, Sweden, and Japan respectively, the 14.7 percent rate in the United States must be considered extraordinary. Of course, many factors may account for these international differences. But the fact remains that in the United States this group is in urgent need of immediate Government help, to relieve the disproportionate burden they bear.

As egregious as the official statistics demonstrate the U.S. youth unemployment problem to be, they actually understate the problem. This is because many youths finally have given up the frustrating and debilitating task of job search and have dropped out of the labor force. These discouraged workers are not listed as jobseekers and are thus not counted as unemployed. In 1975, according to the Manpower Commission:

> There were 600,000 youths outside the labor force who reported that they wanted a job but were not looking for one.

Although it is impossible to determine with any degree of confidence exactly how many of these youths would reenter the labor force if a job were offered to them, clearly the official data fail to take account of these labor force dropouts.

Official statistics tend to underestimate the youth unemployment problem also because many youths holding part-time jobs—and thus counted as employed—want to work full time. Although these youths are classified as "on part-time jobs for economic reasons" they are actually underemployed. The Manpower Commission estimates that in 1975 there were 1.3 million such persons under age 25.

If these discouraged and part-time workers seeking full-time work were added to the 1975 total of 3.6 million unemployed youth, I believe the total would have approached 5.5 million young people, and the youth unemployment rate then would have been approximately 35 percent nationally. I have no doubt whatsoever that the recorded unemployment rate of inner city black youth would then have reached 75 percent.

What is even more disturbing about this problem if that is possible, is that it appears to be worsening secularly, irrespective of the condition of our national economy.

In good times as well as in bad, abnormally high youth unemployment, especially of inner-city black youths, has persisted and, indeed, has become more severe in recent years. I believe the structural unemployment problems of youth have become less and less related to the business cycle and to general economic conditions. Examination of the long term trends of youth unemployment leads me to conclude that American youths will not benefit significantly even from economic recovery between now and 1980.

The following table demonstrates that the teenage unemployment rate has risen perceptibly since the 1950's, peaking in 1975, and that the ratio of teenage unemployment to adult unemployment has declined consistently. If these trends persist, and we have no reason to doubt that they will, youth unemployment will remain abnormally high through 1980.

UNEMPLOYMENT RATES FOR TEENAGERS COMPARED WITH NONTEENAGE UNEMPLOYMENT RATES IN THE UNITED STATES, 1950–75

Year	Age 16–19 (1)	Age 20+ (2)	Difference (1)−(2)	Ratio (1)÷(2)
1950	12.2	4.8	7.4	2.5
1951	8.2	3.0	5.2	2.7
1952	8.5	2.7	5.8	3.1
1953	7.6	2.6	5.0	2.9
1954	12.6	5.1	7.5	2.5
1955	11.0	3.9	7.1	2.8
1956	11.1	3.7	7.4	3.0
1957	11.6	3.8	7.8	3.1
1958	15.9	6.2	9.7	2.6
1959	14.6	4.8	9.8	3.0
1960	14.7	4.8	9.9	3.1
1961	16.8	5.9	10.9	2.8
1962	14.7	4.9	9.8	3.0
1963	17.2	4.8	12.4	3.6
1964	16.2	4.3	11.9	3.8
1965	14.8	3.6	11.2	4.1
1966	12.8	2.9	9.9	4.4
1967	12.9	3.0	9.9	4.3
1968	12.7	2.7	10.0	4.7
1969	12.2	2.7	9.5	4.5
1970	15.2	4.0	11.2	3.8
1971	16.9	4.9	12.0	3.4
1972	16.2	4.5	11.7	3.6
1973	14.5	3.8	10.7	3.8
1974	16.0	4.5	11.5	3.6
1975	19.9	7.3	12.6	2.7

Source: Cols. (1) and (2), Bureau of Labor Statistics, from the data base of Data Resources, Inc. (DRI).

The youth unemployment problem in the United States has several distinct

and intractable causes which demand the enactment of comprehensive remedial legislation. To be sure, the vicissitudes of the business cycle are responsible for a portion of teenage unemployment, perhaps 5 to 6 percentage points of the total. But a large part of the problem cannot be attributed to recession. The nonwhite unemployment rate, for example, has demonstrated an upward trend for the past 20 years. Recent Labor Department data are indicative of this secular trend.

Year:	*Nonwhite youth unemployment rate (both sexes 16–19)*
1954	16.5
1955	15.8
1956	18.2
1957	19.1
1958	27.4
1959	26.1
1960	24.4
1961	27.6
1962	25.1
1963	30.4
1964	27.2
1965	26.2
1966	25.4
1967	26.5
1968	25.0
1969	24.0
1970	29.1
1971	31.7
1972	33.5
1973	30.2
1974	32.9
1975	36.9

The unemployment problems of youth have been exacerbated by several noncyclical factors, such as regional disparities in economic development, technological innovations requiring greater educational qualifications, a sharp increase in the supply of young jobseekers, and racial discrimination in labor markets.

Widespread idleness among the young people of the United States reflects the failure of our economy to generate sufficient opportunities for gainful employment. Although the problem affects every area of our country, it tends to be most severe in our cities, especially those of the Northeast and Midwest, where recession, inflation, the corporate exodus, and a high concentration of poverty-stricken families have continued to depress general business conditions, overburden local resources and, thus, erode employment opportunities for young people.

The urban crisis that plagues so many of our cities is responsible to a large degree for the unemployment problems of American youth. If the economies of the older cities of the Northeast and Midwest continue to deteriorate, insufficient jobs will be created for youths. The outmigration of a good many major national employers from our cities and the reluctance of others to locate new facilities or expand existing plants in the older cities have depressed urban labor markets. In addition, the financial crisis afflicting State and local governments has impeded their ability to provide employment and job training for youths.

Finally, even in expanding inner-city occupations, the changing structure of labor demand militates against unemployed youths. Increasingly, employment opportunities offered by companies in major metropolitan areas require a level of education and/or skills which exceeds the skills possessed by many inner city youths. These youths are caught in a vicious circle, in which they are unable to obtain work experience and, thus, lack the requisite experience to qualify for jobs in the private sector. We must act now to break this vicious circle and insure that our young people are able to obtain the work experience required of them.

Since the severe unemployment problems of youth cannot be attributed, in the main, to the behavior of the national economy, it is safe to assume that economic recovery will not, in and of itself, put an end to this endemic problem. On the contrary, it is likely that the failure of the labor market to generate adequate employment opportunities for youth will continue, even with a favorable macroeconomic environment. In the absence of specific structural programs for youth, therefore, the teenage unemployment rate will remain much higher than the adult rate for the foreseeable future.

The legislation I have authored with Senator HUMPHREY would establish a number of programs to deal with the structural unemployment problems of youth.

First, our bill would establish a youth community service program to provide employment opportunities for up to 1 million youths on public projects providing needed public services to local communities. The allocation formula in our bill would distribute funds appropriated for youth jobs on the basis of relative youth unemployment and economic disadvantage. In addition, our bill would mandate establishment of education-work committees of CETA prime sponsors' planning councils, to review and make recommendations concerning youth employment plans.

Second, the Comprehensive Youth Employment Act of 1977 would establish a program of youth opportunities in private enterprise to prepare and place up to one-half million youths in productive employment in the private sector. Our bill would allow prime sponsors to contract with nonprofit private agencies, such as community service agencies, as well as with private-for-profit employers, to train unemployed youths for private sector jobs.

Specifically, the bill would permit reimbursement for on-the-job training expenses incurred by profit-making enterprises. Special consideration would be given to those employers who agree to subcontract with community based organizations for referral of youths ready for on-the-job training.

I believe this program will be one of the pillars of our youth employment initiative. We must remember that five of every six jobs in the United States are located in the private sector of our economy. If unemployed youths are to obtain nonsubsidized full-time employment as adults, they should have some work experience in the private sector and should be provided with the skills required for gainful employment with private enterprises. Our bill would provide funds to upgrade the employability of youths, including counseling, remediation, and skill training. More significantly, we would authorize reimbursement of extraordinary nonwage expenses—including training expenses—incurred by profit-making employers, who hire disadvantaged youths.

In a speech before the Chicago Executive Club last October I urged the business leaders of America to come forward and make a commitment to help alleviate our unemployment problems. If the Comprehensive Youth Employment Act becomes law, U.S. businesses will have an opportunity to demonstrate their commitment to the principles and purposes of U.S. economic democracy by doing their fair share to hire unemployed youth.

I reiterate what I said to America's business leaders last fall, become full and equal partners with Government; partners in the preservation of free enterprise; partners in the achievement of full employment; and partners in the extension of U.S. economic democracy to all Americans.

Third, we propose to establish a program of work experience for inschool youth, designed to provide youths with job experience prior to secondary school completion.

In recent years, Mr. President, much has been said and written about the need to improve the transition of young people from the world of education to the world of work. W. Willard Wirtz has written that young people are locked into a time trap that excludes them from the experience of work while they are enrolled in school full-time. High school graduates are then placed cold into the world of work and are expected to perform as effectively as adults. Inschool youth need to be exposed to working life while they are still students so they can make informed career choices and appreciate what the world of work is all about.

Under our bill, CETA prime sponsors would enter into agreements with local education agencies, which in turn would contract with public and private employers to provide part-time work specifically related to the education program of the secondary school student. Upon certification by the school based counselor that the work is an appropriate component of the student's total program, reimbursement would be provided for training and recruitment expenses incurred by employers.

The education-work committees of the CETA planning councils would have authority to approve or disapprove agreements between local education agencies and prime sponsors. These committees would be designed to enlist the participation of the broader community in improving the youth transition from school to work.

I believe our bill initiates the kind of collaborative processes among educators and employers that are required in order to build bridges between the world of education and the world of work. I am confident that employers will perceive their responsibilities to our Nation's youth and offer their participation in this worthwhile endeavor to enhance

the career preparation of our high school students.

Finally, the Comprehensive Youth Employment Act of 1977 would significantly expand our Nation's occupational information and career counseling effort. Our bill would permit CETA prime sponsors to arrange with public and private nonprofit agencies, the U.S. Employment Service, or local education agencies for programs to place trained counselors in the schools and junior colleges. In addition, a National Occupational Information and Career Guidance Service would be established to coordinate and compile education and work data, improve State and area data collection, and compile national and local occupational information data concerning present and future labor market trends.

This Service would expand the functions of the presently constituted Occupational Outlook Service of the Bureau of Labor Statistics. Instead of performing only medium range estimates of national labor demand by occupation, the new Occupational Information and Career Guidance Service would be given a mandate financially and technically to assist States and localities in carrying out local area projections.

In addition to labor demand estimates, the Service would be directed to take an inventory of present labor supply conditions and estimate the relative balance that can be expected to occur between labor supply and demand in the labor market by occupation and by region. This information is essential to enable vocational counselors to inform young people about expected trends in occupations for which they intend to prepare themselves. The superfluities that now characterize the supply of labor in some occupations and regions testify to the need for this kind of national labor market planning.

Mr. President, I believe enactment of these four programs is essential if we are to ameliorate the youth unemployment problem. If enacted into law, the Comprehensive Youth Employment Act of 1977 would represent our conviction that our Nation's youth have, in fact, the opportunity to make the productive contribution to American society they are prepared to make.

I understand that some may argue that high youth unemployment rates can be tolerated indefinitely and that it is unnecessary to enact comprehensive remedial legislation. They maintain that the official and unofficial statistics on youth unemployment do not of themselves compel immediate action. I could not disagree more strongly.

Continued toleration of persistent and endemic youth unemployment could not be more improvident. I believe that we will be courting future disaster if we continue to neglect youth joblessness. By our inaction we are telling our young people that they have no place in American society and we are permitting a malignancy of idleness to spread across the lives and futures of a generation of Americans. What possible significance can the American dream have for our youth when they are assigned to the unemployment lines until they reach adulthood? No less an authority than Dr. Eli Ginzberg, the Chairman of the National Commission on Manpower Policy, has stated that—

If we want trouble, the way to get it is to ignore the seriousness of this problem. We'll have living hell.

Our Nation's young people enter the labor market with all the eagerness and enthusiasm they can summon. They want jobs, not welfare; they seek work, not handouts; they want to work to earn the good things they have been promised our economic system offers as rewards for hard work. They do not, I am convinced, embark on lives of crime except out of sheer desperation.

Mr. President, persistent idleness in these early, formative years of labor market participation exerts pervasive and depressive effects on our Nation's young people. Unemployed youth become disillusioned with our economic system and with its promises of rewards for perseverance and diligence; they become discouraged by a seemingly endless series of rejections and layoffs; they become skeptical about their own usefulness in a world that places primary emphasis on obtaining and holding a productive job and making a real contribution. Disillusionment, discouragement, and lack of confidence in turn breed alienation and dissatisfaction, and the resultant disaffection often leads to alcoholism, drug addiction, and criminality.

Frequent and lengthening spells of unemployment among youth establish a pattern of joblessness that persists into adulthood; a pattern that creates attitudes of self-depreciation and unlessness that are totally alien to our American system.

Mr. President, we cannot stand idly by or rely on present programs to remedy this intolerable situation. Prudence would dictate that we take judicious action to demonstrate our commitment to this generation; to guarantee that the opportunities our young people rightfully anticipate will, in fact, await them. The Humphrey-Javits Comprehensive Youth Employment Act of 1977 symbolizes our determination to keep the promises we have made to our young people. We can do no less.

The Comprehensive Youth Employment Act of 1977 is an investment in human capital we cannot afford to postpone. As such it will be one of the most fructifying investments we will make as a nation in this decade. The returns on this investment will far exceed the costs and will continue to be generated beyond our lifetimes. I urge my colleagues to consider this bill and add their strong support.

Mr. President, I ask unanimous consent to have printed in the record of these proceedings, two recent newspaper articles on this subject.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

REAL JOBS FOR YOUTH

(By Peter B. Edelman)

ALBANY.—Thinking about delinquency prevention is a bit like being thrust onto a roller coaster just as it is beginning its deepest plunge.

America is facing its greatest economic crisis since the Depression, and unemployment is a way of life for more than half the young people in our inner-city neighborhoods. The high hopes of the 1960's have come and gone, leaving hopelessness and desperation, made all the more intense by the memories of hope that still persist. And where there are jobs, there will be more crime. For still more youth, a profound cynicism born of the Vietnam war and the removal of a President from office have neutralized the spirit of public service of the '60s.

We simply must respond to the needs of these unemployed and disaffected youth. While we can act individually, in our localities, and as states, we need most of all a national response. Challenged in World War II, we assembled our greatest scientists and unlocked the atom. When we proposed to reach the moon, science fiction became the Space Age.

Now we are challenged again, with the safety of our communities and the life possibilities of millions of young people at stake. A response worthy of our communities and our youth can be forged on three basic premises.

First, there is real work to be done. Some of it is in caring for others. Literally millions of people in America cannot care for themselves—old people, for instance, shut in homes for the aged and nursing homes, and retarded people, especially children, kept in institutions. We must also rebuild the vast abandoned areas of our inner cities and restore the scarred forests and often muddy hollows of our rural areas. So let no one talk of leaf raking; there is real work to be done.

A second premise is that the worlds of education and work should cohere as one life opportunity. We have in the past assumed that so many years of continuous schooling should and would be followed by a life of work. But we have learned from the 1960's that there can be no clear line between the worlds schooling and work.

A third premise is that young people grow up and mature faster in this electronic age. In the last century, with college reserved for the smallest elite, youth began as farmers and apprentices early in life.

For a variety of reasons, partly humanitarian, we gradually extended schooling to where it has for many young people come to be a period of marking time. Now the pendulum is swinging back, and properly so, for young people are chafing, ready to assume productive effort sooner than we have been willing to provide it.

To respond to this challenge we should gather all the funds now in small receptacles labeled Neighborhood Youth Corps, Vista, University Year for Action, College Work Study, and all the rest; combine them into a new significantly enlarged program of work, public service, and educational opportunity; and make it widely available to young people.

One national agency might be given a large appropriation to distribute on a formula basis to states and localities, which would in turn allocate funds on a competitive basis to public agencies, private nonprofit agencies and private businesses, and sometimes to groups of young people directly, so long as each project combined work with education.

A state department of mental health might apply for funds to employ young people in programs for the mentally retarded. Or a local social-service agency might use young workers to extend the effectiveness of drug- and alcohol-abuse counselors, early-childhood teachers, parole and after-care workers, and others whose case loads are so large they cannot adequately serve all in need.

Such programs would provide high school equivalency to those who lack it and arrangements for simultaneous college enrollment for those who wish it, so that youths entering them would be assured not dead-end jobs as ward attendants or aides but rather careers as professionals if educational opportunities are pursued and competencies demonstrated.

A local housing agency or private community development corporation might apply, indicating a vacant area of a city to be rebuilt, housing to be restored, or a rural area needing a road, school or community center. Local trade unions should be involved in the training and supervision of the young workers, with provision made for funds for building materials and other capital necessities, and for career opportunities thereafter.

We could also use the private sector, not on a last-in first-out basis, but as a vehicle through which government might subsidize the employment of young people as they acquire needed further education, in return for a commitment to continue a just percentage of them as a part of the permanent labor force.

Guidelines for the overall program would be needed to insure that those most in need are the majority of those served, but it should be emphasized that young people of all backgrounds can work side by side in jobs that begin productive careers for themselves and serve society at the same time.

"THE SYSTEM" KEEPS THE YOUNG WAITING

(By A. H. Raskin)

Of all the gloomy statistics in the monthly reports on national unemployment, the most somber always are those dealing with joblessness among teen-agers. The November report, issued last week by the Federal Bureau of Labor Statistics, was no exception. It showed 1.7 million youths between 16 and 19 looking for work they could not find.

That was almost one out of five among the nine million young men and women in the labor force, a jobless rate two and a half times as high as the national average for all workers. The idleness rate among black teenagers was double that of white youths, and the official figures did not count many slum dwellers, mostly black, who are so locked in hopelessness that they have become dropouts from the labor market as well as from school.

Abnormally high levels of youth unemployment have persisted in good times as well as bad during the last decade. Even when hundreds of thousands of young men were being drafted for combat duty in the Vietnam war, the level of youth unemployment stayed far above the adult rate. In 1969, when the overall rate dropped to a low of 3.5 percent, one teen-ager in every eight was jobless. The chronic nature of the problem has caused President-elect Jimmy Carter to instruct his economic aides to consider measures to cope with it above and beyond the general priority his administration intends to assign to generating new private and public jobs and reviewing the stagnant economy.

The search for programs specifically designed to build better bridges between school and work, especially for those who are misfits in the existing educational system, follows upon the central conclusion of the National Commission for Manpower Policy, the official body set up by the Ford Administration and Congress two years ago to recommend a long-term strategy.

Prof. Eli Ginzberg of the Columbia Graduate School of Business, the commission's chairman, warns that even the broadest programs for employment expansion through general economic stimulus will never touch the hard core of unemployed teen-agers in urban ghettoes and rural slums. He estimates the number of young people in this category at 400,000 to 500,000, a figure widely accepted by other manpower experts in and out of government. "The numbers are not so large that we can't really design special programs that will help motivate these young people, give them elementary educational and vocational competence and provide them with work experience," Professor Ginzberg said. "If we want trouble, the way to get it is to ignore the seriousness of this problem. We'll have living hell."

The spillover of frustration could take the form of ghetto riots of an increase in crime. Already, in Professor Ginzberg's view, many thousands of idle urban youths have taken up an underworld fringe existence—running numbers, pushing dope or other rackets—lucrative enough to kill their interest in such low-paid, dead-end jobs as are eventually available to them in the "straight" economy.

The belief that the group in most urgent need of Government help is under a half-million or less than one-third of all the young men and women counted as unemployed, stems from a recognition that many of the others are high school and college students looking for part-time employment. But the inclusion of such students in the idleness count, tending to unduly magnify the dimensions of the problem requiring attention, is balanced by the failure to include the large number of hard-core jobless youth who have lost hope.

Federal statisticians estimate the teen-agers account for slightly under 200,000 of the 800,000 workers they officially recognize as too discouraged to look for jobs. But Sar A. Levitan, director of George Washington University's Center for Social Policy Studies, declares that at least as many more hang out on street corners and are unknown to the collectors of official statistics.

Robert T. Hall, executive director of the Manpower Policy Commission and a member of President-elect Carter's transition team, believes that the hard-core problem could be tackled effectively by adding about $1 billion to improve youth job programs under the Comprehensive Employment and Training Act and other Federal legislation. Currently, $2 billion is being spent annually on these programs.

One proposal along these lines, advocated by Mr. Levitan, would revamp the Job Corps, a component of President Lyndon B. Johnson's "war on poverty" that was cut in half early in the Nixon Administration. He would restore it to its old level of 45,000 jobs and keep young people in training programs for at least six months. Another Levitan suggestion is for sharply expanded apprenticeship programs combined with Federal subsidies.

But the most innovative program under study is of overseas origin. An economic recovery law adopted in Belgium last March requires every company or government bureau with more than 100 employees to expand its payroll by 1 percent to create probationary jobs for people up to the age of 30. They are to be kept employed for at least six months at 75 percent of the normal starting rate for their jobs. If they are kept another six months, the required minimum goes up to 90 percent.

Thus far about 8,000 young men and women out of a total of 132,000 unemployed under 30, have been hired. The Belgian government has just recommended that the law be extended to companies with as few as 50 workers. A government subsidy of $800 for each young employee is offered to encourage job expansion in smaller businesses. Another part of the law is aimed at spurring early retirement of older workers through a tax-supported "solidarity fund" that gives them 80 percent of their normal take-home pay until they reach the standard pension age of 65 for men and 60 for women. Nearly 3,000 have retired to date under that provision, the Belgian Embassy in Washington reports; employers are obliged to take one young employee for every oldster who leaves.

EXHIBIT I

S. 170

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Comprehensive Youth Employment Act of 1977".

TITLE I—YOUTH EMPLOYMENT AND COMMUNITY SERVICE PROGRAMS

YOUTH EMPLOYMENT AND COMMUNITY SERVICE PROGRAMS AUTHORIZED

SEC. 101. The Comprehensive Employment and Training Act of 1973 is amended by redesignating title VII, and all references thereto, as title VIII; by redesignating sections 701 through 714, and all references thereto, as sections 801 through 814, respectively; and by inserting after title VI the following new title:

"TITLE VII—YOUTH EMPLOYMENT AND COMMUNITY SERVICE PROGRAMS

"PART A—YOUTH COMMUNITY SERVICE

"PURPOSE

"SEC. 701. This part establishes a Youth Community Service in order to enable all youths, and low income youths in particular, to have the opportunity for performing useful and productive work on projects serving their local community and the Nation as a whole; to assist youths in the acquisition of basic education and development of basic work skills; to enable youths to develop a sense of responsibility, initiative, self-reliance and self-worth; to provide youths with an opportunity to gain work experience and occupational information; to provide local communities and the Nation with valuable services; and to bring together all sectors of the economy in an effort to give youths a meaningful place in society, the economy, and the Nation.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 702. (a) There are authorized to be appropriated to carry out the provisions of this part $100,000,000 for the fiscal year 1977; $1,250,000,000 for the fiscal year 1978; and for each of the succeeding calendar quarters (beginning with the calendar quarter beginning on October 1, 1978)—

"(1) $250,000,000 plus

"(2) $62,500,000 multiplied by the number of one-half percentage points by which the rate of seasonally adjusted national unemployment for the most recent calendar quarter which ended before the beginning of such calendar quarter exceeded 4 per centum.

"(b) The Secretary shall prepare and transmit to the Congress, prior to or during any period specified in subsection (a), such estimates of unemployment as may be necessary or appropriate for determining amounts to be appropriated for such period or allocated pursuant to this Act; and appropriations and allocations for any such period may be made prior to or during such period on the basis of such estimates.

"(c) Any amounts appropriated for any such period which are not obligated prior to the end of such period shall remain available for obligation in the succeeding fiscal year after the period for which such amounts were appropriated.

"ALLOCATION

"SEC. 703. (a)(1) Eighty percent of the amount available for this part in any fiscal year shall be allotted in accordance with the provisions of this subsection.

"(2)(A) Fifty percent of the amount allotted under this subsection shall be allotted among States on the basis of the relative number of youth, aged 16–21, in low income families within each State as compared to such numbers in all States;

"(B) Fifty percent of the amount allotted under this subsection shall be allotted among States on the basis of the relative share of unemployed youth within each State as compared to such numbers in all States.

"(3) The sum allotted to each State shall be allotted by the Secretary among areas within the State on an equitable basis based upon the factors set forth in paragraph (2).

"(b) The remainder of the amount available for this part shall be available to the Secretary to be distributed at his discretion taking into account the severity of unemployment among youths in areas under the jurisdiction of each prime sponsor.

"(c) As soon as practicable after funds are appropriated to carry out this part for any fiscal year, the Secretary shall publish in the Federal Register the apportionments required by subsection (a) of this section.

"YOUTH COMMUNITY SERVICE PROGRAM AUTHORIZED

"SEC. 704. (a) Each prime sponsor shall make grants to, or enter into arrangements with, eligible applicants in accordance with the provisions of this part in order to make financial assistance available for the purpose of providing Youth Community Service employment for youths in jobs required to carry out eligible community service projects.

"(b)(1) Of the funds allocated to each prime sponsor, no more than 25 per centum may be used for administrative expenses, equipment, supplies, supporting services or supervisory personnel necessary to the carrying out of the eligible project, and not less than 75 per centum shall be expended only for wages and employment benefits to youths employed pursuant to this part.

"(2) Nothing in this part is intended to prohibit the use of funds from other sources, including other Federal programs, in combination with funds appropriated under section 703, for purposes of carrying out approved Youth Community Service projects which meet the requirements set forth in this part.

"APPLICATIONS

"SEC. 705. (a) Financial assistance under this part may not be made for any Youth Community Service project unless the prime sponsor approves an application pursuant to section 706 which is submitted by an eligible applicant.

"(b) Each such application shall—

"(1) set forth a full description of the eligible project consistent with the provisions of section 706(b);

"(2) describe the age and school status of the youth population to be served, and describe what emphasis the eligible project shall place on school retention or reenrollment, vocational exploration, and skill development;

"(3) provide a description of the jobs to be filled, a listing of the major kinds of work to be performed to carry out the eligible project and the approximate duration, not to exceed 12 months, for which participants would be assigned to such jobs;

"(4) provide a description of job training, educational, and skill development opportunities that will be made available to participating youths, as well as a description of plans to coordinate the training activities of the eligible project with training activities provided for under other provisions of this Act;

"(5) describe (A) whether jobs provided by the eligible project shall consist primarily of part-time jobs to be filled by youths who are still in school or who will return to school, with more extensive work provided during the summer months, or primarily of full-time jobs to be filled by youths who are out of school, or a combination of full-time and part-time jobs; (B) provisions designed to assist and encourage school retention or reenrollment, or both, vocational exploration, or skill development; and (C) other supportive activities to participating youths, such as counseling, remedial reading, and other work-related assistance;

"(6) describe the wages or salaries to be paid youths and other persons employed in jobs and supervisory positions assisted under this part, if such wages and salaries are not set by the prime sponsor;

"(7) set forth assurances that the activities and services agreed to under this part will be administered by or under the supervision of the applicant, identifying any agency or institution designated to carry out such activities or services;

"(8) set forth assurances that no youth hired under this part will be employed to fill a job opening created by the action of an employer in laying off or terminating the employment of any regular employee not supported under this part in anticipation of filling the vacancy so created by hiring a youth to be supported under this part;

"(9) set forth assurances that the eligible project applicant will advise participating youths of the availability of other training and manpower resources provided under this Act, and other resources available in the local community to assist such youths in obtaining unsubsidized employment upon completion or termination of the eligible project;

"(10) set forth assurances that all persons employed in an eligible project under this part, other than necessary technical supervisory, supportive service, and administrative personnel, will be selected from among youths, and that members of the immediate families of the eligible applicant or its officers, owners, directors, or elected officials will not be employed with funds provided by this part;

"(11) set forth assurances that there will be adequate supervisory personnel on an eligible project, as required under section 706(b)(3);

"(12) in the case of an eligible applicant that is a local educational agency, set forth assurances that (A) the jobs provided will be used to encourage youths to remain in school, (B) the agency will provide supporting services to participants, such as counseling, remedial reading, and other work-related assistance, and (C) the project will provide both part-time work during the school year plus more extensive work during the summer;

"(13) set forth assurances that no person with responsibilities in the operation of the project will discriminate with respect to any participant or applicant for participation in such project because of race, creed, color, national origin, sex, political affiliations, or beliefs and that participants in the program will not be employed on the construction, operation, or maintenance of so much of any facility as is used or to be used for sectarian instruction or as a place for religious worship;

"(14) set forth assurances that jobs assisted under this part are in addition to jobs that would be assisted by the eligible applicant in the absence of assistance under this part;

"(15) set forth assurances that any income generated by the project will be applied toward the cost of the project; and

"(16) set forth assurances that, to the extent feasible, a durable sign, describing the nature of the eligible project, the number of youths employed and the fact that the project is a Youth Community Service project will be conspicuously displayed at the project site;

"(17) describe how the eligible project will result in visible and tangible improvements to the local community or the Nation or will provide useful services to the citizens; and

"(18) set forth such other assurances, arrangements, and conditions consistent with the provisions of this part, including the special conditions required under section 772, as the Secretary deems necessary in accordance with such regulations as the Secretary shall prescribe.

"APPROVAL OF APPLICATIONS

"SEC. 706. (a) An application, or an amendment or modification of an application, under this part may be approved by the prime sponsor only if the prime sponsor determines that—

"(1) the application meets the requirements set forth in this part; and

"(2) the application fully describes an eligible project which complies with the provisions of subsection (b) of this section.

"(b) No application shall be approved by the prime sponsor unless the prime sponsor determines that the eligible project described in that application will—

"(1) be initiated within sixty days of the date on which it is approved;

"(2) provide work that is socially valuable, including, but not limited to, any public service;

"(3) provide no fewer than one supervisor for each ten participating youths, and provide that the supervisory personnel are adequately trained in skills needed to carry out the project and can instruct participating youths in skills needed to carry out the project, except that the prime sponsor may permit fewer supervisors for individual projects whenever a prime sponsor determines that such modification will contribute to the objectives of this part.

"(c) In approving applications under this part the prime sponsor shall to the fullest practical extent give priority to applications which will—

"(1) most contribute to reducing unemployment among youths, and low-income youths in particular;

"(2) result in the production of goods or services of greatest value to the local community or to the Nation; and

"(3) contribute to providing a broad range of part-time and full-time jobs, in order to meet the employment needs of both youths in school and those out of school, as provided in section 705(b)(5).

"(d) Each prime sponsor shall, to the fullest extent consistent with its responsibilities under this title, give special consideration to applications submitted by eligible private nonprofit organizations, and aim to make the maximum use of such organizations which have demonstrated effectiveness in job creation, job-related skills training, and comprehensive employment services.

"(e) In the case of an application which fails to meet the requirements set forth in this part, the prime sponsor may—

"(1) reject the application, or

"(2) return the application to the eligible applicant, and

"(A) present the eligible applicant with reasons why the application failed to meet the requirements of this part;

"(B) at the request of the eligible applicant, provide assistance in the preparation of a revised application; and

"(C) reconsider the revised application.

"YOUTH PARTICIPANTS

"SEC. 707. To the maximum extent possible, youth participants in eligible Youth Community Service projects shall be identified by and selected from names submitted by the existing manpower delivery system established under title I of this Act, the United States Employment Service, schools of local educational agencies, and public agencies and private nonprofit organizations.

"PART B—YOUTH OPPORTUNITIES IN PRIVATE ENTERPRISE

"PURPOSE

"SEC. 721. It is the purpose of this part to establish a Youth Opportunities in Private Enterprise program in order to—

"(1) reduce unemployment among the

Nation's youths, particularly low income youths, by providing the incentive and opportunity for private enterprise to hire such youths for productive and responsible jobs;

"(2) provide youths with basic work skills and to make it possible for them to compete effectively for jobs in private enterprise;

"(3) reduce the barriers to youth employment in private enterprise;

"(4) demonstrate the ability of youths to work effectively in private enterprise;

"(5) restore the confidence of private employers in youthful employees;

"(6) foster cooperation between the public and private sectors in the development of job opportunities for youths;

"(7) provide special employment assistance to low income youths and to improve job opportunities for low income youths; and

"(8) help young Americans develop rewarding careers in private enterprise.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 722. (a) There are authorized to be appropriated to carry out the provisions of this part $100,000,000 for the fiscal year 1977; $500,000,000 for the fiscal year 1978; and $750,000,000 for each succeeding fiscal year thereafter.

"(b) Any amounts appropriated for any fiscal year which are not obligated prior to the end of such period shall remain available for obligation in the succeeding fiscal year after the period for which such amounts were appropriated.

"ALLOCATION OF FUNDS

"SEC. 723. (a) Of the funds appropriated under section 722 for any fiscal year—

"(1) 70 per centum shall be allocated among prime sponsors in the same proportion as funds allocated under section 703(a) of this Act;

"(2) 10 per centum may be distributed by the Secretary at his discretion for the purpose of establishing additional Youth Opportunity in Private Enterprise programs in rural areas;

"(3) 20 per centum may be distributed by the Secretary at his discretion for the purpose of establishing additional Youth Opportunity in Private Enterprise programs for low income youths.

"(b) As soon as practicable after funds are apportioned to carry out this part for any fiscal year, the Secretary shall publish in the Federal Register the apportionments required by subsection (a) of this section.

"YOUTH OPPORTUNITY IN PRIVATE ENTERPRISE PROGRAM AUTHORIZED

"SEC. 724. (a) Each prime sponsor shall make grants to, or enter into arrangements with, eligible applicants in accordance with the provisions of this part in order to make financial assistance available for, or to establish, Youth Opportunity in Private Enterprise programs, for the purposes of—

"(1) placing youths in jobs in private enterprise;

"(2) providing financial assistance to eligible applicants for costs incurred in training youths for jobs under this part, and making arrangements with employers organized for profit for on-the-job training programs;

"(3) providing special assistance to low-income youths needed to enable them to adequately perform jobs in private enterprise; and

"(4) providing useful or necessary supportive services to participating youths and employers.

"(b) The prime sponsor shall give special consideration to applications for on-the-job training programs submitted by employers organized for profit if such application provides that the services listed in subsection (c) shall be provided by community based organizations. Costs incurred by community based organizations in providing such services shall be an allowable cost of the on-the-job training program *provided that* the total payment to any employer organized for profit shall not exceed the difference between the costs of recruiting, training, and providing supportive services for youths eligible under this title and those regularly employed.

"(c) The services referred to in subsection (b) are recruiting, including outreach, counseling, basic or remedial education, supportive services, including necessary child care, and such training as may be delegated by the employer.

"(d) Nothing in this part is intended to prohibit the use of funds from other sources, including other Federal programs, in combination with funds appropriated under section 722, for the purpose of carrying out approved Youth Opportunity in Private Enterprise programs which meet the requirements set forth in this part.

"ELIGIBLE ACTIVITIES

"SEC. 725. Each Youth Opportunity in Private Enterprise program assisted under this part may include, but shall not be limited to—

"(1) provision for reimbursement of private employers organized for profit for costs incurred for on-the-job training programs;

"(2) provision for counseling, remedial education, supportive services and placement services needed to enable participating youths to obtain, and adequately perform, a job in private enterprise;

"(3) provision for opportunities for participating youths to develop basic work skills and basic job skills needed to obtain, and adequately perform, a job in private enterprise;

"(4) provision for information, assistance and services to participating employers needed to develop job opportunities for youths and to structure newly-developed jobs to fit the needs and abilities of youths;

"(5) provision to participating employers of supportive services, such as follow-up counseling with participating youths and employers, assistance in developing job ladders or new job opportunities for participating youths, and for other assistance needed to improve work relationships between participating employers and youths;

"(6) provision of arrangements to assist and encourage school retention or reenrollment, or both, vocational exploration, or skill development among participating youths;

"(7) reimbursement to participating youths for necessary transportation, clothing, or other costs of employment;

"(8) in cooperation with State and local educational agencies, development of cooperative work-study programs to enable youths in school to combine formal education with part-time employment in the private sector;

"(9) internship programs to permit youths to experience a variety of work experiences with one or more employers;

"(10) in cooperation with the Bureau of Apprenticeship and Training of the Department of Labor, development of apprenticeship programs in occupations where they do not currently exist;

"(11) any other activity or program to place or assist youths in jobs in private enterprise; or

"(12) any combination of any activities or programs to place or assist youths in jobs in the private sector.

"APPLICATIONS

"SEC. 726. (a) Financial assistance under this part may not be made for any Youth Opportunity in Private Enterprise program unless the prime sponsor approves an application pursuant to section 727 which is submitted by an eligible applicant.

"(b) Each such application shall—

"(1) set forth a full description of the eligible Youth Opportunity in Private Enterprise program, including a description of all activities which will be included in the program;

"(2) estimate the number of youths to be served by the eligible program;

"(3) provide a description of job training, educational, and skill development opportunities that will be made available to participating youths, as well as a description of plans to coordinate the training activities of the eligible program with training activities provided for under other provisions of this Act;

"(4) describe (A) whether jobs provided under the eligible program shall consist primarily of part-time jobs to be filled by youths who are still in school or who will return to school, with more extensive work provided during the summer months, or primarily of full-time jobs to be filled by youths who are out of school, or a combination of full-time and part-time jobs; (B) provisions designed to assist and encourage school retention or reenrollment, or both, vocational exploration, or skill development; and (C) other supportive activities to participating youths, such as counseling, remedial reading, and other work-related assistance;

"(5) set forth assurances that jobs provided under this part will be productive and useful, will contribute to a sense of achievement among participating youths, and will require at least one month of training and work experience, but no more than one year, for adequate job performance;

"(6) set forth assurances that youths will not be placed in jobs in which wages are based primarily on commissions, in jobs for which training may be more effectively or economically conducted under other Federal or State programs, or in jobs in shortage occupations where such shortage is caused by poor working conditions;

"(7) set forth assurances that the activities and services agreed to under this part will be administered by or under the supervision of the applicant, identifying any agency or institution designated to carry out such activities or services;

"(8) set forth assurances that no youth hired under this part will be employed to fill a job opening created by the action of an employer in laying off or terminating the employment of any regular employee in anticipation of filling the vacancy so created by hiring a youth under this part;

"(9) set forth assurances that the eligible applicant will advise participating youths of the availability of other training and manpower resources provided under this Act, and other resources available in the local community to assist such youths in obtaining employment;

"(10) set forth assurances that participating youths will be adequately supervised by participating employers;

"(11) in the case of an eligible applicant that is a local educational agency, set forth assurances that (A) the jobs provided will be used to encourage youths to remain in school, (B) the agency will provide supportive services to participants, and (C) the program will, where appropriate, provide both part-time work during the school year and full-time summer employment;

"(12) set forth assurances that the eligible applicant shall, to the maximum feasible extent, endeavor to place participating youths in small businesses;

"(13) set forth assurances that no person with responsibilities in the operation of the program will discriminate with respect to any participant or applicant for participation in such program because of race, creed, color, national origin, sex, political affiliations, or beliefs and that participants in the program will not be employed on the construction, operation, or maintenance of so

much of any facility as is used or to be used for sectarian instruction or as a place for religious worship;

"(14) set forth assurances that jobs provided by participating employers under this part are in addition to jobs that would be provided by the employer in the absence of programs assisted under this part; and

"(15) set forth such other assurances, arrangements, and conditions consistent with the provisions of this part, including the special conditions required under section 772, as the Secretary deems necessary in accordance with such regulations as the Secretary shall prescribe.

"APPROVAL OF APPLICATIONS

"SEC. 727. (a) An application, or an amendment or modification of an application, under this part may be approved by the prime sponsor only if the prime sponsor determines that—

"(1) the application meets the requirements set forth in this part; and

"(2) the application fully describes an eligible project which complies with the provisions of subsection (b) of this section.

"(b) No application shall be approved by the prime sponsor unless the prime sponsor determines that the eligible Youth Opportunity in Private Enterprise program described in that application will—

"(1) be initiated within sixty days of the date on which it is approved; and

"(2) provide meaningful work that will give participating youths a sense of satisfaction and self-worth.

"(c) In approving applications under this part the prime sponsor shall to the fullest practical extent give priority to applications which will—

"(1) most contribute to reducing unemployment among youths, and low-income youths in particular; and

"(2) contribute to providing a broad range of part-time and full-time jobs, in order to meet the employment needs of both youths in school and those out of school; and

"(3) assist and encourage school retention or reenrollment, or both, vocational exploration, or skill development.

"(d) Each prime sponsor shall, to the fullest extent consistent with its responsibilities under this title, give special consideration to applications submitted by eligible private nonprofit organizations, and aim to make the maximum use of such organizations which have demonstrated effectiveness in job creation, job-related skills training and comprehensive employment services.

"(e) In the case of an application which fails to meet the requirements set forth in this part, the prime sponsor may—

"(1) reject the application, or

"(2) return the application to the eligible applicant, and

"(A) present the eligible applicant with reasons why the application failed to meet the requirements of this part;

"(B) at the request of the eligible applicant, provide assistance in the preparation of a revised application; and

"(C) reconsider the revised application.

"YOUTH PARTICIPANTS

"SEC. 728. To the maximum extent possible, youth participants in eligible Youth Opportunity in Private Enterprise programs shall be identified by and selected from names submitted by the existing manpower delivery system established under title I of this Act, the United States Employment Service, schools of local educational agencies, and public agencies and private nonprofit organizations.

"PART C—WORK EXPERIENCE FOR IN-SCHOOL YOUTH

"STATEMENT OF PURPOSE

"SEC. 741. It is the purpose of this part to establish a Work Experience for In-School Youth program, to provide youths who are in secondary schools with the opportunity to gain meaningful work experience which is fully integrated with their course of education, by assisting local educational agencies and employers to develop part-time action-learning jobs for such youths.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 742. (a) There are authorized to be appropriated to carry out the purposes of this part $50,000,000 for the fiscal year 1977, $150,000,000 for the fiscal year 1978, and $200,000,000 for each succeeding fiscal year thereafter.

"(b) Any amounts appropriated for any fiscal year which are not appropriated prior to the end of such fiscal year shall remain available for obligation in the succeeding fiscal year after the fiscal year in which such amounts were appropriated.

"ALLOCATION OF FUNDS

"SEC. 743. (a)(1) Eighty percent of the amount available for this part in any fiscal year shall be allotted in accordance with the provisions of this subsection.

"(2)(A) Fifty percent of the amount allotted under this subsection shall be allotted among States on the basis of the relative number of youth enrolled in secondary schools within each State as compared to such numbers in all States.

"(B) Fifty percent of the amount allotted under this subsection shall be allotted among States on the basis of the relative number of low income youth enrolled in secondary schools within each State as compared to such numbers in all States.

"(3) The sum allotted to each State shall be allotted by the Secretary among areas within the State on an equitable basis based upon the factors set forth in paragraph (2).

"(b) The remainder of the amount available for this part shall be available to the Secretary to be distributed as follows:

"(1) Five percent to States to encourage coordination between existing employment service functions and prime sponsor programs funded under this part.

"(2) Fifteen percent to be distributed by the Secretary at his discretion.

"(c) As soon as practicable after funds are appropriated to carry out this part for any fiscal year the Secretary shall publish in the Federal Register allotments required by subsection (a) of this section.

"WORK EXPERIENCE FOR IN-SCHOOL YOUTH AUTHORIZATION

"SEC. 744. The Secretary shall, in accordance with the provisions of this part, make payments to prime sponsors for applications approved under section 746 in order to make financial assistance available to local educational agencies for the purpose of providing youth who are in secondary schools with job experience prior to the completion of secondary school.

"APPLICATIONS

"SEC. 745. (a) Financial assistance under this part may not be made for any Work Experience for In-School Youth program unless the prime sponsor submits to the Secretary an application at such time and containing or accompanied by such information as the Secretary may reasonably require.

"(b) Each such application shall—

"(1) set forth a Work Experience for In-School Youth program administered by a local educational agency or local educational agencies within the jurisdiction of the prime sponsor which shall provide part-time employment opportunities with public and private employers in action-learning positions for youths enrolled in or reentering a full-time educational program in a secondary school;

"(2) set forth a description of jobs to be performed by participating youths;

"(3) describe wages or salaries to be paid by participating employers to participating youths;

"(4) set forth assurances that participating youths will be provided meaningful work experience, which shall improve their ability to make career decisions and which shall provide them with basic work skills needed for regular employment not subsidized under this part;

"(5) set forth assurances that the program will be administered under contracts with the prime sponsor by a local educational agency or local educational agencies within the jurisdiction of the prime sponsor, and that such contracts have been reviewed and approved by the full membership of the Education-Work Committees established in section 773 of this title;

"(6) set forth assurances that job information, counseling, guidance and placement services shall be made available to participating youths and that funds provided under this part shall be available to, and utilized by, the local educational agency or agencies to the extent necessary to pay the cost of school-based counselors to carry out the provisions of this part, including the certification process required under section 747;

"(7) describe arrangements for reimbursing employers for necessary costs of training participating youths for jobs provided under this part;

"(8) set forth assurances that jobs provided under this part shall be certified by the participating local educational agencies as relevant to the educational and career goals of the participating youths;

"(9) set forth assurances that youths will not be placed in jobs in which wages are based primarily on commissions, in jobs for which training may be more effectively or economically conducted under other Federal or State programs, or in jobs in shortage occupations where such shortage is caused by poor working conditions;

"(10) set forth assurances that the activities and services agreed to under this part will be administered by or under the supervision of the applicant, identifying any agency or institution designated to carry out such activities or services;

"(11) set forth assurances that the eligible applicant will advise participating youths of the availability of other training and manpower resources provided under this Act, and other resources available in the local community to assist such youths in obtaining employment;

"(12) set forth assurances that participating youths will be adequately supervised by participating employers;

"(13) set forth assurances that no person with responsibilities in the operation of the program will discriminate with respect to any participant or applicant for participation in such program because of race, creed, color, national origin, sex, political affiliations, or beliefs and that participants in the program will not be employed on the construction, operation, or maintenance of so much of any facility as is used or to be used for sectarian instruction or as a place for religious worship;

"(14) set forth assurances that jobs provided by participating employers under this part are in addition to jobs that would be provided by the employer in the absence of programs assisted under this part; and

"(15) set forth such other assurances, arrangements, and conditions consistent with the provisions of this part, including the special conditions required under section 722, as the Secretary deems necessary in accordance with such regulations as the Secretary shall prescribe.

"APPROVAL OF APPLICATIONS

"SEC. 746. Applications, or an amendment or modification of the application, for payments to prime sponsors under this part may be approved by the Secretary only if he determines that the application meets the requirements set forth in section 745.

"YOUTH PARTICIPANTS

"SEC. 747. Youth participants in Work-Experience for In-School Youth programs shall be—

"(1) chosen, to the maximum extent possible, from among youths who are in low-income families and who need work to remain in school; and

"(2) selected by the appropriate local educational agency, based on the certification for each participating youth by the school based guidance counselor that the work experience provided is an appropriate component of the overall educational program of the youth.

"PART D—OCCUPATIONAL INFORMATION AND CAREER COUNSELING PROGRAM

"PURPOSE

"SEC. 751. It is the purpose of this part to establish an Occupational Information and Career Counseling Program under which effective and comprehensive job counseling, job information and job placement services are made available to the Nation's youth, in order to reduce the unemployment rate among youths and young workers; to improve the ability of youths to obtain useful, productive and remunerative jobs; to ease the transition of youths from school to work; to improve communication and cooperation between State and local educational agencies, State employment services, youths and businesses; to increase, improve, and make more readily available to youths necessary information on jobs, careers, and employment prospects; to improve the long-run career plans of youths and the way career plans are developed; and to improve the matching of long- and short-run employment desires of youths with the technical, managerial and labor skills needed to sustain the long-run growth and prosperity of the American economy.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 752. (a) There are authorized to be appropriated to carry out the provisions of this part $75,000,000 for the fiscal year 1977, and $100,000,000 for each succeeding fiscal year thereafter.

"(b) Any amounts appropriated for any fiscal year which are not appropriated prior to the end of such fiscal year shall remain available for obligation in the succeeding fiscal year after the fiscal year in which such amounts were appropriated.

"ALLOCATION OF FUNDS

"SEC. 753. (a)(1) Seventy percent of the amount available for this part in any fiscal year shall be allotted in accordance with the provisions of this subsection.

"(2)(A) Fifty percent of the amount allotted under this subsection shall be allotted among States on the basis of the relative number of youth, aged 16–21, inclusive, in low-income families within each State as compared to such youths in all States.

"(B) Fifty percent of the amount allotted under this subsection shall be allotted among States on the basis of the relative share of unemployed youth within each State as compared to such youths in all States.

"(3) The sum allotted to each State shall be allotted by the Secretary among areas within the State on an equitable basis based upon the factors set forth in paragraph (2).

"(b) The remainder of the amount available for this part shall be available to the Secretary for the following purposes:

"(1) Ten percent to be distributed to the States for the development of technical systems to translate national projections of occupational and skill reuirements to a regional and local basis; and

"(2) Twenty percent for programs authorized under section 757, section 758 and section 759.

"(c) As soon as practicable after funds are apportioned to carry out this part for any fiscal year, the Secretary shall publish in the Federal Register the apportionments required by subsection (a) of this section.

"OCCUPATIONAL INFORMATION AND CAREER GUIDANCE PROGRAMS AUTHORIZED

"SEC. 754. (a) Each prime sponsor shall make grants to, or enter into arrangements with, eligible applicants in accordance with the provisions of this part in order to make financial assistance available to establish and carry out Occupational Information and Career Guidance programs, for the purposes of—

"(1) reducing the rate of unemployment among youths by increasing their access to available job opportunities;

"(2) improving the information available to youths on job and career opportunities, including such information as short- and long-run employment opportunities in various careers, skill and education requirements of various jobs and employers, location of job opportunities, and compensation and benefits of various jobs;

"(3) providing for better matching of youth job and career desires with available jobs as well as with perspective job opportunities over the long run;

"(4) furnishing job counseling and placement services to youths who are actively seeking employment, as well as to those forming career plans;

"(5) furnishing preemployment counseling to youths in intermediate and secondary schools; and

"(6) furnishing information to youths, both in school and out of school, on post-secondary educational opportunities, job training and vocational education programs, manpower development programs, and Federal, State, and local assistance available to youths for participation in such programs and opportunities.

"(b) Programs assisted under this part may include, but shall not be limited to—

"(1) programs for counseling and employment services for youths in secondary and postsecondary schools in cooperation with State and local educational agencies;

"(2) in cooperation with community-based organizations, farm, labor, and other interested organizations, programs of neighborhood, rural, mobile and seasonal counseling and employment services for youth, to bring job counseling and placement services assisted under this part to disadvantaged, rural, and minority youths who would not otherwise have access to such services;

"(3) in cooperation with State and local correctional agencies, programs of counseling and employment services for youth in correctional institutions;

"(4) programs of computer on-line terminals and other facilities to utilize and implement occupational and career outlook information and projections supplied by State Employment Service offices and to improve the match of youth career desires with available and anticipated labor demand;

"(5) in cooperation with State and local educational agencies, programs to bring employment and career counseling to presecondary youths;

"(6) in cooperation with the Department of Defense, programs of counseling and employment services for youth on military bases, on a full-time or part-time basis;

"(7) programs designed to encourage public and private employers to list all available job opportunities for youths with the appropriate eligible applicant conducting Occupational Information and Career Counseling programs and to encourage cooperation and contact between such eligible applicants and employers; and

"(8) such other programs as the Secretary determines will carry out the purposes of this part.

"APPLICATIONS

"SEC. 755. (a) Financial assistance may not be made under ths part for any Occupational Information and Career Counseling program unless the prime sponsor approves an application pursuant to section 756 which is submitted by an eligible applicant.

"(b) Each such application shall—

"(1) set forth a full description or the Occupational Information and Career Counseling program;

"(2) set forth assurances that the activities and services for which payment is sought under this part will be administered by or under the supervision of the applicant, identifying any agency, institution, or enterprise designated to carry out such activities or services;

"(3) set forth assurances that the eligible applicant will advise youths of the availability of other training and manpower resources provided under this Act, and other resources available in the local community to assist youths in obtaining employment;

"(4) set forth assurances that no person with responsibilities in the operation of the program assisted under this part will discriminate with respect to any youth or applicant because of race, creed, color, national origin, sex, political affiliations, or beliefs; and

"(5) set forth such other assurances, arrangements, and conditions consistent with the provisions of this part, including the special conditions required under section 772, as the Secretary deems necessary in accordance with such regulations the Secretary shall prescribe.

"APPROVAL OF APPLICATIONS

"SEC. 756. (a) An application, or an amendment or modification of an application, under this part may be approved by the prime sponsor only if the prime sponsor determines that the application meets the requirements set forth in this part.

"(b) In the case of an application which fails to meet the requirements set forth in this part, the prime sponsor may—

"(1) reject the application, or

"(2) return the application to the eiligible applicant, and

"(A) present the eligible application with reasons why the application failed to meet the requirements of this part;

"(B) at the request of the eligible applicant, provide assistance in the preparation of a revised application; and

"(C) reconsider the revised application.

"NATIONAL OCCUPATIONAL INFORMATION AND CAREER GUIDANCE SERVICE

"SEC. 757. (a) The Secretary is authorized to establish a National Occupational Information and Career Guidance Service in the Department of Labor to undertake estimates of present and future occupational needs, to compile data on the numbers of people engaged in education and training, to assist States in the preparation of individual state and area projections of occupational outlook, and to serve as the informational and statistical base required for matching career preparation with future career prospects.

"(b) It shall be the purpose of the Service to—

"(1) make estimates of present and projected labor demand on an occupational and geographical basis;

"(2) complete surveys of the number of people engaged in all types of education and training;

"(3) develop comprehensive occupational outlook and career information;

"(4) encourage and assist local areas to adopt methods of translating national aggregate occupational outlook data into local terms; and

"(5) assist in the development of State Occupational Information Systems, to be used in the maintenance of local computer-

ized job banks and job vacancy reports, and accessible via computer terminals located in school district offices.

"COUNSELING AND PLACEMENT PERSONNEL TRAINING GRANTS

"SEC. 758. (a) The Secretary is authorized to make grants to public agencies, colleges, and nonprofit private organizations for the purpose of providing training and retraining for job counseling and placement personnel. Such grants may be used for—

"(1) improving and upgrading counselor training, improving the skills of counselors and placement personnel, and improving training programs;

"(2) providing opportunities for the establishment and development of preservice and inservice training and retraining for job counseling and placement personnel; and

"(3) providing training programs for paraprofessionals and support personnel to aid professionals working in job counseling and placement.

"(b) For purposes of this section, the term 'job counseling and placement personnel' includes professionals, including counselors who meet certification requirements; administrators, and other professional school personnel such as teachers and pupil personnel specialists, who work directly with the programs or with students involved with the programs; and counselors in related settings such as community agencies, community-based organizations, job training programs, United States Employment Service, and affiliated State employment service agencies, rehabilitation centers, career resource centers, and post-secondary educational institutions.

"DEMONSTRATION AND EVALUATION PROGRAMS

"SEC. 759. (a) The Secretary is authorized to carry out a program of demonstration and evaluation projects for the purpose of—

"(1) developing and demonstrating new job counseling, job information, and job placement programs and techniques for youth;

"(2) promoting demonstration activities in job counseling and job placement for youths, through the encouragement of pilot projects and the publication of development in new technology, personnel utilization, facilities utilization, and delivery systems with innovative administrative and structural designs;

"(3) providing for evaluation of the programs and services offered to determine their effectiveness and efficiency in meeting the needs of youths; and

"(4) providing for the communication of proven effective and efficient job counseling, job information, and job placement programs for youths.

"(b) Demonstration and evaluation projects under this section may include, but shall not be limited to—

"(1) establishing innovative job counseling, job information, and job placement programs and techniques for youths;

"(2) creating new data and data sources, and updating and communicating information, on job and career opportunities;

"(3) identifying effective methods of establishing programs, and for communicating on how to establish programs, of job counseling and job placement that meet the needs of youths and make the most efficient and effective use of job counseling and placement personnel;

"(4) developing multimedia materials which (A) provide information on such areas as career and job opportunities, projected needs for specific skills and occupations at the local, State, and National levels, and educational and training opportunities and which (B) assist youths in making career and job decisions and in obtaining jobs;

"(5) identifying more effective methods for the training and retraining of job counseling and job placement personnel;

"(6) establishing local councils of educators, employers, union members, community organization members, students, parents, and other interested citizens to bring together sectors of the community concerned with youth, to advise on, oversee, or carry out job counseling and placement projects and programs;

"(7) contracting with other agencies, community-based organizations, private employment services or other groups with job counseling and placement experience, to provide such services on a demonstration basis;

"(8) establishing a demonstration public or private television program at the local level, on a scheduled basis, which would solicit job listings from employers and give regular job availability bulletins, interview employers about job offerings and requirements, present occupational information, and present other job market information that would be useful to youths;

"(9) developing a local and State occupational inventory of entry-level jobs, as well as summer and part-time jobs;

"(10) establishing demonstration projects to measure educational and skill requirements of entry-level jobs in various occupations, with publication of findings; and

"(11) establishing any other project which the Secretary finds may improve, or provide information which may improve, the job counseling, job information or job placement services available to youths.

"(c) The Secretary shall prepare and submit a report annually to the Congress on projects undertaken under this section, containing a description of each project undertaken, the purpose of each project, and an evaluation of each project.

"PART E—GENERAL PROVISIONS

"DEFINITION

"SEC. 771. As used in this title—

"(1) 'eligible applicant' means any public agency, including any department or agency of the Federal Government, any State or local government agency, and any local educational agency; and any private or public nonprofit organization, including any voluntary organization, any neighborhood organization, any community-based organization, and any labor union;

"(2) 'prime sponsor' means any prime sponsor qualified under title I of this Act;

"(3) 'secondary school' means a day or residential school which provides secondary education, as determined under State law, except that it does not include any education provided beyond grade 12; and

"(4) 'action-learning-job' means any job with a public or private employer or community service organization, in which an individual performs a needed service while acquiring and developing skills which will enable the individual to obtain permanent employment on or before the conclusion of employment provided for in this title.

"SPECIAL CONDITIONS

"SEC. 772. (a) Within a reasonable time after receiving funds under parts A and B of this title, the prime sponsor shall—

"(1) place a notice in each daily or weekly newspaper servicing the area under the jurisdiction of the prime sponsor which announces the program under each such part and provides basic information concerning each such program, including an address where more detailed information and application forms may be obtained;

"(2) prepare and make available application forms and others relevant material for eligible applicants which, to the fullest extent practicable, minimize the paperwork burden on each such applicant and are designed to encourage applications from eligible applicants not currently carrying out programs for the prime sponsor; and

"(3) conduct a reasonable number of public meetings at convenient places within the area under the jurisdiction of the prime sponsor to provide information concerning the program.

"(b) A prime sponsor shall not provide any financial assistance to any eligible applicant under parts A, B, and C of this title unless the prime sponsor determines, in accordance with such regulations as the Secretary shall prescribe, that—

"(1) the project or program (A) will result in an increase in employment opportunities over those opportunities which would otherwise be available, (B) will not result in the displacement of currently employed workers, including partial displacement such as a reduction in the hours of non-overtime work or wages or employment benefits, (C) will not impair existing contracts for services or result in the substitution of Federal or other funds in connection with work that would otherwise be performed, and (D) will not substitute jobs assisted under this part for existing federally funded jobs;

"(2) youths employed in jobs assisted under parts A, B, or C will be paid wages which will not be lower than whichever is the highest of (A) the minimum wage which would be applicable to the employee under the Fair Labor Standards Act of 1938, as amended, or (B) the State or local minimum wage for the most nearly comparable covered employment;

"(3) persons employed in necessary technical, administrative, supervisory, or support positions assisted under part A shall be paid wages which shall not be lower than whichever is the highest of (A) the minimum wage which would be applicable to the employee under the Fair Labor Standards Act of 1938, if section 6(a)(1) of such Act applied to the participant and if he were not exempt under section 13 thereof, (B) the State or local minimum wage for the most nearly comparable covered employment, (C) (i) in the case of those applicants which are States, political subdivisions, local educational agencies, or public institutions of higher education, the prevailing rates of pay for persons employed in similar public occupations by the same employer or, (ii) in the case of those applicants which are nonprofit private organizations or institutions, the appropriate prevailing wages determined in accordance with the Service Contract Act of 1965, or the prevailing rates of pay for persons employed in similar occupations by the same employer, whichever is higher, or (D) in the case of persons performing work of the type to which the Davis-Bacon Act, as amended (40 U.S.C. 276a–276a–5) applies, the prevailing wage determined in accordance with that Act; except that the provisions of this paragraph shall not apply if the necessary technical, administrative, supervisory, or support personnel are regularly employed by the eligible sponsor and are employed by funds not appropriated under this part, in which case the wages of the technical, administrative, supervisory, or support personnel shall be governed by the provisions of law applying to their regular, employment;

"(4) appropriate workmen's compensation, health insurance, and other benefits will be provided to youths and other persons employed in jobs assisted under such parts, except that, pursuant to regulations of general applicability prescribed by the Secretary, the Secretary may arrange for the direct Federal provision of such benefits whenever he determines that an eligible applicant by reason of size or resources is ill equipped to provide such benefits;

"(5) the provisions of section 2(a)(3) of Public Law 89–286 (relating to health and safety conditions) shall apply to programs and projects assisted under such parts; and

"(6) every youth employed in programs

and projects assisted under such parts will be advised, prior to entering upon employment, of his rights and benefits in connection with such employment.

"(b) The Secretary shall prescribe regulations to insure that programs and projects assisted under this title have adequate internal administrative controls, accounting requirements, personnel standards, evaluation procedures, and other policies as may be necessary to promote the effective use of such assistance, except that no regulations prescribed under this subsection shall impose unreasonable burdens upon eligible applicants that are ill equipped by reason of size or resources to comply.

"(c) The Secretary shall prescribe regulations to insure that periodic reports will be submitted to him by prime sponsors containing data designed to enable the Secretary and the Congress to measure the relative effectiveness of this title and other federally funded job programs for youths. Such data shall include information on—

"(1) characteristics of participants including age, sex, race, health, educational level, and previous wage and employment experience; and

"(2) total dollar cost per participant, including breakdown between wages, training, all fringe benefits, supplies and equipment, and administrative costs;

except that no regulations prescribed under this subsection shall impose unreasonable burdens upon eligible applicants that are ill equipped by reason of size or resources to comply.

"(d) A prime sponsor shall not provide financial assistance for any program or project under this title which involves political activities; and neither the program, the funds provided therefor, nor personnel employed in the administration thereof shall be in any way or to any extent engaged in the conduct of political activities in contravention of chapter 15 of title 5, United States Code. The Secretary shall prescribe regulations to carry out the provisions of this subsection.

"(e) Each prime sponsor may by regulation, permit youth who have attained 14 years of age but not 16 years of age and who are enrolled in school, to participate in any program or project under part A, B, or C of this title if—

"(1) the job for which assistance is provided under each such part is a part-time job; and

"(2) the job is reasonably related to the continuation of such a youth in secondary school.

"EDUCATION WORK COMMITTEE OF PRIME SPONSOR'S PLANNING COUNCIL

"SEC. 773. (a) Each prime sponsor shall establish an Education-Work Committee of the planning council of such sponsor established under section 104. Each such committee shall be convened by the prime sponsor, and shall be composed of members who are representative of: (1) the prime sponsor; (2) the local educational agency or agencies; (3) local business and industry; (4) local labor organizations; and (5) the local U.S. Employment Service office or offices.

"(b) (1) The representative of the prime sponsor shall serve as the chairman of the Committee.

"(2) The prime sponsor shall provide such professional, technical and clerical staff as is necessary to serve the Committee.

"(c) The Committee shall advise in the development of the terms and conditions of the contracts between the prime sponsor and the local educational agency or agencies under part C of this title. In addition, each member of the Committee shall approve of, such contracts. When approval is withheld, the withholding member must state in writing the reasons and provide the Committee in writing a suggested alternative which he would approve. No such contract under part C shall be carried out without the approval of each member of the Committee.

"(d) The Committee shall make recommendations concerning the approval of programs and projects under parts A, B and D of this title, and assist in organizing and coordinating activities at the local community level which strengthen the process of transition from school to work for youth.

"(e) The Committee shall prepare a local career development plan which includes a general plan of the programs to be carried out under this title, and make recommendations for coordinating such activities with other related activities which are carried out by organizations represented on the Committee.

"(f) Except with respect to programs conducted under part C of this title, any final decision with respect to recommendations submitted by the Committee shall be made by the prime sponsor.

"PAYMENTS

"SEC. 774. (a) The prime sponsor shall pay to each eligible applicant having an application approved under this title by the prime sponsor, the amount which the applicant is entitled to receive under this title.

"(b) Payments made to eligible applicants, may be made in installments, and in advance or by way of reimbursement, with necessary adjustments on account of overpayments or underpayments, as the Secretary may determine.

"RESPONSIBILITY TO YOUTHS

"SEC. 775. (a) Nothing in this title shall be construed by any prime sponsor as reducing the responsibility of that prime sponsor to youths under any other title of this Act.

"(b) Each prime sponsor shall endeavor to coordinate activities and programs authorized under this title with similar activities or programs authorized under other provisions of this Act and other relevant provisions of Federal laws.

"DEFINITION OF YOUTH

"SEC. 102. Section 801(a) of such Act (as redesigned by section 101 of this Act) is amended by adding at the end thereof the following new paragraph:

"(15) 'Youth' means any individual who has attained sixteen years of age but not twenty-two years of age.".

TITLE II—NATIONAL CONSERVATION CORPS

SHORT TITLE

SEC. 201. This title may be cited as the National Conservation Corps Act of 1977".

PROGRAM AUTHORIZED

SEC. 202. The Act entitled "An Act to establish a pilot program in the Departments of the Interior and Agriculture designated as the Youth Conservation Corps, and for other purposes", enacted August 13, 1970 (84 Stat. 794; 42 U.S.C. prec. 2711 note; 16 U.S.C.A. 1701–06) (hereafter in this Act referred to as the Youth Conservation Corps title), is amended by adding at the end thereof the following new title:

"TITLE II—NATIONAL CONSERVATION CORPS

"FINDINGS AND PURPOSE

"SEC. 201. (a) The Congress finds—

"(1) that young American workers bear an excessive burden of unemployment and have a difficult time finding productive and useful jobs;

"(2) that young workers experience unemployment more often and for longer periods of time;

"(3) that prolonged periods of unemployment for young workers limit their ability to obtain job skills, work experience, and work attitudes needed for more skilled, more productive, and higher-paying jobs in the Nation's economy, resulting in a significant economic loss both to young workers and the Nation's economy;

"(4) that high unemployment among the Nation's youths strains the social service resources at the Federal State and local levels and reduces tax revenues;

"(5) that large inventories of conservation work and other work of a public nature exists within the national park system, the national forest system, the national wilderness system, and on State, municipal and other public land and water areas of the United States which require a large investment of labor and relatively small investment of capital to be successfully carried out;

"(6) that much of the conservation work of a public and environmental nature on the lands and waters of the United States, such as reforestation, timber stand improvement, first prevention, trail and campground improvement, and insect, soil erosion and flood control, can be accomplished by youths working under adult supervision at a minimal cost to the Nation; and

"(7) that work on such projects can provide significant economic benefits to youths and the Nation by providing youths with job skills, work experience, and work attitudes which they might not otherwise obtain.

"(b) It is the purpose of this title to provide useful employment and a decent income, valuable work experience and job skills, and good work habits to youths on projects which reduce the current inventory of conservation work or which provide a public benefit on the public lands and waters of the United States or any subdivision thereof.

"NATIONAL CONSERVATION CORPS

"SEC. 202. The Secretary of the Interior and the Secretary of Agriculture (hereinafter in this title referred to as the 'Secretaries') shall establish a National Conservation Corps (hereinafter in this title referred to as the 'Corps') for the purpose of providing employment and training for youths in projects which reduce the inventory of conservation, protection, reforestation, regeneration, improvement, development, utilization, maintenance, or enjoyment of the natural resources of lands and waters under the ownership or control of the United States, any agency thereof, or of any State or any subdivision thereof.

"NATIONAL CONSERVATION CORPS MEMBERSHIP

"SEC. 203. (a) Individuals employed as Corps members under this title—

"(1)(A) shall have attained age nineteen but not attained age twenty-four or (B) shall have attained age sixteen (or completed high school) but not attained age nineteen, in the case of individuals who have left school and who give adequate assurances, under criteria established by the Secretaries, that they did not leave school for the purpose of obtaining employment under this title;

"(2) shall be physically capable, as determined under regulations established by the Secretaries, to carry out the work of the Corps;

"(3) shall be given preference for employment if any such individual resides in any labor market areas having substantial or persistent unemployment as determined by the Secretary of Labor and;

"(4) may be employed for a total period of not more than twelve months, with such maximum employment period consisting of one continuous twelve-month period or of two or more periods which together total twelve months.

"(b) Individuals shall be employed as Corps members without regard to race, color, religion, sex, or national origin, and without regard to the civil service or classification laws, rules, or regulations.

"SECRETARIAL DUTIES AND FUNCTIONS

"SEC. 204. (a) In carrying out this title, the Secretary of the Interior and the Secretary of Agriculture shall—

"(1) determine, with the cooperation of other Federal agencies, the areas under the administrative jurisdiction of the Secretaries or other areas as provided under section 206 (b) which are appropriate for carrying out programs or projects employing members of the Corps;

"(2) place individuals employed as Corps members into jobs which will diminish the backlog of relatively labor intensive projects which would otherwise be carried out if adequate funding were made available;

"(3) employ such individuals in such projects as—

"(A) tree nursery operations, planting, pruning, thinning, and other silvicultural measures;

"(B) erosion control and flood damage;

"(C) wildlife habitat improvements;

"(D) range management improvements;

"(E) recreation development, rehabilitation, and maintenance;

"(F) forest insect and disease control, road and trail improvements, and wildlife preservation;

"(G) general sanitation, cleanup, and maintenance of State and public lands; and

"(H) other similar conservation projects;

"(4) in determining appropriate work projects for Corps members, give priority to projects that—

"(A) are relatively labor intensive;

"(B) have work plans or for which work plans could be readily developed;

"(C) may be initiated promptly; and

"(D) are productive;

"(5) provide no fewer than one supervisor for each ten participating youths, and provide that the supervisory personnel are adequately trained in skills needed to carry out the program or project and can instruct participating youths in skills needed to carry out the program or project;

"(6) to the maximum extent practicable employ such individuals in areas where existing residential facilities are available;

"(7) to the maximum extent practicable employ such individuals in activities similar to activities of those employed in seasonal and part-time employment, in the case of the Secretary of the Interior, in the National Park Service, Bureau of Outdoor Recreation, the United States Fish and Wildlife Service, the Bureau of Reclamation, the Bureau of Land Management, and the Bureau of Indian Affairs, and, in the case of the Secretary of Agriculture, in the Forest Service and the Soil Conservation Service;

"(8) determine rates of pay for Corps members by giving consideration to housing, transportation, food, medical, and other direct benefits of employment (except that supplies and equipment shall not be benefits of employment), but in no event shall the rates be set at less than the current Federal minimum wage, set forth in section 6(a)(1) of the Fair Labor Standards Act of 1938, as amended;

"(9) provide for the safety, health, and welfare of Corps members;

"(10) assure to the maximum extent feasible that the Corps program—

"(A) will not result in the displacement of currently employed workers (including partial displacement such as a reduction in the hours of nonovertime work or wages or employment benefits);

"(B) will not impair existing contracts for services or result in the substitution of Federal or other funds in connection with work that would otherwise be performed; and

"(C) will not substitute jobs of Corps members for existing federally assisted jobs; and

"(11) promulgate regulations for the implementation and administration of the provisions of this title, within sixty days of its enactment.

"(b) Existing but unoccupied Federal facilities and surplus or unused equipment, or both, of all types including military facilities and equipment may be used by Corps members, where appropriate and with the approval of the Federal agency involved, except that in carrying out this title, the Secretaries shall provide, to the maximum extent practicable, that Corps members under this title shall not, at the same time, share common facilities or work on common projects with Corps members under title I of this Act.

"(c) The Secretaries are authorized to contract with any public agency or organization which has been in existence for at least five years prior to the date of enactment of this Act, for the operation of any Corps project.

"(d) The Secretaries are authorized to enter into such agreements with Federal, State, and local agencies (public or private) as may be necessary for the purpose of utilizing the services and facilities thereof to support Corps projects. To the extent not otherwise available on a nonreimbursable basis, the Secretary may reimburse such agencies for services and facilities provided under this section.

"APPLICATION OF PROVISIONS OF FEDERAL LAW

"SEC. 205. Except as otherwise specifically provided in the following paragraphs of this section, Corps members shall not be deemed Federal employees and shall not be subject to the provisions of law relating to Federal employment including those regarding hours of work, rates of compensation, leave, unemployment compensation, and Federal employee benefits:

"(1) For purposes of the Internal Revenue Code of 1954 (26 U.S.C. 1 et seq.) and title II of the Social Security Act (42 U.S.C. 401 et seq.), Corps members shall be deemed employees of the United States and any service performed by a person as a Corps member shall be deemed to be performed in the employ of the United States.

"(2) For purposes of subchapter 1 of chapter 81 of title 5 of the United States Code, relating to compensation to Federal employees for work injuries, Corps members shall be deemed civil employees of the United States within the meaning of the term 'employee' as defined in section 8101 of title 5, United States Code, and provisions of that subchapter shall apply, except that the term 'performance of duty' shall not include any act of a Corps member while absent from his or her assigned post of duty, except while participating in an activity (including an activity while on pass or during travel to or from such post of duty) authorized by or under the direction and supervision of the Secretary.

"(3) For purposes of chapter 171 of title 28 of the United States Code, relating to tort claims procedure, Corps members shall be deemed civil employees of the United States within the meaning of the term 'employee of the Government' as defined in section 2671 of title 28, United States Code, and provisions of that chapter shall apply.

"(4) For purposes of section 5911 of title 5 of the United States Code, relating to allowances for quarters, Corps members shall be deemed civil employees of the United States within the meaning of the term 'employee' as defined in that section, and provisions of that section shall apply.

"GRANTS FOR STATE AND MUNICIPAL PROJECTS"

"SEC. 206. (a)(1) The Secretaries are authorized to make grants to the States and to subdivisions thereof to assist them in employing youths to carry out projects described in section 204 of this title on non-Federal public lands and waters.

"(2) For the purposes of this section, the term 'States' includes the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, the Trust Territory of the Pacific Islands, and American Samoa.

"(b)(1) No grant may be made under this section unless an application therefor has been submitted to, and approved by, the Secretaries. Such application shall be in such form, and submitted in such manner, as the Secretaries shall by regulation prescribe, and shall contain—

"(A) assurances satisfactory to the Secretaries that the applicant shall administer the project for which application is submitted in accord with the provisions of section 204;

"(B) assurances satisfactory to the Secretaries that individuals employed under the project for which application is submitted shall meet the eligibility requirements of section 203; and

"(C) such other assurances and information as the Secretaries may require.

"(2) The Secretaries may approve applications which they determine—

"(A) meet the requirements of paragraph (1) of this subsection, and

"(B) describe projects similar to projects described in section 204 of this title on non-Federal public lands or waters within the jurisdiction or control of the applicant.

"(c) Of the sums appropriated under section 209(b) for the fiscal year beginning October 1, 1977, not more than twenty-five per centum shall be made available for grants under this section. Of the sums appropriated under section 209(b) for the fiscal year beginning October 1, 1978, not more than thirty per centum shall be made available for grants under this section. Amounts reserved for this section in any subsequent fiscal year shall be determined by the Congress after receiving the recommendations of the Secretaries of Agriculture and Interior in the report required by section 207. Within 90 days from the date such report is referred to the House Committee on Education and Labor and the Senate Committee on Interior and Insular Affairs, each such committee shall report legislation providing authorizations for the fiscal year to which the report refers.

"(d) The States and political subdivisions thereof, in employing youths in the grant programs authorized by this section, shall have the same duty, with respect to common facilities and projects, as is imposed on the Secretaries under section 204(b).

"(e)(1) The amount of any grant under this section shall be determined by the Secretaries, except that no grant for any project may exceed 80 per centum of the cost (as determined by the Secretaries) of such project.

"(2) Payments of grants under this section may be made in advance or by way of reimbursement and at such intervals and on such conditions as the Secretaries find necessary.

"SECRETARIAL REPORTS

"SEC. 207. The Secretaries shall prepare jointly and submit to the President and the Congress a report detailing the activities carried out under this title for each fiscal year. Such report shall be submitted not later than February 1 of each year following the date of enactment of this Act. The Secretaries shall include in such report such recommendations as they deem appropriate for changes in the percentage of funds allocated to States and political subdivisions thereof, under section 206(c).

"TIME PERIOD FOR PLANNING AND PREPARATION

"SEC. 208. (a) During the period beginning on the date of enactment of this title and ending on October 1, 1977, the Secretaries shall prepare a plan to carry out the activities authorized by this title and prepare the site locations, facilities, and equipment selected in the plan. Such plan shall contain an estimate of the annual costs of carrying

out the activities authorized by this title, a procedure for selecting candidates for the Corps, a list and description of the work projects initially selected by the Secretaries for the Corps to carry out under this title, and a list and description of site locations, facilities, and equipment initially selected by the Secretaries for work camps to be used by the Corps under this title. In preparing such plan, the Secretaries shall plan for a capacity of the Corps to employ one hundred thousand youths under this title during its first fiscal year of operation, two hundred thousand youths during its second fiscal year of operation, two hundred and fifty thousand youths during its third fiscal year of operation, and three hundred thousand youths during its fourth fiscal year of operation.

"(b) No youths shall be employed in the Corps under section 202 and no grants shall be made to the States, and political subdivisions thereof, under the grant program of section 206 until January 1, 1978.

"(c) The Secretaries shall submit to the Congress the plan required by susbection (a) no later than October 1, 1977. If neither House of Congress disapproves such plan within sixty days after its submission, such plan shall be deemed approved.

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 209. (a) There is authorized to be appropriated to the Secretaries for preparing the plan required under section 207 of this title, and for preparing the sites, facilities, and equipment selected in such plan (utilizing persons eligible for employment under this title, where practicable), $50,000,000 for the period beginning on the date of enactment of this title and ending on the two hundred and fortieth day after such date.

"(b) There are authorized to be appropriated in addition to the amounts appropriated under subsection (a) for the purpose of carrying out this title, such sums as may be necessary for the fiscal year beginning October 1, 1977, and for each of the three succeeding fiscal years.".

TECHNICAL AMENDMENTS

SEC. 203. The Youth Conservation Corps Act is further amended by—

(1) inserting immediately after the enacting clause the following:

"TITLE I—YOUTH CONSERVATION CORPS";

(2) redesignating sections 1 through 6 as sections 101 through 106, respectively;

(3) striking out "section 6" in section 104 (d) (as redesignated by clause 2 of this section) and inserting in lieu thereof "section 106";

(4) striking out "Act" each place it appears in sections 101 through 106 (as redesignated by clause 2 of this section) and inserting in lieu thereof "title"; and

(5) adding after section 106 (as redesignated by clause 2 of this section) the following new section:

"SHORT TITLE

"SEC. 107. This title may be cited as the 'Youth Conservation Corps Act'".

TITLE III—JOB CORPS

INCREASED APPROPRIATIONS

SEC. 301. Title IV of the Comprehensive Employment and Training Act of 1973 is amended by adding at the end thereof the following new section:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 420. In addition to amounts authorized by any other provisions of this Act, there are authorized to be appropriated $150,000,000 for the fiscal year 1978 and for each succeeding fiscal year thereafter to carry out the provisions of this title.".

EXHIBIT 2

COMPREHENSIVE YOUTH EMPLOYMENT ACT OF 1977

SUMMARY

Title I of this bill amends the Comprehensive Employment and Training Act of 1973 (CETA) by creating a new Title VII—"Youth Employment and Community Service Programs". This new title enables CETA prime sponsors to establish four new job creation and counseling programs for youths—

Youth community service. This nationwide youth service program will create employment opportunities for youths on specially-created projects providing needed services to their local communities. The program would be open to all youths, although the allocation formula channels extra funds to prime sponsors having large numbers of low-income or unemployed youths. Community service projects may be proposed by any State or local agency, or any public or private non-profit organization, including youth service agencies, community-based organizations, labor unions, and many others, and must satisfy a number of standards, including the provision of at least one supervisor for every ten youths. Participating youths will be paid no less than the minimum wage, and will receive training needed for their projects. The requirement that projects originate within the local community with prime sponsor approval insures that participating youths will experience useful, productive and fulfilling work on Youth Community Service projects. Education-Work Committees of local CETA planning councils are established to advise and make recommendations concerning prime sponsors' youth employment plans.

Youth opportunity in private enterprise. Under this program, CETA prime sponsors can contract with public and private nonprofit agencies to develop programs to place youths in jobs in private enterprise and to provide necessary counseling, training and supportive services to participating youths and employers. Aimed primarily at low-income and disadvantaged youths who require remedial education, counseling, and development of basic work skills to become work-ready, the Youth Opportunity in Private Enterprise program enables sponsors to develop a wide variety of means of preparing and placing youths in jobs in private enterprise—providing comprehensive counseling and guidance, providing remedial education, and developing new work-study and apprenticeship arrangements. In addition the bill would authorize the use of funds appropriated under this title for payment of on the job training costs.

Work experience for in-school youth. This program is designed to provide in-school youth with job experience prior to secondary school completion, and without interrupting their educational program. CETA prime sponsors would enter into agreements with local education agencies, which would contract with public and private employers to provide part-time work specifically related to the education program of the secondary school student. The school based counselor must certify that the work is an appropriate component of the student's total program, and would also supply necessary guidance and counseling services. Participating employers would be paid for all training and recruitment costs incurred, but not for actual wages paid to students. Local education agencies would be supported for the administrative costs and the guidance, counseling and related components of operating the program. An Education-Work Committee of the existing local CETA planning councils must approve each agreement between local education agencies and prime sponsors. This agreement shall include a "career development plan" which shall specify the general plan of the program and coordinate the operation of this program with related activities carried out by the Committee members in the local area. As in the proposed Youth Community Services program, the Education-Work Committee would be composed of the representatives of the prime sponsor, the local education agency, labor organizations, the U.S. Employment Service and employers. Any youth enrolled full time in a participating secondary school who can benefit from the program shall be eligible to participate. Funds shall be allotted based on the number of students enrolled in secondary schools, with additional funds allotted to areas based on enrollment of disadvantaged youth.

Occupational information and career counseling. This program is designed to provide all the Nation's youths—and particularly work-bound high school, junior college, and out of school youths—with the job information, job counseling and job guidance they need to make informed and intelligent career choices. The CETA prime sponsors, under this program, may arrange with public and private non-profit agencies, the United States Employment Service, or local education agencies for programs to place trained counselors right in high schools and junior colleges; establish counseling centers in low-income, rural or urban neighborhoods; develop comprehensive catalogues of entry-level jobs at the local level; develop pre-employment counseling programs for junior high school students; develop programs for training and retraining counselors with skills needed to assist workbound, as well as college-bound, youths; and develop innovative and demonstration counseling and guidance programs.

A National Occupational Information and Career Guidance Service is established within the Labor Department to coordinate and compile education and work data, to improve State data collection, to provide local programs with up-to-date occupational information and projections, and to provide supporting services to local programs.

Title II of the Comprehensive Youth Employment Act establishes a National Conservation Corps which would provide youths up to the age of 24 years, with work and training on projects in the national parks, national forests, or other public lands and waters, performing a wide variety of important conservation work, such as reforestation, fire prevention, campground improvement, and soil erosion control. The National Conservation Corps will be directed by the Secretaries of Agriculture and Interior, and projects may be located on Federally-owned lands as well as on lands owned by States or municipalities. Youths may participate in the National Conservation Corps for up to one year. Any youth may participate, although preference is given to those from areas with substantial or persistent unemployment. The existing Youth Conservation Corps is retained, with its emphasis on providing summer work for teenagers, as part of the National Conservation Corps.

Title III of the Comprehensive Youth Employment Act would significantly expand the Job Corps by providing an additional $150 million yearly above the current funding level.

During the remainder of this fiscal year, the Comprehensive Youth Employment Act will provide about $200 million for the start-up costs of these programs. For fiscal 1978, the authorization would be $2 billion for the CETA and Job Corps programs, plus the funds needed to provide 100,000 jobs in the National Conservation Corps. For succeeding fiscal years, the authorization level would be determined by a formula, based on the na-

tional unemployment rate, that would provide about $3.5 billion at 7 percent unemployment and $4.0 billion at 8 percent unemployment for the CETA and Job Corps programs, plus the funds needed to provide up to 300,000 jobs in the National Conservation Corps.

By Mr. BARTLETT:

S. 172. A bill to amend title 2 of the Social Security Act to repeal the earnings limitation for all workers age 62 and over, and to increase to $4,200 the amount of outside earnings which (subject to further increases under the automatic adjustment provisions) is admitted an individual each year without any deduction from benefits thereunder; to the Committee on Finance.

Mr. BARTLETT. Mr. President, one of the primary points of discussion in remodeling our welfare and unemployment programs is the removal of work disincentives. The stories are numerous, and well publicized, about individuals and families that find it more beneficial to stay on Government support programs rather than lose money by returning to the work force.

The taxpaying public is outraged by these circumstances, because they are the source of the public support, and they own the businesses, both large and small, that have difficulty in finding enough employees to fill their current vacancies.

There is one area that has been ignored, that being the earnings limitation under the Social Security Act. It is forgotten that social security is a form of Government support paid for out of tax dollars. This oversight is based on the fact that social security payments are looked on differently than welfare and unemployment payments.

This earning limitation does not seem as insidious as the programs that cause people to intentionally withhold themselves from the job market to secure ever-increasing benefits on a "Government dole," but it does deprive the employer of a source of employees. These are employees already trained and with a good deal of experience. It also deprives the retiree of the opportunity to remain employed and to work as much as he or she may desire.

This desire to work on the part of the retiree can either be from the drive to avoid idleness or from a more common need of economic necessity.

Obviously many people are satisfied to retire and spend their time resting or pursuing long-postponed hobbies and pleasures, but there are many who do not want to discontinue employment merely because their employer of many years has a mandatory retirement policy.

This country is in part based on the concept of "individual freedom of choice." The retiree should have the opportunity to work as little or as much as he or she desires.

Those persons who have previously investigated this area estimate that there would be a loss in excess of $3 billion for the first year; however, this figure is only based on the "benefit dollars" that would no longer be withheld. It does not take into account the revenues that would enter the system both in general tax dollars and specific withholding for social security. I do not attack the statisticians for the limited information available, because the fact is, there is no way to determine the income, since there is no evidence as to how many persons would take advantage of the removed limitation.

The second title of my proposed legislation raises the earnings limit for all other subject individuals to $4,200 per year. These are the persons that are most obviously in the work force and should be encouraged toward employment. This substantial group of people rely on social security benefits, because they are responsible for dependents or are in fact dependents themselves attending schools or following courses of higher education. Certainly to encourage those that are in the mainstream of the Nation's work force is a primary concern of our society, and we as Members of Congress should do all that we can to foster this ideal.

Both the retiree and other beneficiaries of the Social Security System need to maintain economic independence. Looking to the future, we know that the retiree will be an ever-increasing part of our society, and it behooves us to anticipate alternative means of supporting these people outside of tax revenues. Their independence from the vagaries of public financing should be uppermost in our minds, and I, therefore, encourage my fellow Senators to support this legislation, and to look toward new and innovative means of assisting particularly the retiree as well as others eligible for social security.

By Mr. KENNEDY:

S. 173. A bill to establish the birthplace of Susan B. Anthony in Adams, Mass., as a national historic site, and for other purposes.

BIRTHPLACE OF SUSAN B. ANTHONY

Mr. KENNEDY. Mr. President, I am introducing today legislation to establish the birthplace of Susan B. Anthony as a national historic site. I ask unanimous consent that the text of the bill be printed in the RECORD.

Susan B. Anthony's birthplace is in Adams, Mass., and it is to the people of Adams that we owe a great debt for the preservation of this site to the present day. The time has come for us to make a national tribute to this outstanding American leader in the women's rights movement, and I am hopeful that the Senate will act quickly to assure that the birthplace of Susan B. Anthony is protected for generations to follow us.

I ask unanimous consent that an article about Susan B. Anthony from the New York Times of April 1, 1945, be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

ARE WOMEN PERSONS?

This year marks the 125th anniverary of the birth of militant suffragist, Susan B. Anthony. This Quaker maiden who eventually "changed the mind of a nation," was one of the outstanding women of her century—the century that freed American women from their economic and legalistic shackles.

Although she was educated in the proper Quaker manner—studying mortality, humility, love of virtue, and modesty—she was not a proper Quakeress, even as a child. She was too curious. She was too logical. She was too passionate.

At 17, she left the small Massachusetts town of her birth and found a job as a school teacher in Canajoharie, N. Y. She was already a violent Daughter of Temperance, an Abolitionist, and her conviction that women were the moral and intellectual equals of men marked her as a social revolutionary even at that early age. Miss Anthony grew up in a period of social reform and represented much of the spirit of that reform.

She was five feet six inches tall, with broad shoulders. Her brown hair was thick and shiny. Her eyes were brilliant, and her lips were soft and red. In those days she was called "a fine figure of a woman"—and she was known as "the smartest woman who had ever come to Canajoharie."

She fought off proposals of marriage, for she already had begun to visualize her career as an organizer of women. Women, at that time, were perpetual minors in the eyes of the law. They existed legally through their husbands. They could be taxed, but they couldn't vote. They could earn money, but they couldn't own it. They were expected to have children, but they had no legal rights over them. And Susan B. Anthony's young soul rebelled against this inequality and the laws and traditions which maintained it.

Thus when the first woman's convention was held in Seneca Falls, N. Y., Susan attended it breathlessly. For five years thereafter she participated in all forms of women's rights demonstrations and meetings, most of which were aimed at minor reforms. She soon realized, however, that ambuscades and limited war on specific injustices were not enough—that women would have to fight for total freedom, and that the ballot was the key to that freedom.

She wrote letters, circulated petitions, begged editors for publicity. She tramped the streets, arguing with apathetic women, and women who slammed the door in her face, saying that THEY had husbands, thank goodness, to protect their rights. She called meetings and introduced bills into Congress and State Legislatures. She started a newspaper called Revolution, with the motto: "The true Republic—men, their rights and nothing more; women, their rights and nothing less."

The leading men of the nation shuddered to hear an unmarried female "advocate such destructive changes in the protected status of loved and cherished wives."

The women's movement, mocked, censured from all sides, continued growing, led by a mature Susan Anthony, who worked at it constantly. With the Civil War, the feminine seekers after the vote fought ardently for Negro suffrage—assuming that when the former slaves received the franchise, certainly all women would too.

They were mistaken. The Fourteenth Amendment to the Constitution was passed—but women did not get to vote.

"Still another form of slavery remains to be disposed of," declared Susan B. Anthony at this time. "The old idea yet prevails that woman is owned and possessed of man to be clothed and fed and cared for by his generosity. The present agitation rises from the demand of the soul of woman for the right to own and possess herself."

At approximately this period, Susan Anthony clashed with Horace Greeley. "Miss Anthony," said Greeley at a suffragist convention, "you are aware that the ballot and the bullet go together. If you vote, are you also prepared to fight?"

"Certainly, Mr. Greeley," lashed out Susan sharply. "Just as you fought in the late war—at the point of a goose-quill."

But words could not do the trick. The Fourteenth Amendment had to be put to

the test. It plainly stated that persons born or naturalized in the United States were citizens, and that no law could be passed abridging the privileges of such citizens. Susan realized that her fight depended on the meaning of the word persons. Were women persons?

She put the case to the test. In 1872 she cast a vote in the Presidential election—bullying an election board to whom she read the Fourteenth Amendment into giving her a ballot—and was arrested. Her trial was at least as famous as that of the Dred Scott case. She was denied a jury, and was forbidden to testify in her own behalf. The judge ruled that women were less than persons, that they were not citizens—and at the close of a dramatic session found her guilty and fined her $100. Said Susan: "May it please your Honor, I will never pay a dollar of your unjust penalty." She never did.

For forty years she traveled over the United States, calling women's conventions, lecturing, debating with legislators. She traveled in Europe, her reputation making way before her, and discussed women's suffrage with the crowned heads of Germany and England.

When she died at 86, hundreds of columns were written, praising her work and thought. A few smug editors said: "She was the champion of a lost cause"; "Her peculiar views on this question will soon be forgotten."

But Susan B. Anthony, who had been called both "Saintly Susan" and "Napoleon" by her disciples, could have referred to her favorite motto: "Failure is impossible." Fourteen years later, in 1920, American women were enfranchised.

By Mr. CLARK (for himself, Mr. BROOKE, Mr. HUMPHREY, Mr. MCGOVERN, Mr. PERCY, Mr. CRANSTON, Mr. JAVITS, and Mr. KENNEDY):

S. 174. A bill to amend the United Nations Participation Act of 1945 to halt the importation of Rhodesian chrome; to the Committee on Foreign Relations.

RHODESIAN SANCTIONS

Mr. CLARK. Mr. President, it is a critical time for the future of Zimbabwe, or Rhodesia. In the next few weeks and months that country will either enter into a peaceful transition to full and equal participation by all its people in its government; or it will enter irrevocably into a prolonged race war. Most agree that if the Geneva negotiations are not successful, there will be no further negotiations until the liberation movements win a long and tragic struggle.

At present, the greatest barrier to a negotiated settlement is the unwillingness of Rhodesia's Prime Minister, Ian Smith, to extend to the 96 percent of the population that is black full political rights and participation. His intransigence is supported by his hope that the United States will in the end "come to its senses," as he would put it, and support his minority, racist regime.

This Congress must send a clear message to Rhodesia as soon as possible that the United States is firmly on the side of a rapid, peaceful transition to freedom and full racial equality in that country. Congress can do this by restoring U.S. compliance with international economic sanctions against Rhodesia.

Today, we are introducing a bill identical to one being introduced in the House to repeal the so-called Byrd amendment. This is the legislation that has put the United States in violation of United Nations sanctions against Rhodesia for the last 5 years. The Senate has once acted to repeal the Byrd amendment—in December 1973 by a vote of 54 to 37. Now, at the zero hour, Congress as a whole must act to strengthen peaceful international pressure on the minority regime in Rhodesia.

U.S. violation of international sanctions has undermined the effort to bring to bear effective peaceful pressure for change in Rhodesia.

Violation of sanctions has put the United States on the side of racial discrimination and minority rule in Rhodesia and has set us against justice and equality.

Violation of sanctions has hurt America's image in Africa than any other single aspect of our policy.

Violation of sanctions has undercut our ally, Great Britain, in its long effort to peacefully resolve the Rhodesia problem.

Violation of sanctions has seriously damaged our relations with the nationalist leaders of Zimbabwe—the future leaders of the country. They have looked to the United States for understanding and support for their efforts to gain freedom and racial equality. The United States has responded with a refusal to make even a minor economic sacrifice for freedom.

Mr. President, time is fast running out. If there is not a negotiated settlement of the Rhodesia problem soon, there will be no alternative to a long, tragic race war. Such a war will have serious consequences throughout the world; and the United States will be powerless to stop it.

If the United States is to effectively promote a peaceful solution to the Rhodesia problem in the coming months, there must be no confusion about this country's position. Congress can do much to make it clear that this country stands for human rights, racial equality and rapid peaceful change by restoring its compliance with international economic sanctions against Rhodesia.

By Mr. SCHWEIKER (for himself and Mr. RANDOLPH):

S. 175. A bill to provide a special program of financial assistance to opportunities industrialization centers in order to provide new skills training opportunities, and to other national community based organizations to provide comprehensive employment services to create 1 million new training and job opportunities; to the Committee on Labor and Public Welfare.

OPPORTUNITIES INDUSTRIALIZATION CENTERS SKILLS TRAINING AND NATIONAL COMMUNITY BASED ORGANIZATIONS JOB CREATION AND EMPLOYMENT ACT OF 1977

Mr. SCHWEIKER. Mr. President, on behalf of myself and my distinguished colleague from West Virginia (Mr. RANDOLPH) I send to the desk for appropriate reference a bill to provide a special program of financial assistance to opportunities industrialization centers in order to provide new skills training opportunities, and to other national community based organizations to provide comprehensive employment services to create 1 million new training and job opportunities.

Everyone in this Chamber knows that we have a tragic unemployment problem in this country. According to some economists, millions of Americans can expect to be unemployed for the foreseeable future and virtually no one is predicting full employment around the corner. In my view, our unemployment rate has become a national disaster. The ravages of high unemployment are well documented in terms of its impact on a mounting Federal deficit and in terms of its devastating effects on the lives of millions of Americans. We cannot afford, either in economic or human terms, to come to accept high unemployment as a fact of life.

There is no one solution to the problem of unemployment. Some people are unemployed simply as a result of adverse economic conditions. Others who make up the monthly unemployment statistics have been encouraged to reenter the labor market by reports of an improving economy, and still others among the unemployed have voluntarily left jobs to seek better positions or were employed in cyclical industries. For these people, measures to stimulate the economy through tax cuts and other macroeconomic policies may be sufficient to brighten the employment picture significantly. However, there are a vast number of Americans who will not benefit from measures designed to stimulate demand and thereby spur the growth of employment. These are people who have little training and even less experience. They are the young, the minorities, and those who are entering the labor market for the first time. For these people many of the jobs listed in the classified sections of our newspapers have little relevance, for they have neither the skills nor the experience to fill them. I believe this type of unemployment is our most nagging problem and one which we must begin to address effectively.

The legislation we introduce today will deal with this problem. It will do so by providing this Nation's most successful manpower training programs, those operated by Rev. Leon Sullivan's opportunities industrialization centers and other national community based organizations of demonstrated effectiveness in the delivery of employment services, with the tools to continue and to expand their efforts in the areas of job creation and job training. These organizations have resources at the national, State, and local levels and have enjoyed great success in providing manpower developmental experiences to the hard-to-employ which have facilitated their transition to regular employment.

When Congress passed the Comprehensive Employment and Training Act of 1973, it recognized the importance of community based organizations in our battle against unemployment. OIC, Jobs for Progress, Mainstream, and Community Action Agencies were cited by name in that act and these organizations and others have since assumed an important

role in our Federal manpower training programs. I believe their continuing success in addressing the employment needs of those whose needs are greatest justifies the special program of assistance established by this legislation.

The bill we introduce today contains the following major provisions: first, it authorizes the Secretary of Labor to enter into contracts with OIC and with other national community based organizations, to provide jobs, training, and comprehensive employment services to eligible persons, in coordination with private industry and specified public programs; second, this measure prescribes a number of required contract provisions designed to insure that the jobs created and filled are meaningful jobs leading to permanent employment and that veterans and hardcore unemployed receive preference; third, the bill requires nondiscriminatory program administration, with emphasis in both urban and rural areas.

Mr. President, during the next few months the Members of this body will engage in an ongoing debate on the most effective methods of dealing with unemployment. I urge my colleagues to make this bill a part of that debate, for I believe its enactment would be a significant step toward launching a successful attack on unemployment.

By Mr. BROOKE:

S. 176. A bill to amend title XVIII of the Social Security Act to provide for payment for out-of-hospital prescription drugs and eyeglasses; to the Committee on Finance.

MEDICARE SHOULD FURTHER AID OUR ELDERLY

Mr. BROOKE. Mr. President, we all want to live full, long, and healthy lives. The recent advances of medical science have enabled more and more of our fellow Americans to do this.

One disease that remains unsolved is old age, and of the many changes attendant upon advancing years, the most distressing may be the failing of the senses. Our senses are the crux of all that we are. To the extent that they are impaired, we are further removed from some aspect of life.

All of our senses decline with age. As the senses become weaker, less accurate, the ability to enjoy life is diminished.

The natural tragedy of this process is compounded by the fact that today, as the result of startling technological innovations, much of the sense impairment is unnecessary. We have been able to augment failing senses and thus restore individuals to a productive and enjoyable life. But the availability of these devices—eyeglasses, for example, and prosthetic devices—are very expensive.

One of the most serious gaps in our medicare program is the lack of coverage for vision services for the elderly. For the most part, medicare currently excludes optometrists from the definition of recognized practitioners under the program and prohibits payments for eyeglasses and eye examinations. And tragically enough, our persons over 65 years of age comprise the greatest bulk of the population needing vision care. Over 20 percent of this age group compared to less than 1 percent of the total population suffer visual impairment. Over 92 percent of our elderly have corrective lenses compared to roughly 50 percent of the population.

I feel we cannot allow the absence of necessary vision services to impede even a single person from functioning to the full extent of his capabilities, and therefore, I am today introducing a bill to amend medicare to include coverage of vision services, as well as out-of-hospital prescription drugs and prosthetic devices.

Prescription drugs are another crucial problem for our elderly. As they become older many elderly develop chronic illnesses whose pain and discomfort can be eased by today's miracle drugs. But they too are expensive, and the older persons on a fixed income should not be forced to make the choice between a needed prescription and food for the table. But this happens and it must stop. Therefore, we must amend our medicare program to enable our elderly to live in dignity and security, and as comfortably as possible.

By Mr. BROOKE:

S. 177. A bill to eliminate the requirement of a 3-day prior hospitalization to be eligible for home health care and extended care services; to the Committee on Finance.

HOME HEALTH SERVICES MUST BECOME MORE AVAILABLE

Mr. BROOKE. Mr. President, I am very concerned about the underutilization of home health services, primarily because of the stringent requirements set forth in the Social Security Act under medicare. Home health services are comprised of an array of therapeutic and preventive services provided to patients in their home or foster homes because of acute illness, exacerbations of chronic illness, and disability. These services vary depending on need. The Department of Health, Education, and Welfare has described three levels of home health care: First, Concentrated or intensive services; second, intermediate services; and finally, third, basic services, defined as "a simple combination of health supervision and maintenance designed to maintain individuals who have long-term-care needs in their own home, thus preventing or postponing the need for institutionalization."

These basic services have the greatest potential for utilization by large segments of the population, and are designed to support and maintain daily living activities of individuals who might otherwise require care in an institution.

One way we can encourage the use of home health services is to pass legislation that would waive the 3-day prior hospitalization requirement—or 3-day stay in a skilled nursing facility—that presently is mandatory for receiving home health care benefits in the medicare program. Today I am introducing legislation to amend the Social Security Act to waive this requirement.

There is a widespread consensus that we are overutilizing our institutional care. It has been estimated that as much at 25 percent of our elderly currently institutionalized could be happier and just as comfortable with the help of home health care in their homes. I urge my colleagues to support this legislation. These services are less costly, and more appropriate for large numbers of our elderly.

By Mr. BROOKE:

S. 178. A bill to assure low-income households the opportunity to participate in the food stamp program by eliminating the requirement that eligible households be charged for their food stamp allotment; to the Committee on Agriculture and Forestry.

FOOD STAMP ACT AMENDMENTS OF 1977

Mr. BROOKE. Mr. President, at the outset of the Senate's new session we must address a key issue that we must deal with as soon as possible: Food stamp program reform. I would like to start that process by introducing a bill today. While this legislation does not speak to all the intracies of our prospective legislative chore, it does propose a reform which I feel must be the basis of our lawmaking in this important area—the elimination of the food stamp purchase requirement.

Many of my colleagues will remember the efforts we undertook last year to reform the food stamp program. Indeed, under the capable leadership of the distinguished gentleman from Georgia, Mr. TALMADGE, who chairs the Senate Agriculture Committee, we acted upon a compromise measure offered by him, Mr. DOLE, and Mr. MCGOVERN, among others. It was a good measure, one that a majority of the Senate supported. Unfortunately, however, the House of Representatives failed to act on this legislation prior to adjournment.

So this year we again must look at this program for low-income citizens and fashion legislation that addresses their needs and the demand for trimmed-down, efficient, and effective program operation.

THE NATURE OF REFORM

There is no question that the food stamp program needs reform. However, I believe we now know that "reform" is not synonymous with "cutbacks."

We now know that the program is serving the role we had envisioned. We now know that the food stamp program is essential in staving off hunger and serious malnutrition for millions of people caught in the squeeze of recession. We now know that the program expansion of a year ago was not a sign of a program "out of control;" it was indication of a program working successfully to meet the increased needs of hungry Americans. We now know that the program works, not solely for the long-term poor who need food assistance to improve their diets, but also for the short-term needy who require a quick burst of purchasing power to keep food on the table.

In May 1975, when unemployment was at its peak of 8.9 percent, the food stamp program was serving approximately 19.3 million people. Since that time, unemployment has dropped and food stamp program participation has decreased by

over 2 million people, to 17 million participants in October 1976. At the time we last considered legislation, we were told that program costs could escalate to $7 billion a year, a figure which gave us all pause and caused a good deal of alarm among the public and many Members of Congress. Now, however, we are told that program costs will likely drop, continuing the trend of the last year. The program will probably cost under $5.5 billion in fiscal year 1977, and even less in fiscal year 1978.

Hence, we can now take a reasoned look at the food stamp program and the people who need its assistance, and make a clear judgment as to the best ways of improving the program. Fortunately, we are not burdened by the myths that enveloped our considerations last year. We have access to informative studies prepared by the Department of Agriculture, the Census Bureau, and the House Agriculture Committee which we can use to better target our legislative efforts. Thus, it is my hope that this year reform will be more constructively construed than last year. Reform must be aimed at making the program work as effectively as it can, reaching those people who need its assistance, with a concern toward improving the entire delivery system of income transfers that we have established.

ELIMINATION OF THE PURCHASE REQUIREMENT—EPR

Mr. President, the bill I am introducing today helps to begin the process of reform which I believe is necessary. It is only a first step; I am confident that it will be but one of many amendments to the act this year.

This reform is an essential element of any subsequent legislative effort to truly reform the program. Indeed, I agree with many of my constituents when they argue that there can be no meaningful reform without taking the step I am proposing today. Without it, the rest of our work in this area will be only cosmetic in nature.

My bill does only one thing: it eliminates the food stamp purchase requirement. It is not a novel idea. Such a provision was included in the Dole-McGovern food stamp legislation last year, as well as the bills introduced by Senators JAVITS and CHURCH.

This basic reform, by itself, does not address how much a household receives in food stamp assistance; it only involves the methods by which it receives such aid. For example, under the current system a household of four with a net income of $250 a month would pay $71 in cash each month to receive its coupon allotment of food stamps valued at $166. Thus, this household would receive a bonus of $95, the difference between the purchase price and the coupon allotment.

If there were no purchase requirement, the recipient household would receive only the bonus of $95 in food stamps, without having to pay the $71 to buy into the program.

Currently, the average household pays approximately 26 percent of its net income for its food stamps, with some households paying the maximum of 30 percent. My bill changes the portion of net income that would be invested if a purchase price were retained. It requires that the household's coupon allotment be reduced by 30 percent of its net income, instead of 26 percent, the current average. I have made this adjustment for one simple reason. Elimination of the purchase requirement, or EPR as we call it, has as its main goal to bring poor people into the food stamp program for the first time and, as such, adds cost to the program. A 30-percent benefit reduction rate lowers the cost of EPR so as to meet what I see as certain political realities.

I do want it clearly understood, however, that the use of this 30-percent benefit reduction rate for food stamps would be entirely unacceptable if the purchase price were not eliminated, in which case 25 percent—the figure in last year's legislation—would be more appropriate. In addition, EPR, with a 30-percent benefit reduction rate, requires that standard deductions, if adopted, be set high enough so that current recipients do not lose substantial amounts of assistance.

THE NEED FOR EPR

Why is EPR so important? Why do I consider it the backbone of any legislative reform?

The food stamp program's major failure is its inaccessibility to large numbers of eligible needy households. The program is not reaching a high percentage of the people who we have decided should have the opportunity to receive assistance.

More significantly, we are not even reaching many of the "poorest of the poor," those households with incomes below the poverty line. According to a recently-released special study by the Bureau of the Census, food stamp participation among the very poor is extremely low. Only about 40 percent of the households with incomes below the poverty level use food stamps. The elderly poor participate even less. Of the elderly with poverty-level incomes or lower, only 12.1 percent of the men and 20.4 percent of the women use food stamps. For households of two or more headed by an elderly person, participation is only slightly higher.

If we look at the supplemental security income, or SSI program, we see that the program's elderly, blind, and disabled participants—all of whom are categorically eligible for food stamps—do not participate to a very high degree at all. My understanding is that only about a third of the Nation's SSI recipients use food stamps.

I do not think there is one simple answer which explains why people do not use food stamps. There are a blend of factors. It was thought that one reason was because people did not associate what they heard about food stamps with the fact they might be eligible. So, we wrote an "outreach" clause into the legislation. While this provision was largely ignored for years, there has been some outreach work as of late. Although it has helped bring needy people into the Program, lack of outreach alone cannot explain the low participation of the poor.

Another oft-cited explanation for low participation is the administrative morass that surrounds program application and certification procedures. As advocates from my State have explained it to me, applicants for assistance have had such a frustrating experience that they both refuse to return to finish the tedious process and they tell their friends of their experience, thus discouraging others from applying. It is my hope that our legislation will address these problems by implementing a standard deduction, mandating tighter time frames in which applications must be acted upon, and generally making the process administratively accessible to low-income people, especially in rural areas where offices are often too distant for people without public transportation.

Still another reason for low participation is the stigma people feel when using food stamps in stores, where it is often called "funny money." This has increased, I suspect, since the program and its participants were so publicly, and wrongly, labeled "chiselers and rip-off artists" last year. It is especially true for the elderly who complain that the public assumes all the stamps are free, when in truth an elderly participant may well have paid $40 in cash to get $50 in coupons.

THE PURCHASE PRICE BARRIER

However, there is one cause of low participation that transcends these others and which is the most frequently voiced. The poor simply cannot afford to buy their food stamps. Many eligible people, especially the poorest households, have a cash-flow problem. It is terribly difficult for them to lay out 30 percent of their income for food stamps when a host of other expenses could crop up at any time. Many of the people to whom we want to target benefits are unable to tie up their limited amount of cash in coupons that cannot be used to meet other unanticipated needs. And it is not a budgetary problem; it is not that poor people cannot manage their affairs. Indeed, it is because of their ability to manage month after month, bill after bill; putting a little toward this, and a bit toward that; that they are often unable to put out large chunks of cash at one time.

Permit me to illustrate the problem. Food stamp users usually get two "authorization-to-purchase" cards a month. Food stamp vendors use these cards presented by a recipient to make an exchange of cash for coupons that is specified on that card. The cards are supposed to come on the 1st and 15th of the month, and the household plus accordingly. Let us say the card is delayed 5 days, as is often the case, because of the mail, holidays, weekends, whatever. For those 5 days, our imaginary household must use cash to buy food. Too often, by the time the food stamp card arrives, that household—living on an extraordinarily tight budget—can no longer afford the outlay of cash that it could have afforded 5 days earlier. They used a portion of it for 5 days worth of food. So, they do without the extra purchasing power that food stamps would have offered.

Another example is the person on fixed income, whether it be a social security check or public assistance. What happens

when their check arrives at a different time than their authorization-to-purchase card? It does not do such a person very much good to have received the card on time, only to have to wait until the check arrives. Moreover, even if the card and check did arrive simultaneously, there could still be insufficient cash with which to buy stamps. Usually, the bulk of household expenses such as rent and utilities must be met from the first of two semimonthly checks. In many cases this means recipients can only buy their stamps for the last half of the month, if at all.

Perhaps the problems caused by the food stamp purchase requirement can best be understood by comparing the purchase of food stamps to the food budgeting process of a nonpoor household. A nonpoor household can budget its food purchases according to the frequency of its receipt of income. Thus, shopping trips can be planned on a biweekly or weekly basis, with more frequent purchases for small items. Food stamp households on the other hand, have this flexibility only once they have made the significant cash outlay to buy their stamps. This purchase in most cases, has no relationship to the receipt of income or the ability of that household to make the purchase. The food stamp household is thus forced into an expenditure pattern that does not reflect either the availability of income or the needs of the household.

Simply stated, using food stamps is a difficult way to make sure you have enough food on the table. And I am confident that the purchase requirement is the overwhelming reason why poor people do not participate in such high numbers. We have decided, on the one hand, that people in certain financial situations should receive some assistance. Then we turn with the other hand and structure the mechanism for providing the assistance so that a large portion of our target population cannot avail themselves of it.

If the States and community advocates' outreach efforts achieved one thing above all else, it was to show that the basic structure of the food stamp program itself—specifically, the purchase requirement—was the major obstacle to participation. Until we remove that barrier, we will not—indeed cannot—correct the problem.

If the proponents of EPR are correct, and I believe they are, vital food stamp program benefits will become available to the poorest of the poor for the first time. And, certainly, this will add to the cost of the program considerably. But I submit, Mr. President, that this is money well-spent. It is money going to people who should always have been in the program but who were forced out by a purchase price they could not afford. And let me reiterate that this will not add a penny to the benefits accorded current recipients; in fact, the increase in the benefit reduction rate to 30 percent of net income will cut benefits slightly. We should no longer maintain a program that systematically keeps the very poor people we seek to aid from receiving its assistance.

OTHER BENEFITS OF EPR

While I feel strongly that the foregoing argument is compelling enough to warrant the adoption of EPR, there are some other benefits to the program and its participants as well.

First of all, EPR makes other changes in the program more practicable. For example, it seems clear that any reform legislation will include a standard deduction to replace the many itemized deductions now used to determine one's disposable income. Such a standard deduction, combined with the purchase requirement as it is currently constructed, could serve to keep even more people out of the program. If the standard in any way reflects the average deductions—for medical costs or shelter households with higher than average deductions presently claimed, all those costs, as examples—would have to pay more for their food stamps. I am especially concerned about people in a State like Massachusetts where housing and utility costs are quite high. The only way that a standard deduction can work well is to eliminate the purchase requirement, so even if recipients with higher-than-average deductions lose benefits, they will still get some aid.

Second, EPR will cut administrative costs for the current caseload and reduce appreciably the potential for abuse among vendors who sell food stamps. No longer will there be any cash in the program, and the opportunity for unscrupulous vendors to borrow cash for periods of time and earn interest on it will be ended. No longer will the cash have to be counted, reconciled with coupons, matched with purchase cards, and generally assume a significant amount of administrative time and trouble. Most importantly, the States can distribute the stamps themselves, without having to pay banks or post offices to handle the exchange of cash for coupons. Currently, the States must pay from 70 cents to well over $1 to vendors each time there is a transaction, which is usually twice a month.

Third, there will be less food stamps in circulation. Not only will this greatly reduce the printing costs, but it will also help to abet the embarrassment felt by some participants—especially the elderly—when all they have for food purchases is food stamps.

Finally, EPR moves us in the direction of welfare reform. It does not require needy households to tie up so much cash in in-kind programs, and allows them more freedom in tailoring their budgets to their specific situations. Since we can safely assume that welfare reform will mean more cash and less in-kind benefits, EPR represents a step towards giving households more control of their budgets. More importantly, EPR narrows the gap between those presently receiving Federal benefits and those who would be eligible for assistance under any welfare reform plan. As such, it makes welfare reform more manageable and, certainly, less abrupt. EPR is a rational way of easing into welfare reform without burning any bridges.

THE CRITICS' ARGUMENTS

When my colleagues consider the numerous arguments in favor of eliminating the purchase requirement, Mr. President, I am confident they will not find the position of its critics persuasive. Those who favor continuation of the current purchase requirement argue two major points: First, that the food stamp program is a nutrition program and not an income supplement program, and the EPR ends its usefulness as the former; and second, that once the money which now constitutes the purchase requirement is no longer required, it would not be spent for food at all but for other household needs.

I believe these two arguments are really the same question: "How can we be sure that people will spend as much on food once we eliminate the purchase requirement?" The answer is, "We can't." It is impossible. At present, people are, in theory, purchasing a nutritionally adequate diet through the use of food stamps. But we know that, in practice, this happens only if the recipients buy exactly the right foods specified in the extremely meager and esoteric thrifty food plan, and if the poor participate in the food stamp program at all.

Certainly, the purchase requirement does nothing to help increase the nutritional well-being of a poor family if that family is excluded from the program precisely because of the purchase requirement.

Certainly, the purchase requirement forces people to spend the full coupon allotment for food—assuming the stamps are not lured away by an enterprising grocer offering 60 percent of their value in cash. But that purchase requirement does absolutely no good for the family that cannot afford it. That family goes without any help at all because of our notion of what people need to live correctly. It is certainly possible that food stamp recipients will spend less for food if we eliminate the purchase requirement. Some argue that they will spend only the Federal "bonus." But the average benefit of 27 cents per person per meal—the Federal bonus—does not go very far; it demands supplementation.

However, the question really is: At what price do we force people to shape their budgets the way we think they should? It simply is more important to me that we offer some assistance to all those we believe needy rather than continue a system, albeit designed with the highest goals, that keeps them out.

EPR will, in reality, give poor people the opportunity to increase their food purchasing power. It does move the program more toward an income supplement—because people could move some food money to other household needs—but it is an income supplement for food. The assistance will still be in food stamps and, as such, is a compromise step between in-kind benefits and straight cash assistance.

Yes, to answer the critics' final argument, it adds cost to the program. But

this cost is only the money we would be spending if so many millions of people had not been denied access to the program. And, as I have said, it is money that is well spent insofar as it goes directly to the poorest among us and serves as the most basic kind of injection to local economies.

Mr. President, EPR is an idea that we should adopt when we consider food stamp reform this year. It is a most sensible provision. It is a reasonable, but cautious, next step in the development of our Federal benefit programs. Most importantly, it will help to implement a policy whose thrust has thus far been blunted: that of ending hunger and malnutrition in this land.

The food stamp program is the only vehicle for addressing the needs of millions of households in nutritional need. It is failing largely because of the exclusionary purchase requirement. Eliminating that obstacle is the only way of making the program achieve its objectives. It is an idea whose time has come.

By Mr. BARTLETT:

S. 179. A bill to amend the Occupational Safety and Health Act of 1970, and for other purposes; to the Committee on Labor and Public Welfare.

S. 180. A bill to amend the Occupational Safety and Health Act of 1970, and for other purposes; to the Committee on Labor and Public Welfare.

Mr. BARTLETT. Mr. President, I am today introducing two bills which would amend the Occupational Safety and Health Act of 1970. The first would exempt from OSHA's coverage all farm employers who employ less than 12 persons on the average during any calendar year. The other bill would exempt small business from OSHA's coverage, as well as making other changes of general applicability in the operation of the Occupational Health and Safety Act.

No agency or bureau in Washington has stirred more public comment and criticism in recent years than has the Occupational Safety and Health Administration. Most bureaus must exist several years before they develop a vocal group of critics; with OSHA it took only a few months.

In the case of OSHA and its effect on agriculture, the criticism has been intense, and for the most part, fully justified. This measure, if passed, would protect the family farmer from the need to master and comply with a bewildering multitude of regulations that have been, or are likely to be, handed down by OSHA. Experience in other industries has shown that the dollar cost of complying with OSHA's regulations is extremely high. With the low wheat and beef prices our farmers and ranchers are receiving for their products today, the last thing they need is more regulations which would boost their cost of production.

The agricultural exemption bill which I have introduced makes it clear that the bill applies to custom harvesters of grain products as well. If OSHA regulations are applied to custom cutters, the likely result would be a substantial increase in their costs of operation—an increase that would ultimately be passed on to the individual farmer.

While OSHA's track record has been pretty poor in general, its record in attempting to improve agricultural health and safety is especially disappointing.

Consider, for example, OSHA's proposed field sanitation regulations which provided that an employer must provide toilet and handwashing facilities within a 5-minute walk of each employee's place of work. With the large combines in use today, it does not take long for a custom harvester with two or three machines to cut a quarter of wheat. Therefore the effect of the OSHA regulations would be to require each custom cutter to have one man working virtually full time just setting up, taking down, and moving toilets. The obvious result is an unnecessary increase in the cost of harvesting that will be passed on to the farmer.

These examples point up clearly the futility of trying to legislate health and safety from a bureaucrat's desk in Washington. The plain fact is that neither farm employers nor farm employees need that kind of protection. I think it is equally plain that it is time for the bureaucrats to get out of the farming and ranching business and back to more useful ways to spend their time. The bill I have introduced will get OSHA out of agriculture. Hopefully we can then return to a commonsense approach to farm and ranch safety.

I might add that this bill substantially tracks the restrictions written into last year's Labor-HEW appropriations bill. Those restrictions were strictly a 1-year restriction. The adoption of the bill which I have introduced would make permanent those restrictions.

The other measure which I have introduced exempts from OSHA's jurisdiction small businesses which employ less than 25 employees on the average during the calendar year. Many of the same reasons exist for this exemption that I mentioned in connection with the agricultural exemption bill. The high cost of compliance with OSHA regulations and the difficulty of mastering a multitude of regulations are both very critical in assessing the impact of OSHA on small business.

In addition to the small business exemption contained in the bill, this bill also makes several changes of a general nature in OSHA procedures. Section 3 of the bill requires that the Secretary of Labor make an assessment of the financial impact of a proposed OSHA standard before that standard is issued. It also provides that no OSHA standard shall be applied so as to require the replacement of nonobsolete equipment unless a serious threat to employee health is posed by its continued use. The effect of these changes would be to minimize the cost-increasing aspects of OSHA regulations.

Section 4 of my bill would direct the Secretary or his representative, to suggest a means to correct any violation that is found on an inspection of a work site. It also prevents an employer from being assessed a civil penalty on the subsequent inspection if the employer fully complied with the OSHA inspector's suggested corrective acts suggested during a prior inspection. In addition, this section sets up three other affirmative defenses the employer could assert to prevent the assessment of a civil penalty: First, that implementing the OSHA requirement would not really improve employee health safety; second, that alternative procedures have been employed which are just as effective; or third, any violation of a standard was due to the action of an employee which the employer could not reasonably have prevented. The purpose of these changes is to render more equitable the operation of OSHA penalties and to afford covered employers a reasonable means for effecting compliance with the standards.

Section 5 of the bill makes various changes in the civil penalties which may be assessed for OSHA violations. Section 6 specifically authorizes onsite consultation by OSHA inspectors. This would allow an employer to request a preliminary inspection for the sole purpose of allowing that employer to effect compliance with OSHA standards. Such a consultative visit could not serve as the basis for a citation or penalty unless an eminent or serious danger to employee health was revealed by the inspection. Even the employer would have a reasonable time in which to correct the violation before a penalty would be imposed. This section provides for separation of the consultative and enforcement arms of OSHA, though it does make a consultative report binding in the enforcement inspection.

Mr. President, I believe the effect of these bills will be to develop a more equitable and workable set of procedures for OSHA to operate under. They would also exempt from OSHA's coverage those operations which find compliance most burdensome and unnecessary. In that connection, I call to the attention of the Senate certain safety statistics released last year by the Department of Labor. In its report "Chartbook on Occupational Injuries and illnesses, 1974," the Department indicated that out of eight categories based on number of employees in the business, those businesses employing from one to nineteen employees had the lowest incidence of job-related injuries or illnesses of any of the categories.

In fact, this group was substantially lower than any of the other groups based on number of persons employed by the concern. The same report showed that agriculture, forestry, and fisheries accounted for the smallest percentage of work-related injuries, illnesses, and fatalities of any occupational group classed by type of work. These figures thus indicate that whatever may be the justification for Federal safety standards in our economy generally, that justification is far less persuasive in the cases of farming, ranching, and small business than for other sectors of the economy. That fact, coupled with the difficulty of small businessmen and farmers trying to comply with the multitude of regulations, amply justifies the enactment of laws exempting these concerns from OSHA's scope.

Mr. President, I urge the adoption of these measures.

By Mr. KENNEDY (for himself, Mr. MCCLELLAN, Mr. ABOUREZK, Mr. BAYH, Mr. HASKELL, Mr. MATHIAS, Mr. STEVENSON, Mr. HUMPHREY, and Mr. MATSUNAGA):

S. 181. A bill to amend title 18, United States Code, so as to establish certain guidelines for sentencing, establish a U.S. Commission on Sentencing, and for other purposes; to the Committee on the Judiciary.

ESTABLISHING SENTENCING GUIDELINES

Mr. KENNEDY. Mr. President, today I reintroduce comprehensive bipartisan legislation designed to deal with a problem which is crippling the fair and effective administration of criminal justice—the wide disparity in the sentences imposed in criminal cases. During the last session of Congress similar legislation was introduced as S. 2699.

In the last year study after study has been published documenting the nature and scope of sentencing disparity in the Federal courts. Some of the leading authorities of our criminal justice system—Dean Norval Morris of the University of Chicago Law School, the Honorable Marvin E. Frankel, U.S. district judge for the southern district of New York, Alan Dershowitz of the Harvard Law School, and Andrew von Hirsch of Rutgers University—have written about the critical flaws which threaten the Federal criminal sentencing process. And a few weeks ago, the Chief Justice of the U.S. Supreme Court, Warren E. Burger, in his annual yearend report on the state of the Nation's judicial system, commented that "some form of review procedure is needed to deal with this dilemma" of sentencing disparity.

All too often two convicted defendants with similar backgrounds, convicted of the same crime, receive widely differing sentences. One defendant may receive a term of probation while the other is sentenced to a long term of imprisonment Such disparity cannot be justified in reason or logic. The facts underlying the commission of the crime are identical; the defendants have similar criminal histories and community ties; the presence or absence of aggravating or mitigating factors apply to both defendants. Yet one offender goes free while the other confronts years of confinement.

The magnitude of the problem cannot be underestimated. Recent statistics, for example, demonstrate that in 1974 Federal bank robbers received an average term of imprisonment of over 11 years nationwide, but received 17 years in the northern district of Georgia but "only" 5½ years in the northern district of Illinois. And a widely distributed study done in 1972 by a former distinguished U.S. attorney points out the following:

TABLE—DISPARITY IN SENTENCING BETWEEN THE SOUTHERN DISTRICT OF NEW YORK AND THE NATIONAL AVERAGE FOR FEDERAL COURTS.

Offenses	Likelihood of imprisonment (percent)		Averaged length of prison sentences (months)	
	Southern District of New York	All Federal courts	Southern District of New York	All Federal courts
Bail jumping	66.7	66.2	10.0	25.6
Bank embezzlement	23.2	19.5	18.0	21.3
Bank robbery	82.8	91.8	69.6	124.1
Bribery	25.0	42.5	11.0	15.1
Counterfeiting	51.7	53.7	14.8	40.3
Forgery	41.6	42.8	16.8	32.0
Gambling	37.2	29.9	3.3	14.5
Guns	50.0	45.3	28.2	32.1
Immigration	50.0	42.8	2.5	6.4
IRS	35.4	36.5	9.9	10.4
Interstate	54.8	43.7	18.1	33.8
Narcotics	77.0	70.6	62.4	45.4
Perjury	50.0	53.0	5.2	28.0
Postal	44.3	40.7	18.8	32.5
Embezzlement	43.7	19.0	5.0	11.6
Other	46.3	47.3	20.1	50.5
Rackets and extortion	55.5	47.1	46.2	31.2
Securities	70.4	55.4	31.8	38.7
Fraud	66.7	21.5	20.5	
Theft	100.0	57.4	36.5	38.7
Selective Service	63.3	27.8	12.4	22.2
Total	54.1	43.8	35.2	38.1

Note: The figures for the Southern District of New York are based on sentences imposed in a 6-mo period in 1972. The national figures cover the fiscal year ending June 30, 1972.

Such disparity is unacceptable in a nation that prides itself on the principle of equal justice under law.

Just 3 months ago a new study funded by the Federal Law Enforcement Assistance Administration, entitled "Sentencing Guidelines: Structuring Judicial Discretion," once again called for prompt action, pointing out that—

> We are sentencing differently, not out of malice, but out of sheer ignorance, or to put it another way, without guidelines—without the tool that tells each of us what the other is doing.

Mr. President, unjustified sentencing disparity can be traced to the absence of any congressional guidelines or directives. We have given our Federal judges largely unbridled, unreviewable discretion in sentencing the convicted offender. Is it any wonder that disparity exists when a Federal judge is faced with a range of permissible punishment in bank robbery cases of anywhere from probation to 25 years? It is ironic that during the last few years we have witnessed the development of elaborate procedures to safeguard the rights of those who stand trial; but the Congress and the courts have abdicated their responsibility in reforming the process by which it is decided whether, and for how long, the convicted offender will be imprisoned or otherwise dealt with. This neglect can no longer be tolerated. Arbitrary sentencing practices—based on ignorance not malice—must cease.

Mr. President, my bill is the beginning of a concerted legislative effort to deal with sentencing disparity. The bill does the following: First, it establishes for the first time certain uniform general criteria which all Federal courts must consider in formulating a sentence for a convicted defendant. These criteria refer the court generally to the nature of the offense, the history and characteristics of the defendant, the need for the sentence imposed to reflect the seriousness of the offense, the need for just punishment, the need to protect the public from further crimes of the defendant, and the requirement that the sentence imposed act as a deterrent. These criteria, uniformly applied, assure that all Federal courts will consider the same general factors and goals of sentencing.

Second, the bill requires that the court, in sentencing the defendant to a term of imprisonment, give its reasons for the sentence imposed in open court so that the justifications and reasons underlying the sentence become part of the public record and can be reviewed by an appellate court.

Third, it marks an important break with tradition by providing for limited appellate review of sentences. No longer will the trial court act unilaterally without the possibility of a judicial check on the exercise of discretion.

Finally, and most importantly, the bill establishes an independent Federal sentencing commission with a mandate to promulgate and distribute to all Federal courts suggested sentencing ranges for specific offenses, guidelines to aid judges in the sentencing process, and general policy statements related to sentencing. The bill also lists various factors to be considered by the Commission in determining appropriate sentencing ranges. These factors include such matters as the grade and circumstances of the offense, the nature and degree of the harm inflicted, the gravity of the offense, the public concern generated by the offense, the deterrent effect of the particular sentence, the current incidence of the offense, the age and mental and physical condition of the defendant, the criminal history of the defendant, the defendant's role in the commission of the offense, and the defendant's degree of dependence upon criminal activity for a livelihood.

The Federal courts will be required to consider these specific sentencing guidelines promulgated by the Commission and not sentence outside of the guidelines without giving a detailed written explanation of reasons. Again, appellate review would follow for sentences imposed outside of the presumptive guidelines.

Any guidelines promulgated by the Commission would be subject first to congressional review. The procedure followed would be similar to congressional review of any new Federal Rules of Criminal Procedure.

Mr. President, our present laws leave to the sentencing judge a range of choice that should be unthinkable in "a government of laws not of men." This bill is designed to narrow that choice.

I ask unanimous consent to have printed in the RECORD the full text of the bill establishing sentencing guidelines

and a copy of my article in the December 1976 edition of Judicature magazine dealing with this serious problem.

There being no objection, the bill and article were ordered to be printed in the RECORD, as follows:

S. 181

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) chapter 227 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 3579. Imposition of a sentence of imprisonment

"(a) The court, in determining whether to impose a term of imprisonment within a range authorized under this title and, if a term of imprisonment is to be imposed, in determining the length of that term within such range, shall consider—

"(1) the nature and circumstances of the offense and the history and characteristics of the defendant;

"(2) the need for the sentence imposed (A) to reflect the seriousness of the offense and promote respect for law by providing just punishment for the offense, (B) to afford adequate deterrence to criminal conduct, and (C) to protect the public from further crimes of the defendant;

"(3) whether other less restrictive sanctions have been applied to the defendant frequently or recently; and

"(4) any sentencing guidelines established by the United States Commission on Sentencing.

"(b) In every case in which the court imposes a term of imprisonment within the guidelines for sentencing promulgated by the Commission, the court shall makes as part of the record, and disclose in open court to the defendant at the time of sentencing, a brief statement of the reason or reasons for the sentence imposed. A court may impose a term of imprisonment outside of the guidelines for sentencing promulgated by the Commission if it makes as a part of the record, and discloses to the defendant in open court at the time of sentencing, a statement of the specific reason or reasons for the particular sentence of imprisonment imposed. Failure to so comply shall be grounds for vacating the sentence and resentencing the defendant.".

(b) The analysis of such chapter is amended by adding at the end thereof the following:

"3579. Imposition of a sentence of imprisonment.".

SEC. 2. (a) Chapter 229 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 3621. Imposition of a sentence of fine

"The court in determining whether to impose a fine within a range authorized by this title, and, if a fine is to be imposed, in determining the amount of the fine within such range, the time of payment, and the method of payment, shall consider—

"(1) the nature and circumstances of the offense and the history and characteristics of the defendant;

"(2) the need for the sentence imposed (A) to reflect the seriousness of the offense and promote respect for law by providing just punishment for the offense,

(B) to afford adequate deterrence to criminal conduct and (C) to protect the public from further crimes of the defendant;

"(3) whether other less restrictive sanctions have been applied to the defendant frequently or recently; and

"(4) any sentencing guidelines established by the United States Commission on Sentencing.".

(b) The analysis of such chapter is amended by adding at the end thereof the following:

"3621. Imposition of a sentence of fine.".

SEC. 3. (a) Chapter 231 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 3657. Imposition of a sentence of probation

"The court, in determining whether to impose a term of probation in accordance with the provisions of this chapter, and, if a term of probation is to be imposed, in determining the length of such term and the conditions of probation in accordance with such provisions, shall consider—

"(1) the nature and circumstances of the offense and the history and characteristics of the defendant;

"(2) the need for the sentence imposed (A) to reflect the seriousness of the offense and promote respect for law by providing just punishment for the offense,

(B) to afford adequate deterrence to criminal conduct, and (c) to protect the public from further crimes of the defendant;

"(3) whether other less restrictive sanctions have been applied to the defendant frequently or recently; and

"(4) any sentencing guidelines established by the United States Commission on Sentencing.".

(b) The analysis of such chapter is amended by adding at the end thereof the following:

"3657. Imposition of a sentence of probation".

SEC. 4. (a) Chapter 235 of title 18, United States Code, is amended by adding at the end thereof the following new section:

"§ 3742. Review of Sentence

"(a) Subject to the provisions of section 3576 of this title in any case in which a sentence is imposed for an offense, except a case in which the sentence is equal to or less than that recommended or not opposed by the attorney for the Government pursuant to a plan agreement under the rule 11(e)(1)(B) of the Federal Rules of Criminal Procedure or a case in which the sentence is equal to that provided in an accepted plea agreement pursuant to rule 11(e)(1)(C) of the Federal Rules of Criminal Procedure, an appeal to a United States court of appeals for review of such sentence may be filed by—

"(1) the defendant, within the time specified for the filing of a notice of appeal, if the sentence includes a fine or term of imprisonment more than the maximum established by the guidelines for sentencing promulgated by the United States Commission on Sentencing or a maximum established by this title; or

"(2) the United States within the time specified for the defendant's filing of notice of appeal, if the sentence includes a fine or term of imprisonment less than the minimum established by the guidelines for sentencing promulgated by the United States Commission on Sentencing or a minimum established by this title.

"(b) Upon an appeal being filed pursuant to subsection (A) of this section, the clerk of the court that imposed the sentence shall certify to the court of appeals that portion of the record in the case that includes the presentence report, the information submitted during the sentence proceeding, and findings of the court upon which the sentence was based, the statement of reasons for the sentence imposed by the sentencing court and any additional portions of the record designated by the court of appeals.

"(c) Upon review of the record, the court of appeals shall determine whether the sentence imposed is not within the guidelines for sentencing promulgated by the United States Commission on Sentencing (hereinafter referred to as the 'Commission') and is unreasonable having regard for—

"(A) the reasonableness of the district court's application of the guidelines established by the Commission;

"(B) the opportunity for the district court to observe the defendant; and

"(C) any findings upon which the sentence was based.

"(d) If the court of appeals determines that—

"(1) the guidelines for sentencing promulgated by the Commission were properly applied by the district court, the court of appeals shall affirm the sentence if the sentence imposed outside the guidelines for sentencing is not unreasonable; or

"(2) the guidelines for sentencing promulgated by the Commission were clearly erroneously applied by the district court, the court of appeals shall set aside the sentence and remand the case for further sentencing proceedings;

"(3) the guidelines for sentencing promulgated by the Commission were properly applied by the district court, but that the sentence imposed outside the guidelines for sentencing was otherwise unreasonable, the court of appeals—

"(A) in the case of an appeal of a sentence by the defendant, may—

"(i) remand the case of imposition of a lesser sentence to be determined by the district court; or

"(ii) remand the case for further sentencing proceedings; or

"(iii) impose a lesser sentence;

"(B) in the case of an appeal of a sentence submitted by the United States, may—

"(i) remand the case for imposition of a greater sentence to be determined by the district court; or

"(ii) remand the case for further sentencing proceedings; or

"(iii) impose a greater sentence.".

(b) The analysis of such chapter is amended by adding at the end thereof the following:

"3742. Review of sentence.".

SEC. 5. Part II of title 18, United States Code, is amended by adding at the end thereof the following new chapter:

"Chapter 238—UNITED STATES COMMISSION ON SENTENCING

"Sec.
"3801. Definitions.
"3802. United States Commission on Sentencing; structure and composition.
"3803. Powers and duties of Commisison.
"3804. Powers and duties of Chairman.
"3805. Annual report.
"3806. Congressional Review.

"§ 3801. Definitions

"As used in this chapter—

"(a) 'Commission' means the United States Commission on Sentencing;

"(b) 'Commissioner' means any member of the United States Commission on Sentencing;

"(c) 'rules and regulations' means rules and regulations promulgated by the Commission pursuant to section 3803 of this title.

"§ 3802. United States Commission on Sentencing; structure and composition.

"There is hereby established as an independent Commission in the judicial branch, a United States Commission on Sentencing which shall be comprised of not less than

five members appointed by the United States Judicial Conference. The Commission shall from time to time designate by majority vote one of its members to serve as Chairman and shall delegate to him the necessary administrative duties and responsibilities. The term of office of a commissioner shall be three years, except that the term of a person appointed as a commissioner to fill a vacancy shall expire at the end of three years from the effective date of this statute. A member of the Commission who is an employee of the Federal Government shall serve without compensation in addition to that received for his services as an employee of the Federal Government, but shall be reimbursed for travel, subsistence, and other necessary expenses incurred in the performance of duties vested in the Commission. A member of the Commission who is not a Federal employee shall receive the highest daily rate now or hereafter prescribed for grade 18 of the General Schedule pay rates (5 U.S.C. 5332) when engaged in the actual performance of duties vested in the Commission, plus reimbursement for travel, subsistence, and other necessary expenses incurred in the performance of such duties.

"§ 3803. Power and duties of Commission

"(a) The Commission, by majority vote, and pursuant to rules and regulations, shall promulgate and distribute to all Federal Courts suggested sentencing ranges for specific offenses and guidelines shall be considered by the sentencing court in determining the appropriate sentence for a defendant and general policy statements regarding application of the guidelines or any other aspect of sentencing that in the view of the Commission would further the purposes of this title.

"(b) In promulgating suggested sentencing ranges for specific offenses and guidelines for sentencing the Commission shall consider, but shall not limit its consideration to:

"(1) the grade of the offense;

"(2) the circumstances under which the offense was committed which mitigate or aggravate the seriousness of the offense;

"(3) the nature and degree of the harm caused by the offense, including whether it involved property, irreplaceable property, a person, a number of persons, or a breach of public trust;

"(4) the community view of the gravity of the offense;

"(5) the public concern generated by the offense;

"(6) the deterrent effect a particular sentence may have on the Commission of the offense by others; and

"(7) the current incidence of the offense in the community and in the nation as a whole.

"The Commission shall also consider, but shall not limit its consideration to a defendant's age, mental and emotional condition, physical condition, particularly drug dependence, role in the offense, criminal history, including prior criminal activity not resulting in prior convictions and prior sentences, and degree of dependence upon criminal activity for a livelihood."

"(c) The Commission, by majority vote, and pursuant to rules and regulations, shall have the power to—

"(1) establish general policies and promulgate such rules and regulations for the Commission as are necessary to carry out the purposes of this chapter;

"(2) deny, revise, or ratify any request for regular, supplemental, or deficiency appropriations prior to any submission of such request to the Office of Management and Budget by the Chairman;

"(3) procure for the Commission temporary and intermittent services to the same extent as is authorized by section 3109(b) of title 5, United States Code;

"(4) utilize, with their consent, the services, equipment, personnel, information, and facilities of other Federal, State, local, and private agencies and instrumentalities with or without reimbursement therefor;

"(5) without regard to section 3648 of the Revised Statutes of the United States (31 U.S.C. 529), enter into and perform such contracts, leases, cooperative agreements, and other transactions as may be necessary in the conduct of the functions of the Commission, with any public agency, or with any person, firm, association, corporation, educational institution, or nonprofit organization;

"(6) accept voluntary and uncompensated services, notwithstanding the provisions of section 3679 of the Revised Statutes of the United States (31 U.S.C. 655(b));

"(7) request such information, data, and reports from any Federal agency or judicial officer as the Commission may from time to time require and as may be produced consistent with other law;

"(8) arrange with the head of any other Federal agency for the performance by such agency of any funtcion of the Commission, with or without reimbursement;

"(9) issue subpenas requiring the attendance and testimony of witnesses and the production of any evidence that relates directly to a matter with respect to which the Commission or any Commissioner or agent of the Commission is empowered to make a determination under this chapter; such attendance of witnesses and the production of evidence may be required from any place within the United States at any designated place of hearings within the United States;

"(10) establish a research and development program within the Commission for the purpose of—

"(A) serving as a clearinghouse and information center for the collection, preparation, and dissemination of information on Federal sentencing practices;

"(B) assisting and serving in a consulting capacity to Federal courts, departments, and agencies in the development, maintenance, and coordination of sound sentencing practices;

"(11) collect systematically the data obtained from studies, research, and the empirical experience of public and private agencies concerning the sentencing processes;

"(12) publish data concerning the sentencing processes;

"(13) collect systematically and disseminate information concerning sentences actually imposed, and the relationship of such sentences to the criteria set forth in sections 3579, 3621, and 3657 of this title;

"(14) collect systematically and disseminate information regarding effectiveness of sentences imposed;

"(15) devise and conduct, in various geographical locations, seminars and workshops providing continuing studies for persons engaged in the sentencing field;

"(16) devise and conduct a training program of short-term instruction in sentencing techniques for judicial and probation personnel and other persons connected with the sentencing process;

"(17) make recommendations to Congress concerning modification or enactment of sentencing and correctional statutes which the Commission finds to be necessary and advisable to carry out an effective, humane, and rational sentencing policy;

"(18) appoint and fix the salary and duties of the Staff Director of the Commission, who shall serve at the discretion of the Commission.

"(d) The Commission shall have such other powers and duties and shall perform such other functions as may be necessray to carry out the purposes of this chapter or as may be provided under any other provisions of law and may delegate to any Commissioner or designated person such powers as may be appropriate other than the power to establish general policies, guidelines, rules, and factors under subsection (b)(1).

"(e) Upon the request of the Commission, each Federal agency is authorized and directed to make its services, equipment, personnel, facilities, and information available to the greatest practicable extent to the Commission in the execution of its functions.

"(f) The Commission shall meet not less frequently than quarterly to establish its general policies and rules.

"(g) Except as otherwise provided by law, the Commission shall maintain and make available for public inspection a record of the final vote of each member on any action taken by it.

"§ 3804. Powers and duties of Chairman

"The Chairman shall—

"(a) preside at meetings of the Commission;

"(b) assign duties among the regional offices, if any, in order to assure efficient administration;

"(c) direct (1) the preparation of requests for appropriations for the Commission, and (2) the use of funds made available to the Commission;

"(d) appoint and fix the basic pay of personnel of the Commission.

"§ 3805. Annual report

"The Commission shall report annually to each House of Congress, the United States Judicial Conference, and the President of the United States on the activities of the Commission.".

"§ 3806. Congressional Review

"Such sentencing ranges for specific offense and guidelines for sentencing as are promulgated and distributed by the Commission pursuant to and in accordance with the provisions of this title shall not take effect until they have been reported to Congress by the Commission at or after the beginning of a regular session thereof but not later than the first day of May, and until the expiration of one hundred and eighty days after they have been thus reported. All laws in conflict with such sentencing ranges and guidelines for sentencing shall be of no further force or effect after such sentencing ranges and guidelines have taken effect.

[From the Judicature, December 1976]

CRIMINAL SENTENCING: A GAME OF CHANCE

(By Edward M. Kennedy)

Last June the main figure in a federal investigation into nursing home abuses and Medicaid fraud in New York was sentenced to four months imprisonment after pleading guilty to conspiracy and filing a false income tax return. The hue and cry which followed his sentencing lasted for weeks and was highlighted by a public debate in the New York Times.

Highly critical of the sentence, the Times argued that "one of the most prominent current theories is that sentences should serve to deter others from committing similar crimes . . . Yet, [the defendant] now joins a parade of formerly respectable white collar criminals who have received sentences which make the odds on white collar crime look rather good . . . [the sentence] can only reinforce cynicism about the realities of equal justice under law."[1]

Others came to the defense of the judge, pointing out that "sentencing is the most sensitive and difficult responsibility we impose on the courts . . . A sentence under our system must fit not just the crime but the individual."[2]

---

[1] *Equal Justice?* (an editorial), N.Y. Times, June 18, 1976, p. A22.

[2] Arthur Liman, Esq., *Letters to the Editor: About the Bergman Sentence*, N.Y. Times, June 23, 1976, p. 38.

In my view, the public outcry over the sentence was misdirected. The nursing home investigation had been in the public eye for many months; the sentencing of the main defendant was a highly visible event, bound to cause controversy.

THE SENTENCING DEBATE

The real debate, which has been going on for some time now among judges, lawyers, corrections officials, law enforcement officers and the academic community, involves the much broader issue of comprehensive criminal sentencing reform. This debate has focused primarily on two interrelated problems—the total absence of any prescribed guidelines to aid judges in sentencing and the wide disparity in the sentences judges impose.

The federal code contains no list of criteria to be considered by the sentencing judge in deciding whether to impose a term of imprisonment. The result has been chaotic—one judge may sentence in order to rehabilitate, another to deter the offender (or the potential offender) from committing a similar crime, a third to incapacitate and a fourth simply to "punish." One judge may place a convicted defendant on probation, arguing that rehabilitation should never be a justification for imprisonment; another judge may justify a sentence of probation on the ground that "deterrence doesn't work."

The arguments in the New York Times mentioned above demonstrate the lack of any agreed upon goal of imprisonment. The Times maintained that four months imprisonment hardly constituted an effective deterrent. Defenders of the sentence, however, argued that deterrence was not the major goal of sentencing, that sentencing "must fit not just the crime but the individual." This view seems to reflect the more conventional notion that sentencing is a rehabilitative tool, and the sentence must be fashioned to meet the needs and characteristics of the offender.

DIFFERENT PRISON TERMS

The absence in the federal criminal code of any articulated purposes or goals of sentencing has, unfortunately, led to a situation where different judges often mete out different sentences to similar defendants convicted of similar crimes, depending on the sentencing attitudes of the particular judge.

The resulting sentencing disparity is a national scandal. In 1974, the average federal sentence of imprisonment was 42.2 months. But in the Southern District of Georgia the average was only 18.4 months, while in the Western District of Michigan it was 94.9 months. Bank robbers receive an average sentence of over eleven years nationwide but in the Northern District of Georgia they receive seventeen years and in the Northern District of Illinois the average is only five and one-half years.[3]

A landmark study by the United States Attorney's office for the Southern District of New York demonstrated wide disparity in federal court sentences for different types of offenses.[4] These are listed in the table.

And, in 1974, a study by the Federal Judicial Center affirmed the existence of "glaring disparity."[5] Fifty federal judges, most from the Second Circuit, were given twenty identical files drawn from actual cases and asked what sentence they would impose on each defendant. Disparity was found in almost all cases. In one extortion case the range of sentences varied from twenty years imprisonment and a $65,000 fine to three years imprisonment and no fine!

A cursory examination of the Southern District study yields two immediate conclusions: sentencing disparity exists whether the cases involve violent or white collar crime, and white collar offenders traditionaly receive more lenient sentences.

NO IMPRISONMENT AT ALL

The disparity in the average length of prison sentences is bad enough, but much more troublesome is the disparity in the likelihood of any imprisonment at all. One may argue about what constitutes a "long" or a "short" prison term, but at least in such cases some term of imprisonment is imposed. The critical problem confronting our criminal justice system is that some convicted offenders (including repeat offenders) escape jail altogether while others—convicted of the same crime—go to jail for excessively long periods.

For example, less than 30 per cent of convicted armed robbers with prior records received a prison sentence in Los Angeles County during 1975. In my own state of Massachusetts the odds are even more biased in favor of the criminal—less than one-half of one per cent of all crimes reported in Massachusetts in 1970 resulted in some kind of imprisonment—a 50 per cent drop in certainty of punishment from 1960. Similar figures exist throughout most of the nation.

The impact of such statistics on our criminal justice system is real and immediate. An important prerequisite of any effective crime-fighting program—certainty of punishment—is absent. In addition, the criminal justice system appears arbitrary and unjust, a game of chance in which the potential offender may "gamble" on receiving not just a lenient term of imprisonment but no jail sentence at all. Disparity encourages the white collar offender to commit crimes and gives the impression that justice is something different for the rich and the poor. It nurtures an already growing public cynicism about our own institutions, a cynicism which inhibits corrective action and stimulates others to cut corners and commit crime.

Sentencing disparity also strikingly demonstrates the fallacy of fighting crime by increasing the maximum sentences which can be imposed. Counterfeiting carries a maximum penalty of fifteen years imprisonment; not only is the average sentence actually imposed less than five years, but almost 50 per cent of convicted counterfeiters receive no imprisonment at all. Simply increasing maximum penalties is an exercise in futility.

Such sentencing disparity cannot be traced to "weak" judges who "coddle criminals." The great majority of our federal judges perform their sentencing duties in a responsible and diligent manner. But these judges must act without any guidelines or review because Congress has never built any standards or safeguards into the sentencing process. Indeed, the federal criminal code invites disparity by conferring unlimited discretion on the sentencing judge to impose a sentence within wide statutory limits, ranging from probation to lengthy prison terms.

THE SENTENCING GUIDELINES BILL

What can be done? I have introduced legislation in the United States Senate which would make long overdue reforms in the criminal sentencing process. Entitled the Sentencing Guidelines bill (S. 2699, 94th Cong. 2d Sess.), it would bring welcome uniformity to the sentencing process by articulating for the first time the general purposes and goals of sentencing the judge should consider before imposing a sentence of imprisonment. The bill also provides for appellate review of sentences and creates a United States Commission on Sentencing to establish specific, fixed sentencing ranges for similar defendants who commit similar crimes. The sentencing judge would be required by statute to impose a sentence within the range established by the Commission or submit a written justification for sentencing outside the range.

This legislation would have a profound impact on the related problems of the absence of any sentencing purposes or goals and the existence of sentencing disparity.

What are the general purposes and goals to be considered by the judge in imposing a sentence of imprisonment? Four are listed in the bill:

(1) the nature and circumstances of the offense and history and characteristics of the defendant;

(2) the need for the sentence imposed to reflect the seriousness of the offense and promote respect for law by providing just punishment for the offense, and to afford adequate deterrence to criminal conduct;

(3) whether other less restrictive sanctions have been applied to the defendant frequently or recently; and

(4) any sentencing guidelines established by the United States Commission on Sentencing.

The bill adopts the concept of imprisonment as punishment. Rehabilitation as a justification for imprisonment, as opposed to a beneficial side effect, is conspicuously absent. This view of imprisonment as a vehicle to punish rather than cure the offender is consistent with the recent conclusions of Marvin Frankel, Norval Morris, Alan Dershowitz and others.[6]

The concept of rehabilitation is grounded in the optimistic belief that criminals have simply "gone wrong" and can be "cured", much as disease can be cured. But prison rehabilitation programs have not been successful—at least in those cases where such programs are compulsory in nature and are forced on the prisoner as a precondition of his release.

I am not, of course, advocating the abolition of prison rehabilitation programs. Indeed, I believe they should be encouraged and expanded. What I am advocating is an end to the comforting but totally unrealistic notion that rehabilitation of the convicted criminal can serve as a justification for imposing a prison sentence. Not only is such a sentence unfair to the individual, it doesn't seem to do much good in "curing" the offender.

The bill concentrates, therefore, on the other major justifications for imposing a term of imprisonment—incapacitation, specific deterrence, general deterrence and retribution. A sentence of imprisonment might be imposed to deter or incapacitate the offender himself (necessitating an inquiry into the personal history of the defendant, especially any previous record of "less restrictive sanctions" imposed). Imprisonment might also be designed to provide an example to others (general deterrence) or might be based on the need for society to exact a fair penalty for the crime ("retribution," couched in terms of promoting "respect for law" by providing "just punishment").

CRITICISMS

Two immediate criticisms can be leveled at the Sentencing Guidelines bill. First, some

might oppose the bill for abandoning the concept of rehabilitation as the major justification of imprisonment. But, in practice, the great majority of courts have already rejected rehabilitation as the primary reason for imprisonment, so these should be little objection to actually codifying this view.

Many would also argue that listing the general goals and purposes of sentencing will do little to eliminate disparity; that general considerations of incapacitation, deterrence and retribution already enter into sentencing judgments and that disparity results not from disagreement over the general purposes of imprisonment but from the wide range of punishments available to the court. It is this unbridled, unreviewable discretion to impose such punishment which results in different judges imposing different sentences. S. 2699 deals with this problem in three ways:

It marks an important break with tradition by providing for appellate review or sentences. No longer would the court impose a sentence without the possibility of judicial review. Appellate courts would be able to examine the lower court's exercise of discretion, decide whether the sentence imposed was proper in light of all the circumstances and, if the facts warranted, reverse and remand for resentencing.

The bill also requires that the court, in sentencing the offender to prison, give written reasons for the sentence so that these reasons become part of the public record to be reviewed on appeal. This is not required today.

Most importantly, the bill creates a federal commission to establish sentencing ranges for specific crimes. This would not be just another commission. Its members would be appointed by the United States Judicial Conference. Membership would not be limited to sitting judges but would also include correctional officials, members of the practicing bar and academic communities, and police representatives. Given an initial life of three years, the commission would be responsible for fixing the parameters of exactly what sentences should be imposed for what crimes in what situations.

THE SENTENCING COMMISSION

One of the strengths of the bill is that the commission, not the Congress, would determine the guidelines. The Congress does not have time to establish sentencing ranges for all the criminal situations which could develop. Nor is there much chance that it could avoid politicizing the entire issue of sentencing with vocal debate centering around harsher versus more lenient punishment. If the subjects of capital punishment, gun control, and criminal code reform offer any indication of how Congress would deal with the sensitive area of sentencing, the commission approach is much to be preferred.

In determining this sentencing range, the commission would consider the general criteria spelled out in the statute, available sentencing statistics and recidivism rates and, especially, the various aggravating and mitigating circumstances surrounding the crime itself. These might include, for example, leadership in the criminal enterprise, particularly cruel treatment of the victim, previous record of the offender and the degree of coercion imposed on the offender. The commission would then establish the sentencing ranges or guidelines. The sentencing judge would be required by statute to impose a sentence within the range established unless he could demonstrate in writing a justification for sentencing outside the range. Appellate review would follow.

For example, the sentencing range for burglary might be as follows:

1. When committed while the home is occupied and when the defendant brandishes a weapon in the presence of the occupants: 2.8 years to 3.5 years;

2. When committed while the occupants were at home but where the defendant, although armed with a weapon, did not brandish it: 1.5 years to 2 years;

3. When committed in an unoccupied dwelling by a defendant armed with a weapon: 6 months to 1.2 years;

4. When committed in an unoccupied dwelling by an unarmed defendant: 3 months to 1 year.

Variations within the prescribed range would depend on the existence of other aggravating or mitigating factors.

Such guidelines would apply with equal force to white collar and government corruption crimes. Thus, a sentencing range for the crime of bribery might be as follows:

1. A government officer holding a position of high public trust who solicits and/or accepts something of value in return for a particular agreed-upon action in his official capacity: 3.0 years to 4.0 years;

2. A government officer holding a position of high public trust who solicits and/or receives something of value knowing its illegal purpose but enters into no specific agreement with the briber about how the payment will be earned: 2.0 years to 3.0 years.

It is important to point out that the fixed sentencing range agreed upon by the commission and imposed by the court would be very close to the actual sentence now served by the offender. It is likely that the guidelines would mandate sentences substantially less than the maximums now authorized by law. But in terms of actual time served I do not see a radical change. Nor do I perceive the possibility of the guidelines approach increasing prison populations. I suspect that sentences of imprisonment would be reserved for the more serious crimes, with petty offenders—too often the cause of overcrowded prisons—avoiding lengthy prison terms.

END TO LIMBO

In the sentencing system I have described, in which guidelines assure similar sentences for similar offenders convicted of similar crimes, the traditional practice of making a prisoner eligible for parole after serving a portion of his sentence also becomes obsolete. The commission itself would take into account the fact that most prisoners are released on parole before the expiration of their full sentence and would adjust the sentencing range accordingly. The parole board's role would be limited to computing a prisoner's "good time" (based on fixed formula), modifying the sentence upon discovering new aggravating or mitigating facts unknown to the judge at the time of sentence, or releasing the offender because of compelling medical reasons.

Once the concept of sentencing guidelines is accepted, altering the role of the parole board logically follows. Since rehabilitation is no longer a justification to imprison a person, it could no longer be used by the board as a reason to retain him until he is "cured." This change would eliminate one of the major objections to our current corrections system—the arbitrary power of the parole board to hold a prison release date over the head of the prisoner until they are satisfied of his "rehabilitation."

The guidelines approach would also eliminate indeterminate or open-ended sentencing. Under such a system, the prisoner's actual term of imprisonment is set, not by the sentencing judge, but by an agency such as the parole board. The prisoner often finds himself in a state of limbo, unable to determine his own prison release date.

Indeterminate sentencing has been sharply criticized in recent years as based on a faulty premise—that a prisoner's behavior while in a prison rehabilitation program is an accurate predictor of how he or she will behave in the community once released. In his classic treatise *The Future of Imprisonment*, Normal Morris convincingly points out that such predictions cannot readily be made and that the uncertainty of release proves counter-productive to any hoped-for rehabilitation.

Indeterminate sentencing must be replaced by fixed sentences so the convicted offender knows *at the time sentence is imposed* when he will probably be released. S. 2699 would assure this.

OTHER PROBLEMS

It is obvious that correcting the arbitrary and capricious method of sentencing will not eliminate our nation's crime problem. Other critical problems beset the administration of criminal justice—overloaded courts unable to cope with mounting caseloads, archaic prisons and jails which are little more than breeding schools for crime, and an outdated and confusing federal criminal code. A strong argument can be made, for example, that one cause of sentencing disparity may be the reluctance of judges to sentence offenders to overcrowded and understaffed prisons.

But the shameful disparity in criminal sentences imposed in the federal courts is a major flaw which encourages the potential criminal to "play the odds" and, through luck and circumstance, "beat the system." Sentencing disparity is unfair; it cannot help but have an impact on a prisoner who views his offense as no more reprehensible than that of another offender placed on probation after committing the same crime.

The Sentencing Guidelines bill would help the sentencing judge decide not only how long an offender should be imprisoned but whether he should be imprisoned at all. The bill thus articulates a federal sentencing philosophy for the first time. The specific guidelines established by the sentencing commission would also help eliminate disparity and bring some desperately needed credibility to the system. "Different judge, different sentence" would be replaced by uniform sentencing, with variations from the sentencing range being based on clearly defined written reasons and being subject to judicial review. Sentences would thus become predictable; they are not predictable today.

S. 2699 deals only with that point in the criminal justice system where sentence is actually imposed on the convicted offender. But the concept of commission guidelines may ultimately prove valuable in other areas of the criminal justice system where unfettered discretion now exists—the decision to detain prior to trial, the decision to prosecute, the selection of the appropriate charge, the decision to "plea bargain" and the decision to revoke probation or parole. Indeed, some would argue that until these other areas are reformed and the decision-making process so limited, arbitrariness will continue to plague the system. The entire system cannot, however, be cured overnight. A logical starting point is the formal sentencing process, where the visible weight of the state is most apparent.

We boast that ours is a "government of laws not of men." This time-honored principle may generally be followed in treating the accused before conviction but it has somehow been neglected where it would seem to be most necessary—in the sentencing judge's determination of the range of permissible punishment. This neglect can no longer be tolerated. The Sentencing Guidelines bill offers a blueprint for reform—a fair, sound, practical solution to the problem of how we sentence the criminal offender.

By Mr. KENNEDY:

S. 182. A bill to amend the Ports and Waterways Safety Act of 1972 in order to establish comprehensive liability and compensation for damages from oil spills, and for other purposes; to the Committee on Commerce.

FEDERAL TANKER SAFETY AND MARINE ANTI-POLLUTION ACT OF 1977

Mr. KENNEDY. Mr. President, I am sending to the desk a bill to amend the Ports and Waterways Safety Act of 1972 in an effort to minimize the risks of future oil tanker disasters.

We have had a virtual epidemic of tanker accidents over the past month which has made it evident we cannot afford a single additional delay without remedial legislation.

We ended last year with the Nation's worst oil spill in our waters off Nantucket and we began the new year with tankers breaking up, exploding, or disappearing in the North Atantic.

After the *Argo Merchant* disaster, my Subcommittee on Administrative Practice and Procedure held hearings into that disaster. I stated then my intention to introduce new legislation.

This bill will do the following:

It will establish an FAA-style traffic control system for oil tankers off our shores.

It will mandate full disclosure of tanker ownership.

It will establish mandatory navigational equipment requirements, construction standards including double-bottoms, personnel and operating standards. Retrofitting of existing tankers for the most essential of these requirements will be phased over a 5-year period.

These standards will apply both to U.S. tankers and foreign tankers which desire to enter our ports.

It will establish mandatory shipping lanes covering the approaches—out into international waters wherever a hazard may exist to require such action—to our major harbors. The shipping lanes will be within the 200-mile fishing conservation zone established last year.

There will be annual inspections as well as surprise inspections.

The time has passed when we could await final international action on adequate standards, self-policing by tanker owners, or vigorous enforcement by foreign flag countries.

Last year, I was pleased to work with the chairman of the Senate Commerce Committee and other distinguished colleagues in enacting the 200-mile fishery conservation zone. That historic effort is in danger of being covered over with black muck as a result of the epidemic of oil tanker accidents and spills.

In my own New England region, the livelihood of some 32,000 fishermen and an annual catch of some $142 million from the Georges Bank have been placed in jeopardy by the recent spill of the *Argo Merchant*.

We enacted the 200-mile limit in part to preserve the Georges Bank from overfishing. Now we see a new threat from pollution and the inadequate tanker safety and control systems that exist.

The Environmental Protection Agency, the Office of Technology Assessment and public interest observers all have criticized the past 5 years of failure to adequately implement the Port and Waterways Safety Act of 1972. That landmark legislation, which Senators MAGNUSON and HOLLINGS championed, established a discretionary authority with the Secretary of Transportation and the Coast Guard to issue much-needed regulations affecting the design, operations, equipment, speed and practices of the tankers that move continually toward the United States.

That authority was given after the hearings demonstrated that tankers had been designed and built almost exclusively for the economic benefit of vessel owners. No one spoke for the marine and coastal environment, for the fishermen or for the public.

The Ports and Waterway Safety Act provided that authority. Unfortunately, as the Senate Commerce Committee hearings in 1975 and 1976 demonstrated, and as the recent weeks' tragedies underscored, that discretion has been abused. Safe tanker operations—as a result of improved standards—remains a distant hope. Not only have accidents and oil pollution continued, they have increased, as the recent report by the Tanker Advisory Center, which I ask to be printed in the RECORD, underscores.

To date, acting under the 1972 authority, only two sets of regulations have gone into effect. One effective on December 13, 1976 requires segregated ballast systems but only for new tankers over 70,00 dwt; the other effective January 26, 1976 requires that new tankers over 10,000 dwt be equipped with inert gas systems. Both rules have followed internationally agreed standards on these matters which were negotiated more than 3 years ago by the world maritime nations. No other nation, least of all Liberia, whose tankers carry half of our imported oil, has adopted even these minimum standards. US regulations have not been made final on maintenance, navigational equipment, propulsion, personnel, or any of the other safety features for which regulations are authorized under the Act.

The hearing which I conducted in Boston into the causes of the *Argo Merchant* disaster and the role of the Federal Government in this area of concern demonstrated again the need for new legislation in this area.

For that reason, I am introducing the Federal Tanker Safety and Marine Anti-Pollution Act of 1977.

This bill requires the Secretary of Transportation to issue the safety and pollution-minimizing standards which were discretionary under the previous law.

By amending the 1972 act to make mandatory its thrust, we will avoid another 5 years of delay.

First, the bill will mandate the establishment of a traffic control system modeled on the air traffic control system we have in effect today both here and abroad. Either through satellite radar or other monitoring, we can follow every tanker on its course in the 200-mile zone. The *Argo Merchant* was not being monitored when it turned off its planned course—because there are no mandatory shipping lanes and no system in place to monitor tanker movements at the present time. This bill requires the system to be established.

The Coast Guard not only will know when a ship is out of those lanes, but it will be able to inform the ship's captain. We know that human error is a factor in some 85 percent of the vessel accidents occurring in the world. This system will be a doublecheck on the human being. And it will make no distinction between foreign and domestic tankers. It was a Liberian tanker which broke up on the Nantucket shores. But could just as well have been a Panamanian or Honduran tanker as well.

Once a ship enters our 200-mile limit, the need to begin the monitoring process is clear. We want to be able to insure that shipping lanes will be established as far out to sea as necessary to insure that a tanker—once it has been advised it is outside the lane—will have time to stop before hitting something. Many of the larger tankers have a stopping distance of 15 times their own length.

Second, in addition to monitoring the ships when they are making their approaches, my bill will require that a full traffic control system, to minimize the danger of collisions, be in place in every major U.S. port. We now have inport systems in place in Puget Sound, Houston, and San Francisco. Two others are to be opened this year.

This bill would mandate extension to the other major ports including Boston. It includes monitoring entry, movement, departure, routing, and other maneuvering and anchoring and mooring requirements.

Third, shipboard navigational equipment of the most modern category would be required, including loran C and radio communications, as well as the transponder system needed to permit the identification of each ship by the traffic control system.

Fourth, new tankers over 20,000 deadweight tons, rather than the 70,000 now in effect, would have to be equipped with segregated ballast capacity and double bottoms. Existing tankers would have to be retrofitted over a 5-year period with similar requirements, although the Secretary could waive that requirement where it would not void the safety purposes of the legislation. Other construction standards would include inert gas systems.

Fifth, propulsion and maneuvering systems would be assessed as well and tug assistance required when those systems are found not to be adquate.

Sixth, annual inspections as well as spot inspections would be carried out by the Coast Guard to cover all aspects of the new standards.

Seventh, additional personnel licensing and training requirements would be required for U.S. tankers based on National Academy of Sciences reports. Equivalent standards would be required of foreign flag tanker crews.

Eighth, the Secretary of Transportation, through the Coast Guard, would undertake a new and intensive oil spill research and prevention program to develop the technology of how to deal with potential spills.

This would include experimenting with the most effective combustion agents and congealing agents to reduce spill when a ship has grounded as well as when the spill already has begun.

Ninth, the bill establishes a $250 million liability fund with unlimited liability for cleanup, absolute liability for damages in the case of violation of any standards or gross negligence and no-fault damage liability of at least $50 million.

Tenth, the bill requires full disclosure of ownership each year or at the first entry of a ship into the United States.

These are the provisions that are contained within this legislation. It will be a major step toward hopefully reducing the risk of a black Christmas next year. We must take every precaution to prevent further future spills such as the one last month that sent 7.6 million gallons of thick, black oil pouring into the waters off New England.

Mr. President, I ask unanimous consent to have the bill printed in the RECORD and other news articles.

There being no objection, the bill and material were ordered to be printed in the RECORD, as follows:

S. 182

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Tanker Safety and Marine Anti-Pollution Act of 1977".

SEC. 2. Section 4417a of the Revised Code of the United States as amended by section 201 of the Ports and Waterways Safety Act of 1972 (46 U.S.C. 391a) is amended by striking paragraph (1) and inserting in lieu thereof the following:

"(1) STATEMENT OF POLICY.—(a) the Congress hereby finds and declares—

"That the carriage by vessels of certain cargoes in bulk creates substantial hazards to life, property, the navigable waters and the waters of the fishery conservation zone as established by the Fishery Conservation and Management Act of 1976 (including the quality thereof) and the resources contained therein and on the adjoining land, including but not limited to fish, shellfish, and wildlife, marine and coastal ecosystems and recreational and scenic values, which waters and resources are hereafter in this section referred to as the 'marine environment'.

"That existing standards for the design, construction, alteration, repair, maintenance, and operation of such vessels must be improved for the adequate protection of the marine environment.

"That it is necessary that there be established for all vessels carrying such cargoes and desiring to enter United Sattes ports, the navigable waters of the United States or the fishery conservation zone comprehensive minimum standards of design, construction, alteration, repair, maintenance, and operation to prevent or mitigate the hazards to life, property, and the marine environment.

"That it is clear the costs of failing to impose such standards and requirements are sufficient to justify requiring these standards on a unilateral national basis while maintaining continuing efforts to achieve adequate and uniform international standards.

"That it is necessary to develop effective and efficient traffic control systems both in the approaches to United States ports and within such ports to prevent or mitigate the hazards to life, property and the marine environment."

SEC. 3. (a) Section 201(2) of the Ports and Waterways Safety Act of 1972 (46 U.S.C. 391a) is amended by inserting after "the navigable waters" the following: "or the fishery conservation zone".

(b) Such section is further amended by striking paragraph (3) and inserting in lieu thereof the following:

"(3) In order to secure effective provision for vessel safety, and for protection of the marine environment, the Secretary of the department in which the Coast Guard is operating (hereafter referred to in this section as the 'Secretary') shall for the vessels to which this section applies—

"(A) establish operate, and maintain mandatory vessel traffic services and systems including mandatory ship lanes wherever potential hazards are present;

"(B) require all vessels to comply with such services or systems, including the carrying or installation of electronic or other devices necessary for the use of the service or system;

"(C) establish an onshore traffic monitoring system utilizing satellite, radar, or other appropriate technologies to insure the capability of warning ships which stray out of the mandatory ship lanes with sufficient time to permit them to correct their course prior to damage occurring to them, to other vessels or structures, or to the marine environment, and such a system shall begin to operate in the approaches to Boston, Puget Sound, and Houston within one year from the date of enactment of the Federal Tanker Safety and Marine Anti-Pollution Act of 1977 and be phased in at other major ports over the five-year period following such date of enactment;

"(D) control vessel traffic for major ports, harbors, and other waters subject to congested vessel traffic by—

"(i) specifying times of entry, movement, or departure to, from, within, or through ports, harbors, or other waters;

"(ii) establishing vessel traffic routing schemes;

"(iii) establishing vessel size and speed limitations and vessel operating conditions;

"(iv) restricting vessel operation, in a hazardous area or under hazardous conditions, to vessels which have particular operating characteristics and capabilities which he considers necessary for safe operation under the circumstances;

"(v) direct the anchoring, mooring, or movement of a vessel when necessary to prevent damage to or by that vessel or her cargo, stores, supplies, or fuel; and

"(vi) requiring pilots on self-propelled vessels engaged in the foreign trades in areas and under circumstances where a pilot is not otherwise required by State law to be on board until a State having jurisdiction of an area involved establishes a requirement for a pilot in that area or under the circumstances involved;

"(E) require the most effective ship-board navigational equipment including but not limited to—

"(i) dual radar systems with both short range and long range capability;

"(ii) long range navigational aids for accurate positioning including Loran-A and Loran-C combined with radio communications with on-shore traffic control centers;

"(iii) introduction of transponder equipment as soon as practical aboard each tanker which would automatically report Loran-C position and tanker identification information to on-shore traffic control centers;

"(iv) collision avoidance radar systems for all new tankers and all existing tankers over 20,000 dwt; and

"(v) gyro compass, fathometer, instruments, charts, plotting equipment, control and communication systems and other facilities;

"(F) require any vessel of more than twenty thousand deadweight tons, if the construction of such vessel is contracted for or actually commenced after June 30, 1977, to be equipped with a segregated ballast capacity which is determined to be appropriate by the Secretary, and such capacity shall be achieved in part by fitting, throughout the cargo length of each such vessel, a double bottom;

"(G) establish for vessels constructed or commenced to be constructed prior to June 30, 1977, similar requirements, where feasible from an engineering standpoint, to be applicable no later than 5 years from the date of enactment of the Federal Tankers Safety and Marine Anti-Pollution Act of 1977 except that the Secretary may waive the requirements for retrofitting of a double bottom where he finds it necessary and not in conflict with the purposes of this legislation;

"(H) require inert gas systems for vessels under the same time provisions as in paragraphs (F) and (G);

"(I) require all tankers to be assessed as to the adequacy of propulsion and maneuvering systems especially in confined waters and under congested port conditions, and such assessment shall determine whether such tanker has sufficient control capabilities to safely enter and maneuver in prevailing conditions of each port it is cleared to enter, and if the capabilities are not sufficient, such vessel shall use tug assistance of suitable size at all times;

"(J) require all tankers entering U.S. ports to have annual inspections by an agent designated by the Secretary and have the condition of each tanker and any deficiencies recorded, and require that all deficiencies shall be corrected prior to entry into the area to which this section is applicable and all corrective work documented, with tanker structure, machinery, navigation equipment, pollution control equipment, electrical systems, control systems and other equipment certified as to condition and operability, with tankers over 10 years of age having a special inspection particularly on structural integrity, and the Secretary shall issue special reports on structural adequacy of tankers over 10 years of age and consider whether to limit operations or loading conditions or to require structural modifications to each such tankers;

"(K) require all tankers to be manned by personnel licensed and trained in accordance with United States Coast Guard standards, 4) or, where the Secretary determines that foreign training and licensing standards are equivalent to United States Coast Guard Standards, such foreign standards for foreign flag tankers, and such standards shall include, as a minimum, the following:

"(i) instruction in all aspects of ship handling, navigation and emergency situations related to normal operations in coastal and confined waters and special operations under casualty conditions;

"(ii) formal training with modern equipment and ships or simulators for specific positions and ship types;

"(iii) regular training for upgrading positions or changing ship types and responsibility;

"(iv) licenses, conditions of licensing and period of licensing determined by experience, training and retraining accomplished and regular performance testing."

(c) Such section is further amended by striking paragraphs (5), (6), and (7) and by inserting in lieu thereof the following:

"(5)(A) ENFORCEMENT AND INSPECTION.—No vessel subject to the provisions of this section shall, after the effective date of the rules and regulations established hereunder, enter a United States port with such cargo, until a certificate of inspection has been issued to such vessel in accordance with the provisions of title 52 of the Revised Statutes of the United States and until a permit has been endorsed on such certificate of inspection by the Secretary, indicating that such vessel is in compliance with the provisions of this section and the rules and regulations established hereunder, and showing the kinds and grades of cargo that such vessel may have on board or transport. Such permit shall not be endorsed by the Secretary on such certificate of inspection until such vessel has been inspected by the Secretary and

found to be in compliance with the provisions of this section and the rules and regulations established hereunder. The Secretary shall issue such certificates for a period not extending beyond one year.

"(B) The Secretary shall begin publication as soon as practicable of proposed rules and regulations under this section as amended by the Federal Tanker Safety and Marine Anti-Pollution Act of 1977. Such rules and regulations shall take effect not later than September 30, 1977.

"(c) The Secretary shall cause proposed rules and regulations published by him pursuant to this section to be transmitted to appropriate international forums for consideration as international standards.

"(D) Rules and regulations previously promulgated remain in effect unless subsequently amended pursuant to the provisions of the Federal Tanker Safety and Marine Anti-Pollution Act of 1977."

"(E) Any rule or regulation promulgated pursuant to this section shall be equally applicable to foreign vessels and United States flag-vessels covered by this section. If a treaty, convention, bilateral or international agreement provides for reciprocity of recognition of certificates or other documents to be issued to vessels by countries party thereto, which evidence compliance with rules and regulations issued pursuant to such treaty, convention, or agreement, the Secretary, if he finds that such provisions are equivalent to rules and regulations issued pursuant to this section, in his discretion, may accept such certificates or documents as evidence of compliance with such rules and regulations.

"(F) The Secretary shall carry out such other inspections as he may deem necessary to insure compliance with the rules and regulations or to insure the purposes of this act. Violation of such rules or regulations or the presence of a condition threatening to life, property, or the marine environment shall be considered sufficient cause for such vessel to be denied entrance into U.S. navigable waters or U.S. ports until the Secretary determines the violation or threat has been removed.

SEC. 5. The Ports and Waterways Safety Act of 1972 is further amended by adding at the end thereof the following new titles:

"TITLE IV—OIL SPILL PREVENTION AND CLEAN-UP

"SEC. 401. (a) The Secretary is directed to establish a coordinated program of experimentation with methods to reduce the risk of oil spill and to improve the technology for clearing up after oil spills. Such efforts shall include:

"(1) Experimenting to determine the most effective combustion agents for burning petroleum products and crude oil once a ship has grounded and a spill appears likely.

"(2) Experimenting with solidifying petroleum products and crude oil through use of congealing agents while oil is aboard ship.

"(3) Experimenting with combustion agents once oil has spilled into the marine environment.

"(4) Experimenting with various clean-up procedures both in enclosed marine environment and on the high seas.

"(b) Such funds as may be necessary are authorized for this purpose.

"(c) Such efforts shall be undertaken after consultation with the Administrator of the Environmental Protection Administration, the National Science Foundation, and the Administrator of the National Oceanic and Atmospheric Administration.

"TITLE V—FEDERAL OIL POLLUTION LIABILITY AND COMPENSATION

"SEC. 501. STATEMENT OF POLICY.—(a) The Congress hereby finds and declares that—

"(1) The damages and cleanup costs resulting from offshore oil spills are matters of major national concern.

"(2) The transportation, production, and handling of oil in, on, or near inland and ocean waters create environmental risks, and may impair the rights of shoreline property owners and harm the general health and welfare of citizens of the United States.

"(3) Existing law with respect to liability and compensation for oil pollution damage is inconsistent, inadequate, incomplete, inefficient, and inequitable.

"(4) The legal rules applicable to oil pollution liability and compensation need to be rationalized and reformed to assure that adequate and timely compensation is available for oil pollution from all sources.

"(b) PURPOSES.—It is therefore declared to be the purpose of the Congress in this Act to—

"(1) enact a comprehensive national law governing offshore oil pollution liability and compensation;

"(2) maximize the incentive for all persons producing, transporting, or handling oil to take all steps necessary or appropriate to prevent the discharge of oil;

"(3) establish a strict liability standard for cleanup costs and damages resulting from the discharge of oil;

"(4) create a single and all-inclusive compensation fund to pay for all clean up and damages resulting from such a discharge;

"(5) provide adequate funds and an expeditious procedure to compensate those injured by such a discharge; and

"(6) provide for the restoration, rehabilitation, or replacement of the natural resources damaged by a discharge of oil.

"DEFINITIONS

"SEC. 502. As used in this title, unless the context indicates otherwise, the term—

"(1) "Administration" means the Federal Oil Pollution Liability and Compensation Administration;

"(2) "Administrator" means the chief executive of the Administration;

"(3) "aquatic and terrestrial environment" includes but is not limited to the navigable waters of the United States (including the lands therein and thereunder), the adjacent shorelines (including waters therein and thereunder), the waters of the contiguous zone, the waters within the safety zone around a deepwater port, and the waters superjacent to the Continental Shelf of the United States, the fish, wildlife, and other living resources of such lands and waters; and the recreational and scenic values of such lands, waters, and resources;

"(4) "barrel" means 42 United States gallons at 60 degrees Fahrenheit;

"(5) "cleanup costs" means all actual costs, including, but not limited to, administrative and other costs to the Federal Government, to any State or local government, to any foreign governments, or to their contractors or subcontractors, of (A) removing or attempting to remove, or (B) taking other measures to prevent, reduce, or mitigate damages to the public health or welfare, or to public and private property including but not limited to shorelines, beaches, and the natural resources of the aquatic and terrestrial environment;

"(6) 'contiguous zone' means the entire zone established or to be established by the United States under article 24 of the Convention on the Territorial Sea and the Contiguous Zone (15 UST 1606; TIAS 5369) or otherwise by law or treaty, and includes the fishery conservation zone established pursuant to the Fishery Conservation and Management Act of 1976;

"(7) 'damages' means all direct and proximate damages, except cleanup costs, suffered by any person as a result of a discharge of oil, including—

"(A) the value of any loss or injury at the time such loss or injury is incurred, with respect to any real or personal property that is damaged or destroyed as a result of a discharge of oil;

"(B) the cost of restoring, repairing, or replacing any real or personal property that is damaged or destroyed by a discharge of oil; any income necessarily lost during the time such property is being restored, repaired, or replaced; and any reduction in the value of such property thereafter, by comparison with its value prior to such discharge;

"(C) any loss of income or impairment of earning capacity due to damages to real or personal property, including natural resources, without regard to ownership of such property or resources, that is damaged or destroyed by a discharge of oil, if the claimant derives at least 50 per centum of his earnings from activities which utilize the property or natural resources;

"(D) any costs and expenses incurred by the Federal or any State government in the rehabilitation of natural resources that are damaged or destroyed by a discharge of oil;

"(E) any loss to citizens of any use of real property or of natural resources as a result of a discharge of oil, if such property or resources are owned, managed, held in trust, or otherwise controlled by the Federal or any State government; and

"(F) any loss of tax revenue by a State or local government due to injury to real or personal property directly resulting from oil contamination.

"(8) 'deepwater port' has the meaning set forth in section 3(10) of the Deepwater Port Act of 1974 (33 U.S.C. 1502(10));

"(9) 'discharge' includes, but is not limited to, any spilling, leaking, pumping, pouring, emptying, or dumping, regardless of whether it occurred intentionally or unintentionally;

"(10) 'facility' includes, but is not limited to, any oil refinery, drilling platform, oil storage or transfer terminal, pipeline, or any appurtenances related to any of the foregoing, that is used, or is capable of being used, to refine, drill for, pump, produce, store, handle, transfer, process, or transport oil; the term does not include a vessel or a deepwater port;

"(11) 'Fund' means the Federal Oil Pollution Compensation Fund;

"(12) 'licensee' means a person who holds a valid license for the ownership, construction, and operation of a deepwater port;

"(13) "natural resources" means land, fish, wildlife, biota, air, water, and other such resources owned, managed, held in trust, or otherwise controlled by the Federal or any State government;

"(14) "offshore facility" means any facility located in, on, or under the navigable waters of the United States or waters of the contiguous zone, or any facility utilized in oil exploration or production activities on the Outer Continental Shelf of the United States;

"(15) "oil" means petroleum, including crude oil or any fraction or residue therefrom;

"(16) "owner and operator" means (A) with respect to a vessel, any person owning, operating, or chartering by demise, such vessel; (B) with respect to an offshore facility, any person owning or operating such facility, whether by lease, contract, or other form of agreement; and (C) with respect to any abandoned facility, the person who owned or operated such facility immediately prior to such abandonment;

"(17) "person" means an individual, a public or private corporation, partnership or other association, or a government entity;

"(18) "person in charge" means the individual immediately responsible for the operations of a vessel, offshore facility, or deepwater port;

"(19) "safety zone" means the safety zone around a deepwater port as defined pursuant

to section 10(d) of the Deepwater Port Act of 1974 (33 U.S.C. 1509(d));

"(20) "Secretary" means the Secretary of Transportation;

"(21) "State" includes each of the States of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, American Samoa, and the Canal Zone;

"(22) "transfer" or "transferred" includes, but is not limited to, both onloading and offloading between a facility and a vessel, between vessels, between facilities; or between a vessel and a deepwater port; and

"(23) "vessel" means every description of watercraft or other contrivance that is used, or capable of being used as a means of transportation on water, whether self-propelled or not.

"PROHIBITION, NOTIFICATION, AND CLEANUP

"SEC. 503. (a)(1) The discharge of oil into the aquatic and terrestrial environment in harmful quantities as determined by the President under section 311 (b)(4) of the Federal Water Pollution Control Act is prohibited.

"(2) The owner or operator of a vessel, offshore facility, or licensee of a deepwater port, from which oil is discharged in violation of this section shall be assessed a civil penalty of not more than $10,000: *Provided, however,* That such owner, operator, or licensees shall not also be assessed a civil penalty, under section 311(b)(6) of the Federal Water Pollution Control Act or section 18(a)(2) of this Act, for the same discharge.

"(b) Any person in charge of a vessel, offshore facility, or deepwater port shall, as soon as he has knowledge of any discharge of oil from such vessel, facility, or port in violation of this section, immediately notify the appropriate agency of the United States Government of such discharge. Any such person who fails to notify immediately such agency of such discharge shall, upon conviction, be fined not more than $10,000, or imprisoned for not more than 1 year, or both: *Provided, however,* That no person convicted under this section shall also be convicted for the same failure to notify under section 311 (b)(5) of the Federal Water Pollution Control Act or under section 18(b) of this Act. Notification received pursuant to this section or information obtained by the exploitation of such notification shall not be used against any such person in any criminal case, except a prosecution for perjury or for giving a false statement.

"(c)(1) Whenever any oil is discharged, the President shall act to remove or arrange for the removal of such oil, unless he determines such removal will be done properly and expeditiously by the owner or operator of the vessel, offshore facility, or deepwater port, from which the discharge occurs.

"(2) Removal of oil and actions to minimize damage from oil discharged shall, to the greatest extent possible, be in accordance with the National Contingency Plan for removal of oil and hazardous substances established pursuant to section 311(c)(2) of the Federal Water Pollution Control Act.

"(3) Whenever the President acts to remove a discharge of oil pursuant to this subsection, he is authorized to draw upon the money available in the Fund established pursuant to this title. Such money shall be used to pay promptly for all cleanup costs incurred by the President in removing or in minimizing damage caused by such oil discharge.

"LIABILITY FOR DISCHARGE OF OIL

"SEC. 504. (a) All cleanup costs, incurred by the President, Secretary or any other Federal, State, or local official or agency, or any other person, in connection with a discharge of oil in violation of this title shall be borne by the owner and operator or licensee of the vessel, facility or deepwater port from which the discharge occurred.

"(b)(1) Notwithstanding any other provision of law and except as provided in subsection (d), the owner and operator of a vessel shall be jointly and severally liable, without regard to fault, for damages which result from a discharge of oil in violation of this title from such vessel. Such liability shall not exceed $150 per gross ton, or $50,000,000, whichever is greater, except that if it can be shown—

"(A) that such discharge was the result of gross negligence or willful misconduct, within the knowledge and privity of the owner, operator, or person in charge;

"(B) that such discharge was the result of a violation of applicable safety, construction, or operating standards or regulations; such owner and operator shall be jointly and severally liable for the full amount of cleanup costs and damages.

"(2) The owner and operator of a vessel carrying oil which has been transported through the trans-Alaska pipeline and loaded on such vessel at the terminal facilities of the pipeline, shall be jointly and severally liable, without regard to fault, subject to the limits and conditions contained in this subsection, to residents or the Government of Canada for cleanup costs and damages resulting from the discharge of oil from such vessel.

"(c) Notwithstanding any other provision of law and except as provided in subsection (d)—

"(1) The owner and operator of an offshore facility shall be held jointly and severally liable without regard to fault, for damages which result from a discharge of oil in violation of this title from such facility. Such liability shall not exceed $50,000,000, except that if it can be shown that (A) such damages were the result of gross negligence or willful misconduct within the privity and knowledge of such owner or operator, or the person in charge of such facility; or (B) that such discharge was the result of a violation of applicable safety, construction, or operating standards or regulations; such owner and operator shall be jointly and severally liable for the full amount of such damages.

"(2) The licensee of a deepwater port shall be liable without regard to fault for damages which result from a discharge of oil in violation of this title from such deepwater port. Such liability shall not exceed $150,000,000, except that if it can be shown that such damages were the result of gross negligence or willful misconduct within the privity and knowledge of the licensee or any person in charge of such port, or that such discharge was the result of a violation of applicable safety, construction or operating standards or regulations, such licensee shall be liable for the full amount of such damages.

"(d) Liability for costs and damages resulting from a discharge of oil shall not be imposed on any person pursuant to subsection (a), (b), or (c), if the owner, operator, or licensee involved establishes that such discharge was caused solely by an act of war. In addition, liability with respect to damages claimed by a damaged party shall not be imposed under subsections (b) and (c) of this section if the owner, operator, or licensee involved establishes that such discharge was caused solely by the negligence or international act of such damaged party.

"(e)(1) In any case in which the owner and operator of a vessel are held liable, pursuant to subsection (a) or (b), for costs and damages resulting from a discharge of oil, such an owner or operator shall be subrogated, if such discharge was caused by negligence on the part of the owner or operator of an offshore facility or on the part of the licensee of a deepwater port, to the rights of any person who is entitled to recover any damages against such owner, operator, or licensee.

"(2) In any case in which the owner and operator of an offshore facility are, or in which the licensee of a deepwater port, is held liable, pursuant to subsection (a) or (c), for cleanup costs and damages resulting from a discharge of oil, such an owner, operator, or licensee shall be subrogated, if such discharge was the result of the unseaworthiness of a vessel or the negligence of a vessel's owner or operator, to the rights of any person who is entitled to recover any damages against the owner or operator of such vessel.

"(3) The provisions of this section shall not in any way affect or limit any rights that an owner or operator of a vessel, an offshore facility, or a licensee or that the Fund may have against any third party whose acts may have caused or contributed to a discharge of oil.

"(4) In any case in which the owner and operator of a vessel, or an offshore facility are, or in which the licensee of a deepwater port, is held liable, pursuant to subsection (a), (b), or (c), for costs and damages resulting from a discharge of oil that was caused solely by negligence on the part of the Federal Government in failing to maintain adequate aids to navigation, such owner, operator, or licensee shall be entitled to recover cleanup and damage expenditures from the Federal Government. In such cases, the Fund shall also be entitled to seek recovery from the Federal Government for cleanup and damage expenditures by the Fund.

"THE FEDERAL OIL POLLUTION LIABILITY AND COMPENSATION ADMINISTRATION

"SEC. 505. (a) There is hereby established in the Department of Transportation an agency which shall be known as the Federal Oil Pollution Liability and Compensation Administration.

"(b)(1) There shall be at the head of the Administration the Administrator of the Federal Oil Pollution Liability and Compensation Administration. The Administrator shall be appointed by the President, by and with the advice and consent of the Senate, and shall be compensated at the rate now or hereafter provided for level IV of the Executive Schedule pay rates (5 U.S.C. 5315). The Administrator shall report and be responsible to the Secretary, except that decisions of the Administrator shall not be subject to review, delay, reversal, or other action by the Secretary or any other officer or employee of the Department of Transportation.

"(2) There shall be in the Administration a Deputy Administrator of the Federal Oil Pollution Liability and Compensation Administration. The Deputy Administrator shall be appointed by the President, by and with the advice and consent of the Senate, and shall be compensated at the rate now or hereafter provided for level V of the Executive Schedule pay rates (5 U.S.C. 5316). The Deputy Administrator shall perform such functions as the Administrator shall from time to time assign or delegate, and shall act as Administrator during the absence or disability of the Administrator or in the event of a vacancy in the office of Administrator.

"(3) There shall be in the Administration a General Counsel who shall be appointed by the President, by and with the advice and consent of the Senate, and shall be compensated at the rate now or hereafter provided for level V of the Executive Schedule pay rates (5 U.S.C. 5316).

"(c) FUNCTIONS.—The Administrator shall—

"(1) establish and maintain the Fund, in accordance with section 506;

"(2) act as trustee of the natural resources of the marine environment, in accordance with section 507;

(3) require financial responsibility, in accordance with the provisions of section 508;

"(4) establish regulations and provide for the fair and expeditious settlement of claims, in accordance with section 509;

"(5) provide public access to information and conduct public education programs, in accordance with section 510;

"(6) submit an annual report, in accordance with section 511; and

"(7) perform such other functions as are prescribed by law or by the Secretary.

"(d) POWERS.—In the performance of his functions, the Administrator is authorized to—

"(1) appoint, fix the compensation, and assign the duties of such officers and other personnel as may be necessary or appropriate, and to delegate authority of the Administrator to any such personnel;

"(2) utilize, with the consent of the agency concerned, the services or personnel, on a reimbursable basis or otherwise, of any Federal Government agency, of any State or local government agency, or of any organization, to perform such functions on behalf of the Administrator as are necessary or appropriate;

"(3) make, promulgate, issue, rescind, and amend such rules and regulations as may be necessary to carry out the purposes of this title;

"(4) conduct such studies and investigations, obtain such date and information, and hold such meeting or public hearings as may be necessary or appropriate to facilitate the exercise of any authority granted to, or the performance of any function imposed on, the Administrator under this title;

"(5) enter into such contracts, agreements, and other arrangements as are deemed necessary or appropriate for the acquisition of material, information, or other assistance related to, or required by, the implementation of this title; and

"(6) issue and enforce orders during proceedings maintained pursuant to this title including, but not limited to, issuing subpenas, administering oaths, compelling the attendance and testimony of witnesses and the production of books, papers, documents, and other evidence, and the taking of depositions.

"THE FEDERAL POLLUTION COMPENSATION FUND

"SEC. 506. (a) There is established within the Administration a Federal Oil Pollution Compensation Fund. The Fund shall be a nonprofit corporate entity which may sue or be sued in its own name.

"(b)(1) Moneys in the Fund shall be disbursed for the following purposes and no others:

"(A) administrative and personnel expenses of the Fund, after appropriation in an appropriation Act;

"(B) cleanup costs resulting from the discharge of oil incurred (i) pursuant to section 502 of this Act, (ii) pursuant to section 311 of the Federal Water Pollution Control Act, (iii) pursuant to any State or local law, or (iv) by the owner or operator of a vessel offshore facility or a licensee of a deepwater port if it can be shown that such discharge was caused solely by an act of war or negligence on the part of the Federal Government is establishing and maintaining aids to navigation;

"(C) all damages not actually compensated pursuant to section 502 of this Act, and for damages whenever the source of the discharge cannot be determined or is beyond the jurisdiction of the United States; and

"(D) research into methods for preventing, containing, and removing discharges of oil.

"(2) Payment of compensation by the Fund shall be subject to the Fund acquiring by subrogation all rights of the claimant to recovery cleanup costs or damages from the discharger. The Fund shall diligently pursue recovery for any such subrogated rights.

"(3) Notwithstanding the above, the Fund shall not be liable to pay cleanup costs and damages of any claimant whose negligence or intentional act was the sole cause of the discharge.

"(c) In all claims or actions by the Fund against any owner, operator, licensee, or other person providing financial responsibility, the Fund shall recover (1) the amount the Fund has paid to the claimant or to any governmental entity undertaking cleanup operations, without reduction, and (2) interest on that amount, at the existing commercial interest rate, from the date upon which the request for reimbursement was issued from the Fund to the owner, operator, licensee, or other person, to the date upon which the Fund is paid by such owner, operator, licensee, or other person.

"(d)(1) The Fund shall be provisioned through the levy and collection by the Administrator of a 5-cent-per-barrel fee imposed on the owner of oil when the oil is transferred between (A) a vessel and an offshore facility, (B) offshore facilities, or (C) a vessel and a deepwater port. All moneys in the deepwater port liability fund shall be placed in the Fund. Any oil upon which a fee has once been levied pursuant to clause (A), (B) or (C) of this paragraph shall not be subject to a subsequent levy under this paragraph.

"(2) The collection of the fee shall continue until the fund reaches $250,000,000 whereupon collection shall be suspended. The collections shall be resumed when the Fund is reduced below $200,000,000 and shall continue until the Fund again reaches $250,000,000. All sums recovered by the Fund from the party or parties responsible for a discharge under the provisions of this Act shall be deposited in the Fund and included in calculating the balance. All sums not needed for the purposes specified in subsection (b) of this section shall be prudently invested in income-producing securities issued by the United States and approved by the Secretary of the Treasury. Income from such securities shall be applied to the principal of the Fund.

"(3) Each person responsible for contributing to the Fund in accordance with this subsection shall keep such records and furnish such information as the Administrator shall prescribe in regulations. Collection will be at such times and such manner as shall be prescribed in such regulations.

"(4) Whenever the money in the Fund is less than the claims for cleanup costs and damages for which it is liable under this section, the Fund shall borrow the balance required to pay such claims from the United States Treasury at an interest rate determined by the Secretary of the Treasury.

"SEC. 507. The Administrator, or the authorized representative of any State, shall act on behalf of the public as trustee of the natural resources to recover for damages to such resources. Sums recovered shall be used to restore, rehabilitate, or acquire the equivalent of such natural resources by the appropriate agencies of Federal or State government.

"FINANCIAL RESPONSIBILITY

"SEC. 508. (a) Each owner or operator of a vessel or an offshore facility and each licensee shall establish and maintain under rules and regulations prescribed by the Administrator, evidence of financial responsibility based on the tonnage of the vessel, the capacity of the facility or deepwater port, and other relevant factors. Financial responsibility may be established by any one, or a combination of, the following methods acceptable to the Administrator: (1) evidence of insurance, (2) surety bonds, (3) qualification as a self-insurer, or (4) other evidence of financial responsibility satisfactory to the Administrator.

"(b) Any claim for cleanup costs and damages by any claimant or by the Fund may be brought directly against the bond, the insurer, or any other person providing financial responsibility.

"(c)(1) Any person who fails to comply with the provisions of this section or any regulation issued hereunder shall be subject to a fine of not more than $25,000.

"(2) The Secretary of the Treasury may refuse the clearance required by section 4197 of the Revised Statutes of the United States, as amended (46 U.S.C. 91), to any vessel subject to this section which has not furnished evidence of financial responsibility to the Administrator.

"(3) The Secretary, in accordance with regulations promulgated by him, shall (A) deny entry to any port or place in the United States or navigable waters to and (B) detain at any port or place in the United States from which it is about to depart for any other port or place in the United States any vessel subject to this section which, upon request, does not produce evidence furnished by the Administrator that the financial responsibility provisions of paragraph (a) of this section have been complied with.

"(d) The Administrator shall increase the requirements established under section 506 and under subsection (b) and (c) of section 504 annually, by an amount equal to the annual percentage increase in the Consumer Price Index.

"CLAIMS, SETTLEMENT, AND ADJUDICATION

"SEC. 509. (a) The Administrator shall prescribe and may from time to time amend regulations for the filing, processing, settlement, and adjudication of claims for cleanup costs and damages resulting from the discharge of oil.

"(b)(1) Upon receiving information regarding a discharge of oil, the Administrator shall publish and distribute in the area of the discharge information and material on the filing of claims.

"(2) Claims shall be filed with the Administrator not later than 2 years after the date of discovery of damage nor later than 6 years after the date of the incident which caused the damage. The Administrator shall prescribe appropriate forms and details for such claims, which shall include a provision requiring the claimant to make a sworn verification of the claim to the best of his knowledge. Each person's damage claims arising from one incident shall be stated in one form. Damages not included in the claim at the time compensation is made shall be deemed waived. Upon receipt of any claim, the Administrator shall as soon as practicable inform all affected parties of the claim.

"(3) If the source of the discharge can be determined and liability is conceded, the claimant and the Administrator or the person responsible for the discharge may arrange a settlement which shall be final and binding upon the parties. If liability is not conceded or if a settlement on the amount of damages cannot be negotiated, any party may request a hearing before an Administrative Law Judge.

"(4) If the source of the discharge is unknown or cannot be determined, the claimant and the Administrator shall attempt to arrange a settlement under procedures contained in regulations promulgated by the Administrator. If a settlement cannot be negotiated, the claim shall be submitted to an Administrative Law Judge.

"(c)(1) The Administrator shall promulgate regulations for hearings before an Administrative Law Judge. The Administrative Law Judge shall have the power to administer oaths, and subpena the attendance and testimony of witnesses, the production of books, records, and other evidence relative or pertinent to the issues presented for determination.

"(2) Upon receipt of a request for a hearing, the Administrative Law Judge shall promptly schedule a hearing to determine the amount and validity of the damage claim. The hearing shall be held in the area where the damage occurred.

"(3) Upon a decision by the Administrative Law Judge and without a request for judicial review, the amount shall be certified to the Administrator who shall promptly disburse the award. Such decision shall not be reviewable by the Administrator or the Secretary.

"(d)(1) Any person suffering legal wrong, or who is adversely affected or aggrieved by the decision of an Administrative Law Judge may, no later than 60 days after such decision is made, seek judicial review of such decision in the United States court of appeals for the circuit in which damage occurred or for the District of Columbia.

"(2) In any case in which the person responsible for the discharge, or the Administration, seeks judicial review, attorneys' fees and court costs shall be awarded to the claimant if the decision of the Administrative Law Judge is affirmed.

"(e)(1) The Attorney General may act on behalf of any group of damaged citizens the Administrator determines would be more adequately represented as a class in the recovery of claims under this section. Sums recovered shall be distributed to the members of such groups.

"(2) If, within 90 days after a discharge of oil in violation of this title has occurred, the Attorney General fails to act on behalf of a group who may be entitled to compensation in accordance with section 502 any member of such group may maintain a class action to recover such damages on behalf of such group. Failure of the Attorney General to act in accordance with this subsection shall have no bearing on any class action maintained in accordance with this subsection.

"(3) In any case where the number of members of the class exceeds 1,000, publishing notice of the action in the Federal Register and in local newspapers serving the areas in which the damaged parties reside shall be deemed to fulfill the requirement for public notice established by rule 23(c)(2) of the Federal Rules of Civil Procedure.

"(f) The Administrator shall initially request the Attorney General to promptly institute court actions and to appear and represent the Administration or the Fund for all claims under this title. Unless the Attorney General notifies the Administration that he will institute such action or will otherwise appear within a reasonable time, attorneys appointed by the Administrator shall appear and represent the Administration.

"PUBLIC ACCESS TO INFORMATION

"SEC. 510. (a) Copies of any communication, document, report, or information transmitted between any official of the Federal Government and any person concerning liability and compensation for damage resulting from the discharge of oil shall be made available to the public for inspection, and shall be available for the purpose of reproduction at a reasonable cost, to the public upon identifiable request.

"(b) Nothing contained in this section shall be construed to require the release of any information of the kind described in subsection (b) of section 552 of title 5, United States Code, or which is otherwise protected by law from disclosure to the public.

"ANNUAL REPORT BY ADMINISTRATOR

"SEC. 511. Within 6 months after the end of each fiscal year, the Administrator shall submit to the President of the Senate and the Speaker of the House of Representatives (1) a report on the administration of the fund during such fiscal year; (2) a summary of the management and enforcement activities of the Administration; and (3) recommendations to the Congress for such additional legislative authority as may be necessary to improve the management of the fund and the administration of the liability provisions under this title.

"DISCLOSURE

"SEC. 512. Disclosure of such aspects of ownership and management as the Secretary may determine of each tanker entering U.S. waters shall be provided no later than 60 days after enactment and no later than January 30 of each calendar year, by all companies owning or operating such tankers which entered U.S. ports during the previous year. Tanker operators and owners whose tankers are not covered by the previous sentence and enter a U.S. port during the following year shall provide full disclosure of operating companies and owners upon entering any U.S. port for the first time in a given year.

"RELATIONSHIP TO OTHER LAW

"SEC. 513. (a) This title shall not be interpreted to preempt the field of liability or to preclude any State from imposing additional requirements or liability for any discharge of oil resulting in damages or cleanup costs within the jurisdiction of any State.

"(b) Any person who receives compensation for damages or cleanup costs pursuant to this title shall be precluded from recovering compensation for the same damages or cleanup costs pursuant to any other State or Federal law. Any person who receives compensation for damages or cleanup costs pursuant to any other State or Federal law shall be precluded from receiving compensation for the same damages or cleanup costs under this title.

"(c) The United States district courts shall have original jurisdiction of cases and controversies arising under this title, and proceedings with respect to any such case or controversy may be instituted in the judicial district in which any defendant resides or may be found, or in the judicial district in which the damages occurred.

"AUTHORIZATION FOR APPROPRIATIONS

"SEC. 514. There is authorized to be appropriated for the administration of this Act $5,000,000 for the fiscal year ending September 30, 1977; $5,000,000 for the fiscal year ending September 30, 1978; and $5,000,000 for the fiscal year ending September 3, 1979.".

WORLDWIDE TANKER CASUALTY RETURNS: THIRD QUARTER 1976

OVERALL RESULTS

Two unfortunate records have been established during the first nine months of this year. 13 tankers, with a total capacity of 940,000 deadweight tons, were declared a total loss. This exceeds the 815,000 deadweight tons lost during the entire year of 1975, which had the all time record. Two of the 13 vessels in these catastrophes were larger than 200,000 deadweight tons. The second record was set by the spilling of 198,277 tons of oil in nine months. The number of reported casualties continues to drop, probably because deductibles of up to $60,000 per incident are now included in tanker hull and machinery insurance policies. Other factors contributing to the reduction in accidents is the slow down of nearly all operating tankers and the lay up of over 400 surplus oil carrying vessels.

WEATHER DAMAGE

The perils of the sea apparently overtook the twentyone year old *Cretan Star*, of 29,000 dwt. flying the flag of Cyprus, when she ran into bad weather, while loaded, about 450 miles from Bombay. After reporting severe weather conditions and being struck by a huge wave, no further communications could be established with the tanker. She is listed as missing with all 36 crew members unaccounted for.

STRANDINGS

Thirteen of the reported seventeen strandings occurred in rivers or harbors. The other four misadventures happened in coastal areas outside of restricted inland waterways.

COLLISIONS

The Philippine flag *Diego Silang* of 10,000 dwt., while loaded, was in collision with two other vessels in the Straits of Malacca and as a result lost 6,000 tons of crude oil overboard. Malaysian government officials said the Philippines will have to pay over $600,000 for the cost of fighting the spill.

CONTACT

Fifteen of the forty accidents in this category were caused by striking bottom (sometimes referred to as groundings). Eleven incidents were reported as hitting a dock, buoy or fixed structure. The others were suffered while lightering, etc.

FIRES AND EXPLOSIONS

One of the twentytwo fires and/or explosions that happened in the third quarter took place in a cargo tank while the vessel was repairing at Hong Kong, with 14 men overcome by the fire. Another fire occurred in the pumproom of a tanker. All other calamities were in the main engine, boilers, engine room, accommodations or other spaces.

MACHINERY DAMAGES

There was a continued reduction in reporting these type of mishaps.

OTHER CASUALTIES

Nine of the total of forty-two events were due to engine trouble.

Six accidents were caused by crew negligence. Anchors were lost by four tankers. Seven vessels broke down at sea. Two suffered steering gear troubles and three had the bad luck of spilling oil. The remainder had a variety of reported problems.

All the casualty data was obtained from Lloyd's List published by Lloyd's of London. Tankers ore/oil carriers and bulk/oil vessels of 6,000 deadweight tons and over were included in the statistics. And liquid gas carriers of 6,000 deadweight tons and over were included if their liquid gas capacities were less than 80% of their total cargo capacity.

NOTICE

A valuable management tool to assist in the selection of tankers for charter is a tabulation of the reported casualties to that tanker and/or that owner.

This tabulation can be obtained from the Tanker Advisory Center. A data bank containing over 19,000 tanker casualties, reported in Lloyd's List since 1964, is maintained by the Tanker Advisory Center.

Get this management tool from the Tanker Advsory Center Select tankers and owners with excellent casualty records.

NO MORE "ARGO MERCHANTS"

Four years ago Congress passed, and the President signed, a Ports and Waterways Safety Act. That law sponsored chiefly by Senator Magnuson of Washington, gave the Coast Guard power to issue rules and regulations designed to minimize shipping hazards, including dangers to the coastal environment.

Specifically, they were to reduce the chance that ships improperly equipped and manned would collide or go aground, as the Argo Merchant did two weeks ago, laying down a hundred-mile ribbon of oil in the North Atlantic off Nantucket—and as another Liberian tanker did several days later at great cost to the bird life of the Delaware River.

The Coast Guard has moved to carry out its duties under the law at a leisurely pace that reflects its original reluctance to take them on in the first place. It has formulated rules and regulations for American vessels in domestic trade, but has yet to make final those covering foreign ships or American ships in foreign trade. In any case, none of the regulations are regarded as nearly adequate by those who took part in the legislative fight for the 1972 act. A major factor in the failure, besides the usual bureaucratic delays, is an evident reluctance by the Administration to press ahead for fear of retaliatory action in foreign ports. But if there is to be a competition in safety regulations, that can only be for the good.

This country has yet to ratify a 1973 international convention calling for segregated ballast and other safety measures. No other maritime power has done so either. But the chief purpose of the Ports and Waterways Safety Act was to go beyond that extremely mild agreement and give a much-needed lead to other seafaring nations. Indignant at the failure of the Coast Guard to achieve what it is clearly empowered to do, Russell E. Train, administrator of the Environmental Protection Agency, is entirely warranted in demanding "more stringent regulations"—now.

Some of the most essential improvements cannot be made on old ships—and the tankers of the world are an old fleet, with shipbuilding, everywhere at a dismally low level of production. Recognizing that fact, the government of Saudi Arabia has recently promulgated a law (designed to relieve crowding and delays in its harbors rather than save the environment) that the United States and other nations would do well to emulate. No vessels more than 15 years old may discharge cargo at a Saudi port unless a survey, made at the shipowner's request and expense, shows them capable of quick loading and unloading.

Passage of an analogous American law, plus enforcement of the existing law, should make it feasible to require suspect vessels to demonstrate that they are soundly constructed, properly loaded, navigationally equipped and adequately manned. Even American shipowners who benefit from lower standards by putting their vessels under "flags of convenience" should now recognize the urgency—and profit to their trade—of reducing the threat to navigation, to offshore fisheries and to the integrity of our coasts.

[From the New York Times, Jan. 6, 1977]

CONGRESS PLANS NEW LEGISLATION TO CURB OIL SPILLS

(By John Kifner)

WASHINGTON, Jan. 5.—Members of Congress from coastal states, amid growing concern over a series of oil spills and accidents involving Liberian-flag tankers, are proposing new legislation aimed at curbing spills and are scheduling hearings on the Argo Merchant disaster.

The lawmakers are entering an area—the shipping of oil into the United States on foreign-flag vessels, including "flags of convenience"—that has been, for all practical purposes, without regulation.

The issues involved range from charges that oil and shipping interests have, in the past, been able to tailor regulations to their own specifications or to avoid them entirely by registering under foreign flags, to such technical design points as the relative worth of double-hulled ships and segregated ballast.

Senator Warren G. Magnuson, Democrat of Washington, has scheduled two days of hearings next week on the breakup last month of the Argo Merchant off Nantucket Island, which resulted in the spilling of 7.5 million gallons of oil, the largest oil spill off the nation's coast. Within days after the ship went aground, there were five other maritime mishaps involving Liberian-flag vessels.

Representative Gerry E. Studds, Democrat of Massachusetts, whose district includes Cape Cod, the offshore islands and the fishing ports threatened by the Argo Merchant spill, has reintroduced legislation that died last year to create a liability fund to pay for damages caused by oil spills.

Senator Edward M. Kennedy, Democrat of Massachusetts, is preparing legislation to set up a traffic control system for tankers, similar to that used for aircraft. The legislation, which is to be submitted next week, would also require tankers coming into American waters to be equipped with standard electronic navigational equipment.

PART OF A LARGER PROBLEM

The series of accidents that have focused Congressional concern are only part of a larger problem. The National Academy of Sciences reported in 1975 that some two million tons of oil were spilled in the world's oceans each year.

According to Coast Guard figures, there were 27 spills of 100,000 gallons or more in 1974. About 97 percent of the oil spills, the

Coast Guard says, occur in ports and harbors. However, experts say there is an even more serious pollution problem from the constant, although smaller, discharges of oil from leaking vessels and from such common practices as flushing ballast tanks near shore.

The spillage is likely to increase as more oil is shipped and as more tankers put in more than 10 years of service and reach the point at which metal fatigue makes them more liable to breakups, experts in the field say. Lloyd's Registry of Shipping reports that approximately 300 ships are lost at each each year.

About 95 percent of the oil imported into the United States comes on foreign-flag vessels, and 84 percent of the ships owned by members of the American Petroleum Institute—the association of United States oil companies—sail under foreign flags, according to figures supplied by Mr. Studds' office.

There has been little or no American control over the safety of the foreign-flag vessels.

WORLD'S LARGEST TANKER FLEET

The most popular "flag of convenience" is that of Liberia, which now has the largest merchant marine and largest tanker fleet in the world. By registering under the Liberian flag, American shipowners avoid paying American corporate profit taxes. In addition, they avoid American safety inspections and the necessity of more expensive American shipyards and union crews. Some shipowners in Greece, Hong Kong and Taiwan also register vessels in Liberia for similar reasons.

The ships under Liberian flag range from the giant supertankers operated by Exxon and other American oil companies, to those run by such smaller operators as Amerships Inc., which operates a fleet of eight second-hand ships, each owned on paper by a separate Liberian corporation, including the ill-fated Argo Merchant.

There is mounting criticism of the Coast Guard in Congressional circles for an alleged reluctance to set or enforce safety standards. Senator Ernest F. Hollings, Democrat of South Carolina, who is a member of the Senate Commerce Committee, which will hold next week's Argo Merchant hearings, said today that Congress would have to mandate stricter standards "if the Coast Guard won't use the authority it already has."

[From Time magazine, Jan. 10, 1977]

OIL IS POURING ON TROUBLED WATERS

In the storm-tossed waters off Massachusetts last week, 7.6 million gal. of oil slid slowly seaward. In the Delaware River, southwest of Philadelphia, 134,000 more gal. of deadly goo spread toward rich tidal marshes. In Los Angeles, the wreck of a blast-shattered tanker still lay smoldering at its berth. Suddenly, on East Coast and West, the U.S. was undergoing an ordeal by oil.

The disasters began more than two weeks ago, when the Liberian-flag tanker *Argo Merchant*, well off course, ran hard aground on the Nantucket shoals, a well-charted section of the sea just southeast of Nantucket Island. After a week's battering by wind and waves, the 640-ft. ship began breaking up, spilling its entire cargo into the frigid Atlantic. Immediately endangered were not only the sandy strands of Nantucket and Cape Cod but also the rich fishing grounds of Georges Bank. Shortly after the *Argo Merchant* grounding, another Liberian ship, the *Sansinena*, exploded in Los Angeles' harbor with a blast that rattled windows for miles and killed at least five people (four crewmen are still missing).

HEAVY TRAFFIC

Last week two more accidents occurred. Another Liberian tanker, the *Daphine*, ran aground off Puerto Rico and still another, the *Olympic Games*, grounded and suffered a hull puncture during a docking maneuver at Marcus Hook, Pa. Moving downstream in a slick 32 miles long, its cargo seeped into marshes, coating wintering waterfowl with a sticky layer of oil that matted their feathers and robbed them of their insulating properties. Tens of thousands of birds were endangered.

Because the catastrophes were clustered so closely, their drama was heightened. But they may be only a sample of things to come. The transportation of oil by sea has increased enormously in the years since World War II, and oil tankers, once a little-noticed breed of ship, now constitute more than half of the world's merchant-ship tonnage. In U.S. ports, tanker traffic has increased proportionately as the nation has turned heavily to imports to meet its growing thirst for fuel. In 1966 the U.S. imported 940 million bbl. of oil and petroleum products. Now nearly three times as much is arriving in U.S. ports—about 300 million gal. a day.

Oil pollution can only increase. Of the estimated 5 million tons of oil dumped into the oceans annually, tankers—partly by deliberately flushing cargo tanks before reloading—account for nearly one-third. This figure is sure to rise.

In 1950 a tanker of 28,000 tons was considered so impressive that Britain's Princess Margaret formally launched it. By 1960, tankers of more than 100,000 tons were becoming commonplace. Now the supertankers make the 18,743-ton *Argo Merchant* seem like a skiff by comparision. Over 30% of the world's tanker fleet consists of ships with capacities of over 200,000 tons. Japan's *Globtik Tokyo* (length: 1,243 ft.; draft: 91 ft. 11 in.) can carry a whopping 476,292 tons. The hazards such ships pose are correspondingly enormous (*see box*).

Fortunately, major accidents involving tankers have been infrequent, but those that do occur are spectacular. The Liberian ship *Torrey Canyon* spilled over 30 million gal. of oil when it went aground off England's Cornwall coast in 1967. The *Metula* dumped about 16 million gal. of Persian Gulf crude when it grounded in 1974 in the Strait of Magellan, polluting an area where Charles Darwin had gone ashore more than a century earlier to study animals and plants. The *Jacob Maersk* lost or burned some 26 million gal. when it exploded off Portugal in 1975.

The effects of such spills remain to be fully determined. Little long-term damage seems to have resulted from the *Torrey Canyon* disaster; indeed, the most serious effects on marine organisms have been blamed not on the oil but on the detergents used to disperse it. Spills closer to shore can have much more dramatic effects. Large numbers of fish, shellfish, crustaceans and marine worms were killed almost immediately whan a barge capsized and spilled over 200,000 gal. of oil into Buzzards Bay, off Falmouth, Mass., in 1969. Eighteen months later, scientists from Woods Hole Oceanographic Institution reported that the oil was still spreading along the bottom at 40-ft. depths, covering more than 5,000 acres offshore and polluting 500 acres of tidal rivers and marshes.

ECOLOGICAL HAZARD

No scientists are willing to forecast the effects of the oil now spreading seaward from the *Argo Merchant*. Most believe that if the globs of oil, called oilbergs because most of their mass is below the surface, continue to move east, the damage will be held to a minimum. But shifting winds could still bring the oil ashore, fouling beaches and causing massive ecological damage. The spill has already driven hundreds of sea birds ashore, bedraggled and helpless. The oil could also threaten humpback whales, which migrate through the affected area, and imperil the already endangered gray seals that winter off Nantucket. But of the greatest concern is the threat to the Massachusetts fishing industry, which employs some 30,000 men and has been slowly coming back after a long period of economic depression. "We fear damage will be long-lasting and pervasive," said Governor Michael Dukakis in a letter requesting federal aid for his state's fishermen. The fishermen's reaction was even stronger: a class-action suit for $60 million in damages has been filed against the *Argo Merchant's* owners on behalf of twelve groups of fishermen.

Cleaning up oil spills is still very much a developing science. Such devices as booms to contain spilled oil and vacuum cleaners that suck it off the surface may work fairly well in the quiet waters of harbors or slow-flowing rivers. But the open ocean poses all but insuperable problems. Coast Guardsmen lost $200,000 worth of equipment when stormy seas forced them to abandon attempts to take off the *Argo Merchant's* cargo. The pounding waves rendered booms useless and stymied the Coast Guard's attempts to set the oil on fire.

Efforts to prevent spills seem to be equally ineffective. The U.S. is doing a decent job of regulating American flagships, mandating such things as crew qualifications and training, navigational and safety equipment. But it has done little to regulate foreign ships, many of which are registered in Liberia and Panama to avoid U.S. or European taxes, wage scales and expensive—hence profit-cutting—regulations on crews and equipment. Liberia, which has no natural harbor, has the world's largest tanker tonnage—with some of its ships American-owned. Such ships and their crews frequently fail to meet adequate safety standards. The *Argo Merchant*, for example, was involved in 18 "incidents"—including two previous groundings—before the Nantucket disaster. Her captain since June, Georgios Papadopoulos, 43, admitted at a hearing last week that his ship carried no LORAN (long-range navigation) equipment. His gyrocompass, he said, was not being used just prior to the accident because it was six degrees off, and the helmsman was steering by magnetic compass. He himself had not had an accurate fix on his position for more than 15 hours. Even if he had known his position, he might still have been in trouble. The water current charts he was using were November's, not December's, an important difference.

Environmentalists have used the accidents to call again for action to control the risks posed by oil carriers, and they are urging the U.S. to adopt stricter tanker regulations. Some charge that the Coast Guard has ample authority under the Ports and Waterways Safety Act of 1972 to upgrade the standards of foreign ships entering U.S. waters, and accuse the service of moving too slowly to use this power. "The Coast Guard has been almost negligent," claims Jeffrey Knight, legislative director for Friends of the Earth. "It has been since 1972, and that's a long time to twiddle your thumbs." Environmental Protection administrator Russell Train is more charitable. Says he: "I think the Coast Guard is essentially conservative."

Rear Admiral William Benkert, chief of the Coast Guard's Office of Merchant Vessel Safety, indignantly denies the environmentalists' charges. "We haven't been sitting on our dead ass," he protests. But someone is. The U.S. has yet to ratify the liability convention adopted by the Inter-Governmental Maritime Consultative Organization in 1969. Congress has yet to see the Administration's bill carrying out IMCO's 1973 convention on ocean pollution. Nor was the U.S. successful in pushing for the adoption of rules requiring newly constructed tankers to have double bottoms. Such a construction feature is now mandatory on all craft carrying chemicals and liquified, flammable gas, and, according to a federal law enforcement officer, would have prevented the oil spill in the Delaware grounding. "It is," said Train, "damned hard to move anything in these international forums."

For spills inside the U.S. or within twelve miles of its shores, the federal Water Pollution Control Act now imposes strict liability on any ship that dumps oil; it requires offenders to pay for cleaning up the mess. The captain of *Olympic Games* was arrested last week and held on $50,000 bail under provisions of this law. "For the first time," said U.S. Attorney David W. Marston, "we are providing with this legal action a real incentive for captains, pilots and owners to meet a higher safety standard when they use U.S. waters."

SOMBER THOUGHT

Some officials argue that stricter controls will discourage shipowners from sending their fleets to U.S. ports, with the result that the country will be unable to get the oil it needs. But others disagree. Over a period of years, the U.S. has adopted international conventions governing safety at sea and now reqiures all ships calling at U.S. ports to pick up passengers to meet the same strict standards. At first many shipowners objected. But those eager for a share of a lucrative market quickly complied. Oil shippers would almost surely do the same.

Futurists add one final somber thought: The world's oil will eventually run out and be replaced by something else. The seas—and their resuorces—are irreplaceable.

[From Time magazine, Jan. 10, 1977]

TOMORROW'S DISASTER: "GIGANTIC"

As long as the Empire State Building is tall, the ships in the new generation of supertankers are nothing if not impressive. But are they safe? Not according to Noël Mostert, a South African-born journalist. In his 1974 bestseller *Supership*, Mostert warned that these brobdingnagian tankers were accidents looking for places where they could happen. Nothing since then has altered his gloomy prediction. At his new home in Tangier, Mostert told TIME last week:

"The sort of accidents that have been happening to small ships will in the future be happening to the very biggest ships, the so-called VLCCs (very large crude carriers). We may confidently expect a rising rate of major big-ship disasters in the decade ahead.

"VLCCs were initially built without any experience or any attempt to really understand what was involved in such sizes. There have been improvements, but the fundamental structural problem of the ships is unchanged. For example, a VLCC must be able to steam through a monsoon one week, subantarctic storms off the Cape of Good Hope the next, pass through the tropics, then the Biscay or North Atlantic coast gales. These subject its great length to severe hogging and sagging, with its broad decks constantly subjected to the weight of tremendous quantities of sea water because of the low freeboard of the loaded ship.

"Among other stresses and strains are those that occur when a vessel that was empty a few hours before has up to 200,000 tons of oil suddenly poured aboard under rapid loading conditions. At some discharge ports, very big ships can dock only at high tide. Delays can mean the ship sits on her bottom plates in shallow water before the draft can be lightened sufficiently. Such structural strains are repeated and severe, and, coupled with the tremendous rate of corrosion, they shorten the life of the vessels and constantly weaken them.

"One of the principal factors in the loss at sea of loaded older tankers has been their sudden breakup because of their worn structures. In the recent past these accidents have happened principally to smaller ships. But now the first generation of VLCCs is nearly ten years old; the world is being serviced increasingly by gigantic ships that have entered the critical and dangerous period of tanker life.

"Moreover, the psychological burden on crews, which was always severe, is now worse because the ships are steaming more slowly and the men thus spend even longer periods on board. As their own efficiency deteriorates, the efficient management of the ships must too.

"It is my view that some strong form of control is desperately needed for the tanker industry. Since any international application of maritime rules is almost impossible, the controls should be unilaterally imposed."

[From the Washington Star, Jan. 3, 1977]

SHRUGGING OFF OIL SPILLS

There's no point in becoming terribly indignant over the 7.5 million gallons of oil drifting dangerously at sea off Nantucket Island. Or the 25-mile polluting slick on the Delaware River from 134,000 gallons of spilled crude. Do not wring hands either over the record deficit in the U.S. trade figures in November, contributed to by heavy imports of foreign oil as a hedge against the OPEC price rise; after all, we now are importing nearly 45 per cent of domestic consumption, significantly above the level prior to the oil embargo—for those with very long memories.

There's certainly no point in lapsing into ruffled sleep over these little old oil-spill accidents—not so long as Detroit finds its subcompacts a glut on the market as we mindlessly continue to demand more cylinders and vehicular amenities; not so long as "Energy Conservation" is confused with a now-defunct rock group.

Still, reading the news reports of these two latest troubles, it is hard not to wince. There is something mildly disturbing about a tanker that goes around 24 miles off course; its skipper's testimony in court that his gyrocompass had not been functioning properly and he had stopped using it to navigate the day before the accident; that something also might have been amiss with the Liberian-flag vessel's radio direction finder; and reports that the ship, the Argo Merchant, had been involved in 19 previous high-seas mishaps since 1964.

The Deleware River incident, too, was annoying. The ship involved there, the Olympic Games, also sailing under the Liberian flag, ripped its bottom while docking. Russell Train, the administrator of the Environmental Protection Agency, called it "a hell of a mess," which is the kind of direct analysis it is refreshing to hear from government. Mr. Train again called for tauter control over foreign shipping in U.S. ports. "If the Olympic Games had had a double bottom, this wouldn't have happened. The United States has been reluctant to set standards, but with the vast amount of oil coming into the country, the time has come to set more stringent regulations," he said. There is disagreement that this is the correct remedy but it may be time to get the debate moving right along.

Each time one of these potential disasters happens, there seems to be a tendency to rediscover fire—goodness, the vessel did not have a double bottom or the equipment aboard the tanker was suspect. Noel Mostert's excellent book, Supership, published two years ago, was eloquent on the dangers inherent in the massive interocean transportation of petroleum—warning, for example, about design features such as single bottoms, poor maintenance, sloughing off aging tankers to less than impeccably concerned owners who would then register them under flags of nations with convenient standards or enforcement.

The information in Supership was hardly a bulletin in 1974, at least to those in the oil and shipping businesses. We have been derelict in acting on the information, however, once it became widely available—though railing against the 55 m.p.h. speed limit still is a chorus.

Oil accidents are a difficult problem, no question. Mr. Mostert did not believe it insoluble: "Any major oil importer would soon make its impact felt upon all new ships, and upon all older ships that would justify the expense of reconstruction." The United States, of course, is a major importer.

No need to try to construct a syllogism of these elements. We would note George Pleckanov's comment, though: "Error has its logic as well as truth."

[From the New York Times, Jan. 1, 1977]

HEARING ON NANTUCKET SPILL ENDS; DIRECTION-FINDER PROBLEM HINTED

(By Arnold H. Lubasch)

Officers and crewmen of the oil tanker *Argo Merchant* ended a week of testimony yesterday for a hearing designed to determine why the ship ran aground near Nantucket Island on Dec. 15.

According to the testimony, presented in Federal District Court in Manhattan, the *Argo Merchant* was on the right course as late as the afternoon of Dec. 14. Then, before 6 a.m. the next day, the Liberian-flag tanker strayed 24 miles off course and struck the Nantucket Shoals.

The *Argo Merchant* was supposed to steer directly toward the Nantucket Lightship, a key navigational mark, then turn right on a routine course to bypass the shoals and head for Salem, Mass. But the captain never sighted the lightship, so the tanker failed to turn right and steamed straight into the shoals, running around and causing a huge oil spill.

TRIED TO FIND LIGHTSHIP

In the final hours before dawn, Capt. Georgios Papadopoulos and his chief officer were on the bridge trying to find the lightship. They testified that their radio direction finder, an instrument to pick up short-range radio signals for determining a ship's position, had indicated that the lightship was directly ahead of them.

The officers were so intent on looking for the lightship, according to the testimony, that they stood on the outer deck of the bridge and failed to watch the tanker's radar and depth finder. Both these instruments were turned on, they said, and could have indicated that the tanker had gone astray.

The testimony was that the tanker had not been equipped with a long-range electronic navigation system, although most ships carry such equipment for determining their positions at sea instead of the much less reliable radio direction finder used by the *Argo Merchant*.

Captain Papadopoulos acknowledged that, as he approached the Nantucket area, something must have been wrong with either the direction finder or the way he used it. If he knew what was wrong, he added, the tanker would not have gone aground.

The captain and others also testified that the gyrocompass on the Argo Merchant became erratic the evening before the grounding and that a less sophisticated magnetic compass was used for steering. The officers also said that they had used an out-of-date chart for the currents around Nantucket because their chart was for November instead of December.

TESTIMONY ON BOILER PROBLEMS

Testimony about malfunctioning boilers was elicited by insurance lawyers who sought to show that faulty equipment had affected the tanker's speed and direction. The lawyers, seeking damages from the owner of the Argo Merchant, hoped to show that the tanker was not seaworthy.

The Thebes Shipping Company, listed as the tanker's owner, has filed a petition to limit the company's liability to the present value of the wrecked ship, which is worthless. A Federal judge is expected to decide later if the petition should be granted, based

on whether or not the tanker was seaworthy at the start of her final voyage.

The taking of the testimony, known as depositions, will resume Monday morning under the supervision of Sol Schreiber, a Federal magistrate, at the court in Foley Square. All the testimony will be transcribed for use in a later trial on this issue of whether the shipowner's liability should be limited.

Lawsuits have been filed in Boston by commercial fishermen seeking $120 million from the owner and the captain for damages from the oil spill, but the Boston claims have been held up pending a decision on limiting the liability.

[From the Washington Post, Dec. 24, 1976]

OIL ON THE OCEAN

The wreck of the Argo Merchant off Nantucket presents the government with two quite different problems. The first, and most urgent, is to do all it can to minimize the damage that the oil floating around in the ocean may do to fisheries, wildlife and beaches. The second, and in the long run the more important, is to get serious about protecting this planet's marine world against pollution.

It will be some time before anyone can know definitively how much damage will be caused by the 7,500,000 gallons of industrial fuel oil spilled out of the wrecked ship. Where and what that oil will strike depends on the winds and the waves. How much damage it will do depends on how quickly nature can overcome its impact as well as how much man can do to help in that task. There will be damage—that much oil floating around that close to shore, subject to the whim of wind and tide, is certain to harm fishing banks, birds and marine life, and the shoreline, if it should be blown ashore.

But it is worth remembering that even the experts were amazed at nature's recuperative powers after the wreck of the Torrey Canyon off the English coast in 1967. Some 33,000,000 gallons of crude oil—an oil more toxic and more viscous than that carried by the Argo Merchant—were spilled in that wreck but within three years the effects were hardly noticeable. Of course, nature got a strong helping hand from the English and French who used huge amounts of detergents to break up the oil, trucked oily sand away from the beaches, and dumped large quantities of various materials into the sea to encourage the oil to sink. Those are the kinds of measures that the American government may now have to undertake once the sea settles down a little and the oil becomes accessible.

Disasters like this one, of course, are not new and may never be totally avoidable. As long as ships are used to transport oil, the seas will occasionally seize a victim, whether it be through human error as seems to be the case in this instance, or whether it be through a storm too violent for a ship to survive. Since there is no end in sight for the need to transport oil in ships—and in the area off the East Coast the use of tankers may increase rather than decrease with offshore drilling—it is all the more urgent for the government to take steps that can minimize accidents. The Argo Merchant, for example, seems to have been accident prone. Its history, reported in Thursday's newspapers, suggests it was scarcely seaworthy. The American government can do something about that, if it wants to. It can establish certain standards of seaworthiness that ships registered in other countries must meet if they are to use American ports.

There are other steps the government can take. Russell E. Train, administrator of the Environmental Protection Agency, suggested some of them in his statement in Boston Wednesday. An international agreement on ocean pollution was drawn up in London in 1973 but remains largely unratified by many nations that signed it, including the United States. Negotiations on a new law of the sea are still dragging on. A 1969 international agreement on liability for oil-pollution damage has never been ratified by this nation. There now exists the technological capability to monitor the course of ships at sea so they can be warned if they have drifted off course, as did the Argo Merchant.

It is not clear to us precisely what steps the government ought to take. It does seem probable, however, that there is more that could be done to decrease the odds of potentially catastrophic oil spills and that the menace is real enough to justify Mr. Train's call for a presidentially appointed task force to develop a comprehensive national policy for dealing with the transportation of oil by ships. The oceans, and the rest of nature, do have truly remarkable recuperative powers. But there obviously is a limit to the amount of man-made mess that nature can tolerate without lasting injury. The United States ought to be the world's leader is seeing that this limit is never reached by doing all that can be done to minimize pollution before it occurs.

[From the Washington Post, Jan. 11, 1977]

SIX SAVED, ONE LOST AS STORM BREAKS TANKER

GLOUCESTER, MASS., Jan. 10.—One seaman was missing and presumed drowned and six were rescued after an empty American oil tanker broke up Monday in a raging winter storm off Cape Ann.

Waves 35 feet high and winds roaring at 70 miles an hour ripped apart the tanker Chester A. Poling about six miles off the coast.

The storm, the third in less than two weeks and the second in four days, pelted the area with snow, sleet and freezing rain.

The 43-year-old 281-foot ship, based in New York, was running empty from Boston to Newington, N.H., when it plowed into the storm.

When the Poling broke up, two crewmen were on the bow section and the other five clung to the stern.

As the bow sank, the two plunged into the freezing waters. They were rescued by the Coast Guard cutter Cape George.

A Coast Guard helicopter lowered a rescue basket to the bobbing stern section, and in desperation one tanker crewman leaped for it too soon. He missed the basket and fell into the water.

"We tried to get the basket close to him, but he couldn't maneuver, and it looked like he was unconscious," said Lt. Rick McLean, copilot of the helicopter. "It was so cold that the mind is working OK, but the body doesn't want to move."

The helicopter then lifted off another crewman succesfully. But the stern began to sink, and the three others leaped into the water.

"We picked one up out of the water, and the cutter Cape Cross picked up the other two," said McLean.

Coast Guard officials said that one of the two rescued men showed no signs of life when he was brought aboard the cutter. However, on the way to the hospital he revived.

Two men treated at a hospital and released were identified as Harry Selleck, 45, of Bricktown, N.J., and John Gilmete, 47, of Jersey City, N.J.

Admitted to the hospital were the captain, Charles Burgess, 56, of England; Charles Lord, 52, of Bailey Island, Maine; Guy Cronsija, 42, of Saddle Brook, N.J., and Philip Becker of Hauppage, N.Y.

The missing man was identified as Joao DaRosa, 41, of Pawtucket, R.I.

A total of 12 oil carriers have been involved in accidents in or near U.S. waters since Dec. 15, including seven Liberian tankers, two Panaminian and three U.S. vessels—the Poling and two diesel oil barges.

* * * no serious trouble before, according to a spokesman for the ship's owner, Poling Transportation Corp. of New York.

"Nothing other than what you might call the normal hazards of the trade," the company spokesman said.

He said he last heard from the tanker during the morning.

"At 7 o'clock, she called ship to shore to New York. She said she was proceeding as normal. She mentioned there was rough weather. She was to arrive at 2 o'clock at Newington," he said.

The spokesman said the Chester A. * * *.

The foundering of the Poling was the third mishap off New England.

The 640-foot Argo Merchant broke up off Nantucket Island on Dec. 21 after running aground on sandy shoals six days earlier.

The Panamanian tanker Grand Zenith with a crew of 38 and 8 million gallons of oil has been overdue since Jan. 2 and is believed lost in the stormy North Atlantic off New England. Searchers have found only some debris and life jackets labeled "Grand Zenith."

The Coast Guard received a distress call from the Poling at 10:37 a.m.

When the first cutter arrived, the helpless tanker was barely intact and 25-foot waves were lashing its sides. The vessel was en route from Boston, about 30 miles away, to Atlantic Terminals in Newington, N.H.

Forty-three years old and rebuilt in 1956, the Chester A. Poling was one of a fleet of 15 tankers that runs along the East Coast between Norfolk, Va., and the Canadian border.

Coast Guard Capt. Bernard Hoyland, who has directed the Grand Zenith search since it began a week ago, said the effort will be halted "if we get a decent search" and nothing is found. The tanker had been due to dock at Somerset, Mass., Jan. 2.

Prior to the wreck of the Poling, the latest tanker accident was the grounding of the 340-foot Panamanian registered Esso Casetellon at Corpus Christi, Tex. The vessel, carrying 21 million gallons of oil, was pulled free by tugboats Sunday after it broke its moorings and blocked the Corpus Christi ship channel for 10 hours. Almost no oil spilled.

The incidents involving foreign registry ships have led to a call for greater regulation of such ships while operating in U.S. waters under international safety regulations less stringent than U.S. standards.

Meanwhile, Transportation Secretary-designate Brock Adams said today that preventing oil spills in or near America's waters is "one of the most difficult problems we face."

Adams said he will meet with the commandant of the Coast Guard soon to discuss possible ways of averting future spills.

"We must move on it immediately," Adams said. "We must move much further in protection of America's shores from oil spills."

Adams said his Department of Transportation will hold hearings and may well recommend legislation to Congress.

[From the Christian Science Monitor, Dec. 24, 1976]

TANKER DISASTER HAS WASHINGTON CHURNING

(By Lynde McCormick)

In the wake of the nation's worst oil spill—off Nantucket, Massachusetts—these are among important new developments:

Environmental Protection Agency (EPA) Administrator Russell Train has called on the Secretary of the Interior to delay offshore lease sales for New England pending further investigation of oil spill hazards.

Rep. Gerry Studds (D) of Massachusetts plans a House subcommittee inquiry into navigational aids aborad ships, technology of

cleanup equipment, whether "suspect" ships such as the Argo Merchant should be allowed in U.S. ports, and Coast Guard response to the accident.

An aide to Representative Studds expects new momentum for a bill that would attach direct liability for cleanup costs and damages of such spills to the vessel's owners. The bill has languished in House committees for two years, the aide says, because of stiff opposition from oil companies and the Ford administration.

TOUGHER DRILLING RULES

Sources say the New England congressional delegation will petition the Interior Department for tougher regulations and restrictions in its leasing procedures for Georges Bank drilling tracts.

Capt. Frederick Schubert, chief of the Coast Guard's Marine and Environmental Protection Division, says that, while the agency plans a "long hard look at how we handled this situation once it's all over," he does not see how the procedure could have been much different.

"It all comes back to the weather. If we had had more men, more equipment, the result would have been the same. It is just impossible to do anything out there with waves and winds of that strength," he said.

In response to comments from some officials that the Coast Guard might have done more, if equipment had been on the scene sooner, Captain Schubert said "the cost of putting equipment and teams in every spot where there might be a spill would be prohibitive. We can only centralize our bases and move to specific locations as quickly as possible."

Many observers expressed admiration for members of the agency's Atlantic Strike Team and their nonstop efforts to free the ship from the Nantucket Shoals.

"Those are brave, brave men," said one Massachusetts environmental official. "I can't apply the word enough."

In addition to investigations of possible new regulations and procedures for tankering oil and cleaning up spills, the Argo Merchant accident has thrown more fuel on controversy over oil drilling off New England's coast.

Lease sales are schduled this spring for drilling tracts throughout Georges Bank—the prime fishing grounds now threateend by the oil spilled by the Argo Merchant.

Industry and public officials alike acknowledge that tankers at least as big as the Argo Merchant would be used in the Georges Bank operations, exposing the fishing grounds to continual oil pollution dangers.

SATELLITE NAVIGATION

Following unsubstantiated reports that the tanker was run aground deliberately, comes the comment of one of the men who developed a satellite navigation system for ocean-going vessels:

Dr. Richard V. Kershner, assistant director of John Hopkins University's Applied Physics Laboratory, says he is horrified that the system is not required aboard such tankers, according to the Associated Press. "The costs [of such a navigational system aboard a tanker] compared with the cost of a disaster are trivial."

[From the Journal of Commerce, Jan. 6, 1977]

KEY FACTOR IN TANKER DISASTER HAS EMERGED

(By Alan F. Schoedel)

An erroneous celestial "fix" of the tanker Argo Merchant's position emerged in testimony Wednesday as perhaps the key factor in the grounding of the ship on Nantucket shoal Dec. 15 and the subsequent spill of her cargo of 7.6 million gallons of oil into the Atlantic off the New England coast.

Captain George Papadopoulos, master of the Liberian-flag tanker, said it was agreed among the officers on the bridge that the ship, laden with Venezuelan oil being transported to Salem, Mass., was several miles behind what was her real position.

Under questioning by James M. Eastabrook, of the law firm of Haight, Gardner, Poor and Havens, Captain Papadopoulos acknowledged that even though the ship's fathometer registered a depth of only 15 to 20 fathoms beneath the keel, in an area which showed even shallower water ahead—as well as some deeper areas—he continued without slowing the vessel, in the belief that he shortly would obtain a "true fix" when a clearer horizon and more light would make this possible.

Questioned by Joseph C. Smith, attorney for Thebes Shipping Co., owners of the now sunk and shattered tanker, Captain Papadopoulos said he was "99 per cent sure" that he would have changed course or anchored, to wait until a true position could be determined, had he realized the error in calculating the position of the vessel.

Speaking through an interpreter, Captain Papadopoulos testified in U.S. District Court that "we couldn't take soundings constantly" and that "we had to rely on radar as well."

The tanker's master, interrogated by Douglas Jacobsen, attorney for the insurers of the cargo, said he relied about 10 times as much on the Decca radar as on the Raytheon radar on the bridge, because the Decca gave a clearer image. He acknowledged too that he could have used one radar for short-range and the other for long-range in the hours of trying to locate the Nantucket light-ship, target of their course from Cape Hatteras.

On Tuesday afternoon, Captain Papadopoulos was asked by Magistrate Sol Schreiber, who is conducting the taking of depositions in the federal court, that the reason the Argo Merchant did not head straight for Boston from the Mona Island passage from the Caribbean, was that she was loaded to summer lines on the Plimsoll marks. This meant that she could carry several thousand tons more oil by moving up the coastal route—some 300 miles west of her direct course—than if she had steamed directly from Mona Island to Boston across the open North Atlantic, lashed by winter storms, where winter load lines prevail.

MISCALCULATION LAID TO TANKER OFFICER

(By Arnold H. Lubasch)

A mathematical error resulted in a serious miscalculation about the position of the oil tanker Argo Merchant shortly before the ship ran aground, according to testimony yesterday by Capt. Georgios Papadopoulos, the ship's master.

The error was made by the chief mate, Georgios Ypsilantis, who calculated the Argo Merchant's position at 5:30 A.M. on Dec. 15, half an hour before the tanker went aground near Nantucket. Mr. Ypsilantis testified earlier that he had made an error in adding up some figures when he calculated the ship's position by the stars before dawn on Dec. 15.

30-MILE ERROR

The significance of the error was brought out in the questioning of Capt. Papadopoulos by Joseph C. Smith, a lawyer for the Thebes Shipping Company, the listed owner of the Liberian-flag tanker. Mr. Smith showed the captain a chart indicating that the error had made it appear that the tanker was more than 30 miles short of her actual position.

If he had known that the Argo Merchant had gone so far on the northeasterly course, the captain testified, he would have turned the tanker around or stopped completely, to wait until he could make a more accurate calculation of the position.

Mr. Smith's questioning of the captain appeared to be designed to indicate that understandable human error, rather than faulty equipment, had led to the grounding of the Argo Merchant. The testimony is being taken in Federal District Court in Manhattan for a hearing on the ship-owner's liability for damages.

Thebes, the owner, filed a petition to limit the liability to the present value of the wrecked tanker, which is worthless. Under a Federal law, the owner must show that the ship was seaworthy at the start of the final voyage, in order to limit liability to the vessel's value.

Douglas A. Jacobsen, a lawyer opposing the owner's petition, has been questioning the captain and the crew in an attempt to show that the Argo Merchant was not properly equipped and manned. Mr. Jacobsen represents the Continental Insurance Company, which seeks more than $2 million in damages for lost oil.

After going aground 27 miles southeast of Nantucket, the Argo Merchant broke apart in rough seas, spilling a cargo of 7.5 million gallons of heavy oil into the Atlantic. The oil cargo was insured by Continental, which must pay the oil's owner more than $2 million.

[From the Washington Post, Jan. 6, 1977]

TANKERS' TROUBLES SPREAD GLOBALLY; ONE MISSING 7 DAYS

The three-week saga of oil tanker mishaps stretched from the Atlantic to the Pacific to the Caribbean yesterday.

Coast Guard planes searched the North Atlantic for an aging Panamanian tanker missing for seven days with a cargo of 8.2 million gallons of thick industrial fuel oil aboard.

"At 8 o'clock tonight, it's going to be a 10 per cent chance that she's still afloat and a 90 per cent chance that we're looking for people in rafts and lifeboats," said Coast Guard Capt. Bernard Hoyland, chief of search and rescue operations in the Boston Area.

The lost tanker Grand Zenith carried a crew of 38 Nationalist Chinese.

In California, an oil spill stretched along six miles of San Francisco Bay after about 2,100 gallons of petroleum spilled during loading of the U.S-registered tanker Austin at Shell Oil facilities in Martinez.

The Greek oil tanker Lykomegis lay off the Caribbean entrance to the Panama Canal, barred from the waterway until certification that an oil leak has been repaired.

Near Philadelphia, barge crews, with a boost from high tide, helped pull the grounded Liberian tanker Universe Leader out of Delaware River mund without spilling any of the vessel's 21 million-gallon cargo after millions of gallons of oil had been pumped out of the vessel.

In Washington, Sen. Ernest F. Hollings (D-S.C.), citing oil spills by Liberian flag tankers, called yesterday for tougher safety standards for foreign merchant ships operating in U.S. waters.

Hollings also charged that the Coast Guard was not enforcing tanker safety standards authorized by the Ports and Waterways Safety Act of 1972.

Hollings, who heads the Senate National Ocean Policy Study, said Congress should mandate tougher standards "if the Coast Guard won't use the authority it already has."

The search area for the Grand Zenith, centered on major Atlantic shipping lanes into Boston and New York, was nearly the size of California.

The temperature of the ocean in the search area hovered around 40 degrees. An unprotected man immersed in the water would lose consciousness in less than 20 minutes and die within an hour, the Coast Guard said.

The tanker was en route from England

to Providence, R.I., with a delivery of industrial fuel oil to generate electricity.

As search operations continued, chances eased that sticky industrial oil from the Liberian tanker Argo Merchant, wrecked three weeks ago in the same area, would reach the shores of Nantucket.

Wind shifted to the north, a Coast Guard official said, buoying hopes that the sheen of oil 15 miles south of the island would move away from the exclusive summer resort. The bulk of the ship's 7.6-million-gallon cargo has moved out to sea in a 270 to 300-mile-long oil slick

The Delaware River grounding of the Liberian tanker Universe Leader, was the sixth Liberian flag tanker accident in or near U.S. waters since mid-December. The 824-foot ship went aground Tuesday night trying to avoid a collision with another vessel.

A leak that developed as the 616-foot Lykomegis approached Christobal on the Caribbean was reported under control. But Canal Zone officials said they still did not want to risk a mishap which could flood any part of the canal locks or Gatun Lake with petroleum.

The Lykomegis is carrying 26,000 tons of fuel oil from Amuay, Venezuela, bound for the port of Acajutla, on the Pacific coast of El Salvador.

A chronological listing of tanker mishaps since Dec. 15.

Dec. 15—The Liberian-registered tanker Argo Merchant ran aground 27 miles southeast of Nantucket Island and broke up six days later, spilling 7.6 million gallons of oil into the Atlantic.

Dec. 17—The 810-foot Liberian-registered tanker Sansinena exploded in Los Angeles Harbor, leaving nine dead, and 50 injured.

Dec. 24—The Liberian-registered Oswego Peace spilled 2,000 gallons of oil in the Thames River near Groton, Conn.

Dec. 27—The Liberian-registered Olympic Games ran aground in the Delaware River near Philadelphia, spilling 133,000 gallons of oil and fouling the shorelines of three states.

A Coast Guard inquiry was told yesterday that the Olympic Games may have run aground in a channel that had become too shallow for its 39 foot depth requirement. Soundings taken Nov. 30 by the Army Corps of Engineers found that part of the channel 34.2 feet deep.

Dec. 29—The Liberian-registered Daphne ran aground in Guauanilla Bay, Puerto Rico, but spilled no oil.

Dec. 30—The Panamanian-registered Grand Zenith, carrying a crew of 38 and 8.2 million gallons of oil, radioed it had encountered heavy weather 50 miles south of Cape Sable, Nova Scotia. It hasn't been heard from since.

Jan. 4—The Liberian-registered tanker Universe Leader ran aground in the Delaware River and was refloated Jan. 5 with no spill reported.

Jan. 5—The U.S. registered tanker Austin spilled 2,100 gallons of oil into San Francisco Bay while loading at Martinez, Calif. The Greek tanker Lykomegis was prevented from entering the Panama Canal until it could be ascertained that a leak was fixed.

[From the Washington Star, Jan. 5, 1977]

SIXTH TANKER MISHAP—NO SPILL SO FAR

In the sixth Liberian-flag tanker accident in or near U.S. waters since mid-December, the 824-foot ship Universe Leader ran aground in the Delaware River last night. No spillage of the tanker's 21 million gallon oil cargo was reported.

A barge pumped oil from the Universe Leader today in an effort to lighten the load and get the vessel afloat once again.

The accident occurred off Salem, N.J., about 20 miles down river from Marcus Hook, Pa., where another Liberian-registered tanker, the Olympic Games, ran aground Dec. 27 and spilled 133,500 gallons of oil.

A Coast Guard spokeswoman said the Universe Leader became stuck in mud about one mile southeast of the entrance to the Chesapeake-Delaware Canal, en route to a Gulf Oil Co. refinery near Chester, Pa.

She said the Universe Leader ran aground while avoiding a collision with another tanker, the Texaco California, which was heading down the river.

"The grounding resulted from a meeting situation in the channel," the spokeswoman said. The weather was clear at the time.

The ship was carrying 21 million gallons of crude oil from Nigeria, the Coast Guard said.

The accident was the sixth in three weeks involving tankers registered under a Liberian "flag of convenience." The first was on Dec. 15, when the Argo Merchant ran aground off Nantucket Island, Mass., leading to a 7.6 million gallon oil spill called the worst ever on the Atlantic coast.

The Sansinsena exploded two days later in Los Angeles harbor, killing nine men and injuring more than 50. The Oswego Peace spilled 2,000 gallons of oil in Connecticut's Thames River on Dec. 24. The Daphne ran aground in Guauanilla Bay, Puerto Rico, Dec. 29 but was refloated without a spill.

In a mystifying tanker episode, a Panamanian-registered ship, the Grand Zenith, carrying a Chinese crew of 38 and 8.2 million gallons of oil, has been missing for six days in the North Atlantic.

The Liberian-flag tanker accidents have sparked high-level governmental investigations into the overall question of their safety. Proceedings are also under way in the Argo Merchant and Olympic Games mishaps.

The captain of the Argo Merchant, George Papadopoulos, testified yesterday the helmsman who steered the tanker aground was not being supervised at the time.

In previous testimony, the Greek captain said helmsman Jose Rivera was being supervised by the ship's boatswain. Other Argo Merchant officers will testify later this week in the hearing in U.S. District Court in New York.

Vassilios Vlismas, captain of the Olympic Games, told a Coast Guard board of inquiry in Philadelphia yesterday that a faulty maneuvering valve malfunctioned while he was attempting to turn, causing the vessel to go dead in the water and drift aground.

Vlismas is free on $50,000 bail on charges of violating federal pollution statutes. The board planned to call two of the ship's engineers to testify today.

[From the New York Times, Jan. 4, 1977]

PILOT IN DELAWARE RIVER OIL SPILL SAYS HE COULD NOT PREVENT ACCIDENT BECAUSE OF POWER LOSS

(By Donald Jansen)

PHILADELPHIA, Jan. 3—The pilot on the Liberian-registered tanker Olympic Games when she went aground last week in the Delaware River, spilling 134,000 gallons of oil, testified today that he was unaware that a buoy he was using as a navigational aid had been moved 75 yards shoreward from its usual location.

Even so, said Curtis C. Chamberlain, the pilot, he could have done nothing different because the 780-foot tanker had lost all maneuvering power just before the grounding.

"Engine failure caused the whole thing," the slight, 61-year-old river pilot from Audobon, N.J., said on the opening day of testimony in the Coast Guard investigation into the cause of the accident.

The Olympic Games' captain, Vassilios H. Vlismas of Ithica Island, Greece, then took the stand in the courtroom of the United States Custom House here and corroborated the power failure.

Mr. Vlismas testified through an interpreter, but only after his attorney, Henry C. Lucas 3d, said that testifying posed "a dilemma" for him because anything he said could be used against him at a forthcoming hearing on Federal criminal charges of polluting the Delaware River and failure to notify the Coast Guard promptly of the spill.

The 40-year-old captain said that he had been master of the ship for only 10 days and had never been up the Delaware before. But Mr. Vlismas, who has been a ship's master since 1968, said that he did as he always did and relied entirely on pilots in inland waters.

Mr. Chamberlain said that the ship was operating well in all respects when he took command off Claymont, Del. But he said that when he ordered the ship's engine room to start backing down to aid in turning and docking at the British Petroleum Company pier at Marcus Hook, Pa., he got no response.

"I knew I had a dead ship on my hands," he said.

The tide and forward movement of the ship carried her past the dock. Then Mr. Chamberlain said, she veered five degrees toward the Pennsylvania side of the river and soon afterward the mate on the tug Tania Nine reported to him that there was oil in the water.

Mr. Chamberlain testified that the ship was still in the river channel. He said that he knew this because she was still on the channel side of Buoy M-9 upriver from Marcus Hook.

QUESTION OF BUOY'S LOCATION

Lieut. Comdr. Richard E. Peyser, the Coast Guard hearing officer, interrupted to ask the pilot if he was aware that the buoy was not in its usual location last Monday.

"No," Mr. Chamberlain said, "this is the first time I had heard that."

Commander Peyser read into the record a notice to mariners dated Dec. 15 stating that the buoy had been moved 75 yards toward the Pennsylvania shore from its normal place at the western edge of the river channel in order to facilitate dredging.

"If that is right," Mr. Chamberlain said under questioning by an attorney for Standard Oil of Ohio, "then I was outside the channel when we grounded."

Benjamin F. Stahl Jr., the attorney for Standard of Ohio, said in an interview that the company he represented had leased the Olympic Games from the owner, the Redbank Shipping Company of Panama, which he said was owned by the Aristotle Onassis shipping interests in Greece, either directly or through another corporation.

[From the New York Times, Dec. 23, 1976]

TANKER BOW SPLITS, SPILLING LAST OF OIL IN SEA OFF NANTUCKET

(By John Kifner)

BOSTON, Dec. 22—The bow of the broken Liberian-flag tanker Argo Merchant, grounded off Nantucket Island, split in half today and spilled the remainder of the vessel's 7.5 million gallons of thick, gummy oil into the sea.

The breakup thwarted the Coast Guard's plans to recover the approximately 1.5 million gallons of oil left on the ship.

The oil spill was thus left to the mercy of the high winds and rough seas. There was no way, experts in the field said, to recover the oil.

Fortuitous winds during the day continued to move the oil slick toward the east and south, away from the resort islands of Nantucket and Martha's Vineyard, the New England shores and beaches and away from most of the prime fishing grounds in the area of Georges Bank.

The slick was running in a cone-shaped pattern, extending for about 100 miles, with a width of about 35 miles at its biggest point

to the east by southeast of the stricken ship, the Coast Guard operations center at Otis Air Force Base on Cape Cod said tonight.

WINDS OF 29 MILES AN HOUR

The wind was holding from the west-northwest at 29 miles an hour, the National Weather Service reported, continuing to push the oil slick away from the areas of major concern.

The aging, 640-foot tanker, with a long record of maritime mishaps, ran aground on the Nantucket shoals last Wednesday morning, 27 miles southeast of Nantucket. As the oil seeped from its hull, a special Coast Guard task force struggled to pump out the heavy No. 6 oil, but was driven off by storms and heavy seas. Yesterday, the hull broke in half, spilling the bulk of the cargo.

The impact of the spill remained uncertain today as fisheries experts, marine researchers and state and Federal environmental protection officials gathered here to assess the magnitude of the disaster. In volume, it is believed to be the 10th biggest spill in history.

Robert White, the director of the National Oceanic and Atmospheric Administration, asked at a news conference this afternoon how bad the situation was, replied "I don't know."

Russell Train, the head of the Federal Environmental Administration, told the same conference at Boston's Logan Airport that "the potential is there for serious, adverse ecological effect."

Mr. Train said that a preliminary analysis indicated that a substantial amount of the oil was suspended just below the surface of the water.

At the National Marine Fisheries Services offices in Woods Hole, Mass., Julius Posegay said that the rough weather had hampered research efforts and that it was too early to tell what the effect of the spill would be. But, he cautioned, "there is a problem in separating what may be the short term effects from the long-term effects."

Research vessels from Woods Hole and from the University of Long Island sailed into the oil spill area today to collect samples of the oil and of marine life. In Boston, about 50 scientists from government agencies and universities gathered at the offices of the Environmental Protection Agency to begin efforts to assess the situation. Along the New England coast, volunteers and state workers set up watches along the beaches in case the oil begins to wash ashore.

The break-up of the bow of the Argo Merchant in the cold, pounding seas was discovered by the first Coast Guard flight over the area at mid-morning.

The bow had been afloat, the prow pointing upward at a sharp angle, twisted around so that it lay almost next to the awashed stern of the ship.

The bow had split just in front of the forward deck house, leaving the ship in three pieces, according to Petty Officer Richard Griggs, a Coast Guard spokesman. It appeared, he said, that virtually all of the oil had spilled out. The seas were too rough to maneuver the tug Sheila Moran, which alcng with the Coast Guard Cutter Vigilant, has been standing by the stricken vessel. The wind this morning was at 50 knots, with 15-foot seas and freezing spray.

Last night, Captain Lynn Hien, in charge of the Coast Guard salvage effort, laid plans to attempt to refloat the sections of the ship, which still had oil in the tanks, and tow them out to sea and sink them.

The No. 6 oil, used to fuel industrial power plants is diffcult to ignite, and because the patches are spread apart in rough seas, a fire would probably soon be extinguished. And, in one attempt to use such a technique off the coast of Spain in 1969, the burning oil caused a fire storm that sucked air into a vertical column, carrying unburned oil with it which fell, days later, as a greasy rain, ruining farmland.

The heavy seas and the far-ranging size of the spill also meant that attempts to pick up the oil slick with skimmers or to break it up with chemical dispersants could not be used, Mr. Keough said.

[From the Christian Science Monitor, Dec. 22, 1976]

NANTUCKET SPILL DEFIES PRESENT CLEANUP SKILLS

(By Lynde McCormick)

Despite technological advances and ecological restraints, massive oil spills off the U.S. coast can still spell disaster or major problems for the ecology and fishing industry.

In the wake of a tanker breakup off the shore of Nantucket Island, marine biologists and other experts admit that their knowledge of the impact of oil spills on marine life and their ability to contain oil at sea under strong wind and wave conditions continue to be limited.

The dumping of 7.6 million gallons of heavy industrial crude in the Atlantic after the Liberian oil tanker, Argo Merchant, ran aground and eventually split open is seen as one of New England's worst offshore disasters. It is being likened to the much-heralded blowout under a drilling rig in the Santa Barbara, California, channel in the Pacific in 1969 that blackened beaches, decimated wildlife, and spawned a strong citizens lobby against offshore exploration.

Marine biologists, however, differed in projecting the long-range effects of the spill on the underwater ecology. "There's really no way to estimate what's going to happen," said Richard Hennemuth of the National Marine Fisheries Service. "If the oil breaks up and spreads out, there may not be any detectable impact six months from now," he says.

On the other hand, "if the slick concentrates and settles in one area, which right now seems unlikely, the impact would be highly significant," he added.

Evelyn Murphy, state secretary of environmental affairs, said she was alarmed "at the inability of the Coast Guard to get out there quickly and handle the spill. It took several days to get just some of the equipment out to the tanker, and by then the ship had broken up."

Oil pollution control equipment does not work in high seas, leaving the Coast Guard "pretty much helpless to stop the mess," she said.

An oil skimmer is currently under construction in Massachusetts that could handle spills in rough seas, but experts say the current "state of the art really doesn't work with any seas over about four feet."

Dr. Henry Menard of the Scripps Institution of Oceanography in La Jolla, California, sounded a bright note, however. Dr. Menard was a member of the presidentially appointed commission that investigated the 1969 oil well blowout in Santa Barbara.

"There was a big mess and then it vanished," he told the Monitor. "A lot of seabirds died, but not enough to wipe out a species or keep one from replenishing. But right now there is virtually no trace of the spill."

Thick, caramel-like oil slicks up to 65 miles wide headed east at times for the lucrative Georges Bank fishing grounds and southwest at other times—out to sea or toward the shore, depending on shifting winds.

Of primary concern to Massachusetts officials was the oil's possible impact on Georges Bank and the coming fish spawning season. If the fish eggs and larvae of herring, cod, and haddock are wiped out, experts say, it would severely deplete economically vital fish stocks for years to come.

Hundreds of dead, oil-coated seabirds washed ashore on Nantucket Island Tuesday and Wednesday, and one fishing vessel had to throw overboard several tons of scallops from the seabed because they were coated with oil.

MAJOR SETBACK POSSIBLE

Scientists fear that the oil, three-quarters of which is expected to sink to the bottom of the sea, will coat and kill the bottom life, including lobster, clams, oysters, scallops, and the microscopic organic life that is a vital link in the ocean's food chain.

According to Dr. Howard Sanders of the Woods Hole Oceanographic Institution, fish larvae, which float to the surface, may also suffocate if caught in the oil slick.

The Massachusetts assistant secretary of environmental affairs, Russell Sylva, says the spill could set back commercial fishing on Georges Bank several years, noting that fish might, as a result, have far fewer offspring this season than normal—a situation that could not be remedied for several years.

TOXICITY NOT HIGHEST

Biologists at Woods Hole also noted that the No. 6 grade crude oil is not as toxic as more refined products, such as the No. 2 grade diesel oil that spilled off Massachusetts in 1969. That small spill, about 170,000 gallons, wiped out shellfish beds and other sea life, says Dr. Sanders, and many of the beds are still unproductive.

Meanwhile, Secretary Murphy and Massachusetts Gov. Michael S. Dukakis asked President Ford in a letter to declare Cape Cod a disaster area, making it eligible for emergency relief funds.

By Mr. KENNEDY (for himself and Mr. BROOKE):

S. 183. A bill to establish the Nantucket Sound Islands Trust in the Commonwealth of Massachusetts, to declare certain national policies essential to the preservation and conservation of the lands and waters in the trust area, and for other purposes; to the Committee on Interior and Insular Affairs.

NANTUCKET SOUND ISLANDS TRUST

Mr. KENNEDY. Mr. President, I am introducing today for myself and Senator BROOKE legislation to establish the Nantucket Sound Islands Trust. Companion legislation is being introduced in the House of Representatives by Congressman GERRY E. STUDDS.

A bill very similar to the one we introduce today was unanimously approved by the Senate on December 8, 1975, but was not acted on by the House during the last Congress. Amendments to the legislation have been included to clarify the role of local residents in the preservation and conservation of these remarkably beautiful islands.

Senate approval of the Nantucket Sound Islands Trust legislation in the last Congress was a significant landmark in congressional efforts to find appropriate ways to preserve those fragile areas along the east coast which have been partially developed over the last 200 years to provide homes and services in the most densely populated section of this country. Much of the development in these lovely areas has contributed to the charm and character familiar to many Americans as the "New England town." The families who settled Nantucket and Martha's Vineyard and the Elizabeth Islands have taken special care over the years to assure that the qualities which make these islands uncom-

monly attractive—the rare scenic beauty, the unique land and water resources, the special sense of community living in an island environment—would be protected against the selfish and shortsighted goals of developers who view these islands only as a source of profit.

In the last decade we have seen local and State laws and local citizen efforts to control and plan community growth outstripped and undercut by developers who leave in their wake rows of shoddily planned buildings and the broken dreams of local residents.

Since April 11, 1972 when the Nantucket Sound Islands Trust legislation was first introduced, we have worked with the residents of the Nantucket Sound Islands to refine the bill we introduce today to accomplish four important objectives:

First, the rights of local residents to plan community growth in an orderly manner are enhanced and protected by the establishment of local commissions which will draw up plans to meet long-range planning goals;

Second, the desires of those young residents who wish to build and maintain homes on the islands are protected because future development is planned, not prohibited;

Third, visitors to the Nantucket Sound Islands from all over this Nation will be assured that those qualities which are the source of their attraction will be preserved for generations to come;

And fourth, the islands and all they represent, the woods and moors and shores, the scenic, ecological, cultural, and historic resources of the islands will be protected against time and against the profit seekers.

The legislation we introduce today is the result of 5 years of work by the residents of Nantucket, Martha's Vineyard, and the Elizabeths. They have worked with local, State, and Federal government agencies in an effort to get effective assistance in protecting the islands.

Senator JACKSON has assured us that the Senate Interior Committee will consider the Nantucket Sound Islands Trust bill very early in this new Congress. And I am hopeful that the House of Representatives will act quickly as well.

I ask unanimous consent that the text of the bill be printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 183

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

FINDINGS AND STATEMENTS OF POLICY

SECTION 1. The Congress finds and declares—

(a) that the Nantucket Sound Islands in the Commonwealth of Massachusetts, known generally as the Islands of Nantucket, Tuckernuck, Muskeget, Martha's Vineyard, Noman's Land, and the group of islands known collectively as the Elizabeth Islands, possess unique natural, scenic, marine, ecological, scientific, cultural, historic, and other values and resources;

(b) that there is a national interest in preserving, conserving and enhancing these unique values and resources for the present and future well-being of the Nation and for present and future generations;

(c) that in some portions of the Nantucket Sound Islands these unique values and resources are being irretrievably damaged and lost through growth pressures leading to ill-planned development, and that such development thereatens heretofore successful local government and private voluntary preservation, conservation and planning efforts;

(d) that the growth pressures resulting in the rapid and ill-planned development in some portions of the islands are partially the result of the use of the islands by citizens of many States and regions of the United States;

(e) that the present State, regional and local powers and authorities for controlling land and water uses are inadequate to insure the prduent use of resources and the preservation, conservation and enhancement of the values and resources of the said islands, and it is in the national interest to establish a new system to assist the Commonwealth of Massachusetts, regional agencies, and local governments to preserve and manage the values and resources of the islands;

(f) that the key to more effective preservation and conservation of the unique values and resources of the Nantucket Sound Islands is a program encouraging coordinated action by the Federal and State Governments, acting in trust, to assist local governments (in partnership with private individuals, groups, organizations, and associations) to administer sound acquisition and management policies regulating and guiding development on the Nantucket Sound Islands;

(g) that such a new system for the protection and management of the values and resources of the islands requires the establishment by the Commonwealth of Massachusetts of local commissions as operational entities to give effect to the trust relationship;

(h) that such a program can protect and enhance the natural character and cultural and historic heritage of the Nantucket Sound Islands consistently with the maintenance of sound local economies, private property values, and efficient public services, thus preserving and conserving unique values and resources of the islands;

(i) that because expanded access to the said islands would seriously impair their unique values and resources and contravene the purposes of this Act, it shall be national policy that no bridge, causeway, tunnel, or other direct vehicular access be constructed from the mainland to the islands; and

(j) that any island not wishing to participate in the Nantucket Sound Islands Trust may indicate this by not forwarding to the Governor the land use control plan as outlined in Section 5.

NANTUCKET SOUND ISLANDS TRUST

SEC. 2. (a) In order to protect the national interests in the preservation and conservation of the unique natural, scenic, ecological, scientific, cultural, historic, and other values and resources of the Nantucket Sound Islands, there is established in the Commonwealth of Massachusetts the Nantucket Sound Islands Trust (hereinafter referred to as the "trust"), comprising the area described in section 3 herein.

(b) Pursuant to the said trust relationship, the Secretary of the Interior (the "Secretary") shall be responsible for the following:

(i) distribution of appropriations under this Act to said commissions for the development of land use control plans and for the costs of the implementation and enforcement of such plans by the commissions; and

(ii) approval of any land use control plans adopted by the respective commissions under this Act, and of any revisions to any such plans to the extent that any such revisions substantially affect the expenditure of funds granted pursuant to section 11 herein or the land classifications established pursuant to section 5 herein.

(c) Pursuant to the trust relationship, and in consideration of the funds received in relation thereto, the individual commissions shall be responsible for the following:

(i) the development and adoption of land use control plans as authorized and described in section 5 herein;

(ii) the administration and implementation of said plans; and

(iii) the monitoring of said administration and implementation.

(d) The administration of the trust relationship by the commissions shall at all times be consistent with the policies of this Act, to wit: to conserve and protect the unique values and resources of the trust area in a manner designed to encourage prudent stewardship of land and water resources while being responsive to the need to maintain sound local economies and efficient public services.

(e) The commissions may take such actions, adopt such procedures, and assume such powers as are reasonably necessary to carry out this Act including the following:

(i) be designated by any State or Federal agency to participate in or receive funds and technical assistance from any State or Federal programs, especially as those programs relate to environmental protection, conservation, land use planning, water and air quality control, economic development, transportation or the development of regionwide public services;

(ii) receive for the purposes of this Act any funds or moneys from any source, including grants, bequests, gifts, fees, or contributions made by any individuals, association, corporations, or by municipal, county, State, or Federal governments;

(iii) authorize debt by a majority vote of the commission in anticipation of revenue to an amount not in excess of that to be received during the current fiscal year from all Federal, State, county, and local sources;

(iv) transfer moneys from its accounts to the accounts of a municipal agency in reimbursement of such costs, where the imposition of a regulation promulgated by a commission imposes costs on a municipal agency;

(v) purchase or accept gifts of land or interests in land, or accept grants, bequests, gifts, or contributions for the purpose of acquiring land or interests in land;

(vi) sue and be sued; and

(vii) assume the duties, powers and responsibilities given it by action of State, local, or county government, provided that they are not inconsistent with the functions of the commissions under this Act.

(f) Pursuant to the said trust relationship, the Governor of the Commonwealth of Massachusetts shall be responsible for approval of the commissions and enforcement of the land use control plans of the commissions and of the policies and guidelines of this Act.

SEC. 3. (a) The area comprising the trust shall encompass the lands and waters in the counties of Dukes and Nantucket in the Commonwealth of Massachusetts.

(b) NOMAN'S LAND.—The lands and waters of Noman's Land Island are hereby declared part of the National Wildlife Refuge System and the Secretary is directed to prepare and execute forthwith the necessary documentation to give effect to such declaration. The Secretary and the Secretary of Defense shall, within twelve months after the date of enactment of this Act, survey Noman's Land Island and the surrounding waters for unexplored military ordnance and render such ordnance, wherever it may be found, harmless; and thereafter, Noman's Land Island shall be administered pursuant to the National Wildlife Refuge System Administration Act (16 U.S.C. 668dd).

NANTUCKET SOUND ISLAND TRUST COMMISSIONS

SEC. 4. (a) Within three months after the date of enactment of this Act, the Governor shall establish trust commissions which shall be known collectively as the Nantucket Sound Islands Trust Commissions (hereinafter the "commissions") and individually as the Nantucket Trust Commission, the Martha's Vineyard Trust Commission, and the Elizabeth Islands Trust Commission. After any commission has been established pursuant to this Act, it shall have the responsibilities specified in this Act for that portion of the trust area assigned to it.

(b) NANTUCKET TRUST COMMISSION.—The Nantucket Trust Commission shall have the responsibilities as established herein over the lands and waters in Nantucket County, and shall consist of eleven members approved by the Governor. The members shall serve three-year staggered terms which shall commence on the first Monday in April. Members shall be nominated and/or elected as follows:

(1) one member appointed by the Governor;

(2) two members nominated by the Board of Selectmen of the Town of Nantucket, who shall be members of the Board of Selectmen;

(3) two members nominated by the Board of Selectmen of the Town of Nantucket within two weeks after the annual town meetings, who shall be seasonal resident property owners;

(4) two members who shall be qualified voters of the town and who shall be elected at the annual election which is a part of the annual town meeting;

(5) four members, one each nominated by the Nantucket Planning Board, the Nantucket Conservation Commission, the Nantucket Historic Districts Commission, and the Nantucket Housing Authority, within two weeks after the annual town meeting, each of whom shall be a qualified voter of said town.

(c) MARTHA'S VINEYARD TRUST COMMISSION.—The Martha's Vineyard Trust Commission shall have the responsibilities as established herein over the lands and waters in Dukes County, excepting the Elizabeth Islands, and shall consist of twenty-one members approved by the Governor, twelve of whom shall be appointed and nine elected. The members shall serve two-year staggered terms which shall commence on January 1 of each year. Members shall be nominated and/or elected as follows:

(1) one member appointed by the Governor;

(2) one member nominated by the board of selectmen of each town on Martha's Vineyard; who may be a selectman, a member of a planning board, or of any other municipal agency, board, department, or office of that town;

(3) one member nominated by the Dukes County commissioners, who may be a Dukes County commissioner;

(4) nine members elected at large in an islandwide election, with not less than one member nor more than two members to be elected from any one town on Martha's Vineyard; elections held subsequent to the initial election of members shall be held concurrent with the biannual elections for State and county offices; and

(5) four members whose principal residence is not Martha's Vineyard but who are seasonal residents, who shall be appointed by the Governor: *Provided*, That such members shall have voice but no vote in deciding matters before the commission.

(d) ELIZABETH ISLANDS TRUST COMMISSION.—The Elizabeth Islands Trust Commission shall have the responsibilities as established herein over the lands and waters of the Elizabeth Islands, and shall be composed of six members appointed by the Governor. The members shall serve three-year staggered terms which shall commence on the first Monday in April. Members shall be nominated and/or elected as follows:

(1) one member appointed by the Governor;

(2) one member elected at the annual election which is a part of the annual town meeting;

(3) two members nominated by the board of selectmen to represent the Island of Cuttyhunk, one of whom shall be a permanent resident of Cuttyhunk and one of whom shall be a seasonal resident of Cuttyhunk; and

(4) two members nominated by the board of selectmen to represent the other islands in the Elizabeth Islands, one of whom shall be a permanent resident of one of such other islands, and one of whom shall be a seasonal resident of one of such other islands.

(e) Each commission shall elect from its members at lease the following officers: Chairman, vice chairman, and clerk-treasurer.

(f) Pursuant to subsection (a) of this section, the Governor may establish the Martha's Vineyard Commission, established by Chapter 637 of the Acts and Resolves of 1974 of the Massachusetts Legislature, as amended, as the Martha's Vineyard Trust Commission in lieu of the commission otherwise to be established pursuant to subsection (c) of this section.

PREPARATION OF LAND USE CONTROL PLANS

SEC. 5. (a) Each commission shall, within six months of its formation, develop a land use control plan to govern the preservation, conservation, and enhancement of the unique values of the trust area, the use and development of lands and waters within the trust area, and the provision of efficient public services, where appropriate, within the trust area. A land use control plan shall consist of three parts:

(i) part I: such maps, text and statements of general policies and specific implementation programs as each commission shall deem necessary to carry out the policies of this Act;

(ii) part II: the assignment of lands and waters within the trust area, except as may be excluded by specific provisions of this Act, to one of the classifications designated in subsection (b) of this section; and

(iii) part III: regulations which shall apply to the preservation, conservation, use and development of lands within each classification.

(b) Lands and waters within the trust area shall be assigned by each commission to one of the following classifications as part of the land use control plan:

(1) OPEN LANDS.—Lands and waters so classified shall remain forever free of improvements, as defined hereinafter, of any kind except as provided herein. If improvement exist on any lands so classified on the date of enactment of this Act, then there shall be permitted a right of use and occupancy to the legal or beneficial owner or owners thereof, or their successors or assigns, members of the same family or families as for so long as such successors or assigns are the legal or beneficial owner or owners. If, however, the legal or beneficial owner or owners seek to sell or otherwise convey the improvement with or without the land thereunder to others than legal or beneficial owners or members of the same family or families as the legal or beneficial owner or owners, then the commissions shall have an exclusive option to purchase said improvement with or without the land thereunder at full and fair market value, which shall be promptly determined, and such option shall exist for sixty days after such determination. If such option is exercised, then the land acquired shall be held by the commissions in trust for the Secretary, and administered pursuant to the land use control plan, and if such option is not exercised, then the sale or other conveyance may proceed in the ordinary course. For the purposes of this paragraph, family shall mean siblings of a legal or beneficial owner or owners, lineal descendants natural or adopted, or relatives by marriage. Any substantial change in access to and/or use of lands classified as Open Lands must be approved by the commissions if such change is substantially contrary to a respective land use control plan.

(2) RESOURCE MANAGEMENT LANDS.—Lands and waters so classified shall not be developed beyond their present intensity of use except as provided in this paragraph. Owners of such lands, or of improvements thereon, or of both, may transfer, sell, assign, or demise such land or improvements, or both. Reasonable replacement and extension of improvements shall be permitted, under the regulations approved and/or issued by the commissions. Development on lands so classified beyond their present intensity of use shall be permitted only under regulations approved and/or issued by the commissions, which shall be consistent with the following policies:

(i) the overall intensity must take into account the capability of the land for such development, which shall include consideration of existing land use, intensity and types of uses in the immediate vicinity, areawide water quality and quantity, soil conditions, roadway utilization, and visual and topographic conditions;

(ii) overall intensity regulations shall not create uniform lot sizes and shall be defined and applied with flexibility to encourage sound land use planning respecting the varying natural values of the different geographical areas of land; and

(iii) the area upon which intensity is calculated shall not include bodies of water or wetlands classified as such under Massachusetts Wetlands Protection Act (131 M.G.L.40).

Said regulations shall be adopted only after (i) public hearing or hearings and (ii) approval by the Secretary of the relevant portions of the land use control plan. The Secretary shall indicate his approval or suggested modifications to such regulations of each commission within 90 days of receipt. After the Secretary has given his final approval of the relevant portions of the land use control plan of the respective commissions, construction of improvements on the lands or in the waters classified as Resource Management Lands within the jurisdiction of each commission may thereafter be permitted only upon the granting of a permit therefor by each commission acting pursuant to its regulations: *Provided*, That such a permit may be granted only if all other necessary local and State approval have been received.

(3) CLASS C: TOWN ZONED LANDS.—Lands and waters so classified shall remain under the jurisdiction of the town in which located for purposes of planning and zoning ordinances and other land use regulations: *Provided*, That such planning and zoning ordinances and other land use regulations shall be reviewed and commented upon by the commissions as to consistency with the purposes of this Act prior to the adoption of such ordinances or regulations or amendments thereto: *And provided further*, That the commissions may review and comment upon the variances and special permits proposed to be granted pursuant to any local zoning ordinance.

(c) The land use control plan adopted by each commission shall be consistent with the policies, objectives, and guidelines contained in this Act, and shall include, but not be limited to, the following components which shall be contained in part I of the plan:

(1) a program for the preservation of significant, natural, scenic, ecological, scientific,

cultural, marine, or historical resources, including areas which, because of their local, regional, or other importance, should be preserved in their natural state (such lands may include, but need not be limited to, lands assigned by the commissions to the "Open Land" classification under this Act). This program may include regulation of uses of land and water pursuant to the constitutional authority of the State; other noncompensatory land use regulations which may be appropriate; compensatory land use regulations; tax incentives and payments in lieu of taxes; acquisition of the fee title or of lesser interests in lands and/or waters; or any combination of land use control methods which best meets the purposes and policies of this Act;

(2) a program for the development of public recreational facilities;

(3) a program and regulations for the preservation of beaches and for the development of public access to beaches and passages along them consistent with such preservation;

(4) a transportation program including regulations for and a review of all existing public and private access by air and water to lands within the trust area, and a review of public and private transportation systems for land transportation on each of the major islands. Said review shall be accompanied by recommendations for legislative and administrative action to harmonize such access, and the use of land and facilities incident thereto, with the conservation and preservation policies of this Act, and shall further include a system for regular reviews of such access and of their impact on development pressures on the trust area. This review shall also include recommendations for the development of trails, bicycle paths, observation points and exhibits deemed by each commission to be appropriate for the public enjoyment of and understanding of the values and resources of the trust area;

(5) a program for the identification and promotion of new employment opportunities for residents of the trust area which would be consistent with the policies of this Act, which shall include recommendations for action by the Commonwealth and the Secretary and other Federal agencies; and

(6) a program for the development of resident homesites for year-round residents of the islands in the trust area, said program to include recommendations for action by Federal agencies and for the expenditures of appropriations under this Act, upon approval of the Secretary, for the resident homesite plan. A resident homesite plan shall mean a plan established by the appropriate commission designating parcels of land which may be acquired by the commission at fair market value and resold at a lower price to year-round residents who meet criteria established by the commission.

(d) Improvements the construction of which shall begin between the date of enactment and the effective date of land use control plans or interim regulations issued by the commissions shall be exempt from involuntary acquisition if constructed pursuant to a certificate of need issued by the appropriate local governing body. Construction shall be deemed to have begun on the date of issuance of the last required permit under local regulations.

(e) Any acquisition by the commissions of a fee or less than fee interest, including the purchase of development rights, shall be for fair market value to conform with the requirements of the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 (42 U.S.C. 4601), which is hereby incorporated by reference.

(f) A land use control plan developed by a commission may utilize land use control regulations developed by regional or county authorities pursuant to applicable State laws; and the land use control methods made a part of the program authorized by section 5(c)(1) of this Act may be utilized to supplement or complement such regulations.

PRIVATE NONPROFIT ORGANIZATIONS

SEC. 6. (a) In order to encourage and provide an opportunity for the establishment of natural and scenic preserves by voluntary private action of owners of lands and waters in the trust area, and notwithstanding any provision in this Act or in any other provision of law, the authority established by this Act to acquire lands or interests therein for preservation and conservation purposes without the consent of the owner shall be suspended when—

(i) lands or waters or interests therein which are designated as being presently or from time to time needed to carry out the purposes of this Act are irrevocably in the ownership of private nonprofit conservation, preservation, historic, or other organizations or associations, and the restrictions against the development of such lands meet the standards of the land use control plan; or

(ii) lands or waters or interests therein which are designated as being presently or from time to time needed to carry out the purposes of this Act are to the satisfaction of the commissions, the Governor, and the Secretary and within twenty-four months after such designation, irrevocably committed to be sold, donated, demised, or otherwise transferred to such organizations or associations.

(b) The provisions of this section shall be applied only to those organizations and associations which are determined to be bona fide and general purpose.

(c) All of the provisions of this Act, except sections 1, 2, and 3, shall be suspended with respect to any lands, waters, or interests therein so long as such lands, waters, or interests therein are within twenty-four months of the enactment of this Act subject to a revocable or irrevocable conservation restriction created, approved, and recorded under sections 31 through 33 of chapter 184 of the General Laws of Massachusetts, which forbids, or in the judgment of the commissions, and the Secretary, as evidenced by their joint written approval of such restriction, substantially limits all or a majority of the land uses referred to in clauses (a) through (g) of the first paragraph of said section 31. With respect to any revocable restriction, notice of the intention to revoke must be given to the appropriate commission and the Secretary not less than twelve months prior to the proposed effective date of the revocation unless the lands, waters, or interests therein are in whole or in part made subject to a taking by eminent domain. The entity carrying out such eminent domain proceedings with respect to property covered by such a conservation restriction shall give notice of such proposed taking to the commission having jurisdiction over the property proposed for condemnation.

INDIAN COMMON LANDS

SEC. 7. (a) The Martha's Vineyard Commission is directed to establish as part of its land use control plan an orderly program for determining the precise extent of Indian Common Lands on Martha's Vineyard. The program shall include a survey or surveys and such other research or field work as may be necessary to establish the boundaries of the Common Lands belonging to the Wampanoag Tribe of Gay Head and known generally as the Cranberry Bogs, the Clay Cliffs, and Herring Creek. The commission is further directed to determine the location, boundaries, and owners of record title of the monuments and burial grounds of the Wampanoag Tribe of Gay Head on Martha's Vineyard. Funds to carry out the program may be drawn from those authorized to be appropriated by section 13.

(b) Upon completion of the program described in subsection (a) of this section, lands determined to be Indian Common Lands shall be acknowledged as an Indian reservation owned by the Wampanoag Tribe of Gay Head pursuant to recognized Indian title and entitled to the full protection of Federal laws pertaining to Indian lands.

(c) Nothing contained in this Act shall be construed to prejudice or limit any claims which the Wampanoag Tribe of Indians, or any member of that tribe may have for past violations of their rights as Indians, including but not limited to claims arising under the Indian Trade and Intercourse Act (25 U.S.C. 177).

COOPERATION OF OTHER AGENCIES

SEC. 8. The Governor and the heads of all State agencies, and the Secretary and the heads of other Federal agencies shall cooperate with the commissions in the formulation of their land use control plans upon the request of the respective commissions and to the extent of available funds.

COMMISSION EXPENSES AND PROCEEDINGS

SEC. 9. (a) Members of the commissions who are employees of a State or local government shall serve without additional compensation as such. All other members may, if a commission so votes, receive $50 per diem when actually engaged in the performance of the duties of the commissions.

(b) The Secretary shall reimburse all commission members for necessary travel and subsistence expenses incurred by them in the performance of the duties of the commissions.

(c) Financial and administrative services (including those relating to payment of compensation, budgeting, accounting, financial reporting, personnel, and procurement) shall be provided by the Secretary from the funds appropriated to carry out the provisions of this Act.

(d) The commissions shall have the power to appoint and fix the compensation of such additional personnel, including experts and professionals, and for such temporary and intermittent services as may be necessary to carry out their duties, without regard to the provisions of the civil service laws and the Classification Act of 1949, and they shall have the power to hold hearings and administer oaths.

(e) The commissions shall act by affirmative vote of a majority thereof. Vacancies shall be filled in the same manner as the original appointment.

SUBMISSION AND APPROVAL OF PLANS

SEC. 10. (a) Each commission within six months of being established, shall submit a land use control plan to the Governor who shall, within 120 days of the day it is received by him, either approve or disapprove it. The plan must be complete, or if divided into phases, must clearly state the reasons for the division into phases and the date or dates by which subsequent phases will be submitted. Approval or disapproval of phases or resubmissions shall be made within 120 days of receipt by the Governor.

(b) The Governor shall approve the plan if he finds that (1) the commission has afforded adequate opportunity in the area within its jurisdiction for public comment (including public hearings) on the plan, and such comment was received and considered in the plan or revision as presented to him, and the commission has established adequate local appeal procedures; (2) State and local units of government identified in the plan as responsible for implementing any portion of its provisions have the necessary legislative authority to do so, and the chief executive officers of local units of government have indicated their commitment to utilize such authority in implementation of the plan in accordance with the program established by the commission; (3) the plan will preserve

significant natural, cultural, marine, or historical values; (4) the plan is consistent with the preservation, conservation and enhancement policies of this Act and will fulfill the objectives of the land classifications and policies established in section 5 of this Act.

(c) If the Governor disapproves a plan, a phase of a plan, or any revisions thereto he shall advise the commission of the reasons therefor and convey his recommendations for revision. The plan, phase, or revision, following its disapproval, may be resubmitted to the Governor for his approval as soon as the commission is able to make revisions which are responsive to the Governor's recommendations.

(d) Upon approval of a plan, the Governor shall transmit such plan to the Secretary. Upon a finding that the plan is fully consistent with the Act, the Secretary shall publish a notice thereof in the Federal Register and shall transmit copies of the plan together with his comments to the President of the Senate and the Speaker of the House of Representatives.

(e) No substantial revision to an approved plan or land classification assignments, may be made without the approval of the Governor. The Governor shall either approve or disapprove such a proposed revision within ninety days from the date on which it is submitted to him. Whenever the Governor approves a revision, he shall transmit such revision to the Secretary. Upon a finding that the revised plan is fully consistent with the Act, the Secretary shall publish a notice thereof in the Federal Register.

TRUSTS GRANTS BY THE SECRETARY

SEC. 11. Upon approval of a plan, the Secretary shall make implementation grants in the total amount of $30,000,000 to the commissions. Prior to submission of a plan, the Secretary may, upon application therefor, make grants to the commissions for the development of a land use control plan; *Provided*, That such development grants shall not exceed $1,000,000 of the total $30,000,000. Such development or implementation grants shall be supplemental to any other Federal financial assistance for any purpose, and shall be subject to such reasonable terms and conditions as the Secretary deems necessary to effectuate the purposes of this Act. In making the grants, the Secretary shall take into consideration that there are three commissions with responsibilities pursuant to this Act, and shall insure that the grant funds are equitably distributed among the three commissions, taking into account such factors as population, acreage, land and water resources, existing and projected development, and the special tasks imposed by this Act relative to Indian Common Lands.

TRUST ACCOUNT

SEC. 12. There is hereby established a special account in the Treasury of the United States for the purpose of holding moneys to be used for trust grants, pursuant to section 11 of this Act, to the commissions. There shall be covered into such special account $30,000,000 from revenues due and payable to the United States under the Outer Continental Shelf Lands Act (67 Stat. 462) as amended and/or under the Act of June 4, 1920 (41 Stat. 813) as amended, which would otherwise be credited to miscellaneous receipts of the Treasury. Moneys covered into the account shall be used only for grants made pursuant to section 11 of this Act and shall be available for expenditure only when appropriated therefor.

APPROPRIATIONS

SEC. 13. There are authorized to be appropriated to defray the expenses of the commissions, established pursuant to section 3, including salaries and other expenses incident to the operation of the commissions, such sums annually as may be necessary; and for grants to the commissions to develop and implement land use control plans and regulations approved pursuant to this Act, $30,000,000 from the special account created in section 12 of this Act.

Mr. BROOKE. Mr. President, all across the Nation some of our most precious and beautiful land is being threatened by relentless development. And Massachusetts is no exception. Whether it be in the Berkshires, the Connecticut River Valley, or on Cape Cod, development is on the increase. But nowhere has this increase been quite as acute as on the lovely islands of Martha's Vineyard, Nantucket, and the Elizabeth Islands.

Created nearly 50,000 years ago in the wake of giant glaciers, the Nantucket Sound islands form veritable jewels off our southeastern coast. Like so many coastal islands, they are home to a relatively small permanent population only to have that population swell dramatically with the coming of summer. On Martha's Vineyard alone, the 6,000 yearround residents find their ranks inflated to nearly 50,000 at the peak of the summer months. Yet as happens in too many similar summer retreats, the sheer numbers of summer residents and visitors pose a grave threat to the very things they come to discover: the island's natural beauty, serenity, and fragile ecology.

To accommodate, as well as to encourage, the burgeoning summer visitors, the islands have been subjected to a tremendous development by developers who possess no sense of place, only, in too many cases, a sense of profit. Tract after tract of land has been devoured to accommodate more and more people.

Last year, the Senate wisely passed the Nantucket Sound Islands Trust legislation introduced by Senator KENNEDY and myself. This proposal, which was unfortunately never reported out of the House Interior Committee, represents a fundamental part of a coherent Federal, State, and local response to the readily identifiable threats posed by overdevelopment. The local citizenry has been untiring in its efforts to come to grips with this threat. So, too, has the Commonwealth of Massachusetts. Indeed the State passed a very important land use measure which opened the door for even more citizen participation in the future planning of Martha's Vineyard.

It is clear, to all of us, that the process of protecting and preserving these lovely islands is a task too large for even the combined resources of our State and local governments. A Federal presence is needed, for only through a true partnership of Federal, State, and local participation will islanders really possess the means to preserve and protect their islands.

Critics of the legislation have argued that the Federal bill is nothing more than a Federal land use plan. But the truth is that the bill does not establish any such land use planning. Rather, it maximizes local control of development decisions. The islands' communities have the right to propose as well as to oversee all the details of any and all preservation and protection plans. The role of the Federal Government is simply to certify that planning goals, and their implementation are being conducted in the national interest as spelled out in the legislation. All initiative and all responsibility for engaging the Federal, State, and local governments in carrying out the plans lie only with the island residents. In short, the Federal bill is nothing more than an effort to help the local citizenry help themselves.

This legislation is by no means perfect. But it is a creative attempt to fuse Federal, State, and local governments in a way that genuinely serves the public interest in these areas of such overwhelming scenic and ecological interest. Not only will it help islanders preserve and protect the Nantucket Sound Islands, but it will help citizens in other areas—not just in Massachusetts but throughout the Nation, to develop effective limits to the burgeoning growth that threatens both the natural beauty and fragile ecology of so many of our scenic natural areas.

I share Senator KENNEDY's pleasure that the distinguished chairman of the Interior Committee has assured us of prompt consideration of this measure so that our colleagues in the House may take it up promptly and give to the Nation the legacy of these lovely islands in their full beauty.

By Mr. KENNEDY (for himself and Mr. BROOKE):

S. 184. A bill to authorize the acquisition and maintenance of the Goddard rocket launching site in accordance with the act of August 25, 1916, as amended, and supplemented, and for other purposes; to the Committee on Interior and Insular Affairs.

GODDARD ROCKET LAUNCHING SITE

Mr. KENNEDY. Mr. President, I introduce for myself and Senator BROOKE to authorize the acquisition of the Goddard rocket launching site in Auburn, Mass., by the National Park Service. I ask unanimous consent that the bill be printed in the RECORD at the conclusion of my remarks.

There being no objection, it was so ordered.

Mr. KENNEDY. It was in Worcester, Mass., where Robert Goddard was born, that he first envisioned the possibility of navigation in space at the age of 16. Robert Goddard fired a powder rocket in the basement of the physics building at Worcester Polytechnic Institute in 1907 after which he was asked not to fire rockets in the campus buildings. Despite this very temporary setback and a long and serious illness, Goddard continued his study and research and teaching at Clark University. On March 16, 1926, Dr. Goddard fired the first liquid fuel rocket in Auburn, Mass. This rocket which flew 184 feet in 2.5 seconds changed the course of history for this Nation and for all the world.

With this legislation, we have the opportunity to commemorate our achievements as a nation and pay tribute to an outstanding man. As children of the space age, we celebrate the development of our space program, our landing on the Moon, our exploration beyond the boundaries of the Earth and beyond the dreams of our founders. We would have no space age, no Moon landing, and

no vision of the universe beyond our planet if it were not for Dr. Robert Goddard, and it is most fitting that we celebrate his achievements by establishing the Goddard Rocket Launch Historic Site in Auburn.

We know, through Mrs. Goddard, his widow, and those who were privileged to be his friends and coworkers that Dr. Goddard's vision and creative ability were equaled by his determination and persistence and methodical, scientific dedication. During his life he sought neither publicity nor monetary rewards. He did not falter when he was publicly ridiculed in 1920 for suggesting the possibility of reaching the Moon; and he did not give up during 2 years of recovery from tuberculosis. Dr. Robert Goddard reminds us of our potential and represents the best qualities of the American character.

I am hopeful that despite the recent recommendation of the Department of Interior against the establishment of this historic site that the Senate Interior Committee will act quickly and favorably on this legislation.

S. 184

A bill to authorize the acquisition and maintenance of the Goddard Rocket Launching Site in accordance with the Act of August 25, 1916, as amended and supplemented, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That in order to preserve for the inspiration of present and future generations the site in the town of Auburn, Massachusetts, on which Doctor Robert H. Goddard launched the first liquid-propelled rocket on March 16, 1926, the Secretary of the Interior is authorized to acquire and maintain such site in accordance with the provisions of the Act entitled "An Act to establish a National Park Service, and for other purposes," approved August 25, 1916 (39 Stat. 535; 16 U.S.C. 1–4), as amended and supplemented.

SEC. 2. There are hereby appropriated such sums as are necessary to carry out the purposes of this Act.

Mr. BROOKE. Mr. President, someday Auburn, Mass., will take her place among our other historic sites like Plymouth, Concord, and Lexington as a place where events occurred which were to alter the course of human civilization. And July 17, 1929, in Auburn, Mass., will be remembered just as December 17, 1903, in Kity Hawk, N.C., is recalled as a moment of technological breakthrough.

Robert Goddard's first liquid fuel rocket flight that day lasted less than 3 seconds, but it set into motion a chain of scientific discoveries which irrevocably altered the destiny of the planet and the human species. Of course, the world was slow to understand and acknowledge Goddard's achievement.

When the wire services picked up the story of the launching, they reported tongue-in-cheek that Goddard's "rocket to the Moon" had exploded some 230,000 miles short of its target. The outraged fire marshal of Massachusetts forbade Goddard to fire his rockets within the borders of our State again. But completely overlooked in all this uproar was the fact that the rocket had carried an instrument package that contained an aneroid barometer, thermometer, and a camera that was triggered to operate when the parachute opened. That package and its data were recovered completely intact, and the experiment was a success.

As we all know now, Goddard struggled for years with little support and less public understanding. Only the valiant efforts of Guggenheim Foundation, Clark University, and Charles Lindbergh kept his work alive during the difficult prewar years. Goddard's patriotic efforts to keep his discoveries from the growing German war machine further limited his personal prominence and the dissemination of his findings.

Mr. President, Robert Goddard never lived to see his dream of space travel taken seriously by the world. Indeed, were it not for the dedicated and sophisticated work of his widow, Esther Goddard, all of us here might still believe his dreams were fantasies. But her efforts gave the physicists and engineers who followed Goddard the tools to put Americans on the Moon.

In the last 15 years, our Nation has begun to recognize Robert Goddard as the giant in our Nation's history, which, in fact, he was. But in Auburn, Mass., at the site where that first crucial test flight was launched, there is only a marker placed there privately by the American Rocket Society. This legislation filed by Senator KENNEDY and myself would make this spot a national historic site, as it should be. This designation would be a fitting capstone to the series of tributes offered this pioneer by a grateful nation.

By Mr. CHURCH (for himself and Mr. WILLIAMS):

S. 185. A bill to amend the Social Security Act to roll back the deductible and coinsurance charges under part A of medicare to the 1976 levels, and for other purposes; to the Committee on Finance.

ROLL BACK MEDICARE PART A HOSPITAL DEDUCTIBLE AND COINSURANCE CHARGES TO 1976 LEVELS

Mr. CHURCH. Mr. President, on behalf of myself and Senator WILLIAMS, I introduce for appropriate reference a bill to roll back the medicare hospital insurance deductible and coinsurance charges to the 1976 levels for aged and disabled Americans. Representative CLAUDE PEPPER, the chairman of the House Select Committee on Aging, is introducing a companion bill today.

On September 30, 1976, the Department of Health, Education, and Welfare announced a 10-percent hike in the medicare part A deductible, from $104 to $124. This increase became effective in January of this year.

In addition, other related hospital and skilled nursing coinsurance charges also rose by 19 percent.

For example, the daily charge for qualifying skilled nursing care increased from $13 to $15.50 for patients who are in long term care facilities from 21 to 100 days.

Patients now pay $31 a day if they are hospitalized from 61 to 90 days or $5 more than in 1976. Medicare beneficiaries who must draw upon their 60-day lifetime reserve pay a daily coinsurance charge of $62, compared with $52 in 1976.

Unfortunately, it was not possible to enact legislation in 1976 to block these 19-percent increases because HEW's announcement came shortly before the Congress adjourned.

This is the reason that we are introducing legislation now to roll back the medicare hospitalization deductible from $124 to $104. The effective date would be retroactive to January 1, 1977.

A similar percentage reduction would also be applicable for other hospital and skilled nursing charges under part A.

It is high time that we put a lid on the rising hospitalization deductible, which oftentimes hits those the hardest who can least afford this cost.

The 19-percent hike in hospital and nursing home charges comes hard on the heels of the $6 annual increase in the supplemental medical insurance premium for medicare beneficiaries.

For most social security beneficiaries the $124 initial payment for hospitalization is a major expenditure. Average benefits for retired workers, for example, now amount to $218 a month.

Social security is the economic mainstay for the vast majority of older Americans. It represents over one-half the income for 7 out of 10 individual beneficiaries and 1 out of 2 couple beneficiaries.

Older Americans constitute 10 percent of our total population, but account for 29 percent of personal health care expenditures in the United States.

In fiscal year 1976 per capita health care costs for older Americans amounted to $1,360, or nearly 3 times as great for persons aged 19 to 64 and more than 6 times the level of those under 19.

The harsh reality is that the elderly's out-of-pocket payments for medical care are 2.6 times as great as when medicare became operational. In fiscal 1975 their per capita direct payments totaled $476, compared with $182 in fiscal 1966.

Nearly 6 million aged and disabled medicare beneficiares are expected to receive reimbursable services under the hospital insurace program in 1977. These individuals deserve and need all the help they can receive.

A rollback in their deductible and coinsurance payments would provide welcome relief at a time when their purchasing power is being eroded by rising prices.

Mr. President, I ask unanimous consent that the text of this bill be printed at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 185

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) (1) section 1813(b)(1) of the Social Security Act is amended by—

(A) striking "$40" and substituting "$104"; and

(B) striking "1969" and substituting "1978".

(2) Subsection (b)(2) of such section is amended by—

(A) striking "1968" and substituting "1977";

(B) striking "$40" and substituting "$104"; and

(C) striking "1966" and substituting "1975".

(b) The amendments made by subsection (a) shall be effective with respect to any spell of illness beginning after December 31, 1976.

SEC. 2. (a) Section 1401(b) of the Internal Revenue Code of 1954 (relating to rate of hospital insurance on self-employment income) is amended—

(1) in clause (3), by striking "1978" and substituting "1977";

(2) in clause (4)—

(A) by striking "1977" and substituting "1976", and

(B) by striking "1981" and substituting "1980";

(3) in clause (5)—

(A) by striking "1980" and substituting "1979", and

(B) by striking "1986" and substituting "1984"; and

(4) in clause (6), by striking "1985" and substituting "1984".

(b) Section 3101(b) of such Code (relating to rate of hospital insurance tax on employees) is amended—

(1) in clause (4) by striking "1980" and substituting "1979";

(2) in clause (5)—

(A) by striking "1981" and substituting "1980", and

(B) by striking "1985" and substituting "1983",

(3) in clause (6), by striking "1985" and substituting "1984".

(c) Section 3111(b) of such Code (relating to rate of hospital insurance tax on employers) is amended—

(1) in clause (4), by striking "1980" and substituting "1979",

(2) in clause (5)—

(A) by striking "1981" and substituting "1980", and

(B) by striking "1985" and substituting "1983",

(3) in clause (6) by striking "1985" and substituting "1984".

Mr. WILLIAMS. Mr. President, I wish to join my colleague from Idaho (Mr. CHURCH) in proposing a bill to roll back the medicare hospitalization insurance deductible and coinsurance charges to the 1976 levels. In the past, I have sponsored legislation to freeze rising medical costs. Therefore, I give my strongest support for this legislation to reverse administration attempts to make medicare and copayment charges even more expensive to elderly participants than they now are.

As a member of the Senate Committee on Aging, I have held many field hearings in New Jersey on the needs of our senior citizens. Perhaps the most heartwrenching testimony relates to the increasing costs of medical care. Time and time again, the elderly expressed their inability to meet the costs of rising medical bills.

On September 30, 1976, the administration stated that the medicare part A hospitalization deductible would increase by 19 percent, from $104 to $124, on January 1, 1977. Under the administration's plan, the out-of-pocket expenses for medicare patients for hospital care have soared. Although this increase is mandatory under existing law, I feel it would be unacceptable to allow such increases in health care while the elderly struggle to adjust to steadily rising prices in budget areas of special importance to older Americans—food, shelter, and energy.

Despite its valuable protection, medicare still covers only 40 percent of the elderly's medical costs. It is, indeed, a bitter bullet to bite to shrink medicare coverage even further. Increasing the deductible from $104 to $125 would result in increased coinsurance charges for nursing home care and lengthy hospitalization. To older persons trying to live at today's prices, such increases would result in a reluctance to seek proper medical care.

Increases in coinsurance charges will create additional hardships on the elderly's budget. Aged persons would see their coinsurance charge raised from $26 to $31 for hospitalized care for periods of 61 to 90 days. For extended nursing home care after release from the hospital, the beneficiary will be charged $15.50 compared with the present $13 for the 21st through 100th day. Medicare also provides a lifetime reserve of 60 extra days that a beneficiary can use when he needs more than 90 days to recover from an illness. These beneficiaries drawing upon their 60-day lifetime reserve would have their copayment charge raised from $52 to $62 per day. These increases, accompanied by present inadequate compensation for losses in real income, will severely limit availability of health care services to the aged.

This legislation will offer an immediate solution to proposed increases in the medicare part A deductible. It simply rolls back the deductible at the 1976 rate of $104 and heads off the increases in coinsurance payments which follow.

Mr. President, senior citizens are least able to do anything to help themselves due to their limited incomes. We cannot ask them to absorb additional increases in health care. Therefore, I urge quick adoption of this measure to forestall further hardships on the elderly.

By Mr. CHURCH (for himself, Mr. JACKSON, and Mr. HATFIELD):

S. 186. A bill to amend the Water Resources Planning Act, the Water Resources Research Act of 1964, and for other purposes; to the Committee on Interior and Insular Affairs.

WATER RESOURCES PLANNING AND RESEARCH ASSISTANCE ACT AMENDMENTS OF 1977

Mr. CHURCH. Mr. President, the Senator from Washington (Mr. JACKSON) and the Senator from Oregon (Mr. HATFIELD) join with me in introducing legislation to amend the Water Resources Planning Act of 1965 and the Water Resources Research Act of 1964. The proposal which we submit today is almost identical to legislation which we introduced during the last Congress (S. 3142, 94th Congress).

The subject matter of this bill is the product of several public hearings conducted by the Subcommittee on Energy Research and Water Resources, which I chair. In addition, the revisions called for by this measure, have been the focal point of considerable discussion by many parties interested in our Nation's water resources. Because much of the preliminary examination has already been accomplished, I am hopeful that the Senate might receive any suggested changes at an early date and that the new administration will see fit to support this measure so that we can enact these amendments during this session of the new Congress.

At the outset, I want to emphasize that this proposal does not preempt the decision of President-elect Carter to reorganize the executive branch of Government. Where any provisions of this act become inconsistent with any final reorganization plans of the new administration, particularly with respect to the membership on the Water Resources Council, every effort will be made to quickly conform these amendments to any newly created structures within the executive branch. These amendments constitute a modest attempt to make an interdepartmental coordinating body more efficient and effective. It also recognizes, I believe, that certain changes and demands over the past decade have been made upon institutions which address questions dealing with water resources planning and research, and that the organic legislation which governs these activities should be revised to reflect these changed circumstances. Finally, water resources research and planning cuts across the activities of a great many departments and agencies, including the Departments of Interior, Transportation, HUD, and the Environmental Protection Agency. Congress sought to establish the coordination of water resources activities at the national level through passage of the Water Resources Planning Act. That same objective of a comprehensive, coordinated water resources program is no less important today than it was more than one decade ago when the Planning Act was first signed into law.

During fiscal year 1976, Federal departments and agencies obligated more than $10 billion in projects relating to water. Seven different Federal departments, seven different agencies, and 18 different offices within those departments and agencies administer programs in water and related land resources. By anyone's standards, this is an immense Federal presence and one which dictates that there be complete coordination in the planning of all water-related projects and in the setting of all Federal policies related to the Nation's water courses.

In recognition also that water resources activities and decisions must be grounded in factual information, the Congress enacted the Water Resources Research Act of 1964. This act contemplated the creation of water resources research institutes and provided additional grant programs by which public and private entities could conduct research and development work related to water and related natural resources. Both the Water Resources Planning Act and the Water Resources Research Act have assisted States in developing planning and research capabilities so that they are better able to participate with the Federal Government as an equal partner in the determination of uses for waters which flow within and past their boundaries.

In light of the all-pervasive nature of

Federal water programs and the needs of States to competently address issues which affect their water, it is very important that both the Water Resources Planning Act and the Water Resources Research Act are achieving the goals envisioned by the Congress when first enacted.

After more than a decade since passage of these important acts, it is now time to take a second look at the strengths and weaknesses and to make those changes in the laws which will rectify failings and shortcomings that have been identified. This legislation attempts to address these problem areas.

This bill incorporates most of the major suggestions made in previous hearings, including those made by various States, river basin commissions, the Western States Water Council, the Interstate Conference on Water Problems, and others.

The most significant changes made by this bill to the Water Resources Planning Act and the Water Resources Research Act are the following:

First: The Water Resources Council is established in the Executive Office of the President and its Chairman is appointed by the President with the advice and consent of the Senate.

Second: The duties of the Council are significantly expanded and made more explicit. In addition to other duties so specified, the Water Resources Council will advise the President on national matters related to water resources and planning and on the budgets of all Federal water-related agencies; the Council will also coordinate the planning activities of the Council with other water resources planning bodies and will attempt to assist States by making it possible to consolidate grant applications.

Third: A non-Federal advisory committee is established to provide greater voice for the States and others interested in Council deliberations and decisions.

Fourth: An annual report is required of the Council, with provision for inclusion of separate comments by the non-Federal Advisory Council, to provide more current publication of data, identification of issues and evaluation of policy.

Fifth: An Office of Water Research is established within the Water Resources Council to be directed by a deputy director who is appointed by the President. This amendment would transfer the State Water Research Institute program from the Department of Interior to a new Water Resources Council.

Sixth: A strengthened role in the coordination of planning done by various Federal water-related agencies is provided for the river basin commissions.

Seventh: Centralized funding to the river basin commissions is established for level B and other planning processes conducted under the auspices of the river basin commissions.

Eighth: Increased funding under the grants to States programs is provided for on a uniform, continuing basis; specifically, the bill provides $200,000 per State so long as the States will match every $2 of Federal funds for $1 of State funds.

Ninth: Accountability requirements placed on the States are strengthened through the provision that the States undertake the development of comprehensive State water plans.

These proposed changes, some of which are far reaching, would, I believe, strengthen State and Federal water programs by assuring that there will be no duplication of effort, that all water planning efforts, especially those relating to water quantity and water quality, will be coordinated, and that the taxpayer will get the greatest benefit from each dollar spent.

The need for water resources planning and research is made more imperative by the energy crisis and the worldwide food shortage. The world energy crisis heightened the need to develop our domestic fossil fuel resources, especially coal. Energy planners, in focusing attention upon our fossil fuel resources, have realized that, unless proper planning takes place, utilization of these energy sources will introduce new complexities into the already critical water needs of much of the country, especially the arid West. State and local governments will have to anticipate the consequences of energy development and the impact it will have upon traditional water uses.

Just as serious is the need to increase food production. Famine haunts many people throughout the world, and the American farmer, by far the most productive of any of his world counterparts, will be called upon to fill the breadbaskets of these near-starving nations. Water is the key to productive crops and success in agriculture. Only with proper planning will we insure that agriculture is not thirsting for water.

The energy shortfall, the worldwide food shortage, and the water needs of the Nation are tied together. The key to successful resolution of these needs is proper planning. This measure, if enacted, would go far toward assuring that the tools are available to make informed decisions.

I am hopeful that the Senate can begin early consideration of this measure. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 186

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Water Resources Planning and Research Assistance Amendments Act of 1977".

SEC. 2. Section 2 of the Water Resources Planning Act (42 U.S.C. 1962) is hereby amended to read as follows:

"SEC. 2. In order to meet the Nation's water quantity and quality requirements, it is hereby declared to be the policy of the Congress to encourage the conservation, development, and utilization of water and related land resources of the United States on a comprehensive and coordinated basis by the Federal Government, States, localities, and private enterprise with the cooperation of all affected Federal agencies, States, local governments, individuals, corporations, business enterprises, and other concerned entities.".

SEC. 3. Subsection 3(b) of the Water Resources Planning Act (42 U.S.C. 1962–1(b)) is amended by inserting immediately after "preparation" a comma and the following: "coordination,".

TITLE I—AMENDMENTS TO TITLE I OF THE WATER RESOURCES PLANNING ACT—THE WATER RESOURCES COUNCIL

SEC. 101. Section 101 of the Water Resources Planning Act (42 U.S.C. 1962a) is amended to read as follows:

"SEC. 101. (a) There is created in the Executive Office of the President a Water Resources Council (hereinafter referred to as the 'Council').

"(b)(1) The Council shall be composed of—

"(A) a chairman appointed by the President, by and with the advice and consent of the Senate, who shall also serve as Director of the Council and who shall not, during the period of his service on the Council, hold any other position as an officer or employee of the United States, except as a retired officer on retired civilian employee of the Federal Government;

"(B) one member from each of the following departments, who shall, at the time of his appointment, hold the position of Assistant Secretary of such department and whose duties, as such, encompass water and related matters, such member to be appointed by the head of such department and to serve as the representative of such department:

"(i) Department of the Interior;

"(ii) Department of Agriculture;

"(iii) Department of the Army;

"(iv) Department of Commerce;

"(v) Department of Housing and Urban Development; and

"(vi) Department of Transportation;

"(C) an Assistant Administrator of the Environmental Protection Agency designated by the Administrator;

"(D) a member of the Federal Power Commission designated by the Chairman; and

"(E) those members (if any) appointed pursuant to the provisions of paragraph (2) of this subsection.

"(2) Whenever the President determines that any program or other action under consideration by the Council directly affects—

"(A) any department of the United States, he shall designate such department as being one which is entitled to representation on the Council during the period (as determined by the President) for which such program is in effect or such program or action is under consideration, and the head of such department shall, at the earliest practicable date after such department is so designated, appoint an Assistant Secretary thereof whose duties involve water-related matters as a member of the Council to represent such department thereon, or

"(B) any agency of the United States, he shall designate such agency as being one which is entitled to representation on the Council during the period (as determined by the President) for which such program is in effect or such action is under consideration and the head of such agency shall, at the earliest practicable date after such agency is so designated, appoint an assistant administrator or assistant director thereof whose duties involve water related matters as a member of the Council to represent such agency thereon.

"(3) Any person appointed by the President as Chairman of the Council shall be a person who, as a result of his training, experience, and attainments, is exceptionally well qualified to analyze and interpret trends and information in water and related land resources; to appraise programs and activities of the Federal Government in light of the policy set forth in this Act; and to formulate and recommend national policies to

promote the orderly conservation and utilization of water and related land resources.".

SEC. 102. (a) Section 102(a) of the Water Resources Planning Act (42 U.S.C. 1962a–1 (a)) is amended by striking out "and" after "therein;".

(b) Section 102(b) of such Act is amended by striking out the period at the end thereof and inserting in lieu thereof a semicolon.

(c) Section 102 of such Act is further amended by adding at the end thereof the following new subsections:

"(c) assist and advise the President in the preparation of the water resources report required by section 106 of this Act;

"(d) periodically review the principles, standards, and procedures required by section 103 of this Act;

"(e) transmit to the President for his review and transmittal to the Congress such reports on long-range schedules of priorities as are submitted by each river basin commission consistent with the provisions of section 201(b)(3) of this Act;

"(f) review and appraise the various water and related land resources programs and activities of the Federal Government in the light of the policy set forth in this Act for the purpose of determining the extent to which such programs and activities are contributing to the achievement of such policy, and to make recommendations to the President wtih respect thereto;

"(g) advise the President on matters of national concern related to water resources research and planning and the development and management of the Nation's water and related land resources;

"(h) promote the advancement of scientific knowledge relating to water and insure the transfer of technology to potential users as required by section 201 of the Water Resources Research Act of 1964, as amended;

"(i) advise the President on water resources planning, research and development considerations with regard to Federal budgets and provide the President with an annual review and analysis of funding proposed for water resources planning, research and development in the budgets of all Federal agencies;

"(j) encourage, insofar as it is practicable, the establishment of river basin commissions as provided in section 201 of this Act, and where such commission does not exist to encourage in consultation with the Governors of affected States the establishment of a means for effective Federal-State cooperation in major water resources regions of the United States;

"(k) coordinate planning processes and activities of the Council with other interested Federal and State agencies, river basin commissions, as established by section 201 of this Act, interstate compact commissions, interagency basin committees, and the Tennessee Valley Authority;

"(l) assist State and local governments submitting applications for Federal assistance for water resources planning to the extent possible to consolidate applications for funds from various appropriate Federal agencies and to submit such consolidated applications to the Council for the coordination of review and approval by responsible Federal agencies: *Provided*, That in those regions where river basin commissions exist, as established by section 201 of this Act, such coordination shall be done in collaboration with the affected river basin commission; and

"(m) meet in open public session no less than four times annually.".

ANNUAL REPORT

SEC. 103. Title I of the Water Resources Planning Act (42 U.S.C. 1962) is amended by adding at the end thereof the following new section:

"ANNUAL REPORT

"SEC. 106. The President shall transmit to the Congress annually, beginning one year after the date of enactment of the Water Resources Planning and Research Assistance Amendments Act of 1976, a Water Resources Report (hereinafter referred to as the 'report') which shall set forth the following:

"(1) ar evaluation of existing and potential problems concerning water resources planning, research, development, and management deserving of national attention;

"(2) evaluation of the scale, quality, and effectiveness of Federal and State efforts in water resources planning and research;

"(3) a review of the programs and activities (including regulatory activities) of the Federal Government, the State and local governments, and nongovernmental entities or individuals, with particular reference to their effect on water resources quantity and water quality and the conservation, development, and utilization of water and related land resources;

"(4) such additional views and comments as may be submitted by the non-Federal advisory board established by section 107 of this Act; and

"(5) a program for remedying the deficiencies of existing programs and activities, together with recommendations for legislation.".

NON-FEDERAL ADVISORY COMMITTEE

SEC. 104. Title I of the Water Resources Planning Act (42 U.S.C. 1962) is further amended by adding at the end thereof the following new section:

"NON-FEDERAL ADVISORY COMMITTEE

"SEC. 107. (a) The non-Federal vice chairman of each river basin commission, the chairman of any interagency basin committee or the United States commissioner of any interstate compact commission, and the Chairman of the Tennessee Valley Authority shall appoint a non-Federal representative to an advisory board (hereinafter referred to as the 'advisory board') established by this section. The Chairman of the Council shall also appoint no more than three other non-Federal representatives to such advisory board as he may deem advisable: *Provided*, That any such representative shall, as a result of training and experience, be knowledgeable of water and related land resources programs: *Provided further*, That any such representative shall, as a result of training and experience, be knowledgeable of water and related land resources programs: *Provided further*, That any such representative shall represent those interests concerned with water and related land resources which may not otherwise be represented on the advisory board.

"(b) The term of office of each member appointed to the advisory board shall be for three years: *Provided*, That of the members initially appointed to the board, the term of office of approximately one-third of the membership shall be for one year, the term of office of another one-third of the membership shall be for two years, and the term of office of the remaining members shall be for three years.

"(c) Such advisory board shall—

"(1) advise the Council with respect to the activities and programs conducted by the Council and the coordination of such activities and programs with the activities and programs of Federal, State, and local governments;

"(2) make such recommendations as it deems appropriate regarding the implementation and improvement of planning procedures, studies and other activities and programs undertaken by the Council and new activities and programs which the Council should undertake or support; and

"(3) cause to be published in the report established by section 106 of this Act, such views and recommendations as the advisory board may deem appropriate relating to the functions set forth by this section.

"(d) The advisory board shall meet not less than twice each year.

"(e) The advisory board shall elect a chairman from among its appointed members. The chairman of the advisory board shall be allowed to participate as an observer and nonvoting delegate to all Council meetings except those meetings in which the Council will make policy or budget recommendations to the President. The members of the advisory board shall be notified in advance, in a timely fashion, of all items to be discussed or considered by the Council.

"(f) Any specific recommendations made by the advisory board pursuant to subsection (c)(2) of this section shall be considered by the Council. The Chairman of the Council shall, within ninety days after receipt of such recommendation, respond to the Council and the advisory board, in writing, setting forth the action taken or the reason for rejecting the recommendation.

"(g) Funds provided under section 401(b) of this Act may be used to pay the travel and such other related costs as shall be authorized by the Chairman of the Council which are incurred by the members of the advisory board incident to their attendance at any meetings of the advisory board or the Council except that the amount of travel and related costs paid under this subsection to any member of the advisory board with respect to this attendance at any meeting of the advisory board or the Council may not exceed the amount which would be payable to such member if the law relating to travel expenses for persons intermittently employed in Government service applied to such member.

"(h) The Chairman of the Council shall be an ex officio member of the advisory board.".

OFFICE OF WATER RESOURCES RESEARCH

SEC. 105. Title I of the Water Resources Planning Act (42 U.S.C. 1962) is further amended by adding at the end thereof the following new section:

"OFFICE OF WATER RESOURCES RESEARCH

"SEC. 108. There is established within the Council an Office of Water Resources Research (hereinafter referred to as the 'Office') which office shall be directed by a Deputy Director of the Water Resources Council. The Deputy Director shall be appointed by the President to serve at his pleasure, and shall be under the general direction of the Chairman of the Council.".

AMENDMENT TO THE WATER RESOURCES RESEARCH ACT OF 1964

SEC. 106. (a) Section 100 of the Water Resources Research Act of 1964 (42 U.S.C. 1961a), is amended as follows:

(1) in subsection (a) thereof, by striking out "Secretary of the Interior" and inserting in lieu thereof "Water Resources Council", and by striking out "Secretary's" and inserting in lieu thereof "Water Resources Council Chairman's"; and

(2) in subsection (b) thereof, by striking out "Secretary" whenever it appears and inserting in lieu thereof "Council".

AMENDMENT TO THE WATER RESOURCES RESEARCH ACT OF 1964

SEC. 107. Section 101 of the Water Resources Research Act of 1964 (42 U.S.C. 1961a–1) is amended as follows:

(1) in subsection (a) thereof, by striking out "Secretary of the Interior" and inserting in lieu thereof "Water Resources Council"; and

(2) in subsection (b) thereof, by striking out "Secretary" and inserting in lieu thereof "Chairman of the Water Resources Council".

AMENDMENT TO THE WATER RESOURCES RESEARCH ACT OF 1964

SEC. 108. Section 102 of the Water Resources Research Act of 1964 (42 U.S.C. 1961a–2), is amended by striking out "Secretary"

whenever it appears and by inserting in lieu thereof "Chairman of the Water Resources Council" and by striking out "September" in the second sentence and inserting in lieu thereof "December".

AMENDMENT TO THE WATER RESOURCES RESEARCH ACT OF 1964

SEC. 109. Section 104 of the Water Resources Research Act of 1964 (42 U.S.C. 1961a–4), is amended as follows:

(1) in the first paragraph thereof by striking out "Secretary of the Interior" and inserting in lieu thereof "Water Resources Council", by striking out "He" wherever it appears and inserting in lieu thereof "The Chairman of the Water Resources Council", by striking out "him" and inserting in lieu thereof "the Chairman of the Water Resources Council", and by striking out "the United States Department of the Interior,"; and

(2) in the second paragraph thereof by striking out "July" and inserting in lieu thereof "October", and by striking out "Secretary" and inserting in lieu thereof "Chairman of the Water Resources Council".

DEVELOPMENT PROGRAMS

SEC. 110. Title II of the Water Resources Research Act of 1964 (42 U.S.C. 1961b), is amended to read as follows:

"DEVELOPMENT PROGRAMS

"SEC. 200. (a) The Council, acting through the Office of Water Resources Research (hereinafter referred to as the 'Office') established by section 108 of the Water Resources Planing Act, as amended, is authorized to make grants and finance contracts and matching or other arrangements with qualified educational institutions, private foundations, or other institutions, with private firms, with local, State, and Federal agencies and individuals to undertake research into water resources problems of national interest which it may deem to be desirable.

"(b) The Council, acting through the Office, is further authorized to conduct a water resources research technology development program which pursues research results through the development of effective structural or nonstructural techniques, methods, procedures, and equipment, and through testing, evaluation, and demonstration, to a point where such results can be adopted for practical application to problems of national interest.

"(c) Water resources research and technology development programs carried out in accordance with this section may include, without being limited to: saline water conversion; irrigation and other water use efficiencies; water for energy; water and related land use planning, operations, management, and legal systems; protection and enhancement of the water-based environmental institutional arrangements; saline water conversion technologies for water reclamation and reuse; salinity management; and economic, social, and environmental impact assessment. Due consideration shall be given to priority problems identified by water and related land resources planning, data acquisition, and like studies conducted by other agencies and organizations. The Office shall cooperate fully with the chief administrative officer of all Federal agencies engaged in water research and development to insure that water resources and development work performed under the Act makes the fullest possible contribution to the improvement of water resources processes and techniques and to avoid in the performance of this Act the duplication of the experience, expertise, and data regarding water resource technologies which have been acquired.

"SEC. 201. To carry out the water resources research and technology development programs authorized by this Act, the Office may:

"(1) Engage, by competitive contract or otherwise, chemists, physicists, engineers, and such other personnel as may be deemed necessary, and any educational institution, scientific organization or individual, Government agency, or private firm deemed suitable to do any part of the research, technology development, or other work authorized by this Act, and correlate and coordinate the research and technology development work of such educational institutions, scientific organizations, and private firms.

"(2) Develop and implement technology transfer methodologies as required to assure that the results of research and development undertaken pursuant to this Act can be adopted for practical application by others, including but not limited to the reduction of scientific and technical reports into suitable and understandable formats, and conduct assessments of the impacts of other technology on water resources.

"(3) Accept financial and other assistance from any local, State, Federal, and other agency in connection with studies or surveys relating to water problems and facilities, and enter into contracts with regard to such assistance.

"(4) Acquire processes, technical data, inventions, patent applications, patents, licenses, land, and interest in land (including water rights), research and technology development equipment and facilities, and other property or rights by purchase, license, lease, or donation.

"SEC. 203. There are authorized to be appropriated to the Water Resources Council $10,000,000 for each of the fiscal years 1977 to 1987, inclusive, from which appropriations the Council may carry out the provisions of this title.".

SEC. 111. Section 300 of the Water Resources Research Act of 1964 (42 U.S.C. 1961c) is amended by striking out "Secretary of Interior" and inserting in lieu thereof "Water Resources Council" and by striking out "He" and inserting in lieu thereof "The Chairman of the Water Resources Council".

SEC. 112. Section 301 of the Water Resources Research Act of 1964 (42 U.S.C. 1961c–1) is amended by striking out "Secretary of Interior" and inserting in lieu thereof "Water Resources Council".

SEC. 113. Section 305 of the Water Resources Research Act of 1964 (42 U.S.C. 1961c–5) is amended by striking out "by such means as he deems appropriate" and inserting in lieu thereof "with the advice and assistance of the Water Resources Council".

SEC. 114. Section 307 of the Water Resources Research Act of 1964 (42 U.S.C. 1961c–7) is amended by striking out "Secretary" and inserting in lieu thereof "Water Resources Council".

SEC. 115. Section 308 of the Water Resources Research Act of 1964 (42 U.S.C. 1961c–8) is amended by striking out "Secretary" wherever it appears and inserting in lieu thereof "Chairman of the Water Resources Council".

TITLE II—AMENDMENTS TO TITLE II OF THE WATER RESOURCES PLANNING ACT—RIVER BASIN COMMISSIONS

SEC. 200. Section 201 of the Water Resources Research Planning Act (42 U.S.C. 1962b) is amended as follows:

(1) in subsection (b)(1) thereof by striking out "plans" and inserting in lieu thereof "planning" and by inserting immediately before the semicolon at the end thereof a comma and the following: "and where a river basin commission exists, serve to coordinate all federally assisted State programs for water related planning"; and

(2) in subsection (b)(2) thereof by striking out ", coordinated, joint" and inserting in lieu thereof "regional or river basin" and after "*Provided*, That" by inserting "the plan is prepared in a comprehensive, coordinated, joint planning process and that".

SEC. 201. Section 202(a) of the Water Resources Planning Act (42 U.S.C. 1962b–a) is amended to read as follows:

"(a) A chairman appointed by the President who shall also serve as chairman and coordinating officer for comprehensive planning of the Federal members of the commission and who shall represent the Federal Government in Federal-State relations on the commission and who shall not, during the period of his service on the commission, hold any other position as an officer or employee of the United States, except as a retired officer or retired civilian employee of the Federal Government;".

SEC. 202. (a) Section 204 of the Water Resources Planning Act (42 U.S.C. 1962b–3) is amended as follows:

(1) after "Sec. 204." thereof by inserting "(a)"; and

(2) in subsection 204 (3) thereof by striking out ", coordinated, joint" and inserting in lieu thereof "regional or river basin".

(b) Section 204 of such Act is further amended by adding at the end thereof the following new subsection:

"(b) For the purpose of this title the phrase 'water and related land resources' may be construed broadly so as to permit the River Basin Commission to perform its functions with respect to such natural resources issues as may be appropriate for its region subject to provision of section 3 of this Act.".

TITLE III—AMENDMENTS TO TITLE III OF THE WATER RESOURCES PLANNING ACT—FINANCIAL ASSISTANCE TO STATES

SEC. 300. Section 301 of the Water Resources Planning Act (42 U.S.C. 1962c) is amended as follows:

(1) in subsection (a) by striking out "fiscal years 1977 and 1978, $5,000,000 in each such year for grants to States to assist them in developing and participating in the development of comprehensive water and related land resources plans." and inserting in lieu thereof "the next fiscal year beginning after the date of enactment of this Act, and for the four succeeding years thereafter, sums adequate to provide up to $200,000 annually to each of the several States to assist each State in developing a comprehensive State water plan in coordination with national and regional or river basin water resources plans. Such sums are to be made available on the basis of two dollars of Federal funds to one dollar of State matching funds.";

(2) by redesignating subsection (b) thereof as (c); and

(3) by adding a new subsection (b) thereof to read as follows:

"(b) Of those sums authorized to be appropriated for grants to the several States by subsection (a) of this section, wherever such sums are not so utilized, they shall remain available to match, on a dollar for dollar basis, funds made available by any State to meet the expenses of additional planning activities not adequately provided for in subsection (a) of this section.";

(4) in subsection (b) thereof, by inserting "under section 208 of the Federal Water Pollution Control Act Amendments of 1972, and" immediately after "section 701 of the Housing Act of 1954 and".

SEC. 301. Section 302 of the Water Resources Planning Act (42 U.S.C. 1962c–1) is hereby repealed.

SEC. 302. Section 303 of the Water Resources Planning Act (42 U.S.C. 1962c–2) is amended as follows:

(1) in paragraph (1) thereof, by striking out "comprehensive planning with respect to" and inserting in lieu thereof "the development of a comprehensive State water resources plan, which includes but is not limited to consideration of,"; and

(2) in subsection (2) thereof, by adding "or under section 208 of the Federal Water Pollution Control Act Amendments of 1972," after "1965,".

SEC. 303. The Water Resources Planning Act (42 U.S.C. 1962) is further amended by adding at the end thereof a new section as follows:

"SEC. 405. Notwithstanding any other provision of law, Federal appropriations for all resource planning studies to be conducted by and through the Council shall be made to the Council and the Council shall be responsible for assigning studies and apportioning funds: *Provided*, That for Level B studies and other studies administered by a river basin commission such funds shall be assigned through the Council to said river basin commission.".

SEC. 304. Section 5315 of title 5, United States Code, is amended by adding at the end thereof the following:

"(105) Chairman of the Water Resources Council.".

SEC. 305. Unless otherwise so specified, the provisions of this Act shall become effective October 1, 1977.

Mr. HATFIELD. Mr. President, I am pleased to join with the distinguished Senator from Idaho (Mr. CHURCH) and the distinguished Senator from Washington (Mr. JACKSON) in cosponsoring the Water Resources Planning and Research Assistance Amendments Act of 1977.

In my judgment, this Nation faces very serious questions with regard to future patterns of water use and conservation. We need to insure that we have the framework necessary to assist in making those decisions and this legislation would go a long way in providing that framework. It builds upon past legislation to elevate the Water Resources Council into the Executive Office of the President, a change which should bring about better coordination of water resource planning efforts among the Federal agencies. In addition to upgrading water resource planning at all levels, important increases in water resources research programs is provided by this legislation.

I am convinced of the need for the Congress to address water resource issues in a comprehensive manner soon. We need to learn more about the impact of the development of energy resources on water supplies for agriculture and other purposes. While I come from a State which is sometimes thought of as a water-surplus area, I would point out to my colleagues that there simply are no water-surplus regions in the Nation and cannot be until we learn more about the utilization of this key resource in all regions. Recent studies in the Pacific Northwest indicate that much more remains to be done to irrigate the arid lands there for agricultural purposes.

The legislation we are introducing today provides the Congress with a starting point for consideration of one of the most important and pervasive resource issues in this country. I hope that hearings can be scheduled soon so that we can take a comprehensive look at water resource policy and its implications on other resource use and conservation.

By Mr. KENNEDY (for himself and Mr. STEVENS):

S. 187. A bill to establish a program to revitalize the U.S. commercial fishing industry; to the Committee on Commerce.

COMMERCIAL FISHING INDUSTRY REVITALIZATION

Mr. KENNEDY. Mr. President, this Congress made a significant commitment to the revitalization of the American fishing industry when it overwhelmingly passed legislation establishing an interim 200-mile fishing zone for the United States. That law has two principal aims: First, to protect the fish stocks jeopardized by the overfishing practices of foreign nations, and second, to insure for our domestic fishermen an opportunity to rebuild their own industry. The bill that I introduce today for myself and Senator STEVENS is the second step that Congress must take, using existing funds and an existing framework to assure the revitalization of the American fishing industry.

The bill which we introduce today provides that 100 percent of tariffs on imported fish products and fines collected under the Fishing Conservation and Management Act of 1976 will be utilized by the regional councils set up to implement the 200-mile limit for grants, loans, and loan guarantees for fishermen in their region. At the present level of imports, this could mean over $3 million annually would be available to the New England council for assistance to the fishing industry, in addition to a share of the fines resulting from violations of the 200-mile limit.

At the present time, 30 percent of tariffs collected on fish products imported into the United States are transferred into the Saltonstall-Kennedy fund which was intended by the Congress under the leadership of Senators Leverett Saltonstall and John F. Kennedy to used primarily for increased marketing opportunities for American fish producers. Over the years, the original intent of the Congress has been ignored as these additional funds were used to replace the operating budget of the National Marine Fisheries Service. We fully intend to pursue full funding for the excellent programs administered by NMFS while we insure that the tariffs funds are used as originally intended to provide additional assistance to the fishing industry in the United States which has been devastated by the overfishing practices of foreign fishing nations.

The legislation we have drafted will assure that these funds collected on imported fish will go directly to the regional councils for those programs which have the highest priority for the renewal of the fishing industry in that area of the country. In New England, the replacing of old and inefficient vessels and equipment and the industry's ability to deal with spiraling insurance rates will undoubtedly be major concerns over the next several years as the industry begins to grow. The New England Regional Fisheries Management Council could determine to spend all of its resources available under this act to meet these problems.

Senator STEVENS and I recognize that the implementation of the 200-mile-limit fishing zone will not solve all the problems of the fishing industry. The legislation we cosponsor is the logical second step in the process of revitalizing America's oldest industry. We look forward to hearing from all our fishermen who helped us so much in perfecting the 200-mile-limit bill for their suggestions on this bill. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 187

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the Kennedy-Stevens Commercial Fishing Industry Revitalization Act of 1977.

SEC. 2. FINDINGS.

(a) The Congress finds and declares the following:

(1) The commercial fishing industry constitutes a major source of employment and contributes significantly to the welfare of the Nation, including that of the many coastal areas whose economies are highly dependent upon fishing.

(2) Competition from uncontrolled foreign overfishing off the coasts of the United States has severely retarded the growth of the United States fishing industry, by depleting the stocks of fish and creating an unfavorable investment climate. As a result of such fishing activity, the United States is not capable of efficiently harvesting many fisheries off the Nation's coasts.

(3) The Fishery Conservation and Management Act of 1976 provides for conservation and management of the fisheries, and proper supervision of foreign fishing activities, but direct Federal financial assistance is needed to modernize and improve the United States fishing fleet sufficiently to enable it to compete successfully with foreign fishing fleets and meet American requirements to displace foreign fleets from the fishery resources of the United States.

(b) It is therefore the purpose of the Congress in this Act to dedicate certain revenues to the revitalization of the United States fishing industry, so that United States fishermen can fully utilize all of the fishery resources of the Nation.

SEC. 3. DEFINITIONS.

As used in this Act:

(1) The term "aquaculture and hatchery facilities" means any facility used, or capable of being used, for—

(A) the culture or husbandry of aquatic animals or plants by private industry for commercial purposes, or by public agencies, State, or local governments for scientific purposes; or

(B) the culture and growing of fish by private industry, public agencies, or a State or local government, for the purpose of creating or augmenting publicly owned and regulated stocks of fish in streams or rivers.

(2) The terms "Council" and "Regional Fishery Management Council" mean any of the Regional Fishery Management Councils established pursuant to section 302 of the Fishery Conservation and Management Act of 1976. The term "Councils" means all of the Regional Fishery Management Councils so established, considered collectively.

(3) The term "fully utilized", with respect to a fishery, means that the amount of fish harvested by United States fishermen is equal to the optimum yield of such fishery.

(4) The term "Fund" means the Fishing Industry Revitalization Fund established pursuant to section 2 of the Saltonstall-Kennedy Act, as amended (15 U.S.C. 713c–3).

(5) The term "optimum yield" has the meaning prescribed for such term in section 2 of the Fishery Conservation and Management Act of 1976.

(6) The term "Secretary" means the Secretary of Commerce.

(7) The term "unutilized", with respect to a fishery, means that United States fishermen do not harvest any of the stocks within such fishery.

(8) The term "underutilized", with respect

to a fishery, means that United States fishermen harvest some, but less than the optimum yield of, the stocks within such fishery.

SEC. 4. AMENDMENT OF THE SALTONSTALL-KENNEDY ACT AND RELATED LEGISLATION

(a)(1) The Saltonstall-Kennedy Act (15 U.S.C. 713c-3) is amended to read as follows:

"SEC. 2. (a) There is appropriated for each fiscal year, beginning with the fiscal year commencing January 1, 1977, an amount equal to 100 percent of the gross receipts from duties collected under the customs laws on fishery products (including fish, shellfish, mollusks, crustacea, aquatic plants and animals and any products thereof, including processed and manufactured products) during the calendar year which includes the first day of the fiscal year involved. Such amounts shall be maintained in a separate fund in the Treasury of the United States to be known as the "Fishing Industry Revitalization Fund". All funds in the Fishing Industry Revitalization Fund shall be made available by the Secretary of Commerce to the Regional Fishery Management Councils established pursuant to title III of the Fishery Conservation and Management Act of 1976. Such Councils shall use such sums to carry out the Kennedy-Stevens Commercial Fishing Industry Revitalization Act of 1976 and for no other purpose.".

(b) There is futher appropriated for each fiscal year, beginning with the fiscal year commencing October 1, 1976, an amount equal to the penalties, fines, and forfeitures assessed pursuant to section 308, 309, and 310 of the Fishery Conservation and Management Act of 1976 collected during the calendar year which includes the first day of the fiscal year involved. Such amounts shall be deposited and maintained in the 'Fishing Industry Revitalization Fund'.".

(2) The amendment made by paragraph (1) of this subsection shall take effect October 1, 1976.

(b) Section 32 of the Act of August 24, 1935 (7 U.S.C. 612c) is amended by striking out the period at the end of the first sentence and inserting in lieu thereof the following: "; except that, beginning with the fiscal year commencing January 1, 1977, the provisions of this section shall not apply to duties collected under such laws on fishery products (including fish, shellfish, mollusks, crustacea, aquatic plants and animals and any products thereof, including processed and manufactured products).".

(c) The amendments made by this section shall not be construed to indicate any intent on the part of Congress to reduce the amounts of funds appropriated annually for the use of the National Marine Fisheries Service.

SEC. 5. ALLOTMENT OF FUNDS FOR COMMERCIAL FISHING INDUSTRY REVITALIZATION.

The Secretary shall, for each fiscal year commencing on or after January 1, 1977, allot to each Council a proportion of the amount appropriated for such fiscal year pursuant to the Saltonstall-Kennedy Act (15 U.S.C. 713c-3). Each such allotment shall be determined in accordance with rules which the Secretary shall promulgate (and may thereafter revise) within 120 days after the date of enactment of this Act. Such rules shall provide that the amount of each Council's allotment under this section shall be based upon the Secretary's determination as to—

(1) the potential value of the fish which could be harvested by United States fishermen in any unutilized and underutilized fishery within the geographical area of authority of such Council; and

(2) the potential reduction in the per unit cost to United States fishermen of harvesting fish in any fully utilized fishery within the geographical area of authority of such Council.

Funds allotted to a Council under this section shall be used by such Council solely for purposes authorized by this Act, and no such funds may be used to pay any administrative expenses of such Council or of the Secretary except administrative expenses incurred directly in administering the provisions of this Act. Any unutilized portion of any such allotment shall remain available without fiscal year limitation. The allotments to the Councils under this section shall be in addition to and not in substitution for any other appropriations authorized for activities of the Councils, the National Oceanic and Atmospheric Administration, or any unit of such Administration.

SEC. 6. AUTHORITY OF THE REGIONAL FISHERY MANAGEMENT COUNCILS.

(a) Each Council may provide financial assistance in the form of grants and loans, from funds allotted to it under section 5 such financial assistance shall be provided in accordance with this title for the sole purpose of carrying out approved programs or projects which are likely to increase the efficiency or otherwise improve the capability of United States commercial fishermen and of the United States commercial fishing industry to harvest, process, and market fish and fish products.

(b) The Secretary shall, subject to the provisions of subsection (c) and rules and regulations, guarantee, or enter into commitments to guarantee, the payment of interest on, and the principal amount of, any loan or other evidence of indebtedness the proceeds of which are used to carry out any program or project approved under subsection (a). In developing rules and regulations under this subsection, the Secretary shall, to the extent practicable, request the views of, or consult with, the councils and appropriate persons knowledgeable or interested in the fishing industry including the Councils.

(c)(1) Loans or other evidences of indebtedness guaranteed under subsection (b) shall be guaranteed on such terms and conditions as the Secretary shall prescribe, except that—

(A) no guarantee shall be made unless the indebtedness involved will be completely amortized within a reasonable period, not to exceed 30 years;

(B) no guarantee shall be made unless the Secretary determines that such loans or other evidences of indebtedness will—

(i) be issued only to investors who meet the requirements prescribed by the Secretary, or, if an offering to the public is contemplated, be underwritten upon terms and conditions approved by the Secretary;

(ii) bear interest at a rate found not to be excessive by the Secretary; and

(iii) contain, or be subject to, repayment, maturity, and other provisions which are satisfactory to the Secretary;

(C) the approval of the Secretary of the Treasury shall be required with respect to any such guarantee, unless the Secretary of the Treasury waives such approval; and

(2) The full faith and credit of the United States is pledged to the payment, under paragraph (5), of any default on any indebtedness guaranteed under subsection (b). Any such guarantee made by the Secretary shall be conclusive evidence of the eligibility of the obligation involved for such guarantee, and the validity of any such guarantee so made shall be incontestable in the hands of a holder of the guaranteed obligation, except for fraud or material misrepresentation on the part of the holder, or known to the holder at the time acquired.

(3) The Secretary shall prescribe and collect fees in connection with guarantees made under subsection (b). These fees may not exceed the amount which the Secretary estimates to be necessary to cover the administrative costs pertaining to such guarantees.

(4) The interest paid on any obligation which is guaranteed under this section and which is received by the purchaser thereof (or the purchaser's successor in interest), shall be included in gross income for the purpose of chapter 1 of the Internal Revenue Code of 1954.

(5)(A) Payments required to be made as a result of any guarantee made under subsection (b) shall be made by the Secretary from sums appropriated to the Fund or from moneys obtained from the Secretary of the Treasury pursuant to paragraph (6).

(B) If, there is a default by any person receiving financial assistance in any payment of principal or interest due under a loan or other evidence of indebtedness guaranteed by the Secretary under subsection (b), any holder of such loan or other evidence of indebtedness may demand payment by the Secretary of the unpaid interest on and the unpaid principal of such obligation as they become due. The Secretary, after investigating the facts presented by the holder, shall pay to the holder the amount which is due such holder, unless the Secretary finds that there was no default by such person or that such default has been remedied.

(C) If the Secretary makes a payment to a holder under subparagraph (B), the Secretary shall—

(i) have all of the rights granted to the Secretary or the United States by law or by agreement with the obligor; and

(ii) be subrogated to all of the rights which were granted such holder, by law, assignment, or security agreement between such holder and the obligor.

The Secretary may accept, in complete or partial satisfaction of any such rights, a conveyance of property or interests therein. Any property so obtained by the Secretary may be completed, maintained, operated, held, rented, sold, or otherwise dealt with or disposed of on such terms or conditions as the Secretary prescribes or approves. If, in any case, the sum received through the sale of such property is greater than the amount paid to the holder under subparagraph (B) plus costs, the Secretary shall pay any such excess to the obligor.

(D) The Attorney General shall, upon the request of the Secretary, take such action as may be appropriate to enforce any right accruing to the Secretary or the United States as a result of the making of any guarantee under subsection (d)(2). Any sums received through any sale under subparagraph (C) or recovered pursuant to this subparagraph shall be paid into the Fund.

(6) If the moneys available to the Secretary are not sufficient to pay any amount which the Secretary is obligated to pay under paragraph (5), the Secretary shall issue to the Secretary of the Treasury notes or other obligations (only to such extent and in such amount as may be provided for in appropriation Acts) in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of the Treasury prescribes. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury on the basis of the current average market yield on outstanding marketable obligations of the United States on comparable maturities during the month preceding the issuance of such notes or other obligations. Any sums received by the Secretary through such issuance shall be deposited in the Fund. The Secretary of the Treasury shall purchase any notes or other obligations issued under this paragraph, and for this purpose such Secretary may use a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force. The purposes for which securities may be issued under that Act are

extended to include any purchase of notes or other obligations issued under this paragraph. The Secretary of the Treasury may at any time sell any of the notes or other obligations so acquired under this paragraph. All redemptions, purchases, and sales of such notes or other obligations by the Secretary of the Treasury shall be treated as public debt transactions of the United States.

SEC. 7. ADJUSTMENT ASSISTANCE.

If the Secretary, upon petition and after an investigation, finds that any person receiving financial assistance under section 6 is unable to meet such person's obligations pursuant to a loan guarantee made under such section, the Secretary may take any of the following actions.

(A) Modify appropriately the terms and conditions of such loan or guarantee.

(B) Refinance such loan.

(C) Make a supplemental loan to such person the proceeds of which shall be applied to the payment of principal and interest due under such loan or guarantee.

(D) Make a grant to such person the proceeds of which shall be applied to the payment of principal and interest due under such loan or guarantee.

SEC. 8. APPROVAL OF ASSISTANCE FOR PROGRAMS AND PROJECTS.

Any person (including a governmental entity) may apply for financial assistance under section 6 for any program or project which is likely to increase the efficiency or otherwise improve the capability of United States commercial fishermen, including the harvesting, processing or marketing capability of the United States commercial fishing industry. Each application for such assistance shall be prepared in such form and shall include such content as the Secretary prescribes by regulation. Each such application shall be submitted and acted upon pursuant to the following provisions:

(1) The application shall be submitted to the appropriate Council.

(2) The Council involved shall refer the application to the appropriate committee or panel of such Council (established pursuant to section 302 of the Fishery Conservation and Management Act of 1976) for study, evaluation, and a recommendation as to whether the program or project described in such application should be approved, disapproved, or approved with specified modifications. Such committee or panel shall report thereon to such Council as soon as practicable after such referral.

(3) Upon receipt of a report prepared under paragraph (2), the Council involved shall consider such report and any other information and shall determine whether to approve the application involved, in whole or part. Each application so approved shall be submitted to the Secretary, with a recommendation that the Secretary approve the program or project therein described as approved by such Council.

(4) If the Secretary disapproves any proposed project or program submitted under paragraph (3) by a Council, the Secretary shall return the application involved to such Council together with the reasons for such disapproval.

(5) Upon receipt of any returned application under paragraph (4), the Council involved may—

(A) prepare a new program or project description correcting the deficiencies delineated by the Secretary and may resubmit such application as so redrafted to the Secretary with a recommendation that it be approved by the Secretary; or

(B) request that the Secretary schedule a hearing, in accordance with section 553 of title 5, United States Code, following which the Secretary shall determine the validity of the program or project described in such application.

(6) The review of the Secretary under paragraph (4) or (5) shall be limited to determining whether or not the program or project involved is consistent with the purpose of this Act and not duplicative of any existing program or project.

SEC. 9. REGULATIONS GOVERNING PROGRAMS AND PROJECTS.

The Secretary shall promulgate such regulations governing programs and projects carried out pursuant to this Act as the Secretary determines necessary to carry out the purpose of this Act and to protect the financial interests of the United States. Such regulations shall include provisions for—

(1) such fiscal control and fund accounting procedures (by each Council and each recipient of assistance under section 6 and 7) as may be necessary to assure proper disbursement of, and accounting for such funds;

(2) such reports from each Council and recipient of assistance under sections 6 and 7, in such form and containing such information as the Secretary may reasonably require to determine the extent to which funds allotted and provided under this Act have been effective in carrying out the purpose of this Act; and

(3) such additional staff as the Councils need to carry out the purpose of this Act.

SEC. 10. STAFF AND ADMINISTRATION.

Except as otherwise provided, the provisions of section 302(f) of the Fishery Conservation and Management Act of 1976 (relating to staff of, and administrative services for, the Councils in carrying out their functions under such Act) shall also apply to the functions of the Councils under this Act. The Secretary shall, by rule in accordance with section 553 of title 5, United States Code, authorize the Councils to employ, and shall compensate, such additional personnel thereof as are necessary and appropriate to carry out the functions of the Councils under this Act.

Mr. STEVENS. Mr. President, I thank my colleague Mr. KENNEDY for his kind words. He and I are today filing a bill which I believe will be a landmark in the history of American commercial fishing. The Kennedy-Stevens Act is a legislative proposal to revitalize the floundering American commercial fishing industry through the use of regionally controlled financial assistance funded from the import duties on fisheries products.

Over the last 20 years the increase in foreign fishing activity off the coast of the United States has decimated our stocks of commercial fish. Some 14 species are listed as depleted and a host of others are fully utilized by foreign fishermen. Destruction of the stocks off the U.S. coast naturally enough has lead to a decline in the investment climate for commercial fishing operations. In many parts of the country, such as my home State Alaska, foreign capital has been used to fill the void created by lack of investment from American sources. It is our hope that this legislation will act in part as an investment incentive for major sources of private sector American capital.

The efficiency of foreign fishing fleets is overwhelming. Two and three hundred foot highly mechanized trawlers scour the ocean bottom for fish. These trawlers off-load their catch onto huge mother ships the size of oceanliners which process and freeze its produce. The nets of ocean-going foreign commercial fishing vessels often extend 10 miles in length. The technology employed by such vessels is highly sophisticated and the amount of investment capital required to reach such a state of the art is enormous.

In order for American fishermen to become competitive with foreign fishermen, they must learn to fish more efficiently. They must learn to employ new fishing techniques and must develop new types of fishing equipment and mechanized processing plants. At the present time, the private sector is unwilling to make the necessary investments in research and development and capital construction costs to meet this objective.

I believe that fishing, like so many other ocean industries, holds tremendous potential for the future. Last year off my home State the Japanese, Soviets, and Koreans accumulatively harvested almost 3 billion pounds of pollock, a species of fish not harvested by Americans. The harvest of pollock could be a $100 million a year fishing industry. One of the primary purposes of this legislation is to enable American fishermen to develop the capacity to harvest, process, and market species such as pollock.

I wish to point out that this is not an industry subsidy bill. This legislation creates a fund, administered by the Secretary of Commerce, which the regional councils, created under the Fishery Conservation and Management Act of 1976, can draw upon for use in industry enhancement projects. These projects must improve either the capability of the United States to harvest, process, and market underutilized species, or increase U.S. efficiency in harvesting, processing, or marketing fully utilized species. Increasing the capacity of American fishermen to use the resources off the coast of the United States is the objective of this legislation. I am sure that the taxpayers will be happy to know that no general revenue funds will be used by this proposal. All of the projects funded under this bill are done so through the use of import taxes already levied on fisheries products. Incidentally, last year the U.S. trade deficit in fisheries products was $1.5 billion.

The programs funded under this proposal would be in addition to and not in lieu of the excellent work currently conducted by the National Marine Fisheries Service. This legislative proposal would in no way diminish the need for broad national programs such as those carried out by the Fisheries Service and I intend to see that the programs carried out by that agency continue to be fully funded.

Mr. President, this legislation reflects the high quality of work which can result when Members from both sides of the aisle sit down in full cooperation with one another to work out legislative proposals on a bipartisan effort. It has been a pleasure for me and my staff to work with Senator KENNEDY and his people in the construction of this legislative proposal. I particularly would like to thank Mary Murtagh of Senator KENNEDY's staff for her tremendous assistance in the preparation of this bill.

Mr. President, I would urge each of my colleague here in the Senate to support this legislation.

By Mr. KENNEDY (for himself and Mr. BROOKE):

S. 188. A bill to establish the Boston Harbor National Recreation Area in the Commonwealth of Massachusetts; to the Committee on Interior and Insular Affairs.

BOSTON HARBOR ISLANDS RECREATION AREA

Mr. KENNEDY. Mr. President, I am introducing today for myself and Senator BROOKE legislation to establish the Boston Harbor Islands Recreation Area. Similar legislation is being introduced in the House of Representatives by Congressman JOE MOAKLEY.

Boston Harbor includes 47 square miles of water, 180 miles of shoreline and 30 islands. Three million people live within 25 miles of the Harbor, and since 1965 a concerted effort has been made at all levels of government to restore Boston Harbor Islands to these citizens for their use and enjoyment. Congressman JOE MOAKLEY, who is introducing identical legislation in the House of Representatives, began the struggle to preserve and protect these Harbor Islands in the Massachusetts Legislature by securing passage of State legislation to acquire the islands.

Since that time, the Massachusetts Area Planning Council completed its comprehensive report on the recreational potential of the islands and proposed plans on how to achieve the revitalization of the Harbor. Efforts to clean up the Harbor and its waters are being accelerated.

The Environmental Protection Agency and the Commonwealth recently announced agreement on a 10-year, $800 million construction program to improve water pollution control facilities, representing the largest single water pollution control effort ever undertaken in the New England area.

Only two additional items are needed to make the Boston Harbor National Park a reality—a coordinated commission with sufficient authority to develop a comprehensive plan for the recreation area and adequate funding to implement such a plan.

At the present time, at least 17 agencies of Federal, State, and local government have jurisdiction over aspects of the harbor or the islands. While all of these agencies are anxious to assist in restoring the harbor, a unified and coordinated authority is critical to avoid a piecemeal approach to the problems of the harbor. The legislation we introduce today establishes a commision which will be responsible for harmonizing these programs and developing a comprehensive plan.

As our distinguished colleagues in the Senate will recognize, there is a national interest in providing funding to establish the Boston Harbor Recreation Area because of its location in the densely populated area of the east coast where the opportunities for the Federal Government to assist in developing recreational facilities is so limited by lack of available space.

The legislation we submit today is a blueprint on which we hope all the elected officials, Government agencies, and citizens neighboring the harbor will sketch their hopes and their plans. We look forward to working closely with all of these concerned groups and individuals to refine and perfect this legislation.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 188

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

FINDINGS AND STATEMENTS OF POLICY

SECTION 1. The Congress finds and declares—

(a) that the Boston Harbor area including the Boston Harbor Islands, in the Commonwealth of Massachusetts, possesses unique scenic, natural, cultural, historic, and recreational values and resources;

(b) that there is a national interest in preserving and enhancing these unique values and resources for the present and future well-being of the Nation and for present and future generations;

(c) that the present, State, regional, and local authority and funding capabilities are inadequate to insure the preservation and enhancement of the values and resources of said islands, and it is in the national interest to establish a new system to assist the Commonwealth of Massachusetts, regional agencies, and local governments to preserve and manage the values and resources of the Boston Harbor area and the Boston Harbor Islands;

(d) that the key to more effective preservation and conservation of the unique resources and values of the Boston Harbor area and the Boston Harbor Islands is a program encouraging coordinated action by the Federal and State Governments to assist local governments to administer sound management policies regulating and guiding development in the Boston Harbor area and on the Boston Harbor Islands;

(e) that such a new system for the protection and management of the values and resources of the islands requires the establishment by the Commonwealth of Massachusetts of a Boston Harbor Commission to give effect to the trust relationship;

(f) that because expanded access to the Boston Harbor Islands is crucial to the development of the Boston Harbor area as a recreational area for the Nation, any plan for the development of the Boston Harbor National Recreation Area must include provisions for expanded access to and between the Boston Harbor Islands, including such shoreline, island, and water facilities as are needed to encourage public visitation of the islands.

SEC. 2. The purposes of this Act are (1) to provide for the preservation of the outstanding natural features and the land and water resources of the Boston Harbor Area including the Boston Harbor Islands, and (2) to provide adequate recreation facilities and opportunities for the people of the Boston Metropolitan area and the Nation.

SEC. 3. There is hereby established the Boston Harbor National Recreation Area (hereinafter referred to as the "recreation area"). The boundaries of the recreation area shall be Boston Harbor, from Winthrop to Hull, Massachusetts, its shores and its islands.

SEC. 4. PLANNING COMMISSION.—Within one year of enactment of this Act, the Secretary of the Interior (hereinafter referred to as the "Secretary") shall establish a planning commission for the recreation area (hereinafter referred to as the "Commission").

SEC. 5. The Commission shall be composed of not more than 25 members appointed by the Secretary from recommendations submitted to him by the Governor of the Commonwealth of Massachusetts and the chief executive officers of such local units of government, including counties and municipalities, which have jurisdiction over the recreation area: *Provided*, That the Secretary shall insure in representation, a balance of members who will be responsive to the natural, historical, aesthetic, cultural, and recreation needs of the Boston Harbor area. The Secretary shall designate a member of the Commission to serve as Chairman.

SEC. 6. The Governor of the Commonwealth of Massachusetts may recommend for membership on the Commission, the members of any commission established under state law whose purposes are the same as those outlined in Section 2 of this Act, in lieu of the commission otherwise to be established pursuant to Section 5 of this Act.

SEC. 7. The function of the Commission shall be to develop a plan for the development of the Boston Harbor National Recreation Area.

SEC. 8. The plan shall include, but need not be limited to—

(a) recommendations for the development of public recreational facilities, including but not limited to visitor center, picnic, swimming, and camping facilities;

(b) provision for the preservation and conservation of significant natural resource areas;

(c) provision for expanded access to and between the Boston Harbor Islands for the public, including plans for such shoreline, islands, and water facilities as may be necessary to provide frequent and inexpensive access to the islands;

(d) identification of the units of State or local government which will be responsible for implementing the Plan: *Provided*, That the plan may not propose an expenditure of Federal funds greater than $20,000,000 exclusive of funds available under existing federal programs.

SEC. 9. The Secretary and the heads of other Federal agencies shall cooperate with the Commission in the formulation of the plan upon the request of the Commission and to the extent of available funds.

SEC. 10. (a) Members of the commission who are employees of a State or local government shall serve without additional compensation as such. All other members may, if a commission so votes, receive $50 per diem when actually engaged in the performance of the duties of the commission.

(b) The Secretary shall reimburse all commission members for necessary travel and subsistence expenses incurred by them in the performance of the duties of the commission.

(c) Financial and administrative services (including those related to payment of compensation, budgeting, accounting, financial reporting, personnel, and procurement) shall be provided by the Secretary from the funds appropriated to carry out the provisions of this Act.

(d) The commission shall have the power to appoint and fix the compensation of such additional personnel, including experts and professionals, and for such temporary and intermittent services as may be necessary to carry out their duties, without regard to the provisions of the civil service laws and the Classification Act of 1949, and they shall have the power to hold hearings and administer oaths.

(e) The commission shall act by affirmative voter of a majority thereof. Vacancies

shall be filled in the same manner as the original appointment.

SEC. 11. (a) The commission within six months of being established, shall submit its plan to the Secretary who shall within one hundred and twenty days of the day it is received by him, either approve or disapprove it.

(b) The Secretary shall approve the plan if he finds that (1) the commission has afforded adequate opportunity for public comment on the plan, and such comment was received and considered in the plan or revision as presented to him; (2) State and local units of government identified in the plan as responsible for implementing any portion of its provisions have the necessary legislative authority to do so, and the chief executive officers of the State and local units of government have indicated their commitment to utilize such authority in accordance with the program established by the commission; (3) the plan will preserve the unique scenic, natural, cultural, historic and recreational values of the Boston Harbor area including the Boston Harbor Islands; and (5) the plan includes adequate provisions for expanded and sufficient public access to and between the Boston Harbor Islands to insure expanded public use of the Boston Harbor area and the Boston Harbor Islands.

(c) If the Secretary disapproves the plan, he shall advise the commission of the reasons therefor and convey his recommendations for revision. The revision may be resubmitted to the Secretary for his approval.

(d) Upon approval of the plan, the Secretary shall publish a notice thereof in the Federal Register and shall transmit copies of the plan together with his comments to the President of the Senate and the Speaker of the House of Representatives.

(e) No substantial revision to the plan may be made without the approval of the Secretary.

SEC. 12. Upon approval of the plan, the Secretary shall make grants in the total amount of $20,000,000 to the State or local units of government identified in the approved plan for the recreation area as having responsibility for implementing its provisions. Such grants shall be made upon application of such State or local units of government, shall be supplemental to any other Federal financial assistance for any purpose, and shall be subject to such reasonable terms and conditions as the Secretary deems necessary to effectuate the purposes of this Act.

SEC. 13. There is hereby established a special account in the Treasury of the United States for the purpose of holding moneys to be used for grants, pursuant to section 12 of this Act, to the State or local units of government. There shall be covered into such special account, $20,000,000 from revenues due and payable to the United States under the Outer Continental Shelf Lands Act (67 Stat. 462) as amended and or under the Act of June 4, 1920 (41 Stat. 813) as amended, which would be otherwise credited to miscellaneous receipts of the Treasury. Moneys covered into the account shall be used only for grants made pursuant to Section 12 of this Act and shall be available for expenditure only when appropriated therefor.

SEC. 14. APPROPRIATIONS.—There are authorized to be appropriated to defray the expenses of the Commission established pursuant to Section 3, including salaries and other expenses incident to the preparation of the plan, such sums annually as may be necessary, and for grants to the State and local units of government to implement a recreation area program approved pursuant to Section 11 of this Act, $20,000,000 from the special account created in Section 13 of this Act.

By Mr. HELMS:

Senate Joint Resolution 6. A joint resolution proposing an amendment to the Constitution of the United States guaranteeing the right of life to the unborn; to the Committee on the Judiciary.

HUMAN LIFE AMENDMENT

Mr. HELMS. Mr. President, the highest level of moral culture is that at which the people of a nation recognize and protect the sanctity of innocent human life. All nations in which freedom and justice have governed the affairs of the people have upheld this principle, giving it the highest priority in their laws and customs. Indeed, this principle is the bedrock of Western civilization—the one principle, above all others, which has distinguished free and democratic systems from the barbaric regimes of the past and the totalitarian systems of today.

It is for this reason that abortion—the taking of innocent human life—has, until very recent times, been viewed as violative of this basic principle of the Western tradition. And it is no mere coincidence that the modern practice of abortion first appeared as a policy of government in Nazi and Communist dictatorships, where contempt for the dignity of human life is widely demonstrated.

Two hundred years ago, a great nation was founded on principles of human rights—the right of life, liberty, and the pursuit of happines. These are the lofty principles which appear in one of the most important documents in history, the Declaration of Independence of the United States of America. Three years ago, a dark shadow was cast over this document when the highest tribunal in the land, the Supreme Court, ruled that an unborn child in the womb is not a person entitled to the right to life, and may be deprived of life by the mother and her attending physican. The decision has thrown America into a moral crisis.

Between 1967 and 1970, a number of States adopted liberalized abortion laws. During 1971, 30 State legislatures considered repealing their respective statutes, and every State rejected such proposals. In 1972, Connecticut adopted a more restrictive law, and the New York Legislature repealed its liberal statute—an act which was subsequently vetoed by Governor Rockefeller. Also in 1972, Michigan and North Dakota rejected liberalized abortion by wide margins in popular referendums. Clearly, the American public had refused to continue to accept liberalized abortion and perhaps had even decided that the earlier acceptance of such laws had been premature. However, in 1973, the Supreme Court removed consideration of the issues involved in this national abortion debate from the States and the public by its rulings in Roe against Wade and Doe against Bolton. Because of the absolute position taken by the Court in the abortion cases and its rigid adherence to, and indeed expansion of, that position in its subsequent opinions, it has become obvious that only a constitutional amendment will restore legal protection to unborn children in the United States. Furthermore, only the amendment process will return the issue of abortion to the people for resolution through the ratification procedure.

II. THE SUPREME COURT ABORTION CASES

In Roe against Wade, the Supreme Court invalidated a Texas statute which prohibited abortions except those necessary to save the life of the mother. In its companion decision, Doe against Bolton, the Court similarly invalidated as too restrictive a liberal Georgia statute based upon the Model Penal Code of the American Law Institute. The Georgia statute permitted abortion in circumstances where:

(1) A continuation of the pregnancy would endanger the life of the pregnant woman or would seriously and permanently injure her health; or
(2) The fetus would very likely be born with a grave, permanent, and irremediable mental or physical defect; or
(3) The pregnancy resulted from forcible or statutory rape.

The Court ruled that the ability of the State to regulate abortion depends upon the stage of pregnancy at which such action is taken. During the first 3 months of pregnancy, a State may not interfere with the abortion decision of the woman and her physician. During the next 3 months the State may adopt regulations regarding the abortion procedure, but only in ways related to maternal health. Only during the final 3 months of pregnancy may the State regulate abortion except when such action would interfere with the health of the mother.

The Court then made such distinctions meaningless, as a practical matter, by defining the health of the mother to include her "psychological as well as physical well-being." And by further instructing that the medical judgment of the woman and her physician be made in light of the physical, emotional, psychological, familial, and age factors relevant to the well-being of the mother. In short, the Court's definition of health resulted in abortion on demand being elevated to a constitutional right.

The Court based its decision on the recently articulated constitutional right of privacy. In the majority opinion, Justice Blackmun wrote:

> This right of privacy, whether it be founded in the Fourteenth Amendment's concept of personal liberty and restrictions upon state action, as we feel it is, or . . . in the Ninth Amendment's reservation of rights to the people, is broad enough to encompass a woman's decision whether or not to terminate her pregnancy.

However, aside from the issue of the woman's right to privacy, the other constitutional issue raised in the abortion cases related to the life of the unborn child and its constitutional protection. In determining the constitutional standing of the unborn child, the Court laid great emphasis upon the fact that "no case could be cited that holds that a fetus is a person within the meaning of the 14th amendment." It was further impressed by the use of the word person in the Constitution, finding that "it has application only postnatally" and by its view of prevailing abortion practices during the 19th century. One analysis of the Court's reasoning outlined its holding and commented as follows:

> Since the text of the Constitution itself does not define unborn as persons; and since American anti-abortion laws were once less

restrictive than they became in the latter half of the nineteenth century; and since the courts have not before clearly upheld Fourteenth Amendment rights for the unborn—they do not have such rights.

Curious reasoning for the modern Supreme Court. Has it hesitated, in the areas of civil rights, busing, apportionment and any number of others, to find "rights" not explicitly mentioned in the Constitution; "rights" consistently abridged by any other court? The modern, activist Supreme Court has not hesitated to do all these things.

In part the Court reached its decision denying constitutional protection to the unborn upon its refusal to deal with the issue of the biological humanity of the unborn child. The Court maintained that—

We need not resolve the difficult question of when life begins. When those trained in the respective disciplines of medicine, philosophy, and theology are unable to arrive at any consensus . . .

Doctors, philosophers and theologians, however, are generally agreed that "to be willing to kill what for all we know could be a person is to be willing to kill it if it is a person." This is the essential conclusion of the Supreme Court's abortion cases and as such it foreshadows danger for other groups of human being whose humanity may at a future time be questioned by some advocates.

III. THE NEW LIBERTY UNDER THE 14TH AMENDMENT

The 14th amendment states that—

No State shall deny any person life, liberty, or property without due process of law.

For the past 50 years, the Supreme Court has been broadly interpreting the word liberty contained in that amendment to include the liberties guaranteed by the Bill of Rights. Through the so-called doctrine of incorporation, the Court has taken it upon itself to incorporate nearly all of the Bill of Rights into the word liberty of the due process clause of the 14th amendment. In this manner, the Court has succeeded in nationalizing the Bill of Rights so as to make its provisions applicable to the States.

What is disturbing about the doctrine of incorporation is that is not only undermines federalism and the grand design of the Bill of Rights, but it also permits the Court, on its own authority, to interpret the word liberty in any manner that it chooses. The Court has advanced beyond the stage of interpreting the word liberty in light of the liberties guaranteed by the Bill of Rights to the point where it is now fabricating new liberties not contained in the Constitution.

In the abortion cases, seven Justices on the Court argued that the word liberty in the due process clause establishes a right of privacy and that this includes the right to have an abortion. The basis for this interpretation of the word liberty cannot be inferred from the language of the Constitution. It cannot be inferred from the legislative history of the 14th amendment. It cannot be attributed to the social customs of the American people. The abortion decisions, as a Member of the Court itself declares, are simply an exercise in "raw judicial power."

JUDICIAL CREATION NOT INTERPRETATION

The justices themselves openly admitted that this new right of privacy was a judicial creation. Justice Blackmun wrote:

The Constitution does not explicitly mention any right of privacy.

Justice Douglas stated that—

There is no mention of privacy in our Bill of Rights.

Justice Stewart maintained:

There is no constitutional right of privacy, as such.

In his dissenting opinion, Justice White states:

The Court simply fashions and announces a new constitutional right for pregnant mothers.

Justice Rehnquist also dissented saying:

I have difficulty in concluding, as the Court does, that the right of "privacy" is involved in this case . . . Nor is the "privacy" which the Court finds here even a distant relative of the freedom from searches and seizures protected by the Fourth Amendment to the Constitution which the Court has referred to as embodying a right to privacy.

Many who support this type of judicial activism do so by maintaining that the Constitution is a living document and that the Court must be permitted to interpret it with the widest possible flexibility. To this proposition I respond by agreeing with Senator Sam Ervin that:

When they say the Constitution is a living document, they really mean that the Constitution is dead, and that activist justices as its executors may dispose of its remains as they please. I submit that if the Constitution is, indeed, a living document, its words are binding on those who pledge themselves by oath or affirmation to support it.

One essential problem confronting an activist judiciary is when to stop, once it is admitted that any activity can be viewed as a liberty under the 14th amendment. Did the framers and ratifiers of the 14th amendment intend to deny personhood to the unborn? Such an interpretation flies in the face of the facts. There is not an ounce of evidence to support such an interpretation. Indeed the widespread adoption of State laws regulating and prohibiting abortion and the later judicial interpretations of these statutes as intending to protect the lives of unborn children suggest that the framers of the 14th amendment felt that the provisions of that amendment were consistent with such legislation.

FOURTEENTH AMENDMENT PROTECTS HUMAN BEINGS

The Roe against Wade and Doe against Bolton decisions are not the first time in American legal history that a Supreme Court ruling opposed the social and moral customs of a majority in American society. It was little more than a century ago that the Supreme Court handed down the decision of Dred Scott against Sanford. Arrogating to itself the awesome power of deciding who is a person in our society, the Court ruled that the free descendants of slaves could never be citizens and that slaves were not even persons under the law.

Not every Member of the Court accepted this legal fiction; and Justice Benjamin Curtis deeply resented the attempt by the Court to impose an interpretation of the Constitution that was derived from nonlegal considerations. He stated that:

Political reasons have not the requisite certainty to afford rules of judicial interpretation. They are different in the same men at different times . . . we are under the government of individual men, who for the time being have power to deduce what the Constitution is, according to their own views of what it ought to mean.

After much bloodshed and death, the Dred Scott case was finally reversed by the 14th amendment. No one would have dreamed in 1868 that the life and liberty guaranteed to all persons by the due process clause of the 14th amendment meant the right to have an abortion. Similarly, no one would have imagined that an amendment designed to protect an oppressed minority in 1868 would be used in 1973 to remove another minority from the protection of the law.

Professor Joseph Witherspoon has observed that the intended reach of the 13th and 14th amendments would include the unborn child.

The legislative history of these two amendments fully demonstrates that the central purpose of their framers was, indeed, to protect every class of human beings, including unborn children, with respect to their rights to life, liberty, and the pursuit of happiness. They intended to establish a definition or concept of human beings based upon biological reality and common sense or scientific truth. In their view, whoever is a human being in fact is a human being or person in law protected by these two amendments.

The concept of person used in the Due Process and Equal Protection Clauses and the concept of human being embodied implicitly in the Thirteenth Amendment were precisely chosen or focused upon by these framers for the purpose of establishing this definition of the concept of person or human being, the two terms being thereafter wholly interchangeable with each other. It was their purpose by this definition to take away the power that had been exercised by legislatures, courts, chief executives, and administrative agencies in the past of treating or defining as a nonhuman being one who is a human being in fact or reality and by this sophisticated technique of legal devaluation divesting that human being of legislative and constitutonal protections designed for human beings.

Clearly the intent of these amendments is to protect those who are human beings in reality against the attempts to define away their personhood through legal abstraction or other techniques. The legislators who adopted these amendments had uncontradicted evidence before them that the fetus was indede a human being. In 1868, the very year in which the 14th amendment was submitted to the States for ratification, Dr. Horatio Storer wrote in his book, "Criminal Abortion," that—

Physicians have now arrived at the unanimous opinion, that the foetus in utero is alive from the very moment of conception . . . (T)he willful killing of a human being, at any stage of its existence, is murder . . . (A)bortion is, in reality, a crime against the infant, its mother, the family circle, and society.

Moreover, the abortion cases are not only a subversion of the Constitution,

they are also a subversion of our democratic system of government. They represent the Court's disregard for the customs of the American people and its willingness to impose its own view of wise social policy upon the people of this country, the States, and even the Congress. Abortion is not a social custom of the American people, nor has it ever been. The right to an abortion has never been held to be contained within the concept of ordered liberty implicit in the American tradition of justice.

IV. THE RADICALISM OF THE ABORTION DECISIONS AND THEIR AFTERMATH

Justice Byron White, in his dissent against the abortion decisions, described the Court's action as "raw judicial power." An analysis of the firmly established precedents overturned and the method used by the Court in accomplishing this end makes clear the full force of Justice White's statement. The sweeping language of the abortion decisions means that human life has less protection in the United States today than in any country in the Western World.

Western man has opposed abortion as far back as 1728 B.C., when the Code of Hammurabi was promulgated. The Oath of Hippocrites, which we trace to ancient Greece, requires the doctor who is entering the practice of medicine to swear that, "I will not give to a woman a pessary to produce abortion." The Mosaic Law of the Old Testament exacts a severe punishment for someone who injures a pregnant woman and causes her to lose her child. The contemporary writings of the early Christian communities, such as the Teaching of 12 Apostles, states that—

> You shall not slay the child by abortions. You shall not kill what is generated.

Early Christian writers such as Clement of Alexandria, Tertullian, Cyprian, John Chrysostom, Jerome, and Augustine all condemned abortion.

Although historically there has not always been universal agreement regarding the necessity to protect unborn human life from abortion, there has definitely been an emerging moral imperative to do so beginning with the codes of Hammurabi, Moses, and Hippocrites. True, the Greco-Roman world was not unfamiliar with abortion. But neither was it unfamiliar with slavery, infanticide, torture, tyranny, and other similar perversions of human nature. With the emergence of the Judeo-Christian view of the nature, value and equality of each person, society strongly embraced the notion that the unborn person in the womb must be protected. Prof. John Noonan, in his comprehensive analysis of the history of abortion describes this attempt to protect unborn human life as "an almost absolute value in history." It is not an exaggeration to view the historical development of society's treatment of abortion as one toward greater protection of the child as society's understanding of medicine and biology as well as its regard for the value and equality of each individual increased.

Significant contemporary moral theologians continue this tradition of opposition to abortion.

For example, Karl Barth in his "Church Dogmatics" for the Evangelical Church writes:

> The unborn child is from the very first a child. It is still developing and has no independent life. But it is a man and not a thing, not a mere part of the mother's body . . . He who destroys germinating life kills a man.

And Rev. Dietrich Bonhoeffer defended the sanctity of human life amidst the turmoil of Nazi Germany in his book, "Ethics":

> Destruction of the embryo in the mother's womb is a violation of the right to live which God has bestowed upon this nascent life. To raise the question whether we are here concerned already with a human being or not is merely to confuse the issue. The simple fact is that God certainly intended to create a human being and that this nascent human being has been deliberately deprived of his life. And that is nothing but murder.

In his opinion, Justice Blackmun analyzed English common law and statutory law as well as American case law and statutory law. Detailed and comprehensive critiques of Mr. Justice Blackmun's reading of history have been made by many constitutional scholars and I do not intend to repeat them at length here. The underlining thrust of the Court's argument is that abortion was a right in England beginning with the 14th century and in America during the 19th century and as such is so fundamentally established by social and legal custom as to be somehow contained in the Constitution. After a lengthy examination of the Court's reasoning, Robert Destro, writing in the California Law Review, states that abortion "was never a right recognized by the common law, it cannot be considered to be a ninth amendment right retained by the people. The newly created right to procure an abortion is the creature of the substantive due process arguments and erroneous interpretations of history relied upon by the Court in Roe; it is not a right which may be characterized as 'so rooted in the traditions and conscience of our people to be ranked as fundamental.'" Elsewhere, Mr. Destro writes:

> The cases do not support the Court's interpretation. The Court's uncritical acceptance of an advocate's interpretation of the common law only served to confuse the issues and to rest an important constitutional holding on an erroneous historical foundation.

EARLY AMERICAN STATUTES

The first modern statute in Anglo-American law prohibiting abortion was the English Act of 1803. The first American statutes against abortion appeared in the early 19th century: Alabama, 1841; Arkansas, 1838; Connecticut, 1821; Illinois, 1827; Indiana, 1835; Iowa, 1839; the Kingdom of Hawaii, 1850; Maine, 1840; Massachusetts, 1845; New Hampshire, 1848; New York, 1828; Vermont, 1846; Virginia, 1848. By the end of the 19th century, almost every State has adopted statutes regulating abortion. Although it was alleged by Justice Blackmun in his opinion in Wade that the primary reason for such regulation was the protection of the mother, a close examination leads one to agree with Prof. Robert Byrn "that a major purpose—of these statutes—was the protection of unborn children without regard to age." Among these early statutes, the one adopted by Colorado was not untypical. In 1872, the Supreme Court of Colorado held that its abortion statute was "intended specially to protect the mother and her unborn child from operations calculated and directed to the destruction of the one and the inevitable injury of the other."

Many of these early statutes were adopted as a result of the reform activity of medical societies eager to see the law reflect medical knowledge concerning the unborn child. In 1859, the American Medical Association spoke out against abortion as the "unwarrantable destruction of human life." In 1867, the New York Medical Society condemned abortion as "murder" regardless of the stage of gestation when the operation was performed.

On January 22, 1973, the people of all 50 States had statutes in force that regulated abortion. All of them, either in whole or in part, have suddenly become violations of the Constitution. A decision of the Court declaring an end to freedom of the press or the free election of the people's representatives would have as much basis in our legal heritage as the abortion decisions.

Some of the most notable constitutional scholars of the country have expressed shock and dismay regarding the reasoning employed by the Court in the abortion decisions. Prof. John Noonan of the University of California, Berkeley, has stated that—

> Nothing in long-established precedent, nothing in the traditions of our people, nothing in history justified the majority's interpretation of liberty.

John Hart Ely, Professor of Constitutional Law at the Harvard Law School, has declared that Roe against Wade is a "very bad decision. It is bad because it is bad constitutional law, or rather because it is not constitutional law and gives almost no sense of an obligation to try to be." Prof. Harry Wellington, Phelps Professor of Law at the Yale Law School, rightly insists that the Supreme Court had "no such mandate" from the Constitution to establish this peculiar "concept of liberty in the 14th amendment." Prof. Charles Rice of the Notre Dame Law School has stated that Roe against Wade is "the most outrageous decision ever handed down by the Court in its entire history."

Prof. Robert Byrn of the Fordham University Law School is of the view that the Court's decision was premised on "multiple and profound misapprehensions of law and history." And Prof. Archibald Cox of the Harvard Law School finds that the Court failed "to lift the ruling above the level of a political judgment." Prof. Joseph Witherspoon of the University of Texas Law School has stated that the abortion cases "are unquestionably the most erroneous decisions in the history of constitutional adjudication by the Supreme Court."

DANFORTH CASE A BLOW TO FAMILIES

The abortion cases have also had a profound and radical influence upon decisions of the Federal and State courts in such areas as the marital relationship, parental rights, state and local public welfare programs, and the congressional appropriation power.

In Planned Parenthood of Missouri against Danforth, the Supreme Court recently struck down as unconstitutional a Missouri law which required that the consent of the husband be obtained before his wife could undergo an abortion unless the operation was necessary to save her life and that the consent of an unmarried minor's parents be obtained before she could receive an abortion. The Court made clear that it considered Danforth "a logical and anticipated corollary to Roe against Wade and Doe against Bolton."

In deciding that the State may not constitutionally require the consent of the spouse or a parent as a legal condition for obtaining an abortion, the Court in effect ruled that the right of the mother to abort her child is superior to that of the child's right to life, the right of the father to protect his child and that of the State to protect human life. Indeed, the decision in Danforth would suggest that the right of the woman to take the life of her unborn child through abortion is a constitutionally superior right to any other interest or combination of interests. Prof. Francis Canavan summarized the Court's holding as follows:

The only admissible object of public policy, in the Court's jurisprudence, is protection of the mother's untrammeled right to decide on the life or death of her child. The law may show no bias in favor of life, even if the male parent wants to preserve it, but must zealously safeguard the female parent's right to kill it. But this legal indifference is a specious neutrality: a legal system that refuses to have, or is not allowed to have, a bias in favor of life winds up with a bias against it.

The Court's decision, however, reached beyond the issue of abortion and signaled a radical departure from traditional notions regarding the nature of the family. It marked the beginning of what could become a grave assault upon existing legal protection of marriage and the family.

The family as an independent institution within society, which in the past the State has sought to protect, simply was ignored by the Court in dealing with an issue which could only have a dramatic effect upon that relationship. In the Court's review, "(n)othing was involved but a conflict between individuals: wife against husband, unmarried minor against parent." Citing Eisenstadt against Baird, the Court stated that:

The marital couple is not an independent entity with a mind and heart of its own, but an association of two individuals each with a separate intellectual and emotional makeup. If the right of privacy means anything, it is the right of the *individual*, married or single, to be free from unwarranted governmental intrusion into matters so fundamentally affecting a person as the decision whether to bear or beget a child.

This new constitutional standard leaves great doubt as to the constitutionality of much of the existing State regulation designed for the protection of the family. Indeed it is not unreasonable after Danforth to wonder whether the family does have continued legal existence, at least in those situations where an individual's action is sought to be limited to preserve the family unit. The treatment of marriage by the Court reflects a philosophy on the part of the Justices which views society as fundamentally atomistic. The radical autonomy and individualism of each citizen has displaced every other social institution except the power of the State.

The Court's opinion in Danforth, however, leaves unclear whether the right of the mother to bear her child is of equal superiority to her right of abortion. By substantially weakening the right of those who have traditionally protected the right to life in society, the Court's decision in Danforth when viewed in light of its prior holding on the abortion issue amounts to a questionable victory for individual liberty. In Roe against Wade, Justice Blackmun wrote:

Appellants and some *amici* argue that the woman's right is absolute and that she is entitled to terminate her pregnancy at whatever time, in whatever way, and for whatever reason she alone chooses. With this we do not agree . . . In fact, it is not clear to us that the claim asserted by some *amici* that one has an unlimited right to do with one's body as one pleases bears a close relationship to the right of privacy previously articulated in the Court's decision. The Court has refused to recognize an unlimited right to this kind in the past . . . *Buck* v. *Bell*, 272 U.S. 200 (1927).

The case relied upon by the Court in maintaining that the individual's freedom to control her own body is not an absolute right involved a young girl named Carrie Buck whom the State required to be sterilized under a law requiring the mandatory sterilization of mentally defective persons. The Supreme Court ruled that the State could require the girl's sterilization while Justice Oliver Wendell Holmes observed that in her family's situation "(t)hree generations of imbeciles are enough." The Court's reliance upon Buck surprised many constitutional scholars who thought that the opinion's viability as constitutional principle had long ago ended. This revival of the constitutionality of a State's use of coercive methods of birth control to implement a eugenics policy and reduce its public welfare expenditures perhaps foreshadows increased attempts by the State to mandate population controls.

The Court's opinion in Danforth results in the contradictory situation where the husband's objection to his wife's intended abortion is of no legal significance due to the current constitutional holding that the husband does not possess an interest in his unborn child and the child does not possess a right to life. Yet, in the situation where the husband does not agree with his wife's refusal to permit a blood transfusion to save the unborn child's life, he may petition the court to order such a transfusion on the basis of his interest in the child and supposedly also on the child's right to life.

FEDERAL COURTS CLAIM APPROPRIATION POWER

The right of the State to limit payments under its medicaid program to medically necessary abortions was not at issue in the Roe against Wade and Doe against Bolton cases. However, since those cases were decided, certain lower Federal courts have held that such restrictions are unlawful. These courts have in part held that the equal protection clause of the 14th amendment requires States which participate in the medcaid program to pay for abortions that are not medically necessary. The basis of the courts' rulings is that the State violates the equal protection clause by discriminatorily dividing pregnant women into two classes and then treating each class differently. The decisions rest upon a decision by the court that there is no difference between the State's financing medically necessary procedures and financing those which are elective and nontherapeutic. The courts' decisions amount to a determination that if any medical assistance for pregnancy is to be paid, then all medical assistance—even that which is not necessary—must also be paid. These decisions rest on a misapplication of the equal protection clause. That constitutional principle does not require that people in different situations be treated similarly. Treating welfare recipients who require medical assistance differently than those who want unnecessary treatment does not amount to a violation of the equal protection of the laws.

These cases deal with two broad groups of patients: those who require medical treatment and those who simply request treatment that is not medically necessary. The women seeking abortions form small segments of each group; and the State action in denying medical treatment for nontheraputic abortions is a result of a policy determination which applies equally to all recipients, including those requesting cosmetic surgery. Three of those cases are currently pending before the Supreme Court for a final determination of this issue.

During 1976, the Congress adopted a limitation on the use of Federal funds to pay for the performance of abortions under public welfare programs financed through the Department of Labor and the Department of Health, Education, and Welfare Appropriations Act. This limitation known as the Hyde amendment resulted from a compromise of the proposal originally submitted by Representative Hyde and stated that:

None of the funds contained in this Act shall be used to perform abortions except where the life of the mother would be endangered if the fetus were carried to term.

Immediately upon the Hyde amendment becoming law, an injunction was sought and granted in Federal district court prohibiting its enforcement. Although suits seeking to enjoin the Hyde amendment were filed in three Federal district courts, only one granted a preliminary injunction barring enforcement of the limitation.

Judge Dooling of the U.S. District Court for the Eastern District of New York entered an order enjoining the application of the Hyde amendment and mandated the expenditure of Federal matching medicaid funds for nonmedically necessary abortions just as before the enactment of the Hyde amendment. Judge Dooling ruled that the Hyde amendment amounted to an unconstitutional denial of the equal protection of the laws to women seeking elective abortions. Although his memorandum accompanying the injunction order was less than clear in specifically anchoring the decision to constitutional principle and Supreme Court holdings, Judge Dooling did cite the prior decision of his court, Klein against Nassau County Medical Center, in which he took part. There, the New York State Commissioner of Social Services ruled that "elective abortions not medically indicated" were not to be covered through New York's welfare program covered by medicaid. In Klein, the Federal district court ruled that such a restriction was unconstitutional. This reliance upon Klein signified a confusion of the regulatory action of a State commissioner with an appropriation of Congress. The Hyde amendment was incorporated into a 1 year appropriations measure.

It did not adjudicate, nor did it regulate. It did not prohibit any act or activity. It simply refused to appropriate money to be used for a specific purpose. To equate the appropriation power of Congress with an administrative agency's regulation is to brush away the central issue presented by the case.

Senator James Buckley, Representative HENRY HYDE and I intervened as party defendants to the New York suit on the grounds that as Members of Congress who voted for this limitation, we sought to protect this legislation from judicial nullification and to protect our interests as citizen-taxpayers. Like the Department of Justice, representing the Department of Health, Education, and Welfare, we argued essentially that the plaintiffs did not have standing to bring the suit since they could not show that the State welfare program would discontinue financing the performance of nontherapeutic abortions in the absence of Federal reimbursement. Specifically, the State of New York was already under a Federal court order to provide such funding whether or not Federal funds were available. However, we entered the case to put forward the independent argument that article I, section 9, clause 7 of the Constitution grants to Congress the exclusive power of appropriation and that a judicial invalidation of the Hyde amendment would amount to a judicial appropriation of funds in violation of the Constitution. Such an order could only amount to an unlawful attempt to appropriate funds from the Treasury which could not be sustained. We argued that in adopting the Hyde amendment:

> Congress made one inescapable fact absolutely clear: It was not appropriating, it refused to appropriate, any Federal funds for elective abortions. In brief, there has not been, and there is not now, any appropriation for the period October 1, 1976 through September 30, 1977, or funds for elective, nonmedically dictated abortions. It is beyond the competence of any court, State or Federal, to sit in judgment respecting the wisdom of Congress when Congress refuses to make appropriations.

It was also evident to us that if a Federal court could judicially appropriate money to subsidize a woman's right to have a nontherapeutic abortion, then the Federal judiciary would soon be asked to require that other constitutional rights also be subsidized by the Federal Government. A decision invalidating the Hyde amendment could only open the door to a radically new function for the Federal judiciary and, as such, would constitute a substantial injury to the authority of Congress and the separation of powers doctrine.

A NEW ABORTION MENTALITY

Recently, the impact of these court decisions was brought sharply into focus by a report by the District of Columbia that abortions among residents during 1975 in that city for the first time exceeded births. And that approximately 85 percent of those abortions were performed at Government expense through either the city's free public hospital or the medicaid program.

Dr. Louis Hellman of the Department of Health, Education, and Welfare has estimated that the Department is currently financing between 250,000 and 300,000 abortions annually at a cost of $45 to $50 million. Elsewhere, it has been estimated that about 275,000 unmarried teenagers obtained abortions during 1974, many of which were financed through the medicaid program. The Center for Disease Control in Atlanta reports that the national abortion ratio increased from 6.3 per 1,000 live births in 1969 to 241.6 in 1974, the latest year for which national figures are available.

One major consequence of the abortion cases is that the practice of abortion has shifted from one used essentially as a last resort, in the so-called hard cases, to a primary means of family planning. In fact, certain studies indicate that abortion on demand will replace other methods of family planning. For example, a study of the abortion trends at Harlem Hospital Center in New York City by members of its own Obstetrics and Gynecology Department found that in the years of 1962 through 1969, the number of abortions declined from 1,581 in 1962 to only 507 in 1969, the year before the implementation of the liberalized New York abortion statute. During the same time period, the number of family planning visits made by residents of the area increased from none in 1962 to 15,982 in 1969. The study itself concluded that "as family planning services expanded in our hospital and area, the number and severity of abortion cases declined significantly." Another study of abortion in Hawaii, the first State to adopt abortion on demand, found that most of the women obtaining abortions under the new statute "were using it as a primary means of birth control, rather than as a backup to failed birth control." This dramatic upsurge in the number of abortions indicates the emergence of a new abortion mentality. Elsewhere, it has been suggested that this "abortion mentality is a dangerous communicable disease—one that spreads throughout a country once the abortion laws have been liberalized." The symptoms of this social disorder consist of a swift increase in the abortion rate, the acceptance of abortion as a commonplace medical procedure of no more gravity than other means of family planning, and finally the subsequent decline in respect for human life. This new abortion epidemic is nothing less than "a revolution against the judgment of generations."

Prof. John Noonan has outlined the principal consequences of the abortion cases as follows:

> First, the subversion of the structure of the family in that a father now has no protectable legal interest in its unborn offspring; second, the mandated public funding of abortion; so it is unlikely that a national health bill can be enacted, which constitutionally excludes abortion from the surgical services to be federally financed; and third, and worst of all, the unmaking of human beings, the acceptance of the principle that the law can say who is not a human being. All of our constitutional liberties are nothing if we can be defined out of the human species.

V. A CONSTITUTIONAL AMENDMENT IS NECESSARY

Congress can respond to the abortion cases in one of three ways. Article III, section 2, of the Constitution authorizes Congress to regulate the jurisdiction of all Federal courts, including the Supreme Court. By ordinary legislative action, Congress could, therefore, withdraw Federal jurisdiction in all cases involving abortion statutes and allow State supreme courts to be the courts of final jurisdiction.

However, this would only provide an incomplete remedy, since all prior Federal court decisions would remain in force as precedent; and some State courts could be expected to adopt the reasoning of the Supreme Court in its abortion decisions and, therefore, thwart the primary reason for withdrawing Federal jurisdiction. Still, this proposal should be seriously considered as a practical first step toward protecting human life.

Congress also has the power to enforce the 14th amendment by appropriate legislation.

The suggestion has been made that Congress should, therefore, reverse the abortion decisions simply by enacting a statute defining the word "person" in the 14th amendment to include the child in the womb. Again, this would be only a partial remedy and would possibly be subject to judicial veto. The Supreme Court, for example, might rule that such a statute was unconstitutional on the theory that a child in the womb was inherently incapable of personhood under the 14th amendment.

For these reasons, a constitutional remedy through the amendment process is the only course of action to provide the fullest protection of human life. It is a more difficult and time-consuming method of redress, but it has the virtue of ending all doubt about the constitutional issues of personhood and abortion. It would allow the American people to

declare for themselves their opposition to the widespread practice of abortion, and their dedication to the principles of "life, liberty, and the pursuit of happiness."

Following our Bicentennial celebrations, nothing would be more appropriate than a 27th amendment to our Constitution declaring our allegiance to the ideal of the sanctity of human life promulgated 200 years ago in our Declaration of Independence.

VI. WHICH AMENDMENT IS NECESSARY?

A constitutional amendment must be worded, like the Constitution itself, in terms of general principles. It is not a criminal code and should not be drafted in the detailed language of such a code in anticipation of every possible evasion or situation.

With this consideration in mind, I have proposed a constitutional amendment which provides as follows:

Section 1. With respect to the rights to life guaranteed in this Constitution, every human being, subject to the jurisdiction of the United States, or of any State, shall be deemed, from the moment of fertilization, to be a person and entitled to the right to life.

Section 2. Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

A number of other proposed constitutional amendments attempting to restore the right to life have been offered to remedy the Supreme Court abortion decisions. I, myself, offered amendments during the 93d and 94th Congresses. Since then, the Senate Subcommittee on Constitutional Amendemnts and the House Subcommittee on Civil and Constitutional Rights have held extensive hearings on many aspects of this complicated problem. I testified before the Senate subcommittee and spoke out on several occasions indicating that I was putting forth my amendments to stimulate discussion and criticism, and that they were not necessarily final drafts. After much reflection upon the differing criticisms that were brought out against the wording of my original proposal and against that of other amendments submitted, I am now persuaded that this amendment is a great improvement over every other proposal that has been considered. I firmly believe that it is an amendment which all Americans can unite behind in the common effort to end the destruction of innocent human life in the United States.

Today the central and primary issue threatening the absolute sanctity of human life is abortion. However, one should not expect that by the time the long process of ratification is completed, abortion will remain the central threat to the sanctity of human life. It is very possible that besides abortion, euthanasia, eugenics, human experimentation, and other problems resulting from future scientific developments will equal or surpass abortion as a threat to human life. Therefore, it is necessary that whatever amendment is adopted be one that protects human life in the most complete sense and not one limited exclusively to the problem of abortion.

STATES' RIGHTS AMENDMENT DEFICIENT

It has been suggested that a constitutional amendment which removes Federal court jurisdiction from the issue of abortion and allows the States to be the final arbiter on the subject is the most desirable resolution of the abortion controversy. Such a proposal is deficient in several aspects. Essentially, such an amendment will not answer the central issue of the abortion debate—are we as a nation going to legally protect unborn human life? The so-called States' rights amendment establishes as a constitutional principle that the intentional destruction of innocent human life is legally proper since it would permit the adoption of State statutes consistent with the Supreme Court decisions. This is not a compromise of the prolife and proabortion positions. It is in fact the adoption of the proabortion position. Second, such an amendment is not broad enough to include other problems concerning the value of human life in American society which may indeed surpass abortion by the time such an amendment is ratified.

On the surface, it would appear to be an attractive and easy solution to turn this problem back to the States. Yet, it is simply wrong in principle to subject the right to life of innocent human beings to the variant determinations of different legislatures. The right of innocent life is inviolable. And it is indivisble. Moreover, the situation today is not the same situation as before the Supreme Court acted. Despite the due process and equal protection clauses of the 14th amendment—which would seem on their face to protect the lives of all persons—the Court attacked the rights of the unborn by narrowly defining "person." The States' rights amendment does not disturb the Supreme Court's decree that the unborn child is a nonperson.

Since the States' rights amendment does not overrule the Supreme Court rationale that the child in the womb is a nonperson, there is nothing in such an amendment to prohibit a State court from adopting the reasoning of the Supreme Court to reach the same conclusion. It is likely that a State court would consider itself at least implicitly bound by that Supreme Court interpretation of what due process means.

The State court, therefore, would conclude that the child in the womb is a nonperson under the due process clause of the State constitution, just as he is now a nonperson under the 14th amendment. Since the unborn child is a nonperson, the State court might very well conclude that a State law restricting abortion would infringe the mother's right of privacy and would therefore be invalid as a violation of the due process clause of the State constitution.

Furthermore, State supreme courts are under an obligation to enforce the U.S. Constitution and the principles of constitutional law articulated by the Supreme Court. Article VI, clause 2 of the Constitution states that:

This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby; any Thing in the Constitution or Laws of any State to the Contrary notwithstanding.

The supremacy clause mandates that State courts follow not only the Constitution, but its meaning as interpreted by the U.S. Supreme Court. Often State courts have even determined that they are bound by the decisions of lower Federal courts as well. Even when a State court rules that it need not follow the ruling of a Federal court, it may still give such opinions some consideration as legal authority. Often Federal court rulings will be found "persuasive and entitled to great weight."

Since a States' rights amendment would have no effect upon prior decisions of the Supreme Court and Federal judiciary, the rules outlined in Roe against Wade and Doe against Bolton would be binding under the supremacy clause upon State courts. Although the State court of highest jurisdiction would be the final arbiter of this matter and appeal could not be taken to the U.S. Supreme Court, a State court would still be under compelling pressure to abide by the rulings in the Roe and Doe decisions.

Those who favor abortion would have every reason to support the States' rights amendment. Those who believe that the killing of the unborn is incompatible with our constitutional freedoms would be bitterly disappointed if the amendment became law. By failing to overturn the truncated definition of person set up in Wade, such an amendment would leave the Supreme Court's doctrine permanently engrafted in our constitutional law, with its implications against the lives of the unborn, the aged, and the incapacitated.

No decision of the Supreme Court has so profoundly affected American society as have the abortion cases since the Dred Scott case. And just as American society refused to exist as half slave and half free, it will not accept the position that it exist where the sanctity of human life is protected in some States and threatened in others. The American people will not accept a second Missouri Compromise in regard to the right to life.

VII. PERSONHOOD

The essential purpose of any human life amendment is to insure that all human beings enjoy the protection of the right to life. This can be accomplished by establishing the principle that all human beings are considered "persons" with respect to the right of life under the protective due process clause of the fifth and 14th amendments.

The Supreme Court itself directs us to this point in Roe against Wade where the Court states:

The appellee and certain amici argue that the fetus is a "person" within the language and meaning of the Fourteenth Amendment. In support of this they outline at length and in detail the well-known facts of fetal development. If this suggestion of personhood

is established, the appellant's case, of course, collapses, for the fetus' right to life is then guaranteed specifically by the amendment.

If personhood is established by a constitutional amendment, then the Supreme Court itself admits that the right to life of the unborn child will be protected.

It is important that the beginning of life, and therefore the beginning of the constitutional protection of that life, be defined with precision and clarity by any proposed amendments. Our scientific knowledge today is sufficient to provide such a definition. To be consistent with that knowledge, the amendment language must not be so loose or general that the way is opened for arguments that the period of protected life should be shortened for the sake of convenience. On the other hand, it is not necessary to encumber the unborn child with all of the constitutional rights of an adult. The human life amendment's essential intended effect is limited to the right to life.

The substance of my amendment is that is makes the unborn child a person only "with respect to the right to life guaranteed in this Constitution." Thus, only the right to life becomes a constitutional right. Other rights could be assigned to the unborn by legislation or judicial interpretation, as seen by the large body of law on inheritance and tort claims. But such laws are not mandated by my amendment. The amendment would allow for the further development of laws consistent with pre-Wade judicial thinking. For example, Dean William Prosser summerized the tort law regarding the unborn child's right to recover for an injury sustained before birth as follows:

So far as duty is concerned, if existence at the time is necessary, medical authority has recognized long since that the child is in existence from the moment of conception, and for many purposes its existence is recognized by the law . . . So far as causation is concerned, there will certainly be cases in which there are difficulties of proof, but they are no more frequent, and the difficulties are no greater, than as to many other medical problems. All writers who have discussed the problem have joined in condemning the old rule, in maintaining that the unborn child in the path of an automobile is as much a person in the street as the mother, and in urging that recovery should be allowed upon proper proof.

At the same time, it is clear that an unborn child under my amendment would not be subject to census, registration, passports, taxation, and other such requirements imposed upon residents of the United States. Our laws take notice of the age of citizens and make reasonable distinctions based upon such considerations. For example, broad distinction is made between adults and minors; and even minors are subdivided according to mental responsibility. Yet, all enjoy the fundamental right to life which is just as reasonably accorded to the born and the not yet born.

VIII. WHEN HUMAN LIFE BEGINS

My amendment clearly states that life begins at the moment of fertilization. The word "fertilization" has been specifically employed because it is more precise than the word "conception," which in common parlance is often used interchangeably. "Conception," however, is a word whose use and associations antedate our scientific knowledge. In certain proabortion circles, an effort has been made to equate conception with implantation. The Court itself refers sympathetically to "new embryological data that purport to indicate that conception is a 'process' over time, rather than an event." To stop early as well as late abortions, the amendment's protection must apply from the moment of fertilization. It is true, of course, that many fertilized ova are never implanted. But rather than suggest that "implantation" be adopted as the constitutional standard, this fact is only evidence of the reality that a human being can die at any time in his lifespan.

In seeking to protect human life, the amendment language must relate to our present scientific knowledge. Although the amendment's protection is in part dependent upon the accepted findings of science, the determination of when human life should be constitutionally protected cannot be left to depend totally upon a scientific judgment.

In arriving at the determination of when human life should be legally safeguarded, the word "fertilization" is the most scientific and unambiguous one that can be employed while still maintaining the greatest legal protection. The biological evidence clearly establishes that the fertilization of the egg is the beginning of human development. Gideon Dodds writes in his textbook, "The Essentials of Human Embryology" that the "fertilized egg is the beginning of a new individual." Jan Langman states in his book, "Medical Embryology," that "the development of a human being begins with fertilization."

The fertilized ovum is genetically complete and independent of the mother. Prof. Jerome LeJeune observes in "Ethical Issues in Human Genetics" that "if a fertilized egg is not by itself a full human being, it could never become a man, because something would have to be added to it, and we know that does not happen." The human life that begins at fertilization is a continuum, unbroken at any point by radical change. William James Hamilton states in his textbook, "Human Embryology," that "there are no essential differences between prenatal and postnatal development; the former is more rapid and results in more striking changes in shape and proportions; but in both, the basic mechanisms are very similar if not identical."

The word "moment" in the amendment makes it clear that a given point in time is legally established. If the language of the amendment should allow for a "process of development" standard, then an interpretation of that language could set any point in that process, such as implantation, "viability," or even birth, as the point at which the protection of life begins. Indeed a court implementing that language would be forced to judicially determine at what stage in the process of development legal protection would be granted. It is simply not enough to protect each person at every state of his biological development unless we know with certainty at what stage human development begins.

IX. ABORTION TO SAVE THE LIFE OF THE MOTHER

Once the principle of the primacy of life of every human being has been established, the problem will arise of the so-called hard cases in which pregnancy places the life of the mother in danger. Today, such cases exist as medical rarities. Although convincing evidence indicates that abortion is no longer medically required in these cases, it would be unfortunate to amend the Constitution in such a way that a doctor attempting to care for his patients is placed in legal jeopardy. It would also be unfortunate to amend the Constitution in such a way that an exception clause to provide for these hard cases would allow widespread abuse under the cover of law. The resolution of this problem has been a principal aim of my amendment.

My amendment contains no specific exception clause because such a clause is not necessary. As the amendment is presently drafted, the difficult cases can be handled under traditional concepts of due process and equal protection of the laws.

State criminal laws have long recognized the legal principles of self-defense and necessity or choice-of-evils without their specific incorporation into the Constitution. Certainly, they form a part of the American legal tradition which predates the Constitution itself. At times these doctrines have been held to be contained within the due process clause of the Constitution; but the silence of the Constitution on these principles has not detracted from their vitality. There is no reason to suppose that a similar resolution of the problem of procedures to save the life of the mother would not be developed by the States.

Although this amendment definitely prohibits abortions in every case where the mother's life is not at stake, it is not intended to invalidate future laws in the States which permit procedures to save the life of the mother.

This amendment leaves the difficult cases to be determined by an even-handed application by the courts and State legislatures of constitutional principles applying to all human beings. It establishes the basic life principle, that the destruction of the child in the womb is a violation of every human being's constitutional right to life. The amendment would, however, insure equal protection. Nor is it intended to prevent State legislatures and courts reviewing State laws from continuing to regard abortions to save the life of the mother as a matter of self-defense and therefore legally justifiable according to the general principles of self-defense that apply to all human beings. The amendment takes cognizance of substantive due process as it has been developed in Anglo-Saxon jurisprudence. Although the amendment does not encourage exceptions, it admits to exceptions in the light of legal precedents, such as "the doctrine of necessity," established in rare and unusual circumstances.

Not every abortion, of course, results in the death of the child; controversies are in the papers daily about the efforts

or lack of efforts to insure the survivability of such children outside the womb. For example, a recent survey of major medical centers by the Washington Post discloses that premature babies weighing under 2 pounds at birth now have over a 60-percent chance of survival.

The University of Colorado Medical Center reports that 66 percent of the babies born there at 27 to 28 weeks of age are surviving as compared with 2 years ago when the survival rate was only 10 percent.

Dr. Watson Bowes, chief of obstetrics and gynecology at the Colorado Center attributes this development to a change in attitude on the part of doctors caring for these infants. In the past, he said:

> We felt there was so little chance of a baby (so small) surviving that we didn't put any effort into it. These were cases that we felt we were going to (in effect) abort. (Today,) we are being more aggressive. We're doing things for these tiny, little babies that we've always done for the bigger babies.

Reports from other hospitals confirm that this apparent breakthrough in survival rates for premature infants is not the result of new developments in medical technology, but "because obstetricians are beginning to realize that they can survive, and are expending the same effort to save these tiny babies that they expend to save an infant born at full term." Although this study is certainly not conclusive, it does strongly suggest that the medical evidence relied upon by the Supreme Court in its abortion cases is not out of date.

Indeed, this new ability to save such premature babies leads to the further question of whether the abortion procedure must terminate a pregnancy by causing the death of the child. Dr. Andre Hellegers, director of the Kennedy Institute for the Study of Human Reproduction and Bio-Ethics, raises the central question regarding later term abortions:

> In the process of abortion do you subsume that the mother has a right to the death of the fetus; or is abortion only to be seen as a process of separating the mother and the fetus in the resolution of a conflict of interest.

My amendment would be consistent with State laws permitting the premature termination of a pregnancy where the life of the unborn child is not threatened by such a procedure.

ABORTION AND MATERNAL DEATH

Opposition to the Human Life Amendment often rests upon the assupmtion that anything less than abortion on demand will result in an epidemic of abortion-related maternal deaths.

For example, estimates that 5,000 to 10,000 women died each year from illegal abortion before the abortion cases are frequent. However, studies of the problem have reached different conclusions.

Dr. Alex Barno reported in a study of Minnesota cases that if the 10,000 figure were correct, Minnesota's share would be 200 per year. Instead, the average number of deaths in Minnesota due to criminal abortions during the study period was 1.3 per year. If this number were projected to the country as a whole, the average number of illegal abortion deaths would be 65 per year.

This projection is relatively consistent with the finding of the Center for Disease Control in Atlanta which reported that 48 women died of complications of abortion in 1974—the most recent year for which figures are available. Legal abortions accounted for 24 of those 48 maternal deaths, spontaneous abortions for 18 deaths, and illegal abortions for only 6 deaths. The specter of an epidemic of maternal deaths due to illegal or "backroom" abortions is simply unfounded.

Neither does abortion on demand reduce maternal deaths. The number of maternal deaths from abortion has steadily declined from 1942 when there were 1,231 abortion-related deaths. By 1962, when the American Law Institute's Model Penal Code was proposed with its abortion on request provisions, but before it had been adopted by any State, maternal deaths were reduced to 305 for the year.

In 1967, the year preceding the first major liberalization of State abortion laws, maternal deaths had been reduced to 160. And during the period of 1968 through 1971, that is during the period when liberalized abortion laws adopted by 16 States became effective, the number was reduced from 133 deaths in 1968 to 120 in 1971.

STATES WILL DETERMINE EXCEPTIONS

The question of to what extent the human life amendment would allow medically necessary procedures to save the life of the mother is one of constitutional and criminal law. However, the rise to the exception is one of fact to be determined by State legislatures, courts, and medical communities.

In the past, some in the medical community maintained there were far more medical situations necessitating abortion to protect the mother's health than exist today.

With the recent developments in medical procedures concerning such threatening conditions and the tendency to treat the unborn child as a patient, the necessity for abortion has been greatly reduced. While not being an expert in the field, I would not venture to say that the evidence is conclusive, but the evidence does show that medical science has all but eliminated the necessity for abortion.

For some time, pregnancy was thought to be a great risk to patients suffering with heart disease; yet, recent advances in treatment make "therapeutic abortions due to heart disease now rare compared to 20 or 30 years ago." Today, some experts maintain that "any patient with heart disease seen early enough to be aborted was seen early enough to be carried successfully through the pregnancy if she would abide by certain rules."

Renal—that is, kidney—disease is sometimes listed as a justifiable reason for abortion. Hereto, developments in treatment, namely with antibiotics, have substantially reduced abortion in these circumstances. For patients suffering from severe or progressive kidney deterioration, the effects of pregnancy on the disease may aggravate that deterioration; and hence, abortion has been recommended by some physicians.

Pulmonary tuberculosis was once considered an indication for abortion; however, "pregnancy does not affect the course of the disease, nor is the course of the disease improved by abortion." Today, tuberculosis is no longer a reason for abortion. The effect of pregnancy upon various forms of cancer or diabetes is still unclear. and further study is needed to determine whether abortion is really medically indicated in these situations. However, some types of cancer mandate the removal of the uterus and hence the fetus. Neurologic diseases, such as multiple sclerosis, epilepsy, and muscular dystrophy are "sometimes made worse by pregnancy." As a general proposition, their effect is still considered unpredictable. There is insufficient evidence to conclude that these diseases increase the woman's risk during pregnancy.

Presently, there is general agreement in the medical community that removal of the fetus is indicated in cases where the fetus is dead or has been reabsorbed, where cancer or a tumor necessitates the removal of the uterus, and where implantation has occurred outside the uterus, as in an ectopic pregnancy. Although some of these cases require procedures to terminate a pregnancy, they are not usually considered as abortions. For example, an ectopic pregnancy is usually treated as an emergency requiring major abdominal surgery.

Psychiatric or emotional disorders have in the past been cited as reasons for abortion. Presently, the weight of scientific authority indicates that such disorders do not require abortion as a solution. For example, Dr. Samuel Nigro, professor of psychiatry at Case Western Reserve University School of Medicine writes that:

> (t)here are no clear-cut psychiatric indications for therapeutic abortion.

Dr. Irving Bernstein, professor of psychiatry at the University of Minnesota Hospital, states that:

> (f)rom the psychiatric point of view of the psychiatrist, there are no indications for recommending therapeutic abortions.

He summarized his testimony before the Senate Subcommittee on Constitutional Amendments as follows:

> In summary, there are no psychiatric indications for therapeutic abortion because (a) therapeutic abortion is not effective treatment for the patient or for the situation; (b) abortion will not solve the "battered child" syndrome problem; (c) suicide is less of a risk in pregnant women than in non-pregnant women; (d) it is impossible to predict who will develop a post-partum psychosis; (e) therapeutic abortion has its own psychiatric morbidity; (f) adequate treatment methods are available to handle psychiatric difficulties occurring during pregnancy.

Many physicians find that there are no medical conditions which require abortion as a treatment. Since none of these conditions can be improved or cured through abortion, they maintain that this procedure results only in the death of the unborn child with no medical benefit to the mother. Dr. Roy Heffer-

nan of Tufts University has stated that "anyone who performs a therapeutic abortion is either ignorant of modern medical methods or unwilling to take the time and effort to apply them." Dr. David Wilson maintains that "proper management will permit a successful termination of pregnancy regardless of the physical and mental diseases of the patient." Even such a steadfast proponent of abortion on demand as Aian Guttmacher states that—

It is possible for almost any patient to be brought through pregnancy alive unless she suffers from a fatal illness such as cancer or leukemia; and if so, abortion would be unlikely to prolong, much less save life.

ABORTION IS DANGEROUS TO THE MOTHER

Alongside the social and legal consequences of abortion, the individual medical and psychiatric consequences of the procedures are also hazardous. Whatever personal advantages some may claim for abortion, the serious consequences of the procedure very often offset any claimed benefits. One leading gynecologist states that:

(t)here is now ample evidence to show that abortion is neither safe nor simple. The long-term complications alone condemn its use as a contraceptive method.

Another study of the long term effects finds that:

Especially striking is an increased incidence of ectopic pregnancy. Furthermore, as noticed recently, a high, incidence of cervical incompetence results from interruption of pregnancy that raises the number of spontaneous abortions subsequently to 30–40 per cent.

A British study of the effect of abortion on subsequent pregnancies recommended that:

Any patient who has a previous history of an abortion should be regarded as a high risk patient.

The psychological complications resulting from abortion are also significant. The Scientific Study Group of the World Health Organization reports that there is "no doubt that the termination of pregnancy may precipitate a serious psychoneurotic or a psychotic reaction in a susceptible individual." Other studies find that abortion "even if therapeutic, may in itself produce a psychosis" and that abortion "frequently carries with it a degree of emotional trauma far exceeding that which would have been sustained by continuation of pregnancy."

Prof. Alfred Kotasek, Chief of the Department of Gynecology and Obstetrics at Charles University, Prague, Czechoslovakia, reported to the Fourth International Congress on Perinatal Medicine in 1975 that the medical complications following first trimester abortions were: First, immediate complications: death, excessive blood loss, injuries to the cervix, perforation of the uterus; second, early complications: fever, bleeding, retained products of conception, infection, "the postabortal pain syndrome"; third, late complications: chronic inflammation, menstrual disorders, psychological complications, sterility; fourth, complications during subsequent pregnancy: extra-uterine pregnancy—that is, ectopic pregnancy—cervical incompetence—spontaneous abortions—perinatal mortality—still birth—premature births, hemorrhage during pregnancy, longer average duration of labor. Professor Kotasek also reports that mid-trimester abortion is "three to four times more risky than early abortion."

PROHIBITS FETAL EUTHANASIA

Although the human life amendment would allow a resolution of the problem of a pregnancy threatening the life of the mother consistent with traditional legal and ethical thinking, it would not allow abortions for purposes of eugenics or euthanasia. "Fetal euthanasia" is sometimes advocated as a solution to Tay-Sachs disease or when the mother has had rubella in early pregnancy.

Dr. Watson Bowes of the University of Colorado Medical Center has observed that such a proposal amounts to "treating a disease by killing the patient with the disease." Some have described abortion in these circumstances as nothing less than euthanasia. But the practice of abortion is in these cases substantially different than the practice of euthanasia. Here the life of the patient is terminated not because he is in great pain or has contracted a fearful, terminal disease, but only because it is probable or even just possible that he may contract the disease.

Often, perfectly normal and healthy children are aborted for no more reason than that they might inherit a disease or condition. For example, one study of "therapeutic" abortions done because the mother had contracted rubella during pregnancy "found no evidence of the disease in 32 percent" of the unborn children, while others who had the disease would have recovered and been born normal.

According to Jerome Lejeune, professor of genetics at the Medical College of Paris, France; Tay-Sachs disease could be prevented entirely by simply discovering which people carry that specific genetic trait and encouraging them not to marry a person with the same trait. That certainly would be a more humanitarian solution to the problem than killing unborn children suspected of having the disease.

An exception clause contained in the human life amendment to provide for the legalization of abortion in the case of rape is both unnecessary and unenforceable. After the proper and normal medical treatment for rape has been obtained, the possibility of pregnancy is nonexistent. And even when the woman has not received treatment a number of medical studies of pregnancy resulting from untreated rape found that such pregnancies are exceedingly rare. Studies of the actual number of pregnancies resulting from rape in several American cities indicate that, as a practical matter, the problem does not exist. A 1969 study of pregnancies resulting from rape in Buffalo, N.Y., found that there were no pregnancies from confirmed rape in over 30 years. A study of 3,500 cases of rape in Minnesota also reported no resulting pregnancies. Dr. Carolyn Gerster observes that there are two irrefutable arguments against making an exception in the case of rape:

(1) Pregnancy from reported, medically treated rape is zero—rendering the exception clause unnecessary. (2) Unreported rape—after all evidence of penetration has disappeared and without corroborating witnesses—cannot be proved rendering the law unenforceable.

Hopefully as a consequence of this prohibition of abortion in cases of rape, victims will be encouraged to seek medical attention and report offenses, thus reducing the great number of estimated cases which go unreported. Hopefully too, this increased attention will lead to improvements in society's treatment of the rape victim. A society which promotes justice, as well as compassion, will support more severe penalties for the rapist and more humane treatment for his victim rather than encourage the killing of the innocent child conceived during the criminal act of another.

X. STATE AND FEDERAL JURISDICTION

Upon adoption of a human life amendment, the Federal Government would not preempt the power of States to prohibit abortion, prescribe penalties, or regulate abortion procedures and facilities. States would continue to act in the fields of State interest. Section 2 of my amendment preserves the concurrent jurisdiction of Congress and the States over abortion and recognizes the fact that the regulation of abortion is primarily a State responsibility.

The Federal Government could act to outlaw interstate commerce in drugs, instruments, and equipment used for abortions, as well as the use of interstate commerce to procure an unlawful abortion. However, any Federal action promoting abortions, including funding of actual abortions, use of Federal facilities or personnel, and research on abortions, particularly research that involves clinical testing, would be clearly a violation of the constitutional rights of the unborn.

The States in turn would have similar powers in regulating abortions under their criminal codes. They would again have the power to delineate spheres of culpability with regard to those who participate in abortions. They would have the authority to prescribe penalties and enforce criminal statutes against abortion.

Although the human life amendment requires that abortion done for reasons other than to save the life of the mother be treated as a serious crime, it does not require that such abortions be considered as first degree murder.

Since abortion is the taking of a human life, it would constitute a homicide. However, just as State criminal codes treat different types of homicides differently, the States would be able to grade the crime of abortion on the basis of the circumstances accompanying the act, such as the intent of the mother, her emotional situation, and other relevent factors. Whether the killing of an unborn child is to be treated as an offense equal to that of killing a child after birth is a legislative judgment. And nothing contained in the human life amendment would prohibit treating these acts as different degrees of homicide. As Prof. Robert Byrn has stated:

The purpose of a Human Life Amendment is not to legislate degrees of homicide, nor will that be its effect.

XI. EUTHANASIA

There is little doubt that the Supreme Court's ruling in the abortion cases raises the specter of euthanasia. If by judicial mandate, persons exists only at birth, then another majority of the Court can establish the principle that a person ceases to exist on account of age, illness, or incapacity. The Supreme Court itself has made the realistic possibility of such a conclusion inescapable through the use of the "capacity of meaningful life" standard and the reference to the unborn child as less than a "person in the whole sense" in the Roe opinion.

Until recently, American law forbade euthanasia by considering it as the active intervention to terminate life and therefore as an unlawful homicide. Encouraged by the abortion cases, proponents of euthanasia are intensifying their efforts to change the law on a national level. Already attempts have been made in some States to establish a form of voluntary euthanasia, the idea being that a person should have the liberty to decide when to die. Recently, the New Jersey Supreme Court held that the life support systems of a comatose patient could be lawfully terminated if the attending physician and the hospital ethics committee agreed "that there is no reasonable possibility of—the patient's—emerging from her present comatose condition to a cognitive, sapient state." Citing Eisenstadt against Baird, Griswold against Connecticut, and Roe against Wade, the Court held that there was a constitutional right to end any "artificial life-support systems as a matter of self-determination." The court further ruled that this new right of self-determination "should not be discarded solely on the basis that her condition prevents her conscious exercise of the choice."

The ruling of the New Jersey Supreme Court is even more surprising when considered in light of the findings of fact made by the lower court. That court held that the patient under consideration "is by legal and medical definition alive" and that to remove the life support systems would under the law of New Jersey amount to homicide.

The attending physician testified that due to the absence of a prehospital medical history and to the fact that other patients have survived longer coma period, and even though he could not say how his patient's condition could be reversed, he was unwilling to state that it was an irreversible condition. He also concluded that to shut off the respirator under these circumstances would be "a substanital devitation from medical tradition" that it would be based on a so-called "quality of life" test and that he would not do so.

In 1976, California adopted a so-called "Natural Death Act" which authorized the withholding or withdrawal of life-sustaining procedures from adult patients in terminal condition who had executed a directive authorizing such action. This legislation relieved health professionals and facilities from civil liability and criminal prosecution for actions made pursuant to the patient's directive.

Although different procedures may exist under various legislative formulations of the "living will" concept, a number of substantial legal problems still may be expected to attend such laws including the one adopted by California. Medical personnel under the California formulation are relieved of liability irrespective of whether the doctor acts in bad faith or in a grossly negligent manner. If the patient has signed the authorizing directive, the doctor must terminate life-sustaining procedures or transfer the patient to a doctor who will.

If he fails to act promptly, there is a possibility he may face legal action. In short and most importantly, the doctor, in attempting to comply with the requirements of the California Natural Death Act and, one suspects, under any "living will" formulation, can only be penalized if the patient lives, but not if the patient dies. The act also excludes members of the patient's family from the life or death decision.

From this point, it is not a long distance to the argument adopted in the Quinlan case; namely, that euthanasia should be extended to include those who cannot communicate their desire to die. Eventually, we shall arrive at the final stage where "undesirables," such as the sick, the aged, the senile, and the retarded are eliminated—not because they want to die, but because they would want to if they knew what was good for them. As outlandish as this may sound today, it is nevertheless a foreseeable problem because of the language and the new concept of liberty in the Supreme Court abortion decisions.

Prof. Charles Rice has observed that:

[a]n acceptance of the basic error that there is such a thing as a life not worth living can only end in involuntary elimination of the worthless ones. Once the basic fallacy is adopted, the tendency is to slide into involuntary elimination of the aged, the helpless, and finally the socially or politically undesirable. The lesson of Nazi Germany is indelibly clear on the point. The mass exterminations there began with incurable physical or mental illness.

History is replete with examples of where such reasoning has led in the past. One observer commented on the German experience under the Nazi regime as follows:

... The beginnings at first were merely a subtle shift in emphasis in the basic attitude of the physicians. It started with the acceptance of the attitude basic in the euthanasia movement, that there is such a thing as life not worthy to be lived. This attitude in its early stages concerned itself merely with the severely and chronically sick. Gradually the sphere of those to be included in this category was enlarged to encompass the socially unproductive, the ideologically unwanted, the racially unwanted, and finally all non-Germans. But it is important to realize that the infinitely small wedged-in lever from which this entire trend of mind received its impetus was the attitude toward the non-rehabilitable sick.

One State supreme court has already adopted the proposition that other human beings have a legal right to decide when someone's life should be terminated. This is a principle that we can never finally admit to in our society. It is indeed the same principle involved in the destruction of the unborn. In anticipation of these developments, my amendment recognizes that the right to life is a broad right that cannot be abridged on account of age, illness, or incapacity. By emphasizing that every human being is a person, from the moment of fertilization and is entitled to the right to life, this amendment protects all persons against euthanasia.

XII. CONCLUSION

An amendment to the Constitution is not something to be undertaken lightly, or to be interposed every time one is dissatisfied with a decision of the U.S. Supreme Court. But we are dealing here with an issue so basic and so essential to our rights that it cannot be sidestepped without drastic impairment to the whole range of our freedoms and responsibilities as embodied in the Constitution. As Prof. Archibald Cox observed in his recent work on the Supreme Court, its abortion decision "fails even to consider what I would suppose to be the most important compelling interest of the State in prohibiting abortion: the interest in maintaining that respect for the paramount sanctity of human life which has always been at the center of Western civilization." The right to life is the very precondition of all our other rights. If the right to life is diminished or restricted, every other right is open to attack. If we wish to preserve our fundamental American freedoms, then the right to life must be inviolable.

Mr. President, I ask unanimous consent that the text of my joint resolution be printed in the RECORD at this point.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

S.J. RES. 6

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is proposed as an amendment to to Constitution of the United States, which shall be valid to all intents and purposes as a part of the Constitution only if ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

"ARTICLE —

"SECTION 1. With respect to the right to life guaranteed in this Constitution, every human being, subject to the jurisdiction of the United States, or of any State, shall be deemed, from the moment of fertilization, to be a person and entitled to the right to life.

"SEC. 2. Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.".

ADDITIONAL COSPONSORS

S. 50

At the request of Mr. HUMPHREY, the Senator from Rhode Island (Mr. PELL) was added as a cosponsor of S. 50, the Full Employment and Balanced Growth Act of 1977.

S. CON. RES. 2

Mr. DOMENICI. Mr. President, I ask unanimous consent that I be made a cosponsor of Senate Concurrent Resolution No. 2, the Helms-Dole amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

S. RES. 18

Mr. ALLEN. Mr. President, I ask unanimous consent that the name of the distinguished Senator from New Mexico (Mr. DOMENICI) be added as a cosponsor of Senate Resolution No. 18, having to do with the sense of the Senate in opposition to pardon or amnesty for Vietnam draft dodgers and deserters.

The PRESIDING OFFICER. Without objection, it is so ordered.

SENATE CONCURRENT RESOLUTION 4—SUBMISSION OF A CONCURRENT RESOLUTION REGARDING AMNESTY

(Referred to the Committee on the Judiciary.)

Mr. BROOKE (for himself, Mr. McGOVERN, and Mr. NELSON) submitted the following concurrent resolution, which was referred to the Committee on the Judiciary:

Whereas American participation in the war in Vietnam ended nearly four years ago; and

Whereas it is in the best interest of this Nation and of its people to heal the wounds caused by the divisiveness of that war; and

Whereas such healing can only be accomplished by restoring to the rights and benefits of full citizenship the large number of Americans whose lives were unfairly and adversely affected as a result of their violation during the war of the selective service laws and regulations their desertion or absence without leave during the war, or military discharge procedures and standards which, during the reduction in the strength of the Armed Forces toward the end of the war, frequently resulted in less than honorable discharges where no military offense was alleged or proved; and

Whereas a less than honorable discharge, though not intended to be punitive, imposes a severe stigma on a young person entering the job market and is especially burdensome and unfair in a time of high unemployment: Now, therefore be it

Resolved by the Senate (the House of Representatives concurring), That the Congress endorses the program publically announced by the President-elect to, upon taking office, pardon each person who, during the Vietnam era, failed to report for induction into, or refused induction into, the Armed Forces of the United States in violation of the Military Selective Service Act and who has not been prosecuted for such violation, and the Congress commends the President-elect for having publically committed himself to such a program.

SEC. 2. The Congress urges and requests the President-elect to extend his Vietnam-era reconciliation program and complete the reconciliation process by, upon taking office—

(1) granting amnesty to all persons convicted under the Military Selective Service Act of offenses committee during the Vietnam era or against whom charges arising from failure to register in accordance with such Act during the Vietnam era are outstanding; and

(2)(A) upgrading all general and undesirable discharges issued to former members of the Armed Forces who served in the Armed Forces during the Vietnam era to honorable discharges;

(B) reviewing on a case-by-case basis each bad conduct and dishonorable discharge issued to a former member of the Armed Forces during the Vietnam era to determine in each instance whether such discharge should be upgraded; and

(C) granting amnesty to each member and former member of the Armed Forces who—

(i) during the Vietnam era deserted in violation of article 85 of the Uniform Code of Military Justice (10 U.S.C. 885) and has not been tried by a court martial for such violation;

(ii) during the Vietnam era deserted in violation of such article 85 and has been tried and convicted by a court martial for such violation; or

(iii) during the Vietnam era was absent without leave in violation of article 86 of the Uniform Code of Military Justice (10 U.S.C. 886) and has been tried and convicted by a court martial for such violation.

Mr. BROOKE. Mr. President, I am today introducing with Senators McGOVERN and NELSON a resolution which, if adopted, would bring this country one step closer to the needed goal of unconditional amnesty for those who evaded the draft; refused induction into, or deserted, the armed services; or received general and undesirable discharges while serving during the war.

The resolution has two parts. First it puts the Congress on record as fully supporting President-elect Carter's announced plan to pardon those who failed to report for induction, or refused induction, into the armed services.

Second, it urges and requests that Mr. Carter extend his declaration to cover those who deserted the Armed Forces, or who were charged with or convicted of violating the Selective Service Act. It would urge the upgrading of all general and undesirable discharges for all former members of the Armed Forces who served during this period. And finally it urges that he mandate a case-by-case review of each bad conduct and dishonorable discharge to determine if that discharge should be upgraded.

Mr. President, my introduction of this resolution reflects my continuing belief that unconditional amnesty is the only way to heal the very deep scars of the Vietnam war. It has been nearly 2 years since we witnessed its last agonizing days. Quite understandably most Americans are tired of that tragic war and all too willing to forget it. But in our haste to forget, we should not forget that the war is not yet over. Yes, our soldiers are home. Our guns are silent. Yet, for many the war lingers on.

Somewhere here in this country or abroad thousands of young men still live in virtual exile: Evaders of a draft they believed unconstitutional and immoral, deserters of an army for which they could not in good conscience fight, or victims of undesirable discharges which have left them virtually second-class citizens.

The Vietnam war cannot and will not be over until we bring these men home. I believe that to bring them home and to finally unite our people after our most tragic foreign war, our Government should extend unconditional amnesty to each and every American who evaded the draft or deserted from his military duties. I also believe that all general or undesirable discharges should be upgraded to honorable discharges for Vietnam era veterans. And I believe this should be done now. For, in my opinion, these steps are not only the best way to heal the wounds of the Vietnam war, they are the only way to heal the wounds of the Vietnam war.

To many amnesty has a forbidding ring. But we should recognize the American history is replete with examples of amnesty. To be sure there has never been an amnesty on the scale of what is needed today. But the question before the American people is not one of numbers. It is one of principle. And that principle is soundly embedded in our history. Indeed, since 1795 there have been 38 amnesties or general pardons. And in no instance has alternative service been a requirement.

We were perhaps most magnanimous after our own Civil War. Torn apart by a bloody, brutal struggle which set neighbor against neighbor, friend against friend, family against family, our Nation cried out for compassion, for healing, for reunification. And no one knew this better than Abraham Lincoln, who said in his second inaugural:

> With malice toward none; with charity for all; with firmness in the right as God gives us to see the right, let us strive on to finish the work we are in; to bind up the nation's wounds; to care for him who shall have borne the battle and for his widow and his orphan—to do all which may achieve and cherish a just and a lasting peace, among ourselves and with all nations.

Some argue that there is a great distinction between a civil war and a foreign war and that the two are in no way comparable. I do not deny the distinctions. But at the same time I do not think that anyone can deny that the Vietnam war has torn at our delicate social fabric like no war since the Civil War. And I submit that just as amnesty repaired our social fabric then, it can repair our social fabric now.

I do not know if many in my generation can grasp the enormity of the difference between Vietnam, and, say the Second World War. And perhaps that is why so many more veterans of my vintage oppose amnesty than veterans of the Vietnam era. But that difference is crucial to understanding why we need unconditional amnesty to heal the Nation's wounds. For the fact is that the Vietnam war was so intertwined with the attendant domestic upheaval that we cannot now or ever hope to sort out the complex conscientious decisions of the thousands of young men who felt they could not fight. Indeed, we should not even try.

And the beauty of amnesty is that we do not try. For amnesty is a process of forgetting, nor forgiving. We do not say a man was right; we do not say a man was wrong. What we do say is that a compassionate and understanding people are willing to forget a man's past actions in order to reunite our Republic. It is a magnanimous act by a courageous people.

Mr. President, I might add that one of the great spokesmen for amnesty in this Chamber, Philip A. Hart, died the day after Christmas. He had been the first to file legislation which would have accomplished the act we seek today. And he spoke out on this issue whenever and wherever the opportunity arose. It would

be a fitting tribute to Senator Hart if we could resolve quite soon the issue with which he so forcefully involved himself.

A similar resolution has been introduced in the House by Congressman KOCH. I hope both can be considered and passed expeditiously so that we can finally put the tragedy of the Vietnam war behind us.

NOTICE OF MOTION TO AMEND SENATE RULES

Mr. ALLEN submitted the following notice in writing:

In accordance with the provisions of Rule XL of the Standing Rules of the Senate, I hereby give notice in writing that I shall hereafter move to amend Rule XLIV of the Standing Rules of the Senate in the following particulars, namely:

Paragraph 3 of Rule XLIV of the Standing Rules of the Senate is amended to read as follows:

"3. Each Senator or person who has declared or otherwise made known his intention to seek nomination or election, or who has filed papers or petitions for nomination or election, or on whose behalf a declaration or nominating paper or petition has been made or filed, or who has otherwise, directly or indirectly, manifested his intention to seek nomination or election, pursuant to State law to the office of United States Senator, shall file with the Secretary of the Senate, before the 15th of May in each year, the accounting required by rule XLII for all contributions received by him during the preceding year, except that contributions in the aggregate amount or value of less than $50 received from any single source during the reporting period may be totaled without further itemization."

Rule XLIV of the Standing Rules of the Senate is amended to add at the end thereof the following new paragraph:

"6. Notwithstanding the provisions of Title 2, United States Code Section 4411, no Senator or person who has declared or otherwise made known his intention to seek nomination or election, or who has filed papers or petitions for nomination or election, or on whose behalf a declaration or nominating paper or petition has been made or filed, or who has otherwise, directly or indirectly, manifested his intention to seek nomination or election, pursuant to State law, to the office of United States Senator, and no officer or employee of the Senate shall accept any honorarium for any appearance, speech, or article, nor shall any such person accept reimbursement for expenses, including actual travel and subsistence expenses, incurred by him in connection with any appearance, speech, or article."

The purpose of the proposed amendment is—

(1) to modify paragraph 3 of Rule XLIV by eliminating therefrom the requirement that candidates for the Senate, Senators, and certain Senate employees file with the Secretary of the Senate a report of the amount or value and of the source of each honorarium of $300 or more received by him and by conforming the remaining provisions of the paragraph by dropping from the terms thereof officers or employees of the Senate who are compensated at a rate in excess of $15,000 a year; and

(2) to add a new paragraph to Rule XLIV to forbid the acceptance of any honorarium by any candidate for the Senate, Senator, or officer or employee of the Senate.

PROHIBITING HONORARIA

Mr. ALLEN. Mr. President, for some time I have sought a change in the statutes governing the conduct of Members of Congress and candidates for public office to prohibit the acceptance of honoraria. During Senate consideration of the Federal Election Campaign Act Amendments of 1974, I offered an amendment to that measure to forbid any Member of Congress to accept any honorarium, fee, or payment from any source whatsoever in connection with any speech, article, or appearance other than his official salary or official reimbursements or allowances from the U.S. Treasury. I regret to say, Mr. President, that my amendment was rejected even though I pointed out in arguing for its adoption that in 1972 Members of the Senate had received more than $160,000 in honoraria or payments for speeches or appearances. I have today checked with the Secretary of the Senate, and I am sorry to report that 1975's receipts by Senators totaled $634,735.49 reflecting perhaps recent increases in honoraria limits.

But, Mr. President, I do feel that the Senate should go ahead now and entirely eliminate the practice of accepting honoraria, and for that reason I am today giving notice of my attention to move to amend the Senate Rules to forbid the practice.

Mr. President, recognizing that some staff members are also in demand for public appearances and speaking engagements, I have extended my proposed rule change to include Senate officers and employees. I believe all of us whether Senators or Senate staff should be compensated for our duties in connection with our public office only from the Treasury of the United States and that we ought not in any other way to profit from the public office we hold.

Mr. President, there well may be some attempt made in this Congress to place further restriction on the receipt of honoraria by Federal employees. As Senators know, 2 U.S.C. Section 441(i) already forbids the acceptance of an honorarium in excess of $2,000 and puts an absolute ceiling on the total honoraria which may be received in any 1 year at $25,000. We would do well to enact a statute forbidding the acceptance of honoraria by all Federal employees, or at a minimum restricting further the amounts permitted.

But I recommend, Mr. President, that the Senate go ahead now and set the example in the legislative branch of Government by imposing an absolute prohibition on honoraria. Certainly it is within the power of the Senate under the Constitution to amend its rules to impose a prohibition of that nature, and I urge that the rules change I propose be adopted promptly. In no event should action on the question be delayed since our reluctance to act will be interpreted as reluctance to face the issue. It is an issue we ought to face along with others because, in my judgment, now is a time in which we must reexamine carefully all of the standards of conduct set forth in the Standing Rules of the Senate, and we ought to reexamine those standards in the spirit of the preamble to the Senate resolution of March 22, 1968, in which this body declared it to be the policy of the Senate that the concept of public office expressed by the words, "a public office is a public trust," signifies that "the officer has been entrusted with public power by the people; that the officer holds this power in trust to be used only for their benefit and never for the benefit of himself or a few; and that the officer must never conduct his own affairs so as to infringe on the public interest."

AMENDMENTS SUBMITTED FOR PRINTING

REORGANIZATION OF SENATE COMMITTEE SYSTEM—SENATE RESOLUTION 4

AMENDMENT NO. 1

(Ordered to be printed and to lie on the table.)

Mr. HASKELL. Mr. President, Senators LAXALT, MCINTYRE, and I are introducing an amendment to Senate Resolution 4, the committee reorganization resolution, which will provide for an independent Small Business Committee. We have been joined in this effort by Senators ABOUREZK and THURMOND. We expect a long list of cosponsors for our amendment because we know that the 13 million small businesses in America enjoy great support from both sides of the isle and from all political perspectives in the Senate.

Our amendment calls for the creation of a 15th standing committee—Senate Resolution 4 calls for 14—on small business. It splits small business from the Agriculture and Small Business Committee which would be created under Senate Resolution 4. It allows Senators to sit on two other standing committees in addition to small business, similar to the exemption which is provided members of the proposed Rules, Administration, and Standards Committee.

I am inserting a technical explanation of the amendment for the consideration of my colleagues. Further, I am inserting a copy of my statement before the Rules Committee which is currently considering Senate Resolution 4 and a paper containing background information on the present Select Committee on Small Business.

Finally, I would like to ask unanimous consent that these items be inserted in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EXPLANATION OF HASKELL-LAXALT-MCINTYRE AMENDMENT TO S. RES. 4

The purpose of Amendment numbered 1 is to establish a standing Committee on Small Business, with the same number of members (17) and the same legislative jurisdiction as the existing select Committee on Small Business. Under this amendment, a member of the Small Business Committee, like a member of the Rules Committee under S. Res. 4, would be permitted to serve on two other standing committees.

A technical explanation of the several parts of the amendment follows.

First, on page 2 of S. Res. 4, at lines 3 and 4, the amendment would change the name of the proposed new Committee on Agriculture and Small Business to the existing name, Committee on Agriculture and Forestry.

Second, on page 3 of S. Res. 4, at line 2 and at lines 10 through 13, the amendment would delete from the language describing the jurisdiction of the Agriculture Committee all references to small business. The last four clauses (page 3, lines 3 through 6) in the

itemized list of subjects within the jurisdiction of the Agriculture Committee would be renumbered to accord with the deletion of clause 17, small business.

Third, on page 5 of S. Res. 4, at line 15, the amendment would amplify the third clause in the itemized list of subjects within the jurisdiction of the proposed new Committee on Banking, Housing and Urban Affairs. That clause reads, in its entirety, "Financial Aid to Commerce and Industry." The amendment would change that to read, "Financial Aid to Commerce and Industry, other than matters relating to such aid which are specifically assigned to other committees under this rule." The language provided by the amendment is identical with the historic language for the corresponding clause in the list of subjects within the jurisdiction of the present Banking Committee. Without the qualifying phrase, the Banking Committee and the Small Business Committee under this amendment (or the Banking Committee and the Agriculture and Small Business Committee, under S. Res. 4 as introduced) would apparently have concurrent jurisdiction over financial aid to commerce and industry emanating from the Small Business Administration.

Hence, this particular part of the amendment should be adopted even if the rest of the amendment is not, to serve the purpose of S. Res. 4 to reduce or eliminate duplications in committee jurisdictions.

Fourth, on page 20, after line 2, the amendment would insert a new subparagraph (o) in proposed revised paragraph 1 of Rule XXV of the Standing Rules of the Senate. The new subparagraph would establish a standing Committee on Small Business, which would have legislative jurisdiction identical to that now possessed, under S. Res. 104 of the 94th Congress, by the existing Select Committee on Small Business. That jurisdiction is confined to matters affecting the Small Business Administration. The committee would retain the power to investigate and report, otherwise than by bill, on other matters affecting small business, but could report by bill only legislation directly pertaining to the Small Business Administration. The language of subparagraph (o) differs from the substantive language of S. Res. 104 only to the extent necessary to conform in style with the balance of S. Res. 4.

Fifth, the table following line 16 on page 20 of S. Res. 4 would be amended to show the Small Business Committee as a committee having 17 members, the size of the existing select committee.

Sixth, on pages 23 and 24, the proposed new subparagraph (f) of paragraph 1 of Rule XXV, as revised by S. Res. 4, would be broken up into two subparagraphs, (1) and (2). Subparagraph (f)(1) would be identical to the language of S. Res. 4 at page 23, line 21, through page 24, line 4, providing that members of the Rules Committee may serve on two other standing committees. Subparagraph (f)(2), which this amendment would add, would provide, in language identical to that applying to the Rules Committee, that members of the Small Business Committee may also serve on two other standing committees.

Seventh, on page 26, at line 20, the amendment would make a technical correction of S. Res. 4, to repeal S. Res. 272, 81st Congress, as well as S. Res. 58, 81st Congress. S. Res. 58 of the 81st Congress establishes the select Committee on Small Business and describes its continuing mission, while S. Res. 272 confers on the committee its administrative powers. Both resolutions appear among the standing orders of the Senate and, if one is repealed, it is logical that the other should be too.

Testimony of Senator Floyd K. Haskell Before the Rules Committee

Mr. Chairman:

It is a pleasure to appear before this committee and I am grateful for the opportunity to offer my thoughts on S. Res. 4.

I applaud the efforts of the members of the Stevenson Committee for their tireless work on a very difficult and thankless task. I know that the members of the Committee on Committees have had to make many difficult political decisions, bear the wrath of many threatened constituencies, and in some cases, make personal sacrifices in the interest of reform.

There is no doubt that the current Senate committee system is unruly and at times chaotic. There is no doubt that consolidation of jurisdiction and reduction of subcommittee proliferation is a useful, necessary exercise. However, I am troubled by some elements of the reorganization proposed by S. Res. 4. I fear that constituencies which have been able to receive a fair hearing in a select committee or friendly subcommittee may lose their forum through this reorganization.

In the present system, an interest group can frequently seek more than one forum. If a public health insurance proponent receives a cold reception in the Health Subcommittee of Finance, he can go to the Health Subcommittee of Labor and Public Welfare, and vice versa. If a business oriented group is frustrated by Labor and Public Welfare, it can come to the Small Business Committee. If tax reform advocates feel unrepresented by the Finance Committee, they can raise their issues with the Budget Committee. For many, this is exactly the situation which needs remedy. For others, it is a creative chaos which allows for real representation. Quite honestly, I do not think that this chaos has any political bias. It does allow just about everyone to have a hearing and so its political bias, if any, is to promote a more representative body of public information. But I do not think it favors conservative views over liberal views or vice versa. The proliferation of committees and subcommittees might slow down the work of the Senate somewhat. But the Senate is not an executive body. It is the body politic of our government. It should be organized to be a deliberative and, to the extent possible and practical, broadly representative institution.

With only fourteen committees, will there be a home for small business in the Senate? Let us consider the small business constituency. Small businesses account for more than half of the jobs in the private sector, over half of all inventions and innovations, 48 percent of the business output, and 43 percent of the GNP. Beyond this, they are the vehicles for the hopes and dreams and the grantors of self-reliant status for million of Americans and their families. The IRS indicates that there are about 13.3 million businesses in America, 97 percent of which are small by SBA definition.

Small business issues cut across the entire committee system. Finance, Labor, Judiciary, Interior—all these committees constantly make policy which have tremendous effects on the small business community. But ordinarily, these committees concern themselves with the problems of big business and big labor, while the problems of small business are entirely different. We need a separate forum, uncomplicated with many other jurisdictional responsibilities, where these very distinct problems will receive adequate consideration.

S. Res. 4 provides for the elimination of this constituency's one friendly forum in the Senate, the Select Committee on Small Business. It gives the jurisdiction over small business issues to the Agriculture Committee, and changes that committee's name to the Agriculture and Small Business Committee. But a superficial reading of the resolution itself indicates that the new title, which denotes some sort of equality, is in fact, a sham. The new committee is assigned 21 subjects of legislative jurisdiction. Small business is subject number 17 nestled right after the food stamp program and right before "food from fresh waters and the sea". Just as it takes you a while to find small business in the list of agricultural subjects in the resolution, it is going to be a long time before a committee which has historically been committed to the very real and pressing problems of the farmer is going to be able to focus properly on the issues which affect the small businessman. And I do not believe the small businessman can afford to wait.

In 1960 small and medium sized manufacturing firms accounted for 50 percent of the assets and 41 percent of the manufacturing profits. By 1972 these figures had dropped to 33 percent of the assets and 28 percent of the profits.

The Agriculture Committee now has 14 members. The new committee will have two additional members. Will Gaylord Nelson move to the Agriculture Committee? What other one Senator who has championed the small business causes in the Senate will move to the Agriculture Committee?

I would like to emphasize that I have great respect for the Agriculture Committee and the very greatest respect for the farmer, especially the family farmer. And it is precisely because of my respect and affection for the farmer that I would not like to see his committee spending a great deal of time on small business issues. As I said, I do not think this would be likely, anyway, but it is one more reason why the amalgamation doesn't make sense.

I would like to emphasize that the atlernative of dumping small business into some other committee is equally unacceptable. Consider the Finance Committee, of which I am a member. According to the Treasury, .2 percent of the nation's corporations received 71 percent of the benefits from the investment tax credit in 1972. Similarly, the total benefit of ADR, Accelerated Depreciation Range, which is a gimmick designed for capital intensive industry, went to 1.5 percent of the nation's corporations in 1973. Small business is labor intensive as a rule. They need help in reducing federal payroll taxes which in FY 1976 accounted for $48 billion while corporate taxes accounted for only $41 billion. Do any of you ever recall any proposals coming out of the Finance Committee to reduce capital accumulation devices which subsidize the cost of machinery and use the proceeds to reduce the cost of labor via payroll taxes?

The only sensible and fair way to handle the small business issue is to leave small business as a separate committee. I am offering an amendment to S. Res. 4 to that effect. I am joined in this effort by Senators Laxalt and McIntyre.

We hope that the Rules Committee will report a resolution which will provide for an independent Small Business Committee. But if it does not, we are prepared to go to the floor. Our amendment provides for a 15th standing committee. Like the proposed Rules, Administration, and Standards Committee, membership on the Small Business Committee would not prevent a senator from sitting on two other committees.

I thank you for considering my views.

Background of the Small Business Committee

Since its creation in 1950, the Select Committee on Small Business has had a continuing, permanent character. With the acquisition of legislative authority over matters relating to the Small Business Administration, effective January 1977, the Small Business Committee possesses virtually all of the characteristics of a standing committee (see appendix I for background).

Under the reorganization plan, the independence of the Small Business Committee (along with that of 4 standing, 3 other select, and 7 joint committees) will be abolished. The Small Business Committee is one of the few select and joint committees which have legislative jurisdiction. Out of the current 12 so-called non-legislative select, special, and joint committees, 4 of those committees (3 select and 1 joint committee) possess legislative authority—Select Small Business, Select Intelligence, Select Standards and Conduct, and Joint Atomic Energy.

For the first time in its 26-year history, the Small Business Committee will exercise legislative authority, beginning with the 95th Congress, over matters relating to the Small Business Administration (S. Res. 104, which granted this authority, passed the Senate by an overwhelming vote on April 29, 1976). The committee's oversight capabilities and efforts will intensify as of the 95th Congress with the goal of improving current SBA programs and the delivery of federally-sponsored services and assistance to this important segment of our economy. The committee's work in other vital areas affecting the small business community will also continue. An outstanding example of the committee's efforts on behalf of the small business community is its work in the area of tax reform for small businesses. Twelve days of hearings held in 1975 laid the basis for the subsequent introduction and advocacy during the 94th Congress of numerous bills designed to provide tax equity for smaller and medium-sized businesses and much needed relief and reform in a variety of business tax fields. These bills included two to provide corporate tax rate reductions for small and medium-sized businesses (S. 1119 and S. 2149); five estate and gift tax reform bills (S. 2394, S. 2764, S. 2819, S. 3140, and S. 3478); amendments to the tax reform bill relating to preservation of incentive stock options for growing firms (No. 2075), subchapter S improvements (No. 2076), and deficiency dividend procedure for small business investment companies (No. 2077), and a split estate tax credit favoring small business and family farms (No. 318); and graduated excise taxes for certain industries.

Many of the small business tax proposals were contained in the two major tax bills signed into law in the 94th Congress—the Tax Reduction Act signed in March 1975, and the Tax Reform Act of 1976 signed in October 1976. The 1976 Act has been referred to as the most far-reaching tax revision legislation since 1954. It extends, for 1976 and 1977, the most significant income tax relief for smaller corporations of the past 25 years; and enacts the most sweeping estate tax relief in 34 years.

It is impossible to overestimate the importance of small business and family farming to our economy and society. 97% of the nation's businesses and corporations are classified as small businesses. Small business accounts for more than 52% of business jobs, 48% of business output, 43% of the Gross National Product. Several recent studies have affirmed that individual inventors and small firms continue to account for more than one-half of all inventions and innovations.

The Small Business Committee has been very active under the leadership of Chairman Gaylord Nelson, chairman since January 1975. In the 94th Congress, the Small Business Committee held 107 hearings (63 in calendar year 1975; and 44 in calendar year 1976). It issued 38 publications in 1975 (35 printed hearing volumes and 3 reports) and will have issued 30 more (29 hearing volumes and 1 report) for hearings and studies conducted in 1976. How does this workload compare with that of the other standing, select and joint committees most directly affected by the reorganization plan?

With regard to the standing committees, Aeronautical and Space held 21 hearings and reported 2 bills in the 94th Congress; D.C. held 23 hearings and reported 19 bills in the 94th Congress; Post Office and Civil Service held 22 hearings and issued 31 reports in the 94th Congress; Veterans held 26 hearings and reported 17 bills in the 94th Congress.

With regard to the other select committees, Nutrition held 16 days of hearings and issued 28 reports in the 94th Congress; Aging held 59 hearings and issued 28 reports in the 94th Congress; Standards and Conduct issued 1 report and 1 resolution and held meetings and issued individual opinions in the course of the 94th Congress; Intelligence, which was constituted in 1976 and will remain unchanged in the 95th Congress, held 4 open hearings and several more closed hearings and meetings.

With regard to the joint committees, Atomic Energy (the only joint committee with legislative jurisdiction) held 70 hearings and reported 25 bills in the 94th Congress; Economic held 127 hearings and issued 43 committee prints; Defense Production held 22 hearings; and Internal Revenue Taxation issued 87 reports in the 94th Congress.

For an example of the Small Business Committee's work program, see the "memo on committee activity" for calendar year 1975, which is attached. The subjects of the 44 hearings held in 1976 included oversight of specific SBA programs (16 days), problems of minority small businesses, problems facing small businesses as a result of government regulation and paperwork (e.g., the effect of pension plan and OSHA regulations), the survival of the family farm in America, product liability insurance problems of small business, competitive problems in certain industries (e.g., the cosmetic industry, the drug industry, supplemental airlines).

APPENDIX I

SELECT COMMITTEE ON SMALL BUSINESS

Authority for the select committee is contained in S. Res. 58 (1950), as amended by S. Res. 272 (1950), 64 Stat. 595 (1950), S. Res. 120 (1955), S. Res. 25 (1959), and S. Res. 104 (1976). Brief descriptions of these items follow.

S. Res. 58 (1950)—Created the select committee with the duty of studying and surveying all problems of small business and provided that the committee shall not have legislative jurisdiction. The resolution provided for the appointment of the committee's members "at the commencement of each Congress", providing the basis for a continuing, permanent select committee.

S. Res. 272 (1950)—Granted additional powers to the select committee with respect to the conduct of meetings and certain procedures therefor and staffing authority. S. Res. 58 and S. Res. 272 appear in the Standing Orders of the Senate as separate sections.

64 Stat. 595 (1950)—Language contained in this General Government appropriations bill provided that the rates of compensation for employees of the Select Committee on Small Business shall be fixed in accordance with the Legislative Reorganization Act "with respect to standing committees".

S. Res. 120 (1955)—Amended the language of S. Res. 58 pertaining to the appointment of the committee's membership to read: "that the Chairman and members of the Select Committee on Small Business, . . . shall be appointed in the same manner and at the same time as the chairman and members of the standing committees . . . at the beginning of each Congress."

S. Res. 25 (1959)—Amended the language of S. Res. 58 pertaining to the size of the membership of the committee (increased from 13 to 17 Senators).

S. Res. 104 (1976)—Amended the language of S. Res. 58 to provide the committee with legislative jurisdiction over "all proposed legislation primarily relating to the Small Business Administration" and authority for referral in cases where appropriate.

COMMENTS

Over the years, the Select Small Business Committee has acquired most of the features of the standing committees, despite the fact that its authority is contained in the nonstatutory Standing Orders, not the Standing Rules, of the Senate, unlike the standing committees. The committee has had a continuing, permanent character ever since its creation in 1950 (see language of S. Res. 58); and its membership, staff, and funding are treated no differently than that of standing committees. With the acquisition of legislative authority (limited though it is) in January 1977, the Select Small Business Committee possesses virtually all of the characteristics of a standing committee.

It is interesting to note part of the apparent rationale underlying the reform committee's recommendation to disband "select" and "special" committees. On September 30, 1976, Senator Stevenson explained portions of the reorganization plan making reference to four "temporary committees" (Small Business, Standards and Conduct, Aging and Nutrition) whose work will be consolidated into standing committees. He stated that these temporary committees are "limited to studies and investigations and do not report legislation, often duplicating the work of standing committees." (*Congressional Record*, September 30, 1976, S17459).

It is also important to point out a statement in the "First Staff Report" of the reform committee in July 1976 that the terms "select" or "special" "generally designate a temporary panel without legislative authority." Yet that report does recognize that the Senate has granted limited legislative authority to the Select Small Business Committee and that the Senate has in fact created permanent select committees, expressly naming Intelligence, Small Business, and Standards and Conduct. ("First Staff Report to the Temporary Select Committee to Study the Senate Committee System", July 1976, p. 23.)

Mr. LAXALT. Mr. President, I support many of the suggestions for reform recommended by the temporary Select Committee on Committees. It would be wrong to assume that the following remarks reflect a blanket indictment of this effort. Nevertheless, I am very concerned about the proposed disposition of the Senate Select Committee on Small Business.

Under the suggested guidelines for committee restructuring, the Senate Select Committee on Small Business will be merged, or to put it more accurately in my opinion, submerged into a larger committee. Meaningful solutions to the problems faced by small businesses cannot be dealt with adequately in a small subcommittee that must compete with other subcommittees for the attention of a full committee that already has broad jurisdiction and many other pressing problems to deal with. Considering the condition of the small business sector in our economy today, I believe this would be extremely unwise.

Those who support such consolidation do so principally on the grounds that it is the road to efficiency. We may succeed superficially in molding and squeezing the needs of small business to conform to the pecularities of this body, but is it not more important to accommodate the Senate to the requirements of small business?

Mr. President, this country was built on a foundation of small businessmen and yeoman farmers. Throughout our history small firms have remained the basic economic unit. Yet, small busi-

nesses are being severely pressed in our present economy. In my view, it is not enough to deal with small businesses and their problems piecemeal. We must recognize the uniqueness of small business and deal with it as a separate entity.

It is evident that the sheer size and impact of the American small business community is staggering. Consider the following:

Twelve million businesses, 96.7 percent of the total are considered small;

Small businesses account for 43 percent of the gross national product;

Small businesses account for 48 percent of the gross business product—excludes government and farm portions of GNP;

Small businesses provide 55 percent of the total U.S. business employment;

Small businesses directly or indirectly provide livelihoods for 100 million Americans; and

More than 90 percent of all corporations are small businesses.

These few statistics indicate the importance of small business in our economy, and, by themselves, would seem to merit greater recognition by Congress of the small business sector. Yet today, only 8 months after the Senate finally recognized the importance of small business through passage of Senate Resolution 104, granting limited legislative authority to the Senate Select Committee on Small Business, the very existence of the committee is threatened in the proposed committee reorganization.

My distinguished colleague, Senator HASKELL, has already presented an explanation of the Haskell-Laxalt-McIntyre Amendment to Senate Resolution 4 which would establish a standing committee on small business. In my view, an independent small business committee would better serve the community of small firms, the Senate and the Nation by providing a focal point for the role of small business in keeping with our traditional values and the contributions which new and small enterprise has made and can make to our economy and our society.

In conclusion, Mr. President, we talk a good bit here in the Senate about the need to address critical emerging issues and setting up a committee system to serve that exact purpose. Well, I contend we currently have a critical issue in the form of a struggling small business sector demanding close attention and there is no reason to lessen the focus on this problem by deemphasizing the stature of the present committee.

Mr. President, I urge favorable consideration of the Haskell-Laxalt-McIntyre amendment to maintain an independent voice for small business in the U.S. Senate.

AMENDMENTS NOS. 2 THROUGH 11

(Ordered to be printed and referred to the Committee on Rules and Administration.)

Mr. SPARKMAN. Mr. President, on behalf of the distinguished senior Senator from New Jersey (Mr. CASE) and myself, I send to the desk sundry amendments to Senate Resolution 4, reorganizing the committee system of the Senate, and for other purposes. I ask that they be printed and referred to the Committee on Rules and Administration.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPARKMAN. These amendments are designed essentially to preserve the jurisdiction of the Committee on Foreign Relations and to make explicit in the Senate rules what has been the long-standing practice with respect to such matters as international organizations and international law. The amendments would not take away jurisdiction from any other Senate committee.

I ask unanimous consent that the amendments, together with a brief explanation of each, be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

AMENDMENT NO. 2

On page 3, lines 8–10, strike out "matters relating to food, nutrition, and hunger, both in the United States and in foreign countries," and insert "matters relating to food, nutrition, and hunger.".

This would take away from the new Committee on Agriculture and Small Business oversight of matters relating to "food, nutrition, and hunger, both in the United States and in foreign countries." It would leave Agriculture with oversight of these matters in the United States, but not in foreign countries.

AMENDMENT NO. 3

On page 5, line 2, strike out "'9. Foreign military sales (joint)."

On page 5, line 3, strike out "10" and insert "9".

On page 12, line 17, strike out "(joint)".

This amendment would strike the provision giving Armed Services and Foreign Relations joint jurisdiction over military sales and would leave that subject entirely in Foreign Relations.

AMENDMENT NO. 4

On page 5, line 3, strike out "National security" and insert "Military".

On page 12, after line 17 insert the following: "'11. International aspects of atomic energy."

This amendment is designed to insure that if the Joint Committee on Atomic Energy is abolished and its jurisdiction parcelled out among other committees, the jurisdiction of the Foreign Relations Committee is protected with respect to the international aspects of the matter.

S. Res. 4 gives Armed Services jurisdiction over the "national security aspects of atomic energy." The amendment would change that to the "military aspects."

The amendment would give Foreign Relations more explicit authority over such matters as nuclear proliferation, nuclear export policy, and nuclear arms control generally.

AMENDMENT NO. 5

On page 5, lines 13 and 14, strike out "'2. International finance, including international financial and monetary organizations."

Renumber succeeding paragraphs accordingly.

This amendment would delete the provision of S. Res. 4 giving Banking Committee jurisdiction over international financial institutions.

AMENDMENT NO. 6

On page 6, lines 6 and 7, strike out "international economic policy,".

This amendment would delete "international economic policy" from the matters over which the Banking Committee is given oversight.

AMENDMENT NO. 7

On page 12, line 14, strike out "United Nations and its affiliated organizations" and insert "International organizations".

The purpose of this amendment is twofold: (1) to protect the jurisdiction of the Foreign Relations Committee over international financial institutions; and (2) to clarify the Committee's jurisdiction over non-UN international organizations.

The present rule gives Foreign Relations jurisdiction over "United Nations Organization and international financial and monetary organizations."

S. Res. 4 would give the Committee jurisdiction over "United Nations and its affiliated organizations."

The phrase "affiliated organizations" would embrace the World Bank and the Monetary Fund, both of which officially are specialized agencies of the UN, in the same class as the Food and Agriculture Organization, UNESCO, etc. S. Res. 4, however, specifically gives Banking jurisdiction over "international financial and monetary organizations." (This transfer to Banking is dealt within another amendment.)

But neither the present rule nor S. Res. 4 is explicit with respect to international organizations outside the UN family, such as NATO and the OAS. There has never been any question about that. This amendment would insure that there would not be.

AMENDMENT NO. 8

On page 12, after line 17, insert the following: "'11. Foreign loans."

This amendment would retain the provision of the present rules giving Foreign Relations jurisdiction over foreign loans.

S. Res. 4 does give the Committee jurisdiction over "foreign economic, military, technical, and humanitarian assistance." It could be argued that this would include foreign loans, but in some cases it could also perhaps be argued that it does not. Nothing is lost by making the rule explicit.

AMENDMENT NO. 9

On page 12, after line 17, add the following: "'11. International law."

This amendment would give the Foreign Relations Committee jurisdiction over matters relating to international law.

This would protect the Committee's interest in the foreign relations aspects of matters such as oceans and the outer continental shelf jurisdiction over which is specifically placed in other committees by S. Res. 4.

AMENDMENT NO. 10

On page 12, line 20, strike out "policy" and insert "and foreign policies".

The purpose of this amendment is to spell out the Foreign Relations Committee's oversight responsibilities for foreign policy as well as national security policy.

S. Res. 4 directs the Committee to "study and review, on a comprehensive basis, matters relating to the national security policy of the United States."

The amendment would make this read "the national security and foreign policies of the United States."

AMENDMENT NO. 11

On page 13, line 8 strike out the period, insert a comma, and add the following: "but not including foreign information activities."

The purpose of this amendment is to protect the jurisdiction of the Foreign Relations Committee over international information programs of the United States Government, specifically USIA.

S. Res. 4 gives the new Committee on Governmental Affairs jurisdiction over "government information, including freedom of information." The amendment would make it clear that this is limited to domestic mat-

ters and does not include USIA or other foreign information programs such as Radio Free Europe and Radio Liberty.

ADDITONAL STATEMENTS

TRIBUTE TO ALICE PAUL

Mr. BAYH. Mr. President, today is a very special day. It is the 92d birthday of Alice Paul, the author of the equal rights amendment and founder of the National Women's Party. It is a privilege for me to join with others across the Nation in wishing Alice Paul a 93d year as rich and full as have been all those that have gone before.

Alice Paul worked for many years to obtain passage of legislation to get women the vote. She realized that obtaining the vote was not the end of their work, however, but only the beginning. In 1923 she wrote the equal rights amendment which was brought before every session of Congress until its passage in 1972. Since that time, 34 States have ratified the amendment, and ratification by only 4 more States is needed to complete the process of guaranteeing equal rights to all Americans. In my own State of Indiana the State House of Representatives is voting on the amendment tomorrow. I can think of no better present for this remarkable woman who has contributed so much to our Nation than its passage in Indiana. I congratulate Alice Paul for her dedicated service for all people of this country.

This tribute to Alice Paul is well timed though her birthday is on of the few anniversaries observed by the women's movement for which she cannot take credit.

Mr. President, I ask unanimous consent that articles from Life magazine's "Special Report on Remarkable Women" and the New York Times on Alice Paul's life be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[Life Magazine Special Report]

"REMARKABLE AMERICAN WOMEN 1776–1976"

[By Vivian Gornick]

A woman sits in a ground-floor room in a large old house in Connecticut that has been turned into a nursing home. She is small and painfully frail, her body withered with great age. All around her, in the hall beyond this room and in the room itself, is the smell and feel of age and death. I stare at the woman. I have seen photographs taken of her when she was young: the body slim and strong, the eyes luminous, the hair rich, massive, piled high on her beautiful head. Now she sits before me in a wheelchair: the lovely dark eyes dim and colorless, the massive hair thin and white, the arms ropy, the mouth clumsy, as though filled with wooden teeth. I ask a vague, general question: how does she feel? The woman remains silent for a long while as though she either hasn't heard or hasn't understood my question. Then she answers: abrupt, irritated, lapsing immediately back into silence, shrinking even further into her chair. Another question of the same sort . . . another answer of the same sort. Then I ask her a specific question. The question is not about her health or any general sense of "life" she might have. The question is about the political movement she has given her entire life to. Her head straightens slowly on her neck, like a bird's feeling its way into safety, again an extraordinary silence lasts a very long while, and then she begins to speak. This time there is an amazing difference in her speech. Her voice grows full and strong, her words quicken with thought and memory, her sentences begin to shine with lucidity. An atmosphere accumulates around her: calm, grave, steady. The atmosphere is transforming. The woman has become a presence, a force, a being alive with meaning beyond her tiny, withered self.

Alice Paul is 91 years old. The movement she has given her life to is the woman's rights movement. The party that has been her instrument of political work is the National Woman's Party. The issues of her life have been womans' suffrage and the Equal Rights Amendment. She, the movement, the party, the issues are one. Inside her an entire history lives. It is not only the history of the woman's movement in this country, but the history, as well, of the narrow, concentrated power of the human will in lifelong conflict with social injustice.

Alice Paul was born in January of 1885 in Moorestown, N.J. Her parents were well-to-do, middle-class Quakers whose lives were actively informed by the moral and humane principles of the religious sect to which they belonged. In later years when Alice Paul was asked what brought her to feminism, she said that it had always been there—in her home, in her young life. That is, she grew up with the assumption that men and women were equal, and only when she went out into the larger world did she discover this was not so. The discovery came as a visceral shock, the kind of shock that gives sudden form to that which has been inchoate. She realized that she was political to the bone, that her deepest being was aroused by the political. She saw the disenfranchised condition of women in the light of political struggle, and she would never again see it otherwise.

She was very bright and full of intellectual curiosity; there was never any question of her not going to school. She began collecting degrees when she was 20 years old and didn't stop until she was 43 (B.A., Swarthmore, 1905; M.A., University of Pennsylvania, 1907; Ph.D., University of Pennsylvania, 1912; LL.B., Washington College of Law, 1922; LL.M; D.C.L., American University, 1927–28).

She emerged from Swarthmore in 1905 as a social worker and became in that year a resident worker in the New York College Settlement. Her instinctive energy for the poor, the disorganized, those without voice or power was as yet diffused. But that vital sense of disenfranchisement that she carried with her into the sweatshops of New York and later into the slums of London was steadily narrowing. Its clarification required only an igniting experience. And that experience, when it came in England, showed her who and what she was: a single-minded, single-hearted revolutionary who would travel one road only for the rest of her life.

Alice Paul went to England in 1907 at the age of 22 to study at the Woodbrooke Settlement for Social Work in Birmingham. In his incomparable history of feminism in America, *Everyone Was Brave*, William L. O'Neill writes: "She came to England at a time when the fantastic Pankhursts were in full cry. Under the leadership of Emmeline Pankhurst and her daughter Christabel, the suffragist movement had been divided . . . and a spectacular minority called suffragettes, who employed a kind of guerrilla warefare," had emerged. "Beginning in a small way with verbal protests, public demonstrations and the like, the suffragettes ultimately practiced arson and sabotage, mutilated artworks and physically assaulted cabinet ministers. When jailed they went on hunger strikes which compelled the government either to force-feed or release them. If let go they promptly began committing outrages again."

For Alice Paul the Pankhursts were electrifying. She instantly felt at one with them. They were the clarifying experience. They made her not only a lifelong suffragist, but a very particular kind of suffragist. In one swift visionary moment they showed her that women must adopt revolutionary methods, that no one was ever going to give them the vote; they must *take* the vote.

Alice Paul worked with the Pankhursts in England for three years; they proved to be the most formative years of her political life. Here in England she learned everything she, in fact, was going to learn about how to wage organized and vivid warfare for suffrage. She also learned how much punishment she could, and needed to, withstand: she demonstrated, she went to jail, she was forcefed. She returned to America in 1910 a dedicated, militant suffragist, ready to lay her talents and her experience before her own suffrage movement. But the American movement was so demoralized it was unable to make use of her.

In 1910, four years after Susan B. Anthony's death, active struggle for a federal Constitutional amendment on woman's suffrage had all but come to an end. The suffrage amendment had never been brought to a vote in the House of Representatives, and in the Senate it had been voted on only once, in 1887. Nationally, not one politician was interested in or supportive of suffrage. Each President, in turn, had been oblivious to its merits if not downright antagonistic. Thus the National American Woman Suffrage Association (NAWSA) had in effect turned its entire attention to the states, hoping to make each state in turn enfranchise its women. The result was that between 1890 and 1911 the franchise had been granted in six Western states—Wyoming, Colorado, Utah, Idaho, Washington, California—and then: nothing. For years, nothing. The suffragists themselves were still vital, but the organization was all but moribund.

Alice Paul had become convinced in England that the only way to gain suffrage in America was through federal amendment; a continuation of state campaigns, she felt, was a crucial waste of time and energy. What's more, the traditional genteel methods NAWSA employed were not sufficient; something *more* was required. She went before NAWSA to persuade the organization to send her to Washington to work for a federal amendment. It took her two years to do so, and then it was only with the influential support of Jane Addams that she was able to make the national organization capitulate to her scheme—on the condition that she never ask them for money or support of any kind.

She arrived in Washington in December of 1912 with a list of names in one pocket, about three dollars in the other pocket, and two co-workers: Lucy Burns and Crystal Eastman. These three together became the Congressional Committee of NAWSA. Within the next four years, as Alice Paul and her followers continued to come into conflict with the parent organization, the Committee became the Congressional Union and then, finally, the independent National Woman's Party. Throughout each of its incarnations the committee, the union, the party—indisputably—was Alice Paul.

She proved to be an extraordinary organizer, fund-raiser and politician. She permitted nothing into her life or her con-

sciousness that did not have a direct bearing on suffrage. She lived in a cold room so she wouldn't be tempted to read novels late at night. She worked for months at a time without removing her hat. Her manner was so intent, so direct that it was often experienced as abominable rudeness. This manner induced in those around her either awe and loyalty or amazement and distaste. Once, when a volunteer who had worked very hard suddenly disappeared from headquarters, Alice Paul inquired after the woman. She was told that the volunteer was offended by Alice Paul's failure to thank her for her work. Alice Paul replied in wonder: "But she did not do it for me. She did it for Suffrage. I thought she would be delighted to do it for Suffrage."

Suffrage. That was the holy word. And precisely because it *was* a holy word for her she was able to swell the ranks of the Woman's Party to 50,000 in a few short years and induce an extraordinary solidarity in those who followed her. She brought to the flagging suffrage movement two things: the boldness of outrageous tactics and the idea—brought from England—that the suffragists must hold the party in power responsible for not passing the federal amendment. She organized massive demonstrations, the most famous of which took place on Pennsylvania Avenue in March of 1913, the day before Wilson's inauguration. Five thousand women marched. They were attacked by hoodlums, were not defended by the police and the next day hit the front page of every newspaper in America, thereby immediately putting woman's suffrage back on the American political map.

Alice Paul continuously organized disruptions at meetings, rallies, functions of all kinds. She threw a picket line around the White House—hers were the first suffragists ever to picket the White House—that consisted of women carrying signs that asked: "Mr. President, how long must women wait for liberty?' She and her followers got arrested, went to jail, hunger-struck, were force-fed, again made front pages across the country—and gained consistently growing attention and sympathy. For eight solid years Alice Paul and the Woman's Party kept up this kind of battering political activism—plus endless meetings, conferences, conventions, local and state demonstrations—never stopping, never relenting, creating an insistent atmosphere of social turmoil that demanded and gained national attention.

To Carrie Chapman Catt, the head of NAWSA, Alice Paul and the Woman's Party were anathema. Mrs. Catt, the most powerful political leader the woman's rights movement ever had, saw herself as comparable to presidents and heads of state, with the same responsibility to use traditional methods of political bargaining and compromise. To her, Alice Paul was an irresponsible radical whose idea of holding the party in power responsible was utterly wrongheaded and whose actions were detrimental to the cause of suffrage. In short, the Woman's Party was to NAWSA as—in our own time—the Radical Feminists are to NOW. The tragedy—then as now—was that neither the radicals nor the traditionalists saw that they were each necessary to the other. Carrie Chapman Catt could not seee that Alice Paul's activism revitalized NAWSA and brought to an entire nation the urgency of woman's suffrage as probably no other kind of action could have. Alice Paul, for her part, never understood the need for conservative political behavior that determined Mrs. Catt's NAWSA policies. But beyond question, it was the two kinds of leaders, organizations and policies that together pushed the cause of suffrage through to its victorious conclusion.

In one vital sense, however, Alice Paul's vision had an edge over Mrs. Catt's. Mrs. Catt was, at all times, prepared to use political expediency to gain suffrage. This required that she never challenge the myriad "protective" laws that governed American women's lives with regard to work, property, marriage, place of domicile and obligations of citizenship. From the very first, Alice Paul saw suffrage and these protective laws as all of a piece, as all together speaking to the question of full citizenship for women. She said in 1913—and she kept on saying it—"Equality not protection." Mrs. Catt and NAWSA saw this statement as revolutionary and divisive nonsense. She told herself and her followers that once they gained suffrage all else would follow. Alice Paul said no, we'll have to fight for it just as we're fighting for suffrage.

In 1923, three years after suffrage was granted, Alice Paul and the Woman's Party drafted the Equal Rights Amendment, which stipulates that no right be abridged by either the federal government or the states on account of sex. That amendment was meant to be—and, indeed, certainly is—the proper accompaniment to the suffrage amendment; it is the other side of the coin of enfranchisement. Yet the struggle for suffrage had exhausted both the nation and the suffragists; most people simply did not have the emotional energy for the ERA. Only Alice Paul had the energy. For nearly 20 years she was able to keep the issue of the ERA alive before the Congress and before many state legislatures, but with the onset of the Second World War the entire question was submerged. The new wave of feminism in the late 1960s brought the ERA surging back into American life. It was there, ready and waiting to be rediscovered, only because of all those long years of steady, plodding work on the part of Alice Paul and her party.

The steadiness, Alice Paul said once in answer to a question about her unwavering steadiness in the cause of woman's rights: "Well, I always thought once you put your hand on the plough you don't remove it until you get to the end of the row." The 91-year-old woman sitting in the ground-floor room in the nursing home in Ridgefield, Conn. still has her hand on the plough. For her, there is no past; there is only an ever-accumulating present. Every day of her life she lives with the ongoing need to see the Equal Rights Amendment become federal law. This overriding "reality" is what made her a leader 60 years ago, it is what will make her a leader until the last breath passes from her body. A number of years ago, from the nursing home telephone, she directed the struggle for the passage of the ERA in the Maine legislature. When I visited her she organized *me*. Halfway through one of our conversations she suddenly leaned across the little table on which her frail arms rested and said to me: "My dear, do you think you could get yourself elected to the New York State Legislature? We *need* someone there." And then again, when I was leaving her and promising to return in a week, her last words to me were: "Could you bring me news of what's happening in Indiana? It's a very important state, you know."

Her life has in no way been either ordinary or proportionate. She has been neither mother, wife nor lover. Neither is she socially adept or culturally sophisticated. Her sense of historical balance is limited. She has no particular affection or understanding for the current generation of feminists; she does not see that the young radicals among them are exactly what she herself was 60 years ago. The gift of perspective is not hers.

What she has been, though, and what she is at this moment, is the embodiment of the revolutionary's narrow intensity and burning energy for "the cause." Her life has been a vessel into which the necessity of woman's rights has been poured. She *is* the cause itself. And if Alice Paul had not lived, and been exactly what she is, we, the women of America, would not be today exactly what we are.

[From the New York Times, Jan. 10, 1977]

A SALUTE TO ORIGINATOR OF E.R.A. IN 1923

(By Dee Wedemeyer)

Alice Paul, who has spent almost her entire life working for two Constitutional amendments, will celebrate her 92d birthday tomorrow, an occasion feminists are saluting and using as a rallying point for ratification of the proposed equal-rights amendment that Miss Paul drafted more than 50 years ago.

"A lot of us really did not know that the E.R.A. has been around since 1923," said Elaine Hendrie of Sayville, L.I., a coordinator of the Alice Paul Birthday Salute sponsored by the National Organization for Women. "She's 92. She ought to have her amendment ratified before she dies.

"We have come to think it's important to show Alice Paul that all the 54 years she worked so hard has really been worth it."

NOW is sponsoring a birthday party benefit in Washington for the proposed amendment. It will be at the headquarters of the National Woman's Party, which Miss Paul founded.

STATE EVENTS PLANNED

Some chapters of NOW will be holding other events in her honor ranging from parades to state-capitol vigils, and in the 16 states where the E.R.A. has not been ratified, supporters have been urged to write legislators asking for ratification as a birthday present for Miss Paul.

Alice Paul Day is being proclaimed in two states: by the Governor of Pennsylvania, the state where she earned a bachelor's degree at Swarthmore College and a master's and doctorate at the University of Pennsylvania, and by the Governor of New Jersey, where she was born, Jan. 11, 1885, and now lives in Moorestown.

Alice Paul came from a well-to-do Quaker family. As a young graduate student in England, she joined the British Suffragists, was arrested seven times, jailed three times, refused to eat and was force-fed by nasal tube twice a day for four weeks, a painful and bloody experience.

When she returned to this country she brought the more militant and colorful British tactics to the American Suffrage movement. She founded and became chairman of the National Woman's Party, which had 50,000 members.

'NEW LIFE' FOR SUFFRAGE FIGHT

Dr. Rosalind Rosenberg, assistant professor of history at Columbia University, noted that there were larger organizations and leaders with more grass-roots support, including the National American Woman Suffrage Association, headed by Carrie Chapman Catt. But Miss Paul, Dr. Rosenberg went on, "really brought new life into the battle for suffrage from 1913 on by focusing interests on a Federal amendment rather than by fighting a state-by-state battle."

Almost immediately after the women's suffrage amendment was ratified in 1920, she turned to the equal-rights amendment, which she is credited with drafting (al-

though in 1943 it was rewritten in the Senate Judiciary Committee).

When the amendment was proposed, nearly every woman's organization in the country, including the National League of Women Voters—now a supporter—opposed it on the ground that women needed protection under the law, not equality.

"I think it is fair to say she was ahead of her time," said Dr. Barbara Solomon, who teaches a women's history course at Harvard University. "And if you believe in E.R.A., we are still trying to catch up."

INFLUENCE ON U.N. CHARTER

During the last 50 years, Miss Paul steadfastly refused efforts to have a biography done, but Amelia Fry, an oral historian at the University of California at Berkeley, finally got her to sit for interviews in 1972 and 1973—but only after the E.R.A. passed Congress, the step necessary before its submission to state legislatures.

In the 1920's Miss Paul earned three law degrees. She went to Europe and organized the World Woman's Party. She lobbied in the League of Nations for sex equality and was instrumental later in having a reference to sex equality included in the preamble to the United Nations Charter.

When World War II broke out, Miss Paul returned to Washington and resumed her efforts on behalf of the E.R.A. In 1972 she left her home in the National Woman's Party headquarters and moved to her cottage in Ridgefield, Conn., where she worked by telephone for ratification until 1974, when she suffered a stroke.

Miss Paul lives in the Greenleaf Extension Nursing Home, a small Quaker home in Moorestown. She is small and stooped, and her immediate concerns are those caused by the inconvenience and discomfort of a worn body that confines her to a wheel chair and makes it difficult for her to find her eyeglasses, even when they are a few feet away.

Her nurses say that she loves lavender water and visits with a cousin, who is also in the home, and that sometimes she asks to see the medals she has received in recent years. When a group from Yale called to give her a medal recently, a nurse said she rose to the occasion and told them that it was a fine school and that it was too bad she could not have gone there when she was a young woman.

She said she felt unprepared to give a newspaper interview but, after being coaxed by a favorite nurse's aide, she agreed to answer a few questions. She then asked some of her own: Was there news of more than 34 states ratifying the E.R.A.? Did the interviewer believe in protective legislation for women?

The interview was tiring for Miss Paul, but as she went on, she recited dates, spelled names, even recalled that she had joined the British suffragists by paying a shilling and signing her name.

SURPRISED BY TRIBUTES

"You say people are going to celebrate all over the country?" she asked. "I'm very surprised to hear it."

No, she was not disappointed that the E.R.A. had not yet been ratified and, yes, she did believe it would be ratified by four more states to make it law.

"By this time there has been so much support," she said, and stopped to refer to a telegram sent last year by Betty Ford. "All these [letters and telegrams] show the great amount of support accumulated behind E.R.A., so I'm not disappointed because the volume of support exceeds what I dared hope for.

"The whole drawer there is full of support, each one saying they are working so hard and doing so much, so I think we are going to get it."

Her guiding principle: "I've just had the guiding principle of complete equality under the law."

The high point of her life, she said, was helping to pass the 19th Amendment, which gave the vote to women. "The thing I think that was the most useful I ever did was having a part in getting the vote for all the women, because that was a big transformation for the country to have one-half the country enfranchised. While I didn't do it alone, I got a good deal of the credit because I happened to be there."

And if she had time for a third campaign? She replied by asking to have the E.R.A. read aloud. "It seems to me," she said. "It sounds to me kind of complete."

WRITER NOTES HER TENACITY

William L. O'Neill, writing in "Everyone Was Brave," described Miss Paul as "probably the only charismatic figure generated by the feminist movement in its salad days."

"Once committed to a project, not ridicule, criticism or repeated failure could shake her conviction," he wrote.

Inez Haynes Irwin, in "The Story of the Woman's Party," said that it was impossible to say no to Miss Paul, that she had a way of getting people who never planned to work or give money, to volunteer. Once she asked Maud Younger to deliver the memorial address for the women's-rights leader Inez Milholland and Miss Younger replied: "I can't. I don't know how to do it."

"Oh," said Alice Paul, "just write something like Lincoln's Gettysburg Address."

Miss Paul said that through the British suffragists she learned the strategy of putting responsibility on the governing powers, no matter which party.

The day before President Woodrow Wilson arrived in Washington for his inauguration, she organized a march that catapulted the suffrage cause onto front pages of newspapers when the women's banners were torn apart by rowdies and a woman injured.

Early in the Wilson Administration she led a small group of women to visit the President. "We told him how we felt," Miss Paul recalled. "I remember he replied. He said, 'Well, I'm only one man. I'm a Democrat and I'm bound by the Democratic Party, and the Democratic Party hasn't come out for it.' So he said, I can remember the words were: 'Concert public opinion . . . then I, as a humble member of the Democratic party, can help.'"

Newspapers of the day are full of Miss Paul's efforts to "concert" public opinion and of her arrests at demonstrations. Under her direction, members of the National Woman's Party became "Silent Sentinels" outside the White House, where they would stand wearing white dresses and carrying purple, white and gold banners that expressed such sentiments as, "How Much Longer Must Women Wait?" or "An Autocrat at Home Is a Poor Champion of Democracy Abroad."

In 1921 Miss Paul and Mrs. Oliver H. P. Belmont of New York announced plans to reconstitute the National Woman's Party. Mrs. Belmont donated funds to buy the headquarters building in Washington. They announced a campaign to work for blanket equality.

In 1923, on the 75th anniversary of the first women's rights convention at Seneca Falls, N.Y., Miss Paul spoke at a meeting at which the organization formally voted to work for E.R.A.

"I was standing on the platform in a white dress, I remember, all nice and fluffy," the frail woman recalled in the interview last week, "and they brought an enormous basket full of ideas of what we ought to do. As I read them, they all said women have been spending quite a long time celebrating getting the vote. We can't take out the little slip of paper, the ballot, and give that to our children. We want something to eat, something they can grow strong on. We hope you have something better to offer than paper ballots.

"I read those notes out to the audience, and I said of course I agree we can't take these little ballots and give them to our children, and so I want to submit to you a program for complete equality in every field."

The women voted, she said, to make the equal rights amendment their next campaign. At a Congressional hearing, she recalled, woman after woman got up and opposed the amendment, largely because it would mean the loss of protective labor laws for women.

"And then," she said. "We started a long campaign of educating women."

DISASTROUS OIL SPILLS

Mr. RIBICOFF. Mr. President, since December 15, 1976, some 11 oil tanker mishaps have occurred off the American coastline. Since the incident involving the *Argo Merchant*, millions of gallons of oil have spilled into the ocean, rivers, and bays, primarily in the east coast. Oil slicks have moved ashore and have killed countless waterfowl and have threatened to cause irreparable damage to delicate ecosystems along the shoreline and in tidal estuaries.

In addition to the environmental damage and potential economic losses to fishing and tourist industries in areas affected by the oil spills, a sizable sum of money is involved in the cleanup operations. All too frequent, private citizens and local jurisdictions must absorb the cost of the cleanup themselves. This is clearly unfair and provision must be made for just compensation for those injured by spills. Thus, I am pleased to join with our distinguished colleague from Delaware, Senator BIDEN, in introducing the Federal Oil Pollution Liability and Compensation Act of 1977.

Provision must be made to cover the cost of cleaning up after oil spills and to penalize those responsible for permitting such spills to occur. This legislation establishes a $250 million Federal Oil Pollution Compensation Fund which will assure payment of any cleanup costs and oil spill damages. This urgently-needed measure also imposes unlimited liability for all cleanup costs on the owner and operation of the vessel, facility, or port from which a spill occurs. Other damages beyond cleanup costs resulting from a spill would also be imposed.

Mr. President, a very timely and well-written article on the recent spate of oil spills and the problems associated with the cleanup operations appears in the current issue of Sports Illustrated. The conditions on Nantucket are representative of similar problems on the Thames in Connecticut and in the Chesapeake Bay. I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TROUBLED BY OILED WATERS

(By Dan Levin)

There is something surreal about Nantucket in winter, especially this winter. In Nan-

tucket town, all ancient cobblestone and brick, a pianist plays Clair de Lune during dinner at the Jared Coffin House, Neither he nor the music seems to belong, so far away in a deary sea. Candlelight flickers around him, reflected in fine old mirrors, and the voices of the diners are hushed, but they speak of an ugly thing, the wreck of the 641-foot Liberian tanker *Argo Merchant*. Its 7.6 million gallons of No. 6 oil are streaming out to sea, for now, at least, but it is Nantucket's sea, and that does not seem real.

The *Argo Merchant* ran aground in a storm on Dec. 15, 27 miles southeast of Nantucket, and the mishap seemed to set a pattern for what was left of 1976, as Liberian oil tankers all but laid siege to the western Atlantic. On Dec. 24 more than 7,000 gallons from the *Oswego Peace* seeped into Connecticut's Thames. Three days later the tanker *Olympic Games* spilled 134,000 gallons of oil into the Delaware River at Marcus Hook, Pa. Then on the 29th the tanker *Daphne* went aground off Puerto Rico, with 14 million gallons aboard, unspilled but menacing. But the greatest outrage is the *Argo Merchant's*—the worst oil spill in U.S. history. Conservationists are fuming, and on the Delaware and Thames and off Nantucket, birds are dying.

It was not just how much oil; it was also where it spilled. Nantucket had always seemed inviolate. Some 120 miles to the northeast is one of the world's most productive commercial fishing grounds, Georges Bank, with stores of cod, haddock, pollock, flounder, lobster and sea scallops. Some scientists are predicting doom for Georges if the oil gets there and sinks. Some say it already has. But there is agreement as to the devastation of the area's bird life, especially the diving birds—the loons, the auks and the murres.

Dozens of scientists have arrived in Nantucket to study oil-soaked birds, which are coming ashore sick and dying, and to prepare for the oil slick, if it should follow. The man coordinating the scientific effort is Dr. Wesley Tiffney, an ecologist, who says, "Nantucket is the most unpolluted ecosystem on the New England coast. That is why a lot of people are up here and willing to work very hard."

The longer the slick stays at sea and the more it spreads out, the faster it will break up and dissipate. But the unseasonable west winds that have been nudging it southeast for the past two weeks will certainly not blow forever. A typical New England winter nor' easter could come at any time, and the island built by whale oil could be undone by a very different kind.

If the oil from the *Argo Merchant* reaches the shores of Nantucket it will cause a disaster. There are two means of livelihood on the island, a $1 million bay scallop industry, and tourism; summer visitors who stay from one to seven days are worth $10 to $15 million to the island's economy, and most come for the beaches and the fishing. The scallops might not survive a blanket of oil, and the tourists might just stay away. And no one knows how Nantucket's famed bluefish and striped bass runs would be affected.

The *Argo Merchant's* oil has been variously described as having the consistency of chocolate pudding, Vaseline and Jell-O. In any case, it is the kind that squishes between your toes and sticks. Three pollution-control firms have been retained by the Coast Guard, and they are standing by to boom off coastal areas. But they cannot protect all the miles of shore at the same time, or any shore in the high winter surf that is the rule on much of the island.

On Nantucket, though, life goes on as always. It is hard to fear something you cannot see. To find out where the slick is on any given day, a Nantucketer must buy an off-island newspaper or call the Coast Guard at Otis Air Force Base, 35 miles away on Cape Cod. On Jan. 2 the slick was 27 miles off the island covering an area 200 miles long and 100 miles wide. A Coast Guard plane goes out each day to locate the slick—and it usually takes most of the day to do so—and to plot its expanding perimeter. Guard spokesmen claim that the slick poses no threat to either Nantucket or Georges Bank, but the Guard took a lot of flak for failing to prevent the spill, and there are those who fear its optimism is mere whistling in the dark. Still, for now, the only tangible reminder of what waits off-shore is oil-soaked birds.

To capture them, and to save some, five Nantucket sportsmen have volunteered to patrol the island's shorelines in four-wheel-drive vehicles—the 80 miles of sound and ocean beach and six great ponds. They have plenty of assistants—some days 60 or more—and the assistants have been warned to leave the birds alone. One young girl was badly bitten on the nose by a gull, and too many exhausted birds are being chased back into a rough surf to die. But rescuing birds is a crusade on Nantucket. On Christmas Day, Bob Marks, one of the five coordinators, had 36 calls from people who had spotted oiled birds. One caller said he had been waiting 4½ hours for Marks to make his patrol. "Don't you want to pick it up?" he yelled. "It's Christmas," Marks said. "Well, the birds don't have Christmas," replied St. Francis of Nantucket.

They didn't. Not this year, at least. As the slick spread, their hazards grew; the birds are attracted to it. For one thing, oil calms the seas and provides a place to rest. For another, diving, fish-eating birds, like loons, auks, and murres, seem to associate slicks with feeding predators and scraps of fish. The various species of sea gulls have suffered the least, because they do not dive. But many diving birds have become completely coated with oil, which creates a variety of problems. Oil destroys the insulating capacity of their feathers, and the hollow cores, normally warm, become cold. Many birds contract pneumonia and freeze to death. Others spend so much time preening—trying to clean themselves—that they are too exhausted to feed, and starve to death; or they are poisoned when they swallow the toxic oil.

The rescue efforts began on Dec. 23, eight days after the *Argo Merchant* ran aground, and by Jan. 2, 88 dead birds had been found and 55 live ones captured. Few were ducks, because they are rarely found far at sea, and there has been little effort made to catch the numerous gulls. They are also relatively hard to catch. Efforts have been concentrated on the loons, because they are almost helpless on land, and the murres and auks, which are much less numerous than gulls.

Most of the birds have been found by Marks, a federal game warden who manages 1,540 acres of Nantucket moor, dunes and beach. His patrol area includes Nantucket's southeast shore, the corner of the island closest to the slick. One day last week he left his home at 8 a.m. in a cold drizzle and drove east through the moors, a solemn umber now, past lone, distant houses—typical Nantucket winter scenery. He stopped in the tiny oceanside village of Siasconset, called Sconset, where roses cover all in June and where the words quaint and picturesque most certainly were coined. Marks pointed out to sea and said, "*Argo Merchant*, 27 miles." Once again it did not seem real.

On the beach Marks first stopped 50 feet from a common murre, which was picking oil from its wings. "That's what'll mess him up," he said. The murre looked like a small penguin, about a foot high, white chest and black back, its body vertical; if any bird ever wore a facial expression, this one did. It was one of bewilderment. Marks swiped at it with his long-handled fishing net, but the murre escaped to the water.

It was a bad day for gathering oiled auks and murres. But that any were seen tells the scientists on Nantucket a great deal. It is so rare for them to come ashore that Tiffney surmises that tens of thousands may have died in the slick. "That's the reason why we spend so much time," he says. "It may be a drop in the bucket, but it's all we can do."

Marks picked up a dead gull and brought it to a hangar at the Nantucket Airport, where all the island's bird casualties are weighed and identified. The dead ones are flown to a laboratory on Cape Cod, the live ones packed in ventilated boxes for the daily flight to the Felix Neck Wildlife Sanctuary, 12 miles west on Martha's Vineyard; there are no facilities on Nantucket for nursing oiled seabirds.

On the Vineyard a detergent called Poly-Complex A–11 is used to remove the oil. It was developed to wash out the bilges of ships, so it is not surprising that only 25 of the 35 birds treated liven through the cleansing process. It is estimated that 75% to 80% of those will survive. Some will have to remain in captivity for up to a year, through a complete molting cycle, because A–11 removes the natural oils from the birds' feathers, making them incapable of flight.

By that time the cost per bird, involunteer man-hours, in materials, and in airplane time, will be enormous. But the knowledge gained will be invaluable. Sanctuary director Augustus Ben David II says, "I think society owes at least this much to the birds. We inflict the damage, don't we?"

Back on Nantucket, Tiffney's team of scientists has prepared for the worst, trying to gain a greater understanding of Nantucket's ecology without oil. He says, "Pollution of any kind throws a natural ecosystem off-center, as if you took a sledgehammer to a clock. Given a disaster of this kind, we try to understand how the clock works before the hammer hits. That will help us to predict how long it will take for it to keep good time again. Of course, all our efforts could be a waste of time, and we hope they will be."

On Nantucket last week, on the brick sidewalks and under the ancient elms, and in the fairy-tale lanes of Siasconset, it was assumed they would be. How could they not?

MINING IN ALASKA—THE EFFECTS OF WITHDRAWALS

Mr. STEVENS. Mr. President, Federal withdrawals in Alaska for the implementation of the Alaska Native Claims Settlement Act, including lands for study as potential additions to the National Forest, Wildlife Refuge, Parks, and Wild and Scenic Rivers Systems, create an uncertain situation for Alaska's economic future. The application of the mining and mineral leasing laws to these future dispositions of these withdrawals is an important issue to Alaska.

The December 1976 issue of the American Mining Congress Journal carried an article concerning these withdrawals. The article details the different Federal withdrawals now extent in Alaska and discusses future land policies concerning different withdrawals.

I commend this article to the Members

of the Senate to give some idea of the problems accompanying Federal withdrawals in Alaska. I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MINING IN ALASKA—THE EFFECTS OF WITHDRAWALS

(By H. Stanley Dempsey)

A review of the withdrawal in Alaska of lands from mineral activity is extremely timely for Alaska presents a vivid case study of much that troubles the mining industry and our nation.

Domestic mineral availability is a subject that has received increasing amounts of attention in the past few years. And appropriately so. We are a nation whose economy is based on minerals. Yet today we must import a substantial percentage of our domestic needs. And projections indicate that this trend will continue to accelerate.

U.S. Geological Survey forecasts of our national dependence on foreign mineral supplies for the year 2000 are grim. They indicate that we shall be completely dependent on imports for 12 commodities, more than 75 percent dependent for 19 other commodities, and more than 50 percent dependent for 26 additional commodities.

ALASKA VIRTUALLY UNEXPLORED

The vast, virtually unexplored, state of Alaska offers hope that the mining industry can prove USGS projections take too bleak a view of the situation.

In Alaska a combination of vast land area, small population—with its equally small amount of political leverage—and inadequate attention by the mining industry has made it possible for heroic gestures to be made on behalf of wilderness and wildlife. The industry must become involved to prevent these gestures from becoming permanent fixtures on Alaskan land use maps.

Alaska is approximately one-fifth the size of the lower 48 United States. Its land area is about 375 million acres. The states of Colorado, Utah, New Mexico and Arizona could easily be placed within its borders—and there would be enough vacant acreage left to include the entire state of California. Superimposed over a map of the lower 48, Alaska stretches from the Atlantic coast of South Carolina to the border between Canada and Minnesota. The Aleutian Islands extend on this overlay from the eastern border of New Mexico to the Pacific coast of California.

STATE IS A LAND OF SUPERLATIVES

Alaska is truly a land of superlatives. We believe this will be true, too, of the state's mineral potential. Regional geology, plus the discoveries of economic ore bodies in such widely separated areas as the Brooks Range and southeast Alaska lead geologists to believe Alaska's mineral potential is comparable to that of western Canada and the western United States. At present we do not have adequate geologic information to further quantify this potential.

Alaska's population is 302,000—a population density of approximately one person for each two square miles. If Massachusetts had a comparable population density, it would have a state-wide population of 4,000. Colorado's population on the same basis would be 54,000. Alaska is a big—largely uninhabited—land.

Prior to the granting of statehood to Alaska in 1959, the land ownership picture was extremely simple. Less than one percent of the state was in private ownership. Over 99 percent was public domain, most of which was open for mineral activities. The major exception was Naval Petroleum Reserve No. 4 ("Pet 4"), an area of almost 24 million acres withdrawn from mineral leasing in 1923.

Today—17 years later—probably no more than 20 percent of Alaska is open to location for metalliferous minerals. Less than 10 percent is available under the various federal mineral leasing acts, and several legislative proposals, which would reduce even further the amount of land available for mineral activity in Alaska, are presently before the Congress.

ALASKA NATIVE CLAIMS SETTLEMENT ACT MAIN CAUSE OF COMPLEXITIES

The Alaska Native Claims Settlement Act, which was enacted in 1971, is the primary cause of the existing complexities of Alaskan land ownership. The act was designed to settle aboriginal claims to the land by acknowledging legitimate and reasonable native requests for a sufficient land and economic base to permit them to become economically self-sustaining. The settlement calls for payment of almost $1 billion to Alaskan natives and the grant of 40 million acres to them. These grants and conveyances are to be made to the natives through 12 Regional Corporations and more than 200 Village Corporations.

In considering availability of lands for mineral purposes, it is necessary to look only at the conveyances of land to the Native Regional Corporations. Lands transferred to the village corporations in almost all instances do not carry mineral rights with them. Those mineral rights remain vested in the regional corporation for that area.

It is also unnecessary for the purposes of the present discussion to review the complexities of the land transfer scheme called for under the Native Claims Settlement Act. In general the act authorized the withdrawal from all forms of appropriation, including mineral leasing and mining, of over 102 million acres for purposes of native selection. These withdrawals were made through a series of Land Orders issued in March 1972. The village corporation selections were completed by December 18, 1974. The regional corporations selections had to be completed within the following year—or by Dec. 18 1975.

NATIVE CORPORATIONS OVERSELECTED LAND ENTITLEMENTS

The act provides that conveyances of selected lands to native corporations will be subject to existing rights at the time of selection and that such lands be surveyed prior to conveyance. Because of the possibility of the presence of preexisting rights within areas selected, and also to anticipate the likelihood that areas—once surveyed—would be smaller than anticipated, the native corporations overselected.

The regional corporations have selected 41.3 million acres—or more than twice their 18 million acre entitlement. The village corporations have selected 24.5 million acres. As a consequence, 65.8 million acres—out of the original 102 million acres—remain withdrawn for native selection purposes. The balance—36.2 million acres—reverted to a (d)(1) or "public interest" classification. More about (d)(1) withdrawals later.

As mentioned previously, one of the purposes to be served in the Native Claims Settlement Act was to provide the natives, through their land holdings, with an economic base. The regional corporations were quick to appreciate the opportunity they had been given to select land of economic potential. In many cases they have done extensive surveying of the mineral potential of the lands available for their selection. And selection decisions frequently have been prompted by favorable evidence of mineralization. The regional corporations can be expected to generally favor the development of their mineral resources. As the eventual owners or managers of the mineral rights to 40 million acres the regional corporations will be key players in the efforts of the mining industry to develop the mineral potential of Alaska.

SECTION 17(d) HAS GREATEST IMPACT ON LAND AVAILABILITY

Section 17(d) of the Native Claims Settlement Act no doubt has had a greater adverse impact on the availability of public lands in Alaska for mining purposes then any other provision of that act—or any other act, for that matter.

Section 17(d) contains two subparts. Seventeen (d)(1) authorizes the Secretary to withdraw any unreserved lands in Alaska if he should determine that such a withdrawal is necessary "to insure that the public interest in these lands is properly protected." These withdrawals are to be made under the Secretary's "existing authority," such as the Pickett Act. Consequently, Section (d)(1) withdrawals in general do not withdraw land from metalliferous location, although they do withdraw it from mineral leasing. Under this provision, 65.8 million acres have been withdrawn indefinitely.

The excess lands set aside for native selection—36.2 million acres—also reverted to (d)(1) status, as previously noted. However, when these lands were withdrawn for native selection, they were withdrawn from all forms of mineral entry—including entry for metalliferous location. Absent executive action to restrict the extent of withdrawal, these lands revert to a (d)(1) category with their withdrawn status completely intact. Consequently, at the moment 36.2 million acres are in this category and are not open to leasing or to location. As native selections continue to be processed, this category of (d)(1) lands will grow.

AREA AS BIG AS FLORIDA ALREADY WITHDRAWN UNDER (d)(1)

To put the (d)(1) situation into perspective—an area the size of the state of Florida presently has been withdrawn from metalliferous location under this provision. An area the size of Ohio would be added to this withdrawal upon completion of the native selection processes. The withdrawal from both location and leasing will total 62 million acres.

Lands equalling in size the state of California have been withdrawn to date from all forms of mineral leasing under Section (d)(1). These leasing withdrawals will total 128 million acres after native selection—or an area approximately equal in size to the combined areas of Colorado and Wyoming.

SECRETARY TO WITHDRAW 80 MILLION ACRES UNDER (d)(2)

The second part of Section 17—Subsection (d)(2)—directs the Secretary to withdraw up to 80 million acres—twice as much land as was given to Alaska natives under the act—from all forms of appropriation—including the mining and mineral leasing laws—while the suitability of these lands for inclusion into one or four systems is determined. These four systems are National Parks, National Forests, Wildlife Refugees or Wild and Scenic Rivers.

Pursuant to this statutory directive, Rogers Morton, then Secretary of the Interior, withdrew about 80 million acres, and he submitted the Administration's (d)(2) proposal to Congress in 1973. That proposal is called the "Alaska Conservation Act of 1975."

I am not going to discuss this bill in great detail but I do want to make a few comments about it.

PRESIDENT PROPOSES TO DOUBLE NATIONAL PARK ACREAGE

Early this fall at Yellowstone National Park, President Ford announced his "Bicentennial Land Heritage Act." He proposed doubling the size of our National Park System and the National Wildlife Refuge System. This would be accomplished, his message makes clear, by favorable congressional action on the Administration's (d)(2) proposal. Our new parks and refuges will be created in Alaska.

The National Park System presently includes 31 million acres. The administration's (d)(2) bill would add 32 million acres to this system. Thirty-two million acres presently are set aside for National Wildlife Refuges. The administration's bill would add 31.5 million acres to this total.

The magnitude of the Administration's (d)(2) proposal is perhaps better understood by looking at the numbers of parks and refuges involved. At present there are 287 sites in the National Parks System. The proposed doubling would create only nine new parks. It would add 3 million acres to Mt. McKinley National Park. Today there are 378 National Wildlife Refuges. The President's bill would double the acreage with nine new refuges in Alaska.

The proposed Alaska Conservation Act also would add 18 million acres to the National Forest System and 834,000 acres to the National Wild and Scenic River System.

Mining would be handled in the following manner in these four systems. The national parks would be withdrawn from leasing and from entry under the mining laws. Valid existing claims would have to be recorded in a manner to be prescribed by the Secretary and failure to apply for patent within three years after recording would create a rebuttable presumption that the claim was invalid.

Wildlife refuges also would be withdrawn from entry or appropriation under the mining laws. The Secretary would have discretionary power to issue permits for exploration and development of mineral resources—presumably under a leasing system yet to be devised—although he is directed to allow only a minimum use of surface area. Claims would have to be taken to patent in the same manner as they would be in the national parks.

Existing law would continue to govern with respect to access to the 18 million acres of new national forests. However, it is expected that certain portions of these forests would be set aside for wilderness study within three years after enactment of the act.

The Wild and Scenic Rivers generally also would be withdrawn from mineral activities.

In summary, the administration's (d)(2) bill would place 64 million acres (or 78 percent of all of the (d)(2) lands)—an area slightly larger than the state of Wyoming—into systems which would withdraw them from mineral energy. Of the remaining 18 million acres (or 22 percent of such lands) to be administered for multiple use by the Forest Service, it can be anticipated certain areas will be set aside for Wilderness study.

ADMINISTRATION BILL ONE OF SEVERAL PROPOSALS

The Administration's bill is only one of several (d)(2) proposals the Congress is now reviewing. Congressman Udall's proposed "National Interest Lands Reservation Act"—H.R. 2063—would set aside 106 million acres—an area larger than the state of California. One percent of that land—1.6 million acres—would be added to the national forest system and mining would be permitted within the forests only by a permit and lease system and only if the Secretary determines that the minerals are sought for a critical national need, that no suitable alternative exists, and that the area would not be permanently impaired. Mining would be prohibited on the remaining 104 million acres.

The state of Alaska has suggested a (d)(2) bill which would place only 37 million acres into the four systems. An additional 62 million acres would be designated "Alaska Resource Lands" and would be jointly administered by the state and the federal government. These would be administered on the basis of prime use, and inconsistent uses would not be permitted. We hold out no great hope that mining would be declared the prime use for much of these 62 million acres. Thus under the state's proposal, 99 million acres—less that portion of the 37 million acres dedicated to national forest use—would likely be withdrawn.

If the 80 million acres presently proposed for (d)(2) purposes are permanently withdrawn for mineral activity, the U.S. Geological Survey estimates the loss in mineral production to the U.S. may be $30 to $40 billion in the next 100 to 125 years, although the potential value probably never will be known after withdrawal.

As mentioned earlier, the impulse to make heroic gestures on behalf of wildlife and wilderness in Alaska seems irresistible. But heroism for the American consumer, and for American working men and women seems about to be lost in the shuffle.

CONGRESS MUST ACT BY DECEMBER 1978 ON (d)(2) LANDS

The Native Claims Settlement Act requires that Congress act on the (d)(2) lands by December 1978. There are guesses that the only action Congress will take by that time is an amendment to the Native Claims Settlement Act which will give them additional time to solve the (d)(2) problem. In the meantime, of course, those lands will be closed to entry under the mining and mineral leasing laws.

While the Native Claims Settlement Act is the major matter affecting the availability of public lands in Alaska, there are others.

STATE ENTITLED TO 35 MILLION ACRES MORE

The state of Alaska is entitled to select an additional 35 million acres—the balance of the 103 million acres granted under the statehood act. State selections were not possible in the late 1960's and early 1970's when pressure from the natives caused Secretary of Interior Udall to withdraw from possible selection all otherwise unreserved lands pending resolution of the native claims. Limited selections have been made since passage of the settlement act, but the final selections must await adjudication of native corporation selections and changes in withdrawal status.

The fact that the state of Alaska has selection rights for some of the lands presently withdrawn under the Native Claims Settlement Act adds substantial uncertainty to the future availability of public lands for mineral activities. Lands presently withdrawn for (d)(2) consideration might lose their (d)(2) status but be subject to a subsequent withdrawal if they should become state select lands.

One further example—the Forest Service, after three years of study, designated as a Wilderness Area 40,000 acres out of the 400,000-acre West Chichagof-Yakobi study area. The state of Alaska and the Sierra Club are protesting the decision. And Congressman Udall was the principal sponsor of a legislative proposal entitled the "Endangered American Wilderness Act" (H.R. 14524) which would turn the entire area into a wilderness area. This legislation is of special interest to a major copper company which is working on copper-nickel deposits on Yakobi Island.

EXTENSIVE WITHDRAWALS SEEN AS NEGATIVE LAND USE PLANNING

What is taking place in Alaska cannot be called "land use planning." The extensive use of withdrawals is, at best, a negative land use policy which precludes wise use of resources. Land use planning requires an evaluation of facts. So far as knowledge of mineral resources in Alaska is concerned, few of the facts are in. We have barely scratched the surface. We simply do not know how extensive Alaska's mineral resources are, and we do not know where they are. The Bureau of Mines has been given $600,000 for purposes of evaluating the 80 million acres withdrawn for (d)(2) selection. It is doubtful that the results of their studies will contribute in any measurable ways to our appreciation of the mineral potential of these vast areas. Certainly it would seem unwise to withdraw these large areas irrevocably from mineral activities after such a cursory glance at their potential. Nevertheless this is happening.

To the extent Congress or the Executive Branch of the state of Alaska close the door to mineral activity in Alaska, they are locking up uninventoried resources. If history is any guide on the matter, we can presume that the door once locked will not be opened again. Not only is this poor land use—it is action directly contrary to the directives of the Minerals Policy Act.

MULTIPLE USE IS MOST REASONABLE APPROACH

Multiple use management seems to me to be the most reasonable approach to the apparent conflict between possible mineral development and preservation. It allows an evaluation of land use alternatives and enables land use managing agencies to make decisions on the basis of all the facts. This is the concept which the United States Forest Service has made work to the benefit of the general public on national forest lands. It is a model worth emulating in Alaska.

NEW FACE OF DEFENSE

Mr. PROXMIRE. Mr. President, an article in the January 10, 1977 issue of Business Week. Titled "The New Face of The Defense," makes a number of interesting points about defense-industry relationships.

The first conclusion is that foreign military sales will fall due to the fact that European arms technology is improving. The Europeans will increasingly develop their own weapons systems and sell these weapons on the world market, thus competing with American arms sales.

The second point is that defense industry profits are much better than they were several years ago. The Pentagon has more money to spend now. Because of a backup in contract awards, weapons purchasing could reach $20.4 billion dollars in fiscal year 1977, a 24-percent increase over fiscal 1976. In addition, new Pentagon policies are designed to increase profits.

Third, it appears that U.S. procurement will increase sharply for American forces. Twelve major weapons systems that were under research in the early 1970's are now ready for production. These systems will have longer production runs. The Navy, for instance, plans to expand its fleet by over 100 ships. This will require an increase in procurement

levels from $6.2 billion in this fiscal year to $8 billion in the next fiscal year.

The article's fourth point is that new procurement policies will provide more Government sharing of both research costs and the cost of equipment. Companies can now charge the Government for the cost of leasing or buying plant and equipment. Development and production bids are awarded separately, thus lessening the effects of inflation and unforeseen costs. Further, the Department of Defense guarantees development expenses under cost-plus-fee arrangements. Fixed-price bids are required for later production only, when the price of production can be estimated better.

One final point the article makes is that overcapacity is not a serious problem for Defense contractors because it exists mostly in Government owned plants. With the Pentagon encouraging contractors to use private plants, this overcapacity will decrease, according to Business Week.

Mr. President, I ask unanimous consent that the Business Week article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE NEW FACE OF THE DEFENSE INDUSTRY

As the Carter Administration takes office on Jan. 20, the Pentagon's weapons buyers will be setting out on their biggest shopping spree in nearly a decade. Their pockets are jingling with more cash than they have seen since 1970, when the Vietnam buildup climaxed and weapons procurement entered a six-year slump. Barring a radical shift in policy by President Carter—a move most observers do not expect—the Pentagon will be spending its new wealth on nearly a dozen advanced weapons systems that have been simmering in research and development for the first half of the 1970s and are now ready for production

True, the surge in weapons buying will be modest when compared with the wartime buildups of Korea and Vietnam: The outgoing Administration expects hardware budgets to rise only 6% to 8% a year for the next four or five years. After inflation, that equals "real growth" of only about 3%. But any increase at all is a welcome turnaround for an industry whose major customers have suffered years of belt-tightening. And because of a backup in contract awards, the money will really flow in the present fiscal year, which began on Oct. 1. Weapons buying in fiscal 1977, according to Pentagon estimates, could surge to $20.4 billion, 24% ahead of fiscal 1976.

All this, of course, adds up to some very good news for the nation's defense industry. Although most company executives will not begin celebrating until they see how President-elect Jimmy Carter and his choice for Defense Secretary, Harold Brown, treat some of the new weapons programs during their early months in office, the industry's mood is more optimistic than it has been in years. "We're upbeat," says Laurence J. Adams, president of Martin Marietta Aerospace Corp., which stands to get a big chunk of the Army's $5 billion Patriot missile program, formerly known as SAM-D. Says Dolor P. Murray, executive vice-president of McDonnell Douglas Corp.: "The defense industry is in a very healthy position."

The Pentagon's expected largesse looks unusually attractive to defense companies for several reasons:

HIGHER PROFITS

Basic changes in Defense Dept. procurement policies mean that new production contracts should generate higher profits than the meager levels of recent years. For example, most contracts signed after Oct. 1 will allow companies to charge the government for the cost of money used to buy or lease plant and equipment. This new interest allowance "is really a step in the right direction," says Thomas R. Stuelpnagel, general manager of the Hughes Helicopter Div. of Summa Corp., which last month won an initial $317 million contract to build a new attack helicopter for the Army. "It will encourage us to modernize and improve productivity.

LESS RISK

Gone are the days of "total package procurement," when former Defense Secretary Robert McNamara forced companies to lump development and production in one fixed-price bid. Inflation and unforeseen costs often led to big losses, as with Lockheed's C-5A transport plane and Grumman's F-14 fighter. Now the Pentagon guarantees development expenses under cost-plus-fee arrangements, and it even holds contractors' hands during early production runs—requiring fixed-price bids only for later production, when costs can be better estimated.

LONGER RUNS

The high development costs of the new weapons the Pentagon will be launching mean that more of them should enjoy longer production runs. That, in turn, means greater income stability for their manufacturers. The new main battle tank that the Army has chosen Chrysler Corp. and Avco Corp. to build, subject to a final go-ahead in 1979, may stay in production until the end of the century, with a $5 billion domestic market and an even greater foreign potential. Avco, like many companies, had been trying to diversify away from the defense business. "But now I'm glad to be in it," says James R. Kerr, chairman. "It's a lot better business than it used to be."

However, some defense companies may not be that enthusiastic after the Pentagon has passed out its new crop of weapons contracts. The trend is toward bigger but fewer programs because of their high cost and long lead times. Clearly, there will not be enough programs to go around.

FOREIGN MARKETS

Industry "haves" such as McDonnell Douglas—blessed with two big fighter programs—will be sitting pretty for the long pull. But such "have nots" as LTV Vought Corp., whose backlog has slid to $552 million from $824 million over the past year, and which has no major new prime contracts in view, may be forced to work as subcontractors, to merge, or to drop out of the business altogether.

Some segments of the defense business have already shrunk during the post-Vietnam slump. For example, there are now only 12 missile builders and 7 shipyards building Navy ships; 10 years ago there were 15 of each.

And one or more military helicopter producers also could be casualty candidates sometime very soon. The award of the AH-64 attack helicopter contract to Hughes Helicopter last week provided that company with its first Pentagon production contract since 1969 and probably saved it as a defense contractor. But last week, too, Boeing's Vertol subsidiary lost out to United Technologies Corp.'s Sikorsky Aircraft Div. in its bid to build the UTTAS troop-hauling helicopter, and that leaves Vertol in a very difficult position. "With no new military helicopter on the horizon, Boeing is going to have a tough decision to make," notes one close industry observer. "But I'll bet it decides to phase Vertol out within the next year or so."

Even some surviving contractors may face new problems. Financing could be one, warns economist David E. Raphael of Stanford Research Institue. The working capital of the aerospace industry, the largest segment of the defense business, will have to rise to $8.8 billion in 1980 and $15 billion in 1985, from $5.9 billion last year, he says. "We face a general capital shortage, and these companies are just the type that will suffer most," Raphael points out. "They're cyclical, they have a poor track record in profitability, and they don't represent a growth sector."

Another industry worry is that European armsmakers will soon start winning a growing share of international business. Foreign countries have sustained the U.S. industry through the famine years: They ordered $9 billion worth of U.S. military hardware in fiscal 1976; the year before $12 billion in military deliveries went abroad.

But European arms technology is improving, and last year Congress won the right to approve most U.S. arms exports—a development that has already delayed some big orders. Moreover, President-elect Carter has vowed to scrutinize future weapons exports carefully. "Without Carter, foreign sales would have leveled off," says George Sloan, director of strategic planning for McDonnell Douglas. "With Carter, they will decline." A Pentagon source predicts that they may not reach $8 billion in the present fiscal year.

Carter's attitude toward domestic and foreign arms spending constitutes the biggest imponderable that defense companies face. Industry executives these days are combing through Carter's campaign oratory and collaring his advisers for clues to how the new President may treat Pentagon buying plans.

THE INDUSTRY "HAVES"

It may be whistling in the dark, but most of those executives seem convinced that Carter will achieve his celebrated campaign vow to cut defense spending $5 billion to $7 billion by bringing troops back from abroad, firing generals, and executing bookkeeping gymnastics, and that he will not substantially dampen the Pentagon's planned shopping spree in doing so. "He can shift hardware expenditures from one year into the next with the stroke of a pen," says James M. Beggs, executive vice-president of General Dynamics Corp., whose F-16 fighter program is one of the juiciest new defense plums. "There are lots of ways to wiggle off the hook."

Carter will want to wiggle, believes D. Brainerd Holmes, president of Raytheon Co., now that he has started to receive Central Intelligence Agency briefings on the magnitude of the Soviet Union's current arms buildup. In the past 10 years the Soviets have shot way out ahead of the U. S. in numbers of strategic missiles and military cargo planes. They are currently building six times as many tanks as the U.S., three times as many armored personnel carriers, 30% more fighter planes, and 70% more naval ships. "The Soviets are the U. S. defense industry's greatest ally—their hard line is quickly translated by Congress," maintains Holmes.

Robert Anderson, president of Rockwell International Corp., prime contractor for the B-1 bomber, which officially moved into production only last month, agrees. "I have a very strong feeling that the Russians are pulling ahead," he says.

Some executives think that Carter, who graduated from Annapolis and served in the Navy, could be so impressed by a close look at Soviet strength that he might even ask

for a higher defense procurement budget. Avco's Kerr, a liberal Democrat who supported Carter's election, is one who holds this view. And G. William Miller, chairman of Textron Inc., believes that more hardware spending "would not be inconsistent" with Carter's basic aim of improving military efficiency.

These executives think that Carter will realize that a number of U. S. weapons systems, such as the B–52 bomber and the Minuteman intercontinental missile, are growing obsolete. And on strictly economic grounds, holding weapons spending down would make his twin goals of stimulating growth and slashing unemployment much more difficult. The B–1 bomber, considered the most vulnerable program on the Pentagon's shopping list, is expected to generate 69,300 direct jobs and 291,000 supporting jobs at its 1980 production peak—the year when Carter will presumably be standing for reelection.

The B–1 could provide the first test of the Carter Administration's defense policies. The plan was in early development when Harold Brown was Air Force Secretary. And soon after Brown takes over as Defense chief, he will have to recommend to President Carter whether to shift the bomber from limited production into full production.

Although Carter's negative campaign statements suggested that he might kill the $23 billion program, the current consensus is that at worst Brown will recommend that he return it to R&D for a while longer, even though this will add to the plane's cost. "There is no way they will kill the B–1," declares Avco's Kerr, whose company would build the bomber's wings.

Avco, with its potential roles in the new Chrysler tank, the B–1, and a proposed $1 billion wing retrofit on Lockheed's C–5A, is one of the new "haves" that are emerging in the defense business. Its changing fortunes are typical of the swings that defense companies must learn to live with to survive: Pentagon business accounted for 32% of Avco sales in 1971, 13% in 1974, and has now risen again to 18%. If its three major programs survive Carter's scrutiny, says Kerr, Avco's defense sales will double in dollar value by 1981.

Fairchild Industries Inc. is another turnaround case. The company burst out of the defense doldrums in 1973, when the Air Force chose it over Northrop Corp. to build the A–10, an antitank aircraft. Fairchild should book an impressive $4.4 billion in A–10 sales to the Pentagon through 1981, plus possible foreign sales.

There are other probable big winners in the defense industry's new "production era":

GENERAL DYNAMICS CORP.

Its new F–16 Air Force fighter, due to enter production in 1978, will generate sales of $7 billion or more to the Pentagon and to countries in the North Atlantic Treaty Organization, although the company will share production with those countries. Trident submarines, which GD's Electric Boat Div. began building last year, will produce sales of $13 billion by 1981. GD's Tomahawk cruise missile could be a top seller, but it faces competition from an airborne cruise missile that Boeing Co. has developed. And future arms limitation talks with the Soviet Union could kill off both contenders.

M'DONNELL DOUGLAS CORP.

Its F–18 Navy fighter, to be built jointly with Northrop starting in 1979 or so, could produce sales of $10 billion or more. The company's F–15 fighter, in midproduction, should book $11 billion into the early 1980s. Its vertical-takeoff, British-licensed Harrier has good Marine Corps prospects, and its Harpoon missile could bring in $2 billion.

NORTHROP CORP.

Its share of the F–18 may prove a bonanza for this relatively small company whose expected sales for 1976 are $1.2 billion. A land-based version of the Navy's aircraft-carrier jet, to be built with Northrop acting as prime contractor, has huge foreign potential: Iran alone wants 160 planes, worth $3.2 billion. Northrop's sales of F–5 fighters should continue for some time. As of last month, it had delivered 3,000 of them.

RAYTHEON CO.

This missile builder's quiver is filled with many products, including two large new ones. The Army's Patriot antiaircraft missile, due to start a long production life in 1979, should win $5.6 billion in U.S. orders, plus foreign business. The improved Hawk missile won a $1.1 billion order from Saudi Arabia last summer, and Japan, too, looms as a customer, possibly in 1978.

UNITED TECHNOLOGIES CORP.

Its Pratt & Whitney Aircraft Div. has contracts to build the engines for three out of four new U. S. fighters—the F–14, F–15, and F–16. And its Sikorsky Aircraft Div., still building the CH–53 (a sealift helicopter) for the Navy, now enjoys the prospect of collecting $3.4 billion over the next eight years as a result of winning the UTTAS production contract last week.

Several other companies have good near-term prospects, but they face uncertainties later. Grumman Corp., for example, is still building the F–14 under an $8 billion Navy program, but it has no new weapons under contract, and the F–14 will be running out in 1980. President Joseph G. Gavin, Jr., however, thinks the F–14 and three other Grumman planes still in production will win follow-on orders. "Some analysts have extended into the future the point at which Grumman supposedly goes off the edge of the cliff," says Gavin. "I think that point is going to keep moving out."

Lockheed Aircraft Corp., the biggest defense contractor in 11 of the past 15 years, starts production next year on some $7 billion worth of missiles for the Trident submarine. Work continues into the early 1980s on $3.4 billion worth of P–3 antisubmarine planes for the Navy, and foreign prospects for the plane are looking good. But Lockheed, which is now running a full billion dollars a year behind McDonnell Douglas in defense business, will have to hustle to keep that business from shrinking further in the 1980s. "It is fair to ask if we will be less dominant," concedes William R. Wilson, Lockheed's senior vice-president for marketing. "There will be real competition between us and Boeing and McDonnell Douglas."

WAITING IN THE WINGS

Other companies may still strike it rich in a number of competitions and program decisions to be settled over the next year or so. General Electric Co.'s aircraft engine division, which has been losing contracts to Pratt & Whitney, still has the engine contract for the F–18. And it will be in better shape if the GE-powered B–1 bomber survives, or if it manages to beat out P&W to re-engine Grumman's underpowered F–14.

Boeing, which dropped from second to sixth largest defense contractor last year, probably has the biggest stake in coming awards. Except for a $4 billion airborne electronic-warning program based on the 707 airliner, for which it expects to receive another $2.4 billion order from NATO, most of Boeing's military work is winding down. Thus, says Thornton A. Wilson, Boeing's chairman and chief executive officer, "it is important for us to win" one or more big new contracts.

Boeing is currently fighting McDonnell Douglas for several big ones. One is a short-takeoff-and-landing transport plane to replace the aging Lockheed C–130 Hercules. That contract has a sales potential of $6.3 billion. Boeing is also fighting for a tanker-cargo version of the 747 that could bring in $8 billion.

The fate of all these programs, plus a number of others waiting in the wings, will hinge at least partly on the Carter Administration's defense and foreign policies. Though few observers expect major shifts, defense analyst David E. Benson of Stanford Research Institute feels that if a choice must be made, Carter will incline toward strengthening conventional forces rather than funding strategic new weapons.

BATTLING THE NAVY

Of the U.S. conventional forces, none is in greater need of strengthening than the Navy's fleet of warships. They number 485, the lowest figure since 1941 and down from 900 in 1970. Of course, newer vessels have greater capability than old ones. Still, the Navy aims to expand its fleet to at least 600 ships by the early 1980s—which means a huge potential for orders with U.S. shipyards.

For example, Newport News Shipbuilding & Dry Dock Co., a subsidiary of Tenneco Inc., is building two nuclear-powered aircraft carriers and has long-lead-time funding for a third, to cost $1.8 billion. According to the Navy's timetable, procurement will rise to $8 billion next year from $6.2 billion in the current fiscal year. But there is a major stumbling block: The Navy and the shipyards are at each others' throats over $2 billion that the yards claim the Navy owes them for past work.

Two big yards, Newport News and Litton Industries Inc.'s Ingalls, are building ships, but some of them only under court order, and they are not anxious to take new jobs unless the Navy changes its contracting procedures. The main change, says Litton President Fred W. O'Green, must be an end to the Navy's right to order changes in ships without immediate compensation. "They say, 'You proceed and we'll settle later,'" complains O'Green. "That means we're funding their programs—and we're not going to do that any more." Efforts by outgoing Deputy Defense Secretary William P. Clements Jr. to reach a compromise on the claims have collapsed.

Meanwhile, several shipbuilding programs have fallen behind—by as much as four years in the case of 30 destroyers that Litton is building. Because of its problems with private yards, the Navy wants to reopen production facilities in two or three of its own shipyards, not used since the mid-1960s (BW—Dec. 6). Says Litton's O'Green, who is currently dickering to build destroyers for Iran: "Carter has got this issue right squarely in front of him."

Not all shipbuilders are mad at the Navy. Gorden E. MacDonald, general manager of General Dynamics' Electric Boat Div., says the Navy's contracting style has improved dramatically on the Trident submarines that the division began building last year. The Navy guarantees to cover inflation-induced cost overruns—a major source of shipyard misery—instead of restricting escalation payments to the builder's original projections of inflation, as it does under older contracts. GD is building 18 attack submarines under an old contract, and the limitation on escalation threatens to make that program a money-loser. Because of the escalation change, says MacDonald, "we'll be happy to bid on future Navy contracts."

Defense contractors outside shipbuilding also are pleased by shifting Pentagon policies designed to encourage greater industry profitability. Defense companies have long complained about their low profit levels,

often with little justification. The defense industry's return on sales, currently around 5% before taxes, is admittedly low. But the figure is not a fair yardstick because much of the industry's plant and equipment is owned by the government and risk is often less than in commercial business.

During the 1960s the aerospace industry, defense's biggest segment, generally kept pace with a more indicative measure—the return on equity capital of all U.S. manufacturing—and sometimes exceeded it. In aerospace's peak profit year, 1965, the industry enjoyed a 15.1% aftertax profit on equity, compared with 13% for all manufacturing industries. But the post-Vietnam slump pushed the industry down to a 5.8% return by 1971. Last year it had recovered to 10.6%, compared with 13% for other manufacturing companies—with foreign sales the main impetus.

Even without special government efforts, the defense industry's profits should rise further in coming years. The major reason: Production contracts generally produce a higher return than the less risky, cost-plus R&D contracts. Rockwell's Anderson, for example, figures that his company will make an 8% profit on sales on its B–1 production, compared with about 4% on the bomber's development program.

A MORE STABLE INDUSTRY

But the government is trying to help the industry further. Early this year the Defense Dept. launched a major inquiry, called "Profit 76," to document defense industry profitability and to devise ways to improve it. A prime Pentagon motive is to encourage industry to invest in more productive equipment, and to use its own facilities rather than government-owned plants. The Pentagon is still mulling the question, but in October it decreed two important initial changes.

The first is allowing interest costs on plant and equipment used on a program to be charged to the government. Second, the Pentagon has introduced a new capital-investment factor into the "weighted guidelines" that contracting officers must follow in setting profit levels on new contracts.

Previously, only program costs and risk counted in making profit calculations. Now companies that plan to make capital investments on any program can earn up to 10% more profit on it, depending on how much of their own investment they are willing to gamble. Risk will also weigh more heavily than in the past. It has previously weighed only 30% in setting profit levels, but this has been raised to 40%. And costs now count for only 50% of profit calculations, down from 70%.

Jacques S. Gansler, Deputy Assistant Secretary of Defense for installations and logistics, says the weighting for a company's own capital investment will be increased beyond 10%. By 1980, he predicts, the defense industry will be averaging 6% on sales instead of 5%. Gansler hopes that he can also find ways to encourage multiyear procurement. "This would provide greater stability of production," he says, "which should in turn reduce the contractor's risk and encourage his investment in plant and equipment."

Such plans, of course, must receive Jimmy Carter's blessing. Warns an official of the Aerospace Industries Assn.: "Democratic Administrations have tended to be less flexible in negotiating profits."

Nonetheless, most defense companies are cheered by the "new spirit" at the Pentagon. "Now if you're good you can make a buck," says Adams of Martin Marietta. Beggs of General Dynamics agrees: "The DOD has learned its lesson that profit swings in the industry can cause a lot of trouble," he says. "I see a more stable industry now."

IMPROVING THE MARGINS

A prominent dissenter is Thomas V. Jones, chairman and chief executive of Northrop, who has long argued that defense companies should own all their facilities and accept free-market risks in return for bigger profits. "The Pentagon is making it too easy," he says. "I like to see fixed-price contracts, even for development. If you manage well, you get rewarded."

Grumman's Gavin, however, disagrees. "A development program isn't worth undertaking unless there is a certain level of uncertainty," he says. "The only real way the Pentagon can encourage contractors to push the state of the art in designing new weapons is to share financial risks."

There is general agreement, however, that managerial skill, not considered a prime defense-industry asset in the past, has improved recently. Most contractors have given cost controls special attention in the wake of the huge overruns of the total-package-procurement era. McDonnell Douglas, for example, now uses a companywide accounting system that compiles a weekly computer record of all costs and how they are allocated. "We couldn't compare one division's performance with another before," says John E. Forry, controller, "Now we can make real-time decisions on costs."

Rockwell's Anderson, a veteran of the company's automotive operations, recalls that when he sat in on meetings at Rockwell's North American Aircraft Operations in the late 1960s, "there'd be 60 or 70 guys talking technical problems, with never a word on profits." Such inattention to financial management helped Rockwell lose the F–15 fighter to McDonnell Douglas, Pentagon sources say. Anderson brought in profit-oriented executives, and he has now transformed North American's staff meetings to the point that "you seldom hear talk of technical problems any more," he says. "It's all financial."

The Pentagon is taking management into account increasingly in selecting contractors. At its behest, accountants Peat, Marwick & Mitchell Inc. right now are conducting "management audits" of two companies that are competing for a big defense order. Such exercises could become routine.

Overcapacity is a recurrent trait of the defense industry, as it is in any cyclical business, and at the moment it may be as high as 40%. But the phenomenon does not trouble most companies—one reason being that much of the current overcapacity is in government-owned plants. "In peacetime you can't expect us to use full capacity," says Grumman's Gavin. "In fact, you'd be greatly concerned if you were at full capacity because you'd have no margin for accelerating in emergencies."

The Pentagon has been studying the question this year and it tends to agree. A report due later this month will estimate that the government could save up to $400 million a year in aircraft programs if it eliminated unneeded capacity. But the Defense Dept.'s Gansler notes that closing plants would "endanger competition on future contracts." He will suggest to the Carter Administration only a modest tightening of capacity—a move that might save $100 million annually.

A more worrisome subject for the Defense Dept. is a decline in the ranks of defense subcontractors since Vietnam. No one keeps precise count of their number, but Pentagon officials and industry executives say that fewer have been bidding for contract work in recent years. Many apparently have switched to commercial products offering higher profit margins.

To lure them back, Gansler says, the Pentagon is "making our military specifications more flexible, encouraging greater use of commercial parts, and urging multiple sources of supply." The problem could partly solve itself in coming years as the dwindling number of new defense programs pushes some former prime contractors into subcontracting roles.

In fact, the prime contractor and subcontractor roles in the defense business could become blurred in the future as more companies turn to the joint-venture approach that is gaining currency. Northrop and McDonnell Douglas, for example, bid jointly on the F–18 and are developing it together. McDonnell will manage the U.S. Navy version and then switch roles with Northrop on a land-based foreign version.

SHARED PRODUCTION

Hughes Helicopter has gone even further, stitching together a team of 14 companies on the Army's attack helicopter. Member companies will enter production data weekly into a central computer, and any partner will be able to consult the data bank from briefcase terminals. Reason for the arrangement: "We don't want to build another facility we won't need," explains Stuelpnagel.

More international partnerships are likely to blossom, too. As Europe's defense industry gains muscle, it is insisting on building a share of the U.S. hardware that the European countries buy. Planners on both sides of the Atlantic are realizing that making NATO weapons standard is one way to save big money.

The new Chrysler-Avco tank, for example, is likely to carry a German gun and turret in exchange for an agreement from Bonn to use the Avco turbine engine and a General Motors Corp. transmission in its Leopard II tank. And to win NATO orders for its F–16, General Dynamics had to agree to heavy European coproduction. "Naturally we'd rather build it all," says GD's Beggs, "but there's no choice." The positive U.S. "arms balance of payments" within NATO has fallen from 10–to–1 to 8–to–1, and, because of such deals, will undoubtedly decline further.

Long-range, this could mean a contraction of overseas business for many U.S. armsmakers, and that prospect is forcing them to look to areas such as the Far East and Africa, where the arms market has barely been tapped. Such new markets will take a different type of selling, because orders will be small. And financing could prove difficult.

However, although foreign prospects are not as rosy as they were, the new thrust at the Pentagon is quite enough to cheer industry leaders. The impending go-aheads on major weapons systems, together with the Pentagon's more liberal procurement policies, they believe, should make defense work a good deal more attractive in coming years.

HOW OPEC'S HIGH PRICES STRANGLE WORLD GROWTH

Mr. STEVENSON. Mr. President, the December 29 issue of Business Week carries an article about the economic implications of OPEC priced oil which is worth reading. Even without the recent price increase, OPEC had created worldwide inflation and left many nations at the brink of insolvency. The increase, received with relief in some quarters, in fact spells economic distress for the non-OPEC and non-Communist world, with grave political implications. The Banking Committee wisely made this subject its first order of business in this Congress.

Mr. President, I ask unanimous consent that the article, "How OPEC's High Prices Strangle World Growth" be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From Business Week, Dec. 20, 1976]

HOW OPEC'S HIGH PRICES STRANGLE WORLD GROWTH

Ever since James Watt's steam engine in 1769 launched the Industrial Revolution, Western capitalism has managed to surmount its economic and social problems with a simple formula: dramatic reduction of energy costs to make economic growth possible at extremely rapid rates.

Three years ago, when the Organization of Petroleum Exporting Countries launched its own revolution, there was a general feeling the quantum jump in the real cost of energy prices need be nothing more than a pause in industrial progress around the world. Now, however, there is a growing realization that the quantum jump in the real cost of energy has invalidated the formula that had worked so well since Watt's breakthrough. The result has been to create a crisis whose dimensions are only now becoming fully visible:

The economic growth rate that is achievable by the industrial world has been permanently lowered. This intensifies the unemployment if governments refrain from economic stimulus, but to inflation if they resort to demand-boosting measures.

The less developed countries have piled up $170 billion in external debt—an amount that far exceeds their capacity by any normal standard to repay. Thus an orderly rescheduling of debt is required. And that will further impair the improvement of living standards in the advanced nations because the developed countries will have to subsidize the Third World. The only real alternative would seem to be a massive repudiation of Third World indebtedness, and that would be a threat to the structure of international finance.

So far the U.S. and its allies have virtually acquiesced in OPEC's price policies, making no attempt to break up the cartel. But the economic consequences of high oil prices now appear so severe and the political implications so explosive that experts are beginning to say that the risks of acquiescence far outweigh the risks of a determined effort to get the price of oil down.

Later this month the 13 oil ministers of the cartel will be meeting in the Persian Gulf shiekdom of Qatar to decide on yet another price increase. The betting is that OPEC will settle on a price hike of 8% to 10%. But even if the cartel comes in with an increase of only 3% or decides to postpone any decision until sometime in 1977, it is clear that such "moderation" would be due to the flagging economic recovery rather than to any weakness in the cartel. Moderation would be evidence that even OPEC realizes that it may have already pushed the oil-consuming countries too far too fast.

If OPEC decides on a small increase or no increase at all the world will breathe a lot easier. But not for long. If the consuming nations continue to tolerate the cartel's policies, once the economic recovery picks up some steam, OPEC will be back to take its share—and more.

Thus the endless speculation on what OPEC will or will not do in Qatar is beside the point. "The question is not whether a 5% or 10% increase in the price of oil is absorbable," says Robert Hormats, a senior economist at the National Security Council. "The question is how to survive the disaster that has already been inflicted upon us."

THE COST SO FAR

And "disaster" may not be too strong a word. In the three years since OPEC jumped the price of crude from $2.75 to almost $12 a bbl., the consuming nations have paid an enormous price. They have given OPEC an additional $225 billion for its oil. They have lost $600 billion in output. To finance their balance-of-payments deficits (chart, page 46), the less developed countries have amassed that $170 billion in external debt. Some industrial nations as well as some LDCs are hanging by their financial fingernails, and default or moratorium may be closer than the international bankers dare admit.

Even the U.S., the strongest of the industrial nations and among the least dependent on foreign crude, bears the scars of OPEC-inflicted wounds. Using the Federal Reserve Board's econometric model, George Perry of the Brookings Institution estimates that the fourfold increase in oil prices has cost the nation—this year alone—more than $60 billion in gross national product and more than 2 million jobs. These losses occurred because the price hike triggered a decline in real disposable income, leading in turn to a cut in consumption and investment spending.

Perry's estimates, moreover, show just part of the picture. The economy was also battered by the belt-tightening response to OPEC's price increase. U.S. policymakers launched their "attack" against OPEC by instituting tight monetary and fiscal policies in an effort to damp the inflationary impact of the oil price rise. And this sent the economy spinning even faster and deeper into a recession from which it has not yet recovered.

Although the economic experts will long debate whether the U.S. response was too restrictive, the fact remains that governments throughout the world reacted to the inflationary impact of the oil price by squeezing their economies. To the degree that the industrial world will continue to react to OPEC-induced inflation, the 13 oil ministers have become the macro-managers of the world, superseding policymakers in even the strongest industrial nations. The European Economic Commission admits that the Common Market "has been unable to define or apply a common strategy to deal with the economic effects of the rise in oil prices."

A common strategy may be impossible to devise. The basic problem is that OPEC has both reduced the productivity of the world's existing industrial capital and has added energy efficiency to the problems of scientists and engineers who are seeking new labor-saving inventions that would increase productivity and growth. Edward R. Fried and Charles L. Schultze of Brookings, writing in the recently published *Higher Oil Prices and the World Economy*, put the first problem this way: "Existing investments in energy-intensive machines and industrial processes that were once profitable when energy prices were low suddenly became obsolete and have to be retired prematurely. As demand shifts from one kind of output to another, workers can lose the advantage of previously acquired skills, and even when they have been reemployed, they may suffer losses in productivity and earnings."

A CEILING ON WORLD GROWTH

Nowhere has the oil price hike had a more devastating impact on the capital stock of an industrial region than on Europe's once humming and profitable refineries. The refining industry there is operating at only 60% to 65% capacity, and a 20% to 30% surplus in capacity is expected to persist well into the 1980s. The industry now also finds itself wrongly structured. It is geared to refining too much heavy oil and not enough light oil, and it desperately needs to undertake expensive reconversion of its plants to stay competitive with refined imports.

In Japan, the new five-year economic plan unveiled last May calls for a restructuring of the entire domestic Japanese industry away from the energy-intensive industries. Japan is totally dependent on foreign crude, so such heavy energy users as steel, aluminum, and other metals industries are being encouraged by the government to build new capacity in countries that have either oil or hydropower. The Japanese are currently planning a major project in Indonesia, while other large-scale projects in Canada are being given careful study.

It would be a mistake, however, to conclude that once the industrial world adjusts its capital stock to the higher energy prices, output will once again flow more or less in line with historical growth rates. Says Dale Jorgenson of Harvard University, "The ability of the 'new adaptive' capital stock of the world to produce has been permanently lowered."

In Jorgenson's view, energy and capital march arm in arm and are substitutable for labor. So the impact of the higher energy cost is to decrease the energy intensity of production and thus reduce the capital intensity of production. This means that the productivity of the economy is decreased. "The new combination of labor, capital, energy, and materials is less productive than it was before OPEC emerged," says Jorgenson.

Not only does some of the existing capital stock planned when oil was $2.75 per barrel become obsolete but now investments that would have been attractive at the old energy prices are no longer attractive at $12 per barrel. "The overall capital intensity of the economy as well as the energy intensity declines," argues Jorgenson. "The average job in the economy will be less capital-intensive and therefore less productive."

Here, indeed, may lie a good part of the explanation of why the long-awaited world recovery in capital spending has not materialized. Since mid-1975, economists have been doggedly predicting that the revival in consumer spending would soon be joined by a burst in capital spending to produce a vigorous and sustainable overall economic recovery. This has not happened, and the recovery has flagged accordingly. Previous economic downturns were followed by strong capital expansions, but the OPEC recession has resulted in a fundamental change in the capital intensity of production, perhaps foreshadowing sluggish capital spending for many years.

BALKING EFFICIENCIES

Historically, new technologies have always made existing capital obsolete. The steam engine replaced the windmill and the water wheel and in turn was supplanted by the gasoline engine. The semiconductor replaced the vacuum tube. By lowering costs and raising efficiency, these technologies spurred growth in investment and buying power. The OPEC monopoly, in contrast, has increased costs and lowered efficiency by forcing the development of new, higher-priced energy and production methods. That spells only one thing: lower growth for the world economy.

"OPEC has pushed everyone onto a new and harder growth line," says Brandeis economist Anne Carter, who worked closely with Nobel winner Wassily Leontief in developing an input-output model of the world economy. "Resources cost more, and that means growth will be slower." She maintains that a nation has a certain amount of manpower and capital from which it satisfies its immediate needs and from which it grows. Tax it with a quadrupled oil price, and it no longer has the same amount left for its growth. "Look at it this way," says Carter. "With my current income, if my landlord quadruples my rent, I'll adjust. But I'll never live as well. One grows out of saving after satisfying current needs."

Indeed, the "rent" has been going up since 1974 as the world has become more dependent on OPEC oil. Moreover, the "landlords," the OPEC countries, are not simply gaining what the oil-consuming nations are losing. "Because the monopoly has ratcheted prices up," says Harvard's Jorgenson, "total world production—including OPEC's—is less than what it would be."

Jorgenson's Harvard colleague Hendrik S. Houthakker notes that OPEC is spending a good part of its added income on armaments. "There's no gain to the world from that at all," he says. "It involves an inordinate amount of waste, with one country buying fighter planes, another buying missiles to knock down the fighter planes, and still another buying systems to jam the missiles. What a waste!"

The waste is likely to continue. Says Lawrence R. Klein of the University of Pennsylvania: "Armaments become outdated. It's like a college professor's text. The new editions of military hardware will certainly be attractive."

The conventional wisdom holds that the world has adjusted to the initial OPEC price rise and that any problems now will be caused by future price increases. But John Hulley, former coordinator of the energy task force for the World Bank, rebuts this: "The world has not yet adjusted to the first increase. It is outrageous to suggest any further increase. What's needed urgently is a rollback." And Peter Kenen of Princeton University seems to agree when he says: "The difficulty of adjustment has been successfully buried behind a lot of recession and a lot of lending. And it will reemerge."

AN UNMANAGEABLE SITUATION

What really worries the experts is the fragile international financial structure that has been built up by huge borrowing to finance balance-of-payments deficits. Says the National Security Council's Hormats: "What we have is a situation which is unmanageable in structural terms. The international economy simply cannot take collective balance-of-payments deficits of $40 billion to $60 billion a year indefinitely without a massive redistribution of that surplus to the developing countries and the weaker industrial nations, such as Britain and Italy. Just who will continue to lend to the weaker countries on that scale?"

To Kenen, the world has already reached the flash point "where if you are not able to throw good money after bad, then you are not going to be able to retrieve what you lent in the first place." It is not only the less developed countries, such as Zaire and Peru, that may be approaching the point of no return. Italy faces the scheduled repayment of almost $20 billion in foreign loans and interest over the next three years. The government—at the insistence, it says, of foreign lenders—has embarked on a severe austerity program to suppress import demand. Guido Carli, former head of the Bank of Italy and now chief of Confindustria, Italy's association of manufacturers, contends that by braking too hard, the government is flirting with recession.

The fragile new democracy of Spain, with an annual bill of $4 billion for imported oil, has outstanding debt of about $12 billion, of which major U.S. banks hold about 30%. With the balance-of-payments deficit topping $3 billion for the third straight year and with inflation raging at 20%, the Spanish government may soon sharply devalue the peseta.

Even in Brazil, where most economists had projected economic growth of almost 10% in 1977, the cost of OPEC oil has taken a huge toll. The nation's bill for foreign oil is up to $4 billion from $1 billion in 1973, yet the economy is still at a development stage where it requires heavy imports of capital goods. Thus the country's foreign debt has ballooned to $28 billion. Says Claudio Margueron, director of Arthur D. Little's Rio de Janeiro office: "The per capita income is just too low here to absorb such a rapid increase in oil costs." The government is clamping down to cut 1977 growth to less than half of expectations and thus reduce imports—in turn, sharply affecting the industrial nations through their export markets.

NO REALISTIC WAY OUT

"It will be almost impossible for the LDC's to achieve the growth rates of 1960's, given the current price of oil," says Brandeis' Carter. It could be accomplished, she says, only if the LDCs were to receive massive loans to cover their payments deficits and if they were able to increase their exports substantially to the industrial nations. Neither of these things is going to happen. A drive by the LDCs to expand their share of the world export market would bring them into direct conflict with Western Europe and Japan and perhaps incur import quotas in retaliation. Already there is rising resentment in Europe over the tendency of the European Community, under pressure from OPEC, to increase imports or refined oil products from the LDCs. And massive new loans to the debt-ridden LDCs are out of the question. Says the NSC's Hormats, "Ultimately we either have to roll back the price of oil or get OPEC to finance the deficits directly or through international institutions on giveaway terms."

The huge payments surpluses building up in the treasuries of the Arab nations are themselves a menace to the already shaky international financial structure, especially when they slosh around the money market from one currency to another.

In 1974, for example, $24 billion of OPEC money went into sterling. That caused the British pound to be over-valued, undermining Britain's competitive position in world markets and thus increasing its trade deficits. When sterling began to weaken in mid-1975, OPEC nations deserted the pound en masse, and a sustained run on sterling began, taking the pound down to $2 at the beginning of 1976 and to about $1.50 by last month. So far, the international monetary managers have come up with ways to bail out troubled currencies, but economists fear that the world cannot go indefinitely from one crisis to another.

As damaging as OPEC's economic and financial impacts are, its political impact on the world may be even more telling. "We have not adjusted to the crisis," says Yves Laulan, head of the studies section of the French bank, Société Générale. "The crisis is not behind us—it is in front of us. More countries like France will move further to the left as people try to escape in the wrong direction." Some experts believe that the Socialist-Communist coalition may well win the French legislative elections in 1978.

THE POLITICAL THREAT

Others see the specter of fascism. Says Guido Brunner, research and development commissioner of the Common Market: "Something is happening here which is reminiscent of past developments in Europe's political history when discontent arose. The impression has been created that the political leaders of the democratic governments no longer have control of the changes in the world in which we live."

OPEC's price rise and the lack of effective U.S. reaction to it have seriously weakened the political cohesion of the West and the prestige of the U.S. among developing countries, says a high State Dept. official. The LDCs no longer have confidence in Washington's ability to help them solve their problem, he says. "The bleak fact is that so far the U.S. government has done nothing of any consequence to counter the most serious blow to a free and prosperous world since World War II," laments this Washington official.

Moscow is making capital of the West's discomfort over the oil embargo and OPEC's quadrupling of crude prices, says retired Lieutenant General Daniel O. Graham, now of the Center for Advanced International Studies at the University of Miami. Graham says not enough attention has been paid to Moscow's glee over the West's predicament and its encouragement to OPEC to be even more militant.

"Among other things," Graham says, "Moscow has urged steady increases in oil prices, nationalization measures, assumption of greater and greater control of downstream operations, and, most important, use of the 'oil weapon' to further political ends." He says Moscow has proclaimed virtually a new era in the worldwide "anti-imperialist struggle," with the countries producing raw materials "joining ranks with the oil-producing countries."

As if OPEC has not already more than evened the score with the industrial nations, Tass, the Soviet news agency, said just last month that a further boost in oil prices by OPEC states would serve to "end their dependence on imperialist monopolies." The price boosts help the Soviet Union, too. It has increased production 40% in the past five years and is now the world's largest oil producer and a net exporter of crude and refined products. Indeed, by selling some oil to the Eastern bloc countries below OPEC's price, Russia has tightened its grip on its satellites.

The Russians are finding, however, that OPEC's success cuts two ways. The Arab oil countries have become far more conservative and less dependent on socialist political solutions. "When OPEC raises prices, the Arab states turn right, and that has played hell with the Soviet Mideast policy," says a Western analyst in Moscow.

However, John Hulley also sees sinister implications for U.S. foreign policy. Says he, bitterly: "It has already turned around our policy toward Israel. It gives Kissinger and his successors, and their banker friends, a huge slush fund in the hands of the Arabs, which can be drawn upon to finance their little schemes around the world without asking Congress for money. That potentially subverts democratic control over U.S. foreign policy."

There is no question that OPEC now wields enormous political power. Because the Arab and African oil producers are the major buyers of Italian plants and machinery, they can get Italy's backing on virtually any political issue. And while they do it with more grace, most European countries bow to OPEC. The cartel has held the LDCs in its hip pocket by promising concessions on oil prices and arranging some barter deals for oil. OPEC has twisted the Paris Conference on International Economic Cooperation, called to discuss world energy problems, into a confrontation between rich and poor nations. OPEC's goal seems to be to form an OPEC-LDC bloc with even more political clout.

A TIME OF NO DECISIONS

While OPEC meets in Qatar, the oil-consuming nations sit back and await the verdict without doing anything for themselves. Guido Brunner complains: "Virtually nothing has been done in the energy sector in the Common Market. We have no decision on a crisis mechanism, no decision over Euratom loans, no decision on subsidies for coal, no decision on energy saving, no decision on the extent of the development of alternative energy sources."

By being more compliant than constructive, U.S. energy policy also is in effect supporting the cartel, economists fume. "We are subsidizing imported crude because we average domestic crude with foreign, so prices are lower and we import more from OPEC," says Jorgenson. Since the embargo, U.S. dependence on OPEC crude has risen from 36% to 42%. Jorgenson wants to take off all price regulation and allow domestic prices to float up to the OPEC prices. And if that means windfall profits for producers of domestic oil, he advocates taxing those profits. "It is not an ideal policy," he admits, "but it's better than the one we have now."

Such criticism is made more bitter by the belief that a concerted effort by the West could weaken OPEC's grip. Analysts point out two key factors:

At current prices, OPEC oil is almost entirely profit. Selling for $11.51 a bbl., f.o.b. the Persian Gulf, it is produced for about 25c a bbl. As a result of the high price, OPEC cannot sell nearly all the oil that can be produced, and any of its members could cut the price in half and still make a healthy profit.

OPEC's unity extends only to price-setting. And its members include both countries whose revenues greatly exceed their current needs, such as Saudi Arabia, and others with development needs that far outrun their revenues from abroad, such as Iraq and Indonesia. Proposals to disrupt the cartel are therefore aimed at exacerbating the problem of production allocation, either by cutting total demand for OPEC oil or by opening up channels for individual nations to expand their market shares through surreptitious price cuts.

For example, Joseph Lerner, a former adviser to the Office of Emergency Preparedness, the Federal Trade Commission and the Treasury, argues for a low-interest loan program to give government encouragement to companies to convert from oil or natural gas to coal. He also thinks the government should begin to phase in a gasoline rationing system for auto travel. He favors a system where ration tickets could be traded in the so-called white market to people willing to pay the price of driving more. A 30% cut in automobile driving could lead to a 10% reduction in OPEC imports, say the experts, and rationing would spur the abortive move to more efficient small cars.

The big trouble in trying to undermine the OPEC cartel is official lack of willingness, Lerner says. "The Ford Administration did not want OPEC to fall apart, and it remains to be seen what Carter will do," he declares.

Maurice A. Adelman, oil expert at Massachusetts Institute of Technology, also charges the U.S. government with having encouraged OPEC with "empty bombast and quiet capitulation." And he also feels that OPEC has weaknesses at current production levels, about 75% of capacity. He proposes that an "entitlement ticket" be required for every barrel of oil imported and that these be auctioned off by the government to middlemen each month in a quantity based on estimated domestic needs for the period. A 1-bbl. ticket would be worth about $11 to an OPEC nation because that is the difference between the current OPEC price and the cost of production. As Adelman sees it, oil-producing nations eager to expand their sales would bid up the price of entitlements. "With tickets bought anonymously, not even the buyer of oil would know that the producing nation had chiseled," he says. And the auctions would draw some of the OPEC nations' bounty back to the U.S. Treasury.

Hendrik Houthakker proposes a tax of $2.50 or more per bbl. on imports of crude, both to cut demand and to encourage domestic production. Brookings economists Fried and Schultze think a tax on imports would force OPEC actually to cut prices because of internal disagreements over which nations should absorb the production cuts induced by a drop in demand.

For three years, such proposals have been advanced by acknowledged experts in the field of international energy markets, and they may finally be winning more serious consideration. Moreover, large new oil supplies from the North Sea and Alaska's North Slope will be coming on stream in 1978, and the oil-consuming nations can look forward to a brief period of lessened vulnerability to OPEC's threats.

Thus it is possible that the basic question on the minds of OPEC's oil ministers as they assemble in the palace at Qatar may not be how big a price increase to impose now. It may be, rather, that the inability of the world economy to grow and the U.S. change of Administration signal the approach of an energy users' counterrevolution.

COMPUTER ABUSE

Mr. RIBICOFF. Mr. President, since May 10, 1976, the staff of the Senate Government Operations Committee has been conducting a preliminary investigation into problems of computer applications in the Federal Government.

In June of 1976, the committee issued a 448-page committee print entitled "Problems Associated With Computer Technology in Federal Programs and Private Industry."

The committee print was well received in the computer community, both in the public and private sectors.

The staff's preliminary investigation has gone forward. Within the next 2 weeks, the committee will issue a staff study entitled "Computer Security in Federal Programs."

The staff study is a comprehensive review of how Federal agencies approach the very serious problem of securing their computer systems and the highly sensitive data contained therein.

One of the principal considerations in any effective approach to the securing of automated data processing systems is the personnel factor. As the Washington Post pointed out December 31, 1976, in an editorial entitled "Crime by Computer," it is people, not the computers, who initiate the crimes and abuses.

The Post editorial noted:

It is a contest of wits—not between men and the machines but between the people who devise computer safeguards and the equally ingenious people who seek to penetrate them. At considerable expense, some systems in the most sensitive Federal agencies have been made relatively secure. Better programing and policies in the business world would help to curb computer crimes. The risks cannot be eliminated, though. As long as the technology is subject to human control, every system will be as reliable or corruptible as the people who hold the keys. That may be frustrating. But it is better than the theoretical alternative—a world in which computers would program and govern themselves, and would be free to perpetrate their own varieties of crimes.

In that regard, the staff study the committee will issue will devote attention to personnel policies in Federal computer programs. Many aspects of the personnel security issue will be examined as statements from the Department of Justice, the Federal Bureau of Investigation, the office of the U.S. attorney, District of Maryland, the Department of Defense, the Central Intelligence Agency, the Internal Revenue Service, the Department of Health, Education, and Welfare, the National Bureau of Standards, the General Services Administration, the Office of Management and Budget, the Bureau of Prisons, the Civil Service Commission, and other Federal agencies will be included in the staff study.

Mr. President, I ask unanimous consent that the Washington Post editorial of December 31, 1976, entitled "Crime by Computer," and a column from the Hartford Courant of January 5, 1977, entitled "Grand Larceny Via Computer," be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 31, 1976]

CRIME BY COMPUTER

By cracking down on a major debt-collection agency, the Federal Trade Commission has dealt with some specific problems and dramatized a general one. The consent order between the FTC and National Account Systems, Inc., a wholly owned subsidiary of Diners Club, Inc., bars NAS and its subsidiaries from two kinds of abusive practices: getting credit information under false pretenses and using unfair and deceptive tactics to collect debts. The latter involves some heavy-handed practices that used to be routine, but are no longer generally legal and acceptable. According to the FTC's complaint, NAS's debt collectors had been misrepresenting themselves as lawyers and insurance agents, harassing debtors with phone calls at work or late at night, and threatening them with loss of credit, garnishment of wages and even jail terms if they did not pay up—when in fact those penalties were not going to be imposed.

The matter of NAS's access to credit information involves a newer kind of concern. According to the FTC, NAS personnel had somehow obtained the code books used by subscribers to computerized credit-reporting agencies. The debt collectors were thus able to tap the supposedly confidential data banks for current addresses, credit ratings and other information on people whom NAS wanted to pursue. This is a flagrant violation of the Fair Credit Reporting Act, which was enacted to protect consumers against such invasions of their privacy. To add insult to injury, NAS agents managed to get the data at no cost; the service charges were levied against the legitimate subscribers whose codes the data thieves had used.

The case raises obvious questions about computer security, a subject of great concern to everyone—citizens, businesses, government and the computer industry itself. The surge in electronic data-handling has been accompanied by a tremendous increase in what has been labeled computerized crime. The appropriation of records by unauthorized people is one kind of offense. Another common variety was dramatized by the massive Equity Funding fraud, in which computers were used to create 64,000 phony insurance policies, which were sold for $2 billion. The General Accounting Office recently identified 69 computer crimes that, over the last two years, cost federal agencies at least $2 million. The losses suffered by banks and other private companies are much higher and may be getting astronomical—but no one knows because many computer crimes go undetected even by the most careful auditors.

It is a contest of wits—not between men and the machines, but between the people who devise computer safeguards and the equally ingenious people who seek to penetrate them. At considerable expense, some systems in the most sensitive federal agencies have been made relatively secure. Better programming and policing in the business world would help to curb computer crimes. The risks can not be eliminated, though. As long as the technology is subject to human control, every system will be as reliable or corruptible as the people who hold the keys. That may be frustrating. But it is better than the theoretical alternative—a world in which computers would program and govern themselves, would be free to perpetrate their own varieties of crimes.

[From the Hartford (Conn.) Courant, Jan. 5, 1977]

GRAND LARCENY VIA COMPUTER

(By Jack Mabley)

How many Trojan horses have been programmed into computers in America? Nobody knows. Maybe none. Maybe hundreds.

A Trojan horse, in the data processing world, is a scheme to steal. It might involve money, or it might be directions to the computer to route certain goods to a certain place at a future time when the goods will be physically stolen.

The marvelous computers can accept these directions and keep them in their innards until triggered to action. Normal crime takes place in what they call "real" time, that is, right now when a man points a gun at you, or a teller dips his hand into the cash box. With a Trojan horse crime, the perpetrator simply places a secret code in an otherwise innocuous program, and waits.

He also can program the computer to erase records of the crime. That's one reason why computer crime is so attractive to criminals who like new challenges.

The most famous computer thief was, or is, Jerry Schneider, who as a teen-ager in Los Angeles in the early '70s programmed a phone company computer to deliver thousands of dollars worth of equipment to a loading dock at 2 each morning. Schneider bought an old phone company truck and picked up his loot each morning.

He was caught, sent to jail, came out, and decided to sell his services legitimately, on the theory it takes one to catch one. He's doing well.

Another kind of computer crime is known as a salami. It means stealing a thin slice off a large number of accounts—such as a cent a day off 60,000 accounts. It can be detected by auditors if an auditor is fortunate enough to audit the one account in 100,000 that's getting the crooked penny a day.

Donn B. Parker of Stanford Research Institute, a leading expert on computer crime, suggested in an interview that "losses are going to go up very significantly in the future."

A major problem, he said, is "on line" computers.

"Big retailers use computers hooked up to the telephone.

"Any person from anywhere in the world with phone service theoretically has access to the computer. To communicate to the computer, you have to know the correct procedure and the password.

"The computer doesn't know who's out there. If it receives the correct combination, it asks what you want it to do."

The password, naturally, is closely guarded. But ex-employees or disgruntled employees or crooked employees are vulnerable. Schneider impressed a prospective client by picking up a phone and calling a computer at random. Schneider told the computer operator he was a client, had misplaced the password, and fast-talked him into giving it to him.

Parker said "Data processing people can be so naive about these things you might be able to pay $10 and get the information you need."

These obvious crimes are simple and rare. At least it is thought they are rare. Most companies shut up about thefts from their computers unless millions are involved. Even then a large loss may be covered and not show up until five years later in a bank's annual statement.

"Computer programming is what I call a cottage craft," Parker said. "It's an art form. We're trying very hard to make it strictly technical, but it isn't.

"If someone should manage a major computer crime against the federal government, you could be talking about literally billions of dollars.

"The Defense Department is spending a significant amount of money protecting their computers. They also severely limit the use of computers in secret projects.

"Defense isn't going to put a computer on a telephone line, for instance."

Crime is done by people, not by computers, he emphasized.

"The discovery of such crime has to be through people and through their weaknesses. These machines do not make errors, and they do not perpetrate crimes."

SENATOR CARL CURTIS

Mr. MCCLURE. Mr. President, it was with the greatest regret that I heard the announcement of Senator CURTIS' impending retirement. My feelings in this are personal, because no other Member of this body has worked more closely with me and been more helpful.

In a larger sense, however, Senator CURTIS' decision is a loss for all Americans. The very fact that only 21 others have served longer in Congress than he is proof of the confidence the people of Nebraska have in him. It is also testimony to the impact he has had on the well-being of our Nation. CARL CURTIS is a great man and will be missed by all of us.

We want to wish the Senator and his lovely wife Mildred their happiest and most fulfilling retirement years.

BILL TO PROTECT HAWAII FROM OCEAN COMMERCE DISRUPTION

Mr. MATSUNAGA. Mr. President, yesterday I joined my colleague from Hawaii, Hon. DANIEL K. INOUYE, in introducing for the consideration of the Senate a bill, S. 23, familiar perhaps to many Members of this body, which continues to be considered by a broad-based majority of the people of Hawaii as one of the most important matters before Congress since the issue of statehood. This, the proposed Hawaii and Pacific Islands Surface Commerce Act, represents the continuation of an effort in which I and other members of Hawaii's congressional delegation have been deeply involved since the 93d Congress, and the situation which has caused us to make this issue one of our very highest priorities for the last 4 years is still very much present.

In short, that situation is the result of Hawaii's basic and irreversible dependency on shipping for the maintenance of its economy and lifestyle. Surrounded by over 2,000 miles of water on all sides, 99 percent of our imports are transported by ocean-going vessels. About 95 percent of this shipping is from the west coast.

When that shipping is interrupted for any reason, our "lifeline" is for all practical purposes severed. The source of 80 percent of our commodities is suddenly gone. Our construction industry slows or shuts down due to the lack of building materials. Inventories are kept at 250 percent higher than the national average to guard against shipping disruption, with Hawaii's consumer paying this price of dependency.

Since 1946, the major cause of such disruption, a labor-management dispute shutting down west coast ocean commerce, has occurred seemingly countless times. In fact, shutdown time has totaled more than 4 years, or more than 10 percent of the post-World War II period. The most recent strike, 134 days from late 1971 through early 1972, exemplified the severe results of such prolonged interruption of interstate and foreign commerce between Hawaii and elsewhere. Bankruptcies, especially of small, family-owned businesses financially unable to maintain sizable inventories, were numerous. For the first time since statehood. Hawaii's unemployment rate exceeded the national average.

The remedies available to Hawaii in times of such disruption are few and inadequate. Community pressure, normally a powerful force in bringing about labor-management dispute settlements, is ineffective in Hawaii's case. Almost every major stoppage has come from a dispute over which we in Hawaii have had little control, public opinion in Hawaii being ineffective in causing business and labor leaders in San Francisco to settle their differences. Another possible solution which I have urged in past strikes is voluntary agreement between west coast business and labor leaders to continue service to Hawaii in the event of a strike—service, I emphasize, which would involve only 3 percent of the west coast longshore workforce and which, therefore, in no way would diminish the effectiveness of the collective bargaining process But both sides have rejected the proposal in past strikes, and will not promise such agreement for future disruptions.

Because of this unique situation, a way must be found to protect Hawaii's lifeline without interfering with the rights of workers to bargain collectively with management for the resolution of differences. I believe that the bill which I and my colleagues introduced yesterday represents the most reasonable approach to the problem. Identical to our 94th Congress initiative and similar to that of the 93d Congress, it proposes that if a west coast longshore or shipping strike should halt the movement of cargo between the west coast and Hawaii, the Governor would be permitted to ask a Federal court to order its resumption. The court, in turn, would be empowered to do so only if it found that the health or well-being of the people of Hawaii was threatened by the disruption, and even then only for a period of not more than 120 days.

As in the past, I take pains to emphasize that the injunction to be sought would not enjoin the strike itself; it is not a "cooling-off" device. The strike would continue, collective bargaining would continue, with only that part of the cargo destined for or shipped from Hawaii being affected. The impact on the strike of the movement of such a small fraction of west coast shipping trade—as I have said, about 3 percent—would be virtually unnoticeable. As a cogent example of this fact, during the 1971–72 west coast dispute, about 7 percent of the workforce, double that which moves goods to Hawaii, voluntarily moved military cargo to Vietnam. The effectiveness of the strike was not compromised, the collective bargaining process unhindered,

and a final settlement was reached to the satisfaction of the parties.

Mr. President, the facts I have outlined herein are not new to the Senate. In the 93d Congress, a similar bill, cosponsored by my present colleague and by former Senator Hiram L. Fong, passed this body by a wide margin. Most unfortunately, however, the bill failed in the House due to its misrepresentation as an antilabor proposal. Because the threat of a future destructive disruption continues without the provision of fair protection for the people of Hawaii, I appeal again to the reason of the Senate in this matter. The people of Hawaii cannot wait for resolution of this problem until a further disruption brings the issue to the attention of the Congress. As I have said many times before, the proposal is neither antilabor nor antimanagement; it is merely pro-Hawaii. I urge its expeditious consideration by the Senate.

I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 23

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Hawaii and United States Pacific Islands Surface Commerce Act of 1977".

SEC. 2. The Congress hereby makes the following findings:

(a) that the unique geographical situation of the State of Hawaii and of the Territories of Guam and American Samoa, and the Trust Territory of the Pacific Islands, which are physically isolated and separated by thousands of miles of water from both Alaska and the forty-eight contiguous State, generates a unique dependence on ocean shipping as a means for maintaining normal commerce between any of the United States Pacific Islands and the rest of the United States;

(b) that disruption of the normal flow of maritime interstate commerce which results from a strike or lockout affecting the longshore or maritime industries on the west coast imperils the health and well-being of the people of the United States Pacific Islands;

(c) that the people of the United States Pacific Islands have frequently been innocent third parties in, and suffered enduring harm from, disruptions in maritime interstate commerce described in subsection (b);

(d) that a disruption described in subsection (b) means suffering for the people of the United States Pacific Islands comparable to that which the people of any other State would suffer if all domestic surface transportation serving such State were halted, thereby constructing a barrier around such State and preventing both the entry and exit of all goods transported thereto and therefrom by rail, truck, ship, barge, and any other means of interstate surface commerce, permitting only extremely expensive long-distance air transport into and out of such State;

(e) that the use of present Federal emergency dispute procedures for resolving disputes affecting the west coast longshore or maritime industries has not prevented serious disruptions in the normal flow of maritime commerce which has imperiled the health and well-being of the people of the United States Pacific Islands; and

(f) that provision for the continuation of normal maritime interstate commerce between west coast ports and the United States Pacific Islands is necessary in order to protect the health and well-being of the people of the United States Pacific Islands.

SEC. 3. (a) No strike or lockout in the longshore or maritime industries in the State of Washington, Oregon, or California (hereafter in this Act such States are referred to as the "west coast") which imperils the health or well-being of the people in any United States Pacific Island shall be permitted to interrupt normal shipping from any port on the west coast to any United States Pacific Island, or from any United States Pacific Island to any port on the west coast for a period of one hundred and twenty days.

(b) The Governor of Hawaii, Guam, or American Samoa, or the High Commissioner of the Trust Territory of the Pacific Islands, or the designated representative of any such Governor or of such Commissioner (if such a strike or lockout interrupts normal shipping of any United States Pacific Island where such Governor or High Commissioner is the executive) may petition any United States district court having jurisdiction of the parties to any disruption described in section 2(b) of this Act to enjoin that part of any strike or lockout or continuation thereof which interrupts normal shipping between the west coast and any United States Pacific Island, and if the court finds that such actual strike or lockout meets the condition described in section 3(a) the court shall have jurisdiction to enjoin that part of any such strike or lockout or continuation thereof which interrupts normal shipping between the west coast and any United States Pacific Island, and to make such other orders as may be appropriate, in accordance with the provisions of this section. Any such injunction and temporary restraining order shall in the aggregate remain in effect one hundred and twenty days unless discharged prior to expiration of such period with discontinuance of the disruption of maritime interstate commerce.

SEC. 4. (a) Any employee (the terms or conditions of whose position of employment are governed by the agreement entered into between the employer and the labor organization prior to such strike or lockout described in section 3(a) of this Act) who performs work or services for his employer during the term of the injunction or temporary restraining order referred to in subsection 3 (b) shall perform such work or services pursuant to wages, hours, and other terms and conditions of employment of the last agreement between such employer and labor organization prior to such strike or lockout.

(b) Each employee shall receive additional wages for performing work or services described in subsection (a) to fully compensate him for the difference between the hourly wage he actually was paid for performing such work or services and the hourly wage he would have been paid under the agreement which resolves the labor dispute had it been in effect.

SEC. 5. The provisions of the Act entitled "An Act to amend the Judicial Code and to define and limit the jurisdiction of courts sitting in equity, and for other purposes", approved March 23, 1932 (29 U.S.C. 101–115), shall not apply to any injunction issued under section 3(b) of this Act.

SEC. 6. For the purposes of this Act—

(a) the term "interrupt normal shipping" means—

(1) a refusal to permit the receipt or processing of cargo or its loading aboard a ship at a port on the west coast if such cargo is destined for use in Hawaii or any United States Pacific Island; or

(2) a refusal to permit the unloading of cargo from a ship or its processing and delivery at a port on the west coast if such cargo was shipped from Hawaii or any United States Pacific Island; or

(3) a refusal to operate (or to permit the operation of) a ship from a port on the west coast with cargo destined for use in any United States Pacific Island or a ship from Hawaii or any United States Pacific Island with cargo destined for a port on the west coast;

(b) the term "strike" has the same meaning as it has in section 501(2) of the Labor Management Relations Act, 1947; and

(c) the terms "employer", "employee", and "labor organization" have the same meanings as such terms have in section 2(2), (3), and (5), respectively, of the National Labor Relations Act.

(d) the term "United States Pacific Island" means the State of Hawaii, Guam, American Samoa, or the Trust Territory of the Pacific Islands.

(e) the term "west coast" means any port or ports located in the States of California, Oregon, and Washington.

(f) the term "maritime interstate commerce" means that cargo destined for use in or shipped from any United States Pacific Island from or to the west coast by surface transportation.

SEC. 7. The provisions of section 3 of this Act shall take effect on the date of its enactment unless a strike or lockout in the longshore or maritime industry on the west coast is occurring on such date of enactment, in which case such provisions shall take effect on the fifth day after such date of enactment.

THE GENOCIDE CONVENTION AND EXTRADITION

Mr. PROXMIRE. Mr. President, opponents of the Genocide Convention have often expressed the fear that U.S. ratification of this document would result in the extradition of American citizens to foreign countries for trial if they are accused of genocide.

There is in fact no basis for the charge that the Genocide Convention would establish a situation which does not already exist. Even with no treaty in force an American citizen can be charged in a foreign country with any offense from loitering to murder. He can also be tried on that charge if he is physically present in the foreign nation. The Genocide Treaty does not alter this and does not extend the jurisdiction of foreign courts in any way. Furthermore, under the Genocide Convention, extradition would take place only in accordance with laws and treaties already in force. The United States does not make extradition treaties with countries whose legal systems do not afford basic procedural safeguards. Moreover, we do not grant extradition in any event unless a prima facie case is established against the person charged and unless the accused will be afforded by the requesting state the due process provided by our own law.

Article VII of the Genocide Convention states:

> The contracting parties pledge themselves in such cases to grant extradition in accordance with their laws and treaties in force.

Therefore, the Genocide Convention itself does not alter extradition procedures; it stipulates they will be conducted the way our existing treaties specify. At present, we have no extradition treaties dealing with genocide, and they would be made in the future with the advice and consent of the Senate on the condition that basic procedural protections would have to be built into the treaty at the beginning.

As a further safeguard, according to George Aldrich, Deputy Legal Adviser of the Department of State:

Any extradition treaty will require the state requesting extradition to produce sufficient evidence that the person sought would be held for trial under U.S. law if the offense had been committed here.

The Genocide Treaty is, then, not in itself an extradition treaty. Since there is no reason to think that the extradition arrangements we would make concerning genocide would particularly differ from the existing extradition arrangements we have with 97 nations, criticism on these grounds is unfounded. I urge the Senate to ratify the Genocide Convention without further delay.

THE DEHUMANIZATION OF MEDICINE

Mr. KENNEDY. Mr. President, in the December 30 edition of the Washington Post I read with great interest an article by Prof. Alan Meisel of the University of Pittsburgh regarding the dehumanization of medicine. This extraordinary article insightfully describes how the medical care system in our Nation too frequently is flawed by lack of compassion.

As chairman of the Senate Health Subcommittee, I commend Professor Meisel's article to my colleagues. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MEDICINE BY MACHINES

(By Alan Meisel)

No one who has recently been in a hospital or visited a patient there can doubt that medicine is now a joint enterprise between man and machine, with the machine swiftly becoming the senior partner.

Not so long ago—in fact, as recently as the early part of this century—the doctor's main weapon against pain and suffering was his ability to comfort the ill and dying. Doctors could rarely take direct medical action against disease, and often when an accepted medical practice was used, the patient fell victim to the treatment itself.

The medical profession now has the capability to achieve good results more frequently than bad ones. But this shift in the odds of success has not been without its price—and the price seems to be increasing along with that of everything else. One of the prices of high-quality medical care is that machinery of a highly sophisticated and complex nature has begun to play an increasing role in medicine. Treatment often emanates from a machine in the form of lasers, radioisotopes, synthetic chemicals and sonar.

The result is that many doctors view themselves as the operators of medical machines designed to process an endless flow of patients, rather than as healers of human beings. Cadres of technicians have also been cultivated to operate the machines, inserting another barrier between the doctor and the patient.

Medicine has come to resemble an assembly line, with a stream of interchangeable patients parading by white-coated doctors. Like an industrial assembly line, the medical assembly line occasionally suffers a breakdown when one of the patients refuses to behave like the inanimate object that the doctor thinks he is. It is not uncommon, for example, that diabetic patients who develop gangrene in their feet or toes may need amputation. Yet they often refuse it, even maintaining their refusal when the gangrene becomes so serious that it threatens them with more extensive amputation or posibly with death. Yet all that is needed to get the patient to cooperate is for the doctor to explain the reason that the amputation is necessary.

When an industrial assembly line breaks down, the workers on the line are sometimes unable to fix the problem themselves and must call in a specialist to get the line started up again. The doctors who perform various operations on patients moving rapidly along the medical assembly line are also often unable to get the line moving again when it has run amok. A specialist must be called in. The medical specialist must talk to patients, find out what's troubling them, and treat them as if they were the humans that they actually are, rather than as an "appendectomy" or an "amputation" or a case-of-this or a case-of-that.

Because the practice of assembly-line medicine is so well accepted among doctors, even among those who do not approve it, the doctor often cannot understand why a patient rebels. Doctors tend to avoid the obvious reason that the patient is actually a human being who dislikes being treated like a piece of broken machinery and would welcome the opportunity to have his doctor spend a few minutes explaining why a particular kind of treatment is needed. The doctor instead views the patient's refusal to cooperate as an illness in itself.

Thus the specialist who is called in to get the line running again is frequently a psychiatrist, both because he is trained in the art of talking to people (which most other doctors have long ago forgotten how to do) and because a patient's uncooperativeness is viewed as an illness. It is the psychiatrist's job to try to talk the patient into hopping back on the assembly line.

In light of the fact that only in the last 50–75 years have doctors been able to be of much benefit to their patients other than by talking to them, it is ironic that medicine has become so mechanized that we now have specialists whose job it is to talk to patients. Worse, the mechanization of medicine is so thorough that psychiatry has begun to succumb to its own form of dehumanization, if not outright mechanization.

Because psychiatrists are doctors, too, they are often not happy about having to talk to patients either. While machines have not yet been developed to do psychotherapy, psychiatrists have created the equivalent of a new class of technicians to talk to patients, so their own time may be used to attend to more important "scientific" aspects of psychiatry like chemotherapy, electroshock, biofeedback and research. Thus nurses and social workers are often given the job of trying to explain to the patient what the doctors will be doing to him, and how and why.

This sad irony has finally begun to permeate the dense ivory walls of academia. Spurred by financial incentives from the government, medical schools are again trying to train doctors to view patients as people and treat them the same way. One technique is encouraging young doctors to become general practitioners—in part by sprucing up the image by changing the name to "family practitioner." Another encouraging sign is that medical students are being taught to "interview" patients. What would be even better if medical schools tried to admit students who naturally know how to talk to other people and do not need to be taught how to do so.

It is probably not possible or wise to try to set back the clock and expect modern medicine to get along without the machine. We can no more live without medical machines than we can without doctors.

And that is the problem, because for some time we have increasingly been having to get along without doctors—that is, without persons who are able to perform the caring, as well as the mechanical aspects of medicine. Our well-being will as surely be compromised by the dehumanization of medicine as it would by a return to horse-and-buggy medicine. If we are unwilling to tolerate the latter, why is it that we put up with the dehumanizing mechanization of medicine?

ENERGY OUTLOOK CONUNDRUM

Mr. BARTLETT. Mr. President, as the domestic energy issue is of imminent importance to the Congress and the American people, I feel that a recent statement by Mr. C. H. Keplinger of Tulsa, Okla., is timely and will be of interest to my colleagues. In a statement dated November 23, 1976, Mr. Keplinger gives an overview of the U.S. energy outlook and correctly predicts the OPEC price rise of last month. What he has to say is pertinent and clear. I ask unanimous consent that Mr. Keplinger's statement, "Energy Outlook Conundrum," be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

ENERGY OUTLOOK CONUNDRUM
